Mary Louise Shine's smile wins recruits for a proud profession!

220800

Mary Louise Shine, R. N., didn't know she was qualifying as a photographer's model when she graduated from the Georgetown University School of Nursing in 1945. But, remembering her cheering smile, former patients won't be surprised at her selection as a Model Nurse. Her picture is appearing now in newspaper and magazine ads, and on billboards all over the country... inspiring young Americans to join the proud nursing profession. A Scarsdale, N. Y., girl, Mary Louise is the recent bride of a Chicago doctor. And she says the tooth paste she buys for her honeymoon apartment is the same brand she always used at home—Pepsodent. Yes, Mary Louise Shine's winning smile is a Pepsodent Smile!

The smile that wins is the Pepsodent Smile!

y Louise Shine knows it—and people all over America e—the smile that wins is the Pepsodent Smile! New Pepnt with Irium is their 3-to-1 favorite for brighter smiles.

Wins 3 to 1 over any other tooth paste

ilies from coast to coast recently compared delicious Pepsodent with the tooth paste they were using at e. By an average of 3 to 1, they said New Pepsodent s better, makes breath cleaner and teeth brighter than other tooth paste they tried. *For the safety of your smile Pepsodent twice a day—see your dentist twice a year!*

Another fine product of Lever Brothers Company

Do you have a winning smile? If Pepsodent Tooth Paste has helped your smile and career—send your picture and story to Pepsodent, 141 W. Jackson Blvd., Chicago 4, Ill. If used you will receive regular professional model fees.

Picture OF THE MONTH

Metro-Goldwyn-Mayer presents

IRVING BERLIN'S

"EASTER PARADE"

Starring

JUDY GARLAND · FRED ASTAIRE

PETER LAWFORD · ANN MILLER

Color by TECHNICOLOR

Screen Play by SIDNEY SHELDON, FRANCES GOODRICH and ALBERT HACKETT

Original Story by FRANCES GOODRICH and ALBERT HACKETT

Lyrics and Music by...IRVING BERLIN

Musical Numbers Directed by ROBERT ALTON

Directed by.....CHARLES WALTERS

Produced by.....ARTHUR FREED

We know you'll consider the following statement pretty tall but we'll stick to every inch of its height. "Easter Parade", the new M-G-M musical, is better than anything of the kind that has come along on screen—or stage—since forever.

Irving Berlin, whose name is synonymous with good shows, has used seventeen of his songs, some old, some new, to make the best score your ear has ever received. And the occasion is truly superlative.

Judy Garland and Fred Astaire are at their happiest and most rhythmic. And they are ably abetted by Peter Lawford and Ann Miller. The story by Frances Goodrich and Albert Hackett has been arranged into a fine screen play by Sidney Sheldon in collaboration with the authors, and Charles Walters has directed the dramatic and comedic action superbly, as has Robert Alton the dancing. To complete the credit we doff a bowler to producer Arthur Freed.

Someone said that this picture makes it Easter in July. Regardless of what it does to the calendar it is a holiday all in itself. The lush, colorful—Technicolorful—production is in the best M-G-M manner. Indeed only one previous picture—"Anchors Aweigh"—can be mentioned in the same breath as this one. There's a light and breezy story that allows the songs to come to life, among them "A Fella With An Umbrella", "It Only Happens When I Dance With You", "Better Luck Next Time"—the inimitable "A Couple Of Swells", and many more, topped off by the classic titular number.

If you had to pay Broadway show prices for this one you'd not be cheated.

P.S.—If you want to hear some of the hit tunes from the picture, they're available on M-G-M Records.

THE WEEK'S MAIL

DOODLE DOO

DEAR SIRS: In Doodles International (May 22d) Senator Vandenberg's analysis is rather askew. His doodle subconsciously exhibits a fear complex, represents the U.S.S.R.—the traditional Russian anarchist brought up to date. Note that the hair has the shape of a sickle, with the handle on the left side. The ears may well represent the radio: propaganda outlets. The glasses with their thick lenses can either magnify very small things to a degree outside their merit, or else distort them beyond their proportion. The set lips indicate a determination to achieve an end whilst the beard bristles denote expansion in all directions. The many squares are the subconscious expression on the part of Vandenberg of the subtle undercover work being carried on by the U.S.S.R. in many lands. The pointed fingers indicate the readiness just to press the button (note how close they are to a button) which will result in world revolution. Note that the whole figure is definitely a robot, which fairly and accurately pictures a dictatorship. ERIC O. ROBATHAN, Pendleton, Ore.

U.S.N. REPLY

DEAR ED: I note with interest an excerpt from a letter signed Super Grade Lieutenant (The Week's Mail, May 22d), in which he states: "The planes assigned to my Naval Reserve squadron were turned over to us after having been worn out by the regulars. They are just plain not safe."

As maintenance officer for Carrier Air Group No. 79, a reserve air group currently attached to the Naval Air Station, Willow Grove, Pa., I extend a hearty invitation to "Super Grade Lieutenant" to fly any airplane attached to our strictly reserve station, which he is qualified to fly. Further, if his pilot technique is at the same level as our aircraft's airworthiness, I will be glad to ride without a parachute.

L. A. PATTERSON, Buffalo, N. Y.

LETTER FROM THE LETTER CARRIER

DEAR SIR: Just finished reading the editorial, Air Mail Can Take Two Bows, May 22d. However, regarding salaries of postal employees, the men and women who

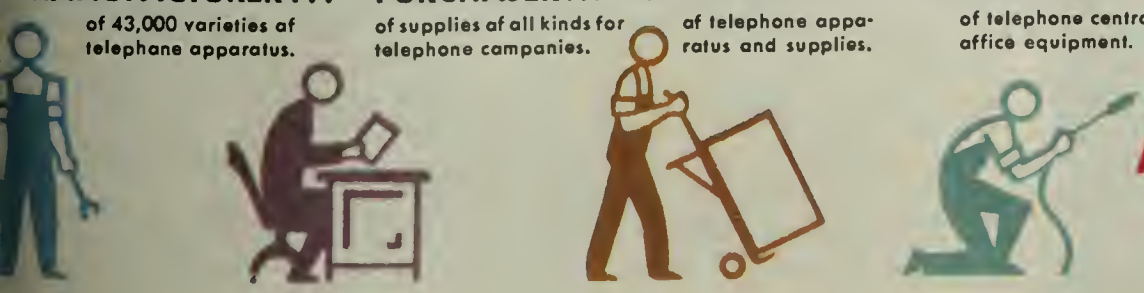
"They're coming! The telephone men are coming!"

"They're coming!" shouted a West Virginia mountain boy. "They say we'll have our telephone before the end of the week, and so will Grandma!"

That's happening all over the country. During the past two and a half years, Bell Telephone companies have added about 775,000 telephones in rural areas—built enough new rural pole lines to stretch nearly two and one half times around the world—strung more than 375,000 miles of wire.

In this vast program of rural telephone expansion, Western Electric is playing a vital part: manufacturing telephones, switchboards, wire and cable — supplying poles, crossarms, insulators, power-driven pole hole augers and many other tools the construction crews need to do their jobs quickly and well.



In cities, towns and suburban areas, too, *more* and *better* telephone service is coming fast. To help the Bell Telephone companies meet *your* needs, Western Electric is today doing the biggest manufacturing and supply job in all its 66 years as a unit of the Bell System.

MANUFACTURER... of 43,000 varieties of telephone apparatus.

PURCHASER... of supplies of all kinds for telephone companies.

DISTRIBUTOR... of telephone apparatus and supplies.

INSTALLER... of telephone central office equipment.

Western Electric

A UNIT OF THE BELL SYSTEM SINCE 1882

THE BIG PUSH

BY BILL FAY

IN CONVERSATIONS with prospective pledges, the sisters of Sigma Delta Tau, University of Michigan chapter, always mention that Charley Fonville waits on table and eats at their house. Quite properly the sisters regard Fonville as a testimonial to Sigma Delta Tau cuisine.

Fonville, a Negro medical student, specializes in shoving 16 pounds of lead through the air—a calorie-consuming exercise called shot-putting. A couple months ago, when Charley cranked up and let go at the Kansas Relays for 58 feet and ⅛ of an inch, the judges could scarcely believe their steel measures. The prodigious put exceeded the world record by almost a foot. It also started an argument between Fonville and his coach, Ken Doherty.

"All winter," Fonville explains, "Ken kept betting milk shakes that I couldn't hit 57 feet. Every time I missed we added a shake to the bet. We were up to 93 shakes when I hit 58 at Kansas, so that made us even."

"But you didn't hit 57," Doherty argues. "You hit 58. You never hit 57 in your life. You owe me 94 shakes—double chocolate malteds."

In many other sports, particularly horse racing, Fonville's unprecedented performance would have called for an investigation, perhaps a saliva test. Happily, shot-putters are notoriously inconsistent. Jack Torrance, the previous record holder, never hit 56 feet. He was a 55-plus putter before and after his historic heave of 57 feet, 1 inch.

"Fonville's 58-footer was a case of mind over muscle," Doherty contends. "Charley weighs 194 pounds and he's a bit over six feet—not the weight-lifter physique you usually associate with shot-putters. You might say that Charley is the first streamlined shot-putter."

Probably Torrance is to blame for that. Jack was a beefy 290-pounder with muscles in his eyelids. When he grunted for the record in 1934, track fans just naturally assumed the mark would stand until somebody with more grunt came along.

"They were looking for Superman," Doherty says, "and they got Charley instead. Charley doesn't even grunt. He uses speed and co-ordination instead of weight. Torrance hopped on his right foot—paused to gather his weight—and then pushed. Fonville makes it all one motion—no pause, no grunt."

How does Fonville explain the 58-footer? He can't. "Might make a good story if I said it felt just right," Charley says, "but honestly I didn't notice any difference. Could have been 55. Could have been 56. Guess everything just co-ordinated right."

Charley doesn't fuss with the body-building exercises and tennis-ball-squeezing routines so dear to the training schedule of most shot-putters. All Charley does in practice is put the shot so far that it takes three medium-sized student managers to relay it back.

Charley Fonville, the University of Michigan's streamlined shot-putter, amazed the sports world by smashing the all-time record with a heave of 58′ ⅜″

ACME

FUSSY BUZFUZ

Trainer Joe Rosen of Sunshine Stables was peeling a tangerine outside Buzfuz's stall at Hialeah when the horse nosed his hand. Rosen split the tangerine and Buzfuz swallowed half. Joe offered Buzfuz an unpeeled one. Buzfuz wouldn't take it.

"That horse likes tangerines, all right," Rosen told owner Dan Chappell, "but they've got to be peeled."

"Really," Chappell murmured, "what does he do with the seeds?"

THE VARSITY SWING

Intercollegiate golf time again . . . future Walker Cup stars scrambling over the Stanford course. Charley Coe of Oklahoma, Lou Stafford of Oregon, Joe Moore of Louisiana State, defending champion Dave Barclay of Michigan. Everybody watching Harvie Ward, the red-hot putter from North Carolina, remembering he won the North-South at Pinehurst. . . . Coaches talking things over in the shade of the big scoreboard, recalling thrilling matches of 50 past intercollegiates. Like that crazy first-rounder between Charley Yates of Georgia Tech and Walt Emery of Oklahoma in Washington, 1935.

"Yates is the defending champion and the British amateur champ as well and Emery won the college title in '33. Yates goes to bed early, but Emery goes to a dance.

"Well, Yates checks in on time next morning—they were supposed to be first off at eight o'clock—but Emery doesn't show up. Finally, Yates walks up to the tee and there's Emery sound asleep. Hasn't even had a shower. Seems he wandered away from the dance to cool off and fell asleep.

"Emery wakes up and looks at Yates. They were great friends. 'Where you been?' Emery asks. 'You're five minutes late.' Finally, he tees up and starts to swing—stiff as a board—but can't make it. 'Guess I better try a few,' he says, stepping back. He swings again and the club flies loose and darn' near hits Yates.

" 'That won't do,' Emery says, grinning a little. Ever see that first hole at Congressional? It's a par five, rising for about 260 before it drops off. Well, Emery grunts and stretches some more and then slugs his drive over that hump about 280 yards. He eats his breakfast—coffee and doughnuts—going down the third fairway and for a fellow who slept out all night he does mighty well after that. They're all even on the 18th and Emery says, "Well, Charley, looks like we gotta shoot some more golf.'

"Yates birdies the 19th and Emery needs an 18-footer for a half. He's lining it up when a spectator shrieks and falls over in an epileptic fit. There's a 20-minute wait for the ambulance. Emery dozes in the shade, then goes back and knocks in that 18-footer!

"On the 20th, Emery drives into a bunker. He has to stand in a trap and swing a choked-up brassie because the ball's sitting there knee-high. Darned if he doesn't hit a 200-yard home run onto the green for another half.

"Yates putts three feet shy on the 21st and stymies Emery who's 40 feet away on the edge. Looks like the end for Emery because they're both lying two. 'That's kinda dirty,' Emery says. 'Looks like it's dead, Charley. Come on over here and take a look.'

"Yates looks and says, 'You're pretty well wired, Walt.'

" 'Guess I'll have to play a follow,' Emery decides. That meant putting into Yates's ball absolutely dead center so his own ball would follow along behind like a billiard shot. It's a million to one, but Emery smacks Yates's ball and both of them roll toward the hole. Yates's ball hops over, but Emery's hits the far edge of the cup, bounces back against the near edge, then bounces out and dies on the lip. So Yates taps his in and wins, but you never saw another match like it."

LAZY MAN'S SPORT

Baseball managers have to walk up and down in the coaching box at first or third base when their teams are at bat. During rallies, managers also have to clap their hands and whistle. Boxing managers have to fan their boys between rounds. Horse trainers have to get up early to watch their animals run. It seems that managers and trainers must expend some physical energy in every sport—except pigeon racing.

You can race pigeons from a rocking chair. The Railway Express Company calls for your birds, delivers them to the starting point (100 to 500 miles away) and releases them at the designated minute.

Meanwhile, you rock and read while your birds fly 300 miles a day.

KEEP UP WITH THE WORLD

BY FRELING FOSTER

Railroad fans who collect photographs of old engines can supplement their hobby today with recordings of the real sounds—bells, whistles and roaring exhausts—produced by various steam locomotives of several roads.

Knowledge of the human skeleton has advanced so far that an anthropologist can determine many physical characteristics of a dead person by a study of the skull, pelvis and one or two arm or leg bones. For example, one expert, given several bones that had been found in a ditch, reported they had belonged to a female mulatto, thirty-three years old, 66.5 inches tall and weighing 120 pounds. An actual description of the woman, discovered later, showed that she had been a mulatto and the expert's estimate had come within six months of her age, a half inch of her height and five pounds of her weight.

Because the slow loris, a small, monkeylike animal of the East Indies, is nocturnal and cannot stand bright light, it frequently shields its enormous hypersensitive eyes with its forepaws when awake during the day. Thus, as the loris appears to gaze at something in space, the natives believe the animal sees ghosts.

Germany has just introduced a new type of shoe for women which has a metal compartment in the sole to hold thermite. When a small piece of this substance is inserted and moistened, its chemical reaction produces sufficient heat to keep the feet warm on a cold day.

In 17th century England, every town kept several branks (bridles that gagged the wearer) which were used to silence women whose constant chattering or scolding annoyed their families and neighbors. The device was placed over the head of the offender, locked and not removed until she had promised to curb her tongue.

For publicity, a number of men have crossed the English Channel in freak ways of their own devising. One man, for instance, rowed across in a casket, another walked across wearing large wooden boots shaped like a flatboat, and another traveled across on his back, encased in an inflated rubber suit equipped with a sail about the size of a bath towel.

That nearly three quarters of all fires break out in the last half of the day is shown by a study of the 85,468 fires that occurred in New York City during 1946 and 1947. Twelve per cent started between midnight and 6 A.M., 16 per cent between 6 A.M. and noon, 41 per cent between noon and 6 P.M. and 31 per cent between 6 P.M. and midnight.

When the station wagon of a wealthy resident of Long Island was wrecked in 1939, the occupants who were injured filed claims that totaled $225,000. As the insurance company found the claims were justified, they were promptly paid and constituted the largest settlement ever made on an automobile liability policy for a single accident.

Throughout most of Ireland, wakes held for deceased relatives surpass anniversaries, christenings and weddings in interest, preparation and attendance. Moreover, many of them are still accompanied by keening, the night-long wailing in unison, by those present, of a weird lamentation or dirge.

A low-calorie diet usually is more effective than exercise for reducing human weight. To work off but one pound for example, it is necessary, in most cases, to walk at least 35 miles.

Ten dollars will be paid for each fact accepted for this column. Contributions must be accompanied by their source of information. Address Keep Up With the World, Collier's, 250 Park Ave., New York (17), N. Y. This column is copyrighted and no items may be reproduced without permission.

THE WEEK'S WORK

The Berenstains—four hands are better than two

WE DON'T know whether the cartoons on pp. 38 and 65 were drawn by Stanley Berenstain or his wife, Janice. It seems that the Berenstains met in art school in Philadelphia and had been brought up within a few blocks of each other in West Philadelphia. "We kicked the same stones on the same sidewalks, attended the same Saturday movies, and so forth," says Mr. Berenstain, "and though we went to different grade schools, we might have met in high school if the Grants hadn't moved Janice to the suburbs."

In any event, after a sketchy romance, they merged lines and began what may be the first husband-wife cartoon team in history. It's difficult for the Berenstains themselves to say who does what in their work: "I do what I think is an excellent cartoon," says Mr. B., "and show it to Janice, who says it's a good picture but a lousy caption. She substitutes what she thinks is an excellent one and I say, 'That's a swell caption but it doesn't go with the picture.'"

So Mr. Berenstain changes the picture and it is placed with a pile of others arrived at in similar manner. Later they root through this stack of very rough sketches, select what still appeals to both, split the results in two, and begin drawing. "What results," says Mr. B., "is a week's batch of roughs for submission, a roomful of discarded sketches, orange seeds and apple cores. Then I go to the post office with them, and Janice cleans up. Recently a monkey wrench was thrown into our well-oiled machine: name, Leo, weight at birth, 7 pounds, 7 ounces."

ALFRED (ALF) LOOMIS gets that salty authenticity for his breezy Bermuda yacht-race yarn, Errors of Judgment (p. 50) from the fact he himself has been navigator on boats in eight of these blue-ribbon events.

Between chores as free-lance writer and editor, Mr. Loomis, a Brooklyn lad of fifty-eight, has also raced in four Fastnet races—*the* English long-distance yachting event; was aboard the schooner Pinta in '28 in the New York-to-Spain race; and has been navigator on three winning boats in the St. Pete-to-Havana yachting classic. Besides, Mr. Loomis has looked at a lot of fast-streaking blue water beneath his own yawls and cutters; and right now is looking forward to his first San Pedro-to-Honolulu dash.

Although Mrs. Loomis has often cruised and raced with her accomplished tar of a husband, she has never made the Bermuda run. "So my story is not entirely autobiographical," admits Mr. Loomis. "However wives have raced with their husbands and my maritime marital situation i highly plausible."

We asked Mr. Loomis what yacht race widows do while their husband are away on a thrash to windward.

"I don't know," he replied. "I've never been there to find out. I d know that many of them like to fly t Bermuda to join their husbands at th finish line."

ALBERT MAISEL, who, since V-Day has been enlisted in the wa in behalf of our G.I.s, now reports o the housing battle in a slashing two part article: Scandals in Veteran Housing (p. 14). Oddly, of all th jerry-building he inspected on his n tional cross check, walls made th deepest impression on the crusadi Mr. Maisel. In one house he four the walls so thin he couldn't do h interviewing because the family the next house were locked in dome tic combat.

"When the husband began smac ing his wife against the wall, and t wall shook, I carefully moved to t opposite wall to avoid the body I e pected to come hurtling through m mentarily," Maisel says.

So he made a note that partiti walls should specify standard strength sufficient to take the weig of a veteran and his wife; that buil ers should supply doors for all ope ings made by undue strain, and mov on.

In fact, Mr. Maisel got so used inspecting walls that when he board a plane from L.A. to Oklahoma Ci he found himself absent-mindedly fi gering the plane cabin walls f proper code thickness. This caused hostess to eye him suspiciously a finally ask if there were anythi wrong. "I murmured something abo not satisfying the Los Angeles bui ing code," he says, "before I came t

Mr. Maisel still wakes up dreami of a fire breaking out in one of t long rows of houses he saw.

"Where the fire walls have not be built up to the attic," he believes, " outbreak in a single house might e danger many families."

This week's cover: Baby Sitter, Forced Feeding. Photographer Shir Wright of Los Angeles was visit the Diamonds, some friends from D troit, when he heard Mrs. Diamo ask Bobby Diamond, age 4, to feed brother Gary, age 3 months. Cr Bobby, "Aw gee, Mom—do I h to?" Shiney had an idea. . . .

How a Free Market Works

The New York Stock Exchange serves millions of investors all over the country. Here's how:

Let's spend a few minutes with Mr. Clark of San Francisco. Mr. Clark has accumulated some surplus funds he wishes to invest in securities, and he is gathering information from many sources before making a decision.

Mr. Clark visits the offices of a Member Firm of t New York Stock Exchange. With one of the firm's re resentatives, he discusses a number of companies, a decides on the security that best meets his own nee

Before placing an order, Mr. Clark asks for a "quote" on the security. Over the Member Firm's direct wire to its New York office, a clerk teletypes a request for the current best bid to buy and the lowest offer to sell.

By a second direct wire, the information is obtained from the quotation room at the Stock Exchange. Quotation clerks on the trading floor keep this room constantly abreast of the current bid and offer quotations.

Back to San Francisco goes Mr. Clark's quotation. order is placed, and is wired to the New York of for immediate relay to the Member Firm's teleph clerk (see above) on the floor of the Stock Excha

The Member Firm's floor partner gets the order from the clerk and, acting for Mr. Clark, goes to the trading post where the security is bought and sold. It was at this post the bid and offer quotations originated.

To this post comes a second member, representing a Mrs. Horn of Atlanta, who wishes to *sell* the same security. As the first broker bids, the second offers to sell, both seeking the best possible price.

A few days later, Mr. Clark receives his stock cer cate and Mrs. Horn gets her check. The transaction been completed promptly, conveniently, through nationwide facilities of Stock Exchange Member Fi

CUPID WITH CELLULOID WINGS

BY WILLIAM CHAPMAN WHITE

In Hollywood an arrow in the heart is often as fatal as a knife in the back

THE boy and the girl sat in a car by the beach below Malibu, with a special California moon overhead. The boy was Eddie urran who had been on the National lot just six eeks. Right now he was hunting words. Around ollywood, real-life conversations get as routine as icture dialogue. Stumbling and fumbling along, ddie found the same words a lot of other young tors had used in a "The-Other-Girl-Didn't-Mean-Thing-to-Me" scene. "Don't be jealous," Eddie id. "When you're new in Hollywood it's hard to ep your balance sometimes. Anyway she was an ful creature and I'm sorry I hurt you and I don't er want to be apart from you again, baby."

The pretty brunette beside him moved in closer nd just said, "Oh, Eddie!" She was Milia Fortune, ne of the most promising kids on the National lot. Sure, I know how it is. Every woman goes crazy hen she sees you, same as I do, only I love you so uch. Let's get married right away so we won't ver have any more troubles."

"Any time you say." Eddie pulled her closer. Boy, I'm happy!" . . .

A half mile down the beach was the home of Al orse, the fifty-year-old head of National Films, ith thirty years in Hollywood. He was sitting by e huge fireplace in his living room, listening to o of his producers arguing. He got tired of lisning and complained, "Troubles, troubles! That's ll the picture business ever brings you. I bet there n't a happy person anywhere in Hollywood."

"But, wait a minute, Al!" one producer interupted.

"Listen to me, Al," the other producer cut in.

Al shut them up with a frown. "Each of you ants Eddie Curran in your next picture, so what m I to do, split him in half? Sure, Eddie's the ost talented juvenile we've had out here in years nd he'll drive a lot of women crazy some day with at trick he's got of looking helpless and like a e-man, at the same time. Here in this business ou always got people and they always got probems. I'd be happier in the pig-iron business. You now what I go through to make pictures?" Al hook his head like a weary man. "To stay in this usiness you gotta be a combination of Solomon nd George Washington and Daniel Boone and the King of England—"

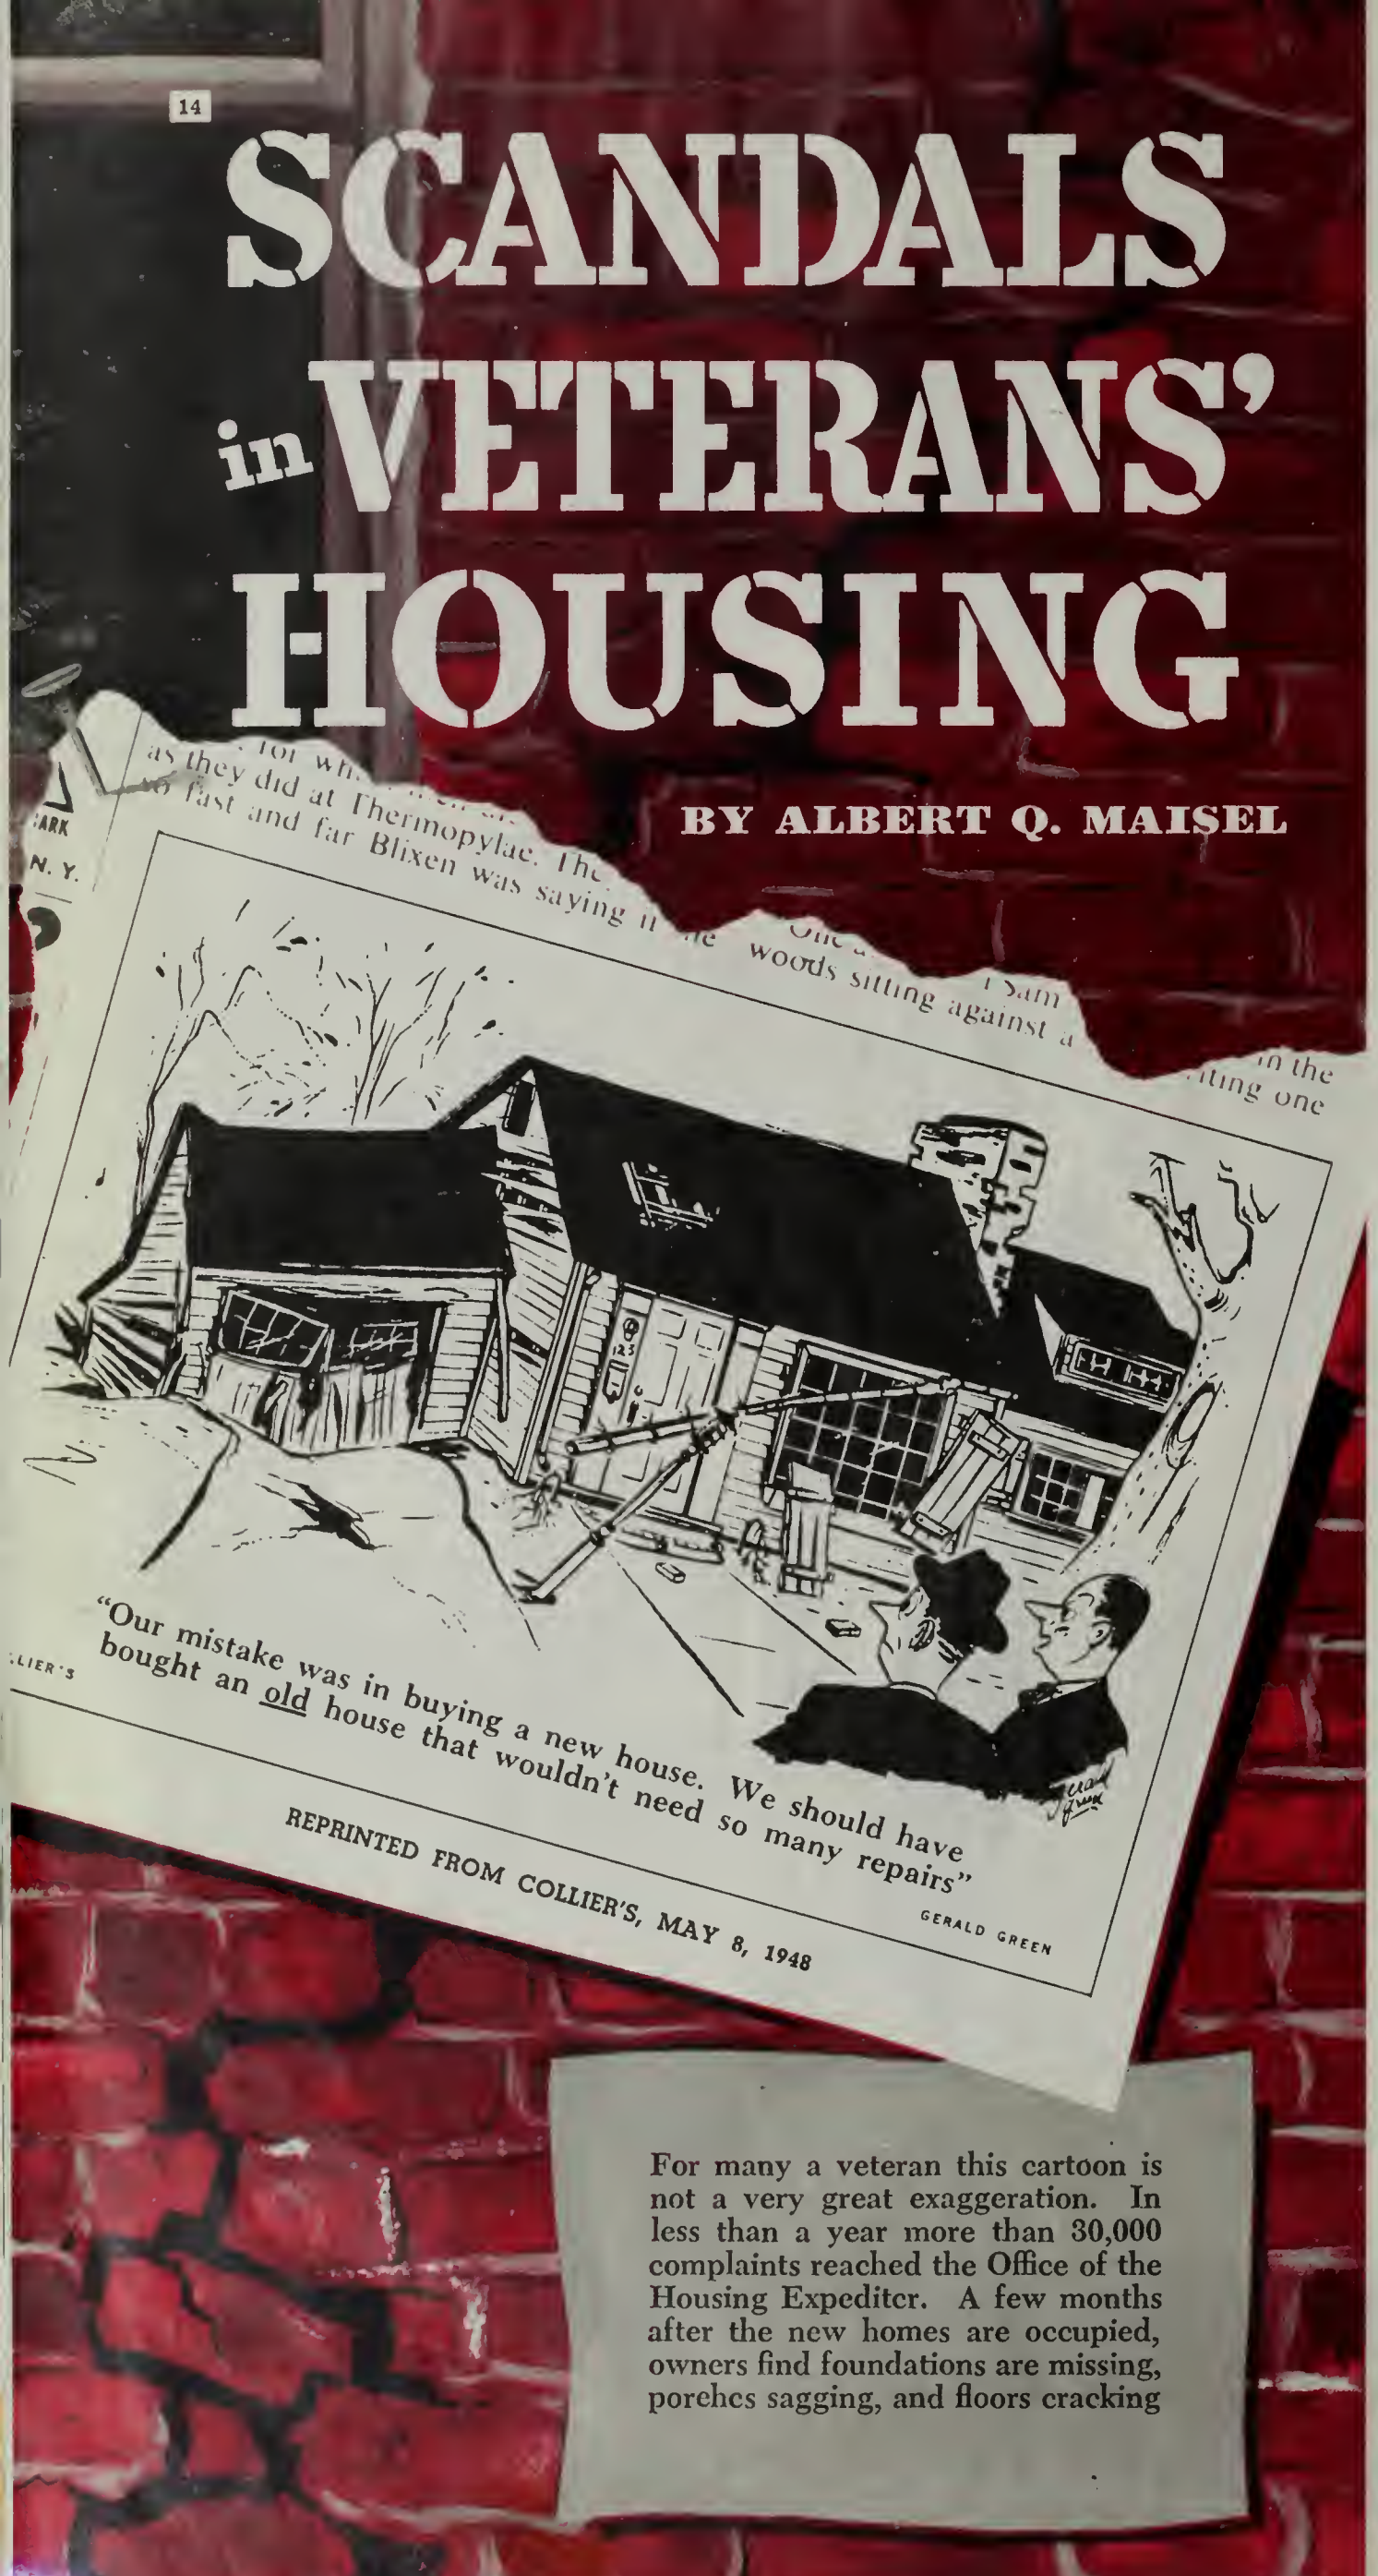
The telephone interrupted him. When he came ack ten minutes later he was shaking his head. He asked, "Who was that guy Cupid?"

"An old-time Greek who flew around on wings."

Al settled back into his chair. "You can add him o that list of guys I gotta be. How did this cupid perate?"

"He went around shooting arrows."

Al grunted. "He should have used a baseball bat. That was Dorothy Bond on the phone. Kin Bond's got that new girl from New York in his picture and as usual he falls for any *(Continued on page 32)*



Ellen called across the restaurant with the quiet intimacy of a loud-speaker, "Eddie, my love, my darling pet," and she started toward him, dragging Joe along like an old handbag

SCANDALS in VETERANS' HOUSING

BY ALBERT Q. MAISEL

For many a veteran this cartoon is not a very great exaggeration. In less than a year more than 30,000 complaints reached the Office of the Housing Expediter. A few months after the new homes are occupied, owners find foundations are missing, porches sagging, and floors cracking

There have been some abuses in the building of houses for veterans, and it is concerning these only that Collier's is publishing this article and the one next week. These articles must not be regarded as a criticism of the home-building industry

IT WAS early in the morning when I got to 3875 Woodward Avenue, on the outskirts o Fresno, California. A bright, warm sun gleamed over the snow-topped mountains. The flowers on the front lawn looked as beautiful a they do in the seed-house ads. Even the cracker box houses seemed not too pinched in the clea California air.

Then I went into the back yard, and the beautifu picture vanished. John Seib, a young veteran wh spent thirty-seven months in the South Pacific handed me a copy of his house plans, with th builders' signatures neatly inscribed at the prope place in the lower left-hand corner. Seib griml pointed out the detailed drawing of the house' foundation. It called for a concrete floor with sub stantial footings supporting it all around.

Then he picked up a shovel and, with the deftnes of an infantryman digging a foxhole, began to wor at the point where the side and rear walls meet. H had barely gone below the surface when I saw wha had made him so angry.

The footings the plans called for—the founda tions that were supposed to hold the house up- were almost totally lacking. The seemingly sturd concrete ended abruptly just an inch or two belo the level of the ground.

Still skeptical, I suggested moving over a fe feet. Again Seib dug. Again we looked in vain f anything approaching the sort of underground co struction called for in the plan.

Later that morning I saw similar conditions at dozen other houses on the Southeran Homesit Tract along Woodward and Braly avenues. In th house of Arthur Hein at 3826 Braly Avenue, th rugs were pulled back so that I could trace a gia cobweb of wide cracks in the concrete floor—crac that extended from wall to wall.

"They called these 'surface cracks' when I cor plained," Hein told me. "But look at this," he we on, taking a glass of water and pouring it on one the cracks. As we watched, the fluid disappear through the fissure.

Hein and Seib and more than 40 other vetera who bought houses a year and a half ago on t Southeran Tract are luckier than thousands others throughout the nation. They have begun get results after months of campaigning in whi they carried their protests from the mayor's housi committee right on up to the White House.

Most of the more than 2,000,000 veterans w have acquired newly built homes since the end the war have been well satisfied, or at least mod ately so. Despite material and labor shortages m builders have complied with building codes a measure up to plans and specifications.

But to all too many veterans the promise of postwar dream house has turned into a nightma Young, guileless and inexperienced in both bui ing construction and the laws governing it, th veterans placed their faith not only in builders b in government agencies that were supposed to regulating construction, checking thoroughly bef making loans, supervising compliance with buildi codes and generally keeping an eye on the vetera interests.

After a year and a half, the fight of the Southe Tract homeowners in Fresno resulted in action b federal grand jury. A 53-count indictment w brought against the builder, William C. Albany, a his exclusive agents, Richard M. Vail and Wad Howells, all three veterans of World War II.

The building firm of William C. Albany & C through Vail and Howells, obtained priorities n 1946 to construct more than 50 houses. Under e law that then existed the federal governm t granted priority for the obtaining of building m terials and demanded, in return, that the houses e sold at fixed ceiling prices.

The veterans who bought these houses had o idea they were paying more than the ceiling pr e.

Their original complaint centered, rather, about claims of defective construction and the omission of many promised pieces of equipment. But after many turns of the carrousel—they went fruitlessly round and round, from the Veterans Administration to the Federal Housing Administration to the builder and to the bank—they managed to get the Office of the Housing Expediter to detail a man to Fresno. A prolonged investigation disclosed that the veterans had been charged, on the average, about $1,600 more for their homes than the government-set ceiling.

Albany, Vail and Howells were to stand trial on charges of conspiring to obtain priorities to build houses for war veterans and then departing from the plans and specifications under which the priorities were obtained, and with conspiring to sell the houses at prices greater than the sales price fixed as the precondition for granting priorities. Arraigned in May, the three pleaded not guilty to all counts.

This case has aroused particular interest because one of the three defendants, Richard Vail, was an active member of the six-man American Legion national housing committee. This committee has opposed many features of the federal veterans' housing program and has been particularly active in seeking the abolition of the National Housing agency and the Office of the Housing Expediter.

The Fresno case in court stemmed out of the help given the veterans by the Los Angeles Daily News and its reporter, Sara Boynoff, a five-foot-two-inch dynamo.

When the Victims Phoned In

When her first few stories about jerry-built Los Angeles houses had appeared, liberally illustrated with photographs of cracked walls, missing foundations, warped doors, leaky roofs, and bathtubs that had fallen through the floor, the switchboard at the News was swamped with calls from veterans and their wives until Sara took to answering her phone with the shout, "The first thing you do is hire a lawyer!"

Other calls were made at the News, by polished gentlemen who sought out publisher Manchester Boddy and bluntly implied it wasn't smart for a newspaper that carried a lot of real-estate advertising to indulge in muckraking. Boddy threw the gentleman out and stepped up the campaign.

Reporter Boynoff made a point of visiting some of the housing projects built by the very people who had complained that the News was giving good builders a bad name by photographing the work of a few fly-by-night developers. Within a few days the News had sets of photographs showing even more glaring frauds at some of these projects.

Aided by this newspaper, the United States attorney in Los Angeles and his staff went to work with a vengeance. U.S. Attorney James M. Carter has led long lines of former G.I.s before a grand jury. His inquiry has left those responsible for scandalous building jobs quaking with fear of the consequences.

What has happened in Fresno has happened in various places over the country. In Baltimore I have seen fire walls that were not completed to the roof and thus endangered every occupant in long rows of houses.

In Sacramento a veteran failed to catch a baseball pitched by his nine-year-old son. When he turned around to look for the ball he found a gaping hole in his house where the ball had disappeared through the wall. In a neighboring house, less than a year old, an investigator for the Office of the Housing Expediter counted 87 separate holes in the exterior walls.

A complaint from Madison, Wisconsin, lists 84 defects in a single house, including failure to supply screens, insulation, downspouts, coal-bin, plumbing and electrical fixtures. In one Baltimore case an entire room was omitted. In Wisconsin the builder of a home casually forgot to put in the attic floor the plans called for. In Oklahoma I have seen buildings less than four months old already warped far out of plumb. This in tornado country where even a well-built house requires extra bracing.

Marked Money Under the Table

A builder in Wisconsin obtained priority materials on the promise he would sell his houses at $7,800. Later he appealed to the FHA and the ceiling was raised to $8,600. Still later he asked for another increase and the liberal FHA authorities told him he could go up to $9,500. Then he demanded $500 "under the table" when he sold. Fortunately for the buyer, in this instance, marked money was used and the builder was caught and fined $5,000.

In New York recently another builder drew a one-year jail term for overcharging ten veterans an average of $2,100 on their homes.

In a community in Pennsylvania there stand 42 houses that were sold to veterans in the fall of 1946 for $7,500 each. Two other slightly smaller homes brought $6,500.

Almost as soon as the veterans moved in they began to discover an endless series of flaws. Ceilings cracked. Walls twisted out of plumb. Doorframes pulled away from the walls, leaving gaping openings. Concrete blocks were found to be missing in cellars. Roofs sagged. In one instance a stoop outside a cellar door sank eight inches below its original position in a few months.

Their veteran owners turned first to the federal agencies that had guaranteed their loans and presumably inspected and appraised their houses. Soon they found themselves going from V.A. to FHA to RFC and back again.

Most of the houses had been appraised by a local real-estate broker, chosen by the bank from the V.A.'s approved list of appraisers. He evaluated the houses at $7,500. Six months after the houses were finished one of the owners tried to sell his to another ex-serviceman. The prospective buyer applied for a G.I. loan to finance the purchase. A V.A. appraiser was called in—not the one who had served before. This time the value was set at $6,600, which was $900 less than the house had been "worth" six months before.

By June of last year the veterans had had enough of the federal runaround. Through their attorney they filed suit against the builder in common pleas court, asking for damages in excess of $70,000. In their complaint they alleged that each house showed an average of 50 omissions, substitutions or deviations from the original plans and each veteran asked for from $1.500 to $2,000 in damages.

Meanwhile they continued to press for action by federal agencies. But

THE SECRET PAPERS OF HARRY L. HOPKINS

BY ROBERT E. SHERWOOD

The Russian leaders' moods perplex American and British negotiators. Roosevelt urges Hopkins to "Hurry, hurry" but Japan solves his greatest problem

The day after a Jap task force left port to attack Pearl Harbor, Secretary of State Hull n Ambassador Nomura (left) and Special Envoy Kurusu of our proposed policy with

PART VI. ROOSEVELT'S GREATEST DILEMMA

HARRY L. HOPKINS' health was failing again in the autumn of 1941. There was now a vast increase in the details of Lend-Lease and he determined to turn the job over to someone else. Edward R. Stettinius, Jr., was selected.

There was never a time when President Roosevelt was being more steadily assailed morning, noon and night than in those tense weeks in the autumn of 1941.

He was constantly being goaded in one direction by those who favored bold action, of whom Stimson and Morgenthau were the most vigorous proponents; and he was being hauled in another direction by others who were convinced that our only salvation lay in a policy of extreme caution; in addition to which Churchill was augmenting his voluminous cables with telephone calls from the little booth in the bombproof quarters to which he had been consigned under Great George Street. (In that telephone booth were two clocks, one set at London time and the other at Washington time.)

At the end of September, Roosevelt had to make up his mind as to whether or not he should again put an issue up to Congress and run the risk of an unfavorable verdict. Hull asked Admiral Stark to state his opinions on this matter, and the resultant memorandum from the Chief of Naval Operations was highly refreshing to the President. The most important parts of it were as follows:

It has long been my opinion that Germany cannot be defeated unless the United States is wholeheartedly in the war and makes a strong military and naval effort wherever strategy dictates. It would be very desirable to enter the war under circumstances in which Germany were the aggressor and in which case Japan might then be able to remain neutral. However, on the whole, it is my opinion that the United States should enter the war against Germany as soon as possible even if hostilities with Japan must be accepted. . . .

P.S. I did not set down in the attached notes what I have mentioned to you before, namely, that I do not believe Germany will declare war on us until she is good and ready. Hitler has every excuse in the world to declare war on us now, if he were of a mind to.

On October 9th, Roosevelt sent to the Congress his request for further amendments to the Neutrality Law which would permit the arming of American merchant ships and restoration of the right of these ships to carry trade into the war zones. Congress agreed after a bitter fight.

The appalling truth was that, as the world situation became more desperately critical, and as the limitless peril came closer and closer to the United States, isolationist sentiment became ever more aggressive, and Roosevelt was relatively powerless to combat it. He had said everything "short of war" that could be said. He had no more tricks left. The hat from which he had pulled so many rabbits was empty.

The preparations for the departure of the Harriman Mission to Moscow were immensely complicated, involving exhaustive negotiations.

An Urgent Plea to Churchill

Early in September, Hopkins sent a cable to Churchill:

As preliminary to the Moscow conference, Secretaries of War and Navy have been told by the President that substantial commitments of munitions help must be provided for Russia so long as she fights the Axis. Substantial and comprehensive commitments should be made to Russia by Great Britain and the United States at the Moscow conference, in the President's opinion.

Hopkins sent a memorandum to Stettinius shortly before the Moscow conferences started:

I would like to be in direct touch with Harriman and the mission in Moscow and any replies to Harriman's telegrams I would like to have sent through me and signed by me.

Will you please notify everybody over there about this so there will be no possible hitch about it?

Harriman and Lord Beaverbrook had three evening meetings with Stalin —Sunday, September 28th, Monday the 29th, and Tuesday the 30th, for a total of some nine hours.

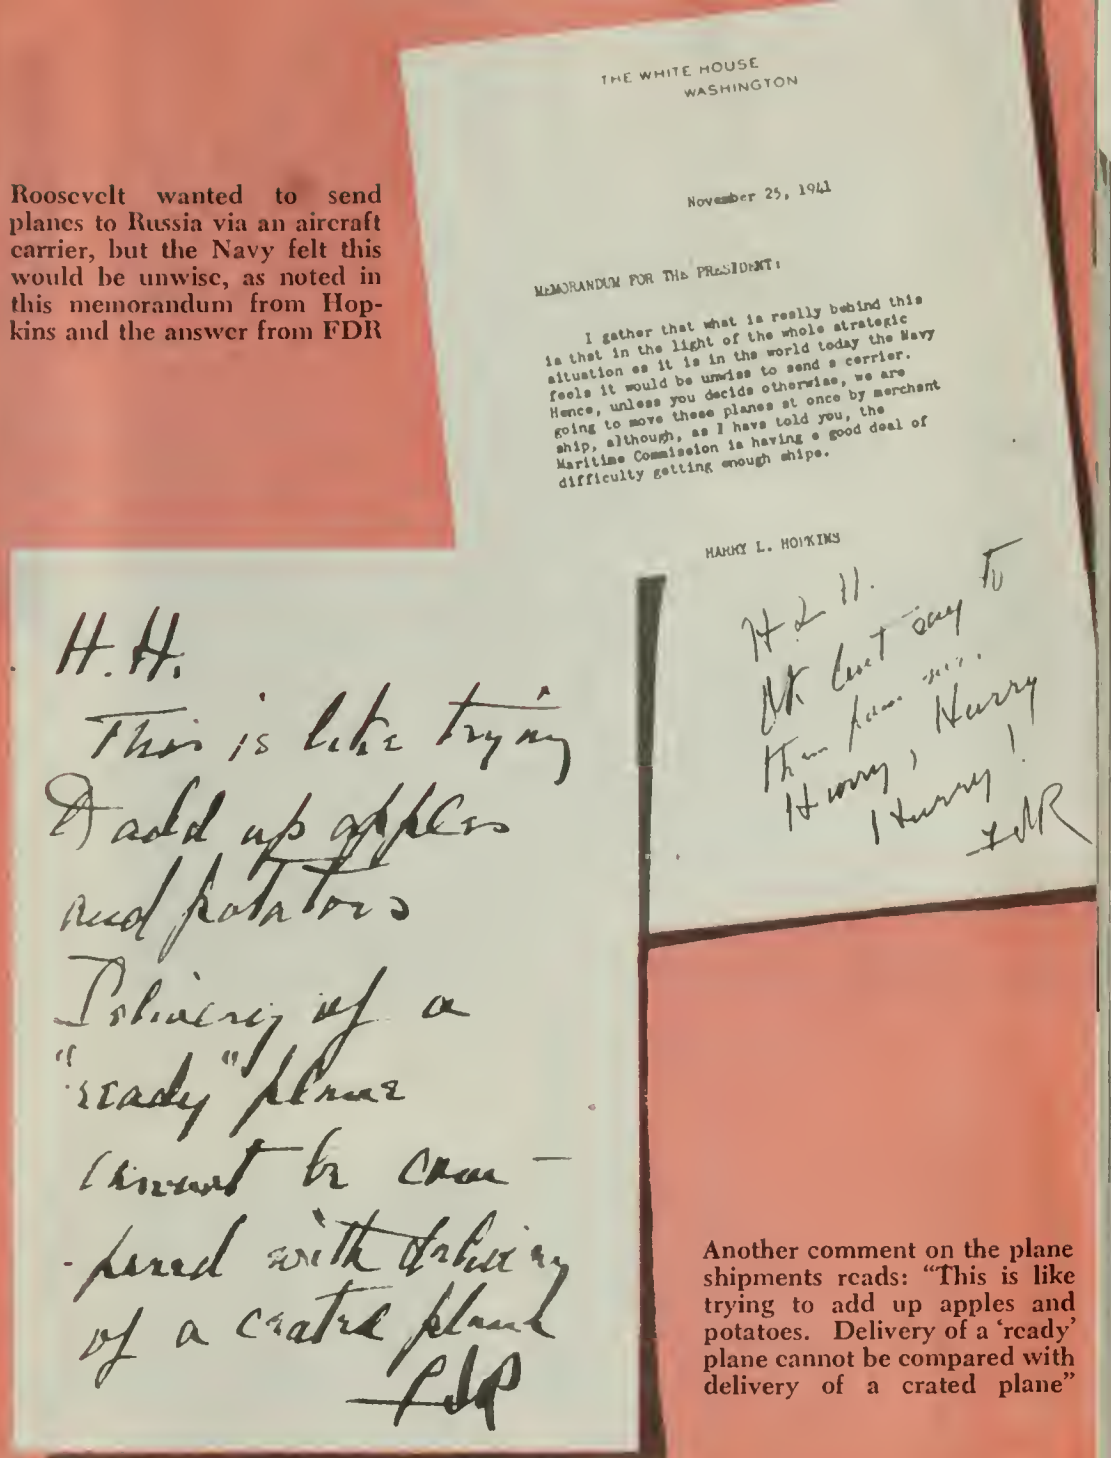
At the first meeting with Stalin, cordiality prevailed.

Stalin said a preponderance in tanks was absolutely essential to the Germans for, without it, the German infantry was weak as compared with the Russian infantry. He said that, of Germany's satellites, the best fighters were the Finns, next the Italians, third the Rumanians and, last of all, the Hungarians. He estimated that there were at the time 10 Italian divisions in the Eastern Theater of Operations. (This indicates a certain change of opinion since his talks with Hopkins two months previously.)

Stalin had a great deal to say to Beaverbrook about the question of active British military co-operation with Russia. Even at that early stage of Russia's participation in the war the desirability of opening a second front in the west had already become a lively issue and was providing the persistent theme song of Russian propaganda in Britain and the United States. However, Stalin does not appear to have pressed particularly for the second front at this conference. He did feel that the British might send forces to join the Russians in the Ukraine.

Beaverbrook pointed out that Brit

WIDE WORLD



le crowds gathered outside the White House on December 7, 1941, the President Churchill, in an overseas phone call, that we were all in the same boat now

SOVFOTO

in was enthusiastic when Lord Beaverbrook (left, with Averell Harriman, nansky and Vishinsky) revealed what aid Britain and the U.S. could offer Russia

Roosevelt wanted to send planes to Russia via an aircraft carrier, but the Navy felt this would be unwise, as noted in this memorandum from Hopkins and the answer from FDR

THE WHITE HOUSE
WASHINGTON

November 25, 1941

MEMORANDUM FOR THE PRESIDENT:

I gather that what is really behind this is that in the light of the whole strategic situation as it is in the world today the Navy feels it would be unwise to send a carrier. Hence, unless you decide otherwise, we are going to move these planes at once by merchant ship, although, as I have told you, the Maritime Commission is having a good deal of difficulty getting enough ships.

HARRY L. HOPKINS

H. H.
This is like trying to add up apples and potatoes. Delivery of a "ready" plane cannot be compared with delivery of a crated plane
FDR

H. H. We can't say No. Harry
FDR

Another comment on the plane shipments reads: "This is like trying to add up apples and potatoes. Delivery of a 'ready' plane cannot be compared with delivery of a crated plane"

ish divisions were being built up in Persia and that these might be moved into the Caucasus. (The British obviously were interested in reinforcing the Caucasus to prevent a possible German break-through into the Middle East.) Stalin dismissed this with the brusque statement that "there is no war in the Caucasus but there is in the Ukraine." Beaverbrook suggested that the Soviet and British staffs might engage in strategic discussions but this suggestion met with no welcome whatsoever.

Stalin asked about peace objectives. When Beaverbrook mentioned the eight points of the Atlantic Charter, Stalin asked, "What about getting the Germans to pay for the damage?" Beaverbrook evaded that question with some generality about "we must win the war first." *Harriman mentioned President Roosevelt's concern about the state of American public opinion, particularly on the religious issue. Stalin said that he did not know much about American public opinion toward Russia and did not seem to attach much importance to it. As it was getting late, Harriman did not press the matter but promised to give Stalin a memorandum on it.*

At the end of this first session, Harriman noted, "Beaverbrook and I considered the meeting had been extremely friendly."

At the second meeting, the following evening, the atmosphere was entirely different. In his report, Harriman noted:

The evening was very hard sledding. Stalin seemed discourteous and at times not interested, and rode us pretty hard. For example, he turned to me once and said, "Why is it that the United States can only give me 1,000 tons of armor plate steel for tanks—a country with a production of over 50,000,000 tons?" When I tried to explain the length of time required in increasing capacity of this type of steel he brushed it aside by saying, "One only has to add alloys."

Stalin Under Severe Tension

At this meeting which lasted two hours, Lord Beaverbrook noted that "Stalin was very restless, walking about and smoking continuously, and appeared to both of us to be under an intense strain." *Beaverbrook handed him a letter from Churchill which Stalin opened and merely glanced at, then left it lying on the table unread throughout the conference. As Beaverbrook and Harriman were preparing to leave, Molotov reminded Stalin of the Churchill letter. Stalin thrust it back in the envelope and handed it to a clerk.*

Stalin betrayed evidence of enthusiasm only once and that was when Harriman mentioned an American offer of 5,000 jeeps to Russia. Stalin asked if he could have some more. But when Harriman asked if he would like to have some ordinary armored cars for his troops, Stalin said that armored cars were deathtraps and he did not want any.

The next day the German propagandists were blasting to the world the news that the conferences in Moscow had bogged down. But, when Beaverbrook and Harriman met Stalin that evening, they found that the atmosphere had again changed completely. Stalin mentioned the Nazi propaganda with some amusement and indicated that it was for the three of them to prove Goebbels a liar.

Beaverbrook went through a memorandum listing everything that the Russians had asked for, stating those items on which the Americans and British could not meet the demands immediately, and then a long list of items which could be met in full with even some extras thrown in. Stalin said that he received the list with enthusiasm. Then, Beaverbrook noted:

The interpreter, Litvinov, bounded out of his seat and cried with passion, "Now we shall win the war."

When we had completed the recital of the list the atmosphere developed to the highest degree of satisfaction and pleasure on both sides. The assembly took on the form of closer and even imtimate relations. . . . It was sunshine after rain.

In his records of this conference, Beaverbrook has given an interesting glimpse of Stalin's "doodling" habits: While Litvinov was translating the Russian words into English, "Stalin occupied himself by drawing numberless pictures of wolves on paper and filling in the background with red pencil."

In Harriman's notes is the following:

Stalin asked about Rudolf Hess and seemed much interested in Beaverbrook's amusing description of his talk with Hess and his size-up of the situation. Stalin indicated that he thought Hess had gone not at the request of Hitler but with the knowledge of Hitler, to which Beaverbrook agreed.

The net of Beaverbrook's statement was that Hess had come thinking that with a small group of British aristocrats a counter-Churchill government could be set up to make peace with Germany, which would be welcomed by the majority of the British. Germany with British aid would then attack Russia. Stalin relished the amusing and detailed comments by Beaverbrook, who was in his best form as raconteur.

Beaverbrook had some direct quotes from statements recently made by Hess in prison in England:

I am convinced that in any event —whether an eastern front persists or not—that Germany and her allies

SIX ARTISTS AND A MODEL

BY LEONARD A. PARIS

FOR those few remaining simple folk who believe that art is merely a copy of nature, these pages may be something of a shock. "How is it possible," they are likely to ask, "for one young woman to look like so many different things?"

We are unable to answer this question, not knowing anything about art or even what we like. But this much we can say: It's the same model in all the pictures. Her name is Edith Franklin and she is nineteen years old and a native New Yorker.

Miss Franklin wants to be an actress, and most of the fees she picks up modeling for such well-known artists as those shown here go toward her tuition at the Neighborhood Playhouse School of the Theatre. This, she assures us, is "the best dramatic school in America," boasting such graduates as Gregory Peck and instructors like Martha Graham.

So far our model hasn't hit Broadway; she says she has much to learn at the Playhouse. Meantime she pays her way by modeling.

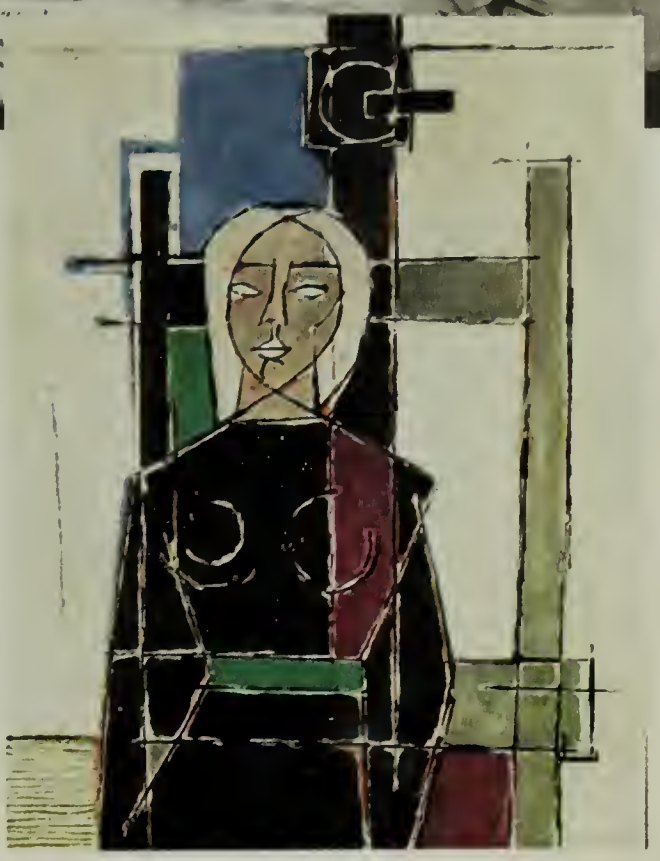
Not that fine-arts models are rolling in dough. Fees run around $1.50 to $3 per hour, unless you're working for a magazine illustrator, in which case you may command a queenly $10.

But Miss Franklin likes the work and she likes artists. While a painting is in progress, a model usually gets 20-minute breaks for rest periods, during which time she may relax with a good book or discuss the painting with the artist.

Miss Franklin hoards these golden moments to study her theater lines, and it is not uncommon to hear her reciting Shakespeare while taking twenty. This, we are happy to report, does not seem to distract any of the artists. After all, as Simonides said, "Painting is silent poetry." ★★★

With cold weather and unheated studios, our model caught cold. So Milton Avery (below) graciously agreed to paint her in a cloak. Avery, known as an unusual colorist, is one of America's leading expressionists

Formerly the editor of Art Front Magazine, Joe Solman (below) is famous for his expressionistic scenes of city life. Much of Solman's recent work, like the example at right, stresses flat pattern and intimate color relationship



Earl Kerkam (left, above) gave up commercial art for the less profitable business of painting as he likes. His study of Miss Franklin (left) was made on a bitter cold day in a typical cold-water garret studio

Usually Hans Moller (right, above) works without a model. A semiabstractionist he has done covers for many magazines and has had one-man shows at some of the New York galleries. His study appears at right

Sol Wilson (below, right) discusses his painting with Miss Franklin while the latter takes a rest. Wilson is a romantic expressionist whose rugged seascapes and studies of fishermen have won many important prizes

SQUAW MEDICINE

BY BENNETT FOSTE

The pouch his wife gave him was a charm against the evils of the city. St. Looie was the city—and one of the evils was a St. Looie woman

DAVY CONNOR was a Cheyenne man. He trapped wherever there was fur, but he always tried to winter in the Cheyenne country; and along in 1830, he married Dull Knife's daughter.

Her Cheyenne name was "Woman who stands by the water like a willow," but Davy called her Nell. She was handsome for a squaw, made good moccasins, kept a clean lodge and looked after Davy fine. When he came in from a hunt she always had warm water for his feet; she tanned his robes and cooked his meat and Davy was real fond of her.

In '31, having finished his fall hunt on the Musselshell, Davy and Nell pulled down into the Black Hills and joined Dull Knife's band. Henry Bronte was already there and Henry and Davy were old friends.

While Nell was putting up the lodge the two men smoked a pipe together and Henry had some comment to make.

"I'd heard you got married," he said, watching Nell set up the lodge poles. "How is she, Davy? Pretty good woman?"

"She's all right," Davy admitted, scowling a little, "except that she's plumb hell for fofurraw. I taken her to rendezvous, Henry, an' I swear there ain't enough goods in Sublette's packs to satisfy her. She's always devilin' me for vermilion or scarlet cloth or beads or some such, an' if it ain't that, it's a new knife or a kettle."

Henry nodded. He had been married to a Crow and to a Flathead, and right then had a Sioux woman in his lodge. He knew what Davy meant.

"After the spring hunt," Davy said, "I'm goin' to take my beaver to St. Looie and leave her to home. I'm goin' to get Jake Hawken to rebore my rifle, an' I'm goin' to buy a suit of clothes an' a wool hat an' get some trade. Then I'm goin' to get drunk an' disorderly on St. Looie liquor. You comin' with me, Henry?"

"No," Henry said, "I ain't. I'm goin' to rendezvous an' have a time. St. Looie don't shine for me." . . .

When the spring hunt was over, Davy loaded his fur on horses and started east. There was many a mile between the Black Hills and St. Louis but he wasn't worried. A mountain man went where he wanted to. He left Nell with her people and that wasn't the first time, or the last time either, that a man has gone to market and left his wife at home.

NELL was upset when Davy left. She said his heart was bad toward her; she moped around the lodge like there had been a death in the family. She daubed dirt in her hair and tore some of her clothes and did some crying. She let Davy know she wasn't pleased, but he petted her and set her on his lap and made a fuss over her until she perked up. The day he left she gave him a beaded buckskin pouch to hang around his neck. Davy thought it was a new pipe case until Nell told him different.

"This is woman's medicine," she said, "for you to bring back. You will not forget me when you wear this. Open it when you get there."

Davy promised that he would. H put the thong over his neck and stuc his left arm through so that the sac hung next his hide under his armpi and out of the way. He gave Nell hi two pistols to keep and told he goodby.

With his Hawken's gun on his sac dlebow and his Green River knife i his belt, he pulled out. By the tim he had made a day's march he ha forgotten the sack.

Luck had her arm around Dav Connor that journey. In Cheyenn country he was safe enough and h had better than an even chanc through the Sioux hunting ground for the Sioux and the Cheyenne we allies. He worried some about th Pawnees, but most of them had move south to meet the buffalo. When h got to the river at Fort Atkinson h struck it right. There were two kee boats loading at the fort. .

Fort Atkinson was an America Fur Company post and when Da told the *bourgeois*, the man in charg that he wanted to take his fur dow

Davy clamped a hand on Thomas' quivering shoulder. "Pull up when I tell you," he rasped. "Pull up —or I'll cut your skinny throat!"

river on the keelboats, he got turned down.

"You're an independent," the *bourgeois* said, "an' you've been gettin' your trade from the opposition. You can't load 'em."

"I'm goin' to St. Looie," Davy answered, "if I have to pack there. I'm goin' anyways." He was pretty mad. He hadn't much use for that outfit. "*Mangeurs de lard*," pork eaters, he called them. They hired out to work for wages and didn't take their chances like a real mountain man should. He went stomping off to his camp outside the palisade. But Davy didn't have to take his fur ahorseback to St. Louis. Frank Vardeman was with the keelboats.

Vardeman was a big chief of the company. He was in the St. Louis office and had been to Fort Union to see Red Coat McKenzie, the boss. Vardeman knew of Davy, and while Davy was in his camp, his heart bad toward the whole American Fur Company, Vardeman and the *bourgeois* at Fort Atkinson talked things over. The American Fur Company and the Rocky Mountain Fur Company and the independent traders were all fighting for trade and they fought rough.

"He's a Cheyenne man," Vardeman said, "and we want that trade. Fitzpatrick has been getting it. Connor has a great deal of influence and if he'd go to work for us it would be a good thing. I'll butter him up some."

BEFORE Davy smoked his last pipe and turned in, Vardeman came to his camp. It was just a mistake, Vardeman said. Davy could put his fur aboard the keelboats. They smoked a pipe over it, Vardeman almost choking on the pungent kinnikinnick. He was a St. Louis man, not a real mountaineer.

Riding a keelboat beat riding a horse seven ways from the jack. It was a heap easier and, besides, Davy didn't have to worry about the Pawnees or the Missouris or any of the rest. The keelboat crews were armed and strong enough to make a fight if they were jumped. They traveled day and night, and Vardeman was pleasant to Davy, seeking his society and flattering him.

"I want you to stay with me when we get to St. Louis," Vardeman said. "I want my family to meet a real mountain man."

Davy took it big. By the time they reached St. Louis, Davy had made up his mind to trade with Vardeman's company and was halfway sold on the idea of taking charge of a post in the Cheyenne country. . . .

There was only one bit of trouble on the trip down. Keelboat men were a cocky lot and had their own ideas of doing. Many nights there was a game of old sledge and it was natural for Davy Connor to gamble. He had the beaver to back himself and he won. There were two men in the crew that lost steadily and it made them ugly. One of these was named Leblanc and the other called himself Bulldog. Both were bullies and they tried to come it over Davy until they found themselves looking into the little end of his Hawken's gun. They backed down then, but they made a few threats.

"You'll have to look out for those two," Vardeman warned.

Davy grunted scornfully. The idea of danger from men who pulled a sweep was amusing. "Take more'n them to put this child under," he bragged. Still, he slept light for the rest of the journey. The keelboaters carried knives and Davy didn't want to wake up with a blade in his ribs.

ST. LOUIS proved a surprise. Davy had not seen the town since he left with Ashley in 1822, and the place had grown, booming with the fur trade. He saw his fur unloaded and put into the company warehouse. Promising Vardeman to return, he left the wharves.

The city bewildered Davy. He tramped up Rue Royal, down Rue de l'Église and back again on Rue de Granges where he found the quarter known as the Vide Poche. The wharves with their noise frightened Davy, the streets astounded him. There were Saukies and Foxes in their blankets—not up to beaver when it came to Injuns, Davy thought—there were Negroes and French *engagés*, teamsters, boatmen, and here and there a mountain man.

"Davy! Davy Connor!"

Davy wheeled. Zenas Berdan was pushing through the throng toward him. Davy had not seen Zenas since the rendezvous in '27.

"Ol' hoss!" Zenas thumped Davy's back. "What you doin' in St. Looie?"

"Brought my fur down," Davy answered. "Come down on a keelboat. Let's have a drink."

They repaired to a saloon where good St. Louis whisky warmed the cockles of their hearts.

"Keelboat, you says?" Zenas asked. "What for was you travelin' on a keelboat, Davy?"

Davy told him and Zenas' eyes grew dark. "Company man," he growled. "What you fixin' to do, Davy? You goin' to turn *mangeur de lard?* You fixin' to hire out to 'em? Why, you always stuck to Sublette."

"Makes no difference what I done!" Davy snapped, offended. "Because I done one thing once don't mean I'm goin' to keep on doin' it."

"But"—Zenas scratched his head—"what's that feller lookin' at you for?"

Davy turned. Leblanc was by the door, scowling. Davy scowled back. "Wants his needin's," Davy growled. Leblanc slipped away. "Had trouble with him comin' down."

"Tell it," Zenas commanded.

In the tale their argument was lost. "Wagh!" Zenas spat. "You want to look out for them fellers. Them kind are worse nor a Gros Ventre. He'll stick Green River in your lights."

"Take more'n him to count coup on me," Davy answered. "I got to go."

Returning to the wharf Davy Connor passed Jake Hawken's gun shop and, remembering a portion of his errand, entered. Hawken examined the rifle, and nodded. "'Bout a week," he said. "There's others ahead of you. You'll need new molds, too."

"Fix her up," Davy ordered largely.

Vardeman was waiting in the counting room, Davy's possible sack beside him. An open barouche with a Negro driver stood before the door.

GOOD-TIME $TREET

BY BILL GOTTLIEB

The Street is at its best at night, when the neons start to bloom. It loses some of its carnival atmosphere when daylight dims its gaudy luster

A fabulous block on Manhattan's Fifty-second Street has housed jazz cellars, strip-tease clubs, millionaires' mansions, speak-easies and cafés of six nations. Soon, however, its brownstone fronts will yield to towers of commerce

EVER since the Roaring Twenties, when it had 38 speak-easies at once, Fifty-second Street between Fifth and Sixth avenues has been the most lurid 300 yards in all of lusty Manhattan. Today, with its jazz cellars, strip-tease clubs, celebrity restaurants and assorted curiosities, The Street (as it is familiarly called) is still New York City's most fabulous block.

But The Street's days are numbered. By 1950, Rockefeller Center, against which it is timorously snuggled, will have encroached on the southern half of The Street. On the northern half, Lord & Taylor, M-G-M and others will replace the hot trumpets, hot onion soup and hot chorus girls with cold towers of commerce.

Except for Leon and Eddie's and the "21" Club, each of which owns its property, the establishments on The Street are resigned to the coming day of doom. Well aware of what the future holds is Gilbert J. Pincus, unofficial mayor of Fifty-second Street and erstwhile doorman at a good many of its famous spots. Pincus, a squat, loquacious individual constructed around a fat cigar, has grown bitter as work has progressed on the giant Esso Building, Rockefeller Center's first beachhead on The Street.

From his current position under the Three Deuces canopy, he urges passers-by: "Hurry in! See the early show *right now*. By the late show, they may be breaking ground for an insurance company."

On the west end of The Street is a Nedick's hot-dog stand. On the east end is De Pinna's swank Fifth Avenue specialty shop. Between these extremes lies a carnival of attractions.

The names and natures of some of the public houses change weekly on this fast-moving block; but, as of the start of this year, the following were in business: five jazz cellars, once the birthplace of swing and still the world center of hot music; Leon and Eddie's, where visiting firemen flock for mildly wicked jokes and scantily clad girls; a handful of taverns, frequented mostly by musicians and other professional entertainers; exactly one dozen restaurants (five French, two Swiss, one Russian, one English, one Italian and two American); Jack and Charlie's "21" Club, once the nation's most famous speak-easy and now the dining place of writers, hucksters and visiting Hollywood stars; nearly a half-dozen strip-tease joints, where tired businessmen watch entertainers who often double as drinking companions; Tony's, a hangout for theatrical folk who come to hear Mabel Mercer sing while she sits at their tables (or to hear Tony himself sing while standing on his head).

The Street's eccentric character doesn't end with its night life. It has the Drama Book Shop, which stocks nothing but books on dramatic art; Beverage Media, a trade magazine for taverns; Hold-It!, a publication for professional models; and Sponsor, a journal for radio advertisers.

There are also the headquarters for Tommy Dorsey's disk-jockey show; Phil Galvano's Studio of Golf; a pocketbook hospital; the Japanese-American Committee for Democracy; and the Modern School of Jiu Jitsu, under Prof. K. Nakae. In addition, The Street has millinery shops and hairdressers, photographers who specialize in "character" portraits, voice teachers, and hundreds of dancers, musicians, waiters and booking agents, who occupy upstairs rooms and apartments.

When the police department rezoned its divisions, it judiciously made Fifty-second Street the dividing line between the Forty-seventh Street and Fifty-fourth Street precincts. In that way, each could maintain a special officer on the block—the Forty-seventh taking the south side and the Fifty-fourth the north. In addition, taxi companies constantly send their inspectors, and detectives from both the Juvenile Aid Bureau and the Narcotics Division are often there. As a final touch, the two precincts send squad cars to enforce the 4 A.M. closing of the clubs.

The Street has, in its time, had troubles over prostitution and narcotics. The former has been virtually eliminated by the diligence of the police; and the latter remains pretty much confined to occasional musical characters who feel the use of drugs improves their blowing. Last year, several spots were shuttered on marijuana charges, though all but one were promptly reopened for lack of evidence. This past winter, a building on The Street was raided by police in search of prostitutes. Instead, they uncovered a number of teen-age boys and girls, whom they charged with possession of narcotics. Still more

PHOTOGRAPHS FOR COLLIER'S BY THE AUTHOR

At Leon and Eddie's, proprietor Eddie Davis likes to get the customers in the act. Here he rewards a lady bowler with a kiss while her teammates and Sherry Britton look on. Ex-G.I.s may not recognize Sherry in evening dress

Swing was born on Fifty-second Street. Devotees still go there for hot music. Here, at the Three Deuces, Hilda Taylor and a friend enjoy the Lucky Thompson orchestra. A former Miss North Carolina, she is now a professional singer

Sometimes when the music is really "gone," Harry the Hipster leaps from his piano in the midst of a hot break, to the immense delight of his patrons. For the benefit of the uninitiated, a hipster is someone who is more hep than a hepcat, hep now being passé

Tony's is a hangout for theatrical folk, who have tried in vain to dissuade proprietor Tony Soma from singing while standing on his head. Band leader Raymond Scott and publicist Virginia Wicks are the amused spectators below

At many of the spots, swing has given way to a more universally appealing art. One of the longest-lasting attractions on the block is Lois de Fee, whose "six feet four and one half inches of pulchritude" barely fit under the low ceiling of the Club Nocturne

THE BRAMBLE BUSH

BY DAVID DUNCAN

CONTINUING THE ADVENTURES OF A MAN THEY COULDN'T KILL FOR LOVE OR MONEY

●

"I was in the house alone when I heard the shot . . . It seemed to come from the garage . . . When I opened the door I saw a man on the floor, a gun was near him"

The Story:
The narrator, MIKE FINNEY, is being framed for the murder of a San Francisco attorney, one EARL CLARK. MRS. REBA TREMAINE—the widowed mother of the real murderer, who had disappeared after the killing ten years ago—plans to claim Finney is her son; then she will dispose of him in a manner indicating suicide, and her cowardly son PHILIP will no longer be a hunted man. To this end she boldly tells the police that Finney is actually PHILIP TREMAINE, that he has returned to face charges and inherit his father's money.

Finney, who has his own good reasons for not wanting to admit his real identity to the police, escapes from prison. He is suspicious of the solicitude and help offered him by Tremaine's beautiful young sister, CATHERINE, who claims her mother convinced her that he was guilty of Clark's murder. That night the real Philip Tremaine, whom Finney has known slightly in Mexico, turns up in San Francisco and attempts to kill Finney by causing him to go over a cliff in a car.

However, Finney escapes, and—after getting a lift from a close-mouthed private detective named REX TUTTLE, who had followed him up from Mexico—goes to Mrs. Tremaine's house in Palo Alto, finally aware of the magnitude of the plot against him. From a distance he sees a man enter the Tremaine house; believing it to be Philip Tremaine, Finney follows him inside, grimly determined to settle accounts.

But the man with Mrs. Tremaine is not her son; he is JOHN WICKERSHAM, the family lawyer, who, like everyone with the exception of the three Tremaines, believes Finney to be the renegade murderer. Wickersham whirls at the intrusion and slugs Finney on the jaw.

IV

I WAS out a long time. My body was already heavy with fatigue; the unconsciousness produced by Wickersham's blow drifted into the unconsciousness of sleep. When I finally opened my eyes, the angle of sunlight entering the room showed me that several hours had elapsed. It was high morning. I turned my head and looked about the room. It was a frilly place with ruffled curtains and little porcelain figures. A woman's room, not a jail cell. I was still fully dressed and lay on top of a bed with no covering over me. I looked across the hall into a living room—a familiar living room. I was still in Reba Tremaine's house, where I'd been when I got knocked out. A man sat in the living room in a position so he could look through the hallway and see the bed where I lay. The man was Wickersham. He sat with his long legs out in front of him, his chin in his hand, contemplating me. When he saw me move, he got up and walked over to the bedroom door.

"You've had a nice long rest," he said. "Now suppose you come in and sit down." I looked at him and had no difficulty remembering everything that had happened. The sick disappointment returned.

"Why don't you get it over with?" I said. "Where are the cops?"

"They'll be along. Your mother has been pleading with me to leave you so you'd have another chance of escape, but I can't do that. Some things even a lawyer can't get away with."

I looked at him and laughed. It was a croaky sound, and it gave me the shivers. Mother wanted him to leave so I could escape. Dear Mother! Mother wanted me to herself so she could butcher me. The others had tried and both failed. Now it was her turn. How she must have pleaded with Wickersham!

"Call the police," I said.

"If you'd taken that attitude last night, neither of us would have sore heads." Having had the pleasure of knocking me out, he was being condescending. "You seem to have scratched up your face when you hit the floor. It's a little bloody." He disappeared, and then returned with a washcloth.

I wiped off my face. Apparently when he knocked me down, the cuts and scratches on my face had opened up again. He seemed to think he was their sole cause. I tossed the rag to a chair and swung my feet to the floor.

THE short rest had made me stiffer than ever. Every muscle ached. "What day is it?" I asked.

"Friday. Did you have a date?"

I looked out the window toward the sunshine. Wickersham's sarcasm didn't seem to fit him very well. I turned and looked at his belt buckle. It was square and gleaming like a target.

"Try it," he said. "You caught me by surprise last night. Never thought you had it in you. Try again."

I shook my head. Somehow this was the worst of all. I wasn't in jail; I wasn't tied or handcuffed. Only a pane of glass was between me and the outside. A few miles away the hills rose up, the light bringing out different shades of green on the trees. Somewhere in the world outside was a man named Philip Tremaine. Inside the house was Wickersham, a tall watchdog ready to grab me by the scruff of the neck and worry me if I made a break. I couldn't make a break anyway. I was too weak and stiff. The time for rough stuff had passed; what remained was going to be all mental.

"I don't know what eats you, Tremaine," he said. "I've got no sympathy for you, but as long as you were temporarily free, you might have tried to get away and save your family further notoriety."

"I'll talk to the police," I said. "Where's my dear mother?"

"She's in the other room, lying down. She's a little sick."

"I should think she would be."

"I guess I shouldn't have hit you in front of her."

"She's sick because you didn't hit harder."

His eyes flickered. "You'd do well to speak kindly of the one stanch supporter you've got. Your mother would do anything for her son."

"I know she would."

"I'm glad to hear you admit it. It's on her account that I haven't turned you in yet. She begged me to wait until you recovered consciousness. It may be the last time you'll be free to talk to her alone, so I agreed to it."

"She's still trying, I see."

"Trying what?"

"Stick around. You'll enjoy it."

"All right." He kept his big hand on my shoulder while we walked across the small dining room to the door on the other side.

"She'll want to know you're still alive, at any rate."

"Yes, that will interest her." He knocked on the door. I wasn't at all sure she'd be in the room on the other side. She might have fled, but I hoped not. Mrs. Tremaine would help me escape. She'd help me for the same reason Catherine helped me. I was no

TRUMAN'S TROUBLES

BY FRANK GERVASI

The President's plans to renew his White House lease for four more years are overshadowed by his recent record in office—and party leaders, recalling his manhandling of the civil rights issue, the Palestine partition and other hunks of dynamite, sadly shake their heads

NO PEACETIME President in the history of the United States ever had to face as big an accumulation of domestic and imported woe as confronted Harry Truman in the last 12 months. The troubles of Truman the President were complicated by the difficulties of Truman the Candidate. Whenever he did what he believed to be right for him to do as President, he almost invariably discovered that he had done wrong as Candidate.

This incompatibility became most apparent during March, 1948. Throughout March the possibility of an atomic war with the Soviets, such as might give the world back to the monkeys, quivered in the air like uninterrupted lightning. Loud and stormy were the wails of Democratic party politicos who watched Truman's popularity plummet to a low which practically guaranteed his defeat in November. They attributed the decline in the President's political appeal to ill-timed and ill-advised decisions on domestic and foreign policy.

In 31 days President Truman (1) insisted on legislation guaranteeing civil rights to all Americans regardless of creed or color, (2) demanded revival of Selective Service and inauguration of Universal Military Training, (3) reversed his own advocacy of partition of Palestine. Correspondingly, Candidate Truman (1) alienated the vociferous big shots of the South, (2) antagonized the pacifist and isolationist elements and (3) lost, or so it seemed, the Jewish vote in strategic areas like New York and Chicago.

By the time he celebrated his third anniversary as President in April, Truman had proved to the satisfaction of some powerful members of his party that he apparently would rather be right—or dead wrong—than be President again. They were eloquently willing to let him have his way. Until then, although he had not declared himself, Truman was the party's only potential candidate. Suddenly there were several, among them Associate Justice William Douglas, Virginia's Senator Harry Byrd, Senator Scott Lucas of Illinois, Chief Justice Fred Vinson, Senate Minority Leader Alben Barkley and, inevitably, General Dwight Eisenhower.

This all reached a noisy climax while the President sunned himself between February 20th and March 5th in the Virgin Islands, Puerto Rico and Key West. An old friend, Leslie Biffle, director of the party's Senate Minority Policy Committee, visited Truman in Florida. Rumors immediately circulated in Washington that Biffle had gone to advise Truman to step aside for another candidate. Biffle neither confirmed nor denied the reports of his meeting with the President, which seemed to indicate that Truman had testily refused to make way for anyone.

A probably more accurate version of the Biffle-Truman meeting later current in Democratic circles was to the effect that Les acquainted the President with the indisputable facts of the party's disunity, begun by Henry Wallace's desertion, aggravated by the South's rebellion over civil rights and complicated by the North's disappointment about Palestine. Les is reliably reported to have urged the President to make known his intention to run or not. Truman's remarks to friends that he was "not interested in what happened" to him politically had given rise to doubts that he would run and to hopes that he might not.

On his return the President called in Chairman J. Howard McGrath of the Democratic National Committee and Gael Sullivan, then still executive director of the Committee. They found Truman relaxed, tanned and at least outwardly confident. He was about, he said, to present himself as a candidate at the Democratic party convention in Philadelphia July 12th.

McGrath was more composed than Sullivan when he emerged to announce Truman's candidacy to correspondents. Sullivan wore the frozen grin of a man who had put his conscience in cold storage. He was known to have hoped the party's standard-bearer might have been Douglas.

Sullivan's privately expressed preference for Douglas was, in fact, the indirect cause of his resignation later to take a highly paid job with Theatre Owners of America.

With the convention only weeks away, McGrath and Sullivan examined the party's assets and liabilities with the intentness of bank examiners looking for hidden surpluses and deficits. What they found as they crisscrossed the nation talking to machine bosses, district leaders and precinct captains wasn't heartening.

The liabilities quite obviously outweighed the assets. The party, they discovered, wasn't merely split. It had disintegrated.

The shock of Truman's on-again, off-again, on-again stand on the partition of Palestine, for example, may prove too much for the party's already weakened big-city organizations to absorb. Truman's Palestine policy may be as costly to the Democrats in November, in the opinion of some party bosses, as the President's alienation of the South.

THE HOT-POTATO OLYMPICS

BY COLLIE SMALL

Amid international bickering and backbiting, England strains herself at the seams to entertain the 1948 Olympics. It's all in the name of world-wide sportsmanship and amity

KEYSTONE

Wembley Stadium will be the site of the track and field events of the 1948 Olympic games. It will accommodate 82,000 spectators—60,000 seated and 22,000 standing

Joe Verdeur of Philadelphia will be a strong American contender in swimming. He holds world indoor record in 200-yard and 200-meter breast stroke

INTERNATIONAL

Irving Mondschein, of New York University, will probably represent the United States in the decathlon events. Mondschein is the American champion, but will encounter stiff competition at Wembley Stadium. Here he establishes an I.C. 4A Indoor Meet record in the high jump, clearing the bar at 6 feet 7¼ inches

INTERNATIONAL

ON JULY 29th an indomitable young man, his hair streaming appropriately in the wind, will burst into Wembley Stadium, Middlesex, carrying a flaming torch signifying that the fourteenth Olympiad of the Modern Era has begun.

It will be only the *eleventh* Olympiad (or the twelfth if you include the 1906 games) since the original games were suppressed in 394 A.D. and started again in Athens in 1896, *not* the fourteenth as advertised in the programs. There were no games in 1916, 1940 or 1944, and the committee should be asked to run over its fingers and toes again to get the thing straight.

As far as its maneuvers are visible to the naked eye, which is not often, the International Olympic Committee has been right on one point, however: There *will* be an Olympiad in London this summer. Some 59 nations and 5,500 competitors will participate in 17 sports, not including impromptu fist fights out behind the stadium. There will also be an arts competition embracing music, sculpture, architecture, literature and painting, the subjects to be linked with sport. In deference to the Olympic ideal, no athlete will be depicted, carved or sung sitting down. He must be in full or semiflight.

All in all it should be quite a spectacle. The United States, of course, will be top-heavy with the most athletes—over 350—and will be favored to win. However, Pakistan and Afghanistan will both be there; China, which has yet to place its first athlete in Olympic competition, will be back for another try; and even tiny Liechtenstein will be represented in the shooting, the only event in which the contestants actually carry guns.

There will also be some distinguished absentees, among them the Watusi tribe of East Africa, whose lithe young men are reputed to be able to high-jump over seven feet, well in excess of the world's record. Also the Russians, who do not have an Olympic committee and are therefore ineligible to compete and who veto anything anyway provided we're for it. Germany and Japan, being former enemies, will also be missing, although Italy, which was not particularly friendly, either, during most of the recent unpleasantness, will be on hand with a full team.

London will attempt to swallow and digest an estimated 100,000 visitors, many of whom will be jolted to learn that a good five-cent cigar will cost as much as four dollars, that hotel rooms will be virtually impossible to get and that the food will be chicken.

The Olympic torch will represent a considerable technical advance over the 1936 Berlin games when it was made of magnesium and burned for only five minutes. The British torch, a conical affair filled with chemical tablets, will burn for fifteen minutes.

A British cruiser recently dropped off 27 cases of nonlethal torches in Greece where, to start the relay across Europe, the first torch will be lighted by the rays of the sun shining through a magnifying glass, notwithstanding the fact that there are easier ways. Runners stationed at regular intervals will carry the flaming torch to Athens, Corfu, Italy, Switzerland, Luxembourg, Belgium, France, Dover and thence to Wembley, always assuming nothing goes wrong.

Flag Found in Berlin Vault

The Olympic flame, a butane gas without smoke or smell, will burn in a large bowl at one end of the stadium for the duration of the games; it has been tested in a typical English drizzle and pronounced successful. The Olympic flag, discovered in a Berlin bank vault after the war, has been dry cleaned and is ready for the mast. As a concession to austerity, the medals this year will be of oxidized silver instead of the customary gold.

Wembley Stadium, where the track and field events will be held, will be scaled for 82,000 spectators, 60,000 seated and 22,000 standing, although the bowl is officially rated at 100,000. According to the stadium press agent, it will be easier to find your seat at Wembley than in your local cinema. Finding Wembley, however, will be another problem. Although it is only forty minutes from Piccadilly, it can be comparatively elusive for strangers not familiar with the intricacies of the London transport system.

Nevertheless, the stadium is comfortable. It has nine bars, one of them the second longest in the world, and it is run by one of Britain's top organizers, Sir Arthur Elvin. Sir Arthur not only produced the stadium but advanced $400,000 for the British Olympic Committee to get started on.

The track itself will be surfaced with a secret mixture compounded in Leicestershire in the dark of the moon by two mysterious brothers, who refuse to reveal the formula. Five hundred tons of this witch's dressing will be placed on the track just before the games.

A foamy rubber mattress base will probably be used for the high-jump and pole-vault pits. Measuring equipment for the high jump and pole vault will be built into the standards. The starter's pistol, fired by remote control, will be so situated that the report will be heard simultaneously by all the runners, even though they may be in echelon.

Wembley will be used primarily for the track and field events. Swimming will be held at the Empire Pool next door, yachting will be at Torquay on the south coast, riding will be at Aldershot, and the other sports will be similarly dispersed. The boxing will take place on an island ring suspended over the swimming pool, and somebody has a good chance of being the first boxer ever to drown with his gloves on.

This year it is going to be next to impossible to get away from the Olympic games. They will be brought to you by radio, television and motion picture.

The B.B.C., for example, is going to torment the air in 43 languages. Mr. J. Arthur Rank, the British movie impresario, is widely rumored to have both television and the newsreels fairly well bottled up through exclusive rights. American television companies will be forced to televise from newsreel films flown from London. Mr. Rank is believed to be getting ready to offer five 10-minute films for something between $50,000 and $100,000, the exact sum depending on the distribution facilities of the buyer.

Calories Threaten Good Will

Food is still the chief problem. Some observers have drawn morbid pictures of what is going to happen to international good will when the well-fed Americans arrive and flaunt their calories in the faces of the hungry Europeans. One sports writer recently imagined he could see a red-cheeked American skipping happily toward the finish line at the head of a column of staggering skeletons. Actually, it won't be that bad. Yet most of Europe's athletes can hardly be expected to be in as good condition as the Americans.

The British government is allowing a special athletic ration based on Britain's industrial workers' scale. The government, moreover, will allow each competitor to bring twenty-five pounds of food with him to supplement his rations while in England. However, any excess food brought in will have to remain in England, a possibility that a hungry British sports writer recently described as "hopeful."

Actually, it is the special requirements of each nation that are upsetting the calculations of the Olympic food committee. The committee originally decided to put nations with similar

(Continued on page 54)

Herb McKenley got his track training at the University of Illinois, but in the Olympics he will represent the British Empire as a native of Jamaica. McKenley has beaten the 440-yard record with a 46.2. Here he is shown winning the 400-meter run of the 1947 A.A.U. track and field championships, defeating Dave Bolen. Time, 0:47.1

ACME

Mel Patton, the California flash who recently broke the long-time 100-yard mark with a 0:9.3

COLLIER'S

SHORT SHORT

"Only a dollar," I hear Tibbett pleading. "We were buddies and I'd like to buy him a drink." "You can buy him a beer, and hurry up about it," she raps back

SWEET REVENGE

BY RALPH NELSON

I CAN'T believe it. In fact, I stop dead, until the revolving door pushes me into the lobby of the State Hotel. Over by the elevator is Howard Fletcher Tibbett, Second Lieutenant, Retired. Now he is just plain *Mister* Tibbett.

If you didn't know Lieutenant Tibbett then you were never around the sectors occupied by the 152d Infantry Battalion, or specifically, Company C of said battalion. But maybe you knew someone like him. I have heard there were a few other rank-happy individuals in the Army of the United States who were similarly afflicted by—how would you say it—chicken fever? But Company C knew Lieutenant Tibbett, and knew him well. For three years Company C had heard me swear on a stack of infantry manuals that, come the time I was no longer liable for infraction of certain Articles of War, all of which were punishable by rapid death, I, personally, me, ex-G.I. Walter (NMI) Page, would willfully and with premeditated intent commit assault, battery and mild homicide upon same.

And there he was.

I feel my face try on a smirk, for size. My fingers always had a peculiar reflex in the presence of Lieutenant Tibbett. They would curl up like anxious angleworms, and I'd find a pair of fists in my hands. My fingers hadn't forgotten him either. Without him seeing me, I take cover behind a potted palm next to him, planning my strategy, which will be strictly Joe Louis.

It is the clothes make him look smaller. Tibbett used to wear his blouse with the neon bars like he'd forgotten to take out the coat hanger. Now his suit looks like it's been pressed with a mixer. And he is loaded with bundles, which is not regulation.

There is just one thing missing from this sweet moment. Bobby Moylan. The kind of a guy who'd be good for five any twenty-ninth of the month, except February, which had his mother's birthday. Tibbett rode me only when he couldn't get to Moylan, a big carrottop who could have stuffed Tibbett inside his cartridge belt. Tibbett racked Moylan back, gigged him, confined him, broke him. Everything. But Moylan swallowed it, and I got the dregs.

I'd get browned off. But Moylan would run his hand through his crab-apple hair, grinning. "Quit sounding off, Walter," he'd say. "We gotta play this smart."

"I want to do everything to that guy that Swift does to porkers," I'd fume. "I can't figure how you take it."

"I had basic training," he'd answer. "I have a sister makes Tibbett look like Dale Carnegie. You've got to be subtle."

"Tibbett wouldn't recognize subtlety unless it punched him in the nose," I'd scream.

"Relax, kid. I got a plan."

I am sorry Bobby Moylan isn't here now. My plan isn't subtle. I'm a direct-action guy, and when opportunity knocks, I knock right back. So I peek coyly around the potted palm. In my most dulcet tones I growl sweetly, "Hello, *Mister* Tibbett."

He looks at me. His mouth drops open. He recognizes me. My hand is full of fist, ready. "Walter!" he gasps. Then he does a W. C. Fields with his bundles and comes up with an open mitt. "You old son of a gun," he shouts. "It's good to see you!"

I'm standing there, mind you, getting ready to bust him. Consequently, when he pumps my hand like he expects water to start splashing, it is somewhat disconcerting. While I am wondering whether to Indian wrestle or jump with both heels bracketing his nose, the elevator door wheezes open and he hands me another surprise.

"Darling!" he says.

I look around and there's a clam stepping from the elevator. She looks like a left tackle, that's the kind of figure she has. "Look who I just ran into!" Tibbett yells. "Walter Page! You've heard us talk about him. Walter, this is my wife."

"So you're Walter," she humphs. "How are you?" Before I can give a description, she turns on her dearly beloved. "I suppose you parked the car ten blocks away? Did you match the material? Or did you get sixteen other shades again? You know those curtain rods were all the wrong size, don't you? What took you so long?"

SHE keeps popping questions like a Browning with no water jacket to cool her off. Tibbett's face starts looking like barn paint and he stutters like a war-weary jeep.

"Excuse us, Walter," he apologizes, and takes her behind the potted palm. Now I expect to hear the old snap, which is welcome because it will start my reflexes again, and besides, I can't stand to hear a guy chewing a woman. I bend my ear to the green fronds.

"Only a dollar, dear," I hear Tibbett pleading. "After all, we were buddies together, and I'd like to buy him a drink."

"You can buy him a beer, and hurry up about it," she raps back. Somewhat astounded, I peep through the broad leaves and see her root in a coin purse, from which she retrieves two dimes t blink from the sudden exposure. So wildered am I, that when Tibbett retu all eager to buy me a brew, I accept. Missus departs, tossing me a scorn glance, and we retreat to the bar. I only thankful Company C is demobili and doesn't see the sad pass all my re lutions have come to.

We down the suds and I set him up two more, while he fidgets the packa and nervously checks the time. I feeling somewhat better, knowing so one else has landed a haymaker bef I even start swinging. We even hav couple of laughs remembering thi that were not hilarious when they h pened.

Tibbett invites me to some subur where he is setting up housekeeping planning some Tibbettlets. Rememb ing his wife, I find my schedule somew crowded.

"What a shame!" says Tibbett, wist like. "It'd be swell to get that gang gether for a reunion."

Thinking what a wake that would come, I ask if he's seen anything of C pany C.

"One or two," he says, sadly. " only one I see regularly is my brot in-law."

"Who's that?" I ask, because there been a lot of replacements after I cas my points.

"My brother-in-law," Tibbetts rep "Moylan. You remember Bobby M lan?"

"Yeah!" I shake goodby with s enthusiasm. Tibbett gathers his p ages and departs, a worried look or face as he checks his watch.

Yeah, I remember Moylan. A subtle character.

CUPID WITH CELLULOID WINGS

Continued from page 13

fresh face he plays with. Dorothy's out of her mind."

"Why should she bother you?"

"Bother me?" Al almost sailed out of his chair. "First of all, Dorothy's the swellest woman in Hollywood and one of the best friends I've got. Second, Kin Bond is our most valuable property at National. He can't get along without Dorothy and if he busts with her our property's damaged, see?" Al settled back in his chair again. "It's awful tough on Dorothy and I gotta see what I can do." He grunted one word. "Cupid!" Then, as he lighted a cigar, he said, "You guys run along. I'll give you my decision about Eddie Curran in a week or so."

The first person Al ran into on the lot the next morning was Milia Fortune. "You're looking beautiful," he said. "I never saw you look so happy." Milia was always something special to him. He had found her himself in a high-school play down at Santa Ana and he had watched her for two years. Nothing he ever read pleased him as much as the radiant notices she got. Now he was ready to star her. "Milia, baby, what makes you so happy?"

"Eddie Curran and I are getting married," she answered proudly.

"That's fine." Then Al had an idea. "I gotta pick a picture for Eddie to start in. How would you like him in yours? And when you get married maybe later on we can build up sort of a Lynn and Fontaine team."

"Oh, Mr. Morse!" Milia just managed to say.

IN HIS office he at once notified both producers that he had given the matter a lot of thought and neither could have Eddie Curran.

At 10 o'clock Dorothy arrived. She had never been pretty and at thirty-five she looked even older but she always had a gentleness and charm and she was smartly dressed. Once Dorothy had been Al's secretary on the lot, and hoped to be an actress. When Bond, a real-estate salesman turned extra, came along, Dorothy fell for his good looks and forgot her own ambitions. In those early days her salary kept them in meager food and kept him in ample wardrobe. She taught him all she knew about acting and she knew plenty. For five years she bet that what she knew plus how he looked would get him the stardom they both wanted.

"You don't come around often enough," Al said. He looked at her closely and saw deep wrinkles under her eyes. "Same old thing, huh?"

Dorothy nodded slowly. "From the way Kin's acting, Miss Ellen Daine, late of the New York stage, must be something." Dorothy lighted a cigarette and puffed it fast. "Kin can never play with any new actress without falling for her."

Al remembered the times Dorothy's marriage had tottered because of some new face. "But it always blows over. Kin won't leave you, Dorothy. He knows what you've meant to him."

"Someday one won't blow over and I think this may be it."

"What if he does walk out on you?" Al insisted.

Dorothy hunted for words. "I'm in love with him, I guess. We really have a good time together between pictures. Besides, he's what I've made of my life and I don't want to lose that."

"I know he wouldn't be worth a damn without you and it's against my own best interest and my stockholders' to say so, but what if you walked out on him? It might do him good."

"I couldn't," Dorothy said quickly. "Will you do me a favor now, Al? Walk over to Kin's set with me. That way Kin can think you brought me over and that I didn't come just to spy."

Al agreed. Inside, stage six was dark except for one little spot in a far corner. There, a small bedroom set was brightly lighted. Nothing was going on while the lights were being moved. In one corner Bond, a handsome man of forty but younger in make-up, stood talking with a tall blonde. He saw Dorothy and Al as they came toward him and said, "Hello, Dorothy, what brings you over?"

Al stepped into that one quickly. "She came to talk about your contract and I asked her to come on the set."

Bond nodded and said colorlessly, "Miss Daine, this is my wife."

"I'm so happy to meet you," the girl answered.

"I'd love to!" Milia exclaimed. "Oh, Eddie!"

"I'm so glad we're together again," he said softly.

At the entrance stood an exquisitely beautiful blonde. Milia recognized her as someone she had seen on the National lot but she did not know her name. The man with her was Joe Magoo, the agent, who wore beautiful women on his arm the way other men wear coat sleeves. Eddie happened to look up and his face brightened. "There's Ellen Daine! I haven't seen her since I left New York. We went to the Academy together. Isn't she a knockout?"

"Well," Milia looked her over slowly. "I think she uses too much make-up."

But Eddie was waving to Ellen. When

"Are you done wit' these Home Beautiful magazines, lady? Me an' Slug would like to fix up our hideaway"

COLLIER'S

One of the assistants called, "All ready, Miss Daine, Mr. Bond."

Dorothy said almost to herself, "Oh, Lord, isn't she lovely?"

She was. The lights danced in her golden hair, caressed her white skin, deepened the blue of her eyes. She looked fresh and young and desirable.

They were ready to shoot when Bond suddenly turned, left the set, and came to Dorothy. He said something to her in a low voice, then went back. Dorothy motioned to Al: "Let's go right away."

Outside in the air she told him, "Kin said that my coming on the set disturbed him and would I please leave at once."

"That's what I thought he said."

"Well, I've seen her and I know what I'm up against. I'm grateful to you, Al. I'll just wait now for whatever comes."

"Don't worry, Dorothy," Al said. "It's part of my job, taking care of studio property, even when it's good-looking and walks like a man."

MILIA and Eddie were dining together in a Beverly Hills restaurant two nights later. Milia's face was radiant. Whenever she looked at Eddie and saw how handsome and happy he was she felt even happier. They even forgot to talk about the picture business for maybe as long as ten minutes.

They were almost through dinner when Eddie asked in a tone that sent little waves dancing all over her, "Want to go for a drive, sweetheart?"

she saw him she called across the restaurant with the quiet intimacy of a loudspeaker, "Eddie, my love, my darling pet, my dear one," she started to him, dragging Joe along like an old handbag. She and Joe settled down at the same round table. Milia felt that an army of strangers had arrived.

Two hours later they were still there. Eddie was having a good time. He and Ellen and Joe talked New York and nothing but New York—what the Guild was doing and what one Shubert brother said to the other Shubert brother, and who was lunching at Sardi's and what they ate and who paid for it and what shows Max was doing and what scripts Jed was rewriting.

For the tenth time Ellen repeated, "Really, after all, there's literally nothing like the New York theater." She said "theater" with large, full, cherry-ripe tones.

The chatter went on for another half hour and Milia felt forgotten. Finally Ellen said, "I'm working so I must get up early." Then she turned to Eddie. "I want to see you tomorrow, love. It's so good to find old friends here." She gave Milia a parting smile like the twist of lemon in a Martini. And to Eddie, "Tomorrow, dear heart, remember!"

Milia's evening was spoiled. As Eddie drove her home he was acting like someone blinded by starlight. He kept saying, "Isn't she something! And what a career she has!"

"Yes."

"Now, don't be like that!"

"Like what? I didn't spoil our evening."

"Aren't you glad I found old friends?" Eddie asked sharply. "I guess I'll just never understand women."

"Someday, maybe. Will I see you tomorrow?"

"Oh, sure, of course. I guess so." Eddie kissed her good night but his mind wasn't on it. "Anyway, I'll phone you."

A WEEK later Al left his bungalow in Producers' Row to walk up to the commissary for lunch. It was a pleasant day in late spring. He had no new troubles bothering him and he went along cheerfully. Outside the commissary the crowds of extras in costume and make-up were standing in the warm sun, like the dummies from the wardrobe department put out to air. Apart from them, like a man drowning in his own thoughts, was Kinnon Bond. Al asked, "How are things going, Kin?"

"Fine, quite fine," he said but he sounded gloomy.

Al went on wondering why Kin was so gloomy, why he was alone and not with Ellen as he had been for most lunches. Al had heard nothing more from Dorothy which probably meant nothing had changed, but he made a note to call her and find out. He went on to the upstairs dining room. A director met him at the door. "Say, Al, you know anything wrong with Milia Fortune? She looks like she was dragged face down from here to San Diego. I was directing her in some costume tests this morning and she got hysteria and we had to quit without finishing."

"Isn't there any end to my troubles?" Al roared so loud that a waitress dropped a tray. "I got so many now, I just lost my appetite." He turned around and left the dining room.

As he came storming into his office he told his secretary, "Get me Milia Fortune here at once." . . .

When Milia came in an hour later she was unusually quiet except for her hand that kept smoothing her soft black hair. She looked like a kid expecting a spanking and began about being sorry she had spoiled the morning tests. Al interrupted her. "We're all a happy family on the lot and today my lunch got ruined when I heard about you." Thirty years in pictures had taught Al that three questions usually covered every possible female complaint and he asked, "Is it something we've done? Something you want? Something wrong with your picture?"

It was none of those things, Milia said, looking ready to burst into tears. The tears did burst: "It's Eddie Curran. He and I have split and it's all because of that new actress, that Ellen Daine. Eddie drives her to the studio and he's from the studio and lunches in her dressing room and he's like a puppy, ever where she goes he goes, day and night."

For a minute Al wondered what he could do to Ellen Daine until he remembered that she was pretty valuable studio property herself. Anyway, this explained Kin Bond's gloom. Then as he saw the pain on Milia's face he said gently, "From what I know, this can't be serious, sweetheart. Take it easy. We're expert here in Hollywood at fixing up heart trouble. What else are pictures about anyway? You dig down deep under the studio out here and what do you find it's built on? Love, baby, love!" He reached over and patted Milia on the shoulder. "Maybe we can help some now."

Milia put her handkerchief to her eyes. Then she said slowly. "One thing that's wrong with Eddie is that he's new out here. He's confused; he feels insecure

RCA VICTOR

DIVISION OF RADIO CORPORATION OF AMERICA

he's not sure of his career. I thought of one thing that might help him. If you would fix it so that he got co-billing along with me in our picture he might feel more sure of himself. He may be touchy about my being better known in pictures. And I'd like him to have it no matter what happens to the two of us."

Al got a funny choking feeling in his throat at that. Having seen thirty years of cat fights over whose name was to get top east credit and appear in larger type in the ads, this was something new. He said gruffly, "That's very generous of you, Milia. If you want it, then okay."

As soon as she was gone Al sent a memo out about joint billing credit. Then he reached for the phone, to find out about Ellen and Kin Bond. He called Dorothy and asked, "How's things?"

"Okay, I guess," she said. "But Kin's going out of his mind. If you want to protect your piece of property you'd better get that Daine woman out of Hollywood."

"What's going on?" Al asked as a man knowing nothing.

"Come up for a drink this afternoon and I'll tell you." . . .

At the end of the afternoon Al left the studio and drove up one of the Beverly Hills canyons to the huge and handsome house that Bond had built. A butler who looked like an exile from a grand duchy let him into the living room.

When Dorothy came in, her appearance shocked Al. Her face was pale, her eyes feverish. "You came at a good time," she said, forcing a kind of toughness into her voice. "Kin's just walked out on me. That woman's had him crazy for a week. She's been trying to get him to leave me but when he only wavered and wouldn't make up his mind she picked up with some kid on your lot she knew back in New York. She's been running around with him and waving him under Kin's nose."

Al nodded, angry at himself for not having guessed what Ellen was up to with Eddie.

"A half hour ago," Dorothy continued, "Kin came home, told me he couldn't stand it any longer, packed his bag, and that's that." She stood up stiffly, walked to a little bar, and poured a drink while Al wished he could find something to say. "Okay. She can have him. But she better learn what a wife has to go through for a Hollywood star. She can worry with him about his roles and spend every evening rehearsing when he's working. She can scrap over story choice and publicity and fan mail and fight the agents and sympathize over the way some camera hog stole all the two-scenes and how the cameraman messed up the lighting and showed all the fine lines at the ends of his eyes."

AL HAD heard this before but never so bitterly. Here was the Hollywood that never turned up in the fan magazines and that he'd shoot any publicity man on his lot for writing. "I'm sure we can get some way to bring him back, Dorothy. Maybe he'll change his mind in a day or so."

Dorothy shook her head, and said tautly, "Nothing will ever bring him back now." Then Al saw a change. Her shoulders went straight and stiff and she swung around. "And do you know what I've just realized? Maybe it would be better if he didn't come back. Maybe it would be better if I quit for good this time."

"You can't do this, for my sake," Al said, his voice louder.

She wasn't even listening. "He's made his decision. Okay, maybe I should make mine. I'd be free and that's not so bad. And the studio could find itself another combined nurse, mistress, coach, secretary, cook, critic and caretaker for its valuable property."

Al felt he was being buried in thistles up to his chin. "Don't I have troubles enough? Having to handle Kin would be a cinch compared to handling you and getting you to come back."

Very slowly Dorothy said, "I think I've been handled enough."

"Mind you, I wouldn't blame you if you did quit," Al said, talking fast because he knew he had to talk fast. "But I can't even think of what that would do to me—"

"Don't act out a scene for me, Al," Dorothy interrupted. "I've seen enough actors."

The threat in her voice stayed with Al as he drove away from the house and all through the evening.

THE next morning set a new record for all time for Al Morse's temper. Ad Lewis, the top producer at National, famous for his prestige pictures, threw a new screen play, The Man of the World, on Al's desk. "It's a challenge, Al. It's lush. It sets Art on a new mountain peak and it's a terrific part for a great male actor. We just put together the best parts of Hamlet, Oedipus Rex and Cyrano into one story."

"Get you!" Al roared. "You're a thief who can't see a book without figuring some way for us to lose money on it."

His secretary dared to come in. "Excuse me, but Milia Fortune wants to know if she can see you for a minute."

Al was about to shout some answer but held it and said, "Okay!"

Milia came in with her face shining. "It worked, Mr. Morse! Just as I knew it would!"

Like a man coming out of a high haze Al asked, "What worked?"

"Giving Eddie that co-billing. He saw it in the paper last night and he called me at six this morning after he'd been walking the streets all night, upset over the way he treated me. We had breakfast together and he said how sorry he was and how he never wanted to see Ellen Daine again and he almost cried about that co-billing. I knew all the time that that's what he felt bad about and why he got angry with me."

Al's jaw was slowly sinking to his hand-painted necktie but he snapped it up. Just what Bond's decision to go to Ellen might have had to do with Eddie walking the streets all night was nothing to mention now. Al said, "I'm glad you're so happy, Milia. You're a sweet and generous kid and I hope nothing ever hurts you."

"What can hurt me?" she looked amazed. "Eddie and I are together again. But we wouldn't have been if it hadn't been for you. Too many people out here make a fuss about their billing—it must mean an awful lot to them. Thanks very much."

Al just stared at Milia like a man whose mind had gone chasing off by itself. He said absently, "You're welcome."

As soon as Milia left, Al grabbed the telephone and called Joe Magoo. "Joe," he said almost humbly. "I'm seeing you today? I'd like to know in advance what you want for Miss Daine so I can think about it."

Joe mentioned increased salary, a better contract, time off for a play in New York, personal appearances, a better dressing room, radio jobs and more publicity. "You know she's done a swell job in her first picture, Al."

"Who said she didn't?" Al said. "I'm surprised you don't ask for co-star billing with Kin Bond."

Joe grabbed at that. "She sure deserves it," he said; "but that, I didn't think you approve."

"Nobody's ever had it," Al said blandly, "and I'd have to think about it but I might approve, if Bond were agreeable. After all, it's really up to him."

ELLEN and Kin came into Al's office arm in arm, after lunch. Al grunted at them and they settled down into the large armchairs facing the desk. For a while he paid no attention to their cooing small talk and continued to work. A few minutes later Joe Magoo breezed in late as usual.

Al looked up from his desk. "Let's get this over fast," he said briskly. "You satisfied with Miss Daine's work, Kin?"

"More than satisfied," Kin answered. "In my many years of experience, I have never played with a more co-operative actress or a more inspiring one." He gave her the full Bond smile. Her eyes were like star sapphires and her smile had all kinds of meanings for him. "In fact, Ellen and I have something to say to you in private, Al."

"Later." Al wanted it clear that this conference was just a minor matter in the midst of a busy day. "Since you are so pleased, then we can go ahead with the next picture, The Thorn on the Rose. It will be terrific—the best part you've ever had, Kin, but the toughest. And that goes for you too, Miss Daine."

"With Kin's help I should be able to do it," she said in a low throb of a voice

TRANSPOSAGRAM

BY ALAN MURRAY

Eunice was one of eight innocent-appearing girls strung out along the expected path of the immensely valuable art collection as it was being transported across one country into the depths of another. Her job, like that of the others, was to dig up all possible information about the secret shipment and to report it promptly. Late one night she rushed into a local telegraph office and wired this Transposagram:

HER WEE BALLOONS RISE TRUE

	R			S				W	I	L	L
	O										E

Instructions: When transposed, the letters of the Transposagram above form a message in one complete sentence. Change the order of the letters and insert them in the empty boxes to form the sentence. (Solution to Transposagram on page 59)

one could have been more kind to wcomer."
l grunted. "It's a treat to have every- y so happy, with no troubles for a ge. Okay, we'll start shooting The rn in about four weeks." Then he ed to Joe Magoo. "We'll tear up s Daine's contract and write a new She certainly deserves most of what ask." He let that sink in. "I guess 's all. You got anything to bring up ?"
Yeah," Joe said, and Al noticed that as careful not to look at Bond. "I'd to see Miss Daine get co-star billing Mr. Bond."
he only sound in the room was that ond slowly stiffening in his chair. Al settled back looking dubious. Then llen suddenly realized what was be- asked she said, with a squeal of joy, , you darling, what a surprise! I 't know you were going to ask that!" reached out and took Bond's hand, uldn't that be wonderful, sweet- t?"
ond stared at Joe. "I can't believe I d you correctly."
lagoo repeated, "I think Miss Daine s co-star billing."
But—but—" Bond stammered. "No —not in fifteen years—isn't that so, "
l was busy making a chain of paper s. "That's right, Kin. However, if

LAWN

You seed it,
You weed it,
You earnestly grow it,
Then grumble
And mumble
Because you must mow it.

—Richard Armour

'd like it I think the studio would mit it." He went back to his paper s.
But, after all," Bond said, "the stu- has built me up before the audiences America."
The decision is yours, Kin," Al said ciously. "We'll go along with any- g you say."
Then that makes it very simple." El- turned to Kin. "Doesn't it, darling? n't tell you how thrilled I am!" She ked thrilled and she talked thrilled. at's what I've dreamed about!"
I'm not thinking about myself," Bond haltingly, "but do you really believe ould be good for Miss Daine?"
llen's sapphire eyes turned to emer- . "And why wouldn't it, beloved?"
ond said loftily, "A newcomer needs low build-up, my dear."
'Don't be so stuffy, my sweet."
'I'm not being stuffy," Kin said with ittle sharpness. "I'm just thinking of and being practical."
'My love, you know I'm really not a vcomer, at least to the stage. After I've had three hit plays in New York. d there are some people who con- er Broadway fame more important n being well known in Hollywood."
Al decided that there was a smart girl. had picked at Kin's sorest spot with t. He had always wanted to do a play Broadway but never quite dared.
Bond said, "Co-star billing implies fin- ed camera technique."
'Technique, lover?" Ellen laughed at t, a cold unpleasant laugh. "I forgot re in my second Broadway play than ever need out here. What kind of hnique does it take to memorize a ee-line scene then repeat it fifteen es because someone blows up even those three lines?" That hit; Bond's e showed it. "I'm sure you have my st interests at heart. Can't we arrange s between ourselves, darling? If you knew how much it means to me—" She stood up and held out her hands to Kin but he sat still and his knuckles were white as his hands held the sides of the chair.
He shook his head. "You run along, beloved. I have to stay and talk to Al."
"Very well. Come along, Joe. We have some things to talk over too." The words dripped icicles. She left the room like a queen who had just seen foul treachery done.
Then Kin blew up. "I'll be damned, Al. I've just had the shock of my life. I ask you, did you ever see anyone so selfish? The nerve of that woman! Using anyone she can to further her own career, exploiting my fifteen years in pictures without a single idea of what I mean to American audiences. And that was the dame I walked out on Dorothy for! What'll I do now?"
"Do?" Al laughed for the first time. "Go straight home to Dorothy and be glad you've got a wife like her and tell her so."
Bond did not move.
"What's the matter?"
"I can't go home. Dorothy isn't there. I decided to call it quits yesterday. When I called this morning about some business she told me she was glad we'd split, that she was free now—"
A thousand wheels started to spin inside Al. "She was kidding."
Kin shook his head slowly. "Not a chance. She's leaving for Reno this afternoon, in about an hour."
"She can't do that to me!" Al roared to his secretary, "Get me Mrs. Bond on the phone at once." He sat anxiously until his secretary called in, "Mrs. Bond is not at home."
Bond grabbed at the desk. "She's probably on her way to the station. Maybe I could race down and ask her to forgive me."
"That's not enough. She'd laugh at you and you'd deserve it." Then Al saw the script on his desk, The Man of the World. He grabbed it. "Here's your one chance, Kin, the only way you can persuade her to change her mind. Here's a great new script, a lush challenge that puts a new mountain peak on Art. Take it down to the station and try to see her. Don't say anything to her at all except that I said this might be your next picture. Tell her it's a combination of Hamlet, Oedipus Rex, Cyrano, The Jest and Othello, the most tremendous part for a man we've ever had, but that you know you can't do it alone. You need her help. It'll put you up with Barrymore, with Edwin Booth, with Sarah Bernhardt. Can you remember to tell her all that?"
"I think so," Kin answered shakily.
"And don't tell her I sent you."
"Then what?"

AL SETTLED back in his chair contented but tired. "Then," he said, "if I know Dorothy, and if I know Hollywood—and sometimes I wish I didn't —I'll see you both at your house tomorrow for a drink. Now, get going!"
Bond raced off, the script under his arm.
Al looked weary as he got back to work. The telephone rang, he hoped it might be Dorothy. It was Milia. "Excuse me, Mr. Morse, but I wanted to tell you that Eddie and I are being married in three days."
"That's wonderful," Al said. "I want you to have the wedding at my house. We'll make it an A production."
"Oh, Mr. Morse!" Then Milia said hesitantly, "One thing still puzzles both of us. Does marriage in Hollywood really help a star?"
"Help?" Al started to laugh. "I'll say it helps! I can prove it for you. Right after your wedding you and Eddie come along with me and we'll go see Kin Bond, for instance, and you can hear it right from his own lips!"
THE END

Women like this will

CHEER !

So will all the many people kept awake, made nervous or jittery by the caffein in regular coffee! For . . .

THE NEW IMPROVED

SANKA COFFEE

now has a new, marvelous flavor to delight lovers of fine coffee! Yet it's 97% caffein-free. You can drink it and sleep. And you'll *love* the taste!

TRUMAN'S TROUBLES

Continued from page 27

American Jews, materially and emotionally involved in the destiny of their coreligionists, cheered America's forthright stand in favor of partition at the U.N. last November. Jewish support for Truman was assured in key areas like New York, Chicago and other centers with large Jewish blocs.

But on March 19th, acting on the advice of Secretary Marshall, State Department Middle East expert Loy Henderson and Secretary of Defense James Forrestal, Truman ordered delegate Warren Austin to scuttle the Palestine policy at the U.N. Clark Clifford, the President's special assistant, and David Niles, his guardian of the minority votes, warned Candidate Truman he was committing political suicide.

The argument used by Marshall *et al* to influence Truman against partition was that in the event of war with Russia the United States might lose Middle East oil owned by Arab potentates but pumped and refined by American companies. Those of his advisers favoring partition pointed out that the Russians and not the Western democracies would have use of Middle East oil in the event of war. The Soviets are geographically closer to the Middle East wells than the U.S.

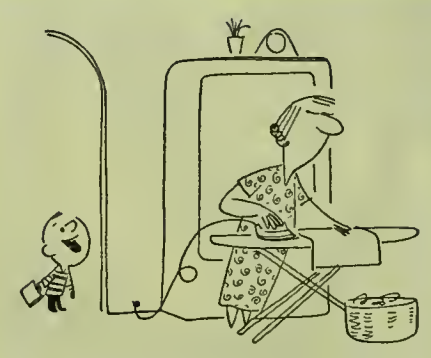
But the former first lieutenant of Battery F and captain of Battery D, 129th Field Artillery, of World War I, who was demobilized as a major, is known to be easily awed by big brass. It took only a short time for Marshall and the others to sway him in favor of reversing his position on Palestine. Their concern was strategic, not political.

Machine politicos demanded Truman's scalp. In Chicago Jake Arvey, with 300,000 Jewish Cook County votes at stake, publicly denounced the President. In New York the situation was, if anything, worse. Mayor Bill O'Dwyer had lost control of the Tammany machine. Boss Ed Flynn had taken a terrific beating in the Bronx (where the Wallaceites elected a congressman in a romp) and he was in rebellious mood.

Short Circuit in a Powerhouse

Metropolitan New York, for 15 years a Democratic party powerhouse capable of generating enough votes to swing the whole state in national elections, became a jumble of short-circuited minority dynamos.

"The antagonism of the Jews," one important Democratic senator predicted, "may produce a revolt in those cities where their populations are largest as damaging to Truman in November as was the anti-Catholic movement in 1928 to Al Smith in his contest with Herbert Hoover."



Truman quickly sensed this threat to his November vote and seized the first opportunity to recoup the expected losses by granting immediate U.S. recognition to Israel when that Jewish state was created. Although this surprise move created some consternation in both our own U.N. delegation, which hadn't been consulted on it, and in London, Democratic leaders hoped it would repair some of the previous Jewish vote-getting damage.

Just as damaging to Truman's chances of election in November was his stand on civil rights. The President demanded equal voting rights for whites and blacks, establishment of a permanent Fair Employment Practices Commission and legislation against lynching and segregation.

Some Southern Democrats frankly accused him of wooing the Negro vote in an effort to repair the damage done to the party by Wallace. If so, the tactic failed. The polls showed that Wallace held onto the affections of seven per cent of the voters and that Truman's following decreased, rather than increased, within 30 days of his civil rights message.

By the end of March the man who only six months before, according to the polls, could have defeated any candidate except Eisenhower in spite of the split caused by Wallace's left-wing excursion, couldn't have won against any Republican candidate except Taft. Polls taken by George Gallup on March 6th and 20th showed that Dewey, Stassen, Vandenberg and even MacArthur could have beaten Truman if elections had been held on those days. Only against Taft did the public prefer Truman.

The solid South, traditionally a barrel of Democratic party strength collapsed into a heap of sprung staves. Alabama's Governor Jim Folsom and Senators Lister Hill and John Sparkman, Virginia's Governor William Tuck and Arkansas' Governor Ben Laney, among others, publicly voiced intentions of bolting Truman and, if necessary, the Democratic party. Laney bluntly asserted that the South didn't want to back "a dead Missouri mule."

"No more pencils, no more books, no more teacher's dirty looks!"

"What'll I do now, Mom?"

COLLIER'S STANLEY BERENSTAIN

A special Gallup poll disclosed even more eloquently than the public statements of its politicians the magnitude of the South's revolt. In October, 1947, 59 per cent of the region's voters approved Truman's policies, 18 per cent disapproved and 23 per cent had no opinion. But in March, 1948, 57 per cent of Dixie's voting population disapproved of Truman.

One of Mr. Truman's callers was Mrs. Leonard Thomas, a National Committeewoman from Alabama. "I want to take a message back to the South," she demanded of him. "Can I tell them you're not ramming miscegenation down our throats? That you're for all of the people, not just the North?"

President Truman pulled out a copy of the Constitution. He read pertinent portions out of the Bill of Rights to her, adding that he retracted nothing. He was, he assured her, everybody's President and warned her that the Democrats must, at this time, all stand together, implying that otherwise they might all politically hang separately.

The more sober Southern Democrats, aware that repudiation of Truman would mean repudiation of the Administration's policies, certain defeat in November and perhaps the end of the Democratic party, worked hard to pull the rebels together. They hoped that by convention time the breach between the South and Truman might be healed and that by November, Southern revulsion against the very word Republican would be stronger than Dixie's antipathy to their likely candidate.

The Third-Party Headache

Another liability whose dimensions grew as McGrath and his co-workers sought to rebuild the party's organization in time for the convention in July and the pay-off in November was the Wallace rebellion. Sullivan, particularly, was concerned about the actual and potential damage done by the third party.

McGrath and Sullivan have argued in Truman's defense, that he couldn't have compiled a better record during his Administration in view of the opposition of a Republican Congress. The argument cut little ice with the party's leaders on the Hill. They replied he should have consulted them before taking a position on any important issues.

Neither Senator Barkley nor Senator Lucas, minority whip, knew of the President's intentions on civil rights until his State of the Union speech. But even then they weren't prepared for his demands for specific legislation on the subject. Nor did he consult them concerning Palestine or his subsequent advocacy of Universal Military Training and revival of Selective Service.

The Democratic party leadership is largely resigned to Truman's nomination. He is not only the President but also the party's leader. He could not easily be pushed aside. He would go to the convention with enough votes to win on the first ballot or stay in the fight until nominated if he wished.

What bothered the party most was not the prospect of a Truman in July, grim as that was, but the probability of defeat in November. Its experts predicted a record vote in November and, therefore, a Truman victory. In the last 16 years, they reasoned, the larger the turnout the polls the bigger has been the Democratic majority and the number of Democratic congressmen elected.

The party's statisticians estimated, perhaps wishfully, a turnout of at least 58,000,000 in November, compared with 48,000,000 in 1944 and 50,000,000 in 1940. The figure in 1944 would have been much larger had not millions of men and women been in the armed forces. It will be a small turnout, considerably less than 40,000,000, which beat the Democrats in 1946, the experts insisted.

Other less statistical but equally worried Democratic politicians were hoping instead, for a miracle in July which would produce certain victory in November. McGrath and Company, in their fence-mending and tub-thumping tours of the land, discovered a grass-roots upsurge for one General Dwight Eisenhower.

"Now, then," said a Democrat of considerable importance who must remain nameless, "suppose Alabama comes rolling into the convention with 26 votes for Eisenhower, and Arizona and Arkansas follow along with 12 and 22. And suppose the fever catches and Eisenhower is the choice on the first or even the second ballot. Ike might find himself thoroughly drafted if, that is, the Republicans don't steal him in June."

REPERTOIRE FOR HURLERS

A good many major-league pitchers semble the fabulous Clyde Barfoot ho sauntered to the mound at a fever-h moment in the Southern Associa-on's 1932 pennant battle. The Chattanooga catcher signaled for a fast ball. Barfoot shook his head. The catcher suggested a curve. Barfoot shook his head again. Finally, Clyde served up a slow ball which was slugged for a game-winning triple by a Memphis batsman.

Joe Engel, choleric Chattanooga owner, cornered Barfoot in the drawing room. "Why," Engel raged, "did you throw a slow pitch in a spot like that?"

"Because," Barfoot explained with quiet dignity, "it was in my repertoire."

A fast ball and a curve are all the repertoire a major-leaguer needs—if he can control them. Christy Mathewson once told Honus Wagner: "I always throw the pitch they aren't hitting. If they start hitting my fast ball, I put it away for the day. If they start hitting my curve, I put it away. Of course, some days they start hitting the curve *and* the fast ball and then they put me away."

Several of Bob Feller's early-season defeats were caused by his affection for a newly developed slider. One American League hitter who never could find Feller's fast ball recalls fondly, "It was a pretty good slider as sliders go—and as sliders go, it went."

THE THING THAT FRIGHTENS MEN LIKE YOU

Continued from page 16

ith many humorous possibilities if one ept his head and maintained determina-on.

Gretchen sweated over the making f the formula. While the bottles were oiling, she walked the floor with the aby, who slobbered over her crisp col-ar. Occasionally, when she had to at-end to the formula, she handed the baby o Joe with such a distracted air that he elt like a convenient inanimate object, substitute for a play pen. Through it ll Teresa lost and found the kitten nany times, Elizabeth asked interminа-le questions which Gretchen answered ith mounting grimness, and the Scotty ot in a tiff with a passing collie.

Finally the formula was bottled. Gretchen, tremulously nervous, held ne under the cold water spigot until it as cool, and struggled with the nipple gain, making a distraught face and ossing her hair back. Then she sat down nd cried, "Give me the baby!"

John choked on his first mouthful. Gretchen held him up, pounding his ack in a panicky way.

"I think you ought to hold him up igher," Joe suggested.

Gretchen held him up higher as he ucked noisily, staring at him as if he were a time bomb.

Halfway through the bottle he stopped eating and began to squall furiously, kicking his legs as if he wished they would connect with Gretchen's shins.

"What's the matter with him?" she cried, distraught. "He's hungry but he won't eat."

"You have to bubble him," said Elizabeth.

Gretchen gazed at her wildly.

"You have to hold him up and pat his back and make him burp," explained Elizabeth.

"Charming," said Joe.

Gretchen hoisted the baby to her shoulder with some difficulty. He made a noise which might have been expected of a much older gentleman after a day in a beer joint.

"*Gesundheit,*" said Joe.

The baby sucked hungrily again and Gretchen sighed with relief.

The afternoon vanished mysteriously, consumed by formula-making, dishwashing and baby feeding. Phil called up about suppertime, just as Gretchen was applying iodine to Teresa's kitten scratches. Teresa roared melodramatically and Joe had a difficult time learning from Phil that Jane was doing nicely.

"He probably thought we were murdering them," Gretchen said, plastering adhesives over a considerable portion of Teresa's anatomy.

"We're not that impulsive," said Joe.

AFTER supper, just as Joe gave Gretchen a sympathetic glance and handed her a cigarette, there came an ominous crash from the direction of the living room. Poor pale Gretchen gave an unhappy start and ran out of the kitchen, Joe following.

Elizabeth had climbed up the bookshelves to fetch a box of lollipops which Jane kept out of reach, and had knocked down several volumes. The volumes had landed on a tray full of Jane's prized demitasse cups which now lay shattered on the floor.

"Oh, Elizabeth, why didn't you let your Uncle Joe get the lollipops?" Gretchen demanded, exasperated, bending to pick up the pieces. "Look what's happened to your poor mother's pretty cups!"

Elizabeth had been seriously unnerved by the incident. First Joe thought she

ould cry, then her face twisted into a lligerent, reddening expression.
"You're a mean girl!" she shouted in piercing voice. "And I don't like you!"
Gretchen hesitated a moment, then nt on picking up the pieces.
Joe, his pipe clenched between his eth, grasped Elizabeth's arm in anger.
"Gretchen's not a mean girl and she's en very kind to you," he said, "and you n stop that screaming right now!"
"I want my mommy!" Elizabeth bellwed monotonously. "I want my ommy! Mommy! Mommy!"
He carried her out of the room. She everly made the trip upstairs an unbevably difficult feat by going into muslar contortions one moment, then gging limp and heavy and shapeless e next. By the time Joe flung her on r bed he wanted badly to spank her. is expression must have faithfully beayed the ferocity of his emotions, for sobered Elizabeth. She was still sobng, but her eyes were wary.
"You're not to speak that way to retchen, do you hear?" Joe announced. "You're to stay up in your om and you're not to come downstairs ain tonight!"
Elizabeth put her head down on the llow and Joe had a moment's pity for r. He hesitated, bit his lip ineffectuly, and went downstairs, propelled by a sire to cheer up Gretchen somehow.
He found her in the kitchen, wiping the oilcloth table cover with a damp oth. There was a tautness about her outh and a glitter in her eye which, in nother girl, would have turned into palble tears. Joe had a hotheaded impulse to take her in his arms, but he strained himself.
He picked up the dish cloth and began wipe dishes.
"When I think of how we were going pick wildflowers, listen to brooks and ay badminton," he said, "I'm grieved. m sorry it's been such a fiasco."
Gretchen did not respond. She sprinled some scouring powder in the sink.
"As for my niece," he said, "the very icest thing I can think of to call her is brat."
"She's very upset," Gretchen said. She misses her mother. And then, I asn't very bright."
"Don't be silly," Joe said. "You are onderful. You've never been mixed up a mess like this before. It may make n old maid out of you and a bachelor f me."
Gretchen did not seem to be getting nueh of a lift out of his comments. An nxious knot tightened in his chest as hey switched off the kitchen lights and vandered into the living room. Inspirdly, he picked up a deck of cards and iffled them.
"How about a little gin?"
chen, who was lolling moodily n sofa, shook her head. "I think I'll o up and tell Elizabeth a story."

WHILE she was upstairs, Phil came home. He described his hospital experiences. the last words Jane said before being wheeled up to the operating oom ("I feel as if somebody had slugged me") and the first words she said on coming out of ether ("I feel as if somebody had slugged me"). Phil made a long story of it and, just as he was concluding, Gretchen came downstairs, looking happier. She had changed her clothes. She wore an off-the-shoulderish pink thing with a ballerina skirt and a black sash. Joe's spirits leapt like a flushed rabbit.
"*You* look as if you'd stood the strain remarkably well," Phil said to Gretchen. "I'm beginning to think that all the things Joe has told us about you are probably true."
Gretchen gave a rather wan smile.
"Well, I've got a woman," Phil said. "A Mrs. Simmons. She'll be over in the morning."

Relief flooded through Joe. He was beginning to feel wonderful. He handed Gretchen a cigarette. Tomorrow morning, he thought, he'd take her down to the brook.
"She's an old battle-ax," Phil said, "but I guess she'll keep the roof from falling in."
"Look," Gretchen said, "I have a two-week vacation coming up. I'd gladly take over—if it would help."
Joe threw back his head and laughed like a hyena. To his astonishment, Gretchen glared at him.
"That," Joe said, sobering, "is heroic, ehum, but absolutely out of the question."
Phil grinned, "Anyway, it isn't neeessary. But thanks just the same."
Joe was conscious before he fell asleep that night that his relationship with Gretchen had definitely suffered some irremediable jolt. He couldn't help what had happened—Gretchen knew that. Still, there was something about her attitude which suggested that he had done something, or said something, which had rubbed her the wrong way.
The feeling persisted next morning. Joe dressed and came down to the kitchen for his cereal. He found Gretchen and Elizabeth already there, indulging in some girlish silliness involving laughter. They were so palsy-walsy, doing the dishes, that he felt fairly superfluous, munching his cereal. With his jaws going, he reminded himself of an ox.
"Where's Phil?" Joe asked.
"Phil," said Gretchen, "has gone to get Mrs. Simmons." She bent over the baby's basket, changing his diaper. She poked the baby, and the baby laughed.
"It's too bad you're so brainy," Joe said. "You make such a pretty little housewife."
"I suppose a housewife doesn't need any brains?" she inquired so venomously that he was startled.
"Well, anybody can do it," he said.
"I didn't find it very easy," said Gretchen.
Unhappily, Joe stuffed his pipe.
"I wish you wouldn't go, Gretchen," said Elizabeth in a high voice of cloying sweetness. "I wish you would stay here and take care of us."
"Thank you," Gretchen said. "You must come to New York sometime, and we'll go to the zoo."
"You never asked me to go to the zoo with you," said Joe.
But Gretchen refused to be amused.

MRS. SIMMONS came bustling into the kitchen shortly thereafter, a tall woman in a cotton house dress. She had a big chin and a big posterior.
"What are you sucking your thumb for?" she cheerfully assailed Teresa. "Do you want to swallow it?"
"You can't swallow your thumb," said Elizabeth.
"Oh, yes you can," said Mrs. Simmons. "I knew a little girl who swallowed her thumb, and then she couldn't play the piano."
Joe was relieved that Mrs. Simmons had come so early. There wasn't much left of the morning and he was determined to have a walk through the woods with Gretchen before driving to Stamford.
"Come on, Gretchen," he said. "Let's see that brook I've told you about. It's a regular poet's brook. It babbles. It gurgles. It sings. It does everything a brook should do."
"Okay," she said.
"May I come too?" Elizabeth begged.
"No," said Joe.
"Oh, *please*," said Elizabeth, in a wheedling tone that he found insufferable. "Oh, why not?"
"No," said Joe, reddening.
He escorted Gretchen down the street, through a meadow and into the woods. The birds called from the tops of the trees.
"Mrs. Simmons," Gretchen said, "is a terrible woman. I feel sorry for the children."
"Oh, everybody has an unhappy childhood," Joe said. "I used to brag about mine. What in Heaven's name would you do, in adolescence, if you couldn't boast about your unhappy childhood?"
They were nearing the brook. Joe could hear it splash over the rocks.
"There," Joe said, as they came out on some sunny rocks overlooking the shady hollow where the brook raced, sparkling. He settled himself on the rocks and Gretchen sat beside him, drawing up her knees and resting her chin on them moodily.
"Mrs. Simmons," Gretchen persisted, "is a bully. And she lies. Elizabeth will probably have another tantrum and she'll manhandle her. Once, when I was little, I had a nurse when my mother was in the hospital having a baby. I had a tantrum and the nurse threw me into a bathtub full of cold water."
"Good," said Joe.
Gretchen shot him a disgusted look. He grinned.
"Have you read any good books lately?" he asked.
She shook her head.
"Who'll be our next President?"
Gretchen sighed. "Do we have to be bright?" she demanded.
The miserable knot was back in Joe's chest again. Not only was it back again, but it was tightening.
"I'm sorry I've given you such a rotten week end, Gretchen," he apologized. "Maybe I'd better drive you over to Stamford."
"Maybe you had," said Gretchen.
She had been poking at the brook with a long stick. She chucked it into the water, gathered her skirts, and rose gracefully.

JOE had always told himself that the moment would come with Gretchen when he would have to let her go with a gay and gallant smile. The moment had come—he knew it—and he also knew that he wasn't going to be any better at denouements than any of her other boy friends. He was going to pieces. He felt too miserable for caution, too reckless to consider charm.
"Gretchen," he said miserably, "what have I done? I don't want you to go, feeling like this."
"Maybe I got to know you a little too well this week end, Joe," she said.
"I always knew it would be dangerous," Joe commented bitterly.
"You've kept apologizing for the ordeal," she said. "Actually, it was a very interesting experience. I'd never realized that managing a house and children could be such a challenging job."
Joe stared incredulously.
"I would have liked to tell you about it," she said, "but I could see that you were frightened. A girl with a domestic gleam in her eye frightens men like you."
Joe stood on the rock with his mouth open.
"You've always hinted around about being in love with me and letting me go my own way, out of sheer nobility," Gretchen spoke in a cold fury. "But you're a hypocrite. Just let *me* show a little interest in the pipe-and-slippers side of life and you look the other way, and make jokes, and make it quite clear that you don't want your nice, neat little bachelor life upset."
"Gretchen," Joe said. "Gretchen, *darling*—"
He grabbed her, crushed her against him, and closed his eyes. He caught his breath, after a moment.
"I love you," he said. "I love you, Gretchen. I thought there wasn't any use—"
"Well," she said, adjusting her head more comfortably on his shoulder, "there is."
Joe held her tight and closed his eyes. The brook was singing and his blood was rushing. He hardly knew which was which.

THE END

FRED BALK

SPORTING ODDS

Because officials had difficulty counting up to five a runner once had to win a mile race three times in order to gain the national A.A.U. championship.

At Travers Island many years ago, H. L. Trube of the New York Athletic Club raced four laps around the track to defeat a crack field. Trube was congratulating himself when an official came over to him sadly and informed him that the race would have to be rerun as this track measured five laps to the mile.

So Trube and his rivals rested. Later in the day, the event was rerun. Trube galloped in the victor and again he was elated over winning the American championship. But along came a sad-faced official.

"Sorry," he blurted, "but we only sent you around four times again."

Trube and his opponents were forced to reconvene for the mile the following Monday and this time the Winged Foot ace really triumphed. The officials had finally counted up to five.

Babe in arms, the deserted wife confronts husband chaser Lamb with a farewell note

George Lamb, one of the nation's best husband chasers, can bring 'em back alive. But he can't guarantee erring husbands will stay put. In 30 years he has listened to 90,000 complaints. He has personally rounded up 3,000 men who skipped the home reservation

BY JAY BREEN

AND JOHN ROSENBURG

There are many tales of home-breaking. C[illegible] father of 13 wild kids just needed some [illegible]

HOW TO CATCH A HUSBAND

DAPPER, graying George Lamb, dean of America's husband chasers, leaned back in his swivel chair, propped his feet up on the corner of his scarred desk and was ready for another version of the story he had heard almost 90,000 times before.

An attractive, smartly dressed young woman sat on the other side of the desk and sniffled, dabbing at her eyes with a sodden handkerchief. She pushed across to him a sheet of soiled tablet paper that had been folded and refolded until it was beginning to part at the creases. In three curt sentences it pronounced the end of a marriage:

"I'm going away. Leave me alone. I'm fed up."

Patiently, Lamb plucked from his client the few hard facts that might serve to help in finding the runaway. For instance, the woman said her husband liked expensive hats. In happier days he had often presented her with a little-known brand of French brandied chocolates. Although she hadn't liked them, she pretended the chocolates delighted her, because he thought them the perfect gift for a woman. He didn't care for sports, although he usually managed to get tickets for top-flight tennis matches whenever an exhibition was staged in New York.

Yes, the wife admitted, there was "another woman." But unlike the majority of Lamb's callers, she had not the slightest idea who the woman could be.

It took George Lamb four months to find this man. Boston police got him in the only department store of their city in which his brand of imported chocolates could be bought. The culprit was using the same gift to aid a new romance.

"When I walked in on the guy," Lamb explains, "he introduced me to the new girl friend. Believe it or not, she looked to be the twin sister of the wife he'd left."

The fugitive husband had, by then, become tired of his flight and his forced anonymity. The funds he had taken to finance his vacation from marriage had evaporated. He seemed almost glad to be going home, even with handcuffs on his wrists.

This is one of the few cases that Lamb can remember, in his 30 years as chief criminal investigator for New York's teeming Queens County, in which a reconciliation has actually worked. Except for that discouragingly rare difference, the facts in this instance follow a general pattern.

Contrary to what you might think, the job seems to have kept Lamb young. Although he is sixty, he looks more like fifty. He is a man of boundless energy who hasn't had a full two-week vacation from husband chasing in 10 years. He is understandably proud of a record that has established him as one of the nation's best in bringing back alive, although sometimes slightly damaged, several thousand husbands who flouted the law by trying to cut their own marriage knots.

There is humor in the thousands of cases that pass before his eyes. But most of his chuckles have a mirthless quality, born of the underlying tragedy in the cases that keep him shuttling across the nation in trains, planes and busses, gathering together bits of broken love stories.

He is dismayed by the popular acceptance of that ancient conception that too much money breeds disaster in a marriage.

"Naturally," he says, "I'm not called in by many millionaires' wives. They may have things tough in that league, too. But on the other side of the tracks it is usually the lack of money that splits a marriage."

In one instance, Lamb was inclined to sympathize with a middle-aged bricklayer, the father of 13 children, who one day jammed his hat on his head and left his tumultuous palace without saying goodby to a soul. When apprehended a few weeks later, the bricklayer gustily sighed, "I just wanted to get away for a while."

Lamb estimates the average income of the husband he hunts nowadays is between $40 and $65 a week.

Another increasingly popular notion with which Lamb is unable to voice complete accord is that differences in religion are not of major importance in a marriage. Since women, by and large, take their religion more seriously than men, it is often assumed that, given time, a man will eventually adopt his beloved's faith.

"Not in my book," Lamb says. "Sometimes a man will get so stubborn on the subject he'll wreck his home before he'll give an inch."

When Wife Keeps on Working

Lamb thinks a woman's chances of missing her golden anniversary are increased fourfold if she goes back to the old job after the honeymoon. His reasons have little to do with that ancient argument that it is humiliating to a husband to have his wife working. The real reason is more insidious. It is what Lamb calls "false income."

Himself a happily married man of some 35 years, the investigator is a firm believer in the recently suspect theory that there is not much point to a marriage which does not have children as its objective, sooner or later. As he sees it, the sooner the better.

But the arrival of a child in a family where both the wife and husband work is often nothing like the blessing it is cracked up to be. As a matter of grim fact, Lamb's casebooks bulge with evidence that proves an expected offspring can be the last straw in a succession of unhappy events.

Mrs. Wilma G— got around to calling on him three weeks after she found the usual note on the kitchen table. The message wasn't a complete surprise. While she hadn't expected such a heartless break, she had known for some months that her marriage had taken a grave turn.

Her story bore a desperate similarity to thousands Lamb hears again and again. She and her husband had met at a dance, starting a courtship that lasted less than a month. Both lived in the same city. Their whirlwind romance had climaxed, one week end, with a dash to Elkton, Maryland, one of the nation's few remaining communities celebrated for their 20-minute marriages.

Wilma's husband was a mechanic, making $50 a week. She herself earned $28.50 as a file clerk. They decided it would be necessary for both to continue working. On a combined income of $78.50, they were reasonably happy and often spent long evenings discussing what rare luck both had had in meeting each other. Both continued working, even after he had received two raises and his income had reached $65 a week. She got a raise, too, bringing the total for both to $95.

After a good deal of questioning Lamb turned up a timeworn cause of separations. The idyllic marriage began to go sour when Wilma announced they were going to have a baby.

Not right away. It had taken a little time for the truth to sink in. Mainly the facts were that they would soon be living on two thirds of the income they had grown used to. As bills began to mount and self-imposed economy waves bit into their established pleasures, Wilma began to notice a change in her husband. He became grouchy and seemed bored.

The next thing Wilma noticed—and this was after she had resigned her own job—was that her husband had an increasing amount of work to keep him late at his job.

The arrival of the baby made things dreadfully worse. Wilma was chained to an exacting routine. More and more his home had become for her husband just a place in which to sleep and eat. Quarrels became increasingly frequent. The upshot was the note left for Wilma.

In a broad sense Wilma's story constitutes what Lamb has dubbed "blueprint for failure," a pattern

ty wife get hubby back
homely "other woman"

Once married, some gals don't keep up their looks and hubby gets a bit bored

Worried wives should watch the clothes closet. Many guys get set to lam by piecemeal removal

Lamb's job is to bring them back alive The deserter makes it hard as possible

which emerges from the details of more than half the cases he handles. Of nearly 3,000 cases in which he has personally rounded up vagabond husbands this investigator has yet to see two reconciliations that lasted a year.

Lamb has dealt with cases in every conceivable walk of life. His quarries have included bankers and bakers, reporters, doctors, lawyers, truck drivers, salesmen, factory owners and movie actors. He once had the disconcerting experience of tracking down a colleague—a detective who had abandoned his wife. Apparently the mental strain of parting rattled the man, because Lamb reports he was as easy to locate—left just as many clues —as his less experienced fellows.

As many a husband has learned to his regret, it is almost impossible to cancel a marriage and walk out on it without leaving a good many clues to the direction of flight. A great many of a man's habits, tastes and idiosyncrasies are infinitely more difficult to change than a name or an occupation. They are the signposts on his trail. There are such obvious leads as union cards, insurance policies, Social Security registrations and other membership data which have considerable value and are not easily forsaken.

Salesmen who run away often change jobs and the product they peddle, but follow the same general approach in marketing. One of Lamb's cases was an auto salesman who switched to sporting goods. He was unearthed because he couldn't abandon an affectation—having his calling cards printed on a special type of paper that had a slight pink cast to it.

Woman Bait for Mantrap

Usually, a runaway husband can be located with a great deal less deductive effort than that. In many cases the forsaken wife comes to Lamb's offices with well-grounded suspicions concerning another woman. Almost always the other woman is single and has less reason for elaborate secrecy concerning her whereabouts. She doesn't cut off all ties with the past. Lamb gets on her trail and usually finds the missing husband with her.

One foolproof means of avoiding a surprise departure is by keeping an eye on the clothes closet. In the majority of cases Lamb has handled, an absconding husband prepares for his flight by taking his clothes out of the house in small, day-by-day parcels. A great many of the women who call on him confess they were astonished when, upon receiving a farewell note, they inspected their husbands' closets to find every stitch of clothing gone and not a suitcase missing from the house.

Most of them will then recall how the man of the house had taken a sudden interest in getting garments to the tailor or the cleaner. When everything but the suit on his back has disappeared from the house, hubby does too.

The personalities of the men he has sought include enough types to delight a psychiatrist. If a girl contemplating marriage should ask for his opinion, Lamb would most strongly advise against marrying the egocentric, happy-go-lucky sort of young man. The very things that make a girl's head spin before marriage can and do make it ache with remorse afterward.

He is most emphatically against marriage for the man who is a "confirmed gambler." By that he means one who will gamble even so much as a penny without actually having the money in his pocket to pay off. A woman can spot this affliction by noting whether a boy friend borrows with increasing unconcern as the love affair ripens.

Young ladies should beware of the suitor who is given to lying, even though his habit is confined to the harmless "white lie." If her man will tell the truth when it is downright embarrassing to do so—when a tiny fib would get him over a difficult spot —she can mark him down as an A-1 prospect.

Her chances, though, are not too good, in Lamb's book, if she has to get him away from another woman. Entirely too many second wives put so much into their campaign to wrest their chosen mate away from another that they have no battle tactics left for the still tougher project of keeping him.

Lamb favors a man who is so engrossed in his job that he gets a trifle vague about his courtship now and then, although that attitude, of course, can go too far. One case he vividly remembers was that of a hard-driving, career-minded salesman who was so interested in his work that he invited an assistant to live in his home. This man felt it would be convenient for all concerned, since the assistant could take his wife to a play or out to dinner on evenings when the press of business kept the husband away.

When the maid reported several indiscretions the husband indignantly ordered his assistant from the house. He was stunned when his wife packed her things and went along.

Deserted Husband Makes Good

Lamb was ordered to track down the wife, one of the relatively few occasions when he has been called in by the male half of a marriage. He located her but could offer the salesman no better advice than to get a divorce. This the man did, and went on to become a millionaire.

The fifth year seems to be the critical period in most marriages. By then, most of the glamor has worn off and a previously dazzled couple has had a chance to meditate on the probable course of the next 20 to 30 years together. Thus, the age of the average Lamb client is about 25, seldom more than 30. One baffling particular in his work is the fact that the majority of the wives who see him are quite attractive. He cannot account for it, but the "other women" quite often are comparatively homely.

Invariably the "other woman" in Lamb's cases knows all about the wife. Far from feeling a sense of shame at breaking up another home, she will battle desperately to keep the man she has stolen. Lamb found one typical couple in Philadelphia and hauled the repentant husband back to a Manhattan jail. A day later the prisoner received a letter in which the girl enclosed her last dollar. "You need this more than I do. I'll get along someway," she wrote.

Lamb thinks that our movies, fiction and the ballads we sing give us all the idea that it is entirely possible to find a mate who will delight us the rest of our days, a rosy viewpoint which he sourly denounces as the greatest fraud of the ages.

Of the notes left by departing husbands, the most frequent are variations on this theme:

"I'm getting out now while I still have some youth left, to see and do all the things I've always wanted."

Lamb is an ardent supporter of the little-known Quaker method of contracting a marriage. When it becomes communal knowledge that a given couple have that love light in their eyes, a board of elders is summoned and the man and his lady must individually discuss with these older heads their most intimate thoughts and feelings. Each hears the handicaps of the other listed with brutal frankness. Only after several sessions of unbelievable candor are they allowed to resume their courtship, presumably with a fresh attitude on the subject.

He has never had a call to chase an errant Quaker spouse, and Lamb's understandably thin faith in human nature would be completely shaken if he ever were asked to do so.

Next to Quakers, Lamb's professional respect is highest for English husbands. He thinks Latins are the least able to stand the rigors of marriage. He doubts that climate has much to do with this interesting state of affairs, however, since Irishmen, although geographic neighbors of England, are not nearly so constant in marriage as they should be.

Although he feels that most wives do their utmost to hold a marriage together, usually far more than the husband, Lamb concedes that many wives bring on their troubles by growing careless. A recent visitor to his office arrived attired in a blouse so offending to Lamb that he demanded to know whether she had "mopped the kitchen with it."

"But even there," he says, "I blame the husband. A wife usually doesn't begin to get slovenly until she's convinced that her husband ignores every effort she makes to be attractive."

The only time Lamb gets sufficiently irked with women to take the man's side entirely is when a wife deserts a husband. You might think an abandoned husband would be inclined to let well enough alone. To the contrary, he's every bit as offended and enraged as a deserted wife. Although he's sympathetic, Lamb finds it difficult to repress a smile at this reversal of the normal procedure.

"They come in here just madder than hell," he says, "and you know the first thing they say? It's always, 'I gave that woman the best years of my life.'" ★★★

DRAWINGS BY GEORGE HARRINGTON

SQUAW MEDICINE

Continued from page 23

Style, Davy thought as he climbed in. This shines, this does. He lounged on the seat. Vardeman spoke to the driver, calling him Thomas, and bidding him drive home. The barouche rolled away. Zenas Berdan loafed on a corner and Davy grandly waved a hand.

Vardeman lived out of town. Davy, as they traveled, grew uncomfortable. His encounter with Zenas had taken up time he had meant to spend in shopping.

"I don't look too good," he said, glancing first at Vardeman's neat woolen suit, then at his own worn buckskin. "Mebbe I should of stayed in town."

"Nonsense," Vardeman replied. "I want my wife and daughter to see how a real mountain man looks. Where is your rifle?"

Davy told him. Another idea struck. "Mebbe they won't like havin' me there," he ventured. "I got a squaw, you know."

"A squaw?"

"Dull Knife's daughter," Davy said. "I give four ponies for her. Mebbe your folks—"

"We won't mention it," Vardeman interrupted. "After all, those marriages aren't binding."

VARDEMAN'S house was three miles from St. Louis, a matter of half an hour's journey. When the barouche stopped, the door of the home opened and candlelight streamed out. Davy caught a glimpse of women waiting in the hall, and his heart failed him. He would have backed away but Vardeman caught his elbow and urged him up the steps. "Thomas will bring your things. Yvonne, Sylvanne, I want you to meet a real mountain man: Davy Connor. Davy, my wife and daughter."

Davy scraped a foot as he'd been taught when a boy away back in Kentucky. Silk rustled as the women curtsied. Davy hardly heard what was said, he was so busy looking. Mrs. Vardeman was tall, stately, and fair-haired. The girl—Davy couldn't take his eyes from her—was shoulder high, with dark eyes and a spot of color on each cheek.

A Negro took Davy's possible sack upstairs to a bedroom. Vardeman escorted Davy and saw that his guest was comfortable. When he was gone, Davy looked at his surroundings, then felt the bed. Yep! Feathers! He washed his hands and combed his shoulder-long hair. He was as out of place as a Crow in Blackfoot country, and had he heard the Vardemans he would have known it.

"But Frank, that savage? Why did you bring him here?"

"Business, dear. He lives with the Cheyennes and we want that trade. You and Sylvanne be nice to him."

Dinner, with candles on the table, a Negro waiter, and an array of silver by his plate, was hard going for Davy. Not that the food wasn't good—nearly as good as buffalo—but the eating bothered him. Davy was accustomed to fingers and a knife for tools.

Afterward they went to the parlor where Davy occupied the edge of a fiddleback chair. The Vardemans did their best to make him at ease, asking him questions and encouraging him to talk. Vardeman said that he could smoke, and Davy brought out his pipe case.

Nell had made it. It was heart-shaped, worked with dyed porcupine quills, and with a fringe of hair.

"That is beautiful," Sylvanne said. "Is the hair from some animal?"

"Blackfoot scalp."

Yvonne Vardeman said, "Oh!" and Sylvanne made a little sound and turned white.

"I told you he was a real mountain man." Vardeman laughed. "Where did you get the scalp, Davy?"

Davy told him and that started the talk. Maybe the sight of Blackfoot hair upset the women, but they were bloody-minded enough to demand details. Davy sat there in his old, worn buckskins, smoking his pipe, weaving a spell, counting his coups over again. These women liked his talk. Before he went to bed Davy gave Sylvanne the pipe pouch.

Next day in town, Davy sold Vardeman his fur. He got a fair price for the beaver and did all right with the few robes in the packs. He had a thousand dollars credit with the company and two hundred dollars cash, counting his winnings from cards on the keelboat.

Again Vardeman talked to Davy about taking charge of a post in the Cheyenne country, but Davy put him off and went out to buy a wool suit and a white wool hat and a black silk kerchief for his neck.

"Why don't we just buy canned mushrooms and be sure?"

COLLIER'S VIRGIL PARTCH

Nell wasn't the only one in the Connor family that liked fofurraw. That night Davy was more sure of himself, feeling a heap more genteel in his new clothes. They talked about the rendezvous and Mrs. Vardeman made some remarks concerning liquor, saying what a shame it was to get men drunk and then trade with them.

Davy hadn't looked at things that way, liquor and feasting and trade all being a part of rendezvous; but he was polite and agreed. He made a mental note, too, that he should watch the drinking. Some friends came in then and Sylvanne showed them the pipe pouch, fringed with the Blackfoot scalp. Davy had to go to his room to get his powder horn—black buffalo horn, it was, scraped paper thin so that the grains showed through—and his belt with the cherry-wood awl case and the Green River knife in its sheath. Had he thought of it, Davy would have brought down the woman medicine, too, but it was hidden in the bottom of his possible sack.

After the company left, Vardeman went up to Davy's room and they talked some more about a post in the Cheyenne country. Davy wouldn't say. He could see that he held an advantage, someway, and he meant to keep it. When Vardeman came downstairs again he spoke to his wife.

"I can't get him to promise a thing, Yvonne, and you'll have to put up with him a while longer. Maybe . . ." He stopped and thought a while.

"I don't like to have him here," Yvonne Vardeman told her husband. "He's a novelty, yes. But did you see that awful suit? And the hat! And Sylvanne thinks he is amusing. She—"

"That's it!" Vardeman interrupted. "Sylvanne. He'll do it if she asks him. Have you seen him watching her?"

Yvonne Vardeman hadn't seen much of anything else. "Of course," she agreed. "But I don't want Sylvanne—"

"Now, Yvonne," Vardeman said, "this is business. I'll talk to Sylvanne." Vardeman was pretty set on getting the Cheyenne trade. The Rocky Mountain people, Fitzpatrick and Sublette and Bridger, had been taking all of it.

In the morning Davy didn't go to town but stayed at Vardeman's house and had a high old time of it. Mrs. Vardeman was nice as could be, but she had her slaves and her housekeeping to look after, so most of Davy's entertainment came from Sylvanne. He didn't mind. Sylvanne had a way of looking at a man, turning her head so that she glanced over a shoulder, and she had a way of smiling. Her laugh wasn't a squaw's giggle, but a clear, limpid thing, like clear water over a fall. Davy was weak and helpless as a buffalo bull with a galena pill in his lights. He'd never seen anything like Sylvanne and he was a gone beaver. . . .

In the afternoon they drove in to bring Vardeman home. They stopped at a store and while Mrs. Vardeman and Sylvanne shopped for yard goods, Davy sat in the barouche. Zenas Berdan saw him and came over.

"Now I know what ails you," Zenas announced. "I thought you was crazy when you talked about sellin' to the company, but that ain't it. You got woman trouble."

Davy flushed. "I already sold 'em my fur," he said, defiantly, "an' I'm thinkin' some of goin' up on the Cheyenne or the Grand an' buildin' a fort for 'em."

"You'll never do it." Zenas shook his head. "You ain't cut out for an *engagé*. You wouldn't like no pork diet. Come around when you get your wits back an' we'll pull out together. I'm amost ready to go."

"I ain't," Davy said.

"Well"—Zenas straightened, for th Vardemans had come out of the store— "you let me know. An' keep an ey skinned. That feller we seen in th saloon has been scoutin' around you. seen him an' I hearn some talk."

The next day, Thursday it was, Dav showed Sylvanne how a brave han over the side of a horse to keep fro getting killed, and he taught her part a Cheyenne song. In the afternoc Sylvanne mentioned how nice it wou be, did Davy work for the company. H would come down-river once or twice year, bringing in his trade, and mayb after a while, he'd get promoted to th St. Louis office. She let him know th she would be glad of that.

On Friday, Davy dug around in h possible sack and found the woman medicine Nell had given him. It was real pretty case, about three inches wid half that thick, and maybe eight inch long. There was something hard insi but Davy didn't investigate. Sylvan had liked the pipe pouch and Davy aim to give her the medicine case, too. I got to thinking about it. Women, squa or whites, liked fofurraw. Maybe t medicine case wasn't just the thing. Da thrust it in his pocket. He would find o what Sylvanne wanted and buy it for h

That afternoon when they drove in get Vardeman, Mrs. Vardeman had headache and begged off, so Davy a Sylvanne went alone. They stopped the counting room and Davy went Vardeman wasn't ready. He told Da to go on and send the carriage ba for him. Davy went to the cash and drew two hundred, gold, stuffi the money in his pocket. He didn't not Leblanc and Bulldog who were in t room. Davy was eager to get back Sylvanne.

THEY had come in early and there v a little time before they had to back, so Sylvanne had Thomas dr around. Davy pried and asked questic trying to find out what she wanted, she wouldn't say. He came right out a said he wanted to give her a present.

"You've already given me your p pouch," Sylvanne told him. "Of cou the nicest thing you could do for would be to take Father's offer." smiled when she said that.

"Well," Davy answered, "I ain't sure yet. I want to get you somethir

Sylvanne said there wasn't anyth she wanted, and anyhow it wasn't pro for a young girl to accept prese Thomas started out of town. "I *do* v you'd tell Father that you will work the company," Sylvanne said.

Davy squirmed. The pressure was him and he didn't like it. Zenas Ber had been right; Davy wasn't cut ou be an *engagé*. It stuck in his craw.

They were so busy talking that nei Davy nor Sylvanne paid attention to country. Not so, Thomas. Thomas l his eyes skinned and now he was lool back.

"Who that back there?" Thomas e- manded, and pointed with his w "Them mens are tryin' to ketch us!"

Davy stood up to see. He needed one look. About twenty rods back, blanc and Bulldog were coming, t horses at a lope. Bulldog had a across his saddle, while Leblanc with a raised pistol.

"Hell!" he said, forgetting Sylva "They're after us. Whip up them hors

The order wasn't necessary. Leb and Bulldog made their intentions p Either through excitement or to s them into stopping, Leblanc fired pistol. The ball didn't carry, but crack of the gun was loud. Thomas the horses to a run; Davy was je

down into the seat and Sylvanne screamed.

A team pulling a carriage can't outrun riders. Davy knew that, so did Thomas, so did the men behind. There were four hundred dollars in Davy's pocket and he kissed it goodby. He didn't think that Bulldog and Leblanc would be satisfied with just the money, either, not from what they had said on the keelboat. Davy's Hawken's gun was in the shop, his belt and Green River knife at Vardeman's, and his pistols away back in a Cheyenne camp. He felt naked as a jay bird. He searched his pockets, seeking a weapon, and kept his head turned, watching LeBlanc and Bulldog close the distance between them. When he pulled out his hand a finger was bleeding. Davy had cut himself.

He couldn't believe his eyes. He looked at the finger, put his hand into his pocket again and brought out the sack of woman's medicine. A steel tip protruded through the leather. Davy pulled the sack open and unrolled the white buckskin it contained. In the middle of the roll was a knife, an old, worn-out butcher knife, its blade paper-thin and about five inches long. Davy looked at Sylvanne. Her eyes were closed, her lips parted, and she was pale as a ghost. Oddly, the recollection of another occasion popped into Davy's mind. . . .

One time he and Nell, working down the Musselshell with all their fur and goods, had rounded a bend and run square into a Blackfoot hunting party. The Blackfeet were half a mile away and there had been time for preparation. Dismounting, he and Nell tied their horses, head to tail, and hobbled them. Then, taking up position, they waited for the attack, Davy with his Hawken's gun, Nell with an old Nor'west fusil.

The Blackfeet charged three times, yelling. At the first charge Davy presented his gun and, magically, the warriors disappeared over the sides of their horses, the charge splitting. The second charge was on Nell's side, and it split, too. The third time the Blackfeet came, one of the flying arrows struck home in Davy's shoulder. His answering shot dropped the Indian and after that the Blackfeet had withdrawn, their martial ardor cooled considerably by the death of their leader. All through the fight neither Nell nor Davy spoke a word, directions being unnecessary, and when the Blackfeet were gone Nell took a knife—this very knife in Davy's hand—and butchered out the arrow, put beaver fur on the wound and bound it with buckskin. Two days later they found safety in a Cheyenne camp.

DAVY looked back once more. Leblanc and Bulldog were not ten rods away, and gaining. Standing in the swaying barouche Davy clamped a hand on Thomas' shoulder. Thomas was scared to a nice ash-gray.

"Pull up when I tell you!" Davy rasped, and showed Thomas the knife. "Pull up or I'll cut your skinny throat." He looked back, estimating distance. "Now!"

Of two evils Thomas chose the lesser. He pulled up his horses, fighting them to a standstill, and Leblanc and Bulldog, surprised by the maneuver, came ranging on either side.

They had expected easy pickings. An unarmed man, riding with a woman, offered no particular problem to such as they. The two were almost scornful, having no idea of what was coming, discounting all danger. Davy struck them entirely unaware. He jumped at Bulldog, the man with the loaded gun, and as he leaped, the war whoop sounded in that peaceful Missouri lane: "Owgh! Owgh!"

The old knife, worn to a shred of steel, was razor sharp. It sank into soft flesh, lifting with the upstroke, and Bulldog, screaming his hurt, tumbled from the saddle. Davy went down between horse and carriage, clawing like a cat, draggin the gun with him. The frightened tear lunged ahead despite tight lines. Le blanc swung his horse to get away and in the clear, Davy whipped Bulldog rifle to his shoulder, cocked it, touche cheek to stock and finger to trigge The powder cracked and through th smoke came the satisfying thwack of lea finding meat. Again the war whoo raised and, dropping the rifle, Dav leaped in with the knife.

No need. No use either. Beyond th hanging smoke Leblanc rode off, reelir in his saddle, clutching at it for suppo On the ground Bulldog threshed agony, coming half up, like a snake wi a broken back attempting to strike. Da turned to the man and slapped him wi his hand, counting coup, the act whol instinctive. Bulldog fell back and w still, the life drained out of him.

KNIFE in hand, Davy looked abo The barouche was fifty feet awa He walked to it and got in.

"Try it with me, will they?" Dav face was savage. "Try to set this ho will they?" He settled on the seat, fa ing the rear. "Ain't no triflin' greenho goin' to lift my har!"

Timidly and tentatively, Thom started the team and, hearing no obj tion, raised them to a trot.

Sylvanne, pale-faced, eyes clos lolled limply to the motion of the

From next week's installment of THE SECRET PAPERS OF HARRY L. HOPKINS: Churchill became quite angry and told Ambassador Litvinoff in effect that he wasn't much of an ambassador if he didn't have power even to add a word to the document.

rouche. She opened her eyes and moa but Davy Connor paid no heed. He picked up the white buckskin from medicine pouch and spread it on knees. He studied it intently.

There was a splotch of vermilion the buckskin, a bit of scarlet cloth piece of blue strouding, a hawk's b a tiny chunk of broken mirror, each h in place by a stitch of sinew. There a bone needle, and a broken awl th through the leather; and there were tures drawn on it, a thing that could be a kettle, another of a pipe with sm rising. Davy's brows puckered in a fr and then, as he began to understand, t smoothed.

"Woman's medicine," Nell had s "to bring back. Open it when you ge the big village." Now Davy caught cute of it. Like many another wife at home by her husband when he wer market, Nell had sent a shopping list. could not write so she had put in sam and made drawings of the things wanted. Davy Connor chuckled dee his chest, while Sylvanne moaned ag unnoticed. Davy knew what he was ing to do.

First, he would take this girl home turn her over to her mother. Then, all his possibles, he would go bac town. He would hunt up Zenas and would have a time, a real doin's. In morning he would draw his money buy trade, all the things Nell wanted, more too: coils of brass wire and o broadcloth for a skirt, cut-glass b bracelets and finger rings and s topped thimbles and ribbons for N hair, all these besides a kettle and a knife. And next year when they tended rendezvous, Nell would out the other squaws, outshine them all. when a man goes to market and l his wife at home, he has to make to her. He does, indeed.

THE END

THE WEEK'S MAIL

Continued from page 4

ndle the mail are taking an awful eco-mic beating. During the war they received eir first pay increase in years and it was tle and late and immediately absorbed by creased costs. Now these costs have dou-ed and redoubled, and while private and dustrial labor is howling starvation as ey chase the gravy train for a third round, e pleas of the postal worker for a little cond helping go virtually unheard, and om the looks of things, unheeded.

A couple of pay-increase bills have been oted out of Senate and House commit-es. They have not been put on the calen-r and will not be unless Congressional adership gives them a green light.

CLAUDE W. PYLE, Postmaster, Sidell, Ill.

A MEDAL FOR HERTER

Y DEAR MR. DAVENPORT: May I, as one Christian Herter's constituents, con-atulate your magazine on awarding him ur coveted prize. Mr. Herter's faithful -operation among his people, as Repre-ntative, is without parallel! (For Distin-ished Congressional Service, May 15th.)

My colored houseman was arrested at nzio beachhead, court-martialed and sen-nced to three years with a dishonorable scharge.

I enlisted Mr. Herter's aid to get a re-ew. After months of work and disap-intments, I was finally given the chance present evidence in his behalf at Gov-nor's Island, New York.

The result was a complete reversal of e decision handed down *twice* by the ar Department.

MRS. S. IRVING COPEN, Boston, Mass.

FOOTWORK

ENTLEMEN: Even if I didn't recognize the lad Monk as the sleeping beauty illus-rating the article on sleep (Go to Sleep, lay 29th) by his beatific smile, the trick ng on his left hand is a dead giveaway. et out from behind the eye pad, George arger, we know you. I suppose the right and pulled the release.

t is Photographer Karger. He pulled the elease with his toe. The right hand is the reamer.

THE CONTESTANT SPEAKS OUT

IRS: I have just finished reading Crazy ike a Box Top (May 22d), the interesting nd amusing article on "contesting." I am run-of-the-mill housewife-contest fan ho has entered thousands of contests and on a fair share—local, national and in-ernational.

I am what you may call a repeater, but ertainly NOT a "professional." That oint needs a lot of clearing up.

I have had some thrills, and some bad pills: One automobile that I had won ould not be given to me because of a light rule infraction, and another hard-on one was withheld because I had used period instead of a semicolon—believe t or not! And in both instances the spon-ors were entirely right.

With all the failures to win that I have ecessarily had, I have never felt any-hing but good will toward any sponsor.

MARY CHASE CORNELIUS, Demopolis, Ala.

. . While residing in Portland, Oregon, bout eleven years ago, I entered a contest nd the obvious headache was to unscram-le a long list of names of movie stars. I was practically planning a vacation on my anticipated grand prize as I had every one correct. The inevitable happened—"We wish to inform you that due to the fact so many entries were 100 per cent accurate, we will conduct another contest. To be eli-gible, send us $1 for twelve movie stars' pictures." Sure I was a sucker and I never heard from them again.

Personally, I have played every contest I have heard of in the past thirteen years and I have won $5.

WILLARD E. CRAWFORD, Springfield, Mo.

. . . My most sincere thanks for Crazy Like a Box Top and my everlasting gratitude to the author, Edward P. Morgan, who has saved me many future hours of thought and unrest. A LOS ANGELES HOUSEWIFE

. . . That I am burned at some of Edward P. Morgan's statements is indeed putting it mildly—although in the main, his article does depict contesting fairly.

My own wins since last October have been: a pressure cooker, a radio, 2 electric irons, 2 Boy Scout knives, about $20 in cash, $25 in merchandise, $14 in theater tickets, one magazine sub., perhaps one or two others that escape my mind. Does that sound professional? Besides my contesting activities, I keep house, have my husband underfoot daytimes (he works at night), board a 2-year-old baby, have a grown daughter who works, and two teen-age children in school. As I have no help, you can see that my contesting, as that of any average housewife, occupies small fragments of my time. Meanwhile, I'll go on trying to win us a new car!

MRS. LOUIS N. KIENE, Atlanta, Ga.

THE CRYING MAN

DEAR SIRS: Your readers' complaints that all the Presidential candidates you have run were smiling in the face of world crises are well taken. What this country needs is a President who can frown in the face of adversity and tear his hair whenever he thinks how things are going.

Robert Q. will weep for you!

I therefore offer myself for the Presidency. The times cry aloud for me. Running on the Deflation Ticket, I plan my theme song to be "I Cried for You," promise not to kiss babies, but to smack them to prepare them for the harsh realities of life. I shall pass out exploding cigars to teach people to trust nobody. If elected I promise to end the Communist threat: I'll replace the Reds with the Blues. For my constituents I promise a crying towel in every home. . . .

Voters, get behind me. I am so discouraged there's a chance I might not even run.

ROBERT Q. LEWIS, New York, N. Y.

DEATH OF A LEGEND

General Brehon Somervell, president of Koppers Company, Inc., Pittsburgh, Pennsylvania, and Charles E. Wilson, president of General Electric Co., both deny the accuracy of a hardy perennial story which appeared in Bill Davidson's article, Spare-Time Statesman (Apr. 10th). Davidson's article referred to an altercation alleged to have occurred during the war, when the general was masterfully solving the well-nigh impossible Army logistics problem, and Mr. Wilson was vice-chairman of the War Production Board.

General Somervell, paying high tribute to Mr. Wilson, writes that the alleged encounter was purely a figment of someone's imagination. Mr. Wilson has written to the general expressing his chagrin over the reference to an incident which he says never occurred.

These statements are good enough for Collier's. We are sorry for the embarrassment caused these two men and so far as we are concerned this is an obituary of the tale which we hope will be interred along with other wartime gossip.

One dish meal . . .

SPAM DUTCH OVEN DINNER

HOW TO MAKE IT: In bottom of Dutch oven, brown whole SPAM all sides in 2 tbsp. fat• Add enough water to cover bottom, surround SPAM with medium size peeled onions, potatoes, carrot strips• Cook covered over low flame until all vegetables are tender• Remove to serving platter and arrange around separately cooked frozen or fresh peas. Reserve liquid.

MAKE GRAVY by adding meat stock (or bouillon cube and water) with enough flour to thicken. Pour over SPAM or serve separately in gravy boat.

SQUARE MEAL . . . boiled yams, sliced and baked in layers with onions plus apple juice and butter, topped with juicy SPAM slices. Bake in hot oven until SPAM is crisply browned.

EASY DINNER . . . Ten minutes before potatoes finish baking, put limas to boil, fry fat slices of tender, pure-pork SPAM. Drain limas, split potatoes, add butter pats. Dinner's ready!

KING OF BREAKFASTS, sizzling hot fried SPAM and crisp, golden waffles. Tender, mild SPAM is also the ideal mate for pancakes, or eggs any style. In fact, SPAM makes *any* breakfast good!

COLD OR HOT SPAM® HITS THE SPOT!

HORMEL GOOD FOOD

SPAM is a registered trademark for a pure pork product, packed only in 12 oz. cans by Geo. A. Hormel & Co., Austin, Minn.

GOOD-TIME STREET

Continued from page 24

recently, a radio personality was picked up for handing out marijuana cigarettes as "favors."

When the cold light of the morning sun drapes The Street with a veil of drab respectability, the five-story brownstones that make up most of the block look much as they probably did 35 years ago, when they were the homes of New York millionaires. By the early 1920s, most of the aristocrats had left. The final socialite to depart was Kip Rhinelander, who caused a storm in the yellow press when he married a woman with colored blood. He chose to move from the neighborhood after months of notoriety.

A Sensational Jewel Theft

First indication that Fifty-second Street, between Fifth and Sixth, was not meant for ordinary things came on New Year's Eve of 1923. Irene Schoellkopf, wife of an upstate industrialist, was robbed of a half-million dollars in jewels during a party held in the apartment of her professional escort, Frank Carman.

Carman lived on The Street, at the top of a brownstone that had been owned by the notorious gambler Nicky Arnstein. This house remained in the news for months while police hunted the criminals.

Leader of the gang was Eugene Moran, an Arnold Rothstein bodyguard who was eventually burned to death during a gang war with Legs Diamond. Prior to the robbery Moran had lived at this same Fifty-second Street address with his moll. She was later drowned in the Harlem River, after being weighted with lead.

One of the two "fences" who bought the stolen jewels committed suicide on discovery. His partner was promptly paralyzed from shock and, after helping the police recover the loot, dropped dead.

Around 1925, speak-easies discovered that The Street was made to their measure. It was located in the center of things, yet had quiet exteriors behind which they could hide. Many former "speaks" are still in existence on The Street; and the owners brag of their illegal origins as if it meant coming over on the Mayflower. Examination indicates that the much-disputed "honor" of having had The Street's first speak-easy belongs to a man no longer in business, Jean Billia.

Jean certainly won't deny the distinction. "Ask me who had the first speak-easy on Fifty-second Street and I will tell you it was Jean Billia," he boasts defiantly.

The speak-easies survived either by paying off prohibition agents or by tricking them. Jack and Charlie's "21" Club negotiated the latter course by exercising fantastic ingenuity. First, it built secret vaults in out-of-the-way places, including a storeroom with a 5,000-case capacity under the basement of an adjacent house. Heavy masonry doors disguised as walls and operated by complicated electrical systems led to the caches.

In the drinking room upstairs, there was a trick counter top on which bottles and glasses could be piled. This was flipped into a recess in the wall, at the bottom of which was a chute that led to the sewers. In the vestibule, the doorman could press a button which disconnected the electrical system, making it impossible for the agents to operate the trick doors even if they should stumble on them. Simultaneously, the button sounded an alarm in the drinking room.

Prohibition officers made many unsuccessful attempts to sneak past the door while posing as guests. Once they came disguised as college boys, wearing raccoon coats and blazers and singing Boola-Boola! They were spotted a mile away.

Once Mac Kriendler, one of the "21" Club's owners, had a discussion with humorist Bob Benchley about the number of speak-easies on the block. To settle it, they started up The Street, taking a drink at each joint. Before long, they had to stop drinking in order to be able to continue counting. The total came to 38—not including restaurants which carried booze to be accommodating.

The peephole is gone from "21"; but it remains the favorite saloon of the famous. Outside its front you can generally find two clusters of people. One is made up of chauffeurs passing time. The other is of teen-agers who have read that Frank Sinatra is in town and know that, inevitably, he'll turn up at "21."

Just west of "21" is Leon and Eddie's. Although the proprietors of both clubs are friendly and run to each other for a few cups of sugar or a case of Scotch, their customers are from different worlds. Over 75 per cent of the business at Leon and Eddie's is made up of ordinary folks from out of town. The management claims to have a mailing list of 180,000 non-New Yorkers, scattered from Yonkers to Tibet.

Perennial star at Leon and Eddie's is owner Eddie Davis. Eddie is from the "schmaltzy" school that gave us Jolson, Cantor and Richman. For the past five years, on and off, Eddie has shared the spotlight with Sherry Britton, once a noted burlesque star. During the war, the club distributed a half-million copies of a startling photo of wasp-waisted Sherry. As a result, over 20 bombers were named after her. Another result is a steady flow of ex-G.I.s who come to see if it's all really true.

The folksy level on which Leon and Eddie's operates tends to put guests in an uninhibited, paper-hat frame of mind. Once Tommy Manville, the marryin' man, came to Leon and Eddie's in a horse-drawn carriage, unharnessed it and, in top hat and tails, rode the horse right in to a ringside table.

On the opposite end of The Street, Tony Soma has operated Tony's restaurant since 1929. Tony is an ardent believer in both yoga and *bel canto* singing. He and his family, down to nine-year-old Napoleon, try to sell customers on both virtues by singing while standing on their heads. Some unappreciative customers tried to dissuade Tony by confronting him with a recording of his upside-down voice. They waited hopefully while Tony listened to himself on wax. "Wonderful," he exclaimed, stamping his *hands* and clapping his *feet*. "Now I know I should teach others."

If Tony's hauntingly beautiful daughter, Enrica (Ricky), is a representative product of his methods, Tony's theories have merit. Though only nineteen, she has appeared on the covers of two national magazines, was a featured dancer with the Ballet Theatre and is under contract to Selznick. She began her professional career, of course, singing on her head.

Most important in the over-all make-up of The Street is its swing music. Here, in the early thirties, swing was born. Today, The Street is still the fountainhead of hot music. To this shrine, jazz fans come from all over the country, as well as from Europe, South America and even Siam.

Center of this idolatry is a group of swing clubs jammed within a hundred-foot portion of the west end of The Street. They're located in the basements of the brownstones. There have been as many as seven of these jazz cellars operating at once; now there are only three: the Onyx, Jimmy Ryan's and The Three Deuces. One of the original swing clubs closed when its building was condemned. Another became a package-liquor store. The rest switched from music to strip tease.

"We're being strangled by G strings," the jazz musicians moan.

Daddy of the swing clubs is the Onyx. It was founded around 1930 by Joe Helbock, now a bartender at the Ritz Tower Hotel on Park Avenue. Joe liked musicians; so the Onyx became the home-away-from-home for the Dorsey Brothers, Benny Goodman and other swing immortals. It was here that they held jam sessions, kept their instruments, received phone messages and, when they couldn't pay their rent, slept.

With the repeal of prohibition, Helbock inaugurated a formal music policy and hired a small band led by two guys named Riley and Farley. These two soon set the country crazy when they introduced The Music Goes 'Round and 'Round. Others who got their start at the Onyx were Maxine (Loch Lomond) Sullivan, John Kirby, Art Tatum, Stuff Smith and Leo Watson. Claude Thornhill was one of many musicians who hung around; and it was he who dreamed up the idea of Maxine singing Scotch ballads.

The swing clubs on The Street today are upholstered cellars with a capacity of from 120 to 150 persons. The typical Fifty-second Street jazz fan never sits at a table but crowds around the bar, where there is no cover charge. In that way, he can, with a few dollars, manage to shuttle between clubs hearing the best at each. Bebop is currently the musical craze; and when the two leading exponents, Dizzy Gillespie and Charlie Parker, recently played The Street simultaneously, the crowds at the bar moved back and forth between the two. When Dizzy was performing, the bar was packed 5 and 6 deep. When he finished and the "relief" unit came on for a half hour or so, almost everyone swarmed next door to hear Charlie.

The strip-teasers, some of whom have replaced the jazz musicians, appeal to the older clientele, with more money to spend. But with so little cash left the days after paying the landlord and grocer, even these customers are demanding that the strippers extend themselves if they want any customers. Last May the city police accused Georgia Sothern of being too anxious to please and importuned her to tone down her act. The charge, however, was dismissed after a hearing.

The people who live on The Street, being largely members of the entertainment world, like the carnival air on the block, even the late-hour noise. An average resident is Chan Richardson, of 7 West Fifty-second. Chan is a pro night-club dancer and a schooled musician who earns extra money as a music copyist. She lives with her mother, who as Mildred Darling was a Ziegfeld follies girl, class of '24.

"If you must bury someone, bury the lady in the French bathing suit—and hurry before Daddy gets back"

COLLIER'S — MARY GIBSON

Likes to Live Among Bebop Cats

"This is the 'gonest' street in the world," Chan brags, like a chamber of commerce enthusiast who talks jive. I like walking home past the clubs, and always hearing music. I think bebop is the very end—and just think, here I am in the midst of the great cats who created it."

Chan expects to have to move shortly to make room for the new Lord & Taylor building. She's depressed, not so much from having to hunt for a new home as from knowing that The Street will go on and will never be quite the same.

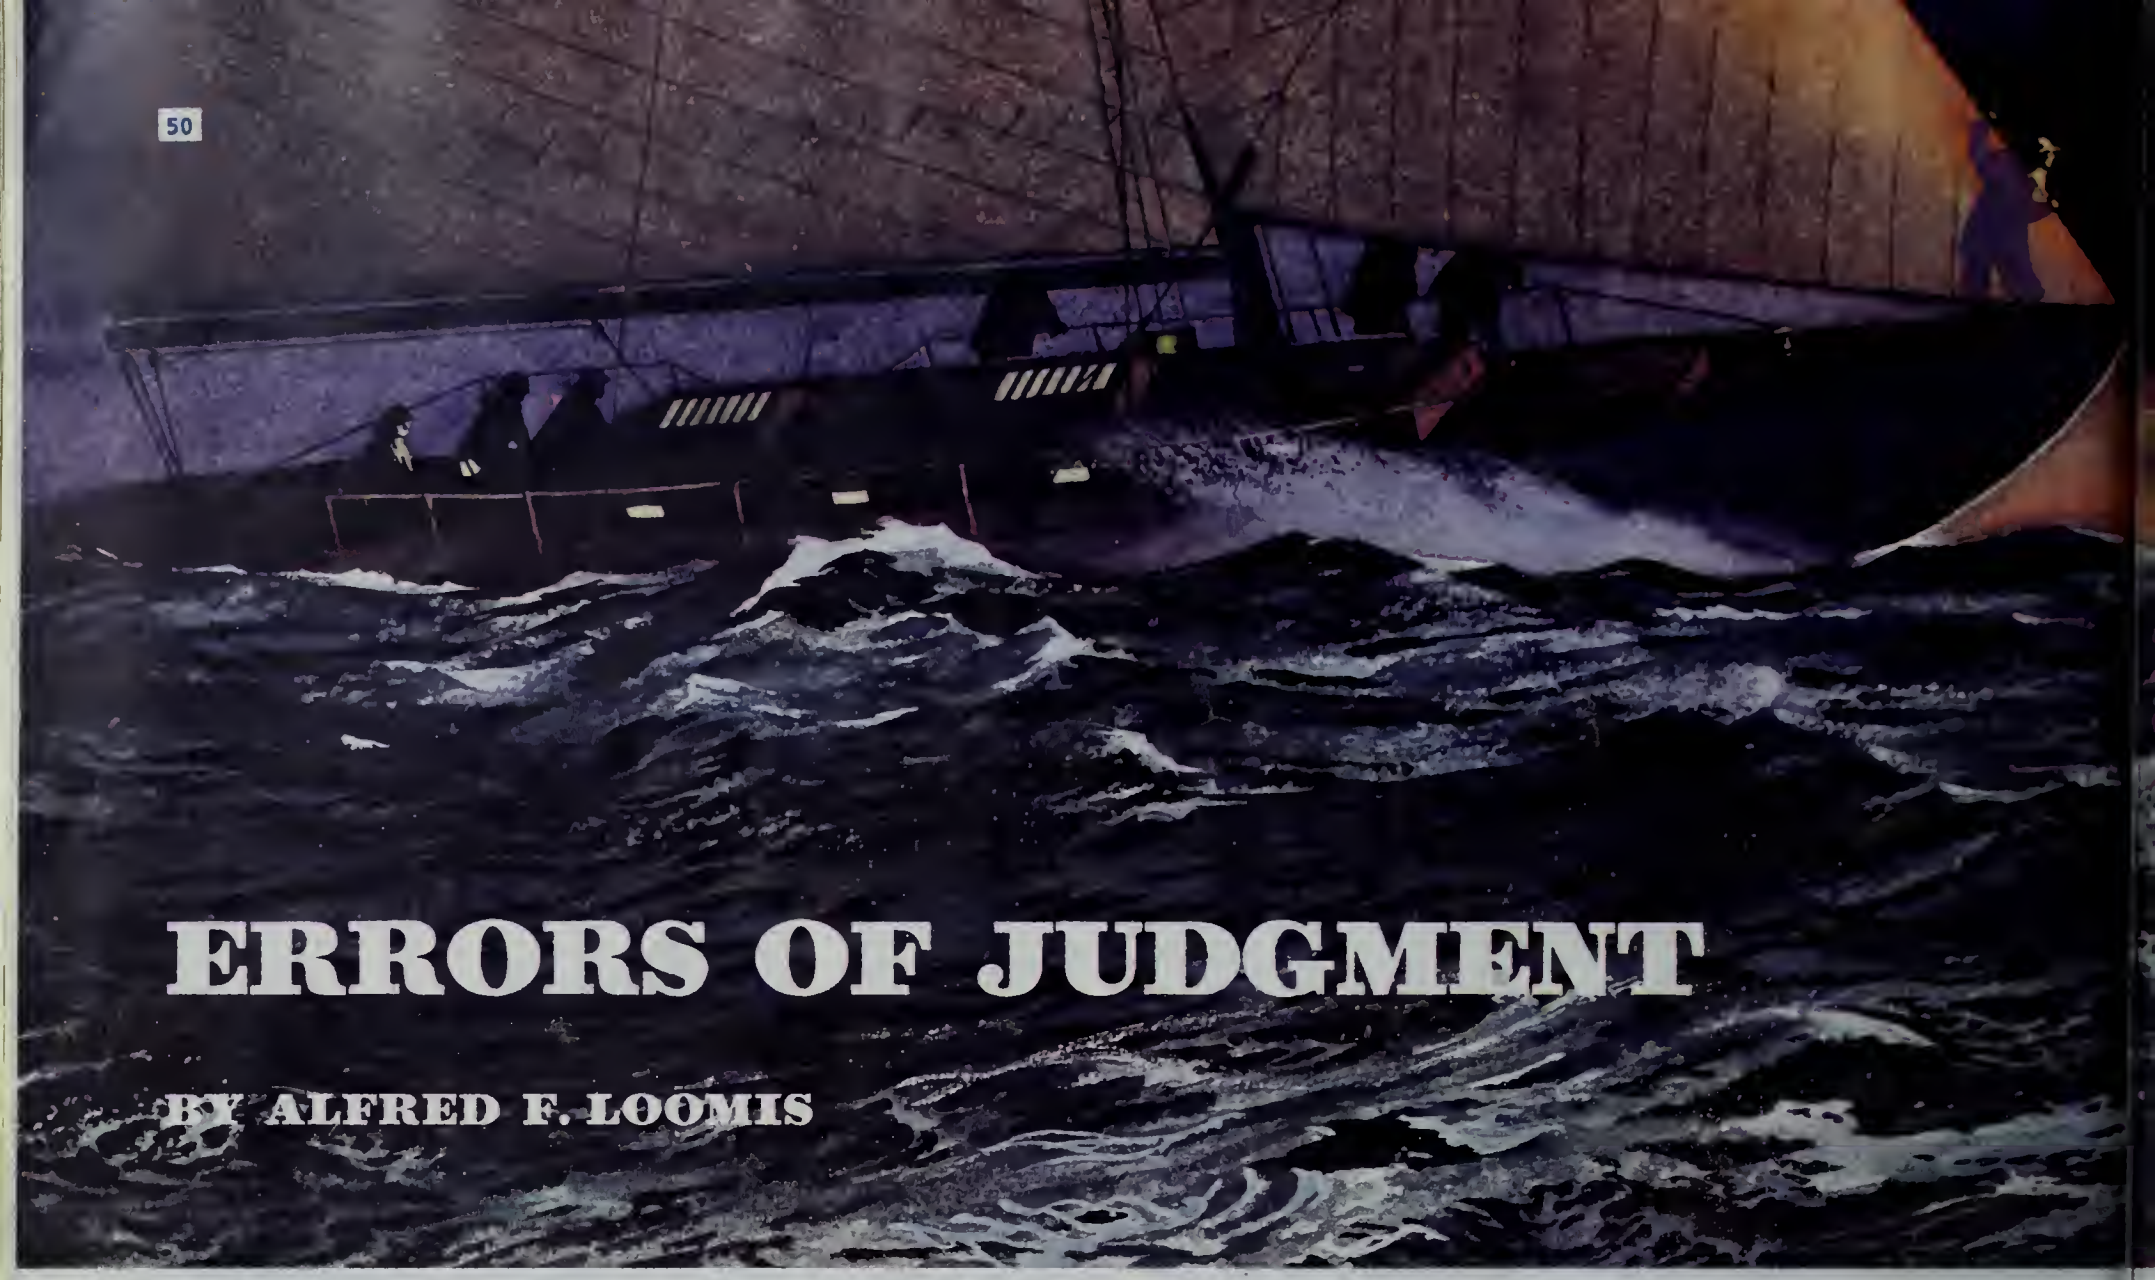
Signs of The Street's forthcoming demise are everywhere apparent. The Lord & Taylor Building has already taken a big bite out of the block. Here and there, buildings needing repairs have been boarded up, waiting to be replaced by skyscrapers.

Owners of the jazz cellars are opening new locations. The Dooley Sisters, who operate The Street's Gold Coast Cellar, have established a restaurant on Fifty-sixth Street. Leon has parted from Eddie and settled in Florida; Hy Fink, composer of Curse Of An Aching Heart and a fixture on The Street, has sold his Club Samoa and retired. Joe has already established an East Fifty-fifth Street restaurant called Tony's Wife. Even Mayor Pincus has been seen, on slow nights, parking over on Broadway.

Not since the Navy Department shut down New Orleans' red-light district after the first World War has an area filled with traditions of pleasure been faced with such a mass dispossession. One by one, the bright lights are being turned off. But it's a safe bet that there will be something doing on The Street until the last glass is tipped and the last hot note melts in the night.

THE END

Douglas Moore



Doug knows cars!" That's what folks ay around San Antonio, Texas. He's been perating service stations there since 1929.

"Why do I use Macmillan Oil in my own car? Well... if you'd worked over as many motors as I have since 1929... you'd agree there's no oil in America like Macmillan Ring-Free. Any car runs better when you use Macmillan *regularly.*"

ASK FOR MACMILLAN OIL

You're right, Mr. Moore! Macmillan Ring-Free Oil *is* different. Manufactured by the Macmillan patented refining process this oil not only lubricates fast but actually removes hard carbon... keeps motors cleaner.

Take a tip from the thousands of service station men throughout the nation who use Macmillan Oil in their own cars. Use Macmillan Ring-Free Oil *regularly!*

ERRORS OF JUDGMENT

BY ALFRED F. LOOMIS

She had fine, beautiful lines, that boat. His wife was all right, too. And the combination should have been wonderful

THE second day out, the sea began to build up. Jim Allen, owner of the Wasp, was lying in his bunk in the double stateroom, his eyes shut tight, his heart skipping a beat with every fall of water on the deck. And on deck, Art Folsom, the navigator, was holding forth to the younger members of the amateur crew. Art's voice was just loud enough for Jim to hear him clearly through the stateroom skylight.

"This is the life. Why, I remember in '36 when we made it in little more than three days . . . Ever been sick? Me?" Art said, "Oh, a touch now and then. The trick is to heave and go right on with your work. I guess the Old Man is finding out that being top dog in Allen Industries, Inc., or day sailing in a quiet harbor is easier than ocean racing."

Natalie, Jim's wife, came into the stateroom, balancing gracefully against the uncertain motion of the boat. Jim lay on his back in the lee corner of the bunk, one shoulder pressed against the white enameled woodwork of the yacht's interior sheathing. She grasped the side of the bunk and leaned over him. "Hope you're feeling better, darling. It's wonderful topside. We've worked past that other boat that's down to leeward of us."

He repressed a groan. These technical phrases, which she had acquired from Art Folsom. He opened his eyes and observed her closely. "I know," he said. "I can hear most of the talk on deck. This open skylight's almost as good as a speaking tube."

Almost. But not quite.

Last night with the rest of the watch forward changing headsails Art and she had been alone in the cockpit. Very few words had been distinguishable, but Art had been saying plenty to her. Had it been the innocent chatter of an incessant talker? Or hadn't it? Jim could see nothing in Natalie's expression that betrayed a troubled conscience. Nevertheless, it was Art whom she had in mind when, as she turned to go, she said, "I'll tell him to let the Old Man rest a little longer."

The Old Man! The expression twanged another chord of Allen's jealousy. The crew had set him apart as the man that owned the yacht, and Natalie was one of them. She stood watch with them, took down figures when Art was shooting the sun, popped in occasionally with sparkling beads of water like diamonds in her hair, oozing health and happiness to observe the Old Man sick as a dog in his bunk.

"Take it easy, darling. And if you want anything, sing out and I'll get it for you."

She left the stateroom, closing the door carefully, as one does in leaving a sickroom. A moment later he heard her voice on deck. And he thought he had learned every nuance in seven years of married life. But it was different now, gay and carefree. She was no longer just the lesser half of the successful manufacturer.

Well, whose money had built this boat? How had she ever distinguished herself? Or Art Folsom, for that matter? On shore Art was the man with the pleasing personality who acted on Jim's suggestions. Nothing creative about him. Natalie had been fed up with being left home when her husband went off sailing with his friends, and now that they had a yacht of their own she had insisted on coming along. Or had she insisted because sailing was Art's sport, because Art, who had inveigled him into having this yacht built, was to be along too?

"The skipper," she was saying, "is having a little snooze. He tired himself out getting the Wasp ready for the race, and the reaction is natural. But he ought to be up and about after lunch."

"That's a thought, Nat," one of the younger men declared. "When do we eat?"

"Well," Jim heard her say, "I've just been up to pay a call on Robert, and while the galley is a shambles, with literally streams of water leaking down the stovepipe—"

"Charley Noble," corrected Art.

"Oh, yes, the Charley Noble. And although poor Robert is wearing a sou'wester to keep the water off the back of his neck, he has a roast in the oven, and there'll be baked potatoes and peas, and—"

CLOSING his ears to these repulsive gastronomic details, the owner of the Wasp shifted position so his hind end was against the side of the boat and his face was pushed into a rumpled pillow. His stomach kept turning over and it began to make him mad. The devil with them! I'll show them right now that I'm not sick or disabled, he thought.

Jim swung a leg over the side of the bunk and rolled belly down, pushing with his hands against the mattress to heave himself up. An attack of nausea sent a flood of saliva into his mouth and he swallowed convulsively. He let the heave of the sea roll him back against the sheathing. He lay panting, soaked with perspiration.

"You're sick, you silly old poop," he said to himself. "As a sailor you're a flop."

Art Folsom came into the stateroom, his black oilskins dripping water, and stood bracing himself with a knee against the bunk, drying his hands on a towel. He fished a cigarette from a dry inside pocket, lighted it and, inhaling deeply, blew the smoke in Jim's direction.

"How goes it, old-timer?" he asked, with that appalling lack of sympathy which a well man feels for the tribulations of a seasick one. "It's breezing on. Natalie's worrying a little about getting too far to leeward of the finish line, and we both think we ought to tack."

That made Jim angry, and his anger made him feel a little better. He swung both feet to the floor and sat almost erect. "Anticipating seasickness, Art, I proposed before we started that if it hit me you would take charge of the strategy of sailing this race. I didn't say we'd submit everything to a committee."

Damn it all, his wife knew nothing about anything except being a fascinating woman, and to express an idea on racing tactics when he was below was too much. He'd show her. Aware that Art would feel the clamminess of his upper arm if he permitted himself to be assisted to his feet, Jim made a mighty effort and stood upright.

"Easy does it," said Art, making no move to lend a helping hand. "Who ever said we were sick?"

Jim grunted. A little anger was a wonderful thing. His stomach was staying in place, even though the yacht seemed to be lying on her side. He clawed his way through the stateroom doorway and up into the doghouse, a partially glassed-in enclosure that served doubly as a shelter and as the navigator's workroom. There were three steps more to the deck

As the Wasp drew closer to the burning yacht they could see the men in their life jackets, crowded as far aft as they could get. They knelt or stood holding to the mizzen shrouds

ILLUSTRATED BY RONALD MCLEOD

level but Jim contented himself with leaning over these, his head out of the hatchway, his arms resting on the sill.

A young man named Pete Dulwich was sitting at the wheel, one hand on the top spoke, moving it from side to side to hold the yacht's course, a benightedly happy expression on his face. To windward of him sat Natalie, dressed in a ski costume, the parka drawn up over her head, its red piping framing her round and laughing face. She leaned forward and patted Jim's shoulder with a proud, maternal gesture.

"Old Father Neptune himself!" she exclaimed. "Jim, darling, it's absolutely glorious."

JIM cast a sour look around. There was blue-green water, lapped with foam, climbing hungrily aboard to leeward, bubbling over and around such cleats and winches as were in its way. In the middle distance the Atlantic heaved angrily, its crests capped with spray that blew forward, the backs of its irregular waves traced with froth. Farther away the disturbance seemed to flatten out, but this was only seeming, for down there at a distance on the Wasp's quarter a racing competitor plunged her bow into it, inclining her mast until the spreaders seemed to touch the surface. The horizon looked as unsympathetic as a steel-gray band saw. Craning his head briefly to windward, Jim saw low, wind-racked twists of nimbus cloud scudding toward him.

A hell of a day to go to sea in a small boat, Jim thought. Because of the enthusiasm surrounding him he had the grace to keep the words behind his lips. There was a bunk on each side of the doghouse, and he sank down on the leeward one. He saw Art Folsom standing by, for once with a rein on his tongue. Jim's stomach rose quickly, the beneficial effect of the fresh air completely vitiated by sight of the tumbling, but he mastered it and said, "Let's have a look at the chart, and see where we are."

Art detached the ocean chart from its board and handed it over. "Here," said he, indicating, "is the rhumb line between Newport and Bermuda, and this small cross was my forenoon fix, about eight miles to westward of the line."

Jim made an effort to recall something of racing strategy that he had learned in coastwise sailing. "It's bad policy," said he, "to get too far to leeward of your line."

"That's what Natalie was thinking. But that boat astern of us and another one on our starboard bow are going the same as we are, and we've got them both covered. On second thought, now, I'd say get to westward and then if the wind hauls into the southwest we'll be sitting on top of the fleet."

"Suppose it doesn't?"

"Then we're sunk, racewise."

Jim found himself thinking of the decision he was required to make in terms of personality. Natalie wanted to put the yacht on the other tack. Art now wanted to remain as they were. If there were a third choice he, James Allen of Allen Industries, Inc., who traditionally did the proper thing, would weakly take it.

The yacht lurched with such violence that Art was thrown off balance and came sprawling down on top of him. A sea broke clear over the laboring vessel, flooding the cockpit. Here was Jim's third choice, weakly taken.

"Get the men on deck," said he, trying ineffectually to brush the water from his clothes. "Get a lot of sail off her. Tell Natalie not to stir from the cockpit except to come below. I'm going down to—help the cook." To himself he added, savagely, "To be sick, you mean."

Art was on his feet, full of vim and vigor. "Do we continue on this tack?" he asked.

"Suit yourself," said Jim. "With a reef in her we won't be going anywhere anyway." He went below, avoiding the glances of various members of his amateur crew who were on their feet struggling into oilers. He fell limply into his bunk, still in his saturated clothes, suffused with a feeling of gratitude that this was home, the one spot in a disordered world where he didn't have to make pretenses. He could lie like the dog he was.

NATALIE came in, hauled a blanket from the drawer beneath his bunk, spreading it over him. "You'll be all right pretty soon, Jim," she said. "Art says the motion will be a lot easier since he's going to stay on the port tack."

Weak humiliation sapped Jim's remaining strength. "I've simply got to sleep," said he. He slept. . . .

When he awoke, the nausea was gone. He opened his eyes, and saw that it was night. He had slept all the afternoon and evening. The yacht wasn't heeling consistently to one side or the other. She was bobbing up and down, in slow motion. No wind.

Drifting down the open skylight came remarks from which Jim deduced that the calm had come suddenly upon them:

"Look, there's clear sky overhead, and stars. That means we're in the center of a low and that the wind will come from a new direction." Jim placed the voice as that of Stew Webster, the man in charge of his starboard watch.

Art was also on deck, saying, with unction, "I didn't do so bad insisting on sailing the port tack all day. It's got to come in from the southwest, and, boy, will we be there!"

That kid Pete Dulwich was evidently at the wheel again, for he said, "No steerageway."

"Do the best you can, son," said Stew Webster. That order, thought Jim, marked Stew as the man in charge of the watch, and the time as after midnight.

Natalie was also topside. "If the wind does come in from the southwest, Art," she asked, "does that mean we have a chance to win?"

"Don't count your chickens," grumbled Stew.

"At least we're on top of the fleet," answered Art, "as I thought we would be when I told the Old Man what to do yesterday."

So, it *is* shortly after midnight thought Jim, dully. In a sort of mental double-take the significant part of Art's remark impinged on his thinking processes. *When I told the Old Man what to do.* So you're in command, are you, Mr. Folsom, and the Old Man is a cast-off shoe? We'll see about that. He reached up and snapped on a reading light at the head of his bunk. Immediately from the cockpit came the shout, "Douse that glim!" followed by the propitiatory words, "Oh, I guess the Old Man has come to life."

Natalie laughed, a clear tinkling peal of proprietary laughter. "The poor dear," said she. "I'll go feed him."

Jim threw off his blanket and got to his feet. He was mad clear through, and his words of greeting as Natalie entered the stateroom were venomously spiteful. "A fine loyal wife you are, sitting up on deck with that crowd of jib jockeys making fun of your husband."

There was a sudden hurt look in her eyes—a look instantly replaced by indignation. "I did nothing of the kind," she rejoined. "I came down to give you some bouillon. If you drink it hot it will improve your disposition."

"It will take more than that," Jim announced.

Natalie filled a cup from a vacuum bottle, handed it to him and perched herself on the edge of his bunk, regarding him quizzically. "This has been a wonderful experience," said she. "Reefing down, and the wind going flat, and all that. I'm so glad you brought along somebody that knows as much about sailing as Art does."

Art! Art this and Art that. To hell with him! Jim gulped the steaming bouillon, gave the empty cup to Natalie and got into dry outer clothing. "Did I hear something about starlight?" he asked.

"Yes, and Art says the barometer is literally bounding up."

Jim turned off the light and left the stateroom, leaving his wife to her own devices. He felt his way up through the doghouse to the deck and stood still, holding on, while his eyes adapted themselves to the darkness. First recognizable was Pete Dulwich, the light of the binnacle shining on his face.

"Ah, Pete, at it again, I see." A figure stirred in a forward corner of the cockpit and the owner of the Wasp became aware of Stew Webster's burly presence. "Our watch on deck, is it?"

"Yes, the middle watch."

"Where are we?"

Art, sitting alongside the helmsman, put in his two cents' worth. "Halfway between hither and yon," said he.

"Where," asked Jim, "is that stranger you saw on our starboard bow?"

"Somewhere on our port bow now. We overhauled her and she tacked astern of us. We came about a little later and then it went flat. There's a dim light out there."

STEW WEBSTER craned around and had a look. "Could be." His attention was seized by something more important than an indefinable light on an invisible horizon. "Look, the wind!" He held up a burning cigarette. "Listen."

They all, including the helmsman, jumped to their feet and looked toward the starboard bow. A sound of rushing came closer. There was the effect of breakers. The sound intensified and the wind came in, blowing past their eardrums. The main sheet block gave a purposeful thud, life restored itself to the reefed mainsail, the yacht heeled heavily to port and gathered way.

Art shouted jubilantly: "This is it, boys, south-southwest, and all those muggs that sailed the other board are

down there stewing in their own juice."

"The course?" asked the helmsman.

"Southeast by south."

"Southeast by south has it."

Jim became aware of Natalie standing near him. She had made no move to touch him and he felt that she was withdrawn within herself. This was a pity, for he was feeling fine. On the crest.

He looked in the direction in which the faint light had been sighted and saw it again, a little brighter. "The glasses, please," he addressed the dark-wrapped company at large. Somebody handed him a pair of binoculars and he adjusted them to his eyes.

"That might be a flare," said he, troubled. "It comes and goes, but it hasn't the brightness of a flashlight. Somebody else take a look."

Stew took the glasses, gazing long and fixedly. "Getting brighter all the time," said he. "It isn't a flare. It's a fire."

Immediately there was a babble of voices, cut short by Jim Allen. "Somebody man the radio," said he. "Coast Guard frequency, or, wait a minute, look up the race instructions and see what wave length that Navy escort ship is guarding. The instructions are wedged in beside the radio cabinet."

Natalie touched his shoulder. "We haven't any transmitter, have we?"

"No, but we can listen."

A LAD from Art's watch—there were three or four in the total afterguard of ten, of whose identity Jim was not absolutely sure—detached himself and went below.

Jim, conscious of his deficiency, addressed the helmsman, glad to name a name. "Pete, make directly for the burning yacht."

"The burning yacht," repeated Dulwich. "That's east-southeast, sir."

"She's no more than three miles away," said Stew Webster. "Less than half an hour. Will you go alongside?"

Jim Allen didn't speak. He was thinking. Not for the briefest instant did he seek to evade his duty as he saw it. Assuming that the crew of the distressed yacht was still aboard—as they would be, fighting the fire—he would put the Wasp alongside to leeward, his bow close to the other's stern. There would be damage as the sea brought them together. Heavy damage, probably. Must have mattresses and pillows and lines handy, for covering or plugging up holes. There was the risk of fire communicating itself to his sails. Saturate 'em first as high as water could be tossed from a bucket. Have himself and two or three of the nameless ones of his crew standing by.

The boy came up from below. "You're right, sir, that Navy D.E. is talking to the Academy racers. One of them, the Valerie, I think it is, is nearly ten miles to leeward of the burning yacht and as she has no motor she has asked the mother ship for instructions. Another one, the Headland Light, is also to leeward, but she has already abandoned the race and turned on her motor. The D.E. —her code name appears to be 'Hexagonal'—is twenty miles, one-two-two degrees true from the fire, which she can see from aloft, having been given a bearing by the Headland Light, and she has them both on her radar. She's making flank speed in a rough sea and rapidly freshening wind and it will take her nearly an hour to get there. The Headland Light says about two hours for her."

"Thanks, Joe," said Jim, "or, that is—"

"Walter Harding, sir."

"Oh, of course, Walter," Jim said. "Keep the radio manned, and somebody go forward and rouse the cook out of his bunk. I want everybody aft, some on deck, and some below."

"Aye-aye, sir."

"And, Stew, you'll be at the helm to bring us alongside. Take over now. Pete, get a bucket and start soaking the sails. Soak 'em as high as you can reach."

Art Folsom placed himself beside Jim Allen, sitting in the cockpit, watching the burning yacht through glasses. Flames momentarily shot up the mainsail, revealing humanity clustered aft.

"It's a good thing that Navy ship is only an hour away," said Art. "Those poor devils would have it otherwise."

"We're twenty minutes away and will make the rescue," replied Jim.

"We?" Art's voice, usually so suave, sounded deeply troubled. "Why, we can't possibly do it. I've never gone alongside a boat at sea, let alone a burning one."

"That's where you're going now." Jim turned to Stew Webster. "Do you think we can do it, Stew?"

"If we get the breaks."

"I tell you," insisted Art, "we're inexperienced in this sort of thing. We'll make a botch of it, maybe drown the poor men we're—"

Jim jumped to his feet. "I tell you what, Art," said he. "You're all right, but your responsibility is getting you

"During the winter we cut our own ice right out there in the lake"

COLLIER'S CHARLES PEARSON

down. So I'll relieve you of it. Go below and help the cook pass up pillows."

Art went below.

"Boys," continued Jim, "don't give a thought to the risk. It's negligible. Think of those poor lads over there." His voice softened as he addressed his wife. "I want you down below."

"No."

"Yes. In the doghouse now." Jim turned again to the crew. "I don't want anybody forward of me and I won't go much forward of the doghouse. If anybody has to board the burning yacht I go and nobody else. Have lines ready for any who fall into the sea. See that the life rings are clear for throwing."

"And, Jim!" Stew called. "See that Pete or somebody is ready to back the jib. It's going to be done in a few seconds or else."

"Right. I'll go forward and tell him."

JIM went forward. He saw rivulets dripping from the foot of the jib and found Pete working with bucket and water on the luff of the mainsail.

"I'll spell you, Pete," said he, taking the bucket. "You know, I think we may be able to get away with it."

He dipped and threw a few bucketfuls, maintaining balance with difficulty and wondering if it wasn't wasted effort. He stopped to look at the burning yacht and was surprised to see how close she was. He secured the bucket and moved aft.

She was a small yawl, her jib and the forward part of her mainsail burned away, the rest of it smoldering on the cabin house, and her mizzen roughly furled. Flames issued from one big hole at what had been her galley hatch, just aft of the mainmast, whose afterside glowed brightly. Amidships, her port lights revealed fire in her main cabin, obscured intermittently by a pall of smoke billowing horizontally down-wind. Four men, blackened towels in their hands and held briefly before their nostrils, crowded as far aft as they could get. They were misshapen in their life jackets and they knelt or stood holding to the mizzen shrouds.

The Wasp's lean, clean bow poised like a spear upraised ten feet above the cowering shipwrecked sailors, ten yards to leeward of them. It dropped level as the short distance narrowed, ranging slowly ahead.

"How many?" shouted Jim.

"Four," came the response.

"Any cripples?"

"No. But we're right on top of the fuel tanks."

"You'll have about ten seconds."

They had even less. The Wasp's bow rose again and with the last of her momentum closed the gap. Down came the bow, not quite clearing the side of the burning yawl. There was a crunch of splintered wood as the yachts came together. The rescued sailors moved fast. One did no more than step from one boat to the other. Two leaped head first over the rescuer's wire life line. The fourth, missing his jump, jackknifed across it, his head inboard. Quick hands seized him.

The yachts clung as if they had been lashed together, the Wasp's greater weight and heavier planking beating the yawl's side to splinters. Her cabin split open and the flames leaped across the Wasp.

"Let the jib draw. My wheel's hard over." It was Stew, raising his voice for the only time in the quick maneuver. The jib quieted, stiff as a board. The Wasp fell away, forereached, and the heat of the burning yacht, brushing past them, forced her crew to crouch and cower away from it.

The distance widened. The air was cool again. Jim felt his way aft. Somebody hardened the main sheet.

"Good job, Stew. I knew you could do it. Natalie, get these lads below and put ointment on their burns. Tell Robert to make hot tea if he's still got a galley. Walter, see if we're leaking badly."

"What course, Skipper?"

Somehow, Jim didn't mind the previously odious appellation. He replied with another question. "How much time has passed?"

"Twenty-five minutes."

"Can anybody see that naval vesse We'll have to intercept her and pass th word."

"I see a searchlight trained straig up."

"Steer for that and keep between it a the hulk. Good God, there go the tank She should be visible for a few minute for quite a distance."

FOLSOM and Jim and three or fou others of the crew were sitting lazil on the yacht-club porch, glad to have th steadiness of Bermuda beneath them. Th wind softly ruffled the men's hatle heads, and the blue water of Hamilto Harbor by its very tranquillity seemed t deny any kinship with its parent body th ocean. Small boats played with win and water of the harbor, weaving a forn less yet lovely pattern among the new anchored ocean racers.

"How about another drink?" A Folsom asked.

"Sure," Jim said. "Only this one's c me."

He had been sitting there lost thought about Natalie and the discord b tween them. The next morning aft picking the men up they had transferr them to the escort vessel in a moderati wind and sea. Perhaps Natalie felt d prived of nursing the poor shipwreck sailors all the way into Bermuda. perhaps she was angry about bei ordered into the doghouse. Anyway s was unapproachable now. When he h come ashore, she had stayed behind.

Then just as Jim, looking out into t harbor, saw Natalie come to the Was starboard gangway, and the club laun run alongside, Stew Webster came u saying, "Oh, Skipper."

"What?" Jim said.

"I heard that the race committee fused to accept Headland Light's se disqualification for starting her mot They say she ran it while turned aw from her destination, and that in special circumstance like that, it does count. And she's sure of second or th place on corrected time."

"Sporting of the committee. . . . Exc me, Stew, there's something I want say to Nat." Jim walked alone down short path to the landing, oblivious the crowd of persons coming and goi and met his wife.

"Nat," he began, "there's so thing—"

"Wait," said she, breathlessly. stayed aboard to get the broadcast fr the finish line at St. David Head. And last boat is in that we had to allo handicap to—and we've won the ra They're calling you a hero, and the g ernor is going to give a reception beca one of the four boys who were save a nephew of his or the king's or—"

"Oh, my God!" interjected Jim. "N we'll take the first plane out of here let the Wasp sail herself home."

"We'll do nothing of the kind, beca heroes stay and face the music." thrust her hand through the crook of arm and swung him gaily around. "N that we're ashore I don't mind be ordered to the doghouse. It's a cute l place, and with curtains and chin could be made quite attractive."

Jim stopped her short. "I've got said he, facing her. "When I was d and out you had your independence. when I was up and strong you—" stopped, reluctant to complete thought.

She gazed up into his face, her slightly trembling. "I guess maybe was it, darling. It was silly of me."

He caught her in his arms and hu her violently. "Nat," said he, "we'll a long, roundabout cruise home, an be down and out the whole blasted t It's something I've been owing you."

She smiled happily. "It isn't. don't. Stop kissing me in public. V will people say?"

THE HOT-POTATO OLYMPICS

Continued from page 29

food tastes together. Under this plan, the garlic-eating nations would dine together, apart, for example, from the custard-eating nations. It all looked pretty simple until special requests started coming in.

It now develops that nobody on earth eats like a Turkish wrestler, and so the Turks will be alone. The Spanish turned out to be calorie-crazy. The Indian team needs plenty of dal, an Indian vegetable, and special seeds for rice dishes. Ceylon, Burma, Afghanistan and Pakistan want *channa*, mung, *mussoor*, and *bamis*, and they will get them too, if the Olympic committee ever figures out what they are. The Chinese won't even get out of bed if they can't have bamboo shoots, bean sprouts, sharks' fins, birds' nests and tangerine skins.

Housing is easier, and the only special request has come from the Finns, who will want a *sauna* or steam bath. However, there will be no elaborate Olympic Village such as the Germans had in 1936. The athletes will be housed in semi-austerity in schoolhouses, army camps, Royal Air Force camps and other units which will scarcely compare in luxury to Claridge's Hotel or the Ritz.

A Rugged Job for London Busses

Transportation for the athletes has been arranged on a complicated timetable. At the height of the games, 192 London busses will be requisitioned to haul athletes from arena to arena. In addition every competitor will travel free on regular London transport facilities within fifteen miles of Charing Cross.

Countless ministries and government officials have their hands in the festival pie.

The Ministry of Food, for example, must be consulted on the importation of hay for Olympic horses, not to mention food for the athletes. Permission to import the horses must come from the Ministry of Agriculture. Scotland Yard, because of the Dangerous Drugs Act, has to okay what sort of liniment team doctors can bring. The Customs and Excise Department recently informed a Swiss watch company which wanted to lend the Olympic committee $40,000 worth of chronometers, gratis, that its generosity would cost it a cool $52,000 in import duties, notwithstanding the fact that the watches would be returned to Switzerland after the games.

In view of these and similar difficulties, one or two British Olympic Committee officials have said privately that they pulled a monumental boner in offering to hold the games. One clique actually proposed abandoning them even at the expense of British prestige. But prestig triumphed and history is now obligate to record the approaching effort as th Hot-Potato Olympics.

Unofficially, the games are already b ing referred to as the G.N.M.U. (Grar National Mess-Up). Part of it can l ascribed to the bickering and backbiti that Olympic games always produ under the label of international spo

It is to be hoped that Britain, as ho will not humiliate itself as it did in t recent Winter Olympics when it d patched its teams to Saint-Moritz on impossible shoestring. At Saint-Mori the British hockey team had no coa and no trainer, although it eventua borrowed a doctor from the Canadi team. It was the only team withc special uniforms. The players did r have enough money to enable them mingle socially with players from otl countries. Conditions finally got so b that a British newspaperman reported tl Colonel Evan Hunter, leader of the B ish delegation, was hiding in his hc room to avoid further embarrassment

Last winter, also in Saint-Moritz, captain of the Rumanian winter spc team said the judges were incompet and that United States financial cir influenced the results, thereby mak everything perfect for a good start summer. Several weeks ago, South Af made its contribution by denying its l weight lifter a place on the team beca he is colored. He will compete for E ain instead.

Then there is the question of "bro time," or whether athletes should paid for time away from their reg jobs. An ardent crusader for the pu sort of amateurism, Mr. Avery Brund chairman of the American Olyn Committee, naturally has strong feel about broken time, which smacks of fessionalism. The issue remains ur tled. But it is unlikely that any win athletes will be rewarded with bag gold such as Mussolini presented Ita winners in 1936.

Still, there will be competitors in l don this summer who could ha class as the sort of amateur the Inte tional Olympic Committee describe "one whose connection with sport is always has been solely for pleasure for the physical, mental or social ber he derives therefrom. . . ."

Someday, perhaps, there will b Olympic games in which the compet will be simply the best athletes ir world, amateur or professional. ever comes to pass, that sucking you hear will be the Olympic commi heads coming up out of the sand.

COLLIER'S "Remember, Henry—'Charity begins at home'" BILL

THE BRAMBLE BUSH

Continued from page 26

od to them alive, but they couldn't
rder me in front of people. They had
get me alone first and make the death
k like suicide or accident. And there
s an additional reason now why she'd
p me. The real Philip Tremaine was
l somewhere in the vicinity of San
ancisco, and if the police took me, I'd
l. Somehow I had to let Reba Tre-
ine know I had that information.
ckersham knocked on the door again.
A hesitant voice sounded from beyond
door. "Yes? Who is it?"
Wickersham opened the door a few
hes. "John Wickersham," he said. "I
ve Philip here. He wants to see you
w."
"Philip," she said wonderingly.
hilip? What Philip?"
Wickersham stiffened perceptibly and
ook of genuine concern crossed his
e. "Your son, of course. Are you
ite all right, Mrs. Tremaine?"
"My son?" A note of caution entered
voice. I moved up toward the door
Wickersham barred the way, holding
by an arm while he peered in.
"You must remember, Mrs. Tremaine.
has been here all the time. I hope his
dden appearance hasn't given you a—
hock of some kind."
"Oh," she said quietly. "But I urged
u to let him go." She sounded hurt.
ou're my lawyer."
"I'm sorry," he said patiently. "I can't
that. I must turn him over to the
thorities. Thereafter I'll be of what
vice I can to you. If you don't want
see him, I'll call the police now."
"No," she said quickly. "No. Let me
k to him. May I see him alone?"
"I can't permit that either," he said.
assure you I'll overhear nothing.
ou'll have to bear my company
ough." He pushed the door open wider
d pulled me forward so I could enter
front of him. I walked on in. It
sn't going to matter much what was
d; but I was a little curious as to what
r reaction would be.

HE was propped up against a stack of
pillows with a bedspread up to her
ist. She lifted a hand and gestured to
e chair beside her bed. Not a muscle
rred on her face. Her expression was
with melancholy and infinite moth-
ly patience.
It wasn't until I was quite close to her
at I saw she was trembling all over.
e effort of keeping the visible parts
her body composed was too great a
ain on the parts that were concealed.
"Why did you come?" she whispered.
Why did you come?" It wasn't a ques-
n; it was an accusation. I had dis-
eased her by coming, and I had no right
displease her.
"Because I needed your help," I said.
needed it badly." Two tears squirmed
m between her closed eyelids.
"How is it possible, Philip, for me to
lp you?" She sighed deeply. "You were
ee, Philip. You should have gone."
e had a plan too. She'd decided to
t her losses and give up. It was only
o evident in what she said. She was
ing to carry the pretense of thinking
e her son all the way through. When
e police took me, she'd swear she'd
en deceived. She'd be aghast; she'd
obably faint. That was easier than
ying to help me escape. The fortune
uld wait until the Tremaines found an-
her victim. That was her plan and I
d to jar it.
"A son has certain rights," I said.
Rights to do a great many things where
s mother is concerned."
"Yes, almost anything."
"Even to kill," I whispered.
"No."
"But it was tried. It was tried on me."

Her eyes suddenly opened and flamed at me.

"It was tried by somebody's son. If not by your son, by whose?"

She became chalky. The eyes stayed open, staring at me with pupils so wide they were like black pits.

"What's this?" she said, trying to lift herself from the pillows. "You're saying someone tried to kill you?"

"Exactly. A man I thought was in Mexico. He thinks me dead right now. He doesn't know I recognized him. But I did. And if the police take me, they'll take him too. It's some consolation to know that he might die, isn't it?"

The eyes were black with hatred and anguish. She threw back the bedspread and started to rise to her feet. I remembered her saying when I first met her that a mother would do anything for her son. Now she was ready to do it. She could have seen me die with pleasure, but a threat to Philip Tremaine was more than she could stand. Far more. She stood beside the bed, clutching her throat, swaying, making inarticulate sounds. Then her knees buckled and she dropped to the bed, slid from its edge and rolled full length upon the floor.

AT THE doorway Wickersham suddenly came to life. "Good God!" he gasped and dropped to a knee beside her. He seized her wrist, shook her chin, placed a hand over her breast.

But when I stood up, Wickersham stood up too. He hadn't forgotten me. I looked at Reba Tremaine and realized my plan was no good. I'd overplayed it. She'd been strong enough for everything else, but her attachment to her son was too great. The threat to him had broken her, and now she was no good to me.

"Who's her doctor?" said Wickersham.

"How would I know?"

He dragged me out through the dining room to the hallway where there was a telephone. He pushed me into a chair a few feet from the door where he could watch me. "Don't move. Just remember that every door in this place is locked including the back one you entered by. It's got a new screw in it."

He flipped open the phone book and looked at the emergency numbers written down in the front of it, then dialed. He gave his information concisely. "It looks like shock or heart failure. All I can say is hurry." He gave the address and hung up, stepping back in front of me again. "We'll go stay with her."

I shrugged and preceded him into the bedroom again. Mrs. Tremaine still lay on the floor, but she was obviously alive. I could hear her breathing; it was even and apparently effortless.

"I believe she'll be all right," said Wickersham.

"I hope so." I meant it. This would have been too easy a way for her to get out of the thing. After the next shock, she could die if she wanted to.

The shades were drawn on the bedroom windows. If I remembered right, there were ivy vines just outside and a lawn about six feet beneath. I might try diving through the glass, but after that I was cornered again. There was no place to run to even if I could run.

"Don't think of it," Wickersham said. "You'd just cut your throat on the glass. I'm pretty fast myself." . . .

About ten minutes after Wickersham's phone call, a car pulled up in front. Wickersham ordered me into the living room, from where we could see a man with a doctor's satchel coming up the walk.

"Sit on the sofa," he said. I sat on the sofa. There were two cars now. One in the garage and one out front. Wicker-

AMERICA'S SMART SET

A fine car made even finer

PONTIAC

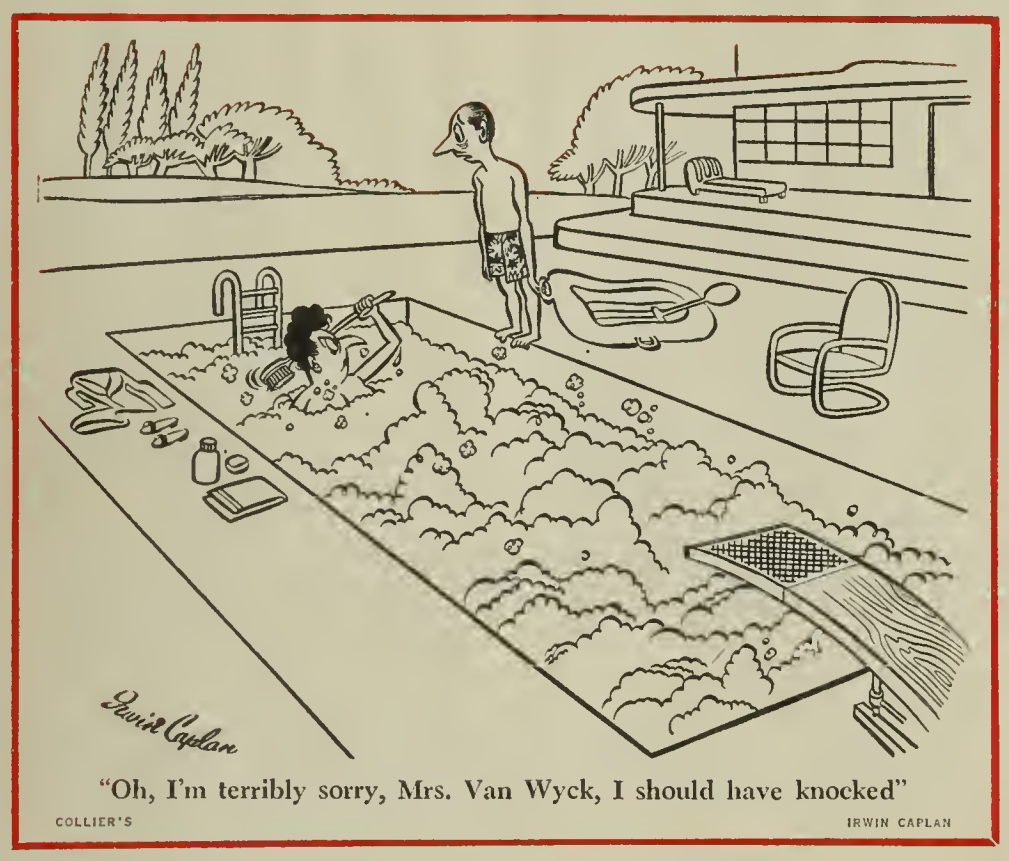
Good Last Year . . . Better Today!

Owners of the 1947 Pontiac will find it difficult to believe that the 1948 Pontiac is a much finer car. But it is! Everything for which Pontiac has so long been famous is now more pronounced than ever.

The 1948 Pontiac is far more beautiful, from radiator to rear bumper. It is more luxurious—with rich new interiors. And it now offers, as optional* equipment on all models, the famous General Motors Hydra-Matic Drive—that engineering masterpiece which shifts gears automatically, and completely eliminates the clutch pedal. You just relax and *drive!*

When we say that Pontiac is more beautiful—more inviting to ride in—and easier and safer to drive—we think we have given you some of the most important automotive news of the year. For it means that something already *wonderful* has been *improved* upon.

Models Illustrated: Deluxe Streamliners—4-Door Sedan and Sedan Coupe.
**GM Hydra-Matic Drive and white sidewall tires optional on all models at additional cost.*



PONTIAC MOTOR DIVISION of GENERAL MOTORS CORPORATION

am took a key from his pocket and un-
cked the door for the doctor, then
cked it again and put the key away.
e motioned to the bedroom.
"She's in there. If we can help any,
y so."
The doctor grunted and passed out of
ght into the bedroom.
We waited about fifteen minutes.
uring that time Wickersham's car sat
t in the garage and the doctor's out
ont. The doctor may have left the key
his. But the house door was locked
d the key to that was in Wickersham's
cket. He sat at the opposite end of
e sofa. There was a vase on the coffee
ble, a narrow-necked thing with a
own glaze. Wickersham got to his feet,
cked it up and examined it.
"Sung period," he said. "About the
ar one thousand. You wouldn't want
break it." He put it on another table
ross the room and returned to the sofa.
ere was nothing to do except wait. A
tile effort was worse than none.
The doctor finally came out of the bed-
om with his satchel. He set it down
d pulled out his notebook.
"How is she?" asked Wickersham.
"She'll be all right. Looks like a case
shock coupled with physical fatigue.
e got her in bed. Best thing for her
do is rest. What caused it?"
"She's been under quite a strain
ely," said Wickersham.
"Of course," said the doctor. "This
rible thing about her son. Someone
uld stay with her."
"There's her daughter Catherine."
"Then it might be best to have the
ughter stay with her a few days. No
eat danger, but she needs someone to
ep her in bed. The woman has been
iving herself for years. A very deter-
ned woman."
"I was afraid it was her heart," said
ickersham.
"Her heart's always been sound. Did
e get some sudden bad news?"
"You might call it that."
"Yes. Well, that could do it." He
re a page from his notebook and
nded it to Wickersham. "Have her
ughter get this filled. The dosage is
itten down. That's all, then. I'll drop
ound Monday for another check."
e shoved his pencil into his pocket,
cked up his case and left. During the
hole time he was in the room I don't
ink he glanced at me once.

WICKERSHAM was right behind
him at the door, closing it and
rning the key. He looked at me a mo-
ent. "I'll call your sister," he said.
Then I'll call the police. In some ways
s too bad your mother is going to live
see the rest of this."
He went to the phone again, got a long-
stance operator and put in a call to San
ancisco. I waited. Was Catherine
ing to be home or was she still some-
ace with her brother? By now, surely,
ey must know their attempt had been
failure. That thought was more con-
ling. Catherine would run out of acts
meday if I kept seeing her often
ough, and then I'd find out what she
s really like.
"Miss Tremaine there?" Wickersham
ked. Then he frowned. "Why at the
A.'s office?" After that he didn't say
ything except yes and no a few times.
hen he hung up, his face was set. He
ve the operator another San Francisco
mber, watching me curiously from the
llway. He knows, I thought. I was
mehow disappointed that he should
d out in such an offhand way. He got
s second party with no trouble and
arted firing questions. They meant
thing to me.
"What time did it happen?" Pause.
What does she say?" Long pause. "What
n?" Another long pause. "Any ideas?"
e listened for a long time after that one.
hen very deliberately he said, "No,
hilip Tremaine had nothing to do with
it. I know that because he's been with me the last three hours. He was with me when this other thing happened. He's with me now. If you want him for questioning about it before you serve him his warrant, send the police out. I'll come along and see what I can do." He hung up and returned to the living room. After several seconds, he spoke.
"You say you didn't murder Earl Clark?"
"That's right," I said.
"Who did?"
I almost told him. Then I thought of all the years ahead when I wasn't going to have much fun and decided to wait for a bigger audience. He didn't seem to know yet after all. He looked at me some more and pulled out a cigarette.
"Queer thing has happened," he said. "As you know, the gun used on Clark was never found. It was assumed you'd taken it with you when you fled. The police recovered the bullet, but no gun. Now the gun has turned up."

He shook his head. "No, but he has a record. He can't get far. I can't figure it out, though. No connection. I never heard of this man. You say you know something of Tuttle. Maybe you know something of the man who killed him."
I licked my lips. "Who was it?"
"Some fellow named Finney," he said. "Mike Finney. Except for your sister's, his are the only fingerprints on that gun. Ever hear of him?"
"Yes," I said. "Give me a cigarette, will you?"

OUTSIDE the house, the sun was still shining. A breeze was running through the maple trees tumbling the yellow leaves onto the lawns and sidewalks. I'd forgotten it was getting on toward autumn. In Mexico the seasons hadn't been so noticeable. Even in California most things stay green, but not the maple leaves. Wherever there are maples, the leaves turn yellow in the fall and make golden drifts, shifting and spinning with

"Oh, I'm terribly sorry, Mrs. Van Wyck, I should have knocked"
COLLIER'S IRWIN CAPLAN

"It has?" I wasn't too interested. The guy who used it in the first place wasn't too far off.
"Yes," he drawled. "Not only that, but it's been used again."
"Who did I shoot with it this time?"
"No one," he said. "You couldn't have. It happened in San Francisco at 8:30 this morning while you were passed out on the bed in there. They've identified the gun all right. Your sister picked it up from the floor of the Tremaine garage right after it was fired. It's strange that someone else should have that gun. A man was killed with it. It was used to shoot a fellow I never heard of—a man named Rex Tuttle. Name mean anything to you?"
"Yes," I said.
"Uh-huh," he drawled. "Your sister picked the gun up. That would explain how her fingerprints got on it. There are others. The guy apparently tried to hold it in a handkerchief but his thumb slipped and made a beauty. It isn't yours. That's been checked."
"Should it have been mine?"
"I don't mean it that way," he said, and it was the first time his voice sounded as though he were addressing a human being. "All I mean is that they can't possibly hook this killing on you. I couldn't help overhear you say something to your mother about another man."
"Let's finish your story first."
"I don't get it," he said. "The police have worked pretty fast. This thumbprint has been identified. His name was in Tuttle's notebook."
"They've got the man?"

the wind. I watched them dance away down the sidewalk, glittering in the sunlight. They would be running like that in Montana, waiting for the first snow to bury them. They were laughing, spinning, running to their death, and they'd lured me on this far.
"You'd better tell me all you know," Wickersham was saying. "We can't talk much after the police get here."
This was something new and deadly. My fingerprints were on a gun which had killed someone. I remembered the gun all right. And my name was known. I'd been flushed like a hare, and the hounds were in full bay.
"I don't see why I should talk," I said. His muscles weren't stiff, I was thinking; and he was watching me all the time he talked.
"It may help your sister," he said. "The story I got over the phone was that she heard a shot from the garage of the house in San Francisco. She got there just in time to catch a glimpse of a running figure and saw the gun on the floor beside the body. The police were right there. They didn't see anyone running, but they heard the shot and got the gun. If your information helps capture this Finney, it might even help you too."
"It won't help me a bit," I said. "And anyhow, the police won't need my help. They'll capture him without it."
"You seem sure of that."
"I'm sure. Finney is going to be easy to find."
"What about Tuttle? Who was he? You said you knew him."
"A business relationship." I pulled Plumpy's card from my pocket and tossed it onto the coffee table. "That's him." Wickersham picked up the card and examined it.
"I see," he said. "A detective. The Blackstone Research Company. I know them. A fairly reliable outfit. They'll have a file on whatever case he was following."
"They probably will," I said.
"Tuttle had Finney's name down in his notebook. That's why the fingerprint identification was so quick."
"Listen," I said. "Who untied you from that chair I left you in last night?"
He looked at me in surprise. "Catherine. Didn't you know that? About six thirty this morning. I left her there and drove here."
"About six thirty." That made it about right. She'd gone directly home after the car wreck, dropping her brother somewhere along the way. She'd freed Wickersham and stayed behind in the house. Then Plumpy had come to blackmail her, and she'd shot him.
"She made no bones about it. She said she'd helped you escape. From a personal viewpoint, I can't blame her."
"She told you that?"
"Certainly," he said sharply. "And I believe it. Maybe you think you forced her to help you, Tremaine, but the plain fact is that she wants you out of here. So does your mother."
"How did she say she helped me?"
"About the only way she could. She got the car past the police, drove you a safe distance and left you with the car. She had to walk home."
"That's what she says, is it?"
"Well, isn't it the truth? I heard the car leave myself. I was conscious by that time. You wouldn't have gone far except for that damned gag."
"I haven't gone far anyway."
"What did you do with the car after you left Catherine?"
"I left it parked on Eleventh just off Mission."
"Then what?"
"Then someone tried to kill me."
"That's the truth?"
"Certainly."
"The man you mentioned to your mother?"
"That's the one."
"Could it be the man we're after?"
"It's the man you're after, all right."
"Then let's hear about him. What do you know about this Mike Finney?"
"You're not acting as my attorney."
"But I may act as Catherine's attorney if she gets into any trouble."
"You think she might?"
"Are you blind?" he said. "The police found her standing by the body with the gun in her hands. We have only her word that she saw someone running after she heard the shot."
"You've got Finney's fingerprints on the gun."

THAT part was wonderful. If Catherine still believed that the man who had made those fingerprints had been dead for hours before Plumpy was shot she must be really scared now.
"But we haven't got Finney. Suppose he could explain in some way that the gun had been in his possession in the recent past but was not in his possession at the time the shot was fired? That leaves your sister in a bad spot."
"It does, doesn't it?"
"You're damned callous about this, Tremaine. I should think where your own sister is concerned, you'd show some anxiety."
"Why doesn't she admit shooting him?" I said. "She can always claim self-defense."
"Because I believe her story."
"Okay. And the F.B.I. will tell you Finney's."
"So he's got a federal record, eh?"
"So I've heard."
"What else have you heard? Better let

me have it before everything you say starts to become evidence."

"Very little. The authorities haven't been keeping me posted the last few years."

"Don't get sarcastic. You're hardly in a position to enjoy irony."

"On the contrary, I've never been in a better position to enjoy irony. There's nothing else to enjoy right now."

"You don't seem to understand what's going to happen to you. From here you're going to the district attorney's office. Niles is his name. He's the man who'll prosecute you when you go on trial for the murder of Earl Clark. But right now he's interested in this Tuttle affair. Let me make this clear to you. In this country every man has certain rights, even when he's a murderer. Before the law you're innocent until you're proved guilty. You've never been indicted. So when you face Niles today, it will be as a private citizen still in possession of his civil rights. It will be your last chance, because as soon as he's through hearing your testimony regarding Tuttle, you go to jail and face questioning for the murder of Earl Clark. Whatever help you give Niles on this Tuttle thing will be remembered by him afterward. You might get life instead of the gas chamber."

"Some choice!"

"YOU couldn't be in a worse spot than you're in now. Too many people saw you walk into Clark's office and heard you shoot him. So if you're connected with Finney, it won't hurt anything to tell about it. It will help Catherine and make things hot for Finney."

"It will make things hot for Finney," I agreed.

"So let's hear it. What does this Finney look like?"

"Many people think he looks a lot like me."

"Can't you describe him better than that?"

"I'd call that a damned good description. Would it help any if I said he had blondish hair, was about five ten and had the right number of arms and legs?"

"All right," he growled. "What are you grinning about?"

"My face hurts."

"So he looks something like you. Where'd you meet him?"

"I've known him so long I hardly remember."

"You knew him before you murdered Clark?"

"According to your recent lecture, a man's innocent until he's proved guilty. I haven't been convicted yet."

"You will be."

"Then wait until I am before you tell me I murdered Clark."

He took a quick turn about the room. "All right. I apologize. Did you know Finney before Clark was murdered?"

"A long time before then."

"In Europe then? Was Finney in Europe?"

"Finney was in Europe."

"And that's where you met him?"

"Finney was there."

"Uh-huh. Have any trouble with him in Europe?"

"Considerable."

"Finney the kind of man who would carry a grudge?"

"Under some circumstances, I think he would."

"Yes," he breathed softly. "Now I'm beginning to see this thing. You say someone tried to kill you last night?"

"That seemed to be the idea."

"Any witnesses?"

"Possibly."

"Who?"

"Tuttle."

"And now he's dead. Yes, Niles will certainly want to know about that. Now, let's hear about Tuttle. What's his connection?"

The irony was wearing thin. The last pleasure I would have would be to see Wickersham's face when he turned me in and an F.B.I. man stepped up and claimed me as Mike Finney. He'd probably blush like hell. He'd have to go ahead and clear me of any connection with the death of Tuttle, which would leave Catherine holding the gun. The prospect of that somehow wasn't as enjoyable as it should have been.

JUST then the bedroom door opened, and Mrs. Tremaine appeared in the entrance. She walked toward us, slowly, supporting herself on the backs of the dining-room chairs as she passed them. At the threshold of the living room Wickersham gave her his arm until he had her seated.

"You shouldn't be up," he said. "The doctor—"

"Damn the doctor," she said tersely. Her mouth was a straight line as she looked at him. "I want my son to go." He shook his head.

"I'm sorry. It's not within my power."

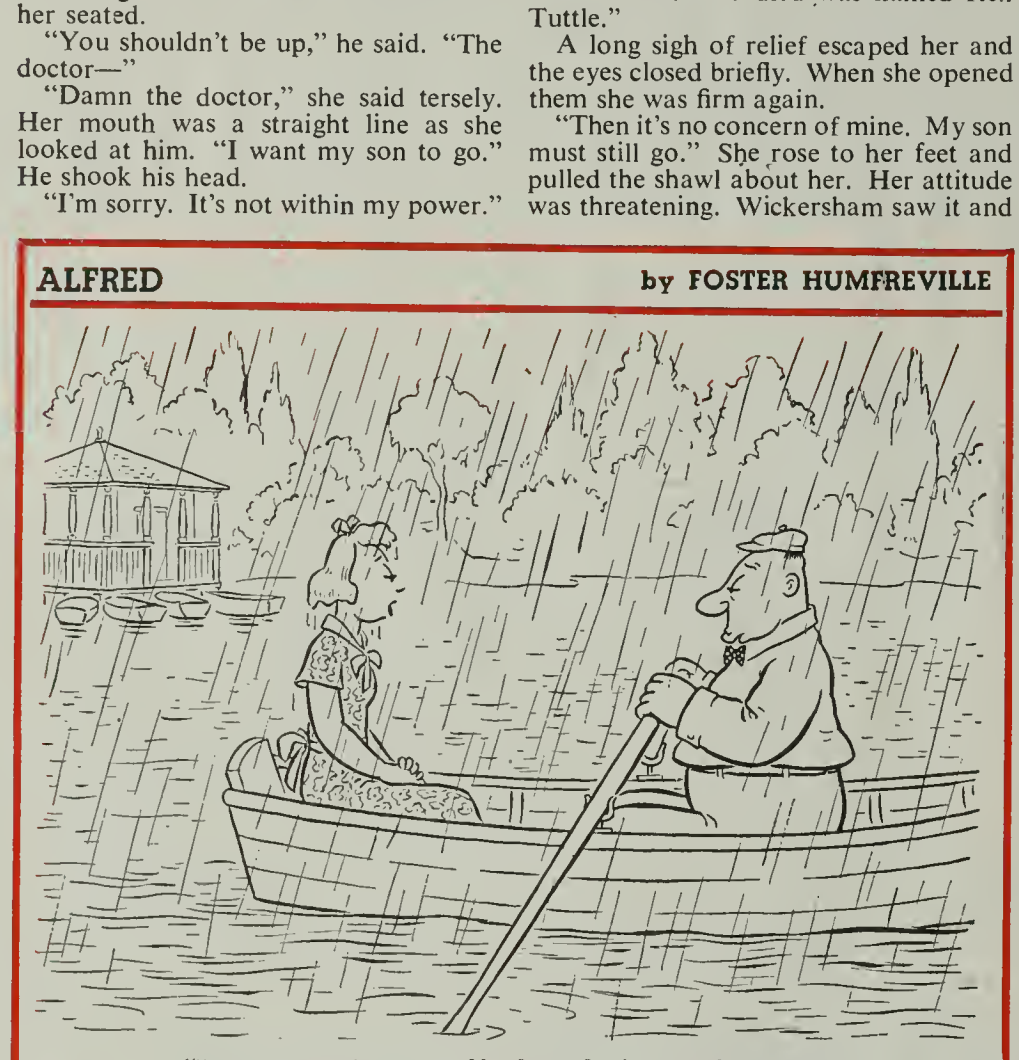
Her body grew taut. "Go ahead," she said grimly.

"A man was killed this morning, shot in the garage of your house in San Francisco. Catherine found the body."

Mrs. Tremaine held herself upright by a sheer effort of will.

"A man? What man?" The pupils were beginning to enlarge again. I had to stop it if I wanted her help.

"It wasn't your son," I said.



"No," said Wickersham, misunderstanding me. "Philip was right here at the time of the killing, so he had nothing to do with it."

"Then who was it? Doesn't anyone know the man?"

"The man who died was named Rex Tuttle."

A long sigh of relief escaped her and the eyes closed briefly. When she opened them she was firm again.

"Then it's no concern of mine. My son must still go." She rose to her feet and pulled the shawl about her. Her attitude was threatening. Wickersham saw it and

"I want to go in now, Alfred. I don't care if we have still got twenty minutes coming to us on the boat"

"You're my lawyer," she said. "You'll do as I ask you."

"In any matter where I'm legally your attorney—yes. I know this is extremely hard for you, but you simply must—"

"You don't need to make a speech about it," she cut in. "You can always make it appear that he escaped. You're not responsible for his capture." Her hands gripped the arms of her chair. "You can say you tried to hold him and failed. Who's to say differently?"

He simply shook his head for reply, but he moved closer to me, afraid I might choose this time to make a break. He was right. My earlier plan was beginning to work. Reba Tremaine wanted me to escape in order to save Philip.

"You can give him your car keys," she continued. "I'll be ready to swear he took them from you by force. I'll reimburse you for everything."

He still shook his head. "Your son would only be captured again and face a still heavier penalty. You must realize that in the long run it's best to face it. Now Philip is in a position to render valuable aid to the district attorney which may result in a request for clemency where he himself is concerned. It may cut his sentence down considerably."

"What aid can he give?" she asked contemptuously.

"You haven't heard yet," said Wickersham. "After your last shock I hesitate to expose you to another. There has been another death."

stepped back, keeping closer to me. It was the first time he'd looked worried. With me he could get rough, but he was the kind of man who is never anything but gentle with a woman. I shifted my feet. He shot a finger out at me.

"Don't move!"

I moved all the same but it wasn't the movement he expected. I fell flat on the sofa. Wickersham was looking at me and didn't see the thing at all. What he failed to see was that Mrs. Tremaine had brought her hand from beneath her shawl and that the hand held a revolver, a small one of the under-the-pillow variety. It exploded like a giant firecracker and a bullet ripped a hole in the back of the sofa right where my head had been a second before.

Wickersham whirled and was on her like a cat. Even so he was gentle—amazingly gentle. He simply seized her arm and took the gun away from her. She didn't even have time to fire twice. Or perhaps she didn't care to fire again with him looking at her. He kept the gun in his own hand, and I gave up all idea of escape.

"There, there," said Wickersham soothingly to Mrs. Tremaine. "You're completely overwrought. I understand exactly how you feel, but it would have done no good at all had you shot me."

Mrs. Tremaine didn't pass out this time. She simply dropped into her chair and started weeping bitter tears of rage and frustration. Wickersham patted her shoulder. To an outsider the scen would have been touching. To me it wa little short of incredible. That woma had tried to murder me right in front o a witness, and had she succeeded, she' have gotten away with it. It would hav looked like a pure accident becaus Wickersham was completely convince that he was the one she was aiming at He was so convinced that he was forgiv ing her for trying.

"I'm going to forget it," he said. "We'l pretend it never happened at all. Per haps in your place I'd have done the sam thing." He continued to pat her shoul der while she wept on unconsoled. " know how you feel," he said.

But it was I who knew exactly how sh felt. It was the third try the Tremaine had made, and they'd missed again. He tears and sobs raged on. Wickersha held the gun, and I stayed on the sof We were still that way a minute late when a siren sounded and a police ca drew to a stop out front. The big rid was on. . . .

In the police car I closed my eyes an tried to think. There was plenty of tim between Palo Alto and San Francisco. sat in the back seat with Wickersham be tween me and Mrs. Tremaine. She'd ir sisted on coming despite Wickersham advice that she stay home. She must sti be hoping that something would happe during these last few moments befor the revelation started. None of us sai a word.

Actually there wasn't much to thin about. In spite of the fingerprints I' left on the gun which killed Tuttle, the couldn't possibly pin the killing on m because I'd been with Wickersham whe it happened. That left Catherine as th person who must have fired the shot, bu aside from that the future looked dar I was still Mike Finney, still an impo tor, still a kidnaper, still the guy who broken jail and slugged a surgeon. I end up with a stiff sentence. Even so, was better than being a murderer. Th big mess was closing in, and my mir was a tangle of cobwebs.

Every time I closed my eyes I saw o particular strand of cobweb. It was thin silvery thread wavering in the dar ness. I couldn't blink it away. Each tin my eyes shut, it was there again, a fin triviality to keep me from thinki straight. I kept trying to forget ho sweet it would be to watch the Tremain roast in their own fire. Revenge is beautiful thing, but it's a harlot. wouldn't die happy just because I kne the Tremaines were taken care of. Th weren't that much to me. Freedom w what mattered. I had to present my ca in the most favorable light in an e deavor to reduce the sentence. Freedo ten years from now was better than freedom at all. Or was it? That's why kept seeing the spider web, that silve thread of hope. It dangled in front my eyes with darkness all about it.

THE car stopped; we went into a bui ing. All I knew about it was that wasn't the jail. A cop was on either si of me. Wickersham and Reba Tremai were behind. We all got in an elevat and shot up five floors, got out a marched down a hallway to an offi No one said a word. On the door of t office was printed *Office of the Distr Attorney—Grover Niles.* We w through a waiting room, down a sh corridor and into something that m have been ordinarily used as a conf ence room.

When we entered the room, somec screamed. It was Catherine Tremai She was at the far end of the long tab rising to her feet as we entered, her f like a twist of putty. She leaned on table for support, staring at me.

"I'm sorry, Catherine," I heard Wi ersham say. "I found your brother a I had to keep him. I couldn't do a thing else."

She swayed but she didn't fall. Her
yes searched my face, then flickered
iefly as she looked at Wickersham and
r mother. Her mother was at my el-
ow glaring back at her. Catherine stayed
ent. She sank back into her chair.
"I'm sorry if you didn't understand we
ere bringing him here," a gray-haired
an said. That would be Grover Niles,
decided. At the same time I realized a
t of other things. Catherine had ex-
cted her real brother, not me. That's
hy she'd screamed. I was supposed to
dead. But she'd made her recovery,
d now the game was going to played
t to the grand crash. Neither she nor
r mother dared say I wasn't Philip Tre-
aine. To admit that would be to admit
erything. They had to carry on their
t so that when my identity was finally
vealed, they could be amazed and
ocked and enraged by my deceit.
Others besides Catherine and Niles
ere at the table. There were two steno-
pe operators, a small dark man, and
o men in plain clothes. Niles looked
us and waved to vacant chairs oppo-
e him across the table.
"Sit down," he ordered. He looked
om me to Wickersham. "Well, John,
is is decent of you. Any requests?"
"Yes," said Wickersham. "I'm sitting
."
Niles nodded. "Whom are you repre-
nting?"
"This hearing is concerned strictly

ith Tuttle, I presume?" Wickersham
as cooler than ever. His drawl had
ngthened.
"Tuttle—yes."
"Just Tuttle. It may not be necessary
r anyone to be represented." He
oked at Catherine. She nodded, her
es dark and pleading, her teeth biting
to the scarlet lip. "If it is, I'm repre-
nting the Tremaines' interests. But just
here Tuttle is concerned. Mr. Tremaine
s certain information."
Niles glanced at me coldly. "You'll do
ll to tell what you know. Any assist-
ce you give will be remembered." He
turned his attention to Wickersham.
may as well tell you I've already taken
iss Tremaine's deposition. We're quite
rtain of the man we want, so what I'm
ter is information which may lead to
capture and conviction."
"Any objection to reading that depo-
ion?"
"I intend to." He spread a document out
the table in front of him. "Omitting
e preliminary questions, here's what
iss Tremaine says. I quote: 'At about
30 this morning I was in the house
one when I heard a shot. It seemed to
me from the garage. I had just come
to the kitchen from the dining room.
door leads into the garage from the
tchen so I opened it and saw a man
ing on the garage floor. Question: Was
e garage empty? That is, was there a
r? Answer: There was no car. I saw
is man lying there, and at the same time
ought I caught a glimpse of someone
nning across the back lawn. The drive-
ay has a hedge along it and I saw him
r just an instant. Question: Can you
scribe him? Answer: No. I saw him
r just an instant. He was dark. That
his clothing was dark. Question: And
en what did you do? Answer: I saw a
n lying by the body. It was on a rum-
d handkerchief as if the handkerchief
d been wrapped around it. I picked the
n up. Question: Did you have any rea-
n for picking the gun up? Answer:
s, I was frightened. I thought I might
ve to protect myself. Then the police
me because they were right outside the
house when the shot was fired. Question: Did you recognize the man on the floor? Answer: No.'"

Niles stopped. "Those are the principal facts as we have them at present."

"One thing," said Wickersham, "did the police who were outside the house see anyone?"

"No," said Niles sourly. "They'd just reported for duty and were in front of the house when they heard the shot. They saw no one enter or leave."

"Not even Tuttle?"

"Not even Tuttle."

"I just want to make the point," said Wickersham, "that if Tuttle could enter the house unseen, so could his assailant."

"I see," said Niles. "You're afraid someone will doubt that Miss Tremaine saw another man. Well, you don't need to worry about that because we've pretty well proved the other man's presence. His name is Finney. We got the name from Tuttle's notebook. Here, I'll read you that, too." He found a black note pad among his papers and opened it. "Just a short entry made yesterday. It says, *'Some connection between Tremaine and Mike Finney. Finney wanted for questioning by F.B.I. Finney at large in San Francisco. Am checking.'*" He closed the notebook. "We got in touch with the F.B.I. immediately. That's what Mr. Ferratti is doing here." He nodded toward the little dark man.

The little dark man, ever since I'd entered the room, had been scowling first at me and then at a stack of documents in his hand. I was in the presence of the F.B.I. at last, and Mr. Ferratti would undoubtedly be the man who'd lead me away. He was already beginning to look as though he wanted to pounce on me. Niles was still talking.

"So to get back to the matter of whether or not Tuttle was alone, we know he wasn't. First there's Finney's thumbprint on the gun which killed him. Apparently the handkerchief slipped. Second, there's Tuttle's car. It was located about a block from the Tremaine house and gone over thoroughly. Finney's fingerprints are there too—on the right door handle. I'd say Finney was the last man to use that door. It looks as though Finney and Tuttle drove to the Tremaine house together, entered the garage together and then had an argument. The motive is entirely lacking. That's where we hoped Mr. Tremaine might help, since you say he knows Mike Finney." Niles looked right at me. "Do you?"

NOW was the time to say quite calmly that I was Mike Finney myself. Then the whole thing would be over as far as I was concerned. Mr. Ferratti would come around the table and take possession of me. I'd leave the room a captive, charged with my own errors and escapades but free of any suspicion of murder. It wasn't easy hearing Mike Finney called a murderer. I've killed men, yes, as thousands of others have done. I've looked along the barrel of a rifle at a man projected in space far beyond. I've pulled the trigger and watched him fall. The first time it happens, something drains out of you that nothing can ever replace, but that's a phase of war; it isn't murder. Murder is a deeper disgrace, one I'd never known. I glanced down the table toward Catherine.

Her appearance wasn't what you'd expect of a murderer who knew she was about to be discovered. She was something the same as the night we'd met at the bus station, pale with large frightened eyes. The eyes had tears in them now. She was looking at me as though I had betrayed her in some way and broken her heart in the process.

"Well," said Niles. "Do you know him or not?"

"Yes," I said. "I know Mike Finney."

At that moment a girl, Niles' secretary

A B C NETWORK

suppose, came in and laid a typed sheet f paper in front of him. He studied it oroughly, his fingers setting up a drum- at on the table top. He finally glanced , looking at Wickersham warily, then Catherine.

"Well," he said at last, "this is some- ing new. Apparently we haven't been possession of the full facts. I'm mpted to disband this group and talk everyone singly."

"Go easy on that, Grover," said Wick- sham. "From now on when you're lking to the Tremaines, you're talking me, too."

"All right," said Niles. "Perhaps it ould be better to continue as we are." e glanced at the sheet of paper again. This is very interesting. In Miss Tre- aine's deposition she noted that the car as not in the garage when she found uttle's body. Where was the car? We ow that Miss Tremaine left the house about three o'clock this morning. She ld the police she was driving to her other's house in Palo Alto. That's all en cleared. But she never got to Palo lto. She came back to the house again t without the car. I haven't gone into is before because it didn't seem to have bearing on the Tuttle case. But now it s a definite bearing, because it places ike Finney again. The car was found rly this morning between South San rancisco and Burlingame up in the lls, wrecked and partly burned. The ghway patrol got there in time to put t the fire and save valuable evidence."

"All right," cut in Wickersham. "You e obviously trying to kill two birds, rover, so just let me tell it. I know as uch about it as Miss Tremaine does. I as at the Tremaine house myself when iss Tremaine left it. I came at her re- uest and arrived very late because of her business. I found Miss Tremaine ere, and I also found Philip Tremaine." e gave me a cold glance. "Mr. Tre- aine effectively prevented my leaving e house, and my recollection of his at- tude at that time convinces me that he rced his sister to help him escape. After caping from the house, Mr. Tremaine rced his sister to get out of the car. He as since told me that he left the car rked on Eleventh Street near Mission, t of that I have no proof."

NILES waved his hand in protest. "Hold on now, John. You're jump- g to conclusions. I'm not trying to ake Miss Tremaine out an accessory to er brother's escape. All I'm interested is Tuttle and Finney. You don't know e facts. They're interesting. In fact, ey bear out your story. As I say, the car as been found. But no driver has been und. Curious, eh? Still more curious this: Miss Tremaine's fingerprints are n the steering wheel of the car; that's gical, she drove it. Mr. Tremaine's fin- rprints are on the steering wheel of the r." He looked at Wickersham with mused contempt. "That's logical, too, in ew of your testimony."

"My statements are not to be consid- ed testimony," said Wickersham.

"All right," replied Niles easily. "But w we have this. The steering wheel so bore the fingerprints of Mike Fin- y. Not only that, but their superim- osition over some of the other prints nvinces us that he was the last man to ive the car before it was wrecked."

It dawned on me like a blast what had appened. At last the fingerprints of the al Philip Tremaine had appeared. Not nly that, but they'd been identified as s fingerprints. *But everyone in the room ith the exception of the two Tremaines ill thought those fingerprints belonged me.*

The strand of web was jumping madly efore my eyes—elusive, tantalizing. mething was wrong. If they had iden- fied Tremaine's fingerprints, it was be- use they had some old ones from long go for comparison. They had to have them. Maybe Tremaine had escaped after murdering Clark without leaving any pictures behind, but somewhere he'd have left fingerprints. The police had them. But then why didn't they know already that I wasn't Tremaine?

I closed my eyes for an instant. I had been sick. Sicker than ever before in my life with a sudden blast of tropical fever. They'd carried me into the jail with my arms and legs jumping around in a delirious fit. I'd been babbling and shouting. I couldn't remember any of it, but that had to be the answer. They'd carried me straight through to the infirmary without ever stopping to take my fingerprints. And the next day I escaped before they had a chance to do it. The plain fact was that the police had never taken my prints.

The spider web was still there but now I was dangling at the end of it. They had a steering wheel with Tremaine's prints and mine on it. I'd grabbed the damned thing just before the car went over the cliff. But until someone reached over and plastered my hand on a glass slide, those prints of Tremaine's on the steering wheel would be assumed to be mine.

WICKERSHAM was talking. "I believe it's up to Mr. Tremaine to explain that," he said. "You're not going to connect Catherine Tremaine up with Mike Finney. Tremaine knows him, but she never heard of him in her life."

"I was questioning Mr. Tremaine when this report came in," said Niles. "I'll continue." His eyes roved back to my face. "Do you agree with Mr. Wickersham's version of how you left the car last night?"

"In general, yes."

"You had the car then. So where does Finney come in?" I wasn't alone on the end of the spider web. Catherine was there with me. At the far end of the table she sat like a porcelain figure watching me. Why should it occur to me at a time like this that she was beautiful?

"Where does Finney come in?" repeated Niles.

"He's been in all the time," I said.

"That's hardly an answer. Any service rendered now will be remembered later. Do you know how Finney got in that car after you left it?"

"No," I said. It was coming now. The car keys. I'd left those keys with Catherine in the hotel room. That's how Mike Finney got into the car—after being knocked unconscious. That's how Philip Tremaine got into the car, too—after Catherine furnished the keys. She had it coming to her. I would say the keys were in her possession.

"You had the keys with you?" asked Niles.

"I left them in the car," I said. I heard myself say it and couldn't believe it. I felt my lips move and heard myself say it. I could never retract it now, never say it over again differently. I'd told him I left the keys in the car, and that put Catherine out of it entirely. After she'd tried to kill me. On her face was a queer expression of alarm. Why now? Why, after I'd saved her? She was as pale and beautiful as winter. I'd made another of my idiotic idealistic gestures. I was still trying to believe the story she'd told me in the hotel room.

"I see," said Niles. He didn't like my answer any more than I did. "Finney could have stolen the car then?"

"Yes."

"You think he's been more or less shadowing you?"

"Very closely."

Wickersham leaned forward. "Tell him how you were attacked."

"I'm asking the questions," said Niles. "Were you attacked?"

"I was struck on the head," I said. I wanted to throw the whole story at her. "It was on Mission Street near where I'd left the car. I took Catherine to a small hotel there and left her because I didn't want the police to talk to her until I'd had time to get out of the locality. As I left the hotel, I stopped at the street entrance to make sure the way was clear. While I stood there I was knocked out."

"Ah," said Niles. "Did you see who did it?"

"No, but I've a good idea."

"You think Mike Finney was involved?"

"He was definitely involved."

"And what did you do?"

"As soon as I was able, I made my way to Palo Alto."

"To Mrs. Tremaine's house?"

"Yes."

"I'll corroborate that last statement," said Wickersham. "He has been in my presence since about eight o'clock this morning, and I can assure you he hasn't been out of my sight."

"Very well," said Niles sourly. "Now, that places Mike Finney then at about four o'clock this morning. Sometime between four and five he drove the car over a sharp cliff and somehow managed to escape. We'll learn those details when we find Finney." Down at the end of the table Catherine had buried her face in her hands. She was quite frankly weeping now.

"Do you know," asked Niles, "if Tuttle and Finney knew each other?"

"They had met," I said.

"You seem to know a great deal about this Finney. What sort of man is he?"

"An ordinary sort of man. I've never found him possessed of any remarkable qualities."

"Do you have any idea as to his present whereabouts?"

"All I dare say right now is that I'm certain he's in San Francisco."

"How can you be certain of that?"

"Because he won't leave until I do."

"H'm," said Niles. His gaze flickered around the table. "I'll have to reserve a few questions until later. Can you tell me what this Finney looks like?"

"I'm told he resembles me to a remarkable degree," I said.

He frowned. "You mean there's a real resemblance?"

"Yes," I said. "I've actually been taken for Finney on occasion."

The frown deepened. "Have you assisted him any in his escape."

"Obviously not."

"I see nothing so obvious about it. You're here on tolerance, Tremaine. Your answers aren't all clear and some of your statements are absurd. This matter of resemblance for example. Almost never are two men so much alike that it's confusing to people who know them well." His eyes made slits. "Would you go so far as to say that Finney resembles you enough that you could impersonate him?"

"Undoubtedly."

He banged his fist on the table. "That's ridiculous! You'll not make fools of us, Tremaine. I'd never believe in a million years that you looked that much like Finney!"

The little dark man—Ferratti—suddenly shot to his feet and trotted around to Niles' chair, his hands full of papers.

"I can believe it!" he said. "I never would before, but here it is right before your eyes." He slapped a couple of pictures in front of Niles. "Look at that!"

NILES bent over the pictures, looking from them to me with quick jerks of his head. Over his face spread an expression of amazed disbelief. Now it was going to snap, I thought. He kept staring at me—at the pictures.

"I'm damned," he breathed softly and spun the pictures across the table to Wickersham. I got a good look at them. One was the newspaper picture they'd taken of me standing in front of the Tremaine house. The other was the college graduation picture that I'd had taken many years before while thinking: I love you, Betty Witherspoon. But that wasn't what made the spider web start bouncing up and down like mad again. The newspaper photograph was labeled Philip Tremaine; the other one was labeled Mike Finney. Wickersham looked at them, then at me.

"My God," he whispered, almost awed. "You told me Finney looked like you, but I had no idea the resemblance was that close." He put a finger on my graduation picture. "Is that the Finney you know?"

"That's Finney," I said.

"Of course," said Ferratti, "there's a difference in age there. Finney is a lot older now than when that picture of him was taken. But if you imagine a little aging of the face, add a few lines here and there, the resemblance is almost perfect."

Niles licked his lips and reached across the table for the pictures. "You'll have to find Finney to prove that." He shoved the pictures over to Reba Tremaine. "You couldn't fool a mother though. How about it, Mrs. Tremaine? Would you take that smaller picture for a photograph of your son?"

Reba Tremaine looked at him helplessly, then at my picture. "Oh, no," she said. "I'd never take that for my son."

"You see," said Niles, scooping the pictures up again. He looked at the Mike Finney picture lovingly, then turned to Ferratti. "I'd like to ask you a few questions."

"Go ahead," said Ferratti.

"Is the record on Mike Finney confidential?"

Old advice to the newly wed

Be smart—use Sani-Flush. Housekeeping friends and relatives judge a new bride's cleverness by the speed with which she gets around to using Sani-Flush. There's no scrubbing. Sani-Flush cleans toilet bowls the quick, easy, sanitary way. Disinfects. Stains and film go. Odorless freshness remains.

Safe in all toilet systems. Good in hard or soft water. At all grocers'. Two handy sizes. The Hygienic Products Co., Canton 2, Ohio.

"Only in the sense that all our records are confidential unless there's reason to open them. We've already furnished the police with the identification of Finney's fingerprints. What else do you want to know?"

"What's Finney's general history?"

"Fairly typical. He was born and went to school in Montana. He was here in San Francisco for a couple of years during the water-front troubles of the thirties. Did some union organization work. No jail record unless it was under another name. Later, however, he left San Francisco and went to Spain where he enlisted with the republican forces. Our government was refusing passports for such purposes, so Finney accomplished his end by falsifying his intended destination and later altering the passport. There's a gap of several years until he turned up in France toward the end of the war, associated with the Free French underground. The latest report came in just a few months ago from Mexico. He applied for re-entry into the country."

"Was the application granted?" asked Niles quickly.

"With the condition that he report to the F.B.I. for questioning."

"And did he accept that condition?"

Ferratti scratched his chin. "No, oddly enough, he didn't. He had a fine record for his work in France during the war. One purpose of our questioning was to get more details on that so that if the circumstances warranted it, we could drop the old charge of passport violation. By his failure to appear, he's aroused suspicion again, particularly since he must have re-entered the country under a false name. That can lead to a stiff sentence."

Niles smiled thinly. "And more particularly since he seems to have murdered a man named Rex Tuttle. That can lead to a stiffer sentence." He returned his attention to me.

I was feeling a little sick. According to Ferratti, I'd passed up a clean bill of health. I'd outsmarted myself.

"Certain papers taken from you at the jail indicated you crossed the border from Mexico. You don't have to answer this next question until you face us on the Clark thing, but if you co-operate, I'll remember it when you go on trial." Niles paused, blinking slowly around the table. "It's this. The gun that Finney used on Tuttle was the same gun that was used to kill Clark. We've got both bullets—good specimens—and there's no doubt. Now if you'll tell me just where and how Finney got that gun away from you, it will give us just about everything we'll need for a conviction once we capture him." He waited.

"I can't answer that," I said. "It was never my gun."

NILES stared at me with sudden hostility. "Oh," he said. "I suppose you think you're going to plead not guilty?"

"I'm not guilty," I said.

"Now just a minute," said Niles with forced patience. "Your conduct so far gives you a chance for clemency for the murder of Earl Clark. It won't be execution. It may be only twenty years. But I'm going to need your full co-operation to guarantee that. There's no use trying to save yourself entirely. We've got all the witnesses we need to guarantee conviction." He was almost snarling.

"Listen, Grover!" said Wickersham, his drawling manner forsaking him as he struck the table with both palms and sprang to his feet. "He's not guilty! Bring in your witnesses! Bring in all five stenographers who saw the man they call Tremaine enter Clark's office. Line them up and show them those pictures. Let's hear them swear it couldn't have been Finney!"

Niles was on his feet too. "This is no trial, John. You're not even representing Tremaine!"

"I'm representing his interests whether he likes it or not! And I'm damned if I'll see you use this opportunity to gather evidence against him." He whirled toward Ferratti. "You say you lost track of Finney after he went to Spain. Could he have returned to the United States?"

Ferratti looked up, startled. He was still puzzling over my pictures. Any minute now he was going to have a bright idea, walk around to my side of the table, press my palm against a sheet of glazed paper and dust off the results.

"I suppose it's possible," he said.

"Where did you get your information that Finney was a labor organizer in San Francisco during the thirties?"

"The bulk of that information came from the Merchants' League. Normally we don't investigate such things, but there was considerable trouble at the time. Several incidents of violence."

"Are you aware that Earl Clark was the league's attorney?"

"Yes, I know that."

"And that he was quite vigorous in his campaign against agitators?"

"I suppose that's true."

"So that Finney would have every reason to hate him?"

"Well, maybe." Ferratti blinked thoughtfully. "And Finney did have some reason for not wanting to face investigation. Must have had. Sounds incredible, but such things do happen." He lifted a finger to prevent Wickersham from interrupting. "Then there's also this. Haven't mentioned it before because I didn't see the bearing. The fact is that Rex Tuttle was once one of our employees here in San Francisco. He had access to Finney's file at that time."

Wickersham turned back to Niles triumphantly. "Don't you see it?" He pointed a finger down at me. "This man was attacked last night. By whom? By Finney! Why? Because Finney knew that if Tremaine ever came to trial, Finney would be exposed. Then Tuttle was killed! Why? Because Finney had found out that Tuttle knew the truth. Look at that entry in Tuttle's diary. A connection between Finney and Tremaine. What connection? It's as plain as day! Ten years ago a man named Mike Finney, knowing he looked so much like Philip Tremaine that close friends couldn't tell them apart, heard that Tremaine had been in a quarrel with Earl Clark. What an opportunity for Finney to get away with murder. All he had to do was put on decent clothing, walk into Clark's office—making sure there were plenty of witnesses—and shoot Clark! That's what he did. Everyone swore Tremaine was the guilty person. Finney went free, and Tremaine was hounded."

"But the evidence, John!" cried Niles

Wickersham's long arms shot toward the ceiling in a gesture of majestic disgust with the stupidity of others.

"Evidence!" he thundered. "You've got Finney's motive for killing Clark You know he killed Tuttle! You've go the means, and you can show opportunity. And you've got the weapon tha killed Clark with Finney's fingerprints o it! That's ten times the evidence you've got against Tremaine." He leaned across the table, his voice sinking to a whisper. "You've got a great opportunity Grover—the opportunity to clear thi man here of a heinous charge, the opportunity to restore him to the respected place in our society that was occupied by his father." He straightened and spoke firmly. "But more than that: When you capture Mike Finney, you will have captured the man who murdered Earl Clark—the man who murdered Rex Tuttle. That's the truth!"

The truth.

DURING the sudden silence which followed Wickersham's words, I glanced around the table to see how the truth was affecting the other participants.

The two plain-clothes men were unaffected. They sat expressionless and indifferent as they had from the beginning.

Wickersham was glowing. His features showed the pride in his work. He was the master scientist who had taken available data, arranged them in order and brought forth a theory which explained every known fact. There was nothing wrong with his theory at the moment. We were all suspended in a crystal, and as long as the crystal didn dissolve—as long as Catherine or Reb Tremaine failed to speak, as long as Ferratti failed to take my fingerprints, as long as nothing changed—the theory was perfect. Mike Finney had murdered two men; Philip Tremaine had murdered none.

At the end of the table Catherine had managed to lift her head once more. She was watching me. She saw nothing in the room except my face. Her head shook slowly and her lips kept repeating silently, "No, no, no, no." She was lost She dare not speak now.

On my left Reba Tremaine sounded like a hospital inhaler, the air going in and out with mechanical regularity. I knew exactly what she was thinking. She was thinking that if only the mistaken identity would last, her son would be cleared of a murder charge with me standing proxy for her son. I could a

ys be killed later to prevent discovery the mistake. She wasn't going to say ything to dissolve the crystal.

Across the table from me Ferratti owned. He looked at me; he looked at e pictures. He was beginning to have e bright idea. I knew exactly what he s thinking. He was thinking that what needed was a set of my fingerprints ken right now so that he could com- re them with the two sets from the ering wheel and find out which one of e people I was. But to do that right w would be to insult the intelligence Grover Niles and the whole San Fran- co police force. He had to be diplo- atic. He could always secure a set of emaine's fingerprints from the old rec- ds, and within a few minutes he'd be le to secure a set of mine from the pol- ed surface of the table where I was ting. He'd go about it quietly to avoid ense. He couldn't be sure of anything til he had those prints.

DIRECTLY across from me Grover Niles was standing. He looked at me, d while he looked, his face underwent slow transformation. It softened: it llowed with a philosophic placidity. first I was puzzled. No one had ever oked at me that way before. Then I alized what it was. He was remember- g the elder Tremaine, Philip's father. A man, Catherine had called him, a man o believed so firmly in justice that he'd d his whole fortune on its altar in an ort to make Philip come home and face al. A respected man. The stern weight his character was still a force among e men who remembered him. Niles re- embered. An honorable name lives a g time. And perhaps Niles was swayed consciously by the realization that the n too might emerge with a respected me. And wealth. Still, he had to be reful. There were a thousand ques- ns to ask. The answer to any one of em might dissolve the crystal. He awed his lip nervously. "Now," he d, smiling, "if Mr. Tremaine has no jections, I'd like to proceed with just ew more questions. You see, Mr. Tre- aine, there are a few unexplained facts. r example, you broke jail—rather vio- tly I've been informed."

"All right," said Wickersham, "accuse n of breaking jail. Don't accuse him murder."

"There is no accusation until formal estioning," said Niles smoothly. "I n see where an innocent man as well a guilty one might want to escape from nfinement. Still—h'm—Mr. Tremaine, me be frank with you. After I heard t you'd been—that you'd given your- f up, I rounded up the witnesses who imed to have seen you enter Clark's office on the morning of his death. Of the five witnesses, only three are available at the moment. In view of their previous testimony, this matter will have to be formally cleared one way or the other. It might be easier for everyone if we took care of that matter right now."

"Fine," said Wickersham. "Bring them in."

"We'll do this properly, of course," said Niles. "There are six men here at the table. I'll call in two of the clerks which will make eight. Then we'll bring the witnesses in one at a time." He buzzed for his secretary and gave her the orders. He was in a hurry about it. There was still a big doubt in his mind as to whether I was to be treated as the respected son of a respected father, or whether I was the black sheep of the family. He'd find out, of course, that I wasn't Tremaine at all.

Two men came in from another office and were directed to sit at the table. There were eight men, the two Tremaines, the stenotypists. A nice tableful. Niles signaled the secretary again and she brought in the first witness. The witness was a watery-eyed female, maybe thirty, with long nervous fingers that kept pinching at the material of her blouse. She was scared. Niles stood her at the end of the table right behind Catherine Tremaine. It made a startling comparison—the face of the stringy blond above with its pale eyes shifting uneasily, and underneath it Catherine's face, absolutely motionless, the eyes dark, round and filled with bottomless terror.

Niles started directing questions. "Name please?"

"Dora Bergeson."

"You're employed where?"

"Dobbs and Offord law firm. I'm a legal stenographer."

"Were you at one time employed in the same capacity by Mr. Earl Clark?"

"Yes, sir. I was."

"When was that?"

"For about three years just before he was—before he died. It was my first job."

"Please speak a little louder. Were you at work in his office on the day he was killed?"

"Yes, sir."

"Louder, please. Did you see the man who entered his office that morning just before he was shot?"

"Yes, sir. I did."

"You got a good view of this man?"

Her lower jaw twitched. "Yes, sir. I spoke to him."

"What was the subject of your conversation?"

"He asked me if Mr. Clark were in."

Niles paused and glanced at Wickersham. "Satisfied?"

"Go ahead," said Wickersham.

Niles turned back to the witness. "Now, Miss Bergeson. I ask you to look at the men seated around this table. Among them do you see the man who entered Clark's office on the day in question?" He stepped back to give her time to answer.

She flushed and ran a frightened glance slowly around the rectangle of faces. The glance stopped on me. It had no business stopping there but it did.

THE crystal was beginning to melt away. If she should identify me as the man who entered Clark's office, and then it was discovered that I was Mike Finney, I was finally a dead man.

"I see Mr. Tremaine," she said.

"That isn't what I asked," said Niles. "I asked if you saw the man who entered Clark's office on the day he was killed."

"I don't know what you mean," she whispered. "I see Mr. Tremaine. I can tell because of his picture in the newspaper yesterday. Wasn't he the one?"

"Miss Bergeson," said Niles impatiently. "That's just what we're asking you. Is he the man?"

She stared at me a few seconds. "I don't know," she mumbled. "When I saw the picture in the paper, it sort of puzzled me. It wasn't exactly like I remembered the man. It's been a long time and maybe the face has changed."

"Miss Bergeson," Niles repeated, "we aren't concerned with that. We know several years have elapsed, and we don't care what you saw in the newspaper. We aren't asking you to pick out any particular individual by name. We're asking you to pick out a face. Do you see at this table the face of the man who entered Clark's office?"

"You mean maybe it wasn't Mr. Tremaine?"

Niles ran a hand through his gray hair. "All you have to do, Miss Bergeson, is say yes or no. Do you see the face of the man who entered Clark's office?"

For a moment she hesitated, then turned to face Niles. "I've got to say something," she said.

"Can you answer the question?"

"I've got to tell you something first. I've got to tell someone. There's been a terrible mistake and I've got to tell you about it."

"If you wish to make a statement, we can take it at the proper time."

"Let her say it," said Wickersham. "Even if it injures my client, I want the truth of this."

"We were talking," said Miss Bergeson without waiting for Niles' permission to speak. "That is, I was talking with the other girls after Mr. Tremaine's picture came out in the paper; I called the other girls on the phone—"

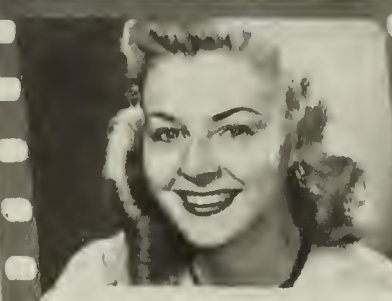
"Yes, yes," said Niles.

"I just wanted to tell you how we came to be talking. And we decided it didn't look the same any more."

"What didn't look the same?"

"The picture of Mr. Tremaine in the paper. Somehow it didn't seem like the same man to me. And that's why I called the other girls, to see if they thought it was the same. And they didn't either. They thought there must have been a mistake."

"What mistake?"



"It's dreadful," she said, and the watery eyes became wetter. "We've all felt so terrible about it because we were the ones who identified Mr. Tremaine in the first place ten years ago. We were the ones who swore he was the man. And then his picture came out in the paper and it didn't look like the same man."

"You did know Mr. Tremaine by sight ten years ago?"

"I thought so. He'd been at the office once before that morning. All the girls were interested in him because of his fight with Mr. Clark. And now we've found out what an awful thing we did accusing him, because it must have been someone else." She sobbed quietly and

with evident relief. Wickersham got to his feet, rounded the table and took the pictures from Ferratti's hands. He carried them to where Miss Bergeson was standing and laid them on the table in front of her, his hands covering the names beneath the pictures.

"Look at these, please," he said. "Was the man you saw one of these men?"

She looked at the pictures through her tears and shook her head uncertainly, then stretched a finger toward the picture from the F.B.I. files. "It's been too long... But the man I saw was young-looking. More like that one."

"You'd say this was the man?" asked Wickersham, holding up my graduation picture.

"No," she said. "I just said the man I saw was young-looking." Another spasm of sobs shook her. "I wouldn't swear anything now! I just couldn't! I'm too confused and feel so awful about what I did before. The other girls are the same way." Wickersham turned away in triumph.

"All right, Grover, do you want to call the others?"

"It's unnecessary," said Niles. He led Miss Bergeson to the door and dismissed her. "Thank you," he said. "You've been of great service." He closed the door behind her and came back to his place at the table. He smiled at me openly now. Part of his doubt had been removed. The witness had been honest; she'd said I wasn't the man who killed Clark. The name of Philip Tremaine was becoming cleaner every minute. Niles cleared his throat.

"I think it's only too evident to all of us," he said, "that a grievous wrong has been perpetuated over a period of ten years. Mr. Tremaine, since your return I've been prepared to prosecute you for murder. I cannot tell you—I cannot possibly express my profound relief at discovering that the prosecution will be unnecessary. We came together here to discover who murdered a man named Rex Tuttle. We've succeeded in learning the name of that man, but even more, we've succeeded in clearing you of all suspicion regarding the death of Earl Clark." He paused, looking thoughtfully into space. "Revenge is a base emotion,

BEGINNING NEXT WEEK . . .

MORE BEAUTIFUL THAN MURDER

By Octavus Roy Cohen

Steve Blake was on trial for murder—and the trial was compounded of circumstantial evidence and perjured testimony. Conviction meant the gas chamber; acquittal meant freedom under a vicious cloud of gossip and suspicion. And the only clue he had to the secret of the murder was a beautiful woman's trumped-up alibi.

Don't miss this gripping romance of two people bound together by murder—and held apart by marriage.

but I'll not blame you, Mr. Tremaine, if you take a profound joy in contemplating the fate which awaits Mike Finney when he is captured. And captured he will be, Mr. Tremaine. Make no mistake about it." He talked on, smiling. He made a beautiful speech. The door was about fifteen feet behind me. Was he going to let me through it? I could feel the sweat running down my spine while I awaited the end of his oration. He forgave me for breaking jail. "You were obviously not in your right mind," he said. "You'd had certain drugs administered to you while you were in the infirmary and you were acting under their influence. Quite often violence is a natural result of some drugs." He paused suddenly, frowning again.

"But there is one thing, Mr. Tremaine. A very curious thing. You'll have to admit it looked like a confession of guilt on your part. Why, since you were innocent, did you attempt to commit suicide?"

It was a blow in the guts. The crystal shook. My spider web started vibrating

"Suicide?" I said. "I made no suc attempt."

Suspicion re-entered his eyes. "There no way you can deny it, Mr. Tremain The doctors pumped a substantial dos of atropine out of your insides. Not fatal dose, since you obviously recovere but the size of the dose could have bee an error on your part. The fact hasn been publicized, because the police don want it known that they permitted prisoner to poison himself, but the fa is that you did. It was a strange thing fo an innocent man to do."

The crystal dissolved and the web wa swinging free again. The abyss yawne beneath. Everything was clear now- horribly clear. It hadn't been an attac of tropical fever at all; it was poiso That would have been evident to anyor except the victim. The victim had bee unconscious. That's what the docto had been talking about that morning jail when my senses first returned. *Yo can pick up anything down there,* one them had said, and they hadn't been di cussing tropical diseases; they were tal ing about poison.

And I knew when I'd been poisone I'd eaten dinner at the Tremaine hou just before the police came for me. Th police were supposed to have found n dead. That's what Tremaine had mea in the car when he accused someone muffing the first chance to kill me. B who had muffed it? I suddenly remer bered that spilled cup of coffee, and spark of new life flared up inside m Something that I thought was de stirred. The coffee had been spilled. looked at Catherine. She sat as she ha sat throughout, immobile and whit saying nothing, afraid to disturb my de cate balance. She had spilled the coffe But she had also killed Tuttle and help her brother try to run me over a cliff. was a question. I might never know t answer because the poison was final going to get me anyway. I couldn't e plain it away without telling the whc story.

They'd find out I was Mike Finney a they'd execute me for the murder of man I'd never seen in my life.

(To be concluded next week)

SCANDALS IN VETERANS' HOUSING

Continued from page 15

everywhere they came up against a mass of red tape. Only when they halted payments on their mortgages did any federal agency bestir itself. The hard-pressed OHE shipped investigator E. C. Magnusson out from Washington to look around. Magnusson disallowed the veterans' complaint that the houses had been sold over ceiling prices. But he confirmed their charges that numerous items had been left out of the houses, or replaced with cheaper and less serviceable equipment than the plans and specifications had called for.

In some cases—relatively few—swindled veterans, sometimes acting on their own and sometimes with the aid of state or federal officials, have achieved some measure of redress from builders who overcharged them and then multiplied the offense by delivering houses that began to fall apart almost as soon as they were occupied. As of this writing the Office of the Housing Expediter has settled some 325 cases with builders through which $250,000 was returned to veterans in the form of restitution for overcharge or as compensation for failure to comply with specifications. But the vast majority of gypped veteran home buyers have not been nearly so lucky.

In the nine months between July 1, 1947, and the end of March this year, the Office of the Housing Expediter *received* 31,233 complaints. Some covered as many as 500 houses on a single tract. I emphasize that word *"received"* because very few of these pleas for help ever get beyond the envelope-opening stage.

On April 1st of this year only 1,574—just about five per cent of all the complaints—had been investigated. More than 29,000 were "resting" somewhere in the files.

With as many as 4,000 new protests coming in every month the Housing Expediter's investigating staff, cut down to 15 men, was swamped. Each investigator was averaging ten days to a case. If schedules could be speeded up so that a mere three days were needed per case, the expediter's staff could hope to eliminate its backlog (if only additional veterans would stop sending in new complaints) by the middle of 1970.

Of course, other agencies might be expected to show an acute interest in these housing swindles. The Federal Housing Administration, for example, has insured the first mortgages on the vast majority of the 2,000,000 and more homes built since V-J Day. It is supposed to have inspected FHA-insured homes to be certain they were built just as intended when the loans were granted on the basis of builders' plans and specifications.

But the FHA doesn't seem to have been able to protect its own commitments let alone shield the veterans who relied upon its "guarantee." It once insisted upon three thorough inspectio per house. Under the impact of Congr sional economy it cut its official insp tion schedule down to two.

The Veterans Administration has finger in the pie, too. As the guarant of G.I. loans, it also stands to be stu for many hundreds of millions of doll when disgusted veterans get sick of pa ing for shacks and toss in the sponge.

Every time the Veterans Administ tion has guaranteed a loan it has assum an obligation based upon an actual hou or the certainty that one will be built- house, too, that represents a value at le as great as that of the loan.

To set that value the V.A., like a other prudent lender, depends upon a praisals it assumes are made by hon experts.

But the V.A. appraisal system has be so slipshod in its concept that it has v tually invited fraud. Appraisers had, u til very recently, not been work directly for or paid by the V.A. Inste panels of approved appraisers w furnished builders or private lend agencies who were free to shop arou Some were careful to pick estimat whose appraisals were high enough please them.

The result in many cases was that c servative appraisers, given to figur proposed houses at their real val found themselves missing out on V

s, while their more liberal fellow were able to earn tens of thou- of dollars for filling out blanks t, juicy figures designed to serve basis for a government guarantee is.

The 442 complaints filed klahoma veterans and veterans suffered the same fate: every last them was resting undisturbed in s. Texas has been sprouting vet- houses with true Texan vigor. With t had sprouted 1,564 complaints. 18 were being investigated as of st.

The Office of the Housing Expediter is hardly to be blamed. The Deputy Expediter for Compliance, Morris S. Verner, Jr., had 75 regional offices and 600 investigators in June of 1947. His agency asked Congress to continue this staff. But the Senate committee that looked into the matter thought there was no need for these people on the government pay roll. Its report, published as an official Congressional document, calmly stated, "There is no evidence presented that there is widespread abuse of veterans' preference provisions."

Slashes in Enforcement Funds

The Director of the Budget had approved $1,135,000 for compliance work. The Senate cut that down to $700,000. Then as if this weren't bad enough, a joint Senate-House conference committee cut a further half million out of the OHE appropriation. For compliance enforcement only $160,000 could be scraped up.

Hundreds of Verner's investigators promptly received dismissal notices. The 75 regional offices were cut down to four. Instead of 600 field investigators there were 15. The entire system for protecting the veterans'—and the government's—interest became little more than a pretense.

In San Francisco, for example, the Housing Expediter's regional office, under James J. Rudden, has a staff of five investigators, an analyst and two stenographers.

Rudden's nine-state territory covers a mere million square miles. Currently his two stenographers are acknowledging and filing over 450 complaints a month.

The tiny San Francisco staff has fewer than 70 cases docketed. At the time of this writing Rudden's men were working on about 15—the most glaring cases of course—and mostly in the San Francisco and Los Angeles areas. For most of the rest, he said, all he could do for them was to tell those who sent the complaints there was nothing he could do, at least for the present. Letters are opened and the complaints filed. But for all the difference it makes they might just as well be allowed to gather in a pile on the floor, to put the matter in Rudden's own words.

(This is the first of two articles on veterans' housing. The second will appear next week.)

THE SECRET PAPERS OF HARRY L. HOPKINS

Continued from page 19

are in a position to carry on the war until England collapses from lack of tonnage . . .

The convoy system, which, in the World War—but at the last minute—settled the U-boat war in favor of England, has in this war misfired. It could not prevent the big-scale sinking figures which must finally be fatal . . .

An occupation of the whole island [Britain] does not come into question—for Germany would be burdened with the feeding of the population. In the long run, only the most important airfields would be kept in occupation. All these would be hermetically sealed over a wide area from the population so that the troops of occupation would not be affected by the misery of their starvation . . . I am conscious that in the above I have partly given away military secrets. But I believe I can answer to my conscience and to my people, for I believe that frankness makes possible the ending of a senseless war.

Harriman expressed to Stalin the hope that he would feel free to cable President Roosevelt directly. Stalin said he was glad to hear this as he had previously felt he should not presume to address the President directly. Beaverbrook suggested to Stalin that it would be highly desirable for him to meet with Churchill face to face.

According to Harriman's notes, Stalin expressed to Beaverbrook his belief that the present military alliance and agreement of no separate peace should be extended to a treaty, an alliance not only for war but for postwar as well.

Beaverbrook answered that he personally favored it and believed that it was an opportune time to take it up.

Harriman made repeated attempts to break through the continued discussion of European matters in order to obtain Stalin's views on the Far East. Stalin expressed the belief that Japan might be split from its Axis alliance with Germany. He said it was his impression "that Japan was not Italy and is not willing to be a serf to Germany and therefore could be won away."

Beaverbrook noted of Stalin, "We had got to like him: a kindly man, with a habit, when agitated, of walking about the floor with his hands behind his back. He smoked a great deal and practically never showed any impatience at all."

Here is presented the sixth installment of one of the most remarkable stories of our era. When Franklin D. Roosevelt died, there remained only one man—Harry L. Hopkins—who could tell completely the inside story of the New Deal and of America's High Command in World War II. Preparation of The Hopkins Papers had started before Hopkins died. The task was then taken up by the dramatist and author, Robert E. Sherwood, a friend of both Hopkins and Roosevelt. Collier's presents the result with a conviction that this is the most important document of its kind that has been or will be produced . . .
The Editor

At the conclusion of this final meeting, Harriman wrote:

The meeting broke up in the most friendly fashion possible. Stalin made no effort to conceal his enthusiasm. It was my impression that he was completely satisfied that Great Britain and America meant business. In spite of my lack of knowledge of the language, he had indicated by his manner throughout the three nights of conferences (totaling about nine hours) very clearly his reactions to everything we said, either favorable or unfavorable or that he was not interested.

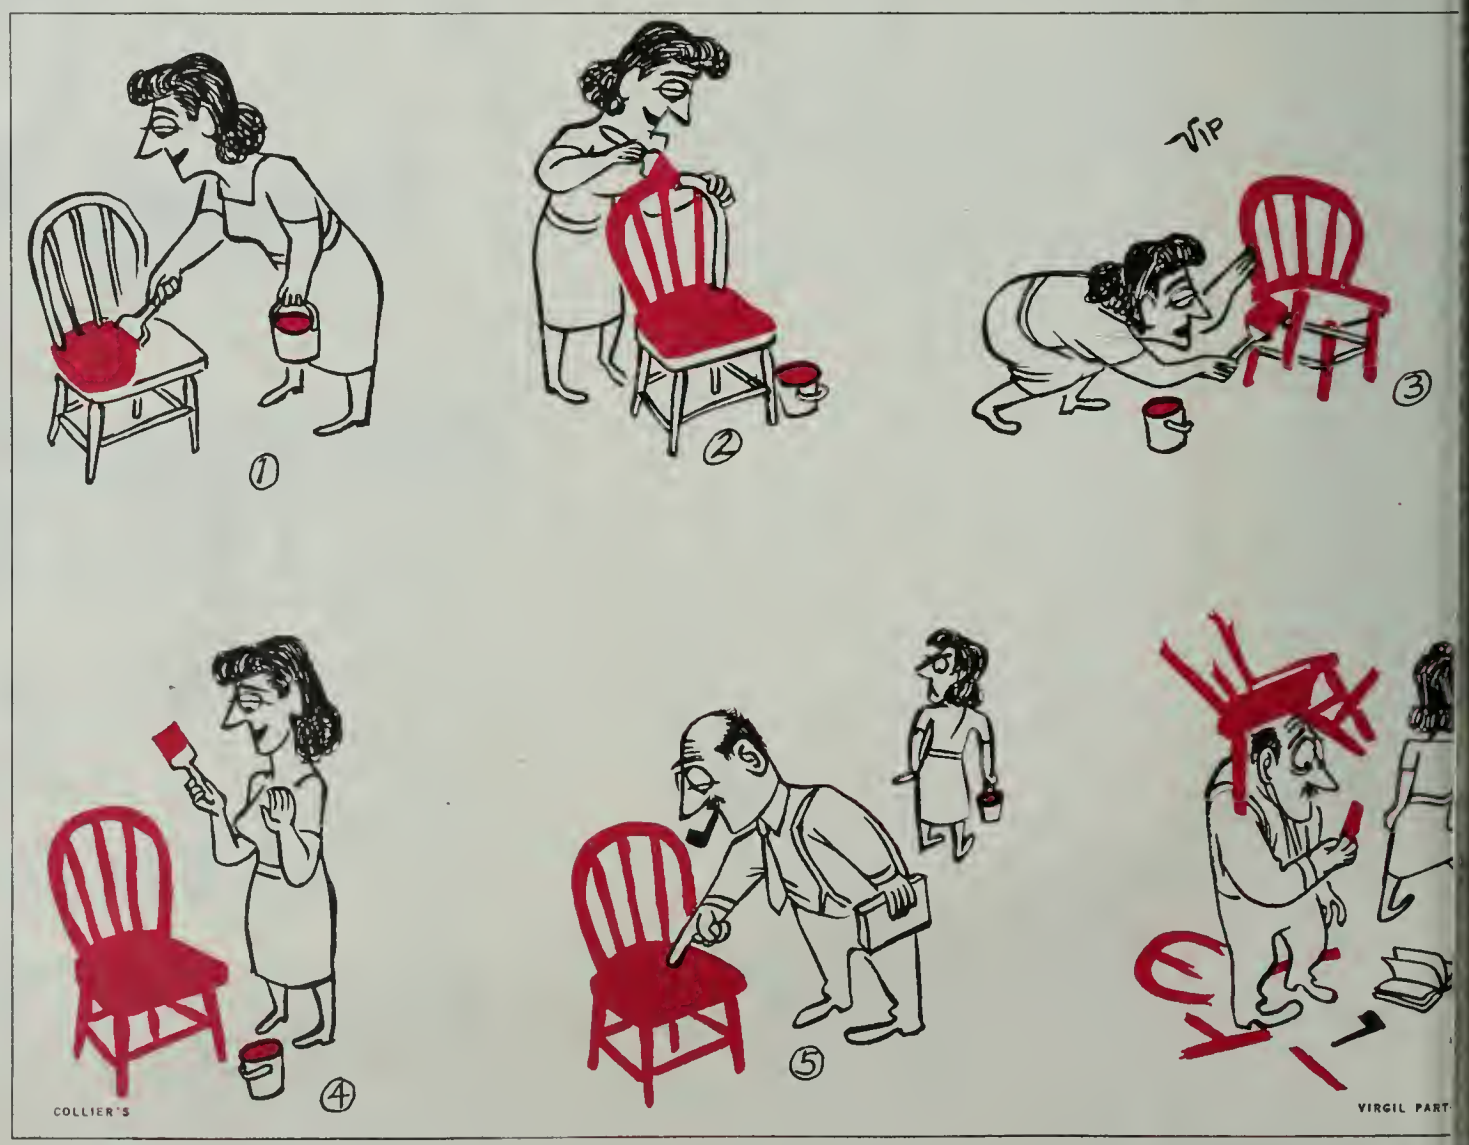
Harriman later wrote a memoran
on Religion in the U.S.S.R.:

Throughout the week in Russia I
every occasion (and I believe cov
most of the members of the Soviet
gation, including, of course, Stalin
Molotov) of explaining the America
litical situation and public opinio
garding Russia, particularly in rel
to the religious subject, and urged
both statements and action be take
indicate to America that the Soviets
willing to allow freedom of worshi
only in letter but in fact.

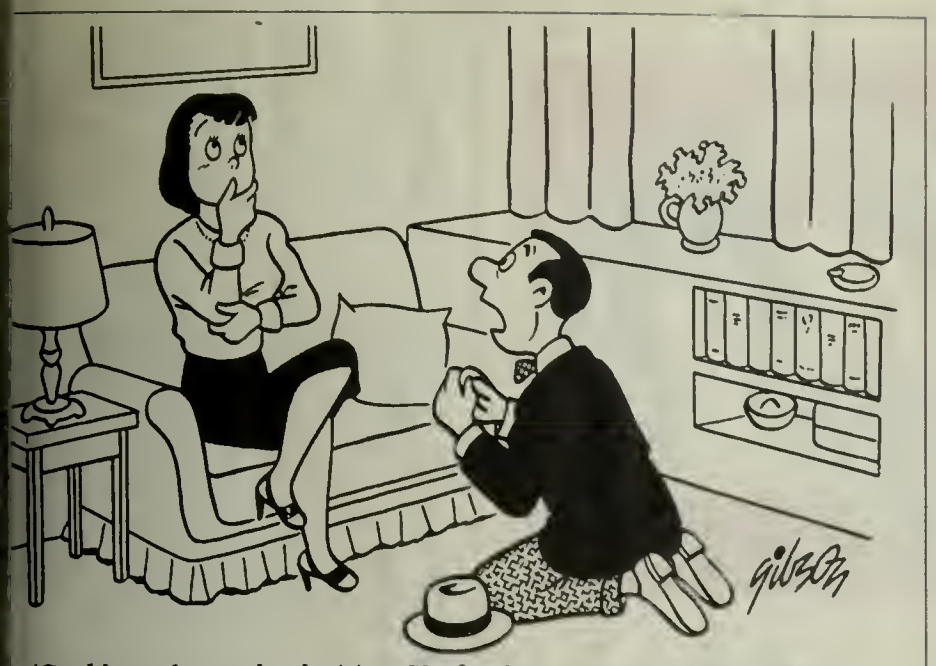
Everyone at least nodded, "Yes.
explaining the subject to Stalin
nodded his head and indicated wh
understood to mean a willingness t
that something was done.

In spite of all comments and a
ances I leave with the impression
all the Soviets intend to do is to giv
service and to create certain insta
which would give an impression o
laxation without really changing
present practices.

They do appear, however, to be n
less afraid of religion than they
some years ago.



Harriman also made note of ce
evidences of friction between Be
brook and the military members o
British Mission. Beaverbrook ha
then become a vociferous advocat
the second front in the west. He
forever opposing any diversions
this fixed purpose.



Following is his own original s
ment of the matter, a copy of whic
sent to Hopkins:

On my return from Russia in a
the middle of October, 1941, I stat
ease for a second front to help the
sians.

I claimed that our military lea
had shown themselves consiste
averse to taking any offensive action

Our strategy is still based on a l
term view of the war which is blin
the urgencies and opportunities of

"Could you hurry the decision, Kay? I've two more calls to make"

IER'S JAMES GIBSON

nt. There has been no attempt to nto account the new factor intro- by Russian resistance. . . .
nonsense to say that we can do ng for Russia. . . . The Chiefs of would have us wait until the last has been sewn on the last gaiter we launch an attack. They the present opportunity.

Wednesday afternoon, October e first "Confidential Protocol" be- the U.S.A., the U.S.S.R. and the was signed and sealed by Harri- Beaverbrook and Molotov. It con- over seventy main items and more ighty items of medical supplies— anks, planes and destroyers down my boots (of which the Russians for 400,000 pairs monthly).

pkins, in Washington, wrote to hill:

times I get terribly discouraged getting the matériel fast enough en I think of your own overwhelm- roblems and I am tempted to try . . . There is still an amazing num- people here who do not want to Russia and who don't seem to be o pound into their thick heads the gic importance of that front.

October 30th, Roosevelt sent a to Stalin:

of the items of military equipment munitions have been approved and directed that the utmost expedi- e used to provide so far as possible w materials.

have also directed that arrange- be effected immediately whereby ents up to the value of one billion s may be made under the Lend- Act. This should remove any ial obstacles.

ur government, I hope, can ar- to make special efforts to sell the l States such commodities and raw ials as may be available and of the United States may be in ur- need, the proceeds of such sales to overnment of the United States to dited to the account of the Soviet ment. Should the occasion re- it, I trust you will not hesitate to touch with me directly.

uggestions for Co-ordination

kins wrote the following note on able:

emed to me after my conference ssia with Stalin that the President l personally deal with Stalin. . . . n is obviously unhappy because not consulted about the strategy of r, and I think he feels that I could ore helpful in relating him and all to the President.

nson wanted me to be sure that I the War Department's full stra- plans and he and Marshall deliv-

ered them at great length, including the techniques to keep Japan out of the war and the various theaters in which we might operate in the event of our getting into the war.

Both Stimson and Marshall feel that we can't win without getting into the war but they have no idea how that is going to be accomplished.

Following is a paraphrase of Stalin's reply, dated November 4th, to Roosevelt's cable:

First of all I would like to express my sincere thanks for your appreciative remarks regarding the expeditious manner in which the conference was handled.

Your decision, Mr. President, to grant to the Soviet Union a loan in the amount of one billion dollars subject to no interest charges and for the purpose of paying for armaments and raw materials for the Soviet Union is accepted with sincere gratitude.

I agree completely, on behalf of the government of the Soviet Union, with the conditions which you outlined for this loan to the Soviet Union, namely that payments on the loan shall begin five years after the end of the war and shall be completed during the following ten-year period. . . .

I am heartily in accord with your proposal, Mr. President, that we establish direct personal contact whenever circumstances warrant.

Shortly thereafter, with Moscow in a state of siege, Roosevelt and Hopkins discussed the possibility of expediting the delivery of fighter planes to Russia by sending an aircraft carrier to the Persian Gulf, thereby delivering the planes ready for immediate action. Roosevelt favored the idea but the Navy felt it would be unwise, and Hopkins sent a memorandum to the President proposing to send the planes by merchant ship.

Roosevelt returned this to Hopkins with the following penciled notation:

H.L.H.:

Okay but say to them for me: Hurry, hurry, hurry!

F.D.R.

In connection with the problem of aid for Russia, it must be remembered that there was always a faction, and it was strongly represented in the State Department (not including Hull or Welles), which was sure that the Russians would make a separate peace with Germany.

A year after the United States entered the war, Hopkins attended a meeting of the President's Soviet Protocol Committee. The point was raised that, before we extended further aid to the Russians, we should demand that they provide us with full information concerning their military situation as the British had consistently done. According to the minutes of this meeting:

On the whole Mr. Hopkins felt that there were certain unsatisfactory aspects to the program. This decision to act without full information was made with some misgiving but after due deliberation. Mr. Hopkins said that there was no reservation about the policy at the present time but that the policy was constantly being brought up by various persons for rediscussion. He proposed that no further consideration be given to these requests for rediscussion.

Although Hopkins attempted thus summarily to dismiss the question, it remained to plague the relations between the two countries.

With the setting in of the dread Russian winter, and the beginnings of hope that the German drive could be stopped short of Moscow, the Russians became insistent that agreements be made on postwar settlements.

It was decided that Anthony Eden should visit Stalin and Molotov, who told him their demands for recognition of the frontiers held by the Russians on June 20, 1941—before Hitler's attack—which included possession of the Baltic States and the eastern portion of Poland occupied in the first month of the second World War.

In refusing to agree to this recognition, Eden invoked the principles of the Atlantic Charter and the views of President Roosevelt, who had informed the British government that "in our considered opinion it would be unfortunate for any of the three governments . . . to enter into commitments regarding specific terms of the postwar settlement." (This message had been delivered to Eden by Winant on December 5, 1941, just two days before Pearl Harbor.)

F.D.R. From a British Viewpoint

Millions of words have been recorded on all the events and all the statements leading up to the moment of the Japanese attack. A glimpse of Roosevelt's attitude four weeks to the day before Pearl Harbor was given in a memorandum written by Harold Balfour, the British Undersecretary of State for Air, describing a conversation with the President in which Balfour was urging that more American heavy bombers be turned over to the Royal Air Force for use against Germany. This memorandum said of Mr. Roosevelt:

His present Japanese policy is one of stalling and holding off. If during the next few weeks this policy looks likely to succeed for some months ahead, or alternatively if the President can sign up for peace with Japan so as to ensure no sudden hostilities then he will feel able at once to direct a further diversion of heavy bombers to U.K.

On the other hand the Japanese situation may blow up in the very near future, in which case U.S.A. and U.K. Joint Staffs will have to get together and decide in the light of combined war strategy where such equipment as becomes available can best be used.

On November 26th, Secretary Hull handed to the Japanese ambassadors the Outline of Proposed Agreement Between the United States and Japan, which has been described as an "ultimatum" by a few Americans who have seemed anxious to absolve the Japanese of all guilt for the war in the Pacific.

In this connection it should be noted that the Japanese task force sailed for Pearl Harbor on November 25th, the day before the Hull Outline was delivered in Washington.

On December 6th, Averell Harriman cabled to Hopkins:

You may wish to tell the President that he (Churchill) believes that if there is Japanese aggression the British policy should be to postpone any action even at some military sacrifice of time until the President has acted as he considers best under the circumstances. The

Eyes Dead Tired?

Dr. Scholl's Foot Powder won the highest award—the confidence of millions—because it relieves tender, hot, chafed, perspiring feet and eases new or tight shoes *in seconds!* Helps prevent Athlete's Foot, too. Get Dr. Scholl's Foot Powder today. It's really marvelous.

Prime Minister will then act "not within the hour but within the minute."

The reference in this to postponing "any action even at some military sacrifice" referred primarily to possible British naval or air action from Singapore against the Japanese landings.

It is important that nowhere, in any of the official Intelligence reports, appraisals or estimates that came into the White House during the months preceding December 7th, have I found one mention of the possibility that the Hawaiian Islands might be the first object of attack.

On the other hand it is abundantly clear that Roosevelt up to the moment of Pearl Harbor faced the most grievous dilemma of his entire career. This is clarified by the following, which Hopkins wrote some six weeks after Pearl Harbor:

I dined with the President alone tonight. The President told me about several talks with Hull prior to Pearl Harbor relative to the loopholes in our foreign policy in the Far East in so far as that concerned the circumstances on which the United States would go to war with Japan in event of certain eventualities.

All of Hull's negotiations . . . would never envisage the tough answer to the problem that would have to be faced if Japan attacked, for instance, either Singapore or the Dutch East Indies. The President felt it was a weakness in our policy that we could not be specific on that point. The President told me that he felt that an attack on the Dutch East Indies should result in war with Japan and he told me that Hull always ducked that question. . . .

I recall talking to the President many times in the past year and it always disturbed him because he really thought that the tactics of the Japanese would be to avoid a conflict with us; that they would not attack either the Philippines or Hawaii but would move on Thailand, French Indo-China, make further inroads on China itself and possibly attack the Malay Straits. He also thought they would attack Russia at an opportune moment. This would have left the President with the very difficult problem of protecting our interests.

This then, was Roosevelt's dilemma:

The Japanese (he believed) were about to strike at British or Dutch possessions or both—and what could he do about it? Without formidable American intervention, the Japanese would be able to conquer and exploit an empire; and it was idle to assume, and Roosevelt knew it better than anyone else, that there could be any formidable intervention without the full, final, irrevocable plunging of the entire nation into war.

War Enthusiasm Was Lacking

Even if Roosevelt, through diligent use of the Democratic party whip, could compel the Congress to vote for war by a narrow margin after weeks or months of demoralizing debate (during which the Japanese would sweep ahead), what degree of unity or of fighting spirit could the American people achieve for the long and bloody effort that must be demanded of them? How much will to battle would be stimulated by the news that the Japanese were establishing a beachhead at Khota Baru on the Gulf of Siam?

And if the Congress and the people should refuse to go to war on this provocation, as it seemed inevitable that they would refuse, what would be the effect on the British, the Russians, the Chinese —as well as on the Germans, Italians and Japanese?

The plain fact was that the moment was imminent when the United States would be forced at gun point either to put up or forever shut up.

There was just one thing that the Japanese could do to get Roosevelt completely off the horns of the dilemma, and that is precisely what they did, at one stroke, in a manner so challenging, so insulting and enraging, that the divided and confused American people were instantly rendered unanimous and certain.

Thus Hopkins wrote later of the President's "great relief at the method the Japanese used" in starting the war at Pearl Harbor.

On the night of Pearl Harbor Day, Hopkins wrote:

I lunched with the President today at his desk in the Oval Room. We were talking about things far removed from war when at about 1:40, Secretary Knox called and said that they had picked up a radio from Honolulu from the commander in chief of our forces there advising all our stations that an air-raid attack was on and that it was "no drill."

I expressed the belief that there must be some mistake and that surely Japan would not attack in Honolulu.

The President discussed at some length his efforts to keep the country out of war and his earnest desire to complete his Administration without war, but that if this action of Japan's were true it would take the matter entirely out of his own hands, because the Japanese had made the decision for him.

The President thought the report was probably true and thought it was just the kind of unexpected thing the Japanese would do, and that at the very time they were discussing peace in the Pacific they were plotting to overthrow it.

At five minutes after two he called Hull and told Hull of the report and advised Hull to receive Nomura and Kurusu, who had an appointment with him, and not to mention that he, Hull, had the news but to receive their reply formally and coolly and bow them out. . . . The President called a conference of Secretary Stimson, Secretary Hull, Secretary Knox, Admiral Stark and General Marshall at three o'clock.

The conference met in not too tense an atmosphere because I think that all of us believed that in the last analysis the enemy was Hitler and that he could never be defeated without force of arms; that sooner or later we were bound to be in the war and that Japan had given us an opportunity. Everybody, however, agreed on the seriousness of the war and that it would be a long, hard struggle. During the conference the news kept coming in.

Churchill called from England. The President told him that we were all in the same boat now and that he was going to Congress tomorrow.

The President discussed at length with Marshall the disposition of the troops and particularly the Air Fo and with Hull the urgent necessity keeping all of the South American publics not only informed but to k them in line with us. Marshall clearly impatient to get away.

The President also ordered Stim and Knox to order that careful gu be placed not only on our own arse but on all private munitions facto and all bridges. Many of the moves quired the President to sign an execu order. The President instructed the son to whom he talked to go ahead execute the order and he would sig later.

There was some discussion about President's message to Congress. I urged very strongly that the Presi review the whole history of the Japar relations in a strong document might take half an hour to read. President objected.

The conference adjourned about and the President then dictated to G (Tully) the first draft of his messag Congress.

Again the phone was ringing stantly. Jimmy (Byrnes) called up. Attorney General, Secretary of Treasury also called. Stark contin to get further and always more di news about the attack on Hawaii.

A Grave Hour in U.S. History

The Cabinet met promptly at All members were present. They for a ring completely around the Presid who sat at his desk. The President in a very solemn mood and told group this was the most serious Cab session since Lincoln met with the C net at the outbreak of the Civil War

The President reviewed the news. At this time we did not know whe or not Japan had actually declared on us.

Even at this time the President decided not to tell the Congressi leaders, who were waiting outside, cisely what was going to be in the sage. They came in at approxima 9:30.

The President outlined at some le the situation. . . . They asked whether he wanted a declaration of and what was going to be in the sage and he said he had not as yet cided. As a matter of fact the Presi of course, knew that he was going t for a declaration of war but he also k that if he stated it to the confere it would be all over town in five min because it is perfectly footless eve keep a secret. The legislative lea left.

Welles had a draft of a war mes which the President did not like though Hull pressed very strongly he use it. Hull's message was a l winded dissertation on the histor Japanese relations leading up to blow this morning. The President very patient with them and I thin order to get them out of the room haps led them to believe he would serious consideration to their draft

Waiters brought in beer and s wiches and at 12:30 the Presi cleared everybody out and said he going to bed.

There's A Trick To It

BY JOHN MULHOLLAND

Two objects cannot be put in one space at the same time. For instance, everyone will agree that nothing more can be put into a level-full glass of water without spilling some of the water. A magician, however, can put four dollars in silver coins into a full glass without spilling a drop. It is immaterial whether he uses four silver dollars, eight half dollars, sixteen quarters, or forty dimes. The glass will hold both the water and the four dollars.

The magician drops the coins, one at a time, into the glass. Actually he dips the edge of each coin into the water and then releases it. The coins must be put edgewise into the water and not dropped flat. As the coins begin to take up space, the water is seen to bulge above the rim of the glass, and it will run over the edges if one extra coin is added.

A glass with a mouth of odd size will hold more, or fewer, coins, depending upon whether it is larger or smaller than the usual water glass. The actual capacity of the glass will be found to make very little difference to the trick.

The secret is that the magician uses an absolutely dry glass and rubs his fingers around the edge before pouring in the water. There is enough oil in the skin to coat the edge of the glass and keep the water from overflowing. If the performer's skin is very dry, he can get enough oil by patting his hair surreptitiously.

Though the dollars, half dollars, quarters and dimes make stacks of quite different sizes, it will be found that the ordinary glass will hold only four dollars, before overflowing, and it is quite as impossible to put one extra dime into the water as it is to put in a fifth silver dollar.

...IN PARADES TO THE POLLS

THE Veterans of Foreign Wars organization is to be congratulated, we think, on having started what may become a widespread custom, namely, parades of patriots on May Day to counter the demonstrations of the Communists and their fellow travelers.

However, patriotic parades do not solve national problems, Communist or otherwise. Patriotism is an all-year affair, and it consists in freely admitting that your own country is not perfect, even though there is none better, and in trying to improve your own country.

We have good schools, by and large; but plenty of them are below par. Our cities and towns generally are the finest anywhere; but not one of them is as fine as it could be. Our people on the average are swell; but too many of them still are illiterate or half educated or dangerously bigoted or not healthy enough. So it goes.

The patriotic parades are fine, and we're for more and bigger ones as time goes on. But the parade that gets the concrete results is a quieter, less picturesque and dramatic one. We're speaking of the parade to the polls whenever an election rolls around. It is in this parade that the true patriot can most effectively register his or her aspirations toward a better country and a still healthier and stronger people. Are you marching in *that* parade; or is it just too much bother?

●

. . . ATOMS OUTWEIGH POLITICS: The atom is a very small particle of matter; but in at least one aspect we think it bulks rather large. It far outweighs, or should outweigh, politics and political considerations.

David Lilienthal's first term as chairman of the U.S. Atomic Energy Commission is due to expire August 1st. So are the terms of Mr. Lilienthal's four colleagues on the commission—Sumner T. Pike, Robert F. Bacher, Lewis L. Strauss and William W. Waymack.

As soon as President Truman nominated these men for reappointment the old fight started up in the Senate, on the same old political and patronage grounds. Something new was added, too, in the form of the contention that important public jobs of this kind should not at this time be made long-term affairs because there may be a Republican President after next January 20th.

We hope there will be no more of such fights. It is obviously bad and dangerous business to inject a pork-barrel element into this agency which has in its keeping the manufacture of our finest weapon and the prosecution of nuclear research on all fronts.

When the present Atomic Energy Commission took over, we were in a bad way in that respect. The atomic projects were headed for demoralization. The Atomic Energy Commission has tightened up and reorganized the whole layout, according to competent observers.

What else matters, in a government enterprise of this magnitude and importance?

And what kind of "statesman" is it who will try to bedevil with politics the Atomic Energy Commission and its manifold and intricate activities?

●

. . . IT MATTERS A LOT RIGHT NOW: Historical works are having a big run at present, especially those of Dr. Arnold J. Toynbee—the expert Somervell abridgment of Toynbee's A Study of History, and the eminent historian's new collection of essays, Civilization on Trial; Oxford University Press, New York, 263 pages, $3.50.

This is all to the good, we think, and history is about as rewarding a kind of reading as there is. It gives you a perspective on man and his earthly career as nothing else can.

However, there's one danger in it. The study of history may produce a far too philosophic frame of mind—a habit of shrugging off the tensions and griefs of the present time with the old reflection that, "Oh, well, it'll all be the same a hundred years from now."

Progress and improvements are hammered out—a British Empire founded, for example, or an American Revolution won, or insulin discovered—by people who are furiously discontented with things as they are in those people's own day, and too bad about how things may shape up a century later!

If the bulk of the human race ever takes to trusting time, fate or some other long-range influence to solve human problems, the green light will be given to some other species to take over the earth—the insects, maybe, or the big cats, or conceivably the snakes.

The person who lives in the present and struggles with current problems, with only an occasional philosophic shrug when things go wrong, is the one who leads a really constructive and often satisfying existence.

The "nichevo," "kismet," "so be it" folks aren't as happy as they sometimes look; and certainly they aren't pulling their proper weight in society.

●

. . . BALDIES AREN'T NECESSARILY BRIGHT: We take due note of the recent and widely publicized statement by the distinguished Irish anthropologist, Dr. R. E. G. Armattoe, to the effect that baldheadedness goes with high brain power oftener than not. A bald friend of ours has this to say about it:

"Well, yeah, I'd like to believe the professor. Gives you a very snug, very smug feeling when you read his remarks. However, when I look back on the numberless dumb things I've done, and look forward to those I'll inevitably do in the future, I seriously doubt that a bald dome means the guy underneath it is extra smart. He may be more than average active mentally—yes. But an active brain can skitter off on wild-goose chases and reach wrong conclusions just as easily as a sluggish one. So I don't know—"

We don't either. Guess we'll just file the brilliant-baldy idea in the same pigeonhole with the older notions that a redhead is invariably a fighter and that only a person having blue or gray eyes can hope to be a great man or woman.

"Do you think I could Model?" asked this mother

...ids turn green with envy to see how Judy and Bonnie, coached by Nicki, can swim. Even more im-...t, Mrs. Ellis is teaching them how to have a smile as brilliant as her own—a smile she trusts only to Ipana ...Vouldn't *you*—knowing that Ipana is the tooth paste dentists recommend and use 2 to 1, according to a re-...tionwide survey? Get a tube of Ipana today!

Photographers always told Nicki Ellis she had a "model" smile. One day she *did* something about it . . .

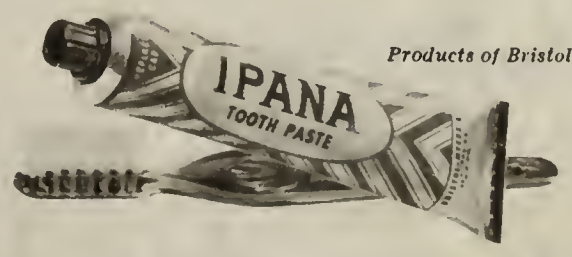
"...KI, WHY DON'T YOU become a model? ...A smile like yours belongs on maga-...vers!"

...'s what green-eyed, auburn-haired ...alph Ellis heard for years from her ...and photographer friends. (Who ...know the value of a smile better!)

...t made Nicki suddenly decide to become a model? You guessed it: rising living costs. This lovely mother put her smile (and what a smile!) to work—and is now one of Chicago's most successful models.

You may be sure that Nicki, who owes so much to her smile, teaches Judy and Bonnie to safeguard *their* smiles by following her own prized dental routine: *Regular brushing with Ipana Tooth Paste, then gentle gum massage.*

...your dentist's advice about gum massage. ...massage is so important to the health of your ...l the beauty of your smile that 9 out of 10 ...recommend it regularly or in special cases, ... to a recent national survey! *Help your den-... your smile of beauty.*



Big Sister Judy, a first-grader in school, leads the way for Bonnie, a kindergarten student, in their nightly care of teeth and gums. If *your* gums flash a warning tinge of "pink," *see your dentist.* Let *him* decide whether yours is a case for "the helpful stimulation of Ipana and gentle massage."

IPANA TOOTH PASTE
for your Smile of Beauty

My, how you've grown! Judy, 6 years old, and Bonnie, 5, love to pretend they're glamorous models like their mother. Which they may very well be, some day. For Nicki knows that a "model" smile depends on sparkling teeth—and that firm, healthy gums are important to sparkling teeth. Want to start *your* family towards "model" smiles? Start now with Ipana care.

Products of Bristol-Myers

P.S. For correct brushing, use the DOUBLE DUTY Tooth Brush with the *twist* in the handle. 1,000 dentists helped design it!

Blood—*a barometer of Health!*

Q. How do blood tests  help guard your health?

A. These tests help to reveal the condition of your blood so that your physician can detect "hidden" diseases that are often difficult to diagnose in their early stages. Many doctors use blood tests as a regular part of periodic physical examinations. So if your doctor suggests a blood test, don't worry. He is using, for your benefit, one of the valuable procedures of medical science.

Q. What does a blood count  tell your doctor?

A. Checking the number, size, shape, and condition of your blood cells is called a blood count. The number of red cells and the amount of hemoglobin in them is one of the indices which help reveal your general physical condition. A count of white cells may be of value in diagnosing certain diseases. It is sometimes combined with the sedimentation test, which establishes the time taken by blood cells to settle.

Q. What will chemical analysis  of the blood show?

A. Your blood is composed chiefly of water, salt, sugar, fat, and proteins. Chemical analysis of the blood is used to determine whether or not these and other components are present in normal amounts. This is important in aiding the diagnosis of certain diseases. For example, excessive sugar, salts or waste products in the blood indicate conditions requiring medical treatment.

IAT SHOULD YOU KNOW ABOUT THE BLOOD?

The blood serves as a transportation system within body, bringing oxygen, food, and other materials the body cells and carrying away waste products. e white blood cells and substances called antibodies p to keep the body healthy by fighting infection. ien certain antibodies are found in blood serum, y help in diagnosing a number of diseases.

During World War II, modern science proved dra- tically that thousands of lives can be saved by im- ved methods in blood transfusion. Research has discovered ways to extract many valuable medical nts from the blood. Among the most important are: *mma globulin* which provides immunization against asles; *fibrinogen* and *thrombin* which are used to control bleeding and to make surgical "sponges" which may safely be left in a wound while it heals; and *albumin* which has proved effective in treating certain diseases of the kidneys and liver.

Study of the blood as a means of aiding health is relatively new, but today, by co-operating with your physician, you can benefit from many advances that already have been made. There is real hope that future developments in this field will provide other important new weapons for man's war against disease.

The American Red Cross has prepared a helpful booklet on the blood and its relationship to good health, entitled "The Story of Blood." Through the courtesy of the Red Cross, the Metropolitan is able to send you a free copy on request.

Flying taxis, like this one, disgorge growing numbers of hunters on previously inaccessible hunting grounds. In time, they may destroy our last wildlife refu

GOODBY, WILDERNESS

BY BILL FA

CONSERVATION experts are fearful that low airplane transportation rates for anglers will destroy what remains of the American wilderness. You can now fly from various bases to previously inaccessible lakes for as little as ten dollars round trip.

Outdoor editor Bob Becker tried one of those $10 rides in Minnesota. "The fish taxi hopped off from Ely at dawn," Bob tells me, "and dropped me on a lake in Superior National Forest in half an hour. Twenty years ago that same trip took me three days by canoe."

Fish taxis pierce the last defense of the wilderness—remoteness—in the roadless area of Superior Forest which was established as a wildlife refuge in 1925. "The law banned roads," Becker says, "but it did not anticipate airplanes. Another thing, a few plots of land within the 1,700,000 acre reserve are privately owned, and the owners have built camps to lure the airplane trade. The conservationists cry that many lakes will be fished out in a few years. They say too, that species of game which can't stand heavy human traffic—the moose, for instance—will migrate or die out."

Numerous conservation agencies, including the Izaak Walton League, are urging legislation to outlaw fish taxis from all national park wilderness areas. The proposed legislation would prevent remote wildlife reserves from being turned into picnic grounds for fish-and-fly excursionists. It would not keep sportsmen who like to paddle their own canoes from enjoying their wilderness heritage. The Izaak Walton League has spent $70,000 buying privately owned land within the Superior wilderness. The land was reforested and sold to the government for $20,000.

"The monetary loss was worth while," Mr. Becker comments. "Here's why. Suppose you own 10 acres in the Superior wilderness. You can fly fishermen to your camp, then use the plane to drop them on adjacent lakes. From 10 acres, you can capitalize on 10,000 acres of wilderness. Something will have to be done about those camps still operating. Twenty commercial planes are flying out of Ely every day. Pretty soon they'll need a control tower."

It could come to that. Towers. Radio. Field lights. Operators calling. "Come in, northern-pike party from Lake Agnes—stay clear, lake-trout party from Saganaga—"

If it does, it will be the end of the wilderness.

HIGH MAN ON THE POLE

Which Olympic contest requires the greatest skill and endurance? Pole vaulting, probably. The winner will drop 14 or more feet into jarring sawdust from eight to 10 times—an ordeal in itself. Each time his pole hits the take-off box, he will blend 35 body movements in something like 1.02 seconds. His arms and hands will feel an impact force of approximately 1,500 pounds. In the air, moving 10-15 feet a second, he will turn upside down and push himself 2½ feet above his handgrip.

When Dutch Warmerdam vaulted 15 feet 8½ inches, his take-off speed would have carried a dash man 100 yards in 10.3 seconds. That's fast, when you remember Dutch was holding an eight-pound pole and the end of that pole was 13 feet 3 inches in the air during the approach. Exactly 13 feet 3 inches. Pole vaulters are precise people.

HOW TO LOSE THE ALL STAR

The National League trailed the American League, 2 to 1, when Enos Slaughter went to bat in the eighth inning of last year's All Star game with Willard Marshall (the tying run) on third base. Two out. Slaughter poked a slow roller to the right of second base. Shortstop Lou Boudreau gloved the ball and threw Slaughter out by three strides. Boudreau made the game-saving play look easy.

"Actually," an American League analyst said later, "Lou caught the catcher's signal, gambled Slaughter would hit a curve toward right, and was moving toward second with the pitch. No other shortstop in our league could have gone that far to the left. Appling's a good fielder, but he's getting old—can't anticipate with Lou."

Luke Appling, Boudreau's alternate, appeared only as a pinch hi

news about NYLON

D TO RIP! Nylon wind socks are so light, dry so fast, flutter in the slightest breeze, a sensitivity air- appreciate! Yet nylon is tough, not damaged by mil- —so hard to rip it stands up to the roughest weather!

FAST DRYING! That's the news about nylon swim suits! Relax on the beach—your suit's soon dry. Pack it—your suit won't be weakened by mildew or salt water. Nylon's the wise choice for serious swimming. Nylon fibers stay strong when wet!

Du Pont makes the nylon fibers used in the products shown. The manufacturers of these products use nylon because products made with nylon can have these outstanding properties:

- ✓ STRENGTH
- ✓ LIGHTNESS
- ✓ EASY WASHING
- ✓ LONG WEAR
- ✓ RESISTANCE TO MOTHS AND PERSPIRATION
- ✓ ELASTICITY
- ✓ TOUGHNESS
- ✓ RESILIENCE
- ✓ FAST DRYING
- ✓ CAN BE "SET" TO HOLD SHAPE

P.A. IS GRAND FOR CIGARETTE 'MAKIN'S' TOO. THAT CRIMP CUT MAKES IT SO EASY TO ROLL!

THE NATIONAL JOY SMOKE

KEEP UP WITH THE WORLD

BY FRELING FOSTER

A mechanized lunch counter, recently patented, prevents patrons from dawdling over their meals and lingering in their seats during rush hours. The counter and seats are mounted on a platform that moves slowly past waitresses who set the successive courses before each diner. Soon after receiving his dessert, the patron reaches the end of the line and must vacate his seat—as it drops through the floor.

The greatest living miniature writer is believed to be James W. Zaharee who, when not on tour demonstrating his skill, resides on a ranch in North Dakota. One of his incredible feats, accomplished not long ago with a fine pen and a microscope, was the printing of the some 270 words (1,175 letters) from Lincoln's Gettysburg Address on a human hair less than three inches in length.

At least one out of five Americans dies under some suspicious or unusual circumstance that necessitates an official inquiry into the actual cause of his death.

In a small Nebraska town several years ago, a man on trial for dynamiting a house was freed through the calculations of two astronomers. The only witnesses were two girls who testified they had seen the defendant near the house shortly before the explosion which occurred at three o'clock on a Sunday afternoon. Claiming they were coming from church, a mile away, they produced as evidence a snapshot of themselves on its steps taken a moment before they left "at about 2:30." As a shadow was cast by a part of the church, the astronomers were requested to estimate from its position when the picture had been taken. One came within 29 seconds and the other within 15 seconds of the actual time—21.5 minutes AFTER the explosion—which was determined from photographs taken on the same day the following year.

The king of American impost was Stephen Weinberg, alias Sterl Wyman and 24 other names. Brooklyn who, between 1913 a 1943, had one of the most fanta careers of its kind on record. P sessing colossal nerve and amaz acting ability, he frequently posed some official representative of U.S. government and took in ha famous visitors to this country. boldest fraud, perpetrated in 19 was taking Princess Fatima of ghanistan and her entourage to Wa ington and arranging a reception her honor at the White House wh he personally presented her to Pr dent Harding.

As the people of China constar guard themselves against loss of f (prestige), it is not uncommon fo wealthy citizen, thinking he might be given an appropriate funeral, hold the ceremony while he is a and able to superintend it hims Because such a procession, with several bands and scores of hired tendants, is regarded as the man's funeral, his family is obliged to into mourning for three years.

When the poisoning of enen reached an unprecedented scale 16th century Europe, a great dem arose for ivory drinking cups p portedly made from a "unico horn," owing to the belief that t counteracted any poison placed them. Consequently, these cups increased in price that one, bou for King Henry II of France in 1 cost a sum equivalent today to $1 000.

Unless directly inhaled, the po of goldenrod does not cause hay fe as it is too heavy to be carried distance by the wind.

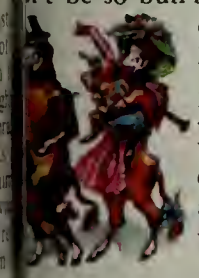
"What's wrong with marrying on a shoestring?"

ASKED ELSIE, THE BORDEN COW

"NO CHILD OF MINE will ever marry on any shoestring—like *your* niece Lulubelle!" boomed Elmer, the bull. "I contend that folks should have plenty of shoes to go with the strings and plenty of money in the sock, before they say *I do!*"



t if young folks wait to do said Elsie, the Borden "they may miss the excite- of making a little go a long . . and the joys of being with their children!"

at's beside the point!" lmer. "I give Beauregard Beulah everything they And, when it's time for them to marry, I'm not them do with less!"

Y CHATEAU-AND-EGG GRILL!" *says Elsie. "Just er a poached egg on hot toast, top the egg with slices of Borden's Chateau. Then pop under grill until the Chateau melts.* Swell!"

n't be so bull-headed, dear!" smiled Elsie. "It

develops a boy's *character* to have the responsibility of a family. And it's *fun* for a girl to help her husband and delight him with delicious, money-saving dishes—like the cheese omelets and Welsh rabbits you make with *Borden's* Chateau."*

"What in blazes has Borden's u to do with marrying?" thundered Elmer.

teau provides delicious, nutritious cheese eating for thousands of married folks—and their children—every day," answered Elsie. "It has such a rich, mellow-mild Cheddar flavor! And Chateau makes wonderful sandwiches. It slices, spreads, melts perfectly."

"Why, oh why," moaned Elmer, "did I ever let you go to work for Borden's?"

"Because Borden's makes such fine foods!" answered

Elsie. "Take their new *Lady Borden Ice Cream.* You never tasted ice cream like it—so rich, so smooth, so creamy. And every luscious spoonful brims with wholesome food energy."

"HO! HO!" chortled Elmer. "Better start feeding the young ones Lady Borden Ice Cream *now.* Maybe they'll build up enough energy through the years to marry on a shoestring."

"LADY BORDEN ICE CREAM *is made with the finest ingredients—and* tastes *it!" says Elsie. "Its creamy smooth texture and superb flavor make it a new experience in ice cream eating!"*

"*Do* be serious, dear," said Elsie. "Lady Borden is really wonderful *food.* It's made with pure, sweet cream, you know. The fresh fruits and berries used in it are of *superb* quality. And the chocolate and vanilla taste *so* distinctive and *so* good and *so* luscious!"

"And I'm so tired of it all!" sighed Elmer. "*Please,* Elsie, can't we end this without that same old line you've been using for years and years?"

"You mean—*if it's Borden's, it's GOT to be good?*" asked Elsie. "Why, certainly, dear!"

Ostrich omelet à la Mannix Petite

WHILE I.Q.ing ostriches for Ostriches Aren't So Dumb (p. 24) author Daniel Mannix decided to induce his five-year-old daughter Jule to pose with the jumbo sparrows. "I thought it high time she helped support me," he explains. "So far all the good we've got out of her was one picture with a skunk."

At the ostrich farm, Jule, who had posed with birds before (canaries), took one look at the ostriches, announced, "Those aren't birds, they're horses!"—and tried to leave.

Restrained, Jule was given an orange to feed the birdies. However, they turned up beaks at the orange, and before Jule could escape ate all the buttons on her dress and the ribbon in her hair. "I don't like things that eat your clothes," wept Jule later, and was quieted only when given an ostrich egg for an omelet.

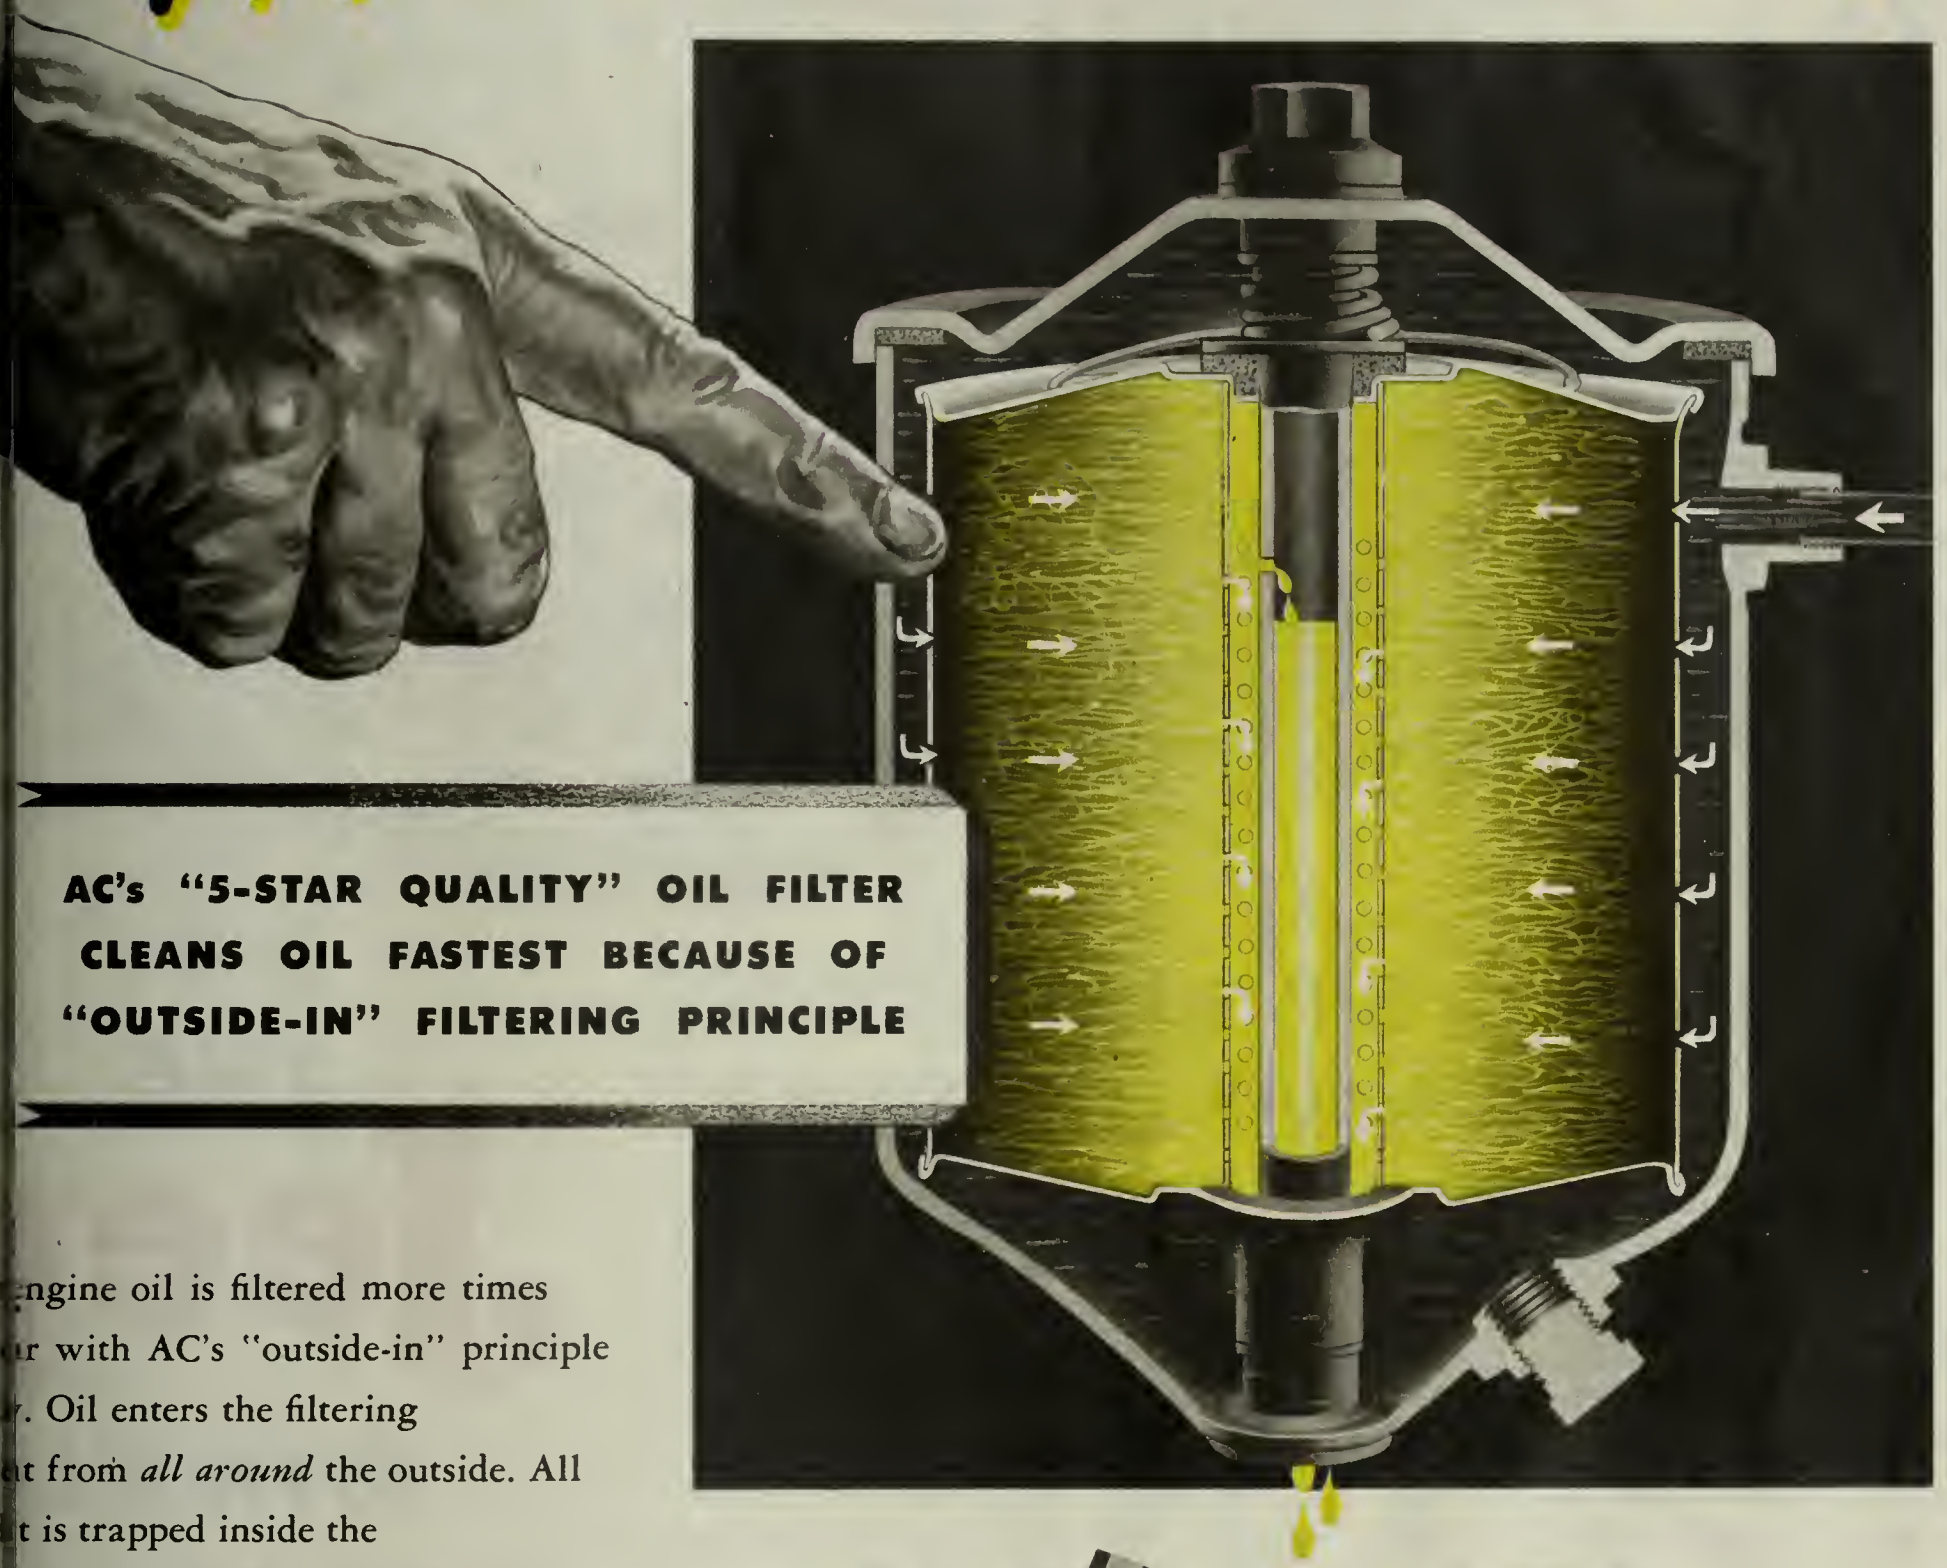
Whereupon Jule, Sr. (Mrs. Mannix), cried happily, "What a relief after sitting for days in a blind waiting for a wild bird to come and pose!" and climbed bravely into a pen of ostrichettes with her camera. Before she could put her head in the sand, the babies had devoured lens cap, pulled a lens loose, and swallowed her hankie.

Mannix says, "To get even, I insulted a fine big bird by yelling and waving at him—from behind a fence. He waltzed up and kicked a footful of sticky mud at me."

OREN ARNOLD reports that he had taken his little girl Gail to watch the fireworks. A dud rocket fell near them, and Daddy shouted, "Run!" to Gail. As he ran one way, Gail ran to the rocket. A fireworks man dashed up and kicked the thing aside, and as Daddy rushed to retrieve Gail, they all were showered with green stars. "I am still jittery after these years," Arnold says. "Gail is happy for the close-up of a rocket's big moment. The experience led to an introduction to Clarence Cronkite, the central figure of my fireworks story, Fantasy in Flame (p. 18)."

After some basic research, in which Mr. Arnold was further baptized with fiery Indian arrows, he concluded: "The men who devote their lives to the fun of fireworks shooting can have it; I'm a white-collar weakling myself."

THE comely Darby St. John, fiction newcomer (Mr. Spofford Isn't In, p. 13), calls herself a native of Wisconsin, Olympia, Chicago and Hollywood, in the order named. At twelve she found a typewriter at back of a closet, decided to becom writer. She spent a summer vacat pecking out a novel, resisting all treaties through the open window come out and play baseball. "T novel never got beyond the admi tion of my family," she confes "But something good did come of I learned to type with more than t fingers. I use three."



Another summer, while on a ja to Vienna, Miss St. John decided become a composer. "Wrote score for a U. of Chicago Mir show, later in Hollywood sold so music for pictures, and started nu bering symphonies 1, 2, 3, driving trepidly toward the magic numbe One day my husband asked wha hoped to do with the symphon I was stuck for an answer. I drop the scores in a trunk. Then late famous Hollywood clairvoyant t me she saw me selling a ms. in a gr cover. So I wrote a mystery no Put on a green cover. It sold."

OF THE new serial, More Bea ful Than Murder, which beg a pulsing course on p. 16, Octa Roy Cohen opines anything he mi say about it is too late to be u against him. The thing's done. himself, however, he relates bought a new home in Los Ange complete with electric-eye gara electric range and 15-year mortg He and Mrs. Cohen have converte lovely formal living room into a p hall. "Slowly," he details, learning to distinguish one end of cue ball from the other.

"I am not 'in pictures,' nor hav any ambitions that way, which pr ably makes me unique among wri who have migrated to Hollywo In response to a specific question yours, Mr. Shane, I don't know ravishing blondes, but I pass lots them on the street, and occasion meet a few of the better ones in dreams."

This week's cover: "Ooooh, Told!" Lorna Gail Gillam, six, of toria, Long Island, vacationing w her mama, photographer papa Papa's partner, Al Gianni, at Ma crest, New York, found a gurg little brook in the near-by boskin Daily Lorna took crumbs from dinner to feed the trout, kept chat ing about it. One day her dad, Wa Gillam, and Uncle Al accompan her down, photographed her just she stepped into the crystal-cool w to play. . . . TED SHAN

WILLYS-OVERLAND TRUCK NEWS

THE LINE THAT CUTS HAULING COSTS ADDS ANOTHER MONEY-SAVING TRUCK

Now, the 'Jeep' Panel Delivery takes its place in Willys-Overland's great line of 'Jeep' Trucks — the trucks that cut hauling costs.

Feature by feature, the 'Jeep' Delivery was engineered to be the new criterion for measuring long service and low cost-per-mile. It is powered by the 'Jeep' Engine, world-famed for getting extra miles from fuel, for endurance and for maintenance economy. The distinctive body is functionally designed to provide standard space, to achieve low weight with exceptional sturdiness, and to give easy access to wheels and engine. It is built to pay you dividends in more thousands of usable miles.

We invite you to see and compare the 'Jeep' Panel Delivery, on display at Willys-Overland dealers.

THE 'Jeep' PANEL Delivery

WILLYS-OVERLAND MOTORS, Toledo, Ohio

MAKERS OF AMERICA'S MOST USEFUL VEHICLES

The 'Jeep' Delivery is highly maneuverable in traffic, takes narrow driveways and sharp turns with ease. 104-inch wheelbase — turns around in a 35-foot circle.

Independent front-wheel suspension gives the 'Jeep' Delivery a smoother ride on rough streets, makes steering easier and lengthens tire life. Both wheels maintain nearly vertical position as they pass independently over bumps and holes.

The 'Jeep' Delivery parks in small spaces— overall length is 175 inches. Note commonsense fenders designed to avoid damage high curbs and hooked bu

MR. SPOFFORD ISN'T IN

BY DARBY ST. JOHN

A foolish boy and his girl's money are soon parted

N a green-and-gold office on the Sunset Strip, a large young man named Morgan Anders, with short sunburned hair, a tortured expression and guileless light brown eyes, answered insistent ringing of his phone. On the wall ve his head hung an ancient gold tapestry from friend King Bog, in appreciation for a World s article of Morgan's, praising his country's el cheese. On the desk was a pile of bills, a of Today, and a half-finished article in a port- typewriter.

Hello," Morgan said.

Mr. Spofford, please," a terse but lovely female e said.

H. O. Spofford?" Morgan said. "He isn't in, ey."

You've said that three times before."

hate to keep disappointing you," Morgan said. y I help you, honey?"

"I prefer to speak to Mr. Spofford personally," the voice said coldly. "If you'll tell me when he will be in—"

"Honest, I couldn't say," Morgan said. "He's in and out. You have a lovely voice, angel. Could I give Hiram O. Spofford any message?"

"What I have to say had better be said in person."

"Temperament, too," Morgan said admiringly. "Have you got red hair by any chance?"

"By a strange coincidence I have," the voice said grimly. "You can tell your Mr. Spofford that if I don't get satisfaction over the phone, I may come out in person—swinging."

"Bring your brass knuckles, hon," Morgan said. "He has a thick skull." . . .

Two years previously, Morgan had spent several months abroad as a foreign correspondent for World Press. He dashed off reports from Trieste, Cairo and Delhi in a colorful, punchy style, and matched coins with practically anybody in a succession of colorful bars. Between Delhi and Athens his transport crashed. He got out of the hospital with a broken arm, assorted scars, and he was flat broke from playing parcheesi with the other patients.

The home office wired him expense money and sent him on to Athens, then Iraq. He continued pecking out sensational articles on his portable, and losing his money. In Palestine he wrote the piece that won him the International Award for the best reporting of the year, and lost four months' pay in a crap game in the Royal Palms bar. Between Ankara and Marseille he crashed again. He came off this time with a platinum plate where it didn't show, and a wire from Ridgeville, Vermont, which caught up with him in the hospital, stating that his Aunt Matilda had died and left him five thousand dollars in cash. *(Continued on page 49)*

d you forget our luncheon te, Morgan?" Madge asked. urely you jest, sugar?" he d. "Red and I merely—" erely nothing," Madge said. 's written all over you!"

ILLUSTRATED BY EARL OLIVER HURST

INHUMAN NATURE

BY TED SHANE

THE sun is bright, a bird tootles happily in a tree, there is a sparkle on the water hazard among the glittering greens of the Missannokkit Golf Course. Standing in the rough off the 6th green is Miss Deeds, secretary, vacationing at the lodge, and about to make a recovery shot.

Resting on a blade of grass touching Miss D.'s left leg sits an almost invisible reddish character known as a chigger. He is awfully hungry, and just as Miss Deeds swings he makes a quick leap, lands on her lovely leg, tucks his napkin under his chin and starts luncheon.

As Miss Secretary moves on toward the green, she absent-mindedly reaches down and scratches her pretty limb.

If she keeps scratching, by that night Miss Deeds' leg will be decorated with several white bumps at the scene of Mr. Chigger's attack; and sometime during the second day, a small blister will appear at the center of inflammation. Broken by her frenzied scratching, it will leave a bright red area which will itch for from four to ten days—ending just in time for Miss Deeds' return to her desk after her two weeks with pay.

Not that one chigger can ruin a summer, but if Mr. Chigger has been joined by an army of his hungry relatives, Miss Deeds may lose sleep, develop a fever, not eat, and reach the verge of insanity before the chigger bites subside—the vacation she looked forward to all winter thoroughly ruined.

For summer is the season of war. In winter man has but one enemy to battle: cold. It is comparatively simple to prepare for the chilblain, the frostbite and the pneumococcus. Summer is total war. Nature awakes in all her glories. Zillions and zillions of insects, seen and unseen, and equipped with every mechanized device, mobilize in field, swamp and pantry and move to the attack of fun-seeking, relaxing man.

Invisible pollen takes off from beautiful flowers and strikes, setting up allergies which turn heads into dripping sponges, cause sniffles, burning eyes and a mad desire to get away from the flowers, grass and trees. The reptile lurks in the bush, and the friendly, life-giving sun beats down on the beach, eager to turn the careless bather into a mass of raw steak, extra rare. Poison plants exude torture; and even the lightning can set up a psychic discomfort you can't scratch.

Summer, in other words, can be thoroughly miserable—unless you are aware that the hard-working employees of many of our Health, Army, Agriculture and Security Agencies have come up with some remarkable powders, liquids, devices and ideas to defeat the fun-spoiling hordes.

Take the case of Miss Deeds and the chigger. This mity little fellow, sometimes called the red bug, is an almost invisible pest in the larval stage who bites folks only from Long Island to Mexico, and from the Atlantic Coast to the Rockies, and usually from early summer to October.

For some time the rumor has persisted that chiggers actually burrow into the skin, settle and raise families. This is not true. Chiggers merely attach themselves to your skin, sip your plasma, and in return, deposit a poison which gets into the blood stream and causes a maddening itch. You won't die from chigger bite, by the way, as Mr. Chigger isn't known to carry any infectious diseases.

Well, what can be done about chiggers? Unfortunately DDT doesn't work well on chiggers. Spraying your clothes with DDT, for instance, does little good, for the chigger is a speed-ball. He gets aboard and gets his drink of blood before the DDT can get him.

Department of Agriculture entomologists tell you this. To repel chigger invasion on your lawns and fields, spray them with DDT or sulphur. Should you be off for a hike over the meadows, or out for some golf, spray your socks and pant legs thoroughly with benzyl benzoate. If you're planning a hike through dense underbrush or forest, wear tramping boots or leather leggings, and spray the rest of your clothing. Where modern miticides aren't handy, old-timers prescribe sulphur, or a kerosene spray. Sulphur, of course, doesn't have the fragrance of I Surrender, Dreamboat.

If, in spite of your precautions, chiggers establish a beachhead on your tender hide, you can blast them out by sponging yourself with kerosene, or 95 per cent alcohol, followed immediately by a bath with a strong soap, allowing the latter to remain about 15 minutes before rinsing. Should you begin itching after this treatment, whatever you do, don't scratch. Salve up with mentholated ointments or collodion ("new skin"). This soothes and prevents infection—on infected bites use Mercurochrome or iodine.

Senior partner in bloodthirsty crime of the chigger is the tick. This mechanized mite can be a dangerous disease carrier. Tick paralysis, tularemia, American Q fever, the newly discovered Bullis fever, and the deadly Rocky Mountain spotted fever can be tick-borne. From 20 to 30 per cent of Rocky Mountain fever victims die.

As dangerous as a reptile, this little louse can louse up your summer. Living in high grass, bushes and small trees, and very partial to the Southern states, ticks can be found not only on picnic grounds, but in Northern cities. This is because, being extremely partial to animals, it climbs aboard Rover as he romps by in a meadow.

The tick just loves it indoors. When Rover brings him home, he heads for a crack (he prefers ceilings) or snuggles under a rug and sets up house. Uninformed about birth control, Mrs. Tick can lay as many as 6,500 eggs in her life span. All the little ticks then must grow up and be fed—by your dog, your mice or yourself and children. Impervious to drought and cold, ticks live to hoary old ages. Why they haven't taken us over, nobody seems to know.

The deadliest insecticides seem powerless against the tick. DDT makes him a little drunk, and that's about all. So entomologists, though they throw up their hands at eliminating the tick in large areas, recommend you burn off the dry grass and underbrush of lawns and fields in the spring and fall, thus cremating Papa, Mama and the zillion Junior ticks. Then crop your lawns close, and spray them, your sidewalks and driveways with 10 per cent DDT powder at the rate of 10 ounces per 1,000 square feet. This may not kill Mr. Tick, but it will give *(Continued on page 60)*

MORE BEAUTIFUL THAN MURDER

Nulty got more and more boisterous. He was annoying the guests, particularly some of the ladies, and I felt responsible for what was going on

BY OCTAVUS ROY COHEN

I

THE late afternoon sunshine streamed in through the windows and traced a precise pattern on the floor. Nothing fancy. Nothing gaudy. Just a series of parallel black lines.

That was because the windows were barred. The sunshine could get in. Nothing could get out.

This was November 25th. Less than a half hour previously the prosecution had announced that it rested. The judge had taken his cue and called it a day. The jurors were given the customary instructions about not discussing the case. It was The People of the State of California versus Steven Blake. Seven million people in California, and only one of them named Steven Blake. I was that one. It was pretty tough odds. Especially since the charge was murder.

The jailer walked down the corridor, his heels sounding a rhythmic tap-tap on the concrete floor. He rattled some keys and inserted one of them into the lock on my cell door. The door creaked a little as it swung open, and he jerked his head at me.

I followed him down the corridor, through some more barred doors, and thence downstairs to what they call the Lawyers' Room in the Los Angeles County Hall of Justice. It was a big room, filled with long benches on opposite sides of wire screens. Prisoners were supposed to sit on the safe side, with their attorneys facing them. They could talk, but not touch.

For perhaps thirty seconds I sat all alone. Then a door opened and my attorney bounced in.

Brian Garland looked as cute as a cherub in a painting by an Italian master. He was thirty years of age, short, chubby and bright. His light brown hair was very sparse, and he had wide-open baby-blue eyes, which gave him a juvenile expression. He'd been a friend of mine since college days, and I had a good deal of confidence in what went on behind those eyes. Not that it was doing me any good. They had me out on a limb, and the district attorney was working on that limb with a sharp saw.

Garland had been well trained in law. He'd had a fine legal education and had put it to best advantage. During the war he had served overseas in the Judge Advocate General's department. I understood that he had done a good job.

He seated himself opposite me. He was trying to look optimistic and not quite bringing it off. He made a few remarks which were calculated to cheer me up, and then he said, "Tomorrow we start."

I said, "Start what?"

"Our defense."

"What is it? What've we got?"

"The State's case is entirely circumstantial. They haven't produced one piece of direct evidence, not one."

"Meaning that nobody actually saw me kill Jeff Nulty?"

"Right."

"Do they usually have eyewitnesses?"

"We-e-ell . . ."

I said, "Don't try to kid me, Brian. They've done a good job. They've established motive, intent and opportunity. Not one single witness has deviated from the truth. Right?"

"Yes . . . but look, Steve; it really is difficult to convict on circumstantial evidence. So long as no one actually saw the killing, there's always a reasonable doubt. And on reasonable doubt, the jury is supposed to acquit."

"You think it will?"

"There's always that hope."

"Man to man, what's your honest opinion?"

Brian Garland let his worry shine through his eyes. He said, "I'm damned if I know, Steve. You can break down the best circumstantial case in the world if you've got a single piece of proper evidence. It's incredible that no one saw you leave Jeff Nulty's apartment, no one saw you walking home, no one saw you going into your own place. I'd hoped that all the publicity we've been getting would produce one alibi witness."

I lighted a cigarette and tried to focus my mind on something in my background that could help us, that seemed pertinent.

THE trial that was nearing its end was the only really dramatic thing that had ever happened to me. I'd been an average kid in an average family. I'd had a better-than-average basic education and had put in a lot of time at the California Institute of Technology, grabbing off a few degrees, the last one of which classified me as an aeronautical engineer. I hadn't even known the high spots or the agonies of war. The government had decided that I could be more valuable in research and plane designing than I would ever be shooting a gun, and that's the way I had hibernated during the hectic war years.

It was indescribably odd to be talking to Brian through a steel netting. We had talked lots of times before, but without urgency. We had spent long evenings in his very smart little apartment—or in my much more modest one—partaking of good Scotch, not getting excited about things that weren't worth getting excited about. But this was different.

I said, "Tomorrow morning, the defense opens. How many witnesses have we got?"

"None."

"Do you intend to put me on the stand?"

"Good Lord, no!"

"Why not?"

"Because you couldn't say anything that you didn't say when you pleaded not guilty. And on cross-examination, the State would crucify you."

I said, "I know the jury is not supposed to be influenced by the fact that the defendant doesn't take the stand. But just the same they are, aren't they?"

"Ye-e-es. But not as much as they would be if you got up there and told the truth. All you could do would be to say that you left Nulty's apartment at nine o'clock, walked home, and stayed in your own rooms until the cops picked you up the next morning. I've brought out all of that on cross-examination. The D. A. is a smart cookie. He'd make you sound like a liar whether you were or not."

I argued the point with him. I said I hadn't killed Jeff Nulty, and wanted the privilege of saying so. Brian got pretty excited about that. He said that my proposed simple statement of fact wasn't going to get me anywhere. He said the truth wasn't worth a plugged nickel unless it sounded like truth. He admitted that he wasn't optimistic, but he promised to shoot the works when he addressed the jury. He was going to hammer on the circumstantial-evidence thing; he intended to deride the State's failure to produce a single witness who had seen Jeff Nulty killed.

The more he talked, the weaker it sounded. It's all very well to say that under the law a man doesn't have to prove himself innocent, but actually he does.

Not much proof is required. But some. Just enough so an honest juror can say to himself, "Maybe the poor guy *is* telling the truth."

Garland said, "If there were just *one* person. Anyone. Think, Steve."

I shook my head. "That's all I've done since my arrest," I told him. "It still comes up zero. I didn't see anyone I knew after I left Nulty's apartment."

"But it's incredible—"

"I know. The truth often is. You've done all you could, Brian. You've had nothing to work with. If you insist that I stay off the stand, I'll stay off. And while you're making your address to the jury, I'll help all I can by keeping my fingers crossed."

"We've got fifteen hours, Steve. Miracles can happen."

I smiled at him. He needed plenty of reassuring. I knew I was innocent. He believed that I was. He'd gone all out on the publicity angle right through the trial, playing along with the press, encouraging them to print as many pictures of me as he could get his hands on, in the hope that someone would remember having seen me going back to my apartment on the night of October 4th at the time I said I did.

That was the case. All I needed was the tiniest bit of proof that I had told the truth about that to the police; the faintest bit of evidence that I had been at home at ten o'clock that night.

They knew definitely that Jeff Nulty had been shot at exactly ten o'clock. The shot which killed him had been heard by a dozen people. The time had been established by a procession of witnesses.

My only defense was that I had left Jeff Nulty at about nine o'clock, that I had got home at nine twenty, that I hadn't left my apartment until the next morning when the cops came.

But no one had seen me. No one had telephoned me just before or just

here is danger at our shows," Mr. kite frankly warns. "Most of it is o us who shoot the fireworks, but spectators. We know the danger act accordingly. The folks out seem to think that entertaining annot hurt them personally, even gh it could burn houses down."

ter Cronkite's big show in the Bowl in 1945, a fourteen-year- boy got into the stadium and d up a dud, or unexploded mor- ne of those things that go up to an umbrella of colored stars all the sky. How he got through the , through the special police lines, through Cronkite's own guards technicians, is still a mystery, but are geniuses at evasion. This un-

ightly fireworks program enliv- the State Fair of Dallas, Texas

RAPH FOR COLLIER'S BY HY PESKIN

fortunate lad lost an arm when the dud exploded.

Fireworks exhibitions seldom last more than 40 minutes, but preparation starts weeks in advance. The first move is to draw the set pieces on graph paper in five-color outline.

The technicians then convert the graphs into "sets," which usually are made up of one or more frames, each a standard 5- by 10-foot size. Smallest sets usually take four frames, tied together. Some require 50 or more.

Cane or rattan is nailed on the frames in exact enlargement of the picture on the graph paper. On this rattan is built the actual explosive material.

"Lance" is the basic material. One lance looks like a cigarette in colored paper. Lighted, it will spew flame to match its paper color. These are glued end up on the rattan, one every four inches or so all around the picture. Many thousands may be used in one show.

Mixing the lances to get desired color effects is part of Mr. Cronkite's art. In general, strontium is used for red fire, barium for green, sodium for yellow, copper for blue, and magnesium for white.

How Picture Is Set Ablaze

When all the lance is fixed to the rattan pattern, quick match is strung and tied on top of the lance with ordinary twine. Technicians may have to tie as many as 50,000 knots on one show. Quick match is a cord impregnated with gunpowder and wrapped in brown paper, quite unexciting to look at but full of potential action. Half a mile of the "match" may be required to cover the lance on one big set. And yet, when the technician touches a flame to one end of it—"SS-S-S-S-s-s-s!" the whole picture bursts into flame in less than five seconds.

Shows over water are the most effective because spectators get the advantage of reflection, and danger is minimized. Probably the biggest fireworks exhibition ever seen was presented by Cronkite in May, 1937, to celebrate the new Golden Gate Bridge. It was staged over the Gate itself, with five locations extending two miles from the mountains on each side right on over the water, and all firing simultaneously.

But Mr. Cronkite is dreaming even more grandly now. Californians have been talking about having another World's Fair or Exposition. He wants to open it with pageantry on a supercolossal scale.

"We could have captive balloons a mile up in the sky," he muses, "and string our set pieces between them. These could re-enact the gold rush of 1849 in fiery transformation, with human figures 2,000 feet tall. Airplanes could paint scenes with the new phosphorescent smoke in colors. And if there's any kind of small atomic piece available by then for entertainment, why maybe we—"

Fantastic, surely. Just dreaming. But incredible things happen when Americans dream; and Cronkite, a round, baldish, passive, average-looking man, has a mind geared to spectacular things. ★★★

THE UNDEFEATED HEART

BY JOHN AND WARD HAWKINS

This is the story of David Perry, the winning captain of a losing team

HE WAS stopped twice before he reached the committee room. A girl, a polite and smiling girl with shining blond hair, asked for his autograph. Her pen was an American instrument, sleek and somehow cartridged to write until the day after forever. He wrote his name, adding, Captain, International Team, '47. Then a reporter asked what he thought of Wonderly, the weather, and the outcome of tomorrow's matches. He gave the man the usual answers, quickly and without effort. The course was superb, though a bit soaked. The weather was unfortunate, but it didn't matter, really.

"The odds are five to one, Mr. Perry. Against you."

He smiled. "So I understand."

The reporter had other questions, none new, none important. Certainly none that would have been given space in the meager newspapers at home. Again the answers came easily. The American women were lovely. The coming matches would undoubtedly further a warm understanding between the sporting peoples of both countries. He was properly appreciative of a land where one could buy anything without a ration stamp. He liked the food and drink. And the fruit. . . .

The reporter said, "What'd you and Farrar tangle about?"

"But we didn't," he said.

The lie was no good. The reporter shook his head. He had a foxlike grin, a sharp and pointed f "You're having a special meeting, said. "Not just for kicks, and not cause you love the guys. There's t ble in it somewhere. Give me y side, and I'll give you a break."

David Perry said, "I'm afraid yo wrong."

"Okay," the reporter said. your funeral."

Perry smiled. "Sorry," he said.

He went on to the committee ro They were waiting for him the

Perry looked back over the rolling green. Luck and a desperate scrambling had kept the match even thus far, but it wasn't enough. The Americans were winning

rrar and Ekstrom, and two of the unger men, the known and cele-ated faces.

"Perry," Farrar said. "Come in." He moved toward them, past tall ndows that looked out on the deso-e sky, the cold and never-ending n. They waited in guarded quiet. ey weren't unfriendly, but they re a group with a group's tight al-iance, and he was a stranger here. Tom Farrar said, "We were about give you up."

"One of the reporters stopped me," Perry said.

He saw the look that ran between them, the wordless closing of their ranks. Farrar said, "Oh?" and left it there, as if waiting for reassurance. Bill Ekstrom—Wild Bill, the nonplaying captain—was a blunter man.

"Did you tell him about this?" he asked.

"Hardly," Perry said. "He seemed to have the outline, though not the facts. He was most unhappy with me."

Ekstrom said, "Good. Let's get on with it."

They did it quickly and rather well. They ignored the major point at issue—the rule which plainly stated that filed irons would not be used—to bring other guns of argument to bear. He did not understand the American gallery. Americans paid to see the spectacular. Unless the scores were low, there were no galleries. Golf was a business; as a professional, he understood that. The Americans had been using filed irons for some time; overlooking, by tacit agreement, their own rule against them. Such clubs did cut scores where the course was dry, the greens fast.

But on a dry course, mind you. A man could fish for salmon on the greens here. Wonderly was a swamp now, and the weatherman said they could expect a gale tomorrow. A man didn't need backspin to hold a pitch shot on a green when every pitch shot dug in exactly where it landed. So the filed irons didn't matter, did they? Except to the Americans. They had been playing with them for months. They were used to them. It would hardly be fair to ask them to play with strange clubs. The Americans wouldn't ask his team to do a thing like that.

"I see," David Perry said.

The answer was no, but he had known it would be. He found his attention wandering while Ekstrom talked. He was tired. He had come in off the back nine an hour ago, and the bitter chill of the rain was still in his back and shoulders. The cold struck deeper into the bone with each passing year. He was too old for this sort of show. All the men he'd brought with him were. Fowler, the youngest of the lot, was past thirty-five.

Ekstrom was talking about newspapers now, the importance of a good press. "This is off the record," he was saying. "For the good of the sport . . ."

Perry's mind wandered again. Wild Bill had been a great golfer, long off the tees, superb on the greens, and now he was a maker of nonsense speeches, soft and fat and almost bald. He knew he was talking rot, of course, and yet he managed an air of great sincerity. A bad go, Perry thought. But at least he's out of it. He doesn't have to worry about the rain.

IT WAS over; the Americans were leaving. Ekstrom came around the table to stand beside David Perry's chair. His eyes were troubled. "These things come up," he said. "It's no fun for me, Dave."

David Perry said, "It's not important, really."

"I've been thinking," Ekstrom said. "You beat me once. I beat you once. We were going to play the rubber match, remember? Then the war got in the way." He put his hand on Perry's shoulder. "You're looking good. Time hasn't hurt you much."

"Nor you," David Perry said.

Ekstrom's smile went out. "Quit it, Dave. I know what I look like. Time catches up with all of us. He'll be crowding you one of these days. Why, you're only about three years younger than I am."

"About," David Perry said.

They left the committee room and went down the crowded hall. The locker room was in a far wing; Ekstrom stopped at the entrance to the bar. "Good luck," he said, and lifted his hand. "Give them hell out there."

David Perry smiled his thanks, and to Ekstrom's retreating back he said softly, "You had it wrong, you know. You're not the older. You're just forty. I'm past forty-one."

Three of his teammates were waiting in their assigned corner of the locker room. Fowler and Lynch were dressed for the course. Sam Webb was toweling a hide as pink as a baby's with hands so brown he looked as if he were wearing gloves.

David Perry said, "I had no luck with them."

He watched their faces, watched each accept the fact in his own way. John Fowler's mouth tightened and he swore. Lynch was a quiet man. He held his thought, his anger, tightly within himself. And Sam Webb laughed. He threw his towel at a container and began to dress.

"I hope you screamed a bit," he said.

"He couldn't." There was an undercurrent of harshness in Lynch's quiet voice. "We're guests here. It isn't sporting to complain while enjoying the lavish hospitality of the country."

"That's no good," Fowler said. "That doesn't help."

Lynch said, "Shall we go do our tricks for the lovely people?"

"You'll feel better after you hit a few," Fowler said.

THE two moved away, nailed shoes clattering on the smooth concrete of the floor. They were alike in size, compactly made. Small, in spite of their shapeless waterproofs. Small? David Perry wondered how that could be. None of the team had looked small at home, or on the ship coming over. Perhaps it was the vastness of this land, or the rawboned height of the Americans that made them seem so now.

Sam Webb said, "What's on for this afternoon?"

"Pictures for the press and newsreels," Perry said. "They want all ten of us for that. Then a presentation."

"Golf bags for both teams," Webb said. "Very handsome and only a little smaller than a Mark IV tank. I saw them." He knotted his tie, then turned. "All that leather. At home it would make boots for a regiment."

"Yes," Perry said. "But we are not at home."

He thought of that a dozen times before the day was gone. He sat on a low platform, with the others of his team, and looked out over the long and crowded ballroom. An earnest and florid man whispered into a microphone, and a public-address system magnified his voice as he told the crowd of the great importance of tomorrow's matches.

Perry watched the slow turn and swirl of the crowd. The face of America—the shining hair, the well-shod feet, the New Look—the contented and questioning and friendly face of America. He thought of home, the people there, and knew the lift of an emotion as old as his stay here, and still without a name. Not anger, exactly, nor bitterness, nor envy, nor sorrow, but compounded of all of these and his pride in his native land. The contrasts were inescapable. He saw the plates at home, the laden

BARRY GO BRAGH!

BY IRVING WALLACE

Since Going My Way, Barry Fitzgerald has been rich and famous. Life in Dublin was never like this

FOUR years ago, a Hollywood character actor named Barry Fitzgerald, a man with the face of a discarded walnut, who had been signed by Paramount to play stray drunks and rheumatic grandpas, was summoned to the front office to discuss a new picture. There he found Leo McCarey, the producer-director, and Bing Crosby, the golfer, waiting for him. The two studied him in the manner that county fair judges study livestock.

At last McCarey spoke. "Bing, for my money he's the priest."

"Yeah," admitted Crosby. Then, to Barry Fitzgerald, "You look all right to me, Pop. Only one thing, you'll have to gray your hair."

Barry Fitzgerald looks back on that day with a certain amount of wistfulness. Though he was fifty-six years old then, and is sixty now, Barry feels that he left his youth behind at that historic meeting. For, he recalls, it represented the last time anyone was to suggest that he artificially gray his hair. "Today, I've got my own gray hair, genuine gray," says Barry sadly, patting his sparse shrubbery. "And it all started with that meeting."

As any close student of American history is aware, the confab resulted in Barry Fitzgerald's playing the crotchety Father Fitzgibbon of St. Dominic's Church in Going My Way. To this role Barry brought all his personality tricks, such as peering over the tops of his spectacles in the manner of a guilty spaniel (causing one fan magazine editor to coo, "You're much cuter than Cary Grant"), as well as his ability to act. "The acting of Father Fitzgibbon was easy," Barry says now. "My part of Ireland was 90 per cent Catholic, and I knew almost all the old-timer Irish priests. I just made up I was one of them."

Making up he was one of them transformed his life—won him a gleaming, gold-plated statuette for the best supporting performance of the year, won him a fat new contract guaranteeing better than $75,000 a picture, won him celluloid immortality (even the most critical agree that his characterization of Father Fitzgibbon will be remembered as long as the magic lantern is a major form of amusement). Along with such riches, Barry Fitzgerald also acquired gray hair.

It will be difficult for the layman to understand how success and an annuity can turn a man's hair gray almost overnight. But consider. First came the mail, in wave after wave. "Letters by the hundreds," recalls his secretary, a well-upholstered blonde who also doubles as Lizabeth Scott's stand-in.

"After a while we could guess what the letters were about just by the way they felt. For example, the thick eighteen-page ones were hard-luck stories, appeals for money. Mr. Fitzgerald still gets these. Then the thin, scented letters. Proposals and love letters from lonesome women. I tear these up without showing them to him. He's a confirmed bachelor, and they'd embarrass him. Recently we were getting letters from people who think that their relatives or friends look exactly like Mr. Fitzgerald. Now we're getting mail from people who knew Mr. Fitzgerald when."

In one case, a woman in Manchester, England, hoeing her little garden behind a second-run cinema, heard one of the actors' voices wafting out of the theater. She stiffened. "B' gorra," she said to herself, "that's Billy Shields." Sure enough, when she went around to the front of the theater, she found Billy Shields had changed his name to Fitzgerald and was playing in Going My Way. Again, there was the letter from National City, near the Mexican border. "I saw you in Welcome, Stranger, and your face is familiar. I played rugby in 1903, back in Dublin, with a young fellow nicknamed 'Moses'—'Moses' Shields. I swore he'd never come to any good end. Are you the one?"

To which Barry replied, "You're right—he came to no good end."

Answering this deluge of communications is about as jolly fun as making out an income tax form every evening. Sometimes Barry thinks he would like to be back on his presuccess schedule—one letter, once a year, to his elderly sister in Dublin.

But correspondence is only a mild depressive. Far worse is the knowledge that, emerging into the street, he will be as inconspicuous as an escaped panda. After Going My Way, Barry found himself constantly embarrassed by an assortment of kindly Catholic fathers. On the street they pumped his hand and glowed at him, thanking him for what he did for them in the film, and exclaiming, "Shure and only a good Catholic could have played the part like that!" It is difficult for Barry to tell them he is a Protestant.

A Refugee from Publicity

It is the same everywhere. In the summer of 1945, Barry flew back to Ireland on his first visit in ten years. He remembered the Dublin of his middle years as a peaceful oasis. "For fifteen years I was an actor there," he says, "and nobody gave me any more attention than the milkman or the hod carrier. I thought it would be the same when I went back, but the movies just make that impossible. It was all flattering, moving—but I ended up spending my whole stay in Ireland on a friend's boat in the Atlantic."

Several months ago, in Manhattan on location, Barry found himself assaulted by bobby-soxers. After three such pitched battles, he retired to his Alamo, an obscure hotel room, and sweated out his stay with two other bachelor co-workers and some liquid refreshment.

But Barry has not gone down without a fight. He counteracts his prominence by trying twice as hard to live as he has always lived. It sounds like a Hollywood cliché, but it's true about Barry Fitzgerald. He doggedly sticks to his old ways.

Every Sunday morning he glues onto his English-made motorcycle and goes bouncing off on a half hour's ride to breakfast with nonprofessional friends. Almost every evening he dines with his actor-brother and his brother's wife at their home. Once he visited a night club in Hollywood and was almost blinded by the smoke. He still avoids the fleshpots.

Most movie people live in fashionable Toluca Lake and Beverly Hills, but Barry dwells in an ancient five-room house (there are rumored to be flints imbedded in the walls) in mid-Hollywood. He shares his diggings with an Iroquois Indian named Gus, who mixes the drinks. Barry remains utterly unaffected, attired in a reeking cherry-bowl pipe, brown trousers that bag at the knee, suit coats without padding, shoes battered and broken at the seams. Recently, friends asked to see his Academy Award Oscar. He searched for fully five minutes before he found the statuette—at the bottom of a drawer with some old socks.

But though he hangs on to his old strange way of life, it is no longer the same for Barry, nor will it ever be again. Because he is no longer a character actor. He is a star. A star is simply someone, anyone, whose name on the marquee encourages people to come in off the street. Barry Fitzgerald possesses something that pulls 'em in—a talent for acting.

In Hollywood, real acting is as rare as a 25th wedding anniversary. But now that Barry Fitzgerald has again proved to producers that audiences can detect the difference between acting and breathing hard, and will pay for it in the legal tender of the realm, the fine art may again become fashionable.

Barry Fitzgerald is definitely here to stay. In 1942, he could find work for only part of the year. But since making Going My Way, in 1944, he has appeared in 12 consecutive feature-length pictures. In a recent release, Welcome, Stranger, a successful carbon of the Academy Award winner, Barry and Bing played old and young doctors instead of priests. Paramount is exploiting the team further. Their next epic is in the typewriter stage, and in it Barry will play an old-fashioned small-town inspector in Scotland, and Bing an American detective sent over to help him.

A short time ago Barry was doing three different pictures, requiring three different characterizations and costumes at once. The day he finished Naked City for Mark Hellinger, he started The Sainted Sisters for Paramount. When a reporter asked him what he was working in, Barry blinked out of the fog and replied, "Naked Sisters!"

It was during the making of The Sainted Sisters with Veronica Lake and Joan Caulfield, that a studio executive came down on the set to talk to Barry about his next movie.

Yearning for the Simple Life

The executive found Barry in an obscure corner of the set, contentedly puffing his pipe, watching the world go by. Barry did not feel like discussing his next picture. If he had his way, he said, he would not make another film for twelve months. "Ahhrrr," he said, "to be Will Shields again, working for $35 a week with my grand pension in the offing, and my life my own!"

But in remembering the good old days, Barry remembers only the sounds of Irish laughter and the feel of the old sod underfoot. He forgets that Will Shields never had it so good. Barry's father, Adolphus, a newspaper compositor, proofreader, once-a-week columnist, guided him into a respectable civil service job as a junior clerk on the Dublin Board of Trade. At first he liked the job. He would start work at nine, wind up at three, and the day was his own for hiking, golfing and pub-crawling. And then, after thirty years, the Crock of Gold—his retirement pension, a lump sum of $3,500.

There are many fanciful versions of how William Shields, clerk, became Barry Fitzgerald, actor. "The true story," says Barry, "is that my younger brother, Arthur, and myself used to visit the Abbey Theatre to watch the plays. We were paying customers. Then, one afternoon, I went on a hike by myself, and the whole thing happened."

On the road, Barry overtook another hiker, an actor named Harford, whom he had seen perform on the Abbey stage the week before. Barry complimented him on his performance. The actor was so grateful for the recognition, that he invited Barry to have a wee one with him. Soon they were drinking, and under the influence of the flowing bowl, Harford invited Barry to watch his next performance for free from backstage.

"So I took him up, I went," says Barry. "In the second act there was a crowd scene, a bunch of people walking across stage. Several of the players had not turned up. Harford came over and said to me, 'Will you help us? Will you go on for the hell of it

PHOTOGRAPH FOR COLLIER'S BY HARRIET ARNOLD

In a moment he was pulling an old coat over me, pushing a cap on my head, and sending me off on the stage. It wasn't too painful. So, after that, I just went on filling in night after night."

Barry Fitzgerald spoke his first lines in Sheridan's The Critic. He had four words to utter. " 'Tis meet it should." When the moment came, he bellowed, " 'Tis sheet it mould." The audience roared. Barry grinned. They roared louder. Thereafter he was a comedian.

When the theater manager approached him about putting his name, William Shields, on the program, he was terrified. He was afraid the people at the office might think he was not devoting enough time to his work. He suggested the manager make up a stage name, any name. The manager finally plucked the combination Barry Fitzgerald out of thin air.

For fifteen years, in Dublin, Barry acted in a legitimate play every night, without salary, while junior clerking for the civil service in the daytime.

In 1929, his friend, Sean O'Casey, wrote The Silver Tassie for him and asked him to open with it in London. It meant giving up the security of a junior clerk, and the Crock of Gold, only six months in the offing. It meant acting was no longer for love, but for money. After a good second thought, Barry made the leap. At the age of 42, he became a full-fledged actor.

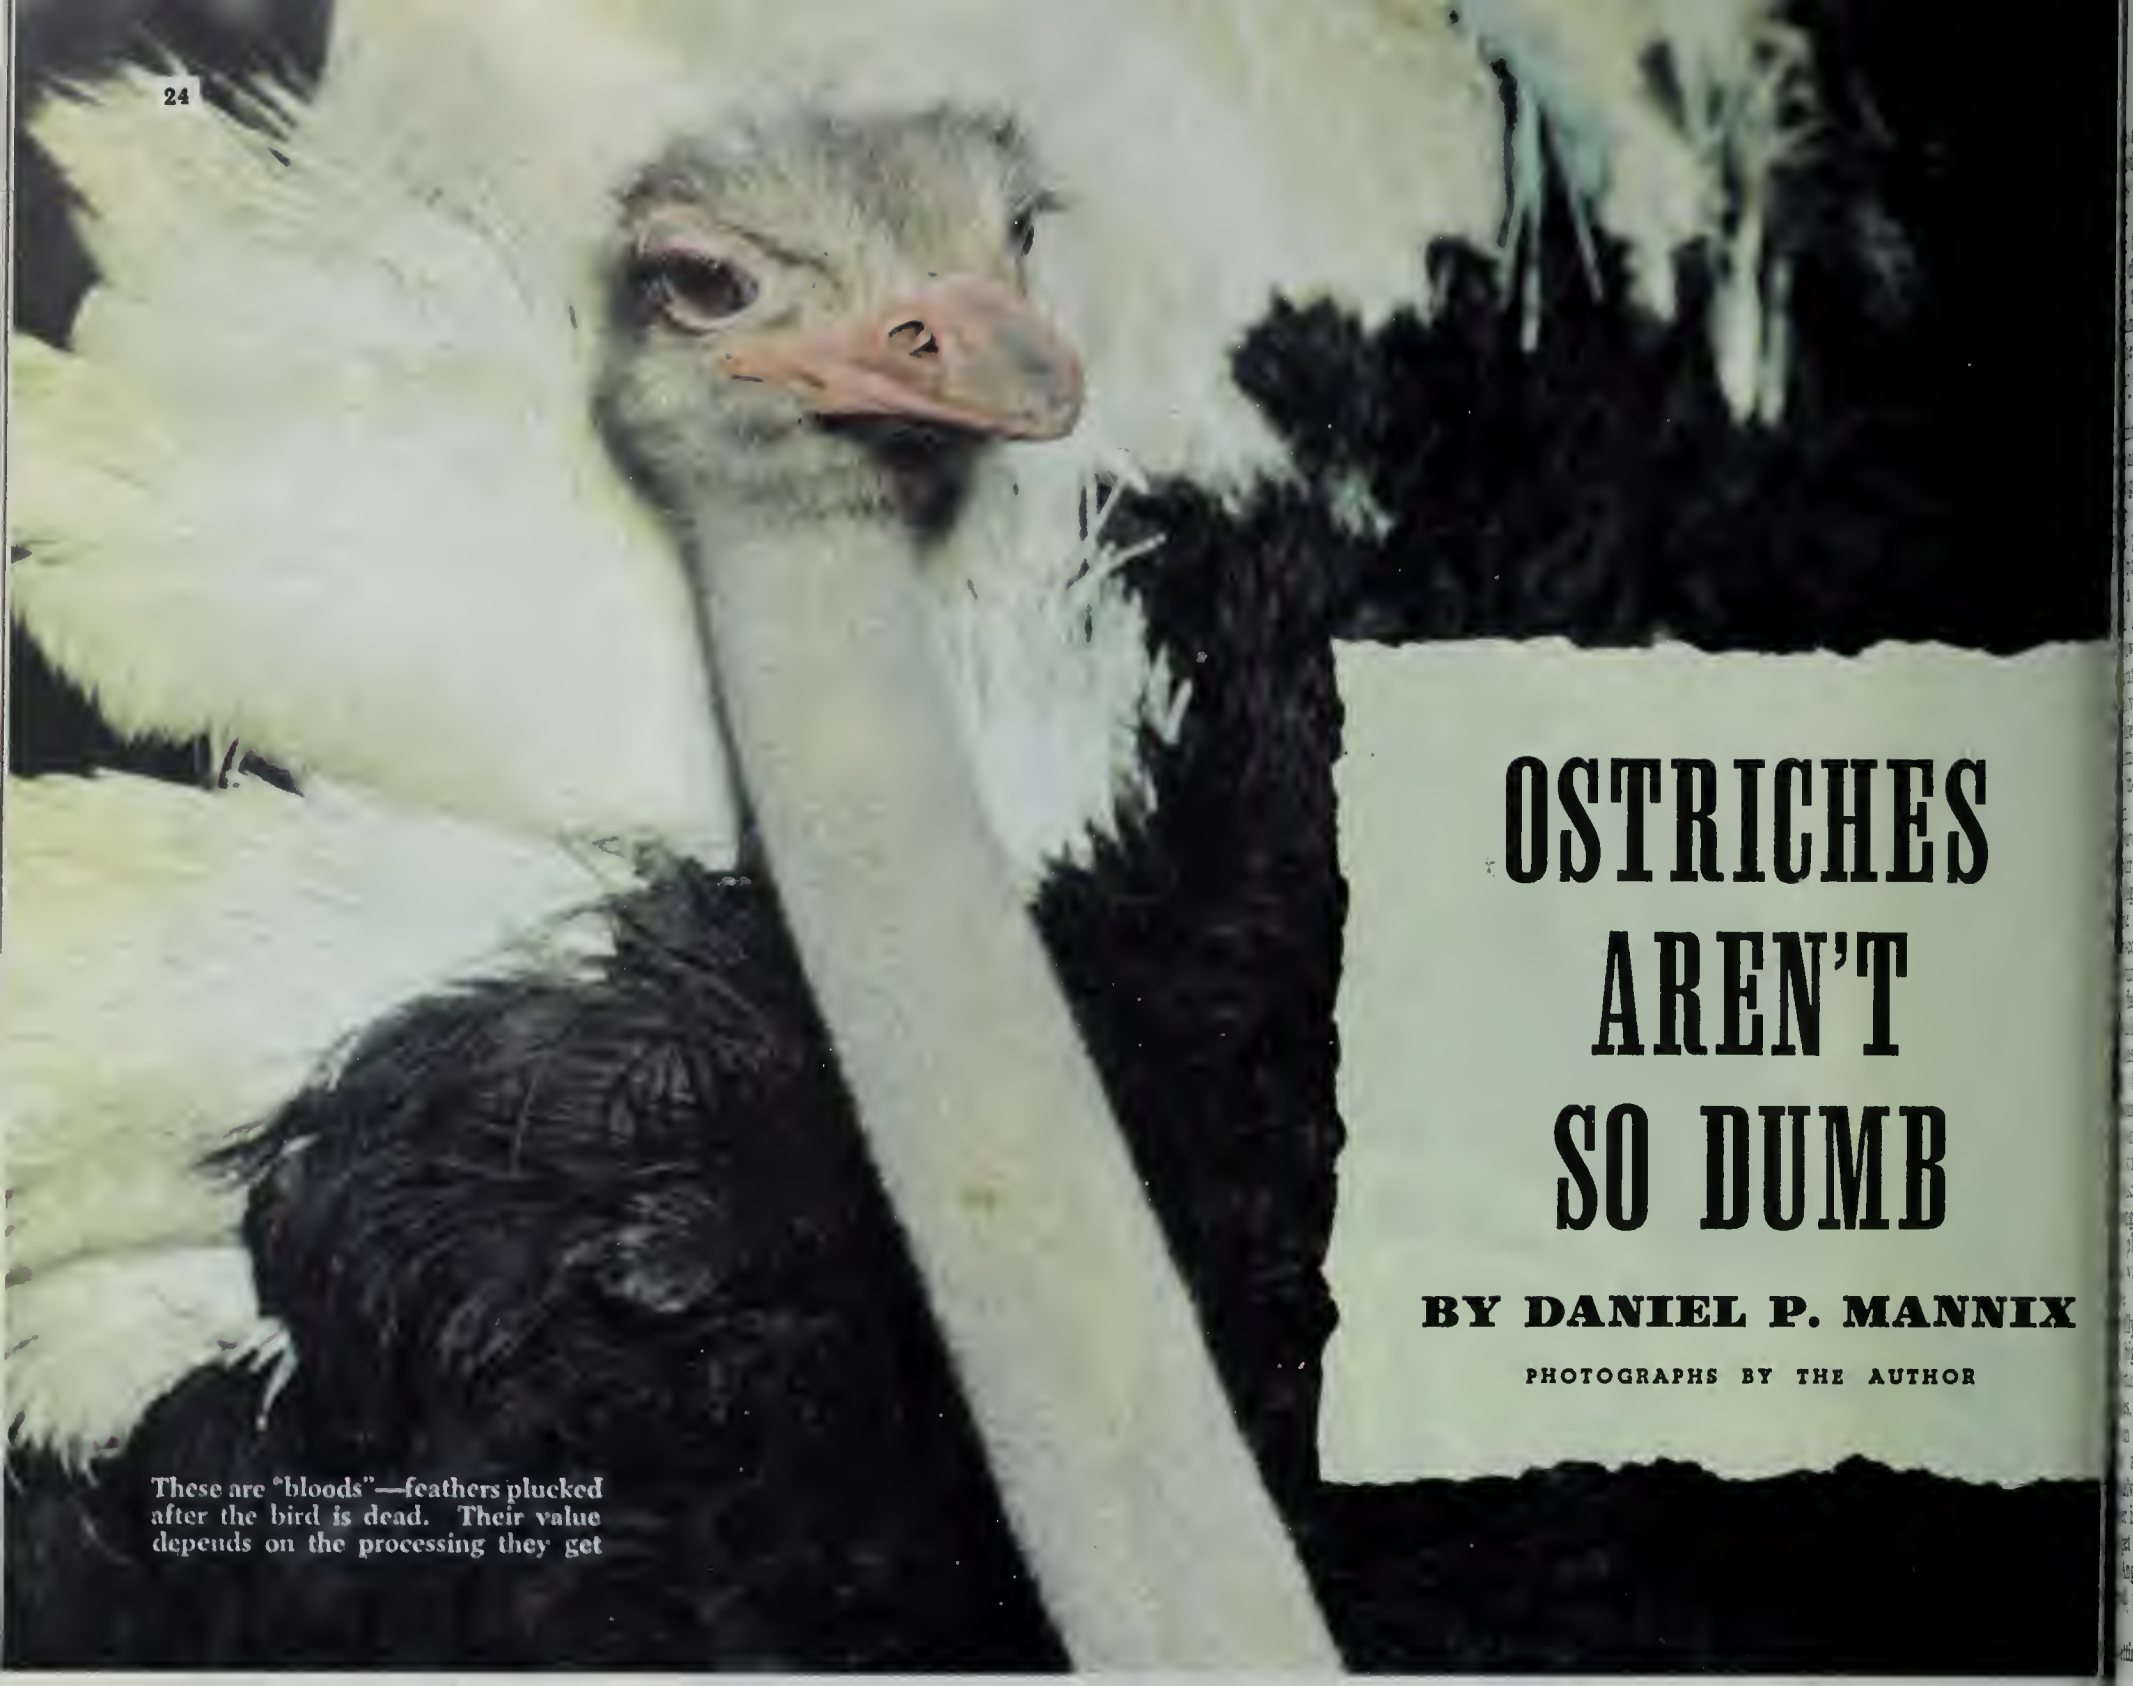
His success was immediate. Two years later he took the first of three tours to the United States.

In His First Cinema Role

In 1936, with four other Abbey Players, he was in Los Angeles for his first movie. John Ford was letting him do Fluther Good, the old sot, in The Plough and the Stars. "The play went into the machine and came out distorted," Barry says, "but it's a very good story and I'd like to do it again. In fact, if I had my choice making any movie in the future, that would be the one." Finding the southern California climate agreeable, the natives quaint, and a contract enticing, Barry Fitzgerald stayed on. When Paramount signed him it was just months before Going My Way.

Today Barry Fitzgerald is extremely careful about the roles he accepts. Several weeks ago, a producer who wanted to borrow him for a newly purchased novel, sent him the book to read. Barry finished it in an evening.

"A fine tale, this," he told the producer. "And I don't mind saying I'm interested."



"Great!" exclaimed the producer. "Then it's all set. We'll star you with Margaret O'Brien."

Barry's head snapped up. "Did I hear you say Miss O'Brien? That changes it. I must say no." He sniffed. "She's much too good an actress for me!"

Despite most publicists and columnists, who dress up his quotes in Irish dialect, Barry does not have a brogue in real life. Rather, he speaks English with a slight backspin.

People who look for his Irish accent annoy Barry, who likes to think his English is pristine clear. Of course, there *is* a touch of County Cork. Recently, Barry's best friend, a Dublin millionaire, arrived in New York. Barry talked with him via long-distance, and the two shouted at each other as if both were deaf. Finally Barry hung up. "Tch-tch," he clucked sadly, "what an accent he has!

These are "bloods"—feathers plucked after the bird is dead. Their value depends on the processing they get

OSTRICHES AREN'T SO DUMB

BY DANIEL P. MANNIX

PHOTOGRAPHS BY THE AUTHOR

Ostrich feathers are coming back into fashion and the ostrich-raising business is picking up in California. Here a man who owns a great ostrich farm reveals some of the curious facts he has learned about the big birds

Mother ostrich preparing to turn her egg. The nest was dug by both Mama and Papa, who used their toenails

PEOPLE think that ostriches are stupid," complained Francis V. Earnest, proprietor of the last of California's great ostrich farms. "But see that old cock who's pulling the spikes out of the fence posts and swallowing them? Notice his reaction when he sees us."

As we approached the fence, the big male ostrich sank down on his knees, spread his huge wings and began a lunatic dance. Without rising, the bird waved his wings madly, bowing his snaky neck first to one side and then to the other. Suddenly he leaped to his feet and aimed a kick at Earnest that made the steel fence bars sing like tuning forks.

"We call that 'challenging,'" explained Earnest as we hurriedly retreated. "This is the mating season and he wants to show off for the hens. Now they'll think he's a hero because he drove us off. Remember if you're ever caught in a pen by an angry cock ostrich, fall flat on your face and keep still. Then all he can do is jump up and down on you. Ostriches weigh over three hundred pounds so that procedure isn't fun, but if you're standing up he can disembowel you with one kick."

Ostrich farming has played as important a part in the development of southern California as orange groves and movie stars. Fifty years ago, ostrich plumes were as vital to a well-dressed lady as her corsets, and raising the birds was a $5,000,000 industry. Today, ostrich feathers are coming back into fashion and the Los Angeles Ostrich Farm is one of the few places in America that have preserved the art of raising the weird birds. Now Francis Earnest is hoping to cash in on his unique knowledge.

"Heaven knows how many th
sands of dollars were lost before
learned something about ostrich p
chology," says Earnest sadly.
first, ranchers tried to breed them

a long forked pole and bracing ther end against his instep. These were called "tackeys" and they standard equipment on all os- farms. During the mating sea- the ranchers learned to rush out their tackeys and separate the ng birds.

e victorious cock courts his mate elaborate dance called the "dis- " The cock and hen seem to be ing together, the huge birds cing as lightly as though they giant balls of feathers. The cock s his wings extended so the fa- plumes, as soft and creamy as roth of a breaking wave, swirl a canopy over his sweetheart's . After the mating, the pair wan- away into the desert and unless rated by wild beasts or man will lly remain faithful to each other ife. Sometimes a couple become ttached that if one of the birds the survivor refuses even to mate n.

here are no nest-building materials eir native desert, so the hens sim- dig a circular hole in the soft ie soil and deposit their huge -colored eggs there. The birds turns sitting on the eggs. On the flats, where ostriches like to nest, ealment is impossible. But the has sandy-colored feathers that e her almost invisible when tting on the nest. She sits on the during the day and at night the with his ebony plumage takes place. The male folds his snowy ting feathers under the black r plumes and these afford addi- l warmth for the eggs.

he birds turn each egg daily, fully rotating the clutch with big beaks and powerful necks. ortunately in the confines of the hes, all the old-maid relations of hen drop in during the course of ay and carefully turn the eggs selves, just to make sure the er is doing a good job. So many get broken this way that on the Angeles farm all the eggs are ed in incubators.

Getting More Egg Production

The parents usually managed to k several eggs themselves kick- at visitors," explains Earnest. "If let the hen hatch out her own ily, she won't lay more than a n eggs a season. By taking the away, she may lay as many as during the summer."

he parents sometimes help their iren to hatch by breaking the and pulling the babies out by necks. The little fellows are ered by a soft, brown down, in- ersed on the back with white ls that apparently act as camou- when the babies crouch down the varicolored desert. For the few days, the babies eat nothing, live on a fluid in their stomachs distends their little bellies like ons. They are so delicate at this that Earnest hobbles their feet hat the babies' legs won't sud- y fly apart when they try to walk, drop them unexpectedly on their llen tummies. When he handles little birds, he imitates their par- and lifts them by the neck.

he parents guard their young with efficiency. Bushman hunters are uently able to locate an ostrich by the clouds of flies that hang the dead bodies of hyenas and cats that have tried to steal a y ostrich.

ccasionally an irresponsible os- trich will try to shirk matrimonial duties. An old cock bird married a flighty young hen that refused to do her fair share of taking care of the babies. The cock patiently cared for the young by himself, but when the babies were able to leave the nest, he gave his erring wife such a beating she was laid up for a week. On the next nest, she humbly did her fair share of housework, but later died from eating a part of a window pane. For years the heartbroken cock refused to mate. When he did finally take another hen, he never ventured to correct her no matter how badly she behaved, apparently holding himself responsible for his first wife's death.

Habits of the "Younger Set"

The babies grow very rapidly, at the rate of nearly a foot and a half a month for the first few weeks of their lives. The gangling adolescents are turned into a big pen where they can chase bugs and search for brightly colored stones to their hearts' content. The young birds are subject to unreasoning fits of panic and the whole flock will suddenly dash off, falling over one another and bouncing off the fences until, just as abruptly, they stop.

These adolescents are incredibly curious. If a carpenter comes into the pens to fix a feeding trough, the young birds cluster around him, sticking their heads in his way if he tries to drive a nail, untying his shoe laces and even pulling the buttons off his coat. If the man finally loses his temper and chases them, he'll probably return to find that a new detachment has come up while he was away and is busily engaged in eating his tools. Ostriches are not mature until they are three years old. Then a cock bird may stand seven feet high and weigh as much as four hundred pounds. He'll have drumsticks like a Percheron and when he runs, he may have a 28-foot stride and be able to do 40 miles per hour. Whether an ostrich can outrun a race horse has long been a moot question. Some years ago such a race was actually staged, but when the horse saw what he was supposed to run against. he jumped over the barrier and covered several miles before his jockey was able to stop him. The contest was called off.

Earnest keeps his ostriches on a diet of alfalfa, corn, oranges and gravel, plus an interesting collection of small cameras, wrist watches, lapel emblems and assorted jewelry that they snatch from visitors. One day Earnest saw a lady wearing a magnificent porcelain pendant studded with small stones, standing dangerously near a circle of interested ostriches. Before he could shout a warning, a cock had grabbed the pendant and swallowed it. To Earnest's astonishment, the lady laughed heartily.

"It's a very valuable pendant, but of course it isn't gone for good," she told Earnest. "After the bird has digested it, you can have it mailed to me."

"Lady, he isn't going to digest it," said Earnest sadly. "That pendant is going to stay in his crop along with a couple of pounds of granite gravel until it's ground to a powder."

Fortunately, Earnest saw one end of the pendant's chain still hanging out of the ostrich's mouth. He pulled, and the pendant slowly reappeared.

Everything that has been written about ostriches' appetites is true. Like

Baby ostriches feeding. All ostriches like bright colors. When they eat oranges they swallow them whole—they enjoy their looks, not their taste

COLLIER'S

SHORT SHORT

PIANISSIMO

BY

ROBERT FONTAINE

"Aaaaahhh!" said Mr. Goncourt. "The ticket!" I held the card up high so all could see it

WHEN I was a boy in Quebec we did not have radio programs which gave away treasure for knowing the name of the Vice-President under Polk. We had, instead, what was called Country Store Night. At every Friday's performance at the movies they gave away hams, eggs, potatoes, bolts of muslin and a special grand prize. The way the prizes were awarded, you were given a number, the duplicate of which was placed in a hat. The manager then drew the lucky numbers from the hat.

I am speaking here of Mr. Goncourt, the manager of the Monument Nationale—the movie theater that served our French-Canadian community. He had had trouble with the attendance for some time. Consequently, Mr. Goncourt conceived the idea of giving big prizes at Country Store Night. Once he gave away a phonograph. Another night he gave away a whole roomful of furniture. The memorable night of my career, he gave away a piano.

People used to say, "How can Mr. Goncourt give away such treasure? The admission of 16 cents does not justify it."

Others said, "Advertising. That is the key to success!"

I, myself, often took paper and pencil and figured out how many attended the theater and what the gross receipts were. They were seldom enough to pay for one piano, let alone ham, eggs and muslin.

I asked my father about this. He said, "My boy, I am a musician, not a businessman. Business is very mysterious. A man becomes rich and no one knows how. Possibly Mr. Goncourt is an alchemist and makes gold from hard coal."

My mother was no better. "I haven't time to worry about how Mr. Goncourt gives away valuable prizes. I'm too busy trying to win one."

There came a day when I was standing in the lobby of his theater when the great Mr. Goncourt came up to me, took me by the arm and dragged me into a corner. He puffed once or twice and then said, "Would you like to see the show gratis *and* obtain fifty cents?"

"Yes," I said promptly.

"Bien. Here, take this number. When it is called, you arise and come on the stage. Keep your mouth shut. Smile. Bow. Act happy. And I will give you fifty cents."

I went in. It was the third episode of *The Perils of Pauline* with Pearl White. Very exciting. The next picture was the fifth episode of *The Black Box* with Francis Ford and Grace Cunard. Very thrilling. The third picture was The Secret Cask with Francis X. Bushman and Beverley Bayne. Tremendously exciting. Ninth episode.

Then the lights went up and revealed the peeling paint, the worn plush seats, the bare stage and the hot audience.

Mr. Goncourt came out on the stage and everyone cheered. He was followed by several helpers carrying hams, eggs, muslin and so forth. At the end, two men pushed an excellent upright piano onto the stage. Mr. Goncourt removed his hat and the numbers were placed in it.

One by one numbers were drawn out and, one by one, lucky persons arose to the stage, shouting joyfully and receiving comments from neighbors and friends. At length we arrived at the piano A tension gripped the audience. It was more exciting than *The Perils of Pauline.* It was real.

Slowly Mr. Goncourt's fat hand went into the hat and slowly it came out. You could have heard a fly breathe. Carefully and cautiously, Mr. Goncourt regarded the number, his diamond rings sparkling in the spotlight.

"My friends, the lucky number is 772. *Sept . . . sept . . . deux.*"

Everyone looked at his neighbor. No one moved. Suddenly a thin woman jumped up and shrieked . . . *"C'est moi!* Ah, no . . . no . . . 727 . . . not She sank back into her seat.

"Someone must have 772," Mr. court said nervously.

I sighed and put my hand i pocket for a candy wafer, the sort ways carried with me. My hand small piece of cardboard and I re it. I nearly fainted to see the nu 772. It was the cardboard Mr. court had given me and I had for in the excitement of Francis For Pearl White.

"Me! Me! 772!" I shouted, my breaking. I clambered over legs, f my face in the aisle, scrambled, fi onto the stage, beaming and pers

"Aaaaaaahhhhhhh!" said Mr. court joyfully. *"Bien.* Let me see, p the ticket."

I held the card up high so all see it. Everyone applauded. I p out a note or two on the pianc there were cheers. . . .

When the show was over I went stage and Mr. Goncourt was w with a smile. "Here," he said, "is fifty cents. Thank you very much. a word now."

I put the fifty cents safely i pocket. Then I said, loudly, "Wh you deliver the piano?"

"My small friend, the piano goes to the store tomorrow. Do you b I can afford to give away pianos? hardly pay the rent."

"I won the piano! I want the pi I said. "I have witnesses."

Mr. Goncourt took me by the of the neck and threw me out i alley.

FOR three days I brooded. I finally, to my Uncle William, t liceman, and told him the story.

"I want to make it a present to *M* for her birthday. Never have I h money for a good present. This want to give her a piano."

"Ah," said William.

"Mr. Goncourt never gives an away. Everyone must bring it They are all his friends. It is agai law. You are the law, no?"

"I am the law," William agree dignity. "But I do not like troubl

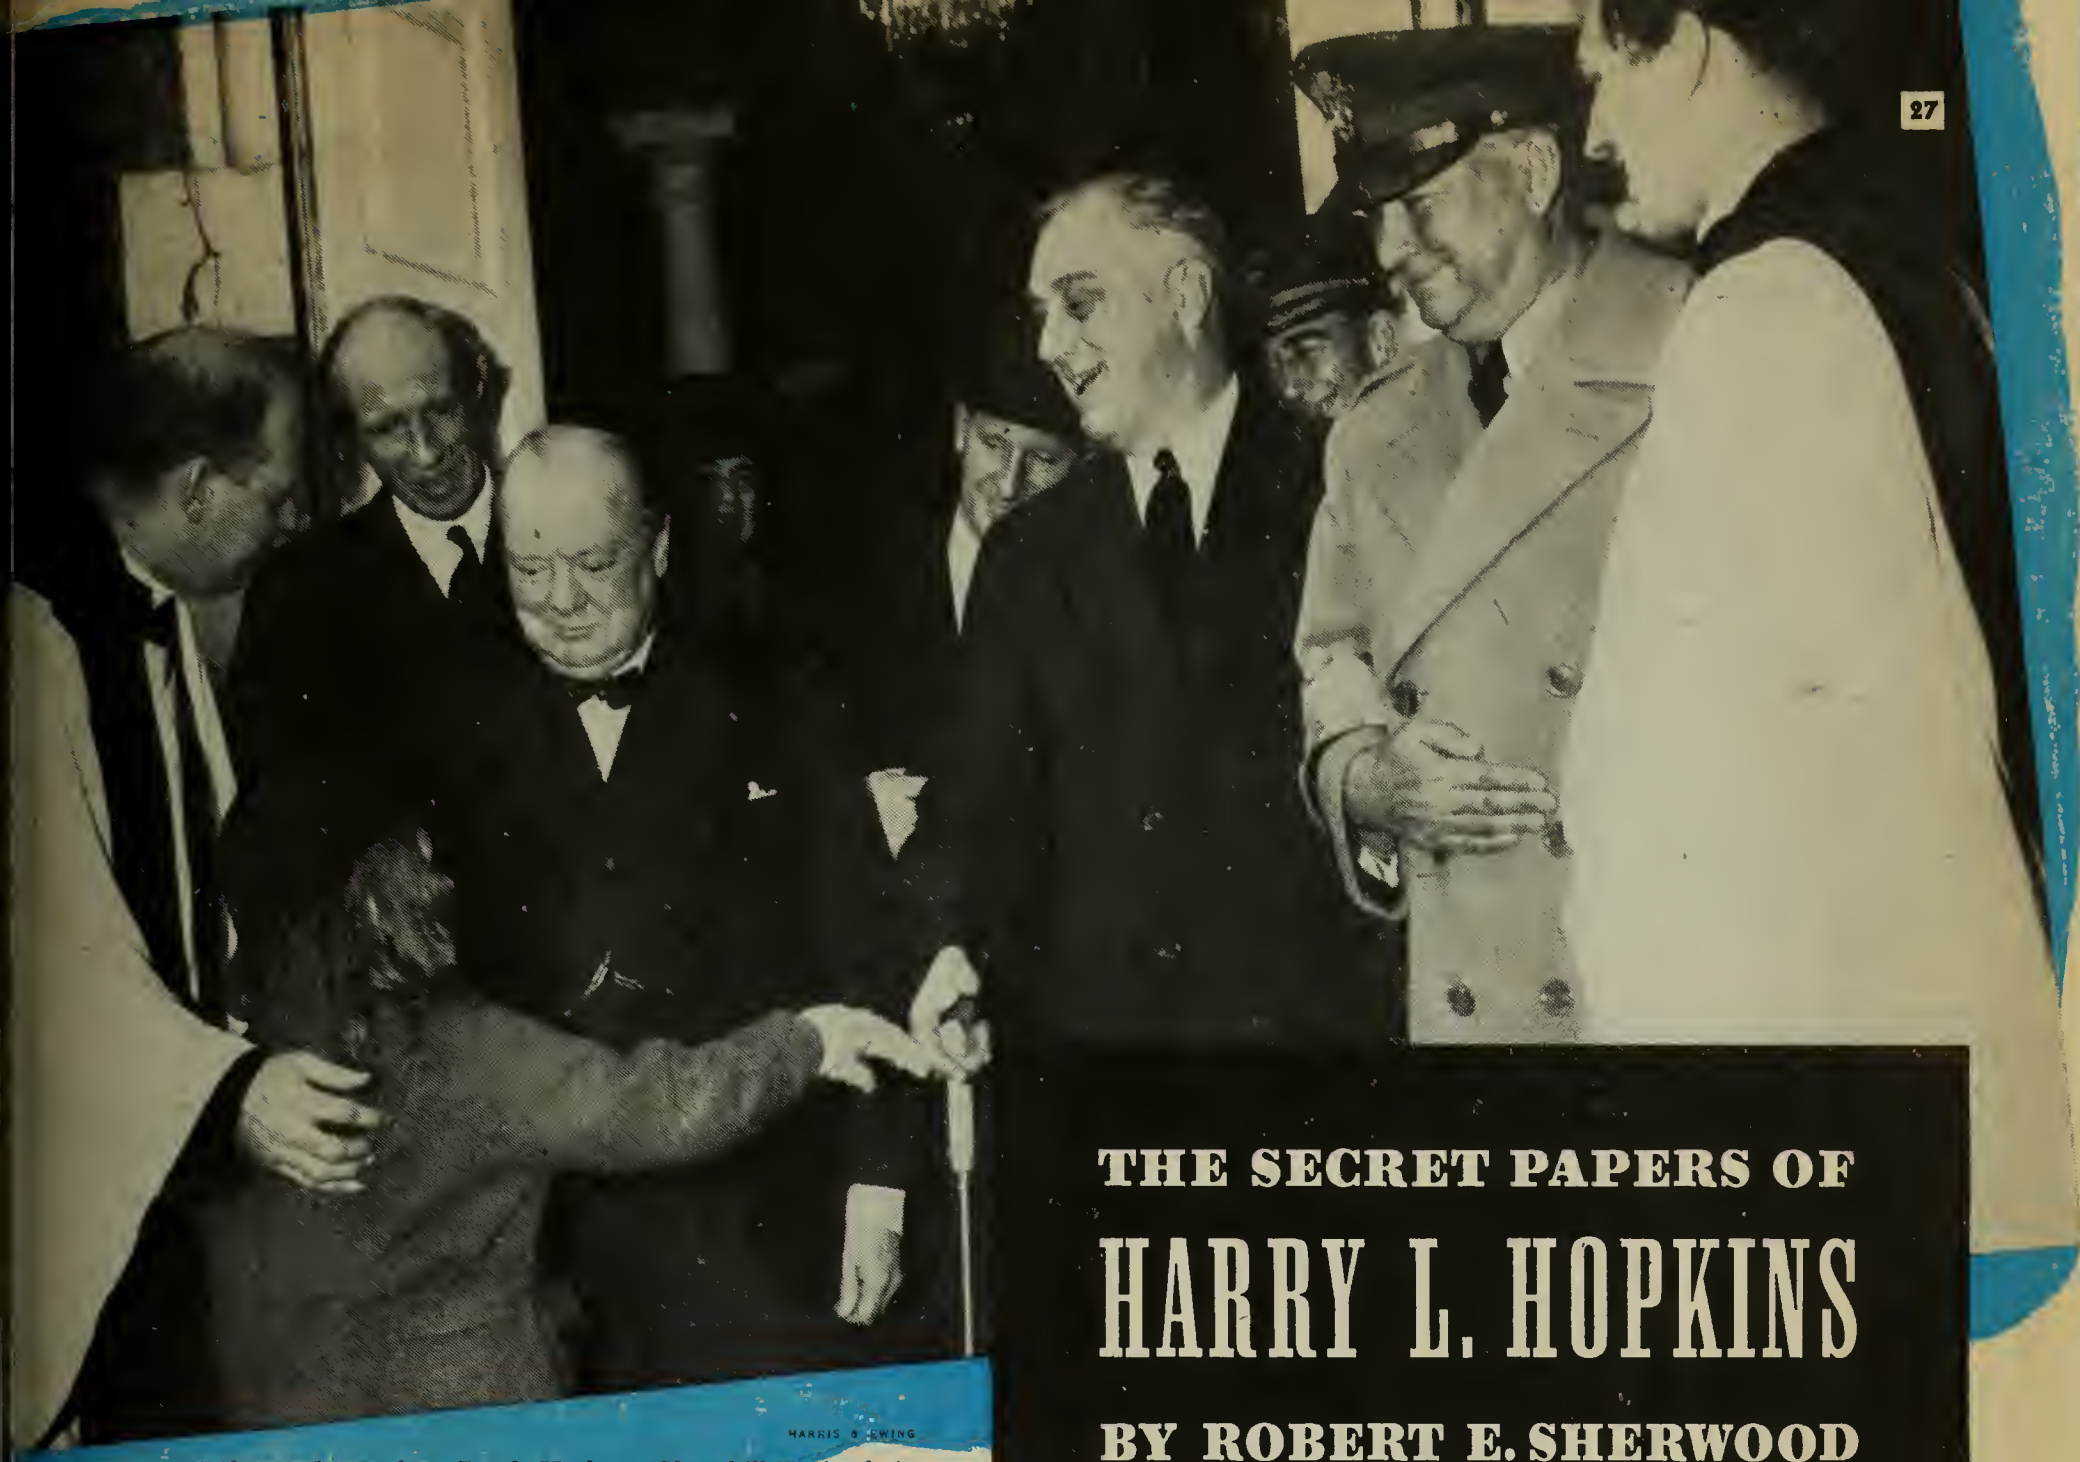
"I will tell everyone you took M. Rideau fifty dollars for per him to serve wine after hours."

William glared at me. "All rig agreed. "I will go with you. Bu not like trouble."

There was, in fact, no trouble Goncourt, who had probably bee ried for several days, nearly ha plexy when he saw me with a poli "I cannot afford a piano," he sai

"We will attach the theater. I stand you plan to sell it for many sands," said William.

"No. No—" begged Mr. Go "Wait! The boy did not win the I gave him the ticket! I placed the end in the hat myself and made draw it out from inside the band. dishonest. How can I give a pi a dishonest boy?"



"Oh, scoundrel!" said my uncle ing his club. "It is bad enough t this small, helpless one, but yet yo smear his character, dirty the na the family and drag his small through the mud of false accusa He rapped Mr. Goncourt on th with the club.

The next day the piano was de to our house. My mother was ov with joy. I was let off from siftin for a month, and was given five to spend.

Only my Uncle Louis was n pressed. "A piano acquired earning it will do you no good,"

I did not pay much attention I was too excited. But he was, ala In three months I was taking pia sons—and in four I was wishing never won a prize.

HARRIS & EWING

Fifteen days after Pearl Harbor, Churchill arrived in Washington to discuss our war plans with Roosevelt. At Christmas services in Christ Church, Alexandria, they were greeted by the rector's daughter, Katrina Wells

THE SECRET PAPERS OF HARRY L. HOPKINS

BY ROBERT E. SHERWOOD

Great decisions of the war were fought out in Washington soon after Pearl Harbor—and Roosevelt won most of them in sometimes bitter disagreements with Churchill

PART VII—THE GREAT COALITION

BOTH Ambassador Winant and Averell Harriman were at dinner with Winston urchill at Chequers on Sunday eve- ıg, December 7, 1941. The $15 nerican radio that Harry L. Hop- ıs had given the Prime Minister was the dining table, and from it came measured, emotionless tones of e B.B.C. newscaster, announcing at the Japanese had attacked Pearl ırbor. Churchill wanted to declare ır on Japan at once but Winant ıinted out that he could hardly do at on the strength of a radio broad- st—even from the B.B.C.—and he ggested that perhaps the Prime Min- er should telephone the White ouse for confirmation. Churchill did d Roosevelt immediately agreed at Churchill should come to Wash- gton with his Chiefs of Staff as soon possible.

The Prime Minister arrived in ashington with his entourage on ecember 22d for the series of con- rences which were known under the de name Arcadia. He was installed the big bedroom across the hall om Hopkins' room, and as the two of them walked back and forth to visit each other they had to pick their way through great piles of Christmas parcels.

That upstairs hall in the White House underwent an extraordinary change. Ordinarily quiet and usually deserted, it was now the headquarters of the British Empire, and various dignitaries and staff officers and secretaries were continually hurrying back and forth carrying the old, red-leather dispatch cases which make British officials look really official.

The food in the White House was always better when Churchill was there and, of course, the wine flowed more freely. Since Churchill knew of Roosevelt's habits of going to bed early, he made a pretense of retiring himself at a fairly reasonable hour, but Roosevelt knew that his tireless guest and Hopkins would go on talking and he did not want to miss any of it so he stayed up much later than usual. Churchill was one of the few people to whom Roosevelt cared to listen, and vice versa.

Hopkins told many times a story of Roosevelt being wheeled to his guest's room, and, as he entered, Churchill emerged from the bathroom stark naked and gleaming pink from his bath. Roosevelt started to apologize and started to leave, but Churchill protested it was quite all right. "The Prime Minister of Great Britain," he said, "has nothing to conceal from the President of the United States."

I asked Churchill if this story was factual. He replied firmly that it was nonsense—that he never received the President without at least a bath towel wrapped around him. And, he said, "I could not possibly have made such a statement as that. The President himself would have been well aware that it was not true."

From a Historian's Viewpoint

Churchill was in the White House because he was the King's First Minister, but he could not forget that he was also a professional historian who was most sensitive to the radiations of the past. He looked questioningly at the portraits of the Presidents and undoubtedly had more than a nodding acquaintance with all of them that mattered. After his return to London, he cabled Roosevelt, "I was terribly sorry to have to leave you and, what is more than those can say whose pictures are on the walls, there is not a moment of it that I did not enjoy."

During the fourteen days that Churchill was in the White House he and Roosevelt and Hopkins had lunch and dinner together every day but one. It was at the lunches that most of the major problems were thrashed out, so that when the President and the Prime Minister went into the full-dress meetings they were often already in agreement.

When the British gathered for the Arcadia Conference, they were fearful that Pearl Harbor might have produced a complete upheaval in American military thinking; it seemed probable that the previously agreed principle of "Germany first" might have been discarded in favor of all-out United States effort against Japan, leaving the British and Russians to handle the German enemy in Europe.

However, British apprehensions

HANS KNOPF

Willy Muth, left, leader of Baltimore veterans fighting shoddy construction of houses. Newsmen Bill Pyne, center, and Tom O'Donnell, have aided him

SCANDALS in VETERANS' HOUSING

BY ALBERT Q. MAISEL

Most federal agencies have failed the veteran in obtaining redress for his jerry-built homes. The best present means of getting definite action seems to lie in the local field. A tough-minded ex-lieutenant is leading the way in Baltimore

Shortly after this Baltimore house was occupied the subflooring buckled and began to break. It was quarter-inch plywood, not one-inch pine as specified

JOE DI PAOLA, JR.

THROUGHOUT the country tens of thousands of veterans have seen their postwar dream cottages turn to nightmarish cracker-boxes in a few months of occupancy. Jerry-built homes have opened at the seams, sagged at the ends and warped on their meager foundations. Federal agencies that were supposed to have helped have largely failed them. Funds for the Office of the Housing Expediter, for instance, were slashed to a fraction of the requested sum so that 15 field investigators instead of the original staff of 600 must suffice to serve the flood of complaints.

Twenty-six veterans bought houses in the Calhoun Lane Subdivision of Billings, Montana, for $8,000 apiece only to discover endless defects and omissions. They started complaining in September of 1947. They enlisted the help of their Veterans of Foreign Wars post which, in turn, rallied all the V.F.W. posts in Montana. The Legion and the Amvets, the Eagles and the Billings Trades and Labor Assembly joined in pushing their cause.

The first step was to seek an adjustment through the Federal Housing Authority. Effective results: none. Then they appealed to the Veterans Administration. Effective results: again, none.

In November the protesters wrote Montana's senators and representatives, asking them to try to spur someone into action. A few days later James J. Rudden, head of the Housing Expediter's regional office in San Francisco, telephoned, but all he could say was that since Billings is 850 miles from San Francisco he just did not have anyone to send up. He suggested seeing the U.S. Attorney.

There have been abuses in the construction of homes for veterans, and it is concerning these only that Collier's is publishing this article, the second of two on the subject. This article, and the one in last week's Collier's, must not be regarded as a criticism of the entire home-building industry.

By February the veterans in Billings were still seeking redress. Endless series of conferences had been held with Ben S. Hill, chief of the Montana branch of FHA, and with John McLaughlin, headman in Montana for the V.A. They had written and wired Tom Clark, U.S. Attorney General. Nothing was happening.

Finally, late in March the FHA sent S. L. Berg out from Helena to inspect the development. Here are just a of the deviations from plans specifications cited in Berg's rep

"All ribbon-type concrete dr ways varied in width over the ribb from six feet seven inches to six ten inches with center area betw these ribbons subsequently filled with concrete. The plans indi eight feet wide solid concrete dr ways.

"Furthermore, approximately properties . . . have their drivew level with the bottom of the st gutter, which permits street drain into the front yards . . .

"The foundation footing under houses extends approximately inches to eight inches below gr line instead of three feet as the p indicate.

"Many of the houses have asp roof shingles . . . of considerably weight per square than the type sp fied of the 210-pound weight.

"The detached garages have foundation whatsoever and the fr sill has one bolt on each side, b nut has never been applied. M have no wind bracing and show dence of leaning out of plumb.

"The private concrete walks w specified to extend from the stree the front entrance, but we w obliged to accept the walk to concrete driveway only."

Berg's comments on defects in dividual houses include the follow No storm windows. Asphalt floo breaking up along exterior walls. hall light or sw No towel close light switch in bathroom. The range not ve through the Door badly wa Electric wall ou not installed. ers 24 inches a instead of 16 in No attic bra Attic insulation inch thick ins of 2 inches as required. Soil was away from garage floor exposing der part of slab—no footings. electrical outlet in kitchen instea two; no rear doorbell. No swin door between kitchen and di room. MORE BEAUTIFUL THAN MURDER

Continued from page 17

after ten o'clock—or at any other time during the night. That was it.

Garland wouldn't give up. "And you can't remember what happened to your gun?"

"We've been over all that," I reminded him. "I haven't noticed that gun for years. I didn't know it was gone until the police discovered that there had been a .38 registered to me long ago, and that I didn't have it when they nabbed me. Of course, if that gun were used to kill Nulty—the murderer took it. But when or how, I don't know."

Brian said thoughtfully, "I'll make a point of that, of course. Nulty was killed with a .38. Lots of people own .38s. Unless they have the gun, they can't do anything with ballistics."

"Pretty weak, isn't it?"

"Yes . . ." He shrugged. "I wish I could be more encouraging, Steve. But we haven't a thing to go on."

I got up. I said, "All right, Brian. Let me do the worrying. Tomorrow you can tell the judge that you haven't any witnesses. Maybe by tomorrow night the formalities will be over and the verdict in. No matter what it is, it'll be better than this strain."

He said good night, advised me to keep a stiff upper lip, repeated his hope that a miracle might happen, and walked out. They took me back to my cell.

I SURPRISED myself by sleeping well. I ate a breakfast that wasn't too bad, smoked several cigarettes and fixed myself up as well as I could under the circumstances. I understood the importance of looking innocent. I had a moment of regret that I wasn't a pretty boy. Football and boxing in college hadn't enhanced my beauty. I looked rugged enough to have done what I was accused of doing.

When they took me down to the superior court room where I was being tried, I caught a glimpse of the crowds in the hall. Some of my friends would be there, but mostly the spectators would be strangers, attracted by the somewhat natural, somewhat ghoulish desire to be in at the final curtain of a drama involving human life. My life.

The courtroom was humming when they took me in. Every seat was occupied. The press was there in force. George Walderson, the tall, distinguished, politically smooth district attorney, gave me a brief, impersonal glance. I felt no animosity. His job was to prove people guilty if they were guilty. In this case he'd stepped out of bounds; he'd done a hell of a job of proving the guilt of an innocent man. But I believed he had been conscientious.

Brian Garland was not among those present. I wasn't too concerned. He'd probably been up most of the night trying to pull an impossible rabbit out of a nonexistent hat. The jury filed in, looking worried. They weren't half as worried as I was. Then the judge appeared and everybody stood up while he settled himself.

The door at the back of the room opened and all heads turned in that direction. Brian Garland rushed up the aisle, through the little gate, and apologized to the court for being late. Judge Gaston magnanimously forgave him.

Something had happened to Brian. His pink cheeks were bright, his eyes were shining, and he oozed confidence. The court asked the defense to get under way, and so Brian had opportunity for only a few words. And those words amazed me: They brought the first faint hope I'd had since mid-October.

"It's happened," he said.

"What?"

"The miracle."

Judge Gaston's icy voice said, "If the defense will begin . . ." It was an order.

Garland was as easy to read as a neon sign. Last night I had known he was in the depths. This morning everything was different. I hadn't the faintest idea what it was all about, but I was willing to bet it was good.

He faced the bench. "The first witness for the defense," he said in a voice which was far from steady. "Will you please call Mrs. Patricia Kingsley."

THERE was another craning of necks. This time I turned, too. Walking slowly and steadily toward the witness stand was one of the most beautiful girls I had ever seen.

This was a moment of drama. And Brian Garland was making the most of it. I wasn't fooled by his cherubic countenance and baby-blue eyes. I knew he was right on the ball. He was standing beside me, beaming at the gentlemen and ladies of the jury with a wait-until-you-hear-this expression.

Mrs. Patricia Kingsley seated herself in the witness box. She seemed under a strain, but that was natural. Otherwise, she looked like someone it would be a pleasure to dream about.

She was in her early twenties. She had soft brown hair and hazel eyes. She was about five three and slender, but not so slender that you'd doubt she was a woman. She was wearing just the right amount of make-up—not too much, not too little. She had on a simple gray suit with a maroon scarf wrapped around her throat and tucked in at the right place. Her hat was maroon in color and simple in design. It looked inexpensive and probably had cost fifty dollars. Her legs were good.

I stared at her, naturally. She rang a bell. But only faintly. I knew I had seen her somewhere, but I couldn't remember where or when. I knew it must have been a casual meeting because I wouldn't forget something like that if I'd ever said more than a dozen words to it.

I touched Brian's sleeve and said, "Who is she?"

He gave me a reproving look, as though I'd cracked a joke at the wrong time. He said, "Don't be that way, Steve."

"Don't be what way?"

He said sternly, "You should have told me."

That made considerably less than no sense. I opened my lips to ask another question, but Brian had moved away from me. I had earned his disapproval in some unaccountable way, but he was still busting out all over with triumph.

In the witness box, Mrs. Kingsley was being required to swear that she would tell the truth, the whole truth and nothing but the truth. Silence settled over the room. Brian let it hold for a moment, then spoke in a gentle, reassuring voice which had an appealing, boyish quality.

"Your name?" he asked.

"Patricia Maxwell Kingsley."

I heard a sharp intake of breath from the spectators. I saw the reporters grow tense. The name meant plenty to almost everybody in the room. It meant something to me. It even made me remember where I had met the young lady.

I had met her in my own apartment on Saturday, October 4th. I was host at a cocktail party in my apartment. A couple of caterer's men were handling it, and I was paying off a handful of social obligations in one fell swoop. I had invited about twenty people. Knowing Hollywood, I had prepared for twice that number. I was right. Friends brought their friends. Wade Ramsay had brought Mr. and Mrs. Kingsley. Ramsay wasn't a particularly close friend—he was a good ten years older than I—but he owned a swanky apartment house where I'd been trying to get an apartment, and inviting him seemed like a smart move.

I vaguely remembered shaking hands with him and having him introduce me to somebody named Pat Kingsley. There were too many people milling around in crowded quarters for her to register very strongly. I met Mr. Kingsley, too, but what he looked like, I didn't remember. I had been too busy playing host.

I did remember that my chance of chatting with Mrs. Kingsley was cut short by the intrusion of a big, bull-like man with a granite face who already had had too many drinks. Ramsay mentioned that the man was Jeff Nulty.

Jeff Nulty didn't look as though he belonged at anybody's cocktail party. Yet he was probably the most famous person in that room; it was something that could happen only in southern (fornia. He was manager of a c night club, the Casa Linda, which on the ground floor of the ultra- Casa Linda Apartments. Wade Ra owned both the apartment house the club. I was surprised that he brought Jeff Nulty along, becaus reason Nulty was famous was tha erybody knew he was an ex-convic

I still couldn't figure where Pat K ley fitted in as a witness. I didn't l her—hadn't remembered her until given her full name on the witness s It was the middle name, Maxwell, did the work. For gentle yet fast relief

*Reg. U. S. Pat. Off.

"I went home."

"With whom?"

"My husband and Mr. Ramsay."

"I see . . ." Brian paused again. This had all been build-up to something. I knew it. The judge knew it and so did the district attorney. Now the time had come for the sixty-four-dollar question.

Brian's voice was soft as silk. He said, "I ask you to think carefully, Mrs. Kingsley. Can you state definitely where you were that night—that same night of October 4th—at nine o'clock?"

"Yes . . ." I saw spots of color appear on Pat Kingsley's cheeks. "Yes," she repeated, "I can."

"Where were you?"

"In Mr. Blake's apartment."

I blinked.

"The same apartment where the cocktail party had been held that afternoon, and where Mr. Blake and Jeff Nulty fought?"

"Yes."

"You were *in* Mr. Blake's apartment at nine o'clock?"

"Yes."

"Who was with you?"

"No one."

"Did Mr. Blake come in later?"

"Yes."

"At what time?"

"Nine twenty."

"What makes you so sure?"

"I had been watching the clock, waiting for him."

I started to get up, then thought better of it. My head was whirling. The girl on the witness stand was lying. She hadn't been there when I had returned at nine twenty. She hadn't been there at all that night. No one had.

I didn't like what was happening. This was perjury, pure and simple. It occurred to me that Brian Garland—believing in my innocence—had framed this thing. But something was wrong there. I had known Brian all my life. He wasn't the sort of man who would pull a fast one—even for a friend. I knew that he believed the witness.

He was continuing smoothly: "Mr. Blake came into his apartment at nine twenty. You were waiting there for him. No one else was there?"

"That's right."

"What time did you leave that apartment, Mrs. Kingsley?"

Her voice was scarcely more than a whisper, but it carried to every corner of the courtroom.

Pat Kingsley said, "About three o'clock in the morning."

A HUM rose from the spectators. The members of the press were writing like mad. A bailiff shouted for order.

I didn't get it. Lies were piling on lies; perjury on perjury. I should have felt elated, but I didn't. This was something I couldn't understand.

Garland resumed his questioning: "In other words, Mrs. Kingsley, you were with the defendant, Steve Blake, from 9:20 P.M., October 4th, until 3 A.M., October 5th?"

"Yes."

"Specifically—and this is of vital importance, Mrs. Kingsley—were you with Steve Blake in his apartment at ten o'clock that night, October 4th?"

"Yes."

"Of your own certain knowledge, did Mr. Blake leave that apartment at any time between 9:20 P.M. and 3 A.M.?"

"No."

"Another question, Mrs. Kingsley. You stated that you entered his apartment alone at nine o'clock, before he returned from his admitted visit to Jeff Nulty's apartment. How did you get into Mr. Blake's apartment?"

"With a key he had given me."

"When?"

"About two months previously."

"Were you in the habit of visiting him alone at night?"

"Yes."

"I regret having to embarrass you, Mrs. Kingsley—but a man's life is at stake. I must therefore ask this question: Am I correct in assuming that you were Mr. Blake's mistress?"

The spectators were seething. Pat Kingsley was nervously twisting a handkerchief between long, slender fingers.

"Yes," she said. "I was."

THERE it was: the perfect alibi, all tied up with pink ribbon, and handed to me on a golden platter. Only one thing was wrong with the picture. It wasn't true.

This was too fast and too bewildering for me. It wasn't as though my lawyer had picked a floozie out of a hat in a desperate attempt to clear me of a false murder charge; he'd come up with a gal who rated tops in the Los Angeles social world, whose father was prominent, wealthy and influential, whose face had been made familiar to millions through the society columns of the local papers.

By all outward appearances, this Pat Kingsley was a nice girl. She looked like a lady—even while she was telling the world that she was my mistress. She was properly embarrassed, properly brave. What I couldn't understand was the why of it. Why was she doing this? Why was she lying?

From next week's installment of THE SECRET PAPERS OF HARRY L. HOPKINS: When India was threatened and Mr. Churchill had Cabinet troubles he cabled Roosevelt: "I do not like these days of personal stress and I have found it difficult to keep my eye on the ball."

Some semblance of order had been restored in the courtroom. The judge made a little speech. In precise, judicial language he informed the spectators that if there were any further disorder, they'd all be pitched out on their ears. Then he motioned Brian to proceed.

Garland said, "Mrs. Kingsley. May I ask you to tell the jury whether I sought you as a witness, or whether you came to me?"

She did not look up. "I went to you."

"Voluntarily?"

"Yes."

"Why?"

"Because I knew Steve was innocent. I had been with him at the time Jeff Nulty was killed. I waited and waited, hoping that someone else could and would clear him, hoping that my appearance here wouldn't be necessary. When I went to you, I asked first whether you had any such witness, and you said no. So I decided to tell the truth."

"Which I'm sure everyone here appreciates. And you had no reason other than that you did not want to see an innocent man convicted?"

"That was all. I didn't come forward before because . . . well, because what I've done has been rather difficult."

"I understand . . ." Brian turned to the prosecuting attorney. "Your witness," he said.

George Walderson went into a huddle with his two assistants. He was perhaps remembering one of the fundamental rules of cross-examination: "Unless it is necessary, don't!" He looked at Judge Gaston and said, "No questions."

So that was that. Walderson was letting bad enough alone. It was a smart move. Every person present knew that questioning would fail to shake the girl's story. Brian sat down beside me, and mopped his forehead. He said, "We got 'em, kid; we got 'em."

I'm human. My first reaction was one of infinite relief. For some unfathomable reason, a young and lovely girl had c forward with a lie which seemed ce to save my life. That meant a lot to It would mean a lot to anybody.

To be punished for a crime of w you're guilty is right and just. T branded a felon and executed for a c which you haven't committed is ap ingly different. If you're about to dr you grab at a straw, at anything, w offers you a chance. You don't que where the straw comes from or wh is there.

The trouble with me is that I'm addicted to thinking. I reach a sati tory conclusion and keep right on g That isn't always so good. Brian lo at me and asked, "What's eatin you, Steve?"

I said, frankly, "I don't know."

"You don't know *what?*"

"Whether or not I like it."

"Good Lord!" He was confuse most as confused as I was. "M you've taken too much of a bea You're not thinking straight. This is saving your life."

"I realize that. But . . ."

"But what?"

"I don't understand it."

He made a gesture of impati "What is there to understand, kid? done a courageous thing . . ."

"Granted. But she's lying."

"Don't give me that."

"I tell you, she is. And I'm not s want it this way."

MY OWN words gave direction t thoughts. I wasn't sure I like not sure at all. To be acquitted on jured testimony added up all wro wanted the acquittal, all right, but I want it on those terms. The case v supposed to be decided on such evi as this. I felt grateful to the girl—ever her reason—but that didn't m had to approve of her method.

The more I thought, the more tain it seemed to me that this cour entitled to the truth. Up to now trial had been fair. This develo wasn't fair.

It came to me suddenly what going to do—what I must do, to my own self-respect. I spoke o pulse, but the impulse was right. "Brian, I want to take the stand."

He stared at me incredulously said, "Are you crazy?"

"I don't know. But that's what I

Brian was losing his temper. ruin everything."

"Maybe. But I still want to ta stand."

The judge glanced inquiring Brian. My attorney asked for a recess. The judge instructed the j retire for a few minutes. The jur out. No one else left the room. and I went into whispered confere

It wasn't a pleasant conference more he argued against my takin stand, the more it seemed to me the only right and decent thing to d insisted that I was being guided by sense of decency; that method matter so long as the result was He argued that snap judgment was than no judgment at all.

I tried to see it his way. I cor the logic of his points, but that change the way I felt. I wasn't try be noble. According to Brian, I w ing like a full-fledged dope. Per was. But I became more and mo tain that my initial impulse was that—no matter what the conseq —it was the way I wanted thin only way I could know any pe mind. I was stubborn.

Brian Garland was downright His normally pink cheeks were red. Nothing I could say made h things my way. Finally he whi tensely, "Do this insane thing, a can count me out."

record. I did the same work I'm doing now all through the war. That was at the request of the government. My job is a good one, and I'm in comfortable financial circumstances.

"Most of what I am about to tell you, you have heard from a parade of witnesses. With one exception, I believe they all have told the truth as they remember it. There are certain details, however, which could not be known to anyone except myself. I felt that you were entitled to hear those details.

"I have a two-room apartment in The Collins, on Franklin Avenue. That is about four blocks from the Casa Linda Apartments where Jeff Nulty was killed. I have dined frequently at the Casa Linda. For some time I've been trying to get an apartment there. In other words, I know the physical setup of the building, and also of the night club which is on the street floor.

"On Saturday afternoon, October 4th, I gave a cocktail party in my own place. As frequently happens at such affairs, people that I had invited brought friends along. One person who brought friends has already testified. That was Mr. Wade Ramsay, who owns the Casa Linda. He has been a casual friend of mine for years, although not an intimate. He brought with him Mr. and Mrs. Rex Kingsley and Jeff Nulty. As you know, Nulty was manager of the Club Casa Linda.

"I had met Nulty, but did not actually know him. I had met him only as any patron of a club might meet the manager. We had nothing in common and no other contacts.

"As host, I was worried about Jeff Nulty. He was loud, profane and obnoxious. I asked Mr. Ramsay why he had brought the man, and Ramsay said Nulty had just trailed along. I asked him to get Nulty out of there, and he said he had tried already but without any luck.

"Nulty got more and more boisterous. He was annoying the guests, particularly some of the ladies. Several of them left. I felt responsible for what was going on.

"I went to Nulty—that was a little after six o'clock—and asked him to leave. By that time he was thoroughly drunk and thoroughly nasty. He said he'd leave when he got damned good and ready. I insisted that he leave right then. I believe I called him a drunken bum.

"He swung at me. I don't remember whether or not his blow landed. I know mine did. I had had no idea of brawling in my own home with a drunken, uninvited guest—but lots of things happen that can't be foreseen.

"Nulty hit me then. Hard. I went down. He kicked me in the face, twice. A half-dozen men pulled him off.

"I was violently angry, as any man

t's get the Boston Red Sox—maybe we'll attract some high-class fellows!"

would be. I am not, as you can see, a weakling. I got up—bleeding. My friends were holding me, too. It was then that I said I'd kill him. I don't remember the exact words—I was too mad to remember. But you may accept as fact that I did say I'd kill him. If I'd had a chance right then, I probably would have. But I didn't have that chance. They hustled him out of the apartment.

"The party broke up pretty soon after that," I went on. "Several people offered to stay with me, but I wasn't having any. I was still mad. When everyone had gone, I took a shower and changed my clothes.

"A little before eight o'clock that night I decided to see Nulty. I couldn't forget that he had kicked me in the face when I was down. I didn't like the idea of having things end there. I cannot truthfully tell you what I had in mind except that I did not intend to kill him. You have every right to believe that I went there looking for trouble.

"Nulty lived in a little apartment on the mezzanine floor of the Casa Linda, right over the club. I went through the lobby and walked up the stairs to his office. I did not carry a gun.

"The door of his apartment was unlocked. I walked in. Nulty was sitting in an easy chair. He looked as though he was in the throes of a bad hang-over.

"He looked up at me and said, 'So it's you. I know why you've come. Well, I don't blame you. If you want to take a poke at me, go ahead. I acted like a louse, and I've got it coming.'

"That took the wind out of my sails. I cooled off pretty fast. I still didn't like him, and I still resented what had happened at my apartment. But his attitude tied my hands. I told him a few things, and he took them all.

"There was no fight. There wasn't even a quarrel. I certainly did not kill him. By that time I was feeling rather silly. I left him, and walked out through the lobby. I didn't see anybody and don't know whether anyone saw me. However, I did notice the lobby clock. It was exactly nine.

"I did not go straight home. My head was beginning to clear and I wanted to give it a chance. At about nine twenty I got back to my apartment."

And now I had come to the important part—to the thing which had impelled me to take the stand. I was trembling.

I said, "I did not kill Jeff Nulty. I want to be acquitted. I want it more than I've ever wanted anything else in my life. But because it is so important, I'd rather not have it the wrong way. I want to be acquitted because you believe I'm innocent, and not on the strength of false testimony.

"The testimony you have just heard—the testimony of Mrs. Patricia Maxwell Kingsley—is not true. The only part of it that is true is that she came to my cocktail party with Mr. Ramsay and her husband.

"That was the first and only time I ever met the young lady. She was not in my apartment when I got home at nine twenty. She was not there at any time that night. There is not, and never has been, any love affair between us. She is not my mistress."

GEORGE WALDERSON, the district attorney, got up. He took his time doing it. He looked at me with a glance that was almost affectionate, just about the way a cat would look at a mouse which had been tricked into a bad strategic position.

He was a nice-looking man. Distinguished. His clothes were a trifle too well tailored, his shave a little too close, the faint suggestion of wave in his iron-gray hair a bit too calculated. He had a state-wide reputation as a shrewd prosecutor. His record was impressive. He was politically ambitious. He was kind—oh, exceedingly kind—to reporters.

He moved closer to where I was sitting. He took the spotlight right away from me. Well, I wished him luck. He could have it.

Mr. Walderson's voice was smooth as butter. I was probably the friendliest defendant he'd ever tried to send to the gas chamber. His smile was intended to show me that he had nothing against me, personally. I was a case, nothing more nor less. He appreciated my co-operation. I'd made it probable that he'd win a case which had collapsed under him.

He said, in a tone almost apologetic, "Just a few questions, Mr. Blake . . ."

I didn't say anything. I waited for him to clear his throat and flirt with the newspapermen.

"Mr. Blake," he asked, "have you ever owned a gun?"

I said, "Yes."

"What caliber?"

"Thirty-eight Special."

"Is there anything about that gun—except the serial number, of course—which would enable you to identify it?"

"Yes," I answered. "A small triangular piece was broken out of the grip."

"How long have you owned it, Mr. Blake?"

"Several years."

"Where is that gun now?"

"I don't know."

COMMON CARRIER

A boy can bring so much outdoors
Indoors, on clothes and hide,
It really is a wonder that
There's any left outside.

—Richard Armour

"Would you mind explaining that statement?"

"Not at all. I've never had any occasion to use the gun. I kept it in a dresser drawer. The last time I looked for it, it wasn't there."

"And when was the last time you looked for it?"

"When the detectives who were investigating Jeff Nulty's death asked me where it was."

"When was that?"

"The morning of October 5th, the day after Nulty's death."

"Did they tell you why they were interested?"

"They said they had established that a .38 revolver was registered to me. They said that Nulty had been killed with a .38. They wanted to make a comparison test."

"Did they?"

"No."

"Why not?"

"Because the gun wasn't where I thought it was."

"How long since you had seen the gun in your dresser drawer?"

"I don't know. It may have been gone for a matter of hours or months."

"Isn't it a fact, Mr. Blake, that you took that gun with you when you went to call on Jeff Nulty on the night of October 4th?"

"No."

"Isn't it a fact that Nulty had beaten you up that afternoon, that you had threatened to kill him, and that you actually took that gun with you with the intention of killing him?"

"No."

"Isn't it a fact that you entered his room and actually did kill him?"

"No."

"What did you do with the gun after that, Mr. Blake?"

"I had no gun with me."

"You planned to kill him with your bare hands?"

"I had no idea of killing him."

"Why did you go to his apartment?"

"To settle accounts."

"You are a man of violent ter are you not?"

"I get mad occasionally."

"You had been brutally beaten kicked in the face by Nulty, hadn't y

"Yes."

"You had stated that you intend kill him?"

"Not the way you make it sou was fighting mad. I said I'd kill th and-so."

THE district attorney shrugged. " thing. Did you know that Jeff was an ex-convict?"

"I had heard it."

"From whom?"

"From a dozen persons. Hollyw full of screwy characters. Nulty apparently one of them. A gradu San Quentin running a fashionable club doesn't seem quite as incong around here as it might in some parts of the country. I believe th made no effort to keep his record cret."

"He even helped publicize it, he?"

"So I've heard."

"Now then, Mr. Blake—it a that you were bitterly angry with who had beaten and kicked you. knew he was an ex-convict. You a .38-caliber revolver. You visite ex-convict. He was killed with caliber revolver. Your gun has tously disappeared. Have I stat facts correctly?"

"The facts, yes. The adjective your own idea."

He said, "Your attorney may at any time."

"I'd rather he didn't, Mr. Wald Though it was my understanding o procedure that you were supposed questions and not to testify."

Two or three of the jurymen s Someone in the courtroom sni audibly. Walderson didn't like it.

He said, "You're a pretty s young man, aren't you, Mr. Blake?

I let that one ride. He cont "You're certainly smart enough t disposed of the gun with which yo Jeff Nulty, aren't you?"

I said, "I didn't kill Nulty."

"Naturally, you'd say that . . ." Garland was on his feet this time to voice an objection, but Wal didn't give him a chance. He said will be all, Mr. Blake."

That was all. He was throug me. No questions about Patricia well Kingsley. No gilding that li respect for Mr. Walderson rose a had been his best witness. He did pose to take the edge off my testim

Brian put in a few seconds of trated thinking. Then he said, "I fe rests." Judge Gaston called a re lunch. Brian asked whether I wa talk with him and I said no. I t I was sorry I had upset his applec he said it was my funeral. We hands and I went to my cell.

I wasn't sorry I'd played it th I didn't even do too much spe about what would happen. So my thoughts stayed with Mrs. Maxwell Kingsley and her starting testimony.

Hers had been no altruistic gest could it be regarded as the mo publicity fanatic. She wasn't the court the public gaze; she hadn' up in that sort of environmen had looked like the kind of girl man would like to know provi were still single and not the on of a father who owned too many

The more I thought, the foggi came. She had done a heroic th or rather, it would have been he it been true. Actually, it adde absurdity—except for that insist that there was desperate calcula hind her move.

(To be continued next wee

THE SECRET PAPERS OF HARRY L. HOPKINS

Continued from page 27

ere quickly dispelled. When the Chiefs Staff first sat down together, General arshall and Admiral Stark immediately esented a basic statement saying: .. our view remains that Germany is ll the prime enemy and her defeat is e key to victory. Once Germany is de-ated, the collapse of Italy and the de-at of Japan must follow."

The accusation has been made, par-ularly by officers who were attached General MacArthur, that Churchill needled and cajoled Roosevelt into opting the Germany-first policy when e President should have dedicated him-lf to the conquest of America's real emy, Japan; but this assumption gives r too much credit to Churchill and too tle to Marshall, Stark and the Ameri-n staff planners, including Dwight D. senhower who had only recently been omoted from temporary colonel to igadier general.

The President and the Prime Minister lected as their first main business the rmation of the grand coalition of the llies. By Christmas Eve, each had pre-ared and blended together a draft of a eclaration of the "Associated Powers."

Urges Religious-Freedom Clause

Hopkins' comments on the draft, com-unicated to Roosevelt in a memoran-m on December 27th, remarked that f possible, you should make every ef-rt to get religious freedom in this docu-ent. I believe it will be necessary for u to talk to Litvinov this noon about is."

That day Litvinov lunched with the esident, Churchill and Hopkins at the hite House. Roosevelt urged on him e importance of including a reference religious freedom. (It will be remem-ered that the omission of this from the tlantic Charter had brought down a eat deal of criticism on that document d Roosevelt wanted to be sure to have in this one.)

Litvinov felt that his government, to which he had already cabled the text of the declaration, would not look with favor on this suggested change. He said that the Kremlin might possibly agree to the phrase "freedom of conscience" but Roosevelt assured him, and asked him to deliver this assurance to the Kremlin, that it was precisely the same thing. I do not know how Litvinov managed to convey this to Stalin, but the fact remains that the words "religious freedom" appeared in the final declaration.

Churchill asked that another change in wording be made. After the word "governments" in the phrase "the governments signatory hereto"—he wished to add the word "authorities." The purpose of this was to permit the inclusion either immediately or subsequently of the Free French. On this discussion Hopkins has written:

The President and Churchill both tried to get Litvinov to accept the amendment which had been urged by the British Cabinet so that the Free French might subscribe to the document.

Litvinov, however, told the President and Churchill that he had no power to agree. Churchill tried to argue that the change was inconsequential but it was perfectly clear that Litvinov did not believe this. . . .

At this point Churchill became quite angry and told Litvinov in effect that he wasn't much of an ambassador if he didn't have the power even to add a word like this; that we were in a war and there was no time for long-winded negotiations. He said that we had agreed to every change in the text that the Russians wanted and it seemed to him they could agree to this.

Litvinov stuck by his point, however, and the declaration was issued without the word "authorities."

Later I learned that Litvinov had cabled for approval to include the word "authorities" and his government had given it to him.

However, this agreement must have

TRANSPOSAGRAM

BY ALAN MURRAY

Precisely at ten every Thursday night Franz Knight entered some public place in the metropolis, checked his gray hat, danced, dined, had a drink or two, retrieved his hat and went home. At about the same time the courier, whom Franz knew but to whom he never spoke, did about the same thing. During the evening Franz and the courier passed each other and secretly exchanged hat checks and the courier retrieved Franz's hat, which contained in an inner lining Franz's report for the week. Each Thursday morning he found his instructions in the personals column of the want-ad sections of the leading local newspaper. Here is one of the messages:

BALL CHAMPION TOO FEEBLE YET

	E			■	I	N	■		O		B													
			■		A	L	A			■			T	E										

Instructions: When transposed, the letters of the Transposagram above form a message in one complete sentence. Change the order of the letters and insert them in the empty boxes to form the sentence. A number of letters have already been inserted in their correct boxes. The empty spaces show the length of the words in the message.

(Solution to Transposagram on page 70)

the modern plastic filter that replaces the cotton-waste filter

The sensational new Purolator *Micronic* Oil Filter was designed to save you more money by keeping your car engine free from the damaging wear caused by sludge and abrasives. If your car is *not* equipped with a Purolator *Micronic* Oil Filter, have one installed today. If it *is* equipped with an ordinary oil filter, make certain to change the filter element to a *genuine* Purolator *Micronic* Filter Element.

The sensational new Purolator *Micronic* Oil Filter was originally designed, developed and tested by Purolator engineers. The results of test after test were so amazing that our engineers knew at last they had developed a filtering material that proved superior to our cotton waste.

The new Purolator *Micronic* Filter employs a plastic filtering material which operates efficiently with mineral or additive oils. The special accordion pleated design provides 8 times more filtering area and, in fact, will trap 200% more dirt, dust, grime and abrasives than the old style cotton-waste type filter. This sensational filter is heat-proof, warp-proof, water-proof and unaffected by crankcase acids. Only Purolator makes the Purolator *Micronic* Oil Filter.

P.S. Schenley's 94.8 Gin is back!

Now, you can enjoy its liqueur quality in your gin drinks. Always specify Schenley 94.8 gin. It's a worthy companion to America's most famous whiskey.

Distilled London Dry Gin, 94.8 proof, distilled from 100% grain neutral spirits.

• *Now avail e in the distin ve decanter as familiar rou bot In both, trac ional Schenley qua ty.*

Summertime is SCHENLEY *time...too!*

...because Sunny Morning Flavor makes your favorite summer drinks taste better

ENLEY COLLINS

...juice of ½ large lemon, 1 ...powdered sugar and 1 gen... ...jigger of mellow Schenley ...shaker. Add ice and shake. ...r into tall glass, add soda. If ...can put off sipping, trim with ...sit. If not—mmm—just enjoy it!

SCHENLEY MINT SOUR

Put juice of ½ lime, ¼ lemon and 1 tsp. powdered sugar in a sour glass. Add 2 dashes grenadine and 1 jigger—you guessed it!—of Schenley. Add 2 dashes carbonated water, fill glasses with crushed ice. Stir. It's deee-licious!

SCHENLEY HIGHBALL

America's most enjoyable highball starts with 1 generous jigger of Schenley—naturally!—in a tall, tall glass. Add 3 cubes ice—or amount of ice to suit your taste — and fill with carbonated water. Stir gently, enjoy greatly.

SCHENLEY MINT JULEP

Crush 4 sprigs fresh, dewy mint with ½ tsp. powdered sugar. Put half of mint in tall glass. Partly fill with crushed ice. Add remaining mint and sugar. Fill with ice. Add 1½ jiggers of Schenley. Stir till frosted — and sip!

A Schenley Mark of Merit Whiskey

ummer just isn't *official* until you've enjoyed one of these magnificent Schenley summer coolers . . . each one Mellow as a Sunny Morning! For greater luxury . . . enjoy the rare pre-war quality of today's Schenley.

re Pre-War Quality Blended Whiskey 86 proof. 65% grain neutral spirits. Copr. 1948, Schenley Distillers Corporation, N. Y. C.

come too late as the change did not appear. The changes in the text requested by the Kremlin were actually negligible. They were all due to Russian reluctance to indicate any commitment to join the war against Japan. All of the Russian revisions were accepted and Roosevelt wrote them on the draft in his own hand.

On New Year's Day, 1942, the representatives of 26 countries gathered in the White House and signed the document which gave birth to the United Nations.

It must be remembered that this prelude to a new world symphony was being composed against the reverberations of shocking defeats in the Pacific. The Japanese were sweeping ahead and American prestige was sinking rapidly.

Japan's Conquests Inspire Fear

It had been assumed, when the grand strategy was laid down, that the Japanese could be contained within the line bounded by the Aleutian and Hawaiian Islands, Samoa, Fiji, the Solomon Islands, the East Indies, Singapore, Thailand, and the maritime provinces of Siberia. Now it was becoming evident that they could not be thus contained, that they might sweep southward over the East Indies to Australia and westward through Burma into India and even on to the Middle East.

A new theater of war was accordingly and hastily established, known as the ABDA Area, the initials standing for American, British, Dutch, Australian. This covered the huge, confused area from the Bay of Bengal to Australasia. It was during the first discussion of this problem at a meeting of the British and American Chiefs of Staff on the afternoon of Christmas Day, that General Marshall made a proposal which was to assume utmost importance in the conduct of the second World War. These are his words as directly quoted in the official minutes:

I express these as my personal views and not those as a result of consultation with the Navy or with my own War Plans Division. As a result of what I saw in France and from following our own experience, I feel very strongly that the most important consideration is the question of unity of command. . . . I am convinced that there must be one man in command of the entire theater—air, ground and ships. We cannot manage by co-operation.

There was plenty of disagreement with that proposal. At a major meeting in the White House on December 26th, Roosevelt expressed his approval but Churchill took issue with it. The Prime Minister said that unity of command was all very well when there was a continuous line of battle, but that in the Far East some of the Allied forces were separated from each other by a thousand miles or more. He believed that these various forces, Army, Navy and Air, representing four different countries, should operate on their own with the individual commanders responsible only to the Supreme Command in Washington.

At this point, Beaverbrook jotted down a note on a White House memo pad and passed it to Hopkins. It read: "You should work on Churchill. He is being advised. He is open-minded and needs discussion." As a result of this, Hopkins arranged for a private meeting between Churchill and Marshall at which the latter was able to convince the Prime Minister of the soundness of his proposal and to gain his agreement to it. This was a demonstration of the peculiar role played by Hopkins at all the major conferences of the next three years. There were many more notes passed to Hopkins under conference tables and many more examples of his effective, off-the-record action. He was rarely confined by the customary "channels."

When the principle of unified command was accepted, Roosevelt suggested that General Sir Archibald Wavell be named for the unenviable post of Supreme Commander of the ABDA Area. The British Chiefs of Staff were vehement in their opposition. Suspecting that this was a Roosevelt trick to shift the ugly responsibility, they felt that the British delegation should insist that an American commander be given the post (and the blame).

Lord Halifax agreed with them, but when this attitude was conveyed to Churchill he exploded that this suspicious attitude implied doubt of the motives of the President of the United States and he would not stand for it. So far as he was concerned, Roosevelt's gesture was a friendly and a generous one. But Wavell never was given a chance to exercise this command.

The situation had gone to pieces before any forces could be assembled let alone deployed.

The records of the Arcadia Conference are too voluminous to be reproduced here but part of the minutes of one meeting held on January 12th gives an idea of the complexity of the problems. After a general discussion of plans to invade North Africa, General Marshall explained plans for:

. . . 21,800 American troops to sail from the East Coast on January 20th, to arrive in the ABDA Area approximately February 14th. This convoy to consist of 10,000 ground troops for New Caledonia, which with the artillery brigade now in Australia would furnish approximately a division for New Caledonia. . . .

General Marshall stated that a serious consideration was the fact that the proposed ABDA convoy would result in a 30 per cent reduction of Lend-Lease to Russia for a period of four months, and would also reduce the Lend-Lease matériel going to Basra. (This was due to transfer of shipping to the South Pacific convoy.)

The President stated that the plan sounded good. . . .

Mr. Churchill observed that the plan as prepared would result in some confusion, that a fact to be given consideration was the delay of shipments to Russia; that the Russians would undoubtedly be disappointed.

He asked if the plan had been the subject of joint discussion between the Chiefs of Staff.

General Marshall stated that it had. The President asked, if the occupation of New Caledonia was eliminated, could we carry out our Russian promises?

General Marshall stated that he could not be sure, but if anything was to be pared, the New Caledonia portion should be the first reduction.

Mr. Hopkins observed that 30 per cent of the shipping to Russia involves only seven ships, and that we should be able to find seven ships, even if it involved stopping the shipment of some reserve materials to England; that with the 1,200 merchant ships we have available, locating seven should not be too difficult.

Admiral Stark stated that the primary question was which was of the greater importance—the 30 per cent reduction of Lend-Lease to Russia or immediate reinforcements for the Far East.

Mr. Churchill observed that the fighting in the Far East and the fighti Russians are doing should take p over other things.

The President stated that he General Marshall's program (for sion of North Africa) if only some could be found to take care of th sians. . . .

Mr. Hopkins suggested that the dent and the Prime Minister tal responsibility of getting Lend material to Russia, and not ho General Marshall's plan on this ac

The President asked Mr. Hop he could get enough ships to tak of the Russians.

Mr. Hopkins stated that if the dent would get Admiral Land a Arthur Salter in and tell them the tion, he was sure it could be don

The President then stated, w prove General Marshall's plan. W make Beaverbrook and Hopkin ships and will work on Super-Gy (North Africa) at the earliest p date.

The seven ships that Hopkins should be kept on the supply ro Russia seem like a negligible quar a war of such dimensions; yet, wh meeting was held, for all anyone tell, those seven ships and their c might mean the difference to the Union between continuing the w making a separate peace.

On December 28th, Churchill cable to the Lord Privy Seal con the following paragraph:

It is intended that General should have a staff in the sort portion as Foch's High Control st to the great staffs of the Briti French armies in France. He wo ceive his orders from an appr joint body, who will be respons me as Minister of Defense and President of the United States, also commander in chief of all States forces.

The Lord Privy Seal, on behalf War Cabinet, replied, saying, "Sir and your advisers in Washingt convinced that scheme is a war the Cabinet thought it right to scheme in principle . . . the poin has given us most difficulty is c tion of joint body referred to . . .

Two Sides to a Controvers

On December 29th, the Chiefs drew up an outline of the system mand. This was sent to the White in the evening, and Roosevelt an kins worked over it. The Chiefs had recommended "that no speci should be set up for this purpose it would tend to clog the machi that "existing machinery sho used."

Roosevelt's revision of this w tic. The same passages as he r them proposed "that a special b set up for this purpose in Washi

The following day, Decemb Hopkins noted:

The suggestion of an "app joint body" has kicked up a h row.

As a matter of fact I sugges words to the Prime Minister found he was getting all set to the directions himself. It seeme so essential to get the unity of c through in the southwest Paci rather than try to define what propriate body" would be, I urg the Prime Minister and the Pres send it along and decide the of the "appropriate joint body"

It now develops that everyb his grandmother want to be joint body and it now looks as if end by having the joint Brit American staffs assist the Presi any rate they will run it.

The "appropriate joint body" organization which became kno

From next week's installment of THE SECRET PAPERS OF HARRY L. HOPKINS: Hopkins wrote: "This war can't be won with men who won't take great and bold risks, and Roosevelt has got a hatful of them in the Army and Navy that will have to be liquidated."

bined Chiefs of Staff and the refer- to "everybody and his grand- ner" reflected the desire of other d nations to be represented on it— not merely "for consultation and sory purposes."

hen the Combined Chiefs of Staff been agreed on, it was logical to eed to the establishment of com- d boards for all war activities: itions Assignment, Shipping Adjust- t, Raw Materials, Food, Production Resources. The first of these was by dds the most important, and the only vidual upon whom all elements could e as bearer of final responsible au- ity was Harry Hopkins.

here were long arguments over Muni- s Assignment, for it was obvious that sions affecting the distribution of lies as between one ally and another, ne neutral and another, might as- e considerable diplomatic signifi- e. This was one of the few subjects which a division appeared on nation- ic lines as between British and Amer- s, and it was never closed. For a time emed as if no agreement could be hed and the final resolution reached oosevelt was accepted by the British on a temporary, trial basis.

Lieutenant General G. N. Macready, stant Chief of the British Imperial eral Staff, had proposed a system of llocation whereby the world would ivided in effect into two spheres of in- nce, with the U.S. and Britain "each ng for the needs of the Allies for m it has accepted responsibility." proposal, which was strongly ed by the British Chiefs of Staff, was well received by the Americans, in- ing Hopkins. It would mean that allocation of American-produced riel for Europe, Africa, and the dle East would be directed from don.

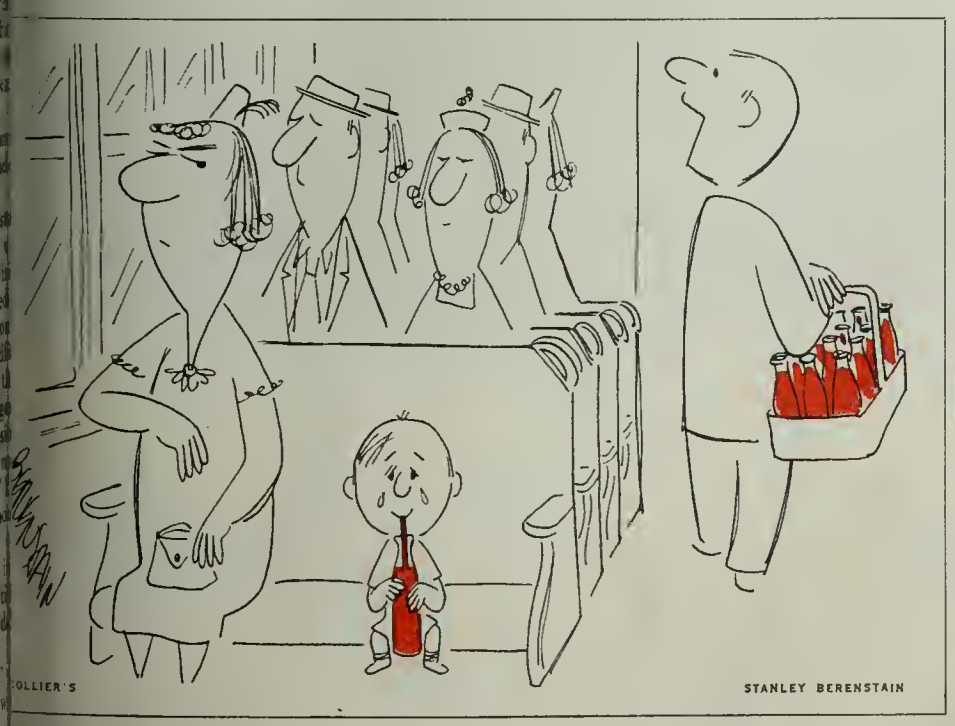
hen it was presented at the Com- d Chiefs meeting on the next to last of the conference, the Americans k it out; they stated that this was a er for decision on the highest level. tly before the final formal session e Arcadia Conference in the White se, the President read to General shall the statement which he and umably Churchill and Lord Beaver- k had prepared concerning the e-up of the Munitions Assignment rd.

he board was to be divided into two ual parts, one in Washington, led by Hopkins, and the other in don, headed by Beaverbrook. Hop- and Beaverbrook were to report tly to the President and the Prime ister and thus be on a level with and pendent of the Combined Chiefs of . Marshall insisted that the MAB t be under the authority of the Com- d Chiefs of Staff.

Marshall felt so strongly on this subject that he informed the President that unless the conditions as he stated them were accepted he could not continue to assume the responsibilities of Chief of Staff. He advanced the unanswerable argument that neither he nor any other Chief of Staff could plan military operations and carry them through if some other authority, over which he had no control, could refuse to allocate the matériel required for such operations.

When Marshall completed the brief but vigorous and clear statement of his views, Roosevelt turned to Hopkins and asked for his opinion. Marshall assumed that Hopkins had participated in the arrangement as Roosevelt had stated it and would therefore oppose him, but, to his surprise, Hopkins supported him vociferously, even stating that if the organization were not established as Marshall said it should be, he could not assume any responsibility for or in it, either.

Pride Bows to Expediency



At this point Churchill, Beaverbrook, Stimson, Knox and the staffs arrived for the meeting, in the course of which Marshall again stated his positive opinions and Hopkins again supported them with vehemence. The formal records of this session give little indication of the tension and even embarrassment that prevailed; the historian must read a great deal between the lines to appreciate the fact that herein was the serving of notice on such proud men as Churchill and Beaverbrook that Roosevelt was the boss and Washington the headquarters of the joint war effort.

Hopkins became the head of the Munitions Assignment Board, but he himself at this meeting described the M.A.B. as a "subcommittee" of the Combined Chiefs of Staff who, if they "do not like the subcommittee's recommendations, can alter them or throw them out."

Both Churchill and Beaverbrook argued the point, but Roosevelt made it clear that he supported Marshall and Hopkins.

The war production goals announced in part by Roosevelt in his message to Congress early in 1942 were so astronomic that they were greeted with derision and, in some cases, despair by military and civilian authorities alike.

Some officers in the War Department were passing the remark, "The President has gone in for the 'numbers racket'!" Others could see nothing humorous in these impossible figures; believing that the goals could not possibly be realized, they foresaw grave criticism and probable injury to public morale when the failures became evident. Hopkins was freely blamed for deluding Roosevelt into propagating this dangerous fantasy. It was assumed that Hopkins, a notori-

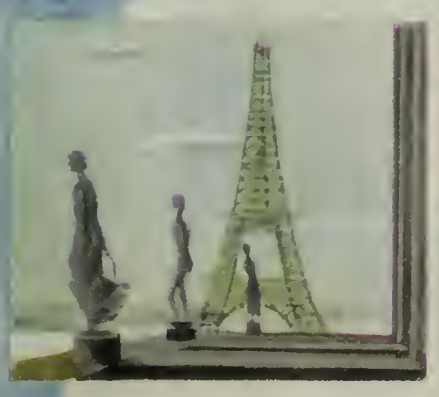
WHEREVER THERE

WHEREVER goods and services are bought and sold, wherever people are engaged in manufacturing, finance and trade, you'll find Burroughs business machines on the job.

For the "bookkeeping" of business is a vast operation. Sales, wages, purchases must be recorded and accounted for, income and outgo checked and balanced, every transaction figured to provide a record of today—and a guide for tomorrow.



In every part of the world, Burroughs business machines help accomplish this highly important function. Business turns to Burroughs because Burroughs machines are fast and dependable; because the Burroughs line is broad and flexible, meeting every figuring, accounting and statistical need; because Burroughs experience assures the most effective application of machines to meet requirements; and because Burroughs service maintains Burroughs machines at peak operating condition.

Today's Burroughs machines are finer than ever . . . improved and modernized through Burroughs' intensified program of research and development. Burroughs worldwide sales and service is keyed to the task of *mechanizing* figure-work to save time and reduce costs for any business, anywhere.

PARK & TILFORD DISTILLERS, INC., NEW YORK • 62½% GRAIN NEUTRAL SPIRITS • 86.8 PROOF

ously free spender, had been misled by Beaverbrook and the reckless New Dealers.

However, Hopkins was no Svengali, and Roosevelt was in no trance when he proclaimed the Victory Program of production. It was in Roosevelt's nature to believe that the surest way to capture the imagination of the American people was to give them the greatest possible challenge. The total cost in money bothered him not at all; he always believed that it was far better to squander the taxpayers' money than to squander the taxpayers.

As a matter of fact Roosevelt arbitrarily revised some of the figures upward on the eve of his speech to Congress. When Hopkins questioned him on this, Roosevelt said, "Oh—they can do it if they really try."

Two sets of figures tell the story of the raising of the sights:

	Pre-Pearl Harbor Estimates for 1942	Post-Pearl Harbor 1942
Operational Aircraft	28,600	45,000
Tanks	20,400	45,000
Antiaircraft guns	6,300	20,000
Merchant ships (deadweight tons)	6,000,000	8,000,000
Antitank guns	7,000	14,900
Ground and tank machine guns	168,000	500,000
Airplane bombs (long tons)	84,000	720,000

When Churchill, who was in Washington, saw those final figures, he transmitted them to London in an exultant cable. He informed the War Cabinet that Beaverbrook had been "magnificent" and Hopkins a "godsend."

Notes on the Start of WPB

Roosevelt also announced at this time the formation of the War Production Board and the appointment of Donald Nelson as its chairman. This was described by Hopkins in notes, written January 14, 1942:

It was necessary to ask Henry Wallace to resign as Chairman of Supply Priorities and Allocations Board because the President had made up his mind to change the name of SPAB to the War Production Board and, hence, Wallace had to be seen prior to the announcement. The President decided to talk to none of the other interested parties.

The amusing part of the whole business was that everybody was a candidate. Wallace, I am sure, hoped the President would ask him. A great many of my friends were pushing Bill Douglas. Henry Morgenthau wanted it worse than anything in the world. So did Jesse Jones and, of course, Knudsen.

The hullabaloo in the press was in reality an attack on the President. President's enemies wanted him t to give up being President and let s body else exercise the power to w the people had elected him. . . . Army and Navy have been shortsig and Congress has never seen the of all-out production.

Two days later, Hopkins added th

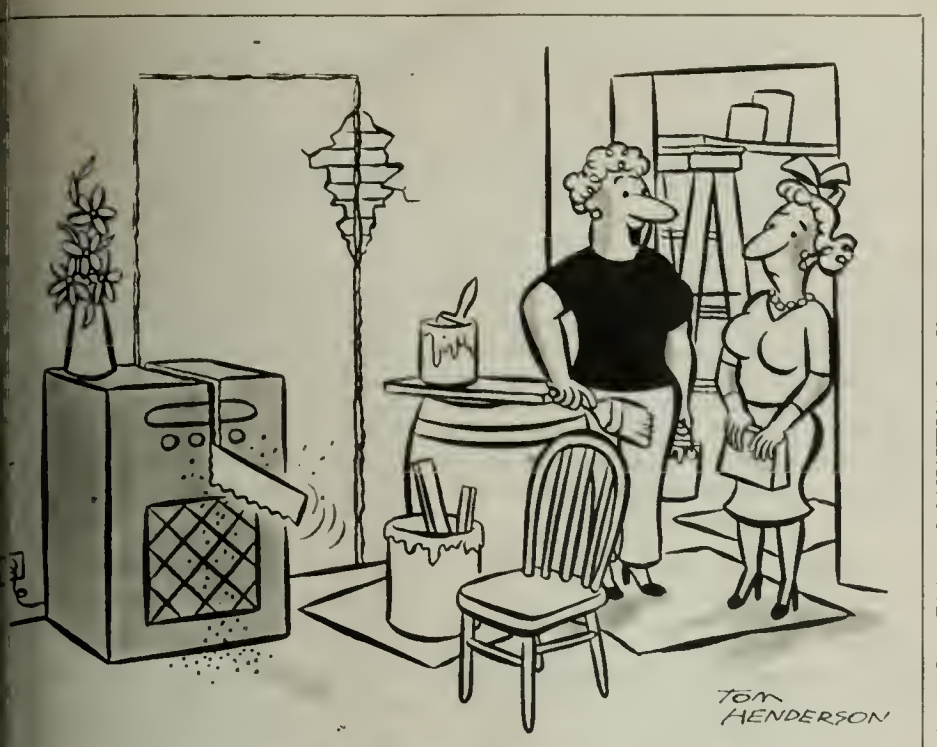
In my conversation with Don N immediately prior to his appoint (January 13th) and, indeed, ov period of weeks when it became that Knudsen was not the man t production during the war . . . i occurred to me that the way to h Knudsen, who had great standing the American people and, indeed, abilities, was to put him in the Arm

I felt the President was not in hi form in dealing with Knudsen, alth he was very kind and generous i comments to Knudsen.

It had been arranged that the dent would offer him a job either officer or as a civilian. Knudsen s thought he could work more effec as an officer. There was a good d banter about Knudsen in a uniform the luncheon ended with Knudse ing he would do anything tha President wanted and accepting th pointment as lieutenant general i Army, in charge of production, to under Patterson.

When Churchill left the White H to return home on January 14, 19 knew that he must face some hostil icism in Parliament for having s away so long at a time when the E Empire seemed to be falling to pie the Far East. Roosevelt and Ho drove with him to the train to se off. Hopkins sent a letter to Mrs. Ch ill, saying:

You would have been quite pro your husband on this trip. Fir cause he was ever so good natur didn't see him take anybody's he and he eats and drinks with hi tomary vigor, and still dislikes the people. If he had half as good here as the President did havin about the White House he surel carry pleasant memories of the three weeks.



The day after Churchill's dep Hopkins went into the Naval H for a period of rest and rigorous ment to restore some semblance o ity to his frail frame. His sup strength was strictly limited, and were no reserves behind it, and that was exhausted he appeared t dying man.

(Next Week: We prepare for a front.)

d hardly understand him." On the hand, he knows he lays it on for reen. When a producer told him xt role had been carefully written h dialect, he said, "You could have h it in Scandinavian, and it would me out Irish."

is an extremely quiet, dignified, le man at the studio. Everyone, his bosses, calls him Mr. Fitzgerald. Crosby calls him Pop.

ry Fitzgerald's actual circle of s is limited. In the house, besides hy, his part-time blond secretary he's employed for three years, e colored maid who comes in to house twice a week, there's only allon. Paramount originally hired o serve as Barry's stand-in. Even- Gus moved in with Barry, and to- return for room and board, serves con and eggs for breakfast and es over Beau Barry's wardrobe of old caps, two suits, eleven pairs of ls, three pairs of pajamas (loud), brown- and red-checked topcoat looks like the last blanket off cuit's back).

as after Gus had been with him l months that Barry learned his vas an Iroquois. Barry was shaken. told a friend, "I had read they were thirsty people given to all forms inds of torture." When it became t that Gus would not even toma- a fly, Barry relaxed.

others Can't Act in Same Film

ry is closest to his actor-brother, r Shields, who calls him Will and he calls Boss. Barry dines almost evening with his brother, his broth- ife, an Irish actress named Una. heir two children aged seventeen vo. Barry once appeared in a pic- ith his brother. It was called Easy . Easy Go. It was their first and ovie together. Their last because oices are almost identical. When phones his brother's wife, she in- ly thinks it is her husband. Now r Arthur works alone.

year, Barry persuaded his older sixty-five-year-old Biddie Mor- to leave Ireland for the first time y to Los Angeles. Biddie, who ike Barry with curls, proved to be character. When a friend asked how his sister took to his stardom, shook his head. "As you well know, a prophet is never honored in his own family. She thinks it was all a mistake, leaving my pension."

One afternoon Barry had an engagement at Gregory Peck's house, and he asked his sister if she would like to accompany him to Peck's. She said she certainly would. Barry and Gregory Peck talked for an hour, while the old girl sat munching crackers and occasionally smiling at Peck. When it was time to go, she turned to Peck. "You know, young man," she said, "I've seen you somewhere before."

Gregory Peck is one of Barry's few movie friends. Two others are Pat O'Brien and Alexander Knox. Barry never associates with Bing Crosby outside the studio. But he has great admiration for the groaner. "Crosby is really a unique person," Barry says. "He has a freak sense of co-ordination. I watched him one day on the set, hitting a baseball. Extraordinary control. I think it accounts for his ability to ad-lib."

Outside of Hollywood, Barry's best friend is John O'Leary, nicknamed Sir John. O'Leary is one of the rich men in Dublin, with money in British magazines, the Shannon Airport, sewing machines, penicillin. When Barry was last in Ireland he lived on O'Leary's yacht. However, since O'Leary is in Hollywood only infrequently, Barry will often have his next-door neighbor, a retired banker named Kelly, in for a quick snort. Or he will have a spontaneous stag. At the last one several weeks ago, Pat O'Brien brought over Jack Dempsey, Lawson Little, Gene Fowler and Grantland Rice. "It was enriching," Barry recalls. "Dempsey told about the battles of his youth, grand old stories, related without vanity."

Barry Fitzgerald is a less disciplined conversationalist. Once, stretched out on the sofa after dinner, he loosened his belt, unbuttoned his trouser waist, and began telling his guests a story. So engrossed did he become with the climactic scene, that he leaped to his feet to act it out. His trousers immediately fell to his ankles. Barry didn't even notice. He finished his story standing in the middle of the room in his shorts.

About women, Barry Fitzgerald is full of praise. But he has been a bachelor for sixty years and he expects to remain one to the end. When a studio press agent approached him about dating a delicious blond starlet, just for the pub-

licity, Barry almost burst a blood vessel. Undaunted, the press agent suggested Barry start escorting a character closer his own age.

"I'm not the type for such shenanigans!" Barry cried. "Go away and let me age in peace!"

This resistance was not unusual. At an earlier date, the night of the Academy Award, when even the most reluctant hermits put on their bibs and come out for air, the studio tactfully suggested to Barry that he appear with a date. It would look good in the roto sections. Barry made sounds like a wounded grebe, and said he would forfeit an Oscar rather than subject himself to female chatter and public gossip for an entire evening. Barry won.

Alibi of a Perennial Bachelor

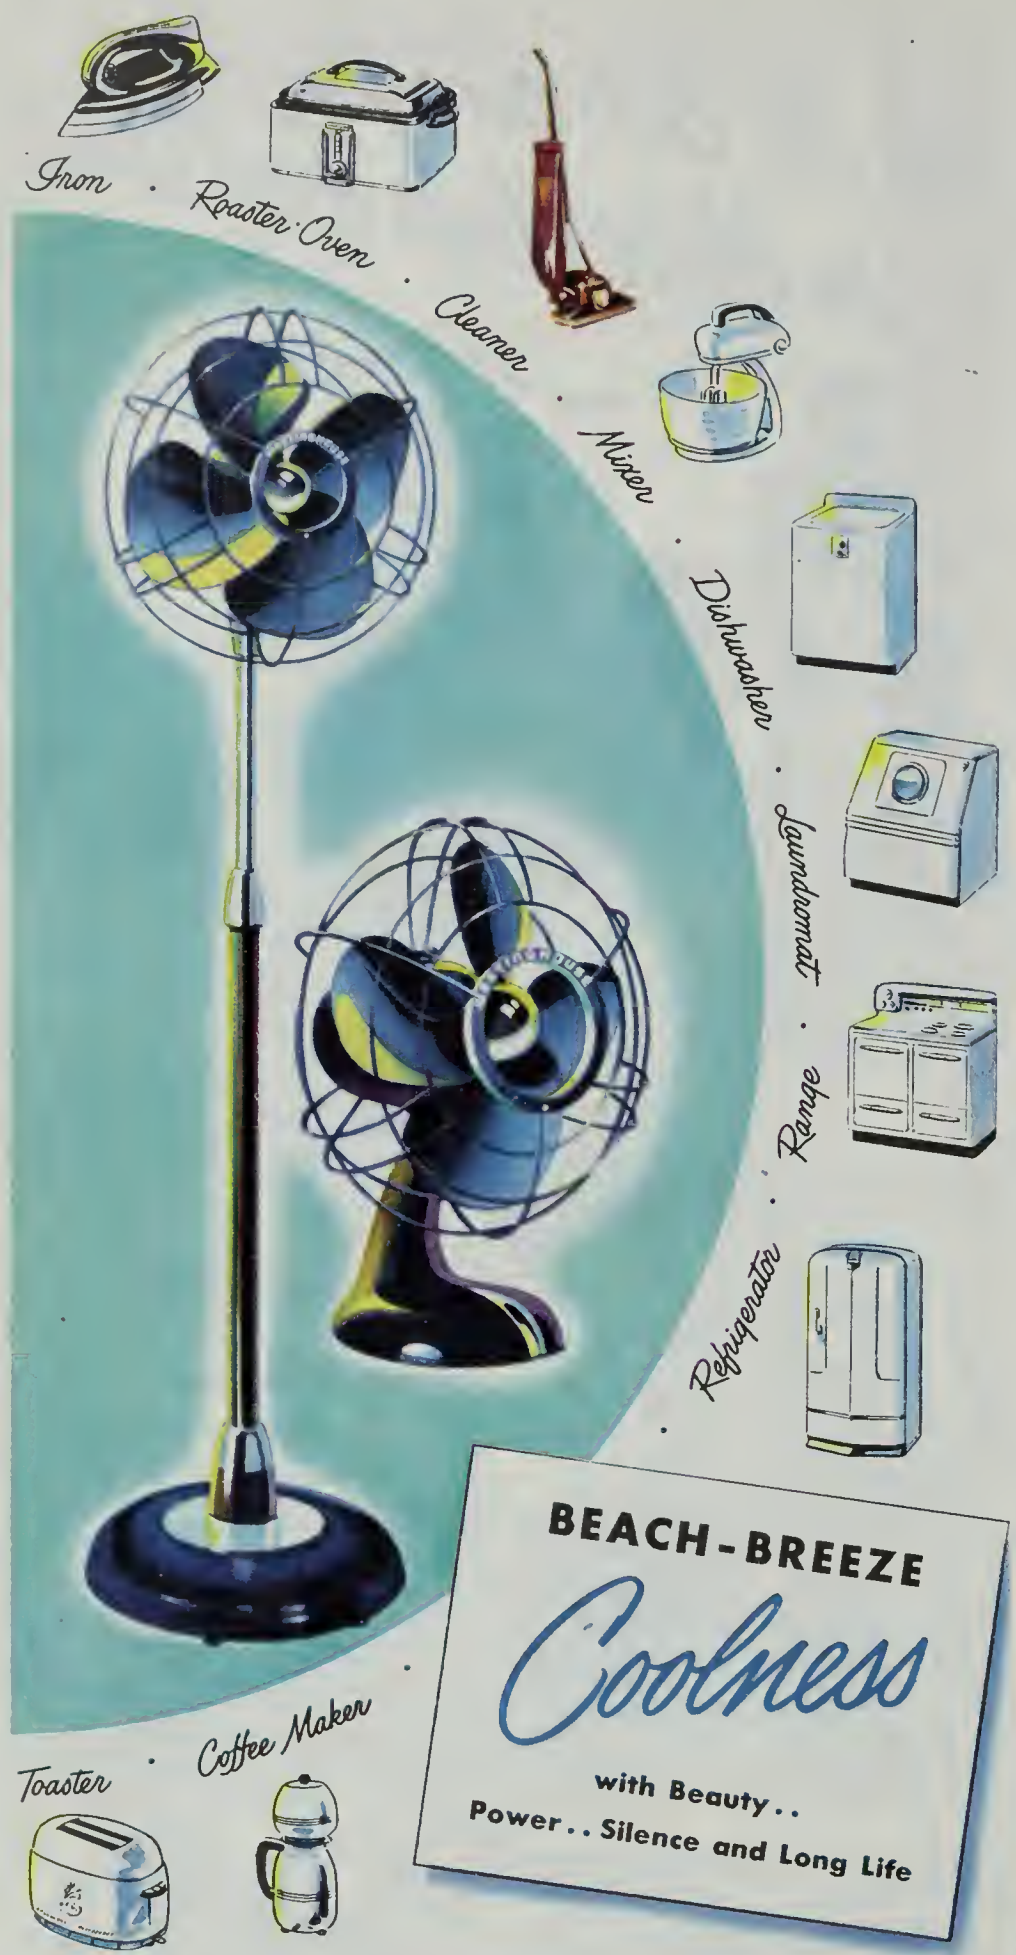
As a matter of fact, he has nothing against the opposite sex. Asked to name his favorite glamor gal, he lighted up and replied, "Ah, my lad, they're all grand." Then why hadn't he married until now? "In Ireland there were many times I was almost wed. Every six months or so. Several times I barely got out of it. But perhaps it was that I admired the ladies so much in general that I could never settle down to one in particular. Anyway, bachelorhood was more common in Ireland than in America, and more accepted than here. Besides, there was the time element. Don't forget that until I was forty-two I was doing two men's jobs, which left little time for thinking seriously about women."

But while Barry Fitzgerald reveres bachelorhood, there is ample underground evidence that he is by no means in the same class with the 4,000 monks of the Grecian Mount Athos monastery who have not permitted a female on their premises since 1345 A.D. There is the story of Barry's recent location jaunt to Manhattan.

Instead of the bright lights, Barry happily amused himself evening after evening exchanging anecdotes and gin with two studio technicians who came up to his hotel rooms. One evening, at the last moment, Barry phoned these gentlemen and asked to be excused. "Headache," he complained. "I'm going right to sleep." Worried, the two studio technicians decided to look in on Barry anyway. Without announcement, they burst into his room, and found him with a harem of two women. Closer scrutiny proved both sirens were a half century beyond the age of consent. However, there were evidences of orgy—a decanter of celery tonic on the bureau.

Barry, his face a sunset, tried to make the introductions. "These women, women are friends," he gurgled, Ireland, friends of my sister Bi But what astonished the two studio nicians then, and continues to them to this day, was Barry's sh which would not allow him to say would be up in his suite, even t the women were friends of his who had surely seen Victoria's jub

Beyond such pleasures, Barry F ald has three varied forms of rela —piano, golf and motorcycle. piano he was strictly chopsticks the age of fifty-two, when he to first lesson. He continued taking a a week until he was fifty-five. when he isn't working, he practice hours daily. Recently friends su him at the instrument, and four off the stool, completely over th board, his eyes a half inch from the After a moment, he looked up. "J laxing," he explained sheepishly.



His golf is an even more seriou ter. He has been playing since his when he saw Ray and Vardon in He goes at it three times a week, a swank country club but at a course. Besides himself, his fo consists of an assistant director, a businessman, and Stubby Krug ex-swimming great who now doub Johnny Weissmuller. Before m Barry practices putting on his room rug, which now has a rut do middle. Barry shoots a grim, l eighteen holes in 90, and is third his foursome.

When people ask if he has ever golf against Bing Crosby, Barry his head. "Heavens, no! He's *go*

His other relaxation is an E made motorcycle, which he calls tor bike. Recently, Barry and his took the motorcycle apart for and when the parts were scattere couldn't put them together agai ry's secretary suggested that thi good excuse for getting rid of th nal machine. "All right," he rel agreed, "I'll sell it. Call a dea have him come over tomorrow eral days later, when the secreta to work, she found the remnant old motorcycle gone—and a shin one in its place.

When Hollywood big shots bot to appear at functions, to grab p to let himself be seen, he likes t deeper into his sofa with a boo mixed gin drink. The phone r rings, and Barry Fitzgerald is who doesn't answer it. "Why ca leave an old man alone?" he ask one more gulp of the good stuff

THE END

Put an end to hot, stuffy hours! Lively air from Westinghouse Long-life Fans provides new comfort and coolness on hot summer days and nights. Other times, too, when lazy air slows spirits and efficiency. Superbly quiet, and extra safe, thanks to Micarta blades. Have plenty of power to freshen up the air in any room. A full 60 years of "know how" stands behind every Westinghouse Fan. See them, feel their refreshing coolness. At the same time, see the many other members of this famous family of appliances, at your Westinghouse retailer's now.

WASHINGTON

★ ★ ★ PARTY LINE ★ ★ ★ ★

O sure bets on what will happen at pproaching Democratic convention: President Truman will not get a ma- y of the 1,234 votes on the first ot, and (2) if, in the end, he is nomi- d, it will not be by acclamation.

ILE Democratic chiefs carefully t talk about the matter out loud, their nish over the bleak state of party nces is second only to that on party y. The Democratic treasury is at its st ebb since the defeat of the late Al h in 1928. Until recently, the Na- al Committee was without a full- treasurer for more than a year, and months its expenses have exceeded me.

orse, the prospects are very dim for kind of sizable contributions neces- for the forthcoming national cam- n. Truman, simply, has not attracted kind of money—particularly from York, California and Texas, the cipal fund producers under Roose-

ehind the scenes, this hard-boiled re- is one of the toughest factors the dent has had to buck in lining up l leaders. Aside from any other vances they may hold against him, politicos have been bluntly asking e the money is coming from to elec- er under his banner.

convention will mark the passing vo local party chiefs who have long ed stellar roles in national Demo- c affairs. They are Edward J. Kelly, ayor of Chicago and Illinois Na- l Committeeman, and Edward J. n, Bronx boss and New York Na- l Committeeman. Both will disap- from the National Committee; n voluntarily, and Kelly by defeat. e Flynn, the former Cook County wants to retain his committeeship, robably hasn't the votes to win.

HIS recent sixty-fourth birthday, the dent received a gift containing the wing card, written by Major Gen- Harry H. Vaughan, bulky White se military aide, "From your stupid very loyal staff."

LIKE his three immediate predeces- Coolidge, Hoover and Roosevelt, rarely dined out, President Truman a lot of it. He is particularly fond timate dinner parties . . . General hower's chief relaxation is bridge. an ardent devotee of the game and pert player . . . Supreme Court Jus- William O. Douglas has a complete ction of original autographs of ev- President of the United States . . . ming's Senator Joe O'Mahoney, ng Democratic Vice-Presidential bility, and his wife once were news- r reporters. O'Mahoney is rated as eading authority on antitrust laws in gress . . . Southern liberals are boom- eorgia's former Governor Ellis Ar- or second place on a Truman ticket. her eager Southern aspirant is dap- enator Claude Pepper of Florida . . . result of the Southern revolt, this s Jefferson-Jackson Day dinner net- he Democratic National Committee $300,000 as compared to $750,000 evious years.

. strategists are quietly making significant changes in Operation , their big Southern organizing aign. Results of the first two years e drive were only fair. Van A. Bitt- ner, director of the campaign, claims 400,000 new members in 13 states, but admits this is far below expectations. As a result, plans are being revamped. Efforts will be more concentrated, tougher. Chief target will be the textile industry. So far, only about 20 per cent of Southern textile workers are unionized.

INTELLIGENCE reports from behind the Iron Curtain reveal a new squeeze is being put on Russian farmers. They have already had two jolts. The first was the drastic currency devaluation, which descended hardest on the growers. The second was the outlawing of homemade vodka. The latest squeeze is on livestock. Farmers are being required to give up a proportion of their cattle.

Reason for the levy is that while livestock on state and collective farms dropped off considerably last year, the number of privately owned cattle increased more than 20 per cent. To the Kremlin, that sort of enterprise called for a confiscatory crack-down.

FORMER Governor Coke Stevenson has the inside track in Texas' hot July 24th primary for the seat of ebullient Senator "Pappy" O'Daniel. But while leading, Stevenson may have to go through a runoff to nail down his claim. With other strong candidates in the race, an outright majority may be unobtainable in the primary. One significant aspect of the campaign is that none of the aspirants are running as Truman Democrats. All are carefully avoiding any mention of the President.

PROFOUND observation by Representative Max Schwabe of Missouri during a committee hearing on a bill to extend Social Security benefits: "Every man should try to stand on his own bottom."

SOME things *are* different on Capitol Hill. Time was when lower Pennsylvania Avenue was lined with saloons, and the flowing cup was the accepted adjunct of members of Congress. But no more. The day before Congress adjourned, a clerk dashed out of a meeting of the Senate Appropriations Committee and, rushing up to a guard, demanded, "Where can I get some candy, quick? One of my senators wants some gumdrops, and another a chocolate bar."

OUR Secretary of State George Marshall usually lunches at his desk on an apple and a bottle of milk . . . Odd capital hobbies: U.S. Solicitor General Philip Perlman (Baltimore) raises goldfish; and Representative Frank W. Boykin rescues dogs from the D. C. pound. The Alabaman has found homes for over 100 pooches . . . Washington now has 74 foreign diplomatic missions, the highest number in the history of the U.S. . . . Mrs. Parker West, capital social leader, is claimant of a unique distinction. She has entertained every Army Chief of Staff since World War I. . . . Ben Cohen, famed New Deal brain truster and counselor of the State Department under former Secretary James Byrnes, is assisting in the drafting of the constitution for the new Jewish State of Israel . . . The Army and Navy are giving Russian language courses to 200 hand-picked young officers . . . Mrs. Clark W. Thompson, wife of Galveston's (Texas) congressman, has set a new record for social calls. Since January, 1947, she has made over 1,400 such visits. . . .

Athlete's Foot?

use time-proved, clinically tested

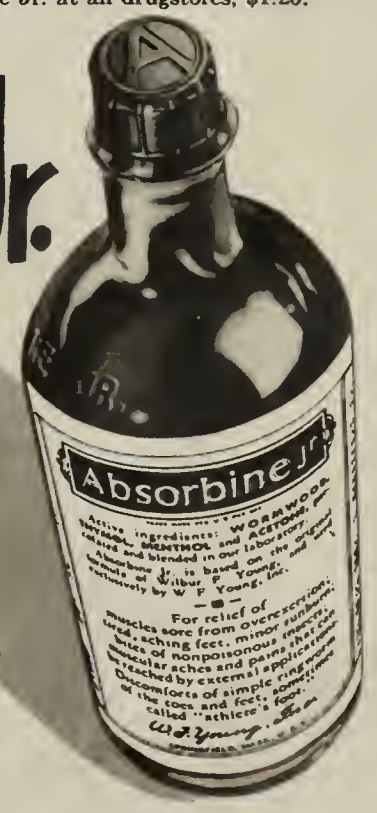
Absorbine Jr.

• To kill laboratory cultures of the organisms which cause painful Athlete's Foot is one thing. But to kill them on the *living tissues* of human feet is far more difficult. Because in some cases the organisms burrow so deeply under the skin that medication doesn't *reach* them!

When famous Absorbine Jr. was tested—under strictest clinical control!—3 out of 4 sufferers tested got relief from the painful symptoms of this stubborn skin condition!

Also, in addition to *killing the Athlete's Foot organisms that it contacts*, Absorbine Jr. benefits you 4 *other* important ways:

1. It dissolves the perspiration products on which Athlete's Foot organisms thrive. 2. It dries the skin between the toes, discouraging recurrent attacks of Athlete's Foot. 3. It relieves Athlete's Foot itching and pain. 4. It helps heal broken tissue.



Examine the skin between your toes tonight! Is it cracked, raw? These signs often mean that your feet have been infected with the organisms that cause Athlete's Foot. Get busy!

Pour it on, full strength, night and morning. Guard against reinfection. Boil socks at least 15 minutes. Don't share towels or bath mats. In abnormally severe cases, consult your doctor. Get Absorbine Jr. at all drugstores, $1.25.

Absorbine Jr.

W. F. Young, Inc., Springfield, Mass.

Play Safe! Daily Hygiene!

Help ward off Athlete's Foot by applying Absorbine Jr. to your feet every day! It's also wonderfully cooling and refreshing after bathing.

"AROUND THE SWIMMING POOL," by John Gannam. Number 18 in the series "Home Life in America," by noted American illustrators.

Beer belongs...enjoy it

In this home-loving land of ours . . . in this America of kindliness, of friendship, of good-humored tolerance . . . perhaps no beverages are more "at home" on more occasions than good American beer and ale.

For beer is the kind of beverage Americans like. It belongs—to pleasant living, to good fellowship, to sensible moderation. And our right to enjoy it, this too belongs—to our own American heritage of personal freedom.

AMERICA'S BEVERAGE OF MODERATION

UNITED STATES BREWERS FOUNDATION

MR. SPOFFORD ISN'T IN

Continued from page 13

Morgan resigned and came home. Ten months later found him sitting in the green-and-gold office on the Sunset Strip in Hollywood, California. He was still writing sensational stuff, and still suffering from his old malady of the disappearing buck.

He was sole owner and perpetrator of a magazine called Today. He had acquired something of a name locally as an aggressive young publisher and man about town, and his week ends were usually spent at Toyen Bay. But he had developed a curious custom of leaping lightly whenever his office door opened. His with his blond crew haircut and tortured expression gave him the look of someone plunging downward rapidly in a roller coaster. He was on first-name terms with several collectors, with whom he matched coins several times a week, and who liked him so much they could not bear to dun him.

IN a peculiar way, the phone call from the redhead gave him a sense of fate closing in.

He decided to act. For the next hour or so, between spasms of hitting his typewriter, he paused to pick up the phone and dial a number.

On the fourth try he got through to his man, the president of a bank controlling a billion in assets.

"Mr. Abernathy? This is Morgan Anders," Morgan said. "Do you remember me? Toyen Bay, two weeks ago. The Knox boat—"

"Certainly I remember," Mr. Abernathy came back cordially. "Are you engaged to Madge yet?"

"Not exactly engaged—"

"It won't be long," Mr. Abernathy said. "She's decided on you. She comes of a very determined female line. Her dear mother nearly had me roped to the finish line before I eloped with her dear sister. But what am I saying? How's that interesting little publication of yours coming on?"

Morgan took a firmer grasp on the receiver. "That's what I want to talk to you about, Mr. Abernathy."

"Drop in Thursday at one," Mr. Abernathy said finally. "You'll have to eat lunch off the desk with me."

Morgan set down the phone, feeling cheered. Sam, his photographer, came out of the back room looking worried, which was his only expression. He was small and low slung.

"Are we going to make the night-club circuit tonight, boss?" Sam asked. "We need a few glamor shots for the next issue."

"I'll tell you later."

"I don't like to leave it till too late," Sam said worriedly. "You never know when you're going to catch the wrong wife with the wrong husband, and have to do it over."

The phone rang, causing Morgan to start slightly. It was Madge's voice.

"Morgan?" she said. "Your phone's been busy for hours. Some woman?"

"Perish the thought, sugar!" Morgan said. "I have been devoting myself to ways of becoming rich enough to court you."

"Never mind that," Madge said. "Just give up that magazine so you'll be free to travel. That's all I ask."

"Honey, I hate traveling," Morgan said. "I like it here in California. I want to throw down a tap root."

"That's because you've got that magazine on your mind. Which do you want most, it or me?"

"Sugar pie," Morgan said sincerely, "you know I love you devotedly, but—"

"But nothing," Madge said firmly. "Look at yourself. You're no businessman. You weren't cut out for it. By the end of the month you'll be flat broke. But you're a very decorative man. You'll look wonderful in blue shorts and dark glasses on the beach at Monte Carlo. When do I see you?"

Morgan sighed. "I am waiting to be wooed," he said. "How about taking me to lunch at Serge's?"

"I'll pick you up in an hour. What's the matter with you?"

"Nothing a lobster amadine won't cure," Morgan said gloomily.

"You must have been talking to someone who has a depressive effect on you," Madge said. "Who was that on the phone?"

"Mr. Abernathy."

"Uncle Clement? Are you kidding? What would he want with you?"

"He took a fancy to me, sugar. Does that surprise you?"

"Profoundly. Listen, that man doesn't know how to carry on a conversation without figures in it. He isn't giving you a loan, is he?"

"Honey, I'm hungry," Morgan said. "If you know the way to a man's stomach, hop into something ravishing and hustle over here."

When he set down the phone the look of distress on his face was so acute that Sam, coming from the back room, pulled up.

"All this woman trouble ain't good for your work, boss," Sam said. "You narrow it down to one, it gets you nervous."

He was interrupted by the opening of the street door. A girl came in. She had red hair. She wore a bolero dress, and tortoise-rim glasses that gave her face a high-cheeked look. She was straight, slim and queenly. Except for the glasses, an uncompromising hair-do and a decidedly unfriendly manner, she might have been gorgeous. Morgan stood up.

"Good morning, honey," he said pleasantly. "May I help you?"

"I want to see Hiram O. Spofford," the redhead stated tersely.

Morgan regarded her with a blank face. "Undoubtedly you refer to Hiram Ogden Spofford," he said, "of our circulation department."

"Undoubtedly," the redhead replied, "if that's the jerk who's been writing me charming letters instead of remitting my refund to your defunct publication."

"Not defunct, honey. It's merely—"

"Please," the redhead interrupted. "My time is valuable. I've written six letters requesting my money, and phoned several times. I've received only evasions. This is a trifling financial adjustment which should be made without the slightest difficulty. I wouldn't bother with it at all except that it annoys me to have any account, however small, out of order."

"I see your point," Morgan said. "Unfortunately, Hiram Ogden Spofford isn't in. I'm Morgan Anders. Could I have your name, honey?"

The girl seemed to take Morgan in for the first time. She saw a huge, engaging young man wearing a brown-and-white hound's-tooth jacket, lemon-colored slacks, and a green-and-gold plaid shirt open at the neck. She seemed impressed.

"Edwina Grant," Edwina Grant said. "C. P. A."

"Well, well, well," Morgan said, looking impressed also. "C. P. A., eh, Red?"

Miss Grant resisted the invitation to chattiness. "I took over my father's business administration firm when he died," she stated.

"Maybe you'd like to go over my setup here," Morgan suggested. "Honest, Red, it's a mess."

"I'm afraid not," Miss Grant replied. "We handle only large corporations on a contract basis."

"Suit yourself, Red," Morgan said. "I thought I might toss you a little business. But come to think of it, all those figures must look pretty dull to a girl."

"On the contrary," Miss Grant said. "As a child, instead of playing with dolls, I used to amuse myself analyzing my father's confidential reports on ailing corporations. I could set up a trial balance sheet before I was ten."

"I'll be darned!" Morgan said. "What did you do with your nights, Red?"

Miss Grant flushed. Her beautiful green eyes regarded him coldly. "Do you always talk to strange women this way?"

"Red," Morgan sighed. "I apologize. Frankly, I thought that getup was a blind. I still look upon it as a crime against nature. But skip it. I will meet you on your own terms. We will talk man to man. Red, how can I help you?"

"You can refund my three dollars."

"Didn't you like the magazine?"

"I liked it very much," Miss Grant said. "You write wonderfully. Your coverage and analysis of current events were brilliant. But when the magazine skipped an issue it showed itself to be an unsound business enterprise. I prefer to have nothing to do with unsound business enterprises."

"Well," Morgan said. "I'm sorry you can't see your way to helping us out here, Red. Owing to my inability to hang onto a buck I seem destined to end a bum, unless I can find some rich dame. If you were me, and had a chance to marry money, would you do it?"

"If I were you, I would jump at it."

"Thank you for your prompt and candid opinion," Morgan said. "Sit down while I write you a check."

Somewhat reluctantly Edwina Grant moved to a chair and sat down. While Morgan wrote the check she watched him with a puzzled expression. When Morgan finished writing the check he found Edwina watching him fixedly. She made no move to take it.

"There's no such person as Hiram Ogden Spofford, is there?" she said.

Morgan's face got redder than its natural sunburn. "Honey," he said, "I don't like to hog the masthead."

"You wrote those letters yourself. Why?"

"Let me make amends," Morgan said. "Let me take you to lunch."

Miss Grant studied Morgan as if he were something under glass. "I suppose you wrote that article on deep-sea fishing signed by Wilbur Pritchett Schnee," she said. "And the one on postwar Roman society by Amadeo Umberto Lunit. And the summary of Egyptian—"

"I bow my head," Morgan said.

"They were very good," Miss Grant said. She was silent a moment. "I've changed my mind," she said suddenly. "If you still want me to analyze your business problems here, I will do it."

"I don't know if I can afford you."

"Please don't worry about that," Edwina said. "I will, of course, have to delve into every angle of your business."

"Delve?" Morgan said. "Oh, by all means. In the meantime, there's nothing like a Martini and a plate of half shells to take one's mind off the sordid side."

"That would be an unnecessary load on your expense account."

"It's my own swindle sheet, honey. Who's going to complain?"

"I am," Miss Grant said.

"No," Morgan said. "I feel we can work much more closely together with food in front of us."

AS HE led the beautiful brain toward the door, it swung open. The girl who came in had dark hair, a pale skin and gray eyes. A fur jacket hung from her shoulders. She was tall and darkly beautiful. Morgan pulled up, the smile frozen on his face.

The girl seemed to draw poise from Morgan's guilty confusion. She could scarcely have missed it, or the color which surged up from his collar and suffused his stricken features.

"Did you forget our luncheon date, Morgan?"

"Surely you jest, sugar," he protested. "Red and I were merely—"

"Merely nothing," Madge said. "It's written all over you."

Morgan swallowed dryly. "Miss Grant, C. P. A.," he said. "Red, Madge Knox."

"Hello," Madge said.

"Hello," Miss Grant said. "And quit calling me Red."

"A matter of business has come up, sugar," Morgan said. "I know you will be delighted if Red—Miss Grant, I mean—joins us."

"I couldn't be more delighted," Madge said. "Under the circumstances I know you'll excuse me."

"No, no, honey," Morgan said. "I assure you—"

"Thanks," Madge said, "but I just remembered I have a previous engagement doing something I'll think of in a minute."

"Please don't let me interfere with your luncheon date," Miss Grant said. "Mr. Anders and I can go into his affairs some other time."

"Not at all," Madge said. "You two must run along. Give me a ring sometime, Morgan, if I haven't left for Alaska." . . .

In the expensive gloom of a restaurant on Rodeo Drive, Morgan and Miss Grant regarded each other soberly over glasses of chilled pale amber stuff.

Miss Grant looked at him across the top of her cocktail glass. "That's it, isn't it?" Miss Grant said. "The rich dame."

"Yes," Morgan said. "She's good-looking too, isn't she?"

COLLIER'S "Another five minutes, and I'll really start worrying" GEORGE RECKAS

"And I've spoiled it," Edwina said. "Perhaps if I explained to her—"

"No," Morgan said. "You don't understand. Madge hates the magazine. And if I don't make a go of the magazine I can't ask her to marry me. She wants to travel and I want to settle down. I'm in a quandary, Red."

"That's an understatement," Edwina said.

"I've got to have a buck before I ask her to link her fate with mine," Morgan said. "Otherwise I'll be just a bum living on handouts from a rich wife."

"Perhaps she wouldn't mind."

"Well, I would," Morgan said. He stared at her with a queer, touching intensity. "Do you believe in destiny, Red?" he said. "Are you heaven-sent? Can you change the leopard's spots? In short, can you make a man of means of me?"

"I'll study the situation," Edwina said, "and give you a report, with recommendations, in due time."

"Bless you," Morgan said gratefully. "If financing is needed, I think I know where I can lay hands on some quick dough."

When they left the restaurant he tipped the waiter and the parking attendant far too much, and drove his old roadster into the street with an air of happy abandon. Edwina, frowning slightly, was pensive and silent beside him.

MORGAN parted from her in front of his office, where her car, a new black coupé, was parked. She gave him her card and promised to return on the morrow to launch her investigation.

Morgan marched jauntily into his office, sat down at his desk and phoned Madge.

"How was the lunch?" she asked in a chilly voice.

"First-rate," Morgan said. "You should have been there, sugar. Honest, the sherry sauce—"

"She's very attractive."

"Oh. Yes, she is, isn't she?" Morgan said. "I feel like celebrating tonight. How about picking me up at eight and taking me to a night club?"

"Sorry. I have a date."

"You'll never win a courtship that way, hon," Morgan said. "However, suit yourself. I'll see you around."

As he pensively set down the phone, Sam came in with a cut of a beach scene, showing a model with blowing blond hair, standing in the surf clad in a couple of wispies.

Sam laid the cut on the desk. "She's some tomato," he said.

"Yes, she is," Morgan said absently.

"The redhead," Sam said.

"Oh," Morgan said. "Yes." His joy had evaporated.

"You ought to get your mind off dames, boss," Sam said. "We ought to do the spots tonight and get them pictures."

For a minute Morgan seemed not to hear. Then he sat bolt upright, with an air of returning interest in life.

"Sam," he said, "you are right." He took a card out of his pocket, picked up the phone and dialed a number. After identifying himself to a couple of male secretaries, he was informed that Miss Grant had not yet returned.

She called him back an hour later.

"Red?" Morgan said. "Hurry home tonight, jump into something lovely, and stand by for eight bells."

"Why?"

"We cover the glamor front," Morgan said.

"Is that necessary?"

"Absolutely," Morgan said. "You wish to study every phase of my business. Getting pictures of the glitter trade is part of it."

"I'll be ready at eight," Miss Grant said.

"By the way, Red," Morgan said. "What would happen if you left your glasses at home? Would your teeth chatter?"

"No," Edwina said. "I don't need glasses. My eyes are perfect. I wear them to discourage fresh guys in business." . . .

At the appointed hour he left Sam and his camera in the car while he went to the door to pick up the business analyst. Miss Grant lived in a rather old-fashioned frame house on a lovely palm-lined street in Beverly Hills. A Swedish housekeeper opened the door and showed Morgan into an early American room with a fireplace.

Presently Miss Grant swam into his line of vision from the hall. Morgan stared, and hastily readjusted his sights. She was without glasses. She was also in a long black gown without straps. She had done something with her hair; it looked classic rather than severe.

"I should have brought you a white orchid," Morgan said.

"That would have been an unnecessary expense," Edwina said. "But thank you anyway."

COLLIER'S "You're sure the Army doesn't need it?" GARDNER REA

"I'd have put it on the expense account," Morgan said.

"I'll have to put you on a budget," Miss Grant said.

"Let's not talk about money," Morgan said. "I just want to look at you in that dress."

"Shall I put my glasses back on?"

"Leave them off a little while, honey," Morgan said. "The ventilation will do you good."

When they went downstairs Sam was waiting beside the car. He wore a brown suit and a spotted bow tie. He stared solemnly at Edwina while Morgan introduced him. They all piled into the front seat, Sam with his camera balanced on his knee, and drove to the night club.

"Isn't it difficult to get permission to take pictures?" Edwina asked.

"We won't have any trouble," Morgan said. "Henri, the headwaiter, is a pal of mine."

Henri led them to a table against the wall, with an excellent view of the door. The dance floor was well filled. The orchestra was playing, and a girl with an attractive voice was crooning the vocal.

They dined on cracked crab and champagne. Sam got pictures of two top-flight movie actresses with their respective escorts, a visiting member of British royalty, a local millionaire airplane manufacturer, a big-time politician from Washington, and Morgan and Miss Grant. He gathered up his equipment.

"I'll run along, boss," he said. "I can't wait to see what we got. Good night, Miss Grant."

Morgan summoned the waiter and ordered more drinks.

"All this is very interesting from an analytical point of view," Edwina said. "Obviously your work brings you in contact with glamorous personalities and a fascinating world of trivialities. However, this complicates your problem. To one in your situation it is the worst possible environment."

"Have you figured out why I'm always broke?" Morgan asked.

"You spend more than you've got."

"How can I overcome this, ma'am?"

"I'll make my recommendations at the proper time," Edwina said. "Your case may not be hopeless, though it's far from encouraging."

"I'll try not to give up before I know the worst," Morgan said.

From the way in which Morgan studied Miss Grant it was obvious that her case worried him.

"Have you ever thought of the future, Red?" he asked.

"Naturally," Miss Grant said. "My future is well secured with a variety of investments and old-age annuities."

"I mean," Morgan said, "has it occurred to you that someday you may want a home, a husband, and a cluster of little C.P.A.s clinging to your skirts?"

"I'm afraid I could only love a man who is my equal in business ability," Miss Grant said. "So far I haven't found one who isn't also bald, bulging or married. Since the days when my father used to take me camping as a child, and we spent fascinating hours discussing trends, futures and peak years, mere boyish males have seemed silly."

"I see," Morgan said. "Shall we have a dance while we brood on each other's shortcomings?"

The music was soothing. Edwina's head fitted nicely beneath Morgan's chin. He closed his eyes and gave himself up to the pleasant task of steering the light-footed financial wizard around the floor. Presently he opened them, and found himself looking across her shoulder into a familiar pair of gray eyes. He stiffened slightly, and lifted his chin off Miss Grant's head.

"Hello, chick," Morgan said. "Is this the long arm of coincidence or are you following me?"

"Sure you aren't following me?"

"I'm here on business, sugar," Morgan said. "You remember Miss Grant. Won't you join us at our table?"

Madge's dark good looks were set off with a white evening gown and a few jewels, and she was with a pale boy named Theodore. Somewhat grudgingly she accompanied them to their table.

Morgan ordered drinks for everybody and almost at once asked Madge to dance. She seemed curiously unyielding in his arms.

"Is this your idea of work?" she inquired, as soon as they were alone. "Dancing with beautiful redheaded bookkeepers?"

Morgan looked appreciatively toward the table where Edwina was sitting with Theodore. "Yes, she is, isn't she?" he said. "I wasn't absolutely sure until I saw her tonight without her cheaters. And if she's as smart as I think, sugar, in a few days you can pop the question. confident I'll make you the happiest girl on earth."

"What makes you think I want to pop the question?"

Morgan grinned innocently. "Go on, Knox, you're nuts about me."

"Aren't you a little confused? Isn't it you who hopes to marry me?"

"I'd be a chump not to," Morgan said. "You'll be a beautiful, diamond-studded ball and chain."

"You're insufferable. And anything but subtle. If you think you can make me give in about the magazine by making me jealous of that redhead, you're crazy. It will take a lot of money to keep you happy—more than she's got."

The dance ended unsatisfactorily. When they returned to their table Madge was in an irritable mood. She said rather abruptly that she was tired and wanted to go home. Morgan picked up the check.

"I'll take Red home too," he said. "I have to make sure she gets her sleep. I have a clear head for figures in the morning."

He took Edwina home in his rather air-conditioned open job, and kissed her good night outside her door. The excitements had blown some of her hair loose and her lips felt warm and surprised under his.

"I am looking forward to our further association, Red," Morgan said. "If anyone can make a substantial citizen out of one who is by nature a bum, you can."

"There are some jobs too hot to handle," Edwina said unsteadily. "This may be one of them. Good night."

SHE appeared promptly at ten next morning and went directly to work. The ledgers were piled on a table at the wall. It saddened Morgan to note that her loveliness had again been dimmed behind the breastwork of the glasses and the uncompromising hair-do was again in force. Throughout the morning he pecked away desultorily at an article in his typewriter, and Sam came out of the rear oftener than was necessary with cuts, layouts and caption suggestions. Miss Grant apparently took no notice of either of them.

"She photographs like a million, boss," Sam said. "Just look at this shot of her at the table with you. Why can't I get a cover portrait of her and—"

"Miss Grant lives by her brain," Morgan said. "I'm surprised at you, Sam. What you suggest is painfully trivial in connection with an intellect like hers."

"I'm sorry, boss. I only thought—"

"Your superficiality distresses me," Morgan said. "What is a beautiful face after all? You must learn to look for deeper values."

"Yes, boss," Sam said worriedly, and departed.

Shortly before noon Madge appeared. She was groomed to radiant perfection. She crossed to Morgan's desk with a possessive and invincible sweep.

"You're in luck today, Morgan," she said. "I'm going to let you take me to lunch."

Morgan stood up, smiling. "Thanks, sugar. But I'm afraid Miss Grant and I—"

"Miss Grant," Edwina said, closing the ledgers and rising, "has to leave. I'm afraid I can't spare you any more today, Mr. Anders." She opened

value ideas. Money as such simply
mportant to you. Therefore you
ways be broke."

"What's the answer, Red?"

"Marry money," Edwina said grimly. "The sooner the better."

Morgan's face looked troubled under his peculiar short haircut. "Look," he said. "I'm having lunch with a banker—"

"You might as well skip it," Edwina said. "If you get a loan it will make your lady friend sore. Why should you run the risk with Fort—Miss, I mean—Knox practically waiting at the altar?"

They looked at each other. "Red—" Morgan said.

A taxi drew up at the curb outside. They went on looking at each other. "Oh, go on," Edwina said. "Do you want to be late?"

AT TWO o'clock Morgan emerged from Mr. Abernathy's office. He blinked against the hot sun after the churchlike dim of the banker's paneled suite. Madge's new tan roadster waited at the curb. Morgan got in beside her, his face blank.

"I know how you feel, Morgan," Madge said, when they were rolling down Beverly Drive. "But believe me, it's best this way. I told Uncle Clement not to give you the loan. It's much better for you to go broke now. We can get married right away and be in Cannes by May. You'll love Cannes in May. Are you happy, Morgan?"

"Yes," Morgan said. "Would you mind dropping me at my office, sugar? I have to clear up a couple of things."

Madge stopped the car in front of his office and put her arms around his neck. "I'll notify the papers. Kiss me, Morgan."

"It's a public place," Morgan protested.

"Good!" Madge kissed him. . . .

He found Edwina rummaging in a drawer. Somehow he wasn't surprised. "Hello, Red," he said. "Do you believe in gambling?"

"I forgot my compact," Edwina said. "Definitely not."

"Listen," he said. "A funny thing has happened to me—"

"Me too," Edwina said, "and it isn't funny."

"I love you," Morgan said.

"Shut up," Edwina said. "Darn you! I saw your farewell to golden girl just now. You didn't get the loan, and I can hear wedding bells. There's no fool like a redheaded fool."

"I'm not going to marry her," Morgan said. "That was just—"

"That's worse," Edwina said. "You're a menace. You've done something to me, and it scares me. I don't care if I never balance another book. I'd let you bribe the headwaiter with my last five bucks. You've upset a lifetime of intelligent planning, caution and foresight. You—"

"My gosh!" Morgan said. "Listen, Red—"

"Go away," Edwina said. "You are the worst business risk I ever met in my life, but I can't forget how I felt when you kissed me. When my dad warned me against unsound business propositions that's one angle he forgot to mention."

"For gracious sakes!" Morgan said. "Listen, Red—"

"Go away," she said.

He didn't, and they didn't speak for quite a while.

"I'm not experienced in handling lady C.P.A.s," Morgan said eventually; "and I got the loan. I told Mr. Abernathy I wasn't going to marry his niece—"

"Oh," Edwina said.

"It gave us something in common. He was broke too when he decided not to marry Madge's mother. Do you think you can curb my spending without making me too unhappy?"

"No," Edwina said.

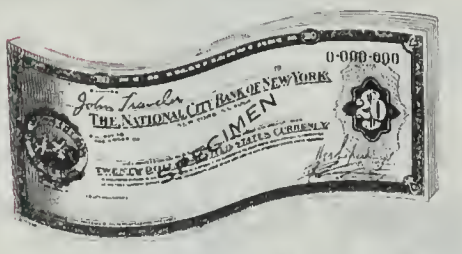
"We'll probably be terribly happy," Morgan said. "How soon can we get married? There's a little church not far from where I live that seems to be run on a good sound business basis."

THE END

Wherever you go—

NATIONAL CITY BANK TRAVELERS CHECKS

mean instant recognition as well as safe, spendable currency



What's in a name? There is a world of meaning in that name, "The National City Bank of New York" . . . engraved on your travelers checks.

It means you are sure of immediate, courteous recognition wherever you present them . . . in the smart restaurants of New York, Nice or Rio . . . at railroad, airline and steamship offices, at shops or hotels in the United States or abroad.

It means that everywhere you go your travel funds are safe as well as spendable. In case of loss or theft, you get a prompt refund. Cost only 75¢ per $100. In denominations of $10, $20, $50 and $100. Ask for them at your bank or at any National City Bank Branch.

SCANDALS IN VETERANS' HOUSING

Continued from page 28

house. Exterior stucco cracked in many places. Asphalt tile base falling from walls. Garage leaning out of plumb. Concrete steps crumbling. Fireplace vent extends into attic only instead of through the roof.

What the Billings veterans went through can best be described by quoting a news story which appeared in the Billings Herald under the headline "Vet Clears Up a Phenomenon."

Flowers Grew Through Floors

"Several weeks ago during a cold winter Sunday the owner of one of the veterans' homes in Calhoun Lane Subdivision decided to take a shovel and see what kind of a foundation his home actually had under it. Since morning-glory vines were pushing through the floors of his home, and his neighbors' homes, he wanted to investigate the phenomenon.

"He was surprised that it was easy to dig in the soil around his home as the soil out in his yard was frozen. He was still more surprised to dig up fishworms with the soil. (The day was so cold that the worms soon froze stiff.) His next surprise was to find that the foundation of his $8,000 home was resting on top of the soil.

"The fact that the foundation was resting on top of the soil soon cleared up the phenomena. The houses were heated with radiant-heat pipes set in the concrete floors. The heat from the floors keep the ground under and near the houses at summer temperature. This kept summer plant and worm life active.

"The grass was also green all winter for several feet around each of the 27 veterans' homes, according to the owners. Many of the Calhoun Lane Homes had morning-glory vines trailing through their rooms the past winter; a novel feature which was not specified in the approved plans."

Some weeks after the Berg inspection confirmed the existence of deviations from the plans and specifications that secured the V.A. and FHA "guarantees" for the Calhoun Lane houses, the Billings veterans had still achieved no redress.

As it has been in Billings so has it been in many another community throughout the country. The majority of veterans who have bought new homes or had them built are satisfied. Most builders, reputable and anxious to do service to the veterans and to their own reputations, have, in spite of material and labor shortages, followed the specifications upon which priorities and sales prices have been based. Under government regulations, builders were given priorities on materials, provided they agreed to preset, government-approved prices for homes veterans are to buy.

Federal officials who want to do a job for the veteran, as the men at OHE want to do, find themselves hamstrung by lack of personnel and money. Other agencies —the Veterans Administration and the Federal Housing Administration in instance after documented instance—seem less interested in helping the home-buying veterans.

The Department of Justice has a spotty record. In a relatively few cases U.S. attorneys have sought indictments or brought civil suits. In all too many jurisdictions, however, the branch offices of the Department of Justice have either done nothing or else contented themselves with pronouncements to the newspapers.

Yet some veterans have, in recent months, begun to obtain at least a measure of justice. The best present means of getting definite action seems to lie in the local field. Many a veterans' group, bogged down by red tape, might profitably study the experiences of veterans on a number of home-building projects in Baltimore.

Like war veterans all over the nation these men found themselves, in 1946 and 1947, in a mad scramble to buy whatever houses were offered them. Faced with the choice of continued doubling-up with in-laws, they usually bought houses from plans before the buildings were erected.

The vast majority who did so in Baltimore—some 40,000—either found no reason to complain or else were able amicably to settle their relatively minor complaints by negotiation with the builders from whom they bought.

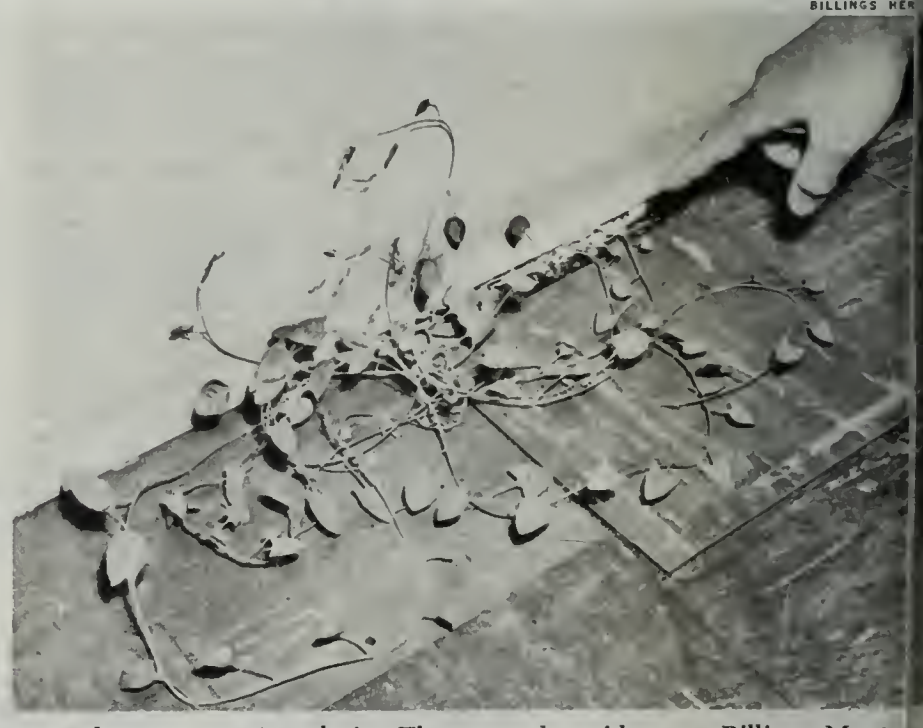
But about 10 per cent of the houses put up in Baltimore for ex-G.I.s have provoked violent protests from their purchasers. When individual and private remonstrances to builders proved unavailing, veterans began to take their cases to the Legion and the Veterans of Foreign Wars. Protest meetings were held—meetings that might have degenerated into mere steam-blowing sessions had not the complaining homeowners received two lucky breaks.

The first came when the leadership of their campaign was assumed by a tough-minded ex-second lieutenant named Willy Muth. It happened that Muth was vice-president of the Baltimore City Council. Unlike many another public official, though, he felt his duties ran beyond speechmaking and vote seeking. When several groups of veterans put their complaints before him in July, 1947, the councilman got mad.

The veterans had bought $8,000 and $9,000 homes on the strength of the plans only to discover after they moved in that the houses were not what the specifications, and builders' promises, had called for. But they couldn't prove their suspicions. The official plans were nowhere to be found.

Muth got on the phone and called the V.A. He was told to call the FHA. The FHA cited an office rule that prevented him from seeing the plans. He was advised to call the loan association that was financing the houses. The loan association completed the circle by sending him back to the V.A.

With his temper at the boiling point Muth finally discovered the Office of the Housing Expediter. From Washington the OHE sent up an inspector who, armed with federal authority, quickly obtained what Muth wanted.



Then it was disclosed that the b had received authorization to co 90 houses on Hanlon and Mond Avenues. But he had actually bu To do it he shaved 60 of his t down a bit. Each turned out to be narrower than specified.

This was bad enough. But the b forgot about cutting down when it to selling the homes. He sold ni foot structures at the price set for t foot houses. Then, to top things omitted required items like w screens, screen doors, porch rai even gas ranges. Slate roofs ha specified, but cheaper asphalt roofs were used.

When Muth got the full st turned to the Baltimore Sun pape the veterans got their second brea porters Tom O'Donnell and Bil were assigned to the story. In a se nearly 200 news stories they to public the ugly details. When pub cials passed the buck they woke next morning to find their telepho jangling with the calls of angry Su ers. When the builders of shoddy shrugged their shoulders at ve complaints they found their printed in the papers beside pict their fancy work.

Constructors of the Hanlon homes eventually made cash res in the amount of $29,872.91 to 67 G.I. purchasers. In addition to t builders made repairs and furnish dow screens, screen doors, porc and gas ranges for some of the But Muth did not stop with that. city council he pressed for an in tion to discover whether shen among building inspectors had

candal after scandal has come to roughout the country, the need mplete reform in the practices of federal agencies becomes ever more apparent. The OHE, the only agency that has consistently tried to enforce vetcrans' rights in the housing field, has been appealing for months to Congress to increase its inadequate staff of 15 investigators.

A request for a deficiency appropriation sufficient to put 300 agents back on the pay roll was put before the joint Congressional Committee on Housing in March but was not granted until the middle of May, less than six weeks before the beginning of the new fiscal year this month. Seventy-five thousand dollars was allowed, enough to hire 250 agents.

Other federal agencies could do a great deal to secure justice for the men who were promised so much when they were fighting in the foxholes of Europe and the Pacific. The Department of Justice has proved, in the few instances in which U.S. attorneys have taken vigorous action, that redress can be obtained for the veteran homeowner from builders who have overstepped the bounds in their profit grabbing.

But, until the federal government takes more interest, veterans will do well to follow the pattern set in Baltimore. That pattern can be boiled down to the following five points:

Careful organization of the veterans on each building project with detailed listing of all failures to comply with plans and specifications.

Enlistment of the aid of local veterans' organizations.

Presentation of documented evidence to newspapers and public officials of city and state.

A demand upon local district attorneys and U.S. attorneys for the right to bring witnesses and file affidavits with grand juries.

The hiring of attorneys—some are often willing to serve on a contingent fee basis—and the filing of civil suits for repairs and damages.

With more than 30,000 complaints already filed with the Office of the Housing Expediter, and with thousands more unfiled because veterans have secured so little action from that overworked and undermanned agency, the veterans' housing scandal threatens to assume billion-dollar proportions. It need never have occurred had public officials been diligent in enforcing the laws already on our books—not merely the special Housing Acts designed to encourage building for veterans, but the common, garden variety long ago passed to prevent building-code violations.

With millions of homes scheduled for construction in the next few years, failure to correct the practices of a small minority of unscrupulous builders will multiply many times over the poor conditions that have already been created.

CONCLUDING THE ADVENTURES OF A MAN THEY COULDN'T KILL FOR LOVE OR MON

The Story:

The narrator, MIKE FINNEY, is being framed for the murder, ten years ago, of a San Francisco attorney named EARL CLARK. In on the frame-up are MRS. REBA TREMAINE, mother of the real murderer, and her son PHILIP.

Walking into the trap unaware of Tremaine's intentions, Finney had used a border permit made out in Tremaine's name to cross into the U.S. from Mexico; Finney didn't use his own name for fear the F.B.I. would question him about a passport he had forged when he went to fight in the Spanish Revolution. Finney had been in Spain at the time Tremaine murdered Clark.

As bait to lure the unsuspecting Finney into taking the rap for her son, Mrs. Tremaine used her beautiful daughter CATHERINE. Finney still doesn't know whether Catherine is an innocent dupe or a full-fledged accomplice.

After two attempts to get Finney identified as her son and to have him killed, Mrs. Tremaine convinces the police and even the family lawyer JOHN WICKERSHAM, that Finney is indeed her son. But Finney is still alive, and still unwilling to admit his real identity to the police. As the scene opens, Wickersham, an F.B.I. man, the two Tremaine women and Finney are sitting in the office of the district attorney.

Mrs. Tremaine listens grimly as Wickersham "proves" to the D.A. that the man before them is the long-missing Tremaine, and that he has been unjustly accused of two murders which were really committed by a mysterious man named Mike Finney.

"Finney must look very much like you," says District Attorney GROVER NILES to Finney.

"So I'm told," says Finney. "He's been sticking very close to me."

"Why did you try to commit suicide?" says Niles. "Atropine was pumped from your stomach. If you were innocent, why didn't you turn yourself in and collect your father's inheritance?"

"WELL," demanded Grover Niles. "It does need explanation."

"Atropine?" I said. I had to fight this thing. I had to know about Catherine. If I went under, she did too.

"Yes, atropine."

"You're sure it was atropine?"

"Positive," said Niles. Damn his pompous soul! I rubbed my brow.

"It was labeled atropine?"

"There was no container, but certainly the doctors know what they pumped from your stomach."

"That's strange," I said. "I remember being sick. I believe I lost consciousness."

"You most certainly did." The suspicion was heavy in his eyes now.

"I thought I had an attack of fever," I said. "I've suffered from malaria."

"You'll not tell me you treat your fever with atropine?"

"No," I said. My hands were cold and clammy. Everyone was watching me. Catherine looked as though were on the verge of crying out, telling the whole story. "No," I peated. "I treat my malaria w atabrine. I usually carry some."

"We know that," said Niles. " empty atabrine bottle was found your suitcase."

"Had you taken any of it?" pu Wickersham.

"I must have taken something, said. "It's hard to remember beca of the delirium afterward."

"You bought the atabrine in M ico?"

"Yes, of course."

John Wickersham laughed s denly. "Then it's perfectly logical," said. "The drug laws in Mexico ar nearly as rigid as ours. The w atabrine and atropine are very m alike. The way most doctors w prescriptions, you couldn't tell from the other. An inexperier

THE DEAR, DEAD PAST

BY A. A. MILNE

Sir Vernon knew that Scroope didn't like blackmailers—but would probably understand a youthful wild oat like murder

"Hayforth returned from his swim and saw the body on deck. 'What's this?' he asked. You told him. He agreed to help you. Is that right?"

A STOUT, old-young man of forty, Mr. Cedric Watherston of Watherston & Reeves, Solicitors, sat at his office table, knitting. He was not a good knitter, but he was proud of the fact that he could knit at all. He had learned when a prisoner of war in 1917, having walked straight into a German trench on his first journey up the line; and with the passage of years the circumstance of his capture had also become, in some odd way, a matter for pride. He liked sentences which began "I remember when I was a prisoner in Holzminden." When a client was announced he put the ball of wool, the needles and the unfinished sock in the top left-hand drawer, smoothed his hair with both hands and waited for the visitor to be shown in.

"Sir Vernon Filmer."

Mr. Watherston rose to shake hands with one of his most distinguished clients. "Glad to see you, Sir Vernon. You don't often give us the pleasure. On no unpleasant business, I trust?"

Sir Vernon did not look as if he were glad to see Mr. Watherston. He was a tall, fair, cold man, with pale-blue eyes, a prominent nose and a small prim mouth. He was one of those natural politicians who are always conveniently there when ministerial posts are being given out. If there were to be ten knighthoods on New Year's Day for what could only be described as "public services," and nine had been decided upon, his name would come irresistibly to the mind for the tenth place.

"Cigarette?"

Sir Vernon waved it away. Mr. Watherston lighted one for himself, leaned back in his chair, remembered to put his finger tips together.

"I am being blackmailed," Sir Vernon said.

"Dear, dear, we must do something about that," said Mr. Watherston with an exaggerated calm which hid most of his emotions. Surprise was the least of these, for he had a dislike of politicians.

"That is naturally what I am expecting."

Mr. Watherston tried over a few sentences in his mind until he got the right opening. "Blackmail," he said delicately, "implies the previous commission, or alleged commission, of some offense. Offenses can be classified as offenses against the law, offenses against morality, and offenses against the social code. Perhaps, in this case, one should add political offenses. Which class or classes of offense, Sir Vernon, does the threatened exposure allege?"

"Legal," said Sir Vernon, adding primly, "I have nothing whatever on my conscience."

Yes, yes, thought Mr. Watherston, but your conscience must be in pretty good training by now.

"To put it frankly, then, Sir Vernon, the blackmailer is threatening to reveal some action of yours which is punishable by law?"

"Yes. To put it with greater accuracy, if the truth had come out at the time, I might have been prosecuted, but need not necessarily have been convicted. I should think that today there was no possibility of conviction."

"When did this happen?"

"Nearly forty years ago. Nineteen-nine, to be exact."

"Ah! So it is the social and political consequences which really matter today."

"Obviously. As they did, to an overwhelming extent, at the time. Do you not think it would be illuminating if I told you about it?"

Mr. Watherston held up a hasty hand. He had had no experience of blackmail, and he disliked the idea of being accessory after the fact to an apparently undiscovered crime. His mind wandered vaguely back to 1909, trying to think of the sort of contemporary illegalities in which Sir Vernon, a young man of twenty-two, might have been mixed up. Having himself been a boy of twelve at the time, he came to no conclusion.

"Sir Vernon," he said, "It will be distressing for you to confide this story to anyone. Let us consider the matter on general lines for the moment. There are three ways of dealing with a blackmailer. The first is to submit to his demands."

Sir Vernon indicated what he thought of that.

"The second is to prosecute him. As you know, this can be done anonymously, under the disarming name of Mr. X."

Sir Vernon gave a short, unpleasant laugh.

"The only remaining method is to settle with the blackmailer out of court. I could pay his demands for you; I could instruct the prosecution for you. But frankly, Sir Vernon, I am not competent to get the better of a scoundrel whether by negotiation, threat or personal violence." He let this sink in for a moment and then added, "Fortunately I know the man who is."

"Private detective or shady solicitor?"

"Solicitor. A shady solicitor in the sense that he usually acts for the submerged classes, but entirely loyal to his clients, whether prostitutes or Prime Ministers. And a very able man."

"You knew him personally?"

"Oh, yes. The fortunes of war threw us together at Holzminden where we happened to be prisoners."

"H'm," said Sir Vernon doubtfully.

"I understand your dislike of confiding in a stranger. Perhaps I should have added that he has very strong feelings about the detestable crime of blackmail. It is the one charge which he has always refused to defend in court—which is more than can be said for the whole of the bar. To get the better of a blackmailer he would go to the extreme length of his purse, his time and—the law."

"Very well," said Sir Vernon. "I agree to accept your advice. I had better see this fellow in my own house at, say, nine o'clock this evening. Will you arrange that?"

Mr. Watherston made a note, saying, "His name is Scroope." He got up and held out his hand. "Perhaps you will let me know how the matter goes on. And if there is anything else I can do, Sir Vernon—"

They shook hands and went to the door together.

"Cold fish," thought Mr. Watherston, as he returned to his table. "One can't help disliking him. I wonder what he did."

He picked up the telephone. Afterward, there being nothing else to do, he went back to his knitting.

BEING asked by an interviewer to what he attributed his success in life, Mr. Scroope replied, "My eyebrows." These had a natural quirk which seemed to express a good-tempered amusement with the world, and to admit his companion of the moment to an equal share in that amus

nt. "You and I," they seemed to
, "*we* know." It is doubtful if any-
ly had ever had a private joke with
Vernon, nor was he the man to
h to be on confidential terms with
one less important than himself,
t of all a shady solicitor: but even
recognized the eyebrows as evi-
ce of a knowledge of the world.
Scroope obviously knew his way
ut.

A cigar, thanks," said Mr.
ope. "Nothing to drink. Now
n, Sir Vernon. Watherston tells me
you are being blackmailed. Who
you?"

I don't understand," said Sir Ver-
coldly.

Dammit, one doesn't wake up in
morning and say, 'I've a sort of
ing that there are blackmailers
ut.' Something must have given
the idea."

Naturally I had a letter," Sir Ver-
said.

Why 'naturally'? You might have
a telephone message. Is that the
r?"

ir Vernon released it. "It came this
rning through the post."

H'm. Typed. Signed. 'Well-
her.' Humorous. D'you know
o wrote it?"

Not with any certainty."

Five hundred in pound notes on
urday as a guarantee of good faith,
owed by five hundred every six
ks. Sounds as if he wanted to get
ried. Well, that gives us six weeks
ore the second payment. Six weeks
which to think of something."

You suggest that I should pay the
five hundred?"

Oh, certainly. At least, *you* won't,
ill. We'll keep you out of it."

Read the rest of the letter."

I have. You are given till Saturday to get the money; you are to communicate with nobody; you are to have your car waiting outside your door on Saturday morning, ready to drive yourself to a rendezvous which will be given you by letter before you start."

"Perhaps you are not aware that I am lunching at Chequers on Saturday?"

"Nobody tells me anything," said Mr. Scroope sadly. "But then, why shouldn't you? The food's quite good, I hear. And who could give you a better alibi than the Prime Minister?"

"You propose to keep the rendezvous yourself?"

"As Sir Vernon Filmer? Do I look like it? But I dare say I can find somebody who will pass for you at a distance. All you'll be asked to do, I fancy, is to leave the money in a certain spot, where the blackmailer will pick it up afterward. He's giving nothing away. Now then, he says, 'I have a letter written on board the Ladybird on September 15, 1909. Don't tell me you've forgotten it.' " He looked up. "Have you forgotten it?"

"No."

"Right. Then you'd better tell me."

"There were three of us on the Ladybird on that summer afternoon: Robert Hayforth the owner, myself and a local hand called Towers. We had been fishing close inshore. Hayforth, a powerful and devoted swimmer, had suggested a swim. The wind was freshening, the sea uninviting, and I stayed on board. Hayforth, whose idea of a swim was half a mile out and half a mile back, had been gone about ten minutes, when suddenly Towers came sidling up to me, his right hand behind his back. I'd never liked him, nobody in the place did, but he was a useful man in a boat, and Hayforth often took him on. He had a bottle in his hand, and he was holding it like a club. He—he accused me of"—Sir Vernon's face could still show disgust at the idea—" 'messing about with his wife.' "

"Were you?"

SIR VERNON looked at Scroope contemptuously, and went on: "I asked him what the devil he was talking about. I thought he was drunk. He said that when he had finished with me I'd have the sort of face that nobody's girl would want to mess about with. It was horrible. Such a foul weapon, and he was much more powerful than I. Hayforth was out of sight and hailing distance. I was at the man's mercy. It was his life or mine. I saw red."

He poured himself out a brandy and swallowed it quickly. In another moment, thought Scroope, all his past life will flash before his eyes. Why must politicians always talk in clichés?

"And you killed him," Scroope said. "How?"

"I don't know to this day how I did it. I seemed to be endowed with superhuman strength. Fear, I suppose, and furious indignation at that loathsome weapon."

"You killed him, and you went on killing him. Is that right?"

"Yes."

"And when you had finished, it didn't look like self-defense, it looked like deliberate, premeditated, brutal murder. Is that right?"

"Yes, but it wasn't."

"It's what things look like which matter to the law. Well, and then Hayforth yelled, 'Ship ahoy!' and you helped him on board, and he saw the body and said, 'Lawks a mussy, what's all this?' And you told him. And he agreed to help you. Is that right?"

"Agreed on conditions."

"Ah, yes, now I'm seeing it. That letter was to him. Exonerating him and admitting sole responsibility. Why a letter? Couldn't he trust you?"

"If anything had happened to me, if the body had been washed up—"

"It would have been damned awkward for him. Because—stop me if I'm wrong—*he* was the man who had been messing about."

"Yes. I had had no idea of it, but I suppose there were other people who had guessed."

"So, when he had got the letter safely in his pocket, you put out to sea—the wind was freshening, you said—and it sounded sufficiently plausible to say that Towers had been washed overboard. No attempt to save him?"

"It blew up into a gale, we didn't pick up our moorings until three o'clock next morning; we put the accident at just after midnight. In the dark, in that weather, only two of us to work the boat, what could we have done? We nearly followed him as it was. I never expected to see land again."

"Convincing. And no suspicions by anybody?"

"None that I heard of. He was a thoroughgoing rascal. Nobody missed him."

"Not even his wife?"

"She least of all." Sir Vernon cleared his throat and added, "I should explain that my whole career was in the balance at this time, and that I had no other course open to me. I had just left Oxford with unusually brilliant prospects—"

Scroope picked up the letter.

INHUMAN NATURE

Continued from page 14

him a pretty good idea he's not welcome.

In heavily ticked areas it is advisable to get annual immunization against spotted fever. Always keep the kids out of high grass; then examine them for ticks twice daily in their birthday suits. As for Rover, although it hurts you as much as it hurts him, keep him tied up during the tick months. If he must run, pluck or have him shaved, and then comb and examine him daily as you do the kids.

Should you find any of the troublesome critters, don't remove them with your bare hands. Use a pair of rubber gloves and a pair of tweezers, and burn the tick, whose body fluid can be as dangerous as its bite. On livestock, old-timers used to say you had to "unscrew" the tick to capture it, because it screwed itself in. This is not true. Ticks merely attach themselves to you.

Old-timers used a tick wash made from three parts raw cottonseed or linseed oil, to one part pine-tar oil.

Lotions for Canines and Humans

An excellent, more modern wash for dogs can be made by dissolving an ounce of soap in a gallon of water and adding 2 ounces of a derris powder containing 3 per cent rotenone. Benzine hexachloride, developed for veterinarians, also shows promise in repelling and killing ticks on animals. Thanks to Dr. James M. Brennan, of the Rocky Mountain Laboratories, humans will find either phenyl cyclohexanol or butylacetanilide a great tick-discourager. It irritates only the tick, never the human.

The chances are several thousand to one that you will never be bitten by a tick, or even come face to face with one. Less can be said for your chances with the air wing of the formidable enough ground forces of the insect world—the mosquito, flea, fly, gnat, hornet, wasp.

Fortunately there is DDT. You can clear a room of practically any flying (and crawling) insect by a DDT spray. Now it is even possible to give a midsummer night lawn party outdoors free of pests by spraying DDT daily on all bushes, trees, fences, walls and grass several times before the event. If you use colored lanterns, place a citronella candle in it. Oil of citronella, incidentally, is an old-time favorite as a mosquito conker, but it's smelly. It has been largely replaced by new preparations which are odorless and harmless to fabrics.

Strongly recommended is a formula known as 6-2-2, containing three parts dimethyl phthalate, one part indalone, and one part Rutgers 612. It has been commercially packaged. A light application of 6-2-2 to the neck, forehead, arms and clothing will keep insects from blitzing you for most of a day. Alcohol, taken internally, is also said to insensitize the victim to mosquito bites.

Flying pests are apparently sensitive to colors. Experienced woodsmen have learned if they wear red and green shirts, they'll be less bothered by insects than the vacationist adorned in cool whites. On open porches, avoid white and blue light bulbs. Yellow, red and green bulbs will help keep out the nasty little party crashers. Those that do get in can be further discouraged by purchasing one of those ingenious porch lights which attracts them, then electrocutes them.

Insects, of course, have a way of crashing even the best-screened house. Fact, they take great pride in so doing. To discourage them, simply paint your screens with a special DDT paint (there are DDT house paints, too), and thereafter spray the screens from time to time, along with window frames, door bases, light fixtures, crevices, picture frames, with the new miraculous residual sprays with a DDT base. They last for weeks, and raise hock with the invading armies of ants, roaches, water bugs, centipedes, spiders, gnats and fleas. (Ever been up to your hips in fleas, transported indoors by Fido or Pussy?)

As for the resort owner who has an allergy to the use of DDT, and whose premises lurk with flics, nosee-ums, often known as punkies or sand fleas—great resort favorites—a squirt of DDT might well handle *him*.

Should the insect hordes fail to devour you, there are other summer hazards. Each year thousands of people accidentally or ignorantly expose themselves to poison ivy, poison oak or poison sumac. No state of the Union is free of at least one of these plants. While most people recognize poison ivy, many still think of poison oak as some sort of tree. Actually it's either a vine or bush with an oak-shaped leaf. Not everyone is susceptible to poison-ivy poisoning, but if poison ivy doesn't get you, possibly oak or sumac will. In fact, it may make you violently ill.

Poison ivy is by far the commonest of the unholy three. It thrives everywhere. Communities should root it out as a public service but don't. Birds may carry the seed to your lawns, and homeowners have unknowingly cultivated it up the sides of their houses.

But for every attack there is a counter-attack. Botanists recommend that poison ivy be ripped out, and a newly developed weed killer known as 2,4-D be applied to the ivy stumps, otherwise a new crop will spring up like Jack's beanstalk. Be careful about the cuttings—burn them in a furnace, and keep away from the smoke, as it is poisonous if inhaled or allowed to reach the eyes. Remember you can't scratch your insides. Decontaminate tools and clothes which have touched ivy, by soaking in a one per cent solution of calcium hypochlorite for 15 minutes. Fido and the cat can also carry ivy poisoning. Teach them to recognize the stuff.

There are several preventative ointments for ivy poisoning developed. The U.S. Public Health Service recommends a base of 10 per cent sodium perborate mixed in either a salve or alkaline vanishing cream. (Details available Reprint No. 2370 Public Health Reports, obtainable from the U.S.P.H.S.) Old-timers, after gardening, immediately wash with a coarse kitchen soap.

First Aid for Ivy Poisoning

However, if you do blunder into ivy, as soon as the first signs of inflammation appear, wash the exposed areas of the skin thoroughly and apply a 10 per cent solution of tannic acid dissolved in alcohol. Rub this on vigorously enough to rub off the tops of the blisters, and repeat the treatment at six-hour intervals. In the early stages of itching, some people find calamine lotion a good remedy. The addition of two per cent phenol to the lotion tends to relieve itching further. Mild cases of ivy ordinarily subside in a few days. If you go bustin' out all over, better see the doc.

Generally speaking, the poison-ivy remedies which flood the market work for some, don't for others. One of the oldest established remedies is a fresh solution of one five-grain tablet of potassium permanganate dissolved in one quart of water. Others use ferric chloride in combination; or photographer's hypo solution; gentian violet; salt water; and I have even heard of oil and vinegar dressing, liberally spread over ivy poisoning—the vinegar as an itch counter-irritant, the oil to sooth and heal.

No, mayonnaise hasn't come to attention, but it sounds as good as thing if you're really ivied up. Shane's prescription? Immerse the in the ocean, sleeping there if neces till itching disappears. Above all, scratch—this spreads and prolong agony. Then wait seven years, whe may become immune to ivy—or ma

THE DEAR, DEAD PAST

Continued from page 59

"D'you think this is Hayforth, Sir Vernon?" he asked.

"It might be, of course. Equally, I suppose, he might be dead, and somebody might have found my letter among his papers. I lost sight of him in the war, and haven't heard of him since."

"That sort of man?"

"Obviously not in those days," said Sir Vernon somewhat stiffly, "or he wouldn't have been my friend. But he was always a reckless fellow, and might have been knocked about by the war, have fallen on hard times, and slowly sunk to—this. The war," said Sir Vernon, who had fortunately missed it, "did not improve people's characters."

"Is there anything in this letter which indicates knowledge not contained in your letter to Hayforth?"

"I don't think so."

"For instance, why should it be taken for granted that you can drive your own car? Lots of people can't."

For the first time that evening Sir Vernon looked at Scroope with respect. "That's true," he said thoughtfully.

"Were you driving a car at that time?"

"My wife gave me a Rolls as a wedding present a few months later."

"I congratulate you. Driven Hayforth in it?"

"Probably. I saw something of him up to the war."

Scroope got up and threw the end of his cigar into the fire. "Obviously we must find the man first. I shall sleep here on Friday night, so as to be with you when your instructions come." He took a notebook and pencil from his pocket. "Turn your head to one side, I want the profile." He began to draw. "About five feet eleven inches, aren't you? I think I've got just the man. Muffled and goggled, of course, which is what anyone would be who was keeping a date with a blackmailer. My man—Dean is his name—will come in the back way at eight o'clock on Saturday morning. With a false mustache. This is going to be fun. There, that's not bad." He held the drawing up and admired it. "Thank God, it's money that he's after."

"What else are blackmailers ever after?" asked Sir Vernon contemptuously.

"Seats in the Cabinet," said Mr. Scroope. "The way I'm going to work, that would have made it more difficult."

ON SATURDAY morning at 8:30, Sir Vernon stepped nervously from his front door and walked across to his garage. It was a chilly February morning, and even for that short distance he thought it well to wear a thick, fawn traveling coat and a checked cap. He brought his car round to the front door and left it there. Mr. Scroope and breakfast were waiting for him in the morning room.

"Now then, Sir Vernon," Mr. Scroope said, his mouth full of omelette, "let's get down to it. You are to be at the fifth milestone between Wellborough and Chiselton at 12:30. You say you know the road. How?"

"It was near Chiselton that Hayforth kept his boat."

"Good. How long would it take you to get there?"

"Three hours."

"Then Dean must take three hours. He's just arrived; we'll have him in directly, and you can show him the place on the map. What's the country like?"

"Quite flat. No houses, no trees, no possibility of concealment, as I remember. A long, almost straight road."

"Dean will hide the money behind the milestone—nothing elaborate, just enough not to catch the eye of a passer-by. Then he'll drive on, turning off at Chiselton and coming back to London another way. Obviously the blackmailer will be a little way behind him up to the milestone. He may be outside the house now—he was in London last night to post the letter—in which case he'll follow your car down. Dean, in your coat and cap, will be good enough for him."

SIR VERNON had picked up the letter again, and was studying it. "You talk of 'him' all the time," he said. "Does it not occur to you that it is more likely to be the work of a gang?"

"With a mastermind at the center of the spider's web?" said Mr. Scroope hopefully.

"I gather," said Sir Vernon coldly, "that you think otherwise."

Scroope pushed the toast away, and spoke seriously. "I'll tell you what I think," he said, "and then I'll tell you my plans. You're paying for this treat, and you're entitled to know. I think that if two young men go out in a boat for a summer afternoon's offshore fishing and bathing, they will not be wearing oilskins. I think that if one of them has just had a desperate fight for his life, any letter which he writes immediately after, with a shaking hand and under the stress of great emotion, will be uncharacteristic and only just legible.

"I think that if a small boat, manned by two people in flannels, is fighting a gale for eight hours, the occupants will not merely be wet, but soaked literally to the skin. And I think that after it's all over, and now that the unexpected storm has removed all possibility of suspicion, Mr. Robert Hayforth will find a piece of sodden paper in his pocket with not a single decipherable word on it, will wonder what the devil it is, and then throw it away with a laugh at the ridiculous caution which inspired it. What that piece of paper would have looked like thirty years later baffles the imagination. In short, Sir Vernon, you may be quite certain that the blackmailer is Hayforth himself, and that it is only his word against yours."

Sir Vernon permitted himself a little enthusiasm. "But that is most satisfactory, Mr. Scroope. You relieve my mind considerably."

"Yes, but even so, he can be extremely mischievous. So, since blackmailers are better out of action, I propose, with your financial assistance, to put him out of action."

"Now that we know who he is—"

"We don't. We only know who he was: a face and a name of thirty years ago. That doesn't help. But this letter shows that he is sticking to familiar ground. It is probable that he is living in the district, and almost certain that he has a car. Ever studied history?"

"I got a first in history in my finals at Oxford," said Sir Vernon.

"Pooh, I don't mean that sort of dead-alive history. Real history. Criminal history. Ever studied the Lindbergh case?"

There was no need to wait for an answer, Sir Vernon's delicate shrug had given it.

"What it came to in the end was that they knew all about the man except who he was. However, he had the ransom notes—numbers taken, of course—and one day he would use them. That was their only hope of getting him. But how? Every gasoline station in the neighborhood was given a list of the notes, and told to write down secretly on the back of any ten-dollar bill paid in exchange for gas the number of the car which was filled. Then the list of ransom notes could be consulted at leisure in the evening."

"Most ingenious. And now you have taken the numbers of the notes?"

"Of course. And I shall go down to Wellborough this afternoon, and make arrangements. Not being official it will cost money. But by the time we've made the second payment to Hayforth, I shall know what he's calling himself and where he lives. I'll tell you something else. He says that he will give you the second rendezvous on March 25th, and that it will be in an entirely different part of the country. It won't. If his plan works successfully today, as I mean it to do, he will repeat it exactly. It leaves you just as uncertain until the last moment, and saves him the trouble of looking for an equally convenient place."

"And when you've found him?"

"Then," said Mr. Scroope with a happy smile, "the real fun begins."

WHEN a man calling himself Mr. Richard Hastings was arrested for possessing and passing forged notes, he did what all intelligent prisoners do. He sent for Mr. Scroope.

"Well," said Mr. Scroope, twinkling at him, "what's the story, Mr. Hastings?" He looked at the man with interest, summed him up as a gentleman gone to the bad, and offered him a cigarette.

"Better not go in the water for an hour or so. I've just finished a big lunch"

COLLIER'S HANK KETCHAM

"Thanks. I've been arrested, knows why, for—"

"Yes, I know the police story, nc want to know yours."

"I swear to you that I am—"

"—absolutely innocent. Naturally. we still need a story to explain wh quantity of forged notes was foun your safe, and why several others w had been passed in the neighborh were traced to you. What is that sto

"They were planted on me."

"By whom?"

"God knows. Some enemy, I suppo

"I see. What about the notes in c lation which have been through hands?"

"They must have gone through n hands. Why pick on me?"

"Obviously because you had su large store of them in your safe. want a better story than you're gi me, Mr. Hastings."

"I can't tell you anything better."

"Then," said Mr. Scroope politel will wish you good morning." He up. "Just one word of advice, if I The story which you will be tellir some other solicitor need not be but it must sound sufficiently like truth to allow him a temporary ha nation that it was possible." He out his hand with a smile.

RICHARD HASTINGS waved hand away. "Wait," he said. "Y better have it. I found the da things."

"That's better. Where?"

"Oh, hidden under a stone."

"You know, I don't think that will quite carry conviction—usin word 'conviction' in its less tech sense, of course. It must have rather a moment in your life whe found such a large packet of notes. would be expected to remember th toric spot."

"Oh, well, if you want the exact it was behind the fifth milestone o Wellborough-Chiselton road."

"You counted—and remembere

Richard Hastings looked up ar "What the devil do you mean? It 'Wellborough, 5 miles,' didn't it?"

"You were looking behind mile for something?"

"And said, 'Hallo, what's this?'

"Exactly."

"And what was it?"

"A parcel of one-pound Damned odd, I thought."

"And so you decided to steal the

"What's that?"

"You wish to plead guilty to ternative charge of stealing by fi Is that right?"

"Right!" Hastings said suddenl stole them. That's not very serious Well, now you've got the truth."

"It's odd," Mr. Scroope said, "a man, driving along the Wellbo Chiselton road on a cold and morning, should stop at precisely th milestone, lean against it rather against the cushions of his car."

Richard Hastings jumped to hi and said angrily, "What's all this? trying to trap me?"

"I'm trying to do," said S mildly, "what counsel for the pr tion will do much more thorough

"Sorry. I see the point; but nat —he gave an awkward little laugh a bit upset about the whole thing do absolutely swear, and it's gospe that I didn't know that the note forged, and that I found them pr where I said I did."

…h, come, we must tell them a little …. When you happened to find them."
…can't remember the exact date."
…Which date can't you remember?"
…r. Richard Hastings wiped his fore… with the back of his hand and said, …aven't the vaguest idea what you're …ng about."
…want the date which you can't ex… remember, when you got out of … car, leaned against the fifth mile…, and accidentally found a packet of …. Just a rough guess."
…he first week in February."
…bout seven weeks ago. The first …d note which came to hand was paid …e Lion Garage at Chiselton on …uary 18th. So that fits nicely. Now … about the second date? When you … got out of your car, leaned against … fifth milestone, and accidentally …d a second packet of notes."
…r. Richard Hastings licked his lips. …at makes you think I did that?"
…wo parcels were found in your safe. … opened, contained about 450 forged …. The other, unopened—or, possi…pened, examined and tied up again …ntained 500."
… can explain that. It's all coming … to me. The parcel which I found—"
… the first week in February?"
…es. It was really two parcels, done …gether. I counted the top one and …s 500, which was what made me …ive hundred just now. I was for…ng for the moment about the other …l, which I didn't open. Obviously … was another five hundred in that. …ing the thousand, as you were say… Silly of me."
…ot at all. Very natural. Then all … we have left to explain," said Mr. …pe cheerfully, "is why the inner …per of the second parcel was a … of The Western Morning News … March 24th—six weeks later."
…bert Hayforth banged the table with …hand, and cried, "Blast him, he's …ed me! The sniveling devil!"
…niveling—? Who is he?"
…he Right Honorable Sir Vernon …er." He dragged the words out …ingly. "All right, you've got it. It …hush money. He killed a man, …lered him; that's your smug, hypo…al Right Honorable. You want me …ll the truth in court. Right, I'll tell …nd we'll go down together."
…r. Scroope got up. "I have made it …exorable rule, Mr. Hastings, never …fend blackmail cases. Everything …u have told me is, of course, in …trictest confidence, and I now fade …f the case entirely. But I will just warn you in parting that the penalty for blackmail is, next to that for murder, the severest known to the law. Any written evidence which you may have had against Sir Vernon Filmer will be in possession of the police, and you will not be permitted to use it. An unsupported accusation made in your defense would only make your case worse and your punishment more severe. If you take my unprofessional advice, you will plead 'Not Guilty' to the present charge, give no evidence, and leave it to your counsel to suggest that in some way you are the innocent victim of a conspiracy."

He picked up his hat and went to the door. "Oh, by the way," he added, "if it gets about, though I don't see why it should, that I declined this case, it will not prejudice the court against you." The eyebrows went up in that humorous quirk of his. "It may even do you good. There is an absurd legend in legal circles that I defend only the guilty."

MR. CEDRIC WATHERSTON picked up the telephone and said, "Watherston here."

"Busy?"

"Just turning the heel."

"Anyone listening in?" the voice said.

"My dear fellow!"

"Right. Then I thought you would like to know that your honorable friend is relieved of all anxiety for five years."

"Fancy! I do congratulate you. I was reading an interesting case this morning, forging and passing and all that sort of thing, and oddly enough—but, of course, it's only a coincidence."

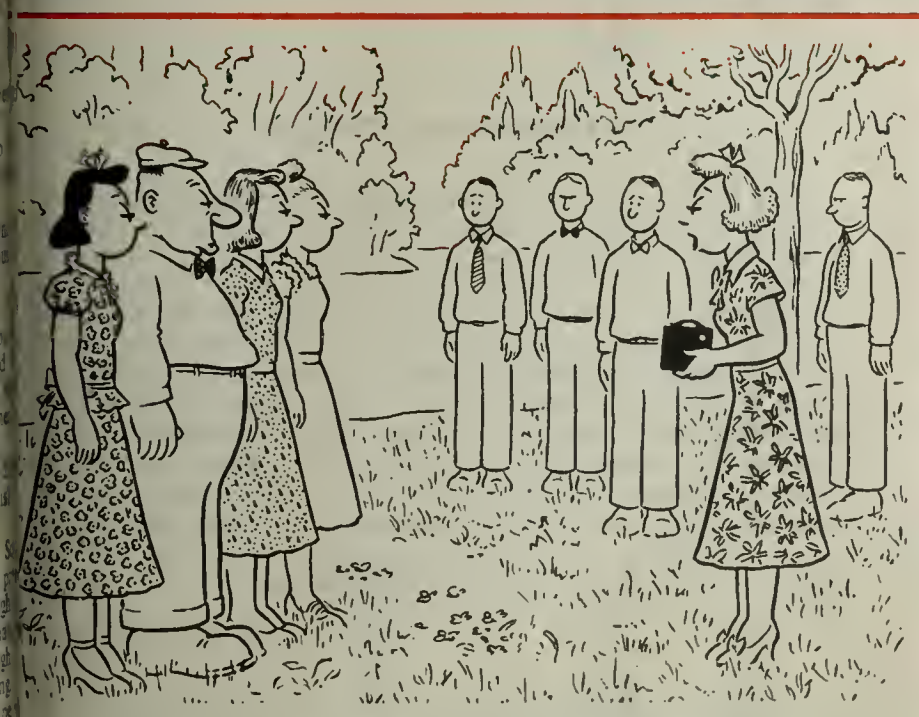
"I expect so. A respectable family lawyer shouldn't read criminal cases."

"It just caught the eye. Ah, what do you think will happen at the end of the five years?"

"I think that you will lose a distinguished client, and the country a distinguished servant. Quite suddenly."

"Ah! I was fearing the same thing myself." Mr. Watherston chuckled. "You know, you're a very naughty man. Here was a perfectly ordinary case of blackmail and there is hardly a crime in the calendar which you have not committed in order to bring the blackmailer to justice. If," he added, "you know what I mean by justice."

"Well, you see," the voice said apologetically, "I don't *like* blackmailers."



"Neither do I."

"Comes to that, I don't like Sir Vernon Filmer."

"How right you are," said Mr. Watherston cheerfully.

THE END

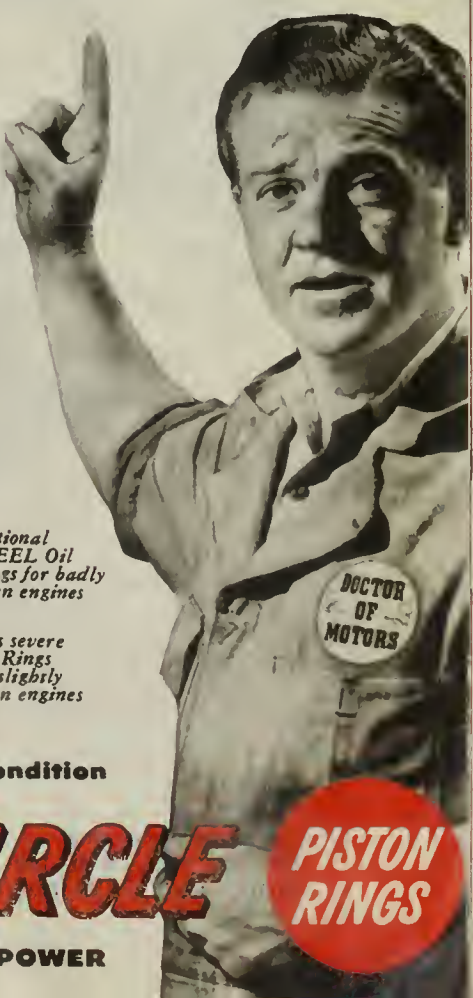
Doctors of Motors Everywhere Acclaim Perfect Circle Piston Rings

Yes, your Doctor of Motors, your expert mechanic, knows that Perfect Circle makes a set of piston rings for every engine condition. With sectional *steel* oil rings for the worst, badly worn oil pumpers . . . with less severe oil rings for slightly worn or re-built engines.



Further, he knows that no other piston rings are made with the same care and precision, engineered as thoroughly, or tested as completely as Perfect Circles. That's why leading car manufacturers use and recommend them, too.

THE UNDEFEATED HEART

Continued from page 21

tables here. The shelves of the beautiful bar crammed with famous brand names he hadn't seen for years. Our names, he thought. And he wished he were a profound man whose mind was bigger than the barriers of native pride so that he could see, clearly, the sum of all the differences.

Now the earnest man was reciting the history of the coming matches. A red sign beside the microphone said: ON THE AIR. Golf's big names appeared, brown and smiling, to say some warmly pleasant thing and vanish into the crowd. Bobby Jones, the greatest of them all was here. Hagen and Sarazen and Snead and Hogan—the game's top-drawer people, past and present. Then David Perry found himself on his feet, speaking.

"Tomorrow," he said, "the ancient battle is joined again. We are all fit and ready. May the better team win."

He went from the ballroom to the practice fairway with the newsreel men. He spent a quarter of an hour with them, working bareheaded in the rain, hitting iron shots for the impersonal eyes of the cameras. The cameramen were decent chaps, thorough and patient. "One more, please, sir. If you'll turn your head . . ."

"I'll be glad to," he said.

This was a simple task. There was no strain, no tension, and each shot had only to be a duplicate of the one preceding it. He saw the balls go out, hooked slightly to hold their course against the pressure of the wind; he heard the pleased murmuring of those who had gathered in the rain to watch. "A great stylist," someone said. Another, wiser voice said, "Very pretty, but the Americans also hit a pretty ball. And they've got what the long haul needs. Wait until tomorrow, man. You'll see."

Tomorrow, Perry thought.

THE practice rounds were done. The results of the drawing had been posted. Two-ball foursomes the first day. Four matches. David Perry and Sam Webb vs. Johnny Sands and Tom Farrar.

A voice came over the loud-speaker: "Your attention, please. David Perry, on the tee, now driving the first ball!" Gray mists of rain blew across the fairway. The flags around the clubhouse were limp.

Perry's drive was long and straight; Johnny Sands' drive was longer by fifteen yards. Sam Webb made a silent, whistling mouth, and they left the tee to plunge into a sea of umbrellas. Voices were all around them then. Perry listened; he could not help but listen. The gallery was American and strongly for the Americans. He had expected that. But they were a cheerful lot, and they applauded skill with a brisk impartiality. They did not seem to mind the rain. They bunched behind the ropes around the green, groaning when Farrar's putt curled across twenty feet of soggy turf to die on the lip of the cup.

The match was all square on the fourth, and again on the sixth. The seventh was a hillside tee. Perry turned to look back over the green and rolling land. The other matches were on the course now: on the fourth, the second, and just leaving the first tee. He found time in the instant before he addressed his ball to wish his countrymen greater skill and a better chance than he and Sam Webb had. Voices in the gallery were asking, "Where's that five-to-one money now?" The voices of the casuals, the holiday crowd, the Sunday duffers who apparently thought a sound knowledge of the game was sold with each and every ticket at the gate.

But there were those in the crowd, the thoughtful and quiet men, who had correctly read the signs. These were the professionals, the journeymen who'd learned their trade over a thousand such courses. They knew and the knowledge could be plainly seen in the quick averting of their eyes, in heads bent and turned away. Luck and a desperate scrambling had kept the match even thus far, but luck and scrambling weren't enough. The Americans made fewer mistakes in judgment of distance. They were longer off the tee; their pitch shots fell closer to the pin. Not important on one hole, or two, but rolled up over the long, long route the smallest edge is multiplied enormously. The Americans had that edge and were going to win.

Perry and Webb were two down at noon, the midway point. The crowded dining room buzzed with news of the matches still on the course. The Americans were ahead in one, trailing in two. Lynch, the quiet and angry man, had holed his approach on the fifteenth.

"A good lad," Sam Webb said quietly.

Webb knew what was ahead of them; he was a veteran, old in the game. He knew they'd had every break on the morning round: the bad hop that had put a drive of Sands' behind a tree; the freakish gust of wind that had pushed a superb wood of Farrar's into a water-filled trap; Sands' perfectly stroked putt that had stubbornly clung to the lip of the cup, refusing to drop. Webb knew that luck must average out; that presently the tide would turn and run the other way.

"Just a game," he said, in a voice of wonder. "Ten of us sweating blood trying to win a piece of crockery. Silly."

"It's important," Perry said, "because they're not."

They went out into the rain and booming wind. Again, voices wer around them. They walked the so turf and hit their shots. And now the gallery knew what the end woul "No chance," the whispers said. chance at all." And, oddly, there less laughter in the crowd as wor American gains in other matches sp across the course. "We'll take all f the gallery voices said. "It's a shame couldn't put up a better fight."

THEY were on the thirty-second watching Farrar's long iron bo and run for the pin. The match e there—six and four—and the whi newsreel cameras recorded the h shakes and the smiles. The crowd b and scattered. Perry and Webb w back to the clubhouse in the rain. showered and changed. Their t mates came in as the other ma ended. Lynch, the angry man, was s ing still; the rest had a numbed loo

"A proper drubbing," Fowler sai

Sam Webb said, "We can still wi

It was possible, mathematically. Americans had won four of the t points at stake. There were eight ma yet to be decided—twosomes, thir holes, match play. We need six t Perry thought. Seven to win. Seve of eight, and the men who beat us will be out there tomorrow.

Sam Webb said to Perry, "Who play tomorrow?"

"Sands. I drew Pete Muntz." . . .

Perry was first off the tee, the s day. The worst of the storm had p

SPORTING ODDS

RED HILTON

Early in the spring of 1917, Little Rock was playing Mobile in the Southern League ball park at Mobile. Johnny Bates, the old Cincinnati Red outfielder stepped to the plate just as a biplane, operated by a "ride-five-minutes-for-five-dollars" barnstormer took off from the Gulf Coast Fair Grounds immediately behind the ball park. Bates knocked a high fly over second base and it hit the fuselage of the biplane, which was only a snappy 200 feet off the ground. The ball stuck and the plane continued in a straight line over center field. Umpire Ted Breitenstein waved the runner on, and allowed the hit to score as a home run. When Norman "Tabasco Kid" Elberfeld, the Little Rock manager, screamed for a ground-rule two-bagger, the umpire pulled the rule book on him—and the first home run was scored with an assist from an airplane. The rule? "When last seen the ball was traveling out of the park in fair territory."

ere was just one task left—one
h to make. As captain, he would
to be on the platform in an hour
the cup was given to the Americans
ld until it should be at stake again.
nwhile, a new awareness came in
of strain. It was as if a blindfold
dropped away and he could see
road and noisy land clearly for the
first time. The crowd around the clubhouse scoreboard was no longer a whispering, faceless mass. They were people: men and women, an old chap with a pipe and stick, a pair of youngsters holding hands, a little girl.

He watched the American flag go up again, and yet again. Fowler and Lynch came to stand beside him in the crowd.

"Such golf," Lynch said. "It had been so long, I'd forgotten people could do the things they do." And then he almost smiled; he was no longer angry.

THE results were posted on the board. The Americans had taken every match but one. Sam Webb and Johnny Sands were still fighting somewhere out on the course. They waited; and heard the dim sound of cheering in the distance. Presently, a flag soared up the slender mast.

"Ours!" Lynch said. "It's ours!"

"Yes." Bill Ekstrom was standing beside them then. "Sam Webb wore that Johnny down to a nub. He took him, three and two." He smiled at David Perry. "If you're ready, Dave."

David Perry said, "Of course."

He stood on the hillside platform where the cup, slender and fragile and golden, waited to be handed into the keeping of the Americans. The officials and the celebrated names were there. A brisk young man, stop watch in hand, spoke into a bank of microphones. David Perry looked out over the crowd. Cold sweat started on his palms. That was strange, for the quick and graceful exit line should be an easy task.

But it was not. There were only the shopworn words that skipped across the surface, saying nothing. He felt he should explain why they had come, knowing they could not win.

He saw the faces of his teammates in the throng as he walked toward the microphone. Lynch tipped his head and grinned. Fowler raised his hand in half salute. In that instant of time, David Perry felt the warmth that comes when all of envy and bitterness are gone. He looked out over the massed Americans. This was the one place in the bedeviled world where the middle crop of men whose skill and strength were still reaching for the crest could play at games. We have no middle crop of golfers at home, Perry thought, only the battered old, and the very young. But one day—

"Mr. David Perry," the announcer said.

"We were beaten by a better team," David Perry said. The loud-speakers made his voice a giant's voice.

The girl with the yellow hair and the fountain pen that wrote forever was in the front rank of the crowd, close to the platform edge. "Defeat," he said, "is never pleasant. Particularly, when victory would have meant so much at home." Her eyes held a look of sorrow now. She was sorry for him, his team, his country. He wanted quite suddenly and desperately to speak to her alone, to say that figures posted on a scoreboard are not important. A wasted thought, for how could he expect her to understand what he had realized only a few moments ago? Lynch, the angry man, had understood when he put aside his rage to say. "Such golf!" Defeat did not matter when you knew there was a land that could train and field such a team.

David Perry smiled at the girl with the yellow hair. He spoke to the microphone. "The cup stays here," he said. "As it should. Our best was not, this time, good enough. But we'll be back, a younger and a stronger lot, to have another go at you."

He saw Bill Ekstrom waiting on the path. He lifted his hand. "Till next time—goodby." He walked across the platform and down the stairs to have a drink with an old and valued friend—an American.

THE END

KERLEE

At the Peak of Flavor

Blatz is a *peach* of a beer! Time and nature have mellowed every drop to the very peak of flavor.

Brewed only in Milwaukee for 97 years, Blatz is Milwaukee's *first* bottled beer.

Try Blatz today—and we think you'll agree it's America's *finest* beer, too!

pharmacist could easily make such an error. There've been similar cases in our own country."

Niles' face cleared. "Why, yes," he said. "That might be an explanation. And you took this poison before the police arrived?"

"I certainly had no opportunity after."

"So where's your suicide?" asked Wickersham.

"There is none," said Niles. "Everything is clear." A first-year toxicologist would have told him differently, but there was no toxicologist present. "That's all now, Mr. Tremaine. There'll be more later, but since you have no further reason to remain in hiding I suppose you'll be easy to find from now on."

I STOOD up. It had to work now. There was no other way. "Do I understand all charges against me are withdrawn?"

"Absolutely," said Niles. "You're a free man. How does it feel?"

"Fine," I said. "Then I'd like to rejoin my mother and sister." I looked at Mrs. Tremaine and at Catherine. Catherine pushed herself slowly to her feet and started toward me. About four feet from me her knees began to buckle and I caught her just as she crumpled toward the floor. While I held her Wickersham pushed a glass of water against her lips.

"I'm all right," she mumbled. "Please, may we leave?"

Wickersham chuckled. "Too much good news all at once."

"Yes," she whispered, pulling away from me. "Can we go now?"

"Of course," boomed Niles heartily. "Get some fresh air. This has been a terrible strain." Catherine caught my arm and we started for the door. Wickersham helped Reba Tremaine to her feet and followed. The door was no more than fifteen feet away but we seemed an eternity getting there. When the door finally opened, Niles detained me again.

"Just one thing before you go, Philip. Do you believe Mike Finney is still in San Francisco?"

"I'm certain of it."

"You couldn't give us a clue as to his present whereabouts?"

"I would be very foolish to try."

"I see."

"But I can tell you this. As soon as he learns I'm free, he'll attempt to leave town immediately."

"You mean he'll know the police are after him?"

"He'll make that connection."

"Good. We'll notify all authorities to be on the watch for him. He won't get far. Goodby, Philip." He shook my hand. Over his shoulder I could see that the F.B.I. man, Ferratti, had finally had his bright idea. He was bending over the table at the place where I'd been sitting; he was looking for fingerprints. He wasn't going to find any though, not there. Someplace else, maybe, but it was going to take him a little time.

"Goodby, Mr. Niles," I said. The four of us stepped through the door and started down the hall. The door closed behind us.

Wickersham flagged down a cab, and the four of us crawled in. I pulled down a drop seat so I could sit facing the others. Wickersham was beaming, but the two women didn't share his enthusiasm. Catherine had made a rapid recovery from her faint, so rapid that I decided the faint had never been real. It had cut Grover Niles' speech short though, so I had no complaints. She was silent, waiting for me to call the next direction. Reba Tremaine was silent, her jaws clenched. The cab left the curb.

"Now," said Wickersham, "where to? Personally I think this calls for something really gay. Catherine, you need a drink the first thing. Mrs. Tremaine, you could stand one too. Why is everyone so glum? Philip is free!"

"It's the shock," I said.

"Well, cheer up," he ordered. "There's not a thing in the world to worry about." He leaned forward and called out the name of a bar to the driver.

"Look," I said. "I don't want a drink right now."

"Well, name it, then. I'm sorry. I keep forgetting what you've been through. I'll bet you're dead on your feet."

"Not yet," I said. "But within thirty minutes the newspapers are going to hit the streets. Niles can't keep this story from them. My picture will be all over town again and dozens of reporters will be trying to find me."

"We'll fix that," he said. "I'll have my secretary reserve a room at some quiet hotel where you can hide for a few days."

"It won't do. I must get out of town."

"That can be taken care of too." He looked at me soberly for a moment. "You're still sore at me, aren't you? I said some pretty nasty things to you. I'm sorry. I've tried to help all I could. I know now that you'd have done all right without my help; this Finney thing had to break anyhow, but I haven't hurt you any. I wish you'd forget about that sock on the jaw I handed you."

"That just evened the score," I said. "It's all right. But I've got to get out of town, and I'm broke."

"Broke?" He waved his hand expansively. "Good Lord, man, don't you realize you're worth about a million bucks? You've cleared yourself of the crime, and under your father's will the money is all yours."

"Yes," I said. The two women stared straight ahead. "Is any of it available? I mean right now?"

"Well," he said, "there'll be a little red tape—papers to be signed and notarized. And you'll have to submit proper identification to your bank. It can all be taken care of the first part of next week."

"I don't want to wait that long," I said. "Isn't there anything available right now? I'm flat, and I'm sure my mother has nothing to spare. She's gone to considerable expense on my account already."

"H'm, well, I can loan you what you want within reason." He snapped his fingers. "I've got it!" He spoke to the driver again, giving a Montgomery Street address. "I can get you all you need for the time being. The will set aside twenty thousand for your defense. It can't be paid over to anyone except your lawyer, but there's no reason why you can't make me your lawyer. I'll draw that amount on the estate and then turn it over to you. Nothing to it."

"What time is it?"

He pulled out a watch. "A little past two. Nearly an hour before banks close. We'll take care of this and then have something to eat. I'm starved."

THE cab stopped before a building in the Montgomery Street canyon and we all got out. Wickersham gave his arm to Reba Tremaine, and I secured Catherine again. There were going to be bruises on her arm where I held her. I walked fast and she kept up. She seemed almost to be pulling me forward. I held her close until we were in Wickersham's office.

"Several calls," his secretary told him. "One about five minutes ago that sounded very urgent."

"Who was it?"

"A man named Ferratti. He said he must speak with you at once."

"Oh, hell!" muttered Wickersham, glancing at me. "He probably wants us to help him find Mr. Finney. It can wait a while. If he calls again, tell him y expect us in about an hour."

We followed him into his private off where he waved us into chairs while dug into a filing cabinet. He brou out a folder and spent about five m utes going through its contents. On desk was a clock, a small electric c which made no sound, but by watchi I could see the almost impercepti movement of the minute hand. All time it was tracing its slow course, otl things were happening. When I'd Niles' office, the crystal had dissolv Ferratti was free to talk, free to voice ideas. Once he did that, Niles would member a thousand additional questi he should have asked me before lett me go. He might have asked why I stayed out of the country for ten yea why hadn't I asserted my innocence lo ago? Why hadn't I given myself up Wickersham when I first met him? Th were hundreds of them, and I could answer a one without giving mys away. By now Ferratti had proba called the jail to make sure the checked my fingerprints against the ones of Tremaine. He'd find out that fingerprints had never been taken at jail. That would put him in a state high excitement. He'd see the full po bilities. He still needed my physical p ence to prove his idea.

"Don't forget about the banks," I sa

"Plenty of time," drawled Wi ersham. "I just wanted to make cert this is in order. I'll draw a check agai it for twenty thousand payable to me your attorney. Then you can take cash—or is that more than you wan

"I'll take the cash. Perhaps I owe something?"

He smiled. "I'll be well paid for t ing care of the other aspects of the v As you insisted throughout, I wasn't ing as your counsel, so I don't dese any of this." He wrote out the ch finally and called his secretary. "F down to the bank with this," he t her. "Give it to Mr. Gowan. I'll him and tell him you're coming."

HIS secretary took the check and parted. Wickersham dialed the b and explained the situation bri When he hung up, he looked at me grinned.

"The newspapers have the story ready. Mr. Gowan has just finished re ing about it, so there'll be no ques about the check."

."That's fine," I said. Sweat was be ning to trickle down my back again w I waited. I had to have the money. few dollars were no good to me no needed a lot. Meanwhile the news out, and somewhere in San Francisco real Philip Tremaine would read story. If he saw his name given a c bill of health, what would he do? I knew all the facts, he'd stay in hiding, he couldn't know the full facts. couldn't possibly know I'd been Wickersham at the time Tuttle was ki All he'd see would be the big chanc walk in, prove his identity and take a fortune. ouldn't he be obliging?"

"I keep forgetting." The door opened and the secretary came in. She had the money in a sealed envelope which she gave to Wickersham. He handed it over without breaking the seal.

"Better check it."

I ripped a corner off the envelope and ran a thumb across the protruding edges of the crisp bills. They fluttered like a deck of playing cards. I didn't need to count the money. There was plenty. It was in two clips, one containing thousand-dollar bills and the other holding bills of smaller denomination. I put it in my pocket.

"Thanks," I said. "Thanks for everything. And now I'm going to take Catherine and Mother and run along. We've got a lot to say to each other."

"I'll bet you have," said Wickersham, brightening at this first indication of family affection. "You go ahead. If anything comes up that you need to know about, I can always catch you at the station before your train leaves."

"Right." I steered Catherine and Reba Tremaine out Wickersham's private door into the hallway. As we started for the elevator, I heard the phone ring again and heard Wickersham answering it.

"Mr. Ferratti? Oh, yes. No, he just left. Hang on a minute. I may be able to catch him for you."

I urged the women into a run. Reba Tremaine was ponderous, but neither of them needed much urging. No elevator was waiting nor was there time to ring for one. If Ferratti wanted me at all, he wanted me in person. The men with the handcuffs might be on their way now.

I opened the door to the stairway by the elevator shaft and pushed the women through it. I stepped down beside them and let the door shut. A moment later I heard brisk footsteps along the corridor outside. They could belong only to Wickersham. The footsteps stopped about halfway to the elevator shaft where Wickersham was able to see that no one was waiting. Then they receded at a more leisurely pace.

"All right," I said. "Start down." They said nothing. I had each of them by the arm now, keeping them both ahead of me. We left the stairway after descending one flight, rang for the elevator and stood in silence until it came. We were silent going down, and silent until we'd found another cab. On the street newsboys were hawking the afternoon papers, yelling their lungs out about Tremaine's being cleared. I caught a glimpse of The Evening Register with both my pictures spread all over the front page. One was labeled Tremaine, the other Finney. It wouldn't be long before a lot of people started insisting that both pictures were of one individual instead of two. The driver of our cab wasn't one of the suspicious ones. He didn't look at us twice.

"Where to?" he barked.

"Just start driving somewhere until I make up my mind." He liked that. I closed the glass partition and let him go. He turned and headed for Broadway where he could get out of the heavy traffic and run up some mileage. With the glass between us and the driver I faced the two women. Catherine was crumpled into the corner of her seat, her eyes closed with what looked like pure exhaustion. Reba Tremaine, however, still maintained a rigid posture. Her face was set.

"There's not a thing you can do," I told her. "It's too late to kill me now. Ferratti will insist upon absolute identification of the body. Your word won't be enough." She didn't say anything, so I continued. "Your son is quite safe so long as he doesn't make the mistake of showing himself, and he probably won't do that in view of my pictures being in the paper. He really doesn't look like me at all. He's wearing a nice disguise in his own face. And if you're afraid that by some remote possibility I might actually collect his inheritance, you can forget that too. I can't. I wouldn't if I could." In the corner of the seat Catherine stirred and opened her eyes.

"Do you have to talk?" she asked huskily. "There's so little time."

"I'm not wasting any." I slid the glass aside and spoke to the driver. "Take us out to the Legion of Honor." I slid the glass back. "It occurred to me that one of you might want to make a last try without realizing that it's too late. Even if you were successful, it wouldn't do any good. This time you're really interested in my escape."

"What do you expect of me?" snapped Reba Tremaine.

"Nothing, now that I'm sure you recognize the facts. Nothing at all."

WE MADE it out to the Legion of Honor in about fifteen minutes. The driver got out and opened the door.

"Goodby," I said. Mrs. Tremaine stepped to the sidewalk and Catherine started to follow. She turned and looked at me just as she was about to leave the cab. "Goodby, Mike Finney," she whispered.

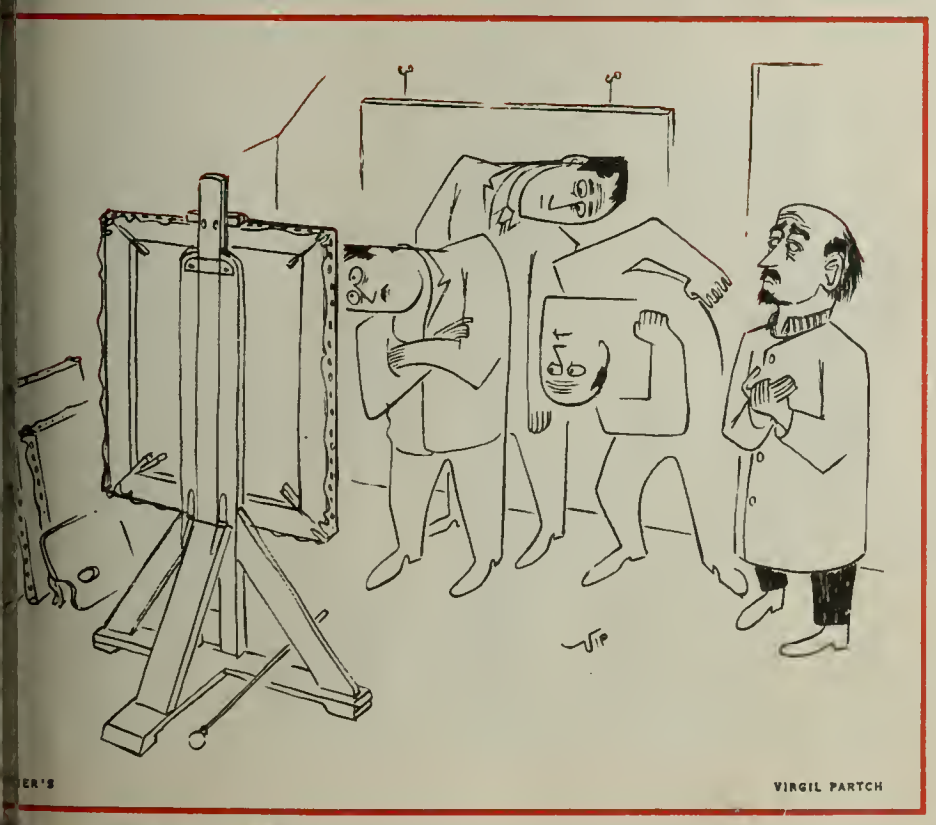
I caught her by the wrist and pulled her back to the seat beside me. The driver gave me a big wink and slammed the door. Mrs. Tremaine stood on the sidewalk by herself. Beyond and above her right shoulder I could see Rodin's statue of The Thinker sitting on its pedestal in front of the Legion of Honor gallery. There was something strangely similar in the deep contemplation on the face of the statue and the grim determination on the face of Mrs. Tremaine.

"Back to town," I told the driver, "and the faster the better." Whatever it was he fancied he saw in the situation made him enter into it joyously. He drove with sweet abandon.

"Why did you keep me?" said Catherine. "You must go quickly now."

"Because I feel safer with you and your mother separated. I'm a poor match for you even one at a time." That wasn't my reason, however. The reason had nothing to do with logic. She had called me Mike Finney, and no one had used that name to me in a long time.

"I see," she said.



"So I'll leave you at separate places. Your mother might be more considerate of me as long as she knows you're in my care."

"It would make no difference to her, but there's nothing she can do. She'll try to find Philip and tell him to escape while he has the chance. That's all." She spoke with an air of finality.

"And you?"

"I told you about myself last night. There's nothing to add."

I laughed at her. "But you left out a

Remember when

wash day wore you out?

but today

Everything's under control

Today everything's under control on wash day when your automatic laundry machine, your drier and electric or gas water heater are equipped with "Robertshaw" or "Grayson" controls. Look for them on your gas range and space heater, too, as industry looks for "Fulton Sylphon" as a mark of quality in industrial controls for temperature and pressure. All are trademarks of Robertshaw-Fulton Controls Company.

"Robertshaw" thermostats control oven temperatures of gas and electric ranges. "Grayson" time controls turn gas ovens on and off automatically. Look for these controls on the equipment you purchase.

In heating, ventilating and air conditioning, "Robertshaw" or "Fulton Sylphon" automatic controls assure comfortable room temperatures... no overheating or overcooling . . . no waste . . . no bother. Look for them.

few details, like the minor fact that I was poisoned at your house. Otherwise your story wasn't bad."

She turned her head away and looked out the car window. "I didn't tell you that because I wasn't sure until today that you were poisoned."

"Quite likely," I said bitterly.

"You didn't die," she said softly.

"Through no fault of yours. Someone merely miscalculated the dose."

"There was no miscalculation," she said quietly. She wasn't arguing at all. "It was in your coffee. If you had drunk it all, you'd have died. That's why I took it away from you and spilled it."

"So now you're trying to tell me you saved my life."

"I did save your life."

"Very sweet of you. Why didn't you mention that last night? Generally when a person performs such a heroic act, there isn't such reticence."

"Because I wasn't sure then. And because I couldn't tell you I had saved you from being poisoned without telling you who tried to poison you. One murderer in our family is enough."

"And who administered the dose?"

"Mother," she said simply. "I knew by the way she looked at me at dinner that night that she hadn't told me the whole truth. I've told you before how much I was already regretting my part in bringing you to the house. Then when she insisted on going for the coffee, I became frightened. I finally went to the kitchen myself and got there just in time to see her put something into one of the cups—your cup. I didn't know what it was, but I was afraid. You started drinking it, and I simply couldn't stand it. I couldn't accuse my mother of poisoning you without proof, so I spilled the coffee instead. And today for the first time I learned that I was right." She spoke without emotion. "Now you know just how wicked is the environment in which I've lived. I don't care whether you believe me or not. Please let me out and go on. Go on to your snow fields."

"I'd waste time letting you out. The driver is doing pretty well."

"You're in greater danger than ever."

"And my danger is your danger. Because if I'm taken, it will be simple to prove that I had nothing to do with the death of Rex Tuttle. I was with Wickersham when Tuttle was shot. It's a matter of record."

"Thank God for that!" she breathed.

"So that leaves you holding the gun which killed him. Very clever of you to tell the police you'd picked the gun up after finding it. You couldn't have wiped your own fingerprints off without destroying mine."

"Do you believe I killed Tuttle?"

"Yes, I believe it." I said it coldly, but I wanted to hear her deny it.

I WANTED to hear her prove I was wrong. I kept remembering her as she was when I left her in the hotel room. I had trusted her then. I wanted to know the trust wasn't misplaced.

"I came close to admitting it," she said.

"Oh?" Then it was true?

"Because I thought that you had killed him. I thought that finally you'd had to kill someone to escape, and I was really to blame. I'd caused it all to happen. Then John Wickersham said you'd been with him at the time Tuttle was killed, and I knew you were innocent. It was one of the happiest moments in my life. You don't have to believe that either."

"No," I said, "and the chances are I won't believe it. You're a genius at explaining things, but some things can't be explained except by the truth. Let me tell you a few truths. Do you know that in the hotel room last night I almost loved you? Do you know that I believed every word you said, that your tortured face was beautiful to me and that I hated the moment when the door shut between us? Do you know that I almost went back and asked you to come with me, thinking that together we could escape from the past which haunted us both? Do you know any of those things?" Her face flushed. It wasn't possible, I thought. People can blush with shame, but murder isn't an act to be ashamed of. Anyone who has gone that far is beyond shame. But her face was blushing.

"That isn't true," she said. "Don't say such things when they can't be true!"

"It was true at the time. But emotions are fickle, you know. So you saved me from poison, and now you tell me you were on the point of admitting the killing of Tuttle in order to save me from a murder charge. Quite a sacrifice." I taunted her. I remembered that blow on the skull at the foot of the hotel stairway. She put her hands to her face.

"Please let me out. You'll never believe me. Why should you believe anything any more? I only want you to get away and be happy somewhere."

"So you thought I killed Tuttle."

"But your fingerprints were on his car. You were with him at some time."

"You bet I was in his car. He knew everything that had happened to me and somebody killed him to shut him up. I remember quite well. A blow on the head

From next week's installment of THE SECRET PAPERS OF HARRY L. HOPKINS: Hopkins wrote: "Churchill told us that the Singapore business was a mess . . . they let him and the British army down very badly."

isn't quite as bad as poison where memory is concerned. At least I remember events up to the time I was hit and after I came to."

"I don't even know what you'd talking about," she cried.

"It was I, not you, who was hit. If I remember, you can. I left you, looking lost and beautiful . . ."

"Stop calling me beautiful! I'm not!"

"Shall I say desirable then? In your flowing blue gown? With your hair loose and your eyes full of tears? Quite a picture. Quite a thing to leave behind in that hotel room. But I didn't leave you behind. You followed me right down the stairs of the hotel. You came up behind me in the entrance. What the hell did you hit me with?"

"I didn't hit you at all!"

"In her trailing ghostlike garments drifting down the stairs. Silent as poison. Was it a piece of loose pipe or a spindle you'd torn from the balustrade?" I finally had her in tears, and I didn't care. She'd been glib enough at explaining everything else, but now she could only cry her denial.

"It isn't true!" she sobbed. "No, no!"

"It doesn't work," I said. "You went through this act once already. I'm just trying to find out how it feels to be a carefree killer. The absence of anything human inside you must give you a terrific sense of freedom. How did it feel when I went over the cliff? You really thought I'd gone. Did you and your brother gloat over it all the way home?"

"I've never even seen my brother!" she cried. "I didn't know he was within a thousand miles until this afternoon."

I laughed at her again. She was choking up beautifully, her body heaving, her head trying to find a place to hide. I was mauling her, but not with my hands so I didn't have to be gentle. I was mauling myself too. I'd wanted her to explain that blow on the head. She couldn't because she had delivered it. I hated her.

"So then you parted. You to your home, and your brother—where did he go?"

"I tell you I've never seen him!"

"And I tell you you have! You him and went on home where you un John Wickersham. Did you cry for too? Did you beg him not to say y gone away with me?"

"I told him only what you asked to!"

"I gave perfect directions, didn' Everything was rosy. You were all to collect a fortune when Tuttle ha appear and tell you he knew all al it. He must have forgotten to tell I wasn't really dead or you woul have been so quick with the gun. cry about it now? You're safe enc with me. I don't dare tell what I k Or are the tears hiding a new atter Go ahead. I'm watching."

SHE rolled away from me, fumblir her purse and finally getting it o It was only a handkerchief she was a She pulled it out and let the purse to the seat beside her. hought. After I had my papers,
ack to Calisto—I think, perhaps,
because I wanted to see Paquita. I thought that her dark body, her quick laughter and her almost incomprehensible innocence would help me forget a girl whose laughter I'd never heard.

Paquita wasn't at Calisto when I arrived. When I asked for her at the village, the usual smiles were absent and information was lacking. The Hotel Taylor, at least, was glad to see the return of a paying customer, but Cayetano, who had taken over full duties as bar boy, met my questions regarding Paquita with the same dignified reserve as the people in the village. He told me that she had gone up the lagoon in a rowboat to another little village called Aquilango and was expected back the next day. The wait wasn't helpful. It gave me time to formulate all the rational reasons I had to forget about Catherine Tremaine.

Paquita came the next day. It was in the afternoon, and I was on the beach with my trousers rolled, wading in the surf. I could see her coming for about two hundred yards, not running—as she once would have done—but walking at a dignified pace. I shortened the distance by going to meet her. She wore a shawl over her head. She looked at me in silence a few moments.

"Then it is true what they told me," she said. "You are back, Roberto?"

"As you see, Paquita." It wasn't what I expected. She shook her head sadly.

"Almost before you go away, you are back. I think you lied to me, Roberto, about San Francisco and the cold country. What you wanted was only to go to Mexico City for a few days to see the bullfights. Isn't that right?"

"Perhaps that's it. And now I'm back." I felt ill at ease. She smiled at my frown.

"I am not angry with you, Roberto." The smile became a tinkling laugh—the laugh I remembered. "But I was so angry with you when you went away! I could have scratched you. Even though you gave me all that money." She was suddenly serious again. "Ah, Roberto, you shouldn't have done that."

"It was a present, Paquita."

"The present, yes, that is all right. But what happens when you give me such a present? Suddenly I am rich. Sixty pesos from you, twenty pesos from Señor Temple which you gave me, a few pesos of my own which I had saved. I make the mistake of telling the village about it and then what happens?"

"Don't tell me someone stole it?"

"Oh, no, nothing so bad as that. But people talk, and the next thing my husband comes home. He hears about it and comes for the money."

"I see," I said.

"So now he is here, and I have a hus-

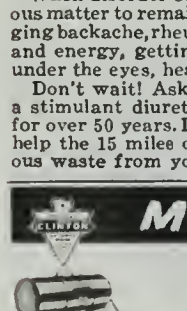
MANY NEVER SUSPECT CAUSE OF BACKACHES



This Old Treatment Often Brings Happy Relief

Many sufferers relieve nagging backache quickly, once they discover that the real cause of their trouble may be tired kidneys. The kidneys are Nature's chief way of taking the excess acids and waste out of the blood.

When disorder of kidney function permits poisonous matter to remain in your blood, it may cause nagging backache, rheumatic pains, leg pains, loss of pep and energy, getting up nights, swelling, puffiness under the eyes, headaches and dizziness.

Don't wait! Ask your druggist for Doan's Pills, a stimulant diuretic, used successfully by millions for over 50 years. Doan's give happy relief and will help the 15 miles of kidney tubes flush out poisonous waste from your blood. Get Doan's Pills.

SAFE EYE-GENE
Relieves TIRED EYES In SECONDS!

Wonderful EYE-GENE! Just two drops in your eyes that are tired or irritated from wind, glare, overwork, lack of sleep, reading, driving or movies—will relieve, rest, refresh, clear them in seconds. Use it every day. EYE-GENE is safe and gentle. 25¢, 60¢, and $1.00 in handy eye-dropper bottles at Druggists everywhere. Insist on EYE-GENE!

Weary, irritated one minute...

Relieved, rested, cleared the next!

Guaranteed by Good Housekeeping

band. Can I do anything about it, Roberto? Right now he is here."

"I see," I said. I was somehow tremendously relieved.

"You are not angry then, Roberto?"

"No, I'm not angry. If you have a husband, you must behave like a wife."

"That's right," she said thoughtfully. "But I heard you were back and wanted you to know." She smiled at me. "Maybe the husband is a good thing because now we have gone into business together. With all our money we have bought four burros, and once each month we will take things to Acapulco for the vendors in the stalls of the market to sell to the tourists. I have just been to Aguilango buying shellwork, and we will also take hammocks and mats and the pretty pictures old Hernandez makes from fish scales. There are many tourists now, and business should be very good. Maybe someday we will have many burros and can go as far as Guadalajara and Taxco for glass and silver." Her eyes danced with pleasure.

"That's fine, Paquita. I'm very glad."

"Really, Roberto? I was afraid you might be angry that I had a husband."

"A husband is a good thing to have."

"I think so," she said. "And you? Pretty soon you'll go away again?"

"I believe so."

"That is the way it is. But I will remember you and the good times we had. And I will remember the last joke. I was angry with you then too."

"What was that, Paquita?"

"When you stole Señor Temple's billfold. He wanted to play a little joke, that Señor Temple. He gave me his billfold and bet me you would keep it if I gave it to you. I told him he was wrong because you were such an honest man. I was supposed to bring it to the hotel and tell you I found it. And then you kept it, and it made me so angry because it meant he was right. How he did laugh at me the next day."

"Then he hadn't gone that night?"

"I think maybe he went up the road a little way with those tourists. The next day I saw him and he wanted to know who won the bet."

"You told him?"

"Yes, but I felt wrong about it, because I didn't tell him you had given me all the money in the billfold. So it was really I who was dishonest." She smiled. "But it was a good joke."

"Yes," I said, "it was a fine joke. There'll never be a joke like it." But I was glad to know her part in it had been innocent. Catherine Tremaine had played an innocent part too. And Catherine had no husband.

I told Paquita goodby and bowed to her to show that I knew she was a *señora* with prospects of fortune. She curtsied very prettily and went away. . . .

THESE recollections, among others, were with me as I watched the palms sway back and forth above my hammock. I finished my beer and went to my room. Cayetano had laid the newspapers on the table by the bed.

Reading them was a strange experience, like watching blind men put together a jigsaw puzzle with a picture on it which they couldn't see even after all the pieces were assembled. They were still looking for Mike Finney, but by now they were also making efforts to locate Philip Tremaine who had disappeared without a trace. The latest development concerned the discovery of a tattered and bloodstained overcoat found in a culvert near Larsen's filling station. Larsen testified that this overcoat had been worn by a man answering Finney's description who had been left at the service station by Rex Tuttle whom Larsen had identified several days previously at the morgue. The F.B.I. was hinting at sensational revelations.

According to the newspapers Tremaine had never picked up certain train reservations which he made from his lawyer's office. He hadn't been seen since leaving his mother and sister.

That part would stay a mystery, I decided. The manager of the Hemisphere Airlines possibly realized by now why the man he thought was Tremaine had been in so great a hurry to hire a plane, but the manager had taken such a big tip for his services that the police might consider it a bribe. He wouldn't talk. The pilot wasn't likely to talk either. Presumably he'd taken a private passenger to Tucson. The police wouldn't consider a one-thousand-dollar bill sufficient excuse for his making an error of several hundred miles in his course.

One other article in the paper interested me. It concerned Catherine Tremaine and was date-lined Santa Rosa, California, where, according to the article, she was living in a small apartment by herself. She could give the reporter no information regarding her brother's whereabouts. The reporter had advanced the theory that Philip Tremaine might be dead, in which case she was in a position to inherit the Tremaine fortune. Her reply was formal.

"I do not want it and shall make no effort to secure it. If it should come to me anyway, I'll turn it back to my trustee to dispose of in support of whatever charities or endowments he thinks are best qualified to receive it."

The reporter pushed his inquiry further and suggested that Philip Tremaine might have fallen victim to Mike Finney, upon whom the police had as yet never laid eyes. Her quoted reply was:

"I cannot believe it. My brother left me in a cab in San Francisco and told me he was going away. I can't blame him for not coming back, but I pray to hear someday that he is safe."

I read the article through several times, wondering about it. The other newspapers had nothing to add, so I folded them together and tossed them on the bed. At least they had told me clearly what I had to do. I went to the closet and got a packet from my coat pocket. It was the one I'd recovered from Manuel Ruiz; it still had the wax seal on it. I broke the seal. The contents evoked some memories which I wasn't going to remember any more. I couldn't. As Mike Finney I was wanted for murder, and you can be extradited for murder. I looked at my passport, the legal one with which I'd entered Mexico from Europe. It had my name on it, my picture, my fingerprints. I read through my citations again. Then I restored everything to its place and left the room.

I walked across the terrace again and into the shadows of the trees. I went on through them until I hit the open beach where the sand lay yellow in the light of a quarter moon. I could see the moonlight glistening on the concave surfaces of the gigantic breakers before they toppled and fell. I followed the beach for about half a mile to a place where the bedrock jabbed through the layer of sand and shouldered its way out toward the boiling surf. I stepped on to the rock and followed its course toward the water. At its seaward end was a drop of about eight feet to a rocky floor that sloped outward in a series of knifelike edges. At low tide this rocky floor was bare and made a good place to hunt for shells and bits of sea moss that grew in the crevices. But now the tide was coming in so that after the waves broke, the heavy surf rushed forward until it struck the face of the higher outcropping itself where it spouted upward in a fount warm spray. When the waves re I could see the rocky floor bene black and gleaming in the moonlig

I sat down and let the spray over me. The night was hot, and pleasant. The waves pounded o immovable shore. For a while I wa thinking this was as fitting a tim place as any to bring an end to Finney. Then I took the envelope my pocket and removed the citat received during the war. I folded together and slowly tore the pape fine bits, dropping the bits over th of the promontory where they we in the incoming waves. I'd fi with the citations and was reachi the envelope again when a shado across the rock beside me. The sl of a man.

I ROLLED sideways, turning same time, but no one jumped Instead I heard a low laugh of tempt and looked up to see the ma self silhouetted against the moonl He had a gun in his hand. It seeme always had a gun in his hand. Th was Philip Tremaine. I couldn't face clearly, because the moonligh behind him. I made out the hollo his eyes. He kept the gun pointed

"Don't move, Finney," he sa suppose you thought you were th with me?"

"I only hoped so," I said.

"Well, your hopes will soon b ized because you're going to be th with everything in just a minute sat down on a ledge of rock abo feet from me. "Just stay the wa are on your hands and knees. It's tion I like to see you in." There vicious edge to his voice.

"It might have been kinder," h tinued, "to let you have it without you it was coming, but then I thinking about that evening at th when you knocked me down. So cided not to be kind to you. W you know about that?"

"Suppose you tell me about it," Behind me I could hear the pounding against the rocks.

"Sure," he said, and laughed "I'll tell you all about it. First I w congratulate you on your job. Y a lot better than I expected. A were supposed to do was die s Catherine could collect my mon me. But she queered things. You me entirely, so now I can colle money myself. Nice, eh?"

"You'd better have your changed," I said.

"Oh, not much need to worry that. I've always got my own sig and my own fingerprints to pro Philip Tremaine. I won't need t my face. I've even got a few pict you left, and it will be easy eno find people who'll swear they're p of me. With the money I'm g collect, I can buy anything." His ter took on a note of anticipatory ment at the thought. "Nothing to about except you." He adjusted t in his hand. "So easy. No on knows I'm here."

"There's still a little matter murder."

"Murder?" he said. "But the Mike Finney's murders. Both of

"Both of them?"

"Sure. Tuttle too. You didn' that? I went to the house that m to tell Catherine you were dead you weren't is more than I can stand. I had the gun with me tha Clark, the same gun you'd so kin your fingerprints on. I was going t it where the police would be sure it. And then Tuttle had to com and tell me he knew who I wa wouldn't do at all, so I shot him. else could I do? I thought they that one on to Catherine and g

er threw it. Before I could get
to him, he lowered himself over the edge and dropped from view. The man must have finally lost his reason.

Even as he disappeared, I heard the thunder of a giant breaker rolling in, driving the surf like a band of sheep before it. I leaped along the rocks until I was standing where I could look down. For an instant I saw him. He floundered on his knees in the shallow water, his arms upraised against the liquid weight that bore down against him. It was a quick way to end. The water lifted him like a cork and dashed him against the rocks. Then the water receded and he floated with it a few yards until his clothing caught on the rough surface beneath. When the water had run out, he lay limp on the black surface.

I lowered myself as far as I could without being washed into the sea and waited. The waves carried him in and out, each one ramming him against the rocks. The foam below me took on a tinge of pink that was visible even by moonlight. About the ninth wave I caught him by the arm and held on against the pull of the water, sliding out to sea again. Then I heaved him up beside me. Already his face had been beaten so much as to be unrecognizable.

I stretched him out and went through his pockets. There was nothing in them except a pipe and an oilskin tobacco pouch. The pouch looked as though it would do for my purpose. I shook the tobacco out and then took the envelope from my pocket. Into the pouch went Mike Finney's passport and the few cards and receipts which had been made out in the name of Mike Finney.

When I was finished, I zipped the pouch shut and buttoned it back in his pocket. Then I picked him up and carried him back along the rocks to a gentler section of the beach where I dumped him. I was glad that the waves and rocks had done for me what I'd intended to do for myself.

In the morning some native would find him and report his death. By then there'd be little left except the pouch by which to identify him. The news would go through to the Mexican authorities. Mike Finney was dead. Tremaine had finally succeeded in killing him. Curiously enough the money which had been the cause of it all was going to lie on the books unclaimed. Catherine had said she didn't want it, and Reba Tremaine would live out her life hoping to hear from a son who was all through talking. For myself I still had a large part of the twenty thousand. I'd earned it.

I walked back along the beach through the hot moonlit night. At Taylor's bar I ordered a double bourbon, drank it and went on to my room. I opened the newspaper and read the little article again.

I pray to hear someday that he is safe.

It wasn't her brother Catherine had meant. I was the one who had left her in the cab in San Francisco. I was the only person in the world who would understand what her statement to the reporter meant. It was a message to me. I read it several times, then went out on the terrace and had more bourbon. Around me was the tropical night.

I pray to hear someday that he is safe.

Instead she would hear that I was dead. That would be the final sentence from the past, but it was a sentence I could suspend very simply. I was quite safe now so long as I stayed in exile.

WHICH was what I told her in a letter I wrote a few days later from Mexico City. I told her that Mike Finney was indeed dead, but that the man who had left her in the cab in San Francisco was alive and well, although lonely. I told her I loved her, and I signed the letter Robert Fitzgerald. The letter was sent air mail, and I received a reply a few days later.

Dear Robert Fitzgerald:

I was greatly relieved to get your letter. The situation here is little better than when you left—at least where I am concerned, so I plan to come south. My plane reservation will put me in Mexico City October 20th. I don't know what lies ahead after that, and in view of the past, I can't expect too much. Still, I have believed you before and believe you now when you tell me you love me. If we can gradually forget the past, perhaps life has something yet to offer us.

Catherine

Life, I thought, was going to offer a great deal.

President Ford Frick's office has
all hands to try extra hard in the
ent All Star struggle in St. Louis.
If true, it's about time. Nothing would improve All Star competition quite so much as a few National League victories.

Of course, the spectacle of Leo Durocher managing Eddie Stanky again may be diversion enough for National League fans. Eddie and Leo have been cutting each other up into little verbal pieces since Eddie departed Brooklyn for Boston. Eddie undoubtedly will be a National League nominee, even though Manager Durocher claims Brooklyn has three young gentlemen who play a better second base. Indeed, Leo often uses all three of them the same afternoon.

HARD-LUCK PORKY

Ed (Porky) Oliver finished second in the Tam O'Shanter, Canadian and Western opens last year. It was downright discouraging, even though Porky did accumulate $17,941.15 for fourth place among the fairway financiers. Once Porky carded 271—17 under par. Five minutes later, young Johnny Palmer blazed in, 18 under.

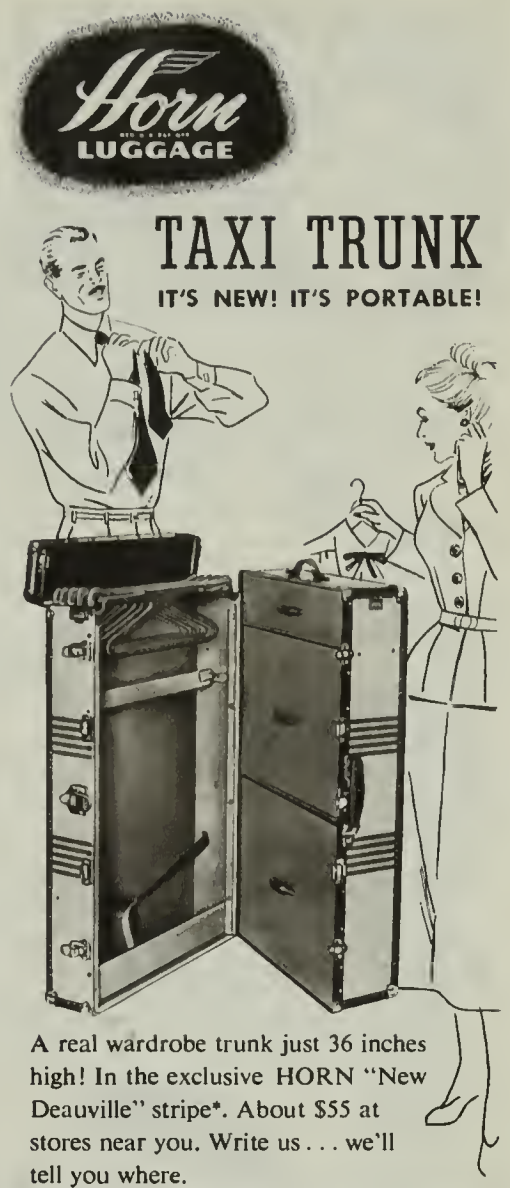
When Porky retired from the runner-up business to settle down as a teaching pro in Seattle, there was considerable locker-room speculation on what regular home cooking would do to his aggressive waistline. Surprisingly, Porky dwindled from 225 to 211.

"You been sick?" Jim Ferrier inquired solicitously when Porky vacationed at the P.G.A.

"Nope, been teein' 'em up like this." Porky illustrated with a grunt. "I tell the members they ought to work on their irons, but they always want a lesson on the driver. You give six straight half-hour drivin' lessons and you never want to bend over again."

Porky says the biggest fault of the average golfer is tenseness. "That's why Joe Louis learned so quickly. He's loose as ashes."

Louis played Porky in numerous Army exhibitions. When Porky's small side-bet earnings reached $90, Louis suggested a five-hole play-off, double or nothing. Joe wanted a hole-and-a-half handicap but settled for 1 up.



Porky was one under for the five holes. So was Louis. As Joe reclaimed his currency, Porky griped, "That's plain murder, Joe. I can't spot you one hole any more than I can spot you one round."

"One round ain't so much," Louis said. "Tell you what, Porkchop. We box five rounds. I spot you the first four —but you gotta win the fifth."

Blackwell bumped into a locker the other day and got a bloody nose.

Who loaned him the blood?

OSTRICHES AREN'T SO DUMB

Continued from page 25

all birds, ostriches have no teeth and need stones in their crops to grind up their food. Being several hundred times as big as ordinary birds, the ostrich naturally swallows larger stones. But even Francis Earnest admits that ostriches carry this natural habit to extremes.

"An ostrich can swallow anything that will fit in his beak, even if it bulges his neck out to twice its ordinary size," says Earnest. "The motion pictures often want a gag shot of an ostrich swallowing some crazy object and the birds only let us down once. We had a little ostrich named Rudy that used to work in the old Barney Google comedies and the director wanted him to swallow an alarm clock. That was too much even for Rudy, so we had him hold the clock in his beak and then we cut to a shot of his neck after he had swallowed a grapefruit."

A tame ostrich on one of the old farms probably established some sort of swallowing record by eating several red-hot bullets while a hunter was taking them out of the molds. Ostriches seldom show any bad effects from the junk they eat, but Earnest knows of one bird that was killed by some humorous visitors who fed him four golf balls. Being perfectly round, they simply revolved in the crop like ball bearings, refusing to wear away, until finally they stuck and the bird died.

"Ostriches will grab at anything that is brightly colored," Earnest explains. "They're very color-conscious. I'm often asked if the birds know me. Of course they do. But if I come out wearing different-colored clothes—clothes that the birds haven't seen before—they don't recognize me at first. My wife sometimes goes past the pens carrying my old clothes and they'll run after her."

Christmas Gift Causes Trouble

For many years, Earnest's head ostrich man was an old-timer named Dick Carner who had trained Thundercloud, a big cock bird, to pull a light wagon around the farm. Dick rode around in the wagon to do his daily chores and was positive that the cock knew him as well as a horse knows his rider. One Christmas, Dick's wife managed to throw away the old green sweater her husband always wore and presented him with a new brown one. The next day Earnest saw Dick wearing the new sweater while he hitched Thundercloud to the cart. Thundercloud always wore a bag over his head to keep him quiet during hitching.

"You'd better look out when you take the hood off," Earnest called.

"This bird knows me better than my wife does," Dick replied confidently as he climbed into the seat and pulled off the bag.

Thundercloud started off in great shape. Suddenly the bird happened to glance behind him. The next second, there was a feathered explosion. The big cock tore the harness loose, kicked the cart to pieces and then started after Dick. The ostrich handler managed to tear off his new sweater just in time. Thundercloud stopped, hesitated, and then lowered his head and made an apologetic, cooing noise. Dick accepted the apology, but he made his wife unearth the old green sweater.

"People think ostriches are stupid because the birds don't think the way we do," Earnest claims. "Take that old story about an ostrich sticking his head in the sand. Ostriches won't do that, but they will lay their heads flat on the ground when they see an enemy coming. There's a very good reason for it, too. An ostrich's neck is so long that he can see for miles over the desert but an enemy can also see him. So as soon as an ostrich spots anything coming, he lowers his neck like a submarine pulling down her periscope. After a while he takes another quick look. If the enemy is still headed his way, the bird starts to run."

Like many game birds, a hen ostrich tries to decoy enemies away from her nest by pretending to be crippled and limping over the ground uttering painful cries. She keeps this up until she is well away from her eggs or until the powerful cock can come to her assistance.

"Sometimes I wish the birds weren't so darned smart," says Earnest bitterly. "One of the big attractions on the farm is Nubie, our famous riding ostrich. My wife used to ride him around the ranch and he let Freddie Bartholomew get on his back in Swiss Family Robinson. Then the directors started putting cowboys on him who tried to ride Nubie as though he were a bronco.

"Nubie worked out a system that will get rid of any rider. Ostriches' legs are hinged so that they bend forward instead of backward and as soon as a rider got on his back, Nubie would begin to kneel. Naturally, his rider always grabbed for Nubie's long neck. That would be just what Nubie wanted. Ostriches have very powerful necks, and Nubie would give a terrific jerk forward that sent the man flying over his head. Then Nubie would walk back and forth over his prostrate rider a few times before trotting away. We don't ride Nubie any more."

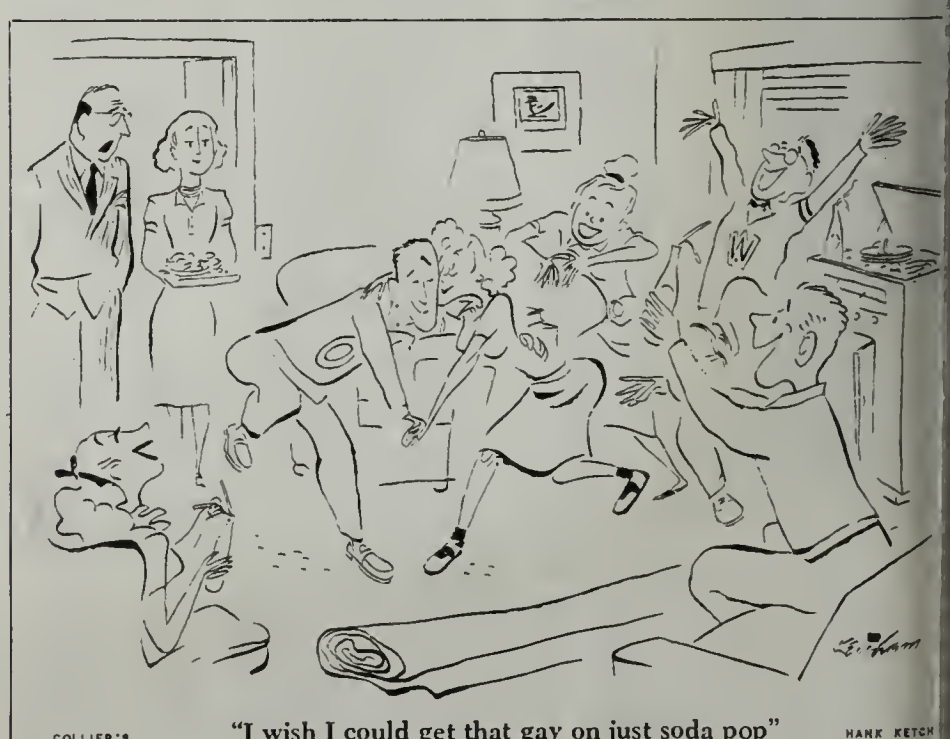
Ostrich farming first started in this country in 1883 when a young Californian named Edwin Cawston went to South Africa and bought two hundred birds. At that time, selling ostrich feathers was Cape Colony's main business and when the authorities saw their monopoly about to be broken, they refused to allow the birds to be loaded on shipboard. Cawston rushed his ostriches to Natal and, chartering a Swedish freighter that happened to be in the harbor, set sail for America.

Most of the birds died during the voyage but Cawston managed to get twenty pairs alive to his ranch. These birds were the ancestors of 75 per cent of all California's ostriches which once numbered over ten thousand. Within two years the young speculator made over thirty thousand dollars from the sales of feathers, eggs and young of his flock. After that, the ostrich panic was on. Men from all over the country hurried to southern California to open ostrich farms.

Ladies gladly paid eight dollars e for the beautiful plumes and a fan m of ostrich feathers might bring as m as two hundred dollars. A whole l language was invented to describe plumes: "spadones" were chick feath "boos" were tail feathers and "byoc were feathers from the cock's wings.

Collecting the feathers was ca "plucking" but actually the feathers w cut, not plucked, from the bird and process was painless although the ost usually objected.

Plumes Clipped by Experts



The bird was driven into a chute blindfolded while expert pluckers clip off the plumes. The birds natur molted every year, but the drop feathers were so frayed as to be wo less commercially so the plumes w "plucked" before the molting season

Ranchers made their big money sel young birds and even eggs to speculat A male ostrich was worth about thousand dollars (now they are w about three hundred and fifty for adult and seventy-five for a baby) even the eggs were bringing fancy pr The Los Angeles Farm had over thousand birds, covered most of wh now South Pasadena, and operate own factory to clean, dye and pro the feathers.

A financial expert from Cou Calendar in 1905 declared that the f was taking in "nearly a million dolla year, of which at least 25 per cent is c profit." Suddenly, shortly before W War I, women stopped wearing ost feathers. The bottom dropped out o industry. Today the Los Angeles F needs less than a hundred birds to su the national demand, although feat are still being shipped in from S Africa.

But Francis Earnest, who inherited farm from his father, is not discoura "Of course, it's not like it was in old days," he admits. "It was qui sight to see those hundreds of birds ro ing almost free over the hills—the c stopping to display their feathers challenge one another, the big br hens with their broods of babies sc pering after them—and the old mule that used to wander across the fi picking up the big white eggs by dozen for incubation. But who kn It may still all come back. They said that long skirts could neve popular again, didn't they?

MEDALS FOR THE VFW

GENTLEMEN: Some years ago a group of young men, at Princeton I believe, dubbed themselves Veterans of Future Wars and demanded the usual rewards and prerogatives accruing to veterans.

Well, they were prophetic at any rate and they are now veterans in the full sense of the word. Then they were the subjects of a great deal of ridicule and worse.

I have wished someone would dig out these boys and present them anew to the public. In their new colors and dignity is to be found a new respect for youth of the present age.
G. E. JOHNSON, Greensboro, N. C.

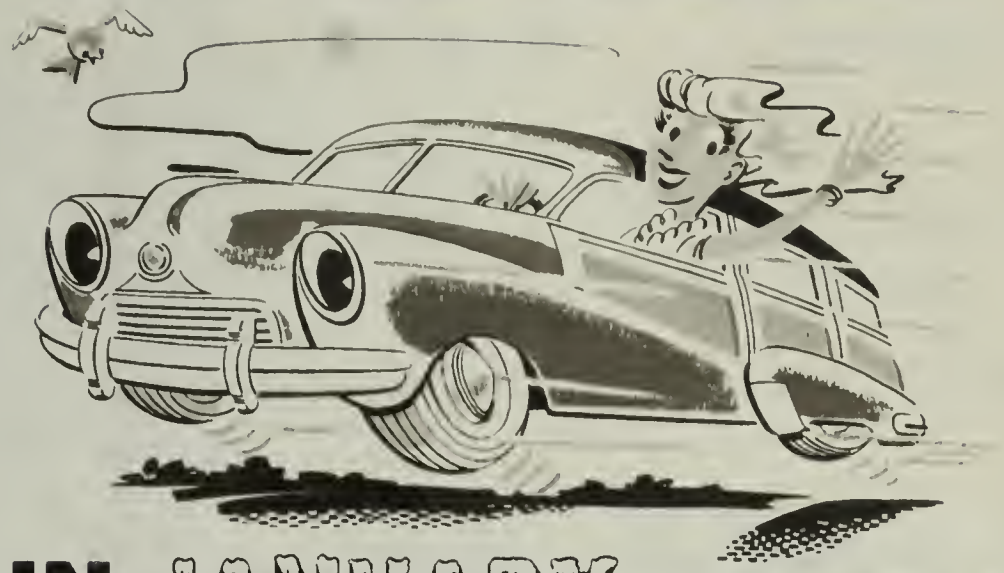
UNPHONY FEAR

DEAR SIR: By chance and, frankly, because of the attractive cover, I picked up your issue of May 15th, and want to compliment you on your timely, courageous editorial Most Fears Are Phony. "Phony" is right but fraught with danger for us all. Keep plugging at it!
CECILE R. HOWES, State Line, Mass.

FISH TALE

DEAR SIRS: When I got the May 22d issue I was almost taken in as you were by that "most amazing fish" on the cover. However, before reading the Silver Scrapper in the same issue I discovered that the cover was the result of a "nature faking" trick photography. Neither of the two fishermen nor the boatman on the cover is showing any interest in that large tarpon in the air above them which might fall into the boat, damaging it or injuring them, so I assume that the tarpon was superimposed on a previous photograph.

After satisfying myself that the cover was faked, I examined the other pictures and would not be surprised if the other unusual picture of two tarpon in the air at once had also been tampered with, since I see no lines or leaders for them nor for the cover fish, though three other pictures on pages 20 and 21 show them.



I think that Artist Dave Peskin owes a public apology to Collier's and its readers.
LLOYD S. LOURIE, Punta Gorda, Fla.

. . . You could have made two separate covers out of it, one "Tarpon in Air," the other "Motorboat and People," and I'm sure no one would have suspected a thing.
Or am I wrong?
FRANK HEROLD, Jacksonville, Fla.

The occupants of the boat are old hands at tarpon fishing. They are looking directly at the fish in mid-air. They take it as calmly as the Yankees do another DiMaggio home run. As for the faked photography, our negatives are open to public inspection.

Collier's believes...

...MR. CHURCHILL IS QUITE A PROPHET

THE war-period memoirs of Winston Churchill, British Prime Minister 1940-45 and one of the great figures of world history, are being serialized in full by the New York Times and in abridged form elsewhere.

This literary event reminds us that Collier's since 1930 has had the pleasure and privilege of publishing a total of 44 articles from Mr. Churchill's pen. Looking back over that record, we find that the first Duke of Marlborough's most distinguished descendant to date has been quite a prophet on various occasions.

We quote from his To End War, in Collier's for June 29, 1935:

> Imagine a world of this weak and undecided character smitten by the sledge-hammer blows which dented and broke the hard armor plate forged in the 19th century. It would dissolve under the flail of war into a squalid, hopeless, senseless, poverty-stricken welter of distracted individuals who would speedily cling together under the drear yoke of Communistic or militaristic dictatorships, or, more likely still, under the worst evils of both combined.

Not a bad picture, that, of large areas of Europe today.

Under the title Soapbox Messiahs, in Collier's for June 20, 1936, Mr. Churchill averred:

> I adhere to the school of those who believe that governments cannot make nations rich; that wealth is gathered only by individual exertion and enterprise; that state expenditure is almost always profligate and wasteful; and that the more freedom enjoyed by the citizen and the less the interference of the state the higher will be the standard of the public well-being.

A Socialist government, believing just the opposite of the above, is now trying to make Great Britain rich—and in its desperation has recently come to a capital levy.

Of course, no prophet rings up a batting average of 1,000. In Collier's for January 14, 1939, Mr. Churchill said:

> It would seem to follow, therefore, that sea power . . . still ruled on salt water. . . . The command of the seas would appear to rest unimpaired with either the navies of Great Britain or the United States. It may be added that the undoubted obsolescence of the submarine as a decisive war weapon should give further confidence to the English-speaking democracies.

There, Mr. Churchill seriously underestimated the deadliness of the airplane in the war which was then only nine months away, and he made a similar mistake about the submarine. And it should be noted that Mr. Churchill did try his best to persuade the Baldwin and Chamberlain governments, in the last two or three years before the outbreak of the war, to keep British air power at least abreast of German.

In his June 3, 1939, Collier's article, War—Now or Never, the prophet was back on the beam; as witness his closing paragraph:

> To sum up the argument, it seems that unless some change of regime takes place in Germany in the near future she will deem it in her interest to make war, and this is more likely to occur in the present year than later on. The summer and autumn months must be a period of intense strain and anxiety to all countries.

World War II began just three months later.

Meanwhile, in mid-June of 1939, under the title Bombs Don't Scare Us Now, Mr. Churchill analyzed for Collier's readers the possibility of indiscriminate bombing of big-city populations if war should come. He stated flatly that Great Britain never would be beaten by that means. How right he was the world now knows.

Thus far in the postwar period, we've printed only one Churchill article: The Highroad of the Future (Jan. 4, 1947), a powerful plea for a United States of Europe, or at least of Western Europe. That one, too, is now in process of coming true.

As remarked above, it has been a pleasure and a privilege to print all these Churchill productions down the years.

To the numerous Collier's readers who read them, not all the material in the currently appearing memoirs is new. Collier's, if you'll forgive the brag, got there first with a goodish bit of it.

●

. . . YOU GET NOTHING FOR NOTHING: This month the City of New York loses something which New Yorkers have bragged about for decades—the 5-cent fare on the subways, elevated railroads, trolleys and busses. By order of Mayor William O'Dwyer under a legislative enabling act, subway and elevated fares are going to 10 cents, city-owned bus and trolley rates to 7 cents.

What forced the step was that New York City had been losing enormous sums yearly on its transportation system, and that these deficits were cutting badly into its hospital, sanitation, and other services, and were preventing deserved pay increases for city employees. Finally, the 5-cent fare had to go.

Thus, a superstition still held by far too many Americans takes another dramatic sock in the nose. We mean the superstition that you can get something for nothing, or for less than the something is worth.

You can't. You never could. The something has to be paid for, directly or indirectly, and in full, and it always is paid for. In the case of public services, the gent who ultimately pays the full price, no matter how the politicians disguise the fact, is the user of those services. If all of us could get the simple but essential fact of life permanently into our heads, we'd be far better off, and we'd have a more stable nation than we've ever had yet.

●

. . . IN GOOD WILL FOR AIR LINES: Americans are patient people as a rule; but they lose their patience pretty copiously when a plane, train, bus or boat is late. That gripes the average American to the bottom of his soul or thereabout, and we think properly so.

Northwest Airlines, taking shrewd cognizance of this fact of U.S. human nature, has put in what we believe to be a smart innovation. Northwest has taken to refunding 5 per cent of the fare to passengers on planes that reach destination 30 minutes or more behind time. In the first 15 days under the new plan, the line had a reported 328 of such late arrivals out of 3,128 flights, and paid back about $3,000 to passengers.

The power of this scheme to build good will for the line seems obvious. If any other company feels like trying it, that's okay by us. We're strong for these concerns; but, what with the hard luck and sour service some of them have had since the war, it's no secret that they can use all the good will they can rub up.

Who's Tops in Telephones? It's U. S.

There are more telephones in this country than in all the rest of the world put together. The United States has one telephone for about every four people, compared to one telephone for every ninety people for the rest of the world.

Sweden comes closest with one telephone for every five people. In the British Isles there's one telephone for every eleven people. In Russia the estimate is about one in a hundred.

New York leads the world's cities with the most telephones. It has 2,600,000—more than in all of France. In relation to population, San Francisco is on top with about one telephone for every two people. Washington ranks a close second.

And we're still building and expanding at the fastest rate in history. The value of telephone service is increasing constantly.

THE WEEK'S MAIL

OLYMPICS FORECAST!

DEAR EDITOR: I recently came across an old copy of Collier's (July 5, 1947) in which Bill Davidson made predictions for the Olympics of 1948. Davidson's predictions have stood up surprisingly well—or else he was surprisingly lucky.

He made three major mistakes or omissions: Olympic coach, javelin throw and the discus throw. But in every other event, the Collier's article seems to have been correct. I consider this pretty good long-range prognostication. What is Davidson's *short-range* forecast for the Olympics? FRANK MILLER, Chicago, Ill.

"To stick my neck out again," says Bill Davidson, "it still looks as if the United States will win by amassing a crushing number of points in the 100-meter dash, the 200-meter dash, the high hurdles, the high jump, the shot-put, the pole vault and the broad jump. Conversely, the Swedes and the Finns both have their *strength—the 800, 1,500, 5,000 and 10,000 meters, the marathon, javelin, hammer, 400-meter hurdles and the hop, step and jump—so that they will tend to cancel each other out in the point score. The Swedes should end up second to the U.S., with the Finns third.*

"If Mel Patton's brittle legs do not hold up, we may be challenged in the sprints by Panama, Australia and Trinidad. Besides we may lose points to Great Britain and Sweden in the high jump, and to the Russians (if they compete) in the shot-put.

"Fortune Gordien's prodigious discus heaves certainly make him a potential scorer; and so does the 52.2-second, 400-meter hurdles time turned in by converted quarter miler Roy Cochrane. If the U.S. can place in the javelin, hammer and discus, and can break in for points in the 400 and 800 meters—then the Wembley Stadium doings in London should be a runaway for Uncle Sam."

SLEEP, BLESSED SLEEP!

MY DEAR MR. DUGAN: Re your Go to Sleep article, May 29th:

One day when I was a very young girl, a group of us went to Proctor's (vaudeville) to see a hypnotist. He called a number of teen-age boys to the stage and told them that as he placed his fingers upon a boy's eyelids, that boy was to roll his eyes upward and back. He rubbed the temples a little, and each boy as he did so was almost immediately hypnotized.

I got to wondering and found that if

Motorist in $11,000 jam!

Have you ever tried to raise $11,000 in a hurry? This salesman had to do it in 60 days—or face the threat of losing all driving privileges under his state's financial responsibility law.

Most states have these stringent laws! If *you* should have an accident in any one of them you could lose your driver's license, your automobile registration or be required to put up cash or security in sums as high as $11,000. You could lose this amount—or more—as the result of a court judgment.

Insurance protection is your most practical solution!

These laws are complicated . . . vary from state to state . . . change from year to year. The average driver can't hope to be familiar with all of them. But—all these states will accept adequate automobile insurance as proof that you are financially responsible.

In *every* state you can, of course, be sued for damages, which might mean the loss of your home, your property, your savings. The most practical and economical way to comply with requirements of the law and protect yourself against shattering losses is to carry the right insurance.

Why it pays to insure with State Farm

1. *State Farm Mutual's rates are low*—because State Farm policyholders are "preferred risks"—people we *know* drive carefully.
2. *For your extra security,* State Farm gives *twice* as much public liability protection, *five times* as much property damage protection as is required by any state financial responsibility law.
3. *Sound management, financial stability* assure prompt payment of legitimate claims.
4. *State Farm Mutual is big*—the largest automobile insurance company in the world.
5. *7,500 representatives* at your service, coast to coast, in the U. S. and Canada.

Get the details from your State Farm representative today. If you are a responsible driver, you can qualify for membership in State Farm Mutual.

The states are cracking down!
The 40 states, and the District of Columbia, (shaded on map), have financial responsibility laws requiring you, under certain circumstances, to prove you can pay for injury to people or damage to property you do with your car. A similar law has already been passed by Pennsylvania but is not yet in effect.

Pitcher George Munger (left) a
Manager Eddie Dyer of the St. Lo
Cardinals. Both like night ga

NIGHT LIFE OF THE CARDS

BY BILL FAY

GEORGE MUNGER sat down in the St. Louis dugout. A reporter asked, "How's the arm?"

"Fine." Munger obligingly rolled up the right sleeve of his sweat shirt. "Almost gone," he said, pointing to the little straight scars from his winter elbow operation.

"So's your sunburn," another reporter observed.

"We only let George pitch at night," Marty Marion explained.

Marty was close to the truth. Munger won 12 of his 16 victories last year after dark. His fast ball—which, in artificial light, looks faster than it really is—scored five shutouts and four three-hitters.

The Cardinals have a hunch the 1948 National League pennant will be won at night and they are counting heavily on the arc-light artistry of Munger and Harry Brecheen to win it for them. While the Cards scrimmage 64 times after supper, the New York Giants engage in only 30 night games; the Brooklyn Dodgers, 34; and the Boston Braves, 54.

"The extra night games may be a big help," Manager Eddie Dyer admits. "Everybody says the Cards play better at night. Maybe we do. Last year we won 47 and lost 46 day games, while we were winning 42 against 19 losses at night."

Good pitchers are better at night, and the Cards have five good pitchers behind Munger and Brecheen: Pollet, Dickson, Brazle, Hearn and Wilks. Another big factor behind the Cards' nocturnal success is the psychological. They like night baseball because Dyer has convinced them it is healthy financial exercise.

"Don't waste time grousing about missed suppers and late hours and glaring lights," Dyer told them. "Start liking it, because it brings out the crowds that make your big salaries possible. True to Eddie's prediction, Cardinal home attendance soared over 1,000,000 in 1946 (previous high was 770,000 in 1928). Last year the home attendance was 1,250,000 and the club pay roll was the biggest in the National League. Last month, the Cards scheduled 14 of their 17 weekday games at night. Two of the three day games were listed for Chicago's Wrigley Field, the only unlighted park in the major leagues.

A Cardinal pennant would be something of a personal triumph for Dyer. Most of the Cardinals played for Eddie somewhere in the minors. At Houston, Eddie bought Brecheen for $3,000 despite protests from Branch Rickey, then St. Louis general manager. Rickey claimed Brecheen wasn't big enough. At Columbus, Georgia, Eddie talked a despondent young outfielder with a .220 batting average into staying with the team one more month. "Stop swinging at bad pitches and you'll be a big-leaguer in three years," Eddie promised Enos Slaughter.

Dyer's reputation for treating pl
ers fairly held the Cardinals toget
when the Pasquels tempted Te
Moore, Slaughter and Stan Mu
with fabulous Mexican League s
aries. Dyer said he would talk
president Sam Breadon, but told
players bluntly, "I won't hold a g
to the man's head if a bonus is
only way to keep you from jump
contracts to which you already h
agreed."

Max Lanier, Fred Martin and L
Klein leaped into Mexican Lea
oblivion, but at season's end the st
who stuck with Dyer received bonu
ranging from $1,000 to $5,000.

Typical of Dyer's ruthless hone
is a decision Eddie made as play
manager of the Cardinal farm

KEEP UP WITH THE WORLD

GEORGE

BY FRELING FOSTER

Of the hundreds of elephants that have been exhibited in the United States by zoos, carnivals and circuses during the past 150 years, approximately 30 were born in this country. Among them, no more than six are known to have been conceived here and, therefore, it is presumed that the mothers of the other 24 were pregnant at the time of their capture.

On Bali, an island of the Dutch East Indies, a strange two-sided belief prevails concerning the twin birth of a boy and a girl. Among the nobility, it is considered a joyous event, a reincarnation of a once noble couple who are still happily married. Among the common people, however, it is regarded as a calamity, as the infants are believed to be guilty of prenatal incest and they and their parents have to undergo a long and costly purifying process.

No proper name equals that of Elizabeth in the number of variant forms and spellings, of which more than 50 are known. Among them in the English language are Bess, Bessy, Beth, Betsey, Betty, Eliza, Elsie, Libby, Lisa and Lizzie.

The expression "to show the white feather," meaning to betray cowardice, came from cockfighting and originated in the old belief that a mongrel gamecock, unlike a purebred, lacked courage and had a white feather in its tail, which would show when the bird, fearful of its life, turned and attempted to escape from the pit.

Many historians have accepted as true claims that various individuals have lived for generations beyond the normal life-span, some of the most famous, with their reputed age at death, being Parr (152), Agha (156), Jenkins (169), and Czarten (185). Yet, authenticated reports of persons living over a century are virtually unknown. In fact, an examination of nearly 1,000,000 cases of alleged unusual longevity revealed none who had lived more than 100 years and only 30 who had reached that age.

The value of the photo-finish era in horse racing is proved fact that in 1935, before its ad only 20 dead heats were ac edged by the judges; whereas i when most tracks were using cameras, 264 dead heats we corded. This shows that in th thousands of these close finishe have been misjudged.—*By Fr Eckert, Denver, Colo.*

After cracking a large office Poland recently, a gang of cr unwittingly left behind a sing extremely unusual clue. Wh safe door was ripped apart, its packing released a fine dust settled on near-by objects, in the ripping tool of the safec that was lying on a table. T silhouette of the tool was made dust and left on the table w was found and photographed actual size by detectives. La gang was caught and identi means of this picture as its p outline was the same as that ripping tool in their possession.

America's finest Low-Pressure tire fits your present wheels

The safest, softest-riding Master of them all!

Now you can drive with dry-road safety on wet roads! Now you can blot out bumps that once shook your car—and get up to 60% more safe tire miles!

The amazing new U. S. Royal Master is the *first* tire to bring you *every* one of today's newest and finest features.

NEW LOW-PRESSURE COMFORT! This spectacular U. S. Rubber development provides far more air at less pressure. You "float" over the road on bigger, softer cushions of air that *smother* bumps. Your tires take the jolts—your car rides softly, evenly, smoother than ever!

UNMATCHED DE-SKIDDED SAFETY! Touch your brakes—and America's greatest tire safety device goes to work. The Master's *De-skidded* tread digs its sharp gripping edges *through* water, mud or oil down to dry road. They stop you far quicker on the most slippery footing—check side-skids before they start.

UP TO 60% MORE SAFE MILES! The Master's tougher Tempered Rubber tread is 25% deeper. Its De-skidded edges can be recut and renewed. Under the National Safety Service Plan, your U. S. Distributor is set up to offer this service and keep every mile fully skid-protected.

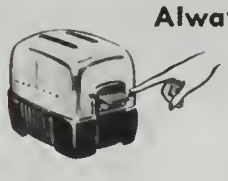
"This toaster runs the show at our breakfast!"

SAYS ART LINKLETTER, *GENIAL M.C. OF "THE GENERAL ELECTRIC HOUSE PARTY"***

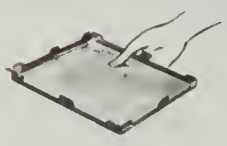


It's a toaster with a *conscience* . . . this General Electric Automatic Toaster that pops up your toast or keeps it warm.

Simply can't serve up a piece of toast that's not exactly to your taste.

See the General Electric Automatic Toaster at your retailer's.

Always warm, even if you wait!



Want your toast now? This G-E pops it up. Or just set the control knob, and a special built-in device will keep it warm and waiting.

Makes toast your way!

This toaster serves up toast *your way* . . . light, dark, or medium. Just set the knob on this new General Electric. Toast for two or twelve, and every slice is perfect every time.

And what a snap to clean!

Never, never do you have to turn this toaster upside down to shake out the crumbs. Snap out the crumb tray, brush it clean, snap it back in. It takes 10 seconds. General Electric Company, Bridgeport 2, Conn.

* Listen to General Electric's hilarious House Party, Monday through Friday, CBS., 3:30 p.m., E.D.S.T.

GENERAL ELECTRIC

THE WEEK'S WORK

Gibbs chats wi... Ranger Judge, ... Grand Teton Par...

RAFE GIBBS says that writing about our great Western National Parks as he does in Trail of the Leaning S (p. 48) was a labor of love, even if he did visit them in the unrecommended month of April. "This gives me something in common with President T.R.," Rafe claims. "Against all advice he insisted on seeing Yellowstone in April of 1903, preferring to travel by horseback and sleigh instead of stagecoach. T.R. said he liked to rough it. It's rough—and also snowy—in April all right."

Rafe says it was eerie to watch Old Faithful perform for him alone—a show without an audience. It was also tough to break the road through eight inches of new snow (remember snow?) over Wyoming's Twogwotee Pass. It was even tougher to get his first gold-panning demonstration in the mountain country east of Butte—and not even strike silver.

WE ARE pleased to announce a collection of that famous Collier's capsuled story invention, the Short Short, has been put together by Barthold Fles, from our very rich story files. The Best Short Short Stories from Collier's contains mystery, love, adventure, suspense, humor and a long, long measure of pleasure.

THE nostalgics of On Bakeoven Grade (p. 24) got Ernest Haycox recalling it was 18 years ago that Fiction Editor Littauer bought his first Haycox. "He's a pretty old horse himself," observes Mr. Haycox. "I think he can remember back to the day they brought movable type into the shop, straight from Gutenberg's factory. Much sound and fury has passed since. Somebody's always popping up with a new notion which, on close inspection, proves to be something Pericles thought of—he borrowing it from some chap who forgot to have it copyrighted a couple of thousand years earlier.

"It doesn't seem to make any difference: The redheaded girl on the beach, waiting for the handsome (but shy) lad to find a plausible way of tripping over her sun lotion is new every day of the century; and so is the wonderful sensation of a bean sandwich and cold water to a hungry man in the hills."

Mr. Haycox says Bakeoven (which we looked up and couldn't find in Pericles) came to him without the usual writer's anguish. "This one more or less lighted on the brim of my hat when I passed through Deschutes Canyon, Oregon, where the early freighters pitched camp and the stages rolled through, creating a moment of excitement for the lonely Deschuteans," he confides.

"In the sixties a trader, on his way to Canyon City with a pack string... flour, was raided by the Indians at... spot and lost his horses. So he bui... clay oven, baked the flour into br... and sold it to the passing prospect... That was Bakeoven—and it was... named for the local heat. Today Ba... oven is a house, barn and row of p... lars lying halfway up the long cl... from the bottom of Deschutes C... yon to the tableland of the wh... country. The private-venture sys... is a hardy thing."

Why "Stepping Down" so important to you

Hudson amazes motor-car world by using vital "step-down" zone—not available in any other car—to bring you riding qualities and safety beyond anything known before!

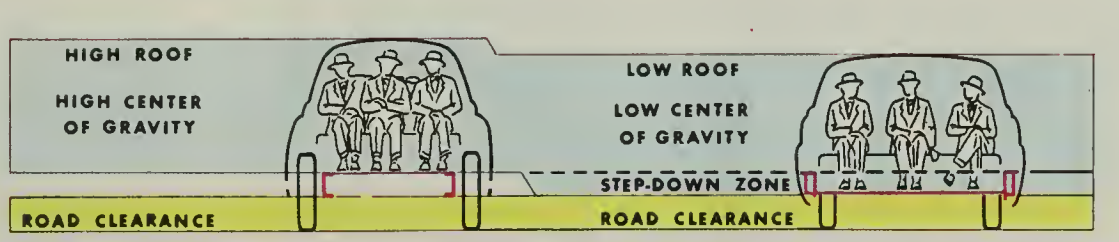
Word's going 'round—and fast, too—that the sensational Hudson, the only car you step down into, gives you a "sweet," smooth, safe ride that is a new high mark in motor-car performance!

Perhaps you've heard pleased and proud Hudson owners talking about this exciting new motoring experience, but here's something you may have missed hearing:

The key to this amazing new ride lies in that area just under the floor of the average car, which in the New Hudson becomes the "step-down" zone —as illustrated in the sketches below.

This "step-down" zone is all-important, because experience has shown that the *lower to the ground* a car can be built, the better it will handle, the more stability it will have, the safer it will be, and thus the more enjoyable and comfortable will be your ride.

Hudson, and Hudson alone, has accomplished a near miracle of low-built streamlining and smooth, safe, comfortable riding with an ingenious foundation frame and "step-down" zone. This new type of base frame surrounds the passenger compartment, and thus permits the floor to be lowered *down* within it. Recessing the floor creates the "step-down" zone and a center of gravity that is the *lowest in any American stock car*—yet road clearance is ample!



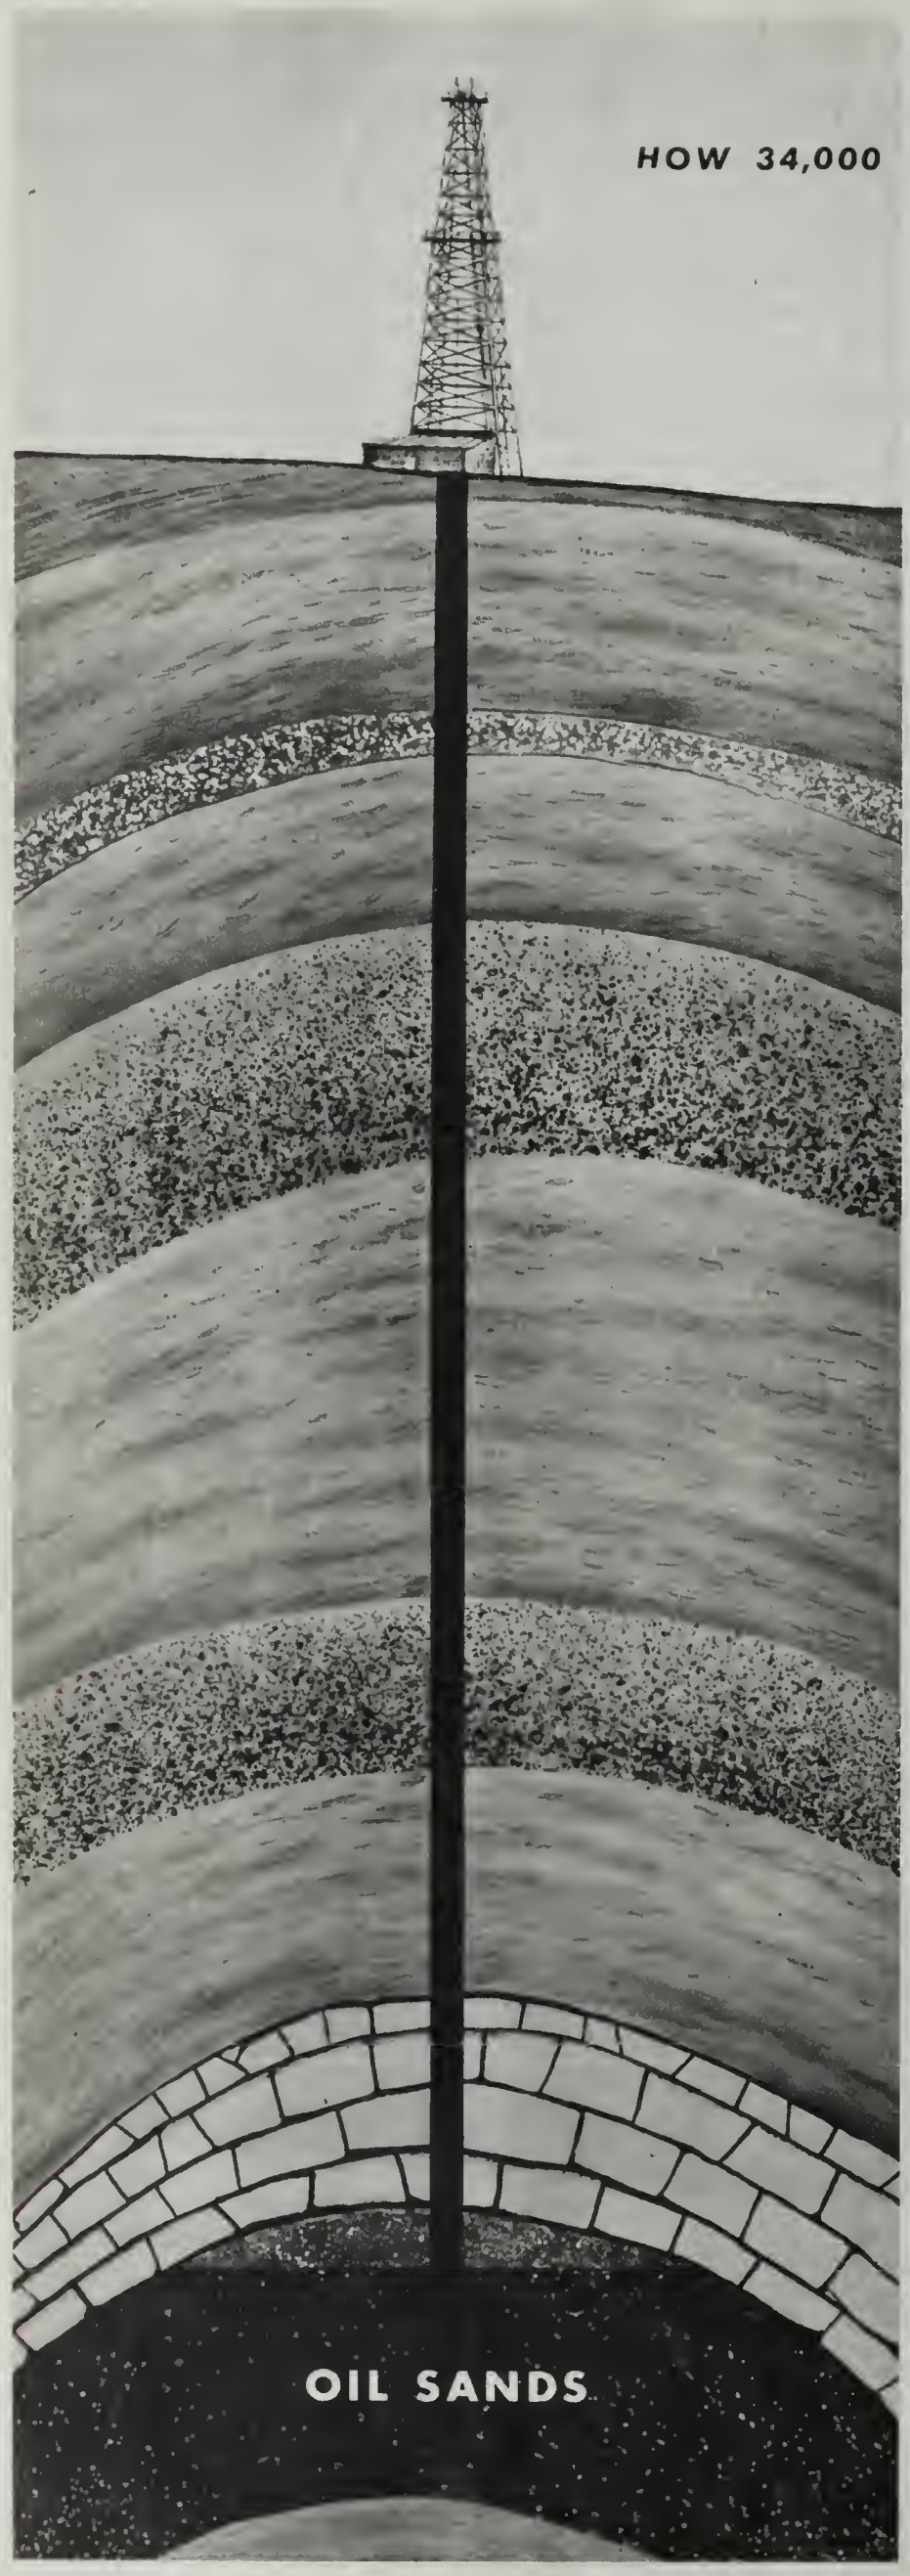
That's why Hudson has a hug-the-road way of going, even in cross-winds, and on every conceivable kind of highway. *When you see how this car takes even the sharpest curves, it will spoil you for any other type of automobile!* You sense this delightful conformity to the road the minute you begin your ride; and this stability, plus the protection of riding encircled by a sturdy box-section steel frame, gives you a grand feeling of *safe well being.*

Then, as you get out in the open spaces, the rest of the story unfolds.

Sitting in this car is as downright satisfying as stretching out in your favorite easy chair. You ride on seats that are lowered and cradled ahead of the rear wheels, and even with its low silhouette, this breathtakingly beautiful motor car gives you *more head room* than any other mass-produced car built today! The remarkable roadability and comfort of the New Hudson bring you to the end of even your longest trips pleasantly relaxed.

Hudson's use of the vital "step-down" zone in its exclusive, all steel Monobilt body-and-frame* is a development that required years of engineering work, the perfection of new production techniques, and millions of dollars in highly specialized *new* plant investment. Perhaps this explains why Hudson alone offers this new design principle today.

"Stepping down" is the most thrilling motor-car story in years, and the nearest Hudson dealer has a booklet—yours for the asking—which more fully explains how "stepping down" brings you riding qualities and safety—as well as beauty, roominess and comfort—beyond anything you've known before! Hudson Motor Car Company, Detroit 14. *Trade-mark and patents pending.



OTHER CARS—Here you can see that any car with floor on top of the frame, as shown in red above, fails to utilize that all-important space between frame members (heretofore wasted by placing floor on top of the frame). This results in a high center of gravity, and either a high roof line or insufficient head room.

NEW HUDSON—Here the important space between frame members, shown in red above, becomes the "step-down" zone—a highly useful addition to interior passenger roominess that creates a new, lower center of gravity, which in turn permits greater safety, improved roadability and ride, a low, streamlined silhouette.

dy styles in Super Series, and Commodore Cus- ies, with luxuriously panelled, beautifully fitted s. Your choice, 121 h.p. all-new Super-Six or 128 terful Super-Eight engine. Super-Cushion tires. h body colors. Two special colors or five two- mbinations—white sidewall tires—at extra cost.

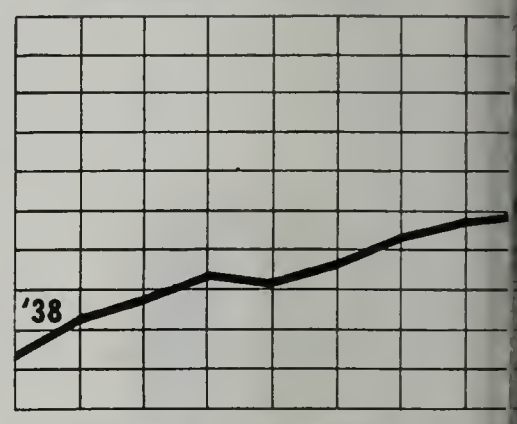
HOW 34,000 OIL COMPANIES SERVE THE NATION AS...

Oil Breaks Production Records Again



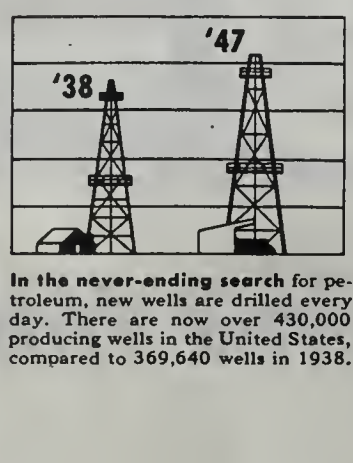
• Never before has America used so much oil—not even in the peak year of the war. In the face of this enormous demand, the 34,000 companies in the oil industry—firms engaged in producing, refining, transporting and distribution—are breaking records that seemed beyond reach.

In the production field, for example, 33,098 new wells were drilled in 1947. The total footage was the greatest in history.

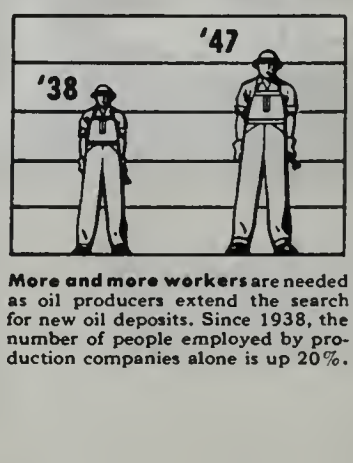
Total production of crude oil reached an all-time high of over 77 billion gallons. A vast new expansion p now under way will make 1948 another record-breaking year.

A proved reserve of a trillion gallons of oil is available in the ground to b the current supply for cars and trucks, for planes, for heat in homes and p industry, for farming, trains and ships . . . oil is the liquid energy that keeps A constantly forging ahead.

More petroleum products will be delivered this year. Be sure to use th *ciently*. Oil is energy for America. Oil means more comfort, better living, convenience—for *you*.

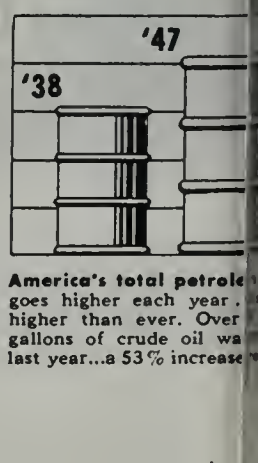


HERE'S HOW OIL CONSUMPTION HAS INC



To meet increased demand for more cars, more pl diesel trains, more farm machinery—America's tion of oil has increased greatly with the years. million gallons were produced daily last year your ever-growing needs.

OIL INDUSTRY INFORMATION COMMIT



670 Fifth Avenue, New York 19, N. Y.

In the never-ending search for petroleum, new wells are drilled every day. There are now over 430,000 producing wells in the United States, compared to 369,640 wells in 1938.

More and more workers are needed as oil producers extend the search for new oil deposits. Since 1938, the number of people employed by production companies alone is up 20%.

America's total petrole goes higher each year higher than ever. Over gallons of crude oil wa last year...a 53% increase

ONE DAY, ONE LIFE

The story of Eleanor Huntington, who married for money—which could buy her neither forgetfulness nor release from the conditions of her bargain

BY FREDERICK BORG

SHORTLY after she was married, Eleanor had Cartier design an appointment book for It was like a businessman's ement pad except that it was ller and of course more elegant, g bound in lizard with gold trim, had a facsimile of her signature gold plate set in the cover. Inside, s a little different, too; for, though day began the same time as a day e office—at nine—it did not end ve but went right on, past midt, to one in the morning. A little pencil, no bigger than a wooden match, went into a leather sheath at the edge of the book, and with it she jotted down the things that kept her busy. Occasionally there were blank spaces, but not very often, for besides being beautiful and rich she was one of the most active young women in New York.

This is how, with the aid of her little book, she spent the thirteenth of November, 1947. . . .

Promptly at nine, after having been awake for nearly an hour, she arose and did her exercises. These lasted the usual ten minutes, and as usual they were strenuous. When she was finished she stood glowing and panting before the full-length mirror, searching her body for signs of fat. There were none. At twenty-eight she had the figure of a dryad, with flat hips and stomach, long legs, and a small, enchanting bosom. Satisfied with what she saw, she got back into bed and closed her eyes, and then, to take the place of the unpleasant thoughts that had been scurrying through her mind, began reciting memory selections she had learned as a child.

Halfway through Thanatopsis, at nine fifteen exactly, she was interrupted by Angela, her English maid, with breakfast—half a grapefruit, two slices of Melba toast, and a small pot of coffee. Also on the tray were the Times and the Herald Tribune.

At nine thirty, nourished and informed, she got up again and bathed, allowing herself the customary ten minutes; dried herself with long, brisk strokes to stimulate the circulation, and was dressed and waiting for the elevator with Papa Moreau at one minute before ten. Papa Moreau was a French poodle with a long, sad face

and the wise and patient eyes of one who has seen and done everything the world can offer. He was a birthday gift from Clay, her husband.

Joseph, the old elevator operator, opened the door and said, "Good morning, Mrs. Huntington." On the way down he took out his watch and said, "You're late, Mrs. Huntington, it's one minute past ten." It was an old joke between them, for everyone knew Eleanor was as reliable as the bells of the Church of the Redemption, which were chiming as she stepped out into the lobby.

HAVING walked Papa Moreau down the waterfront to Fifty-third, and north again as far as the bridge, she was back in her bedroom at ten thirty, looking over her appointments for the day. These she knew as well as she knew her own name, but it gave her a certain satisfaction to see them in black and white. At eleven, she saw, she was due at the church to help make up packages for the poor in Europe; at one she was having lunch at the Colony with Mildred Stahle; at three there was a lecture by Tetsuo Fujihara at the Feinstein Galleries on Eighth Street . . . and so on, hour after hour, till one in the morning, where, as usual, she had printed in extra-large letters the word BED. That was one entry she could always be sure of. She was always in bed by one.

She walked the six blocks to the Church of the Redemption and arrived at one minute to eleven. In the parish hall the Reverend Doctor Standfast was at the bulletin board, putting up an announcement. He turned at the sound of her heels, and a broad smile appeared on his round, red, innocent face.

"Right on time," he said, as the bells began their metallic conversation. "You know, Mrs. Huntington, if all our ladies were as prompt as you, we'd really *hum,*" and the marble walls echoed the word. "How's your husband?" he asked, as they started toward the assembly room.

"Fine," said Eleanor. "Very busy, of course."

"I can imagine. Captains of finance." He sighed. "And their wives, too. Sometimes I wonder how you manage to stay so fresh and young-looking, keeping yourself geared to such a frantic schedule." He paused. "Which brings me to another matter . . . ah . . . You remember last week my mentioning our projected drive for completing the orphanage? Well, I was wondering—of course I know how busy you are—but I was wondering if you could possibly spare next Thursday afternoon to gather with the trustees and myself . . ."

"What time?" asked Eleanor, getting the book out of her bag. She turned to *Thursday 20 November* and saw she had no engagements for the afternoon at all, and only one—*Pick up Lowestoft teapot at Fix-It Shop*—for eleven in the morning. She held the book at such an angle that the Reverend Doctor Standfast could not see how empty the page was.

"Would four be convenient?"

"Four," said Eleanor, frowning a little as she consulted the book again. "Four—yes, I believe I can just sandwich it in. It won't be long, will it? I have to be home by five."

"Half an hour at the most."

Together they entered the assembly room, where long tables had been set up on trestles. Against the walls were hundreds of cartons of canned goods, pyramids of sugar in cotton bags, and boxes of surgical supplies and vitamin tablets; while on the tables were the cardboard containers in which these articles were going to Europe.

"The other ladies seem to be a little late," the Reverend Doctor Standfast said.

"They'll be here."

"Well . . . I'll just be running along, then. Thank you, Mrs. Huntington. I only wish they were all as prompt and energetic as you."

After a while, in twos and threes, chattering, laughing, the rest of the volunteers came in—sleek young women like herself, mostly, though there were a few exceptions like Mrs. Vandercamp, the chairman, who was over sixty; and Eleanor's mother-in-law, Mrs. Douglas Huntington, who was nearly eighty and who did not choose to arrive till nearly one, just as Eleanor was getting ready to leave.

Ordinarily the old woman spoke to her daughter-in-law only when it was absolutely necessary, for she had never become reconciled to her son's marriage; but now she came straight to her and in her harsh voice demanded: "What's the matter *now?*"

Eleanor wedged a can of coffee into a corner of the container, closed the cover and sealed it with gummed tape. She looked up and said, "What do you mean?"

"What's wrong with you and Clay?"

"What makes you think—"

"He probably told you I had lunch with him yesterday."

"Yes."

"Of course he didn't *say* anything—he never does—but I didn't think he looked particularly happy. You two haven't been quarreling, have you?"

"Of course not."

"I know this sounds silly, coming from an old woman, but after all he's my only son, and I don't think I could bear it if I thought he'd made a mess of things. He's always been so successful in everything else . . ." Her voice trailed off. She was tall and very lean, with a nose like a scimitar and bright brown eyes that glittered with an almost feverish intensity. She was one of the wealthiest women in New York, with vast holdings on upper Fifth Avenue, where her father's sheep had once roamed.

Eleanor put a hand on her arm.

"I'm very happy," she said.

"Well, I'm glad to hear it. I was just thinking last night, when I should've been asleep, that Clay's exactly twice your age. Did you ever realize that? You're twenty-eight and he'll be fifty-six next month. It came as quite a shock—"

"Age doesn't mean a thing."

"I suppose not, if people love each other. Well . . . How about lunch?"

"Today?"

"Of course."

Eleanor picked up her bag and jerked at the zipper. Perversely, the little leather tab came off in her hand, and she uttered a soft exclamation. Then, with sudden clarity, as if the book were already open, she saw the page for tomorrow, Thursday, and that annoying gap in the afternoon between *Lunch with Duncan—Waldorf* and *Bendel, for fitting;* and she smiled, for now she knew how she would fill that gap. She would take the bag to the Fix-It Shop, and while she was at it she would drop into that little French bookstore on the corner and pick up a few of those paper-backed novels that looked so effective on the library table. Still smiling, she dropped the tab into the bag, took out the little book and opened it to *Thursday 13 November.*

"Look what I'm up against," she said, tapping the page with a sharp red nail; and then, trying to keep the triumph out of her voice, for it was seldom she got the best of the old woman, she went on: "Some other time, perhaps? Tomorrow, say?" and turned the page.

"All right."

"Oh, sorry," said Eleanor, as though she had just discovered what she had known for the past three days. "Tomorrow I'm having lunch with Duncan Strove."

"Who?"

"You know, the decorator. I was thinking of having Clay's room done over—something a little lighter, perhaps, than all that Jacobean stuff."

"You just had it redecorated last year."

"I thought he might want a change."

"He might, at that." The old woman sighed, and the cords in her thin neck stood out. "I'll call you one of these days," she said. "Maybe I can catch you when you're not so busy."

"You do that," said Eleanor, and went down to the end of the table, where Mrs. Vandercamp was working. "Terribly sorry," she said, "but I'm afraid I'll have to run along. I'm supposed to be at the Colony at one and I've only got ten minutes to make it." Abruptly, unconsciously, her hand went toward the evidence in the bag; but Mrs. Vandercamp was smiling that easy smile of hers, and Eleanor changed her mind. Poised and serene, she completed her excuses, knowing the others were taking her in, tabulating the cost of her outfit, from the smart hat to the snakeskin shoes that a little man on Madison Avenue had made for her; and inwardly she smiled, because she knew there was no one in the room who did not envy her.

"Thanks, Eleanor," said Mrs. Vandercamp.

"I'll be around next week."

"I really appreciate it. I know how busy you are. Give my regards to Clay and tell him I think he's got a wonderful little wife."

ELEANOR arrived at the Colony punctually at one. She went up the steps and through the door, and there was Mildred waiting for her.

"Darling."

"Hello, Eleanor. My, don't *you* look swell!"

"Thanks, dear. Shall we go in?"

Following the headwaiter to their table, Eleanor was conscious of a change in the rhythm of the eating and the talking around them; it was like a split-second break in a power line, when the lights go dim but do not go out, or when a motor slows down but does not stop. A few yards away she saw Frances Benham and Martha Giovanni. Martha had stopped her everlasting chatter right in the middle of a sentence, apparently, with her mouth still open, and Frances was holding a forkful of salad an inch above her plate. They were appraising her, as were the others in this small, elegant, and somehow formidable room, those who knew her and those who did not know her but remembered seeing her pictures in the fifty-cent magazines—photographs of Eleanor at her dressing table and Eleanor standing at the Adam mantel, under the Gainsborough, and Eleanor, like a naiad, letting the breeze blow her hair back as she posed on the terrace looking at a fuzzy bridge and a still more fuzzy shore line on the other side of the river. They were appraising her hat which two weeks hence would blossom by the hundreds down in Union Square, and her man-tailored suit and the amusing scarf she had picked up in a little Korean shop on Second Avenue. A smile tucked up the corners of Eleanor's mouth. She knew what she looked like: she looked proud and beautiful and essential all at the same time; a woman who, despite a schedule that would drive a man to drink, still managed to achieve the serenity of a Renaissance madonna.

She watched Mildred slide into her seat—collapse was more like it, for Mildred, never particularly graceful, was going to have another baby, and her movements, governed by consideration for the little life so obviously burgeoning within her, were slow and awkward. There was no glamor about Mildred. Her hat, under the exuberant hat she had probably purchased in a White Plains department store, was dull and discouraged-looking, with strands emerging here and there and waving with each turn of her head as if they were endowed with independent motion. Her skin was good, but it had been too long in the sun—after all, this was November, when the summer tan has yielded to the pallor of autumn—and her hands were rough. As for her eyes—well, they were bright, all right, but it was the brightness of a little girl with a new doll, or of the traditional yokel on first seeing the Empire State Building. She could not help turning around, for example, to stare at Ilona Case, who was lunching two tables away with a well-known dress designer; she was breathless with the realization that she was sitting with immortals. Eleanor felt sorry for her.

Over their cocktails—Mildred had an old-fashioned and Eleanor a dry sherry—they talked about what had happened in the six years since graduation.

Mildred said, "Remember Alice Koestler?"

"No," said Eleanor, putting her glass down. "I don't believe I do." But she did. Alice was the class poet, the class intellectual, a short, dumpy girl with a face like an unbaked pie and thick glasses that made nightmares of her eyes. She came from somewhere in the West, and her father was several times a millionaire. Eleanor did not even speak to her. She was afraid to, because every time she thought of how rich Alice was—fat, dumpy Alice—and how poor she herself was, her throat grew tight and her nails dug into her palms and she wanted to scream.

Well, she could speak to her now without screaming. "What about her?" she asked.

"My dear, she's married. I ran into her a couple of weeks ago in the Bronx more. That was the day I called you—remember?—and you couldn't make it because you were rolling bandages or something."

"Packing clothes for China."

"Well, anyway, she married this instructor from Columbia. You know she took a postgraduate there, didn't you?"

"No, I didn't."

"Her husband teaches political history and I guess he gets his orders from the Kremlin; but they did seem terribly happy. First thing she did was take me upstairs, and, my dear, the way living in a suite that must set them back fifty dollars a day—set *her* back, I mean—and the pay-off, the absolute pay-off . . ." She plucked the cha

In the mirror she could see that he was regarding her with a speculative eye. "You need any help?" he asked

The Blooming of Margaret Ro

BY COLLIE SMALL

Elizabeth is safely married. The spotlight in England turns on her little sister. Here is a close-up of the 17-year-old girl whose chances of becoming queen are very slight

HER ROYAL HIGHNESS, the Princess Margaret Rose, has been described at various times as beautiful, not beautiful, tall, short, slim and graceful, narrow-shouldered and bandy-legged, excruciatingly witty, unbearably precocious, and both delighted and dismayed at the fate that cast her as the kid sister of Princess Elizabeth, Duchess of Edinburgh and heiress presumptive to the throne of England.

The confusion generated by this sort of reporting is naturally very disconcerting to the average Englishman, who likes to keep a steady eye on the royal family, but until recently, of course, hardly anyone had bothered to describe Margaret at all except as an afterthought. The architects of the royal legend were too busy concentrating on Elizabeth.

Now, with Elizabeth safely married to the Duke of Edinburgh, the microscope has been trained on Margaret. Margaret is the new *idée fixe*, and whether she enjoys it or not (there being no overwhelming evidence that she doesn't), she has suddenly become Britain's number-one item for public scrutiny. At the moment, in the realm of controversial subjects, Princess Margaret is running miles ahead of Commons, the Prime Minister and the hard-currency question.

Opinion, naturally, is divided. A youth leader in Kent, although she has never been any closer to Princess Margaret than a newspaper clipping, thinks her eyes are too close together and suspects that she may be bad-tempered because of it. A civil servant in Harrow is sure she is charming and unspoiled. A miner in Newcastle, representing a definite minority but exercising what is undoubtedly an inalienable right, refuses to pay any attention to Margaret whatsoever, on grounds that princesses belong in fairy tales.

Everyone feels obliged to pass his own judgment on Margaret and to a young American naval officer has fallen the distinction of supplying the crowning absurdity. Having been introduced to the young British princess at a royal garden party, he concluded patriotically, "Why, she's cute as a button—just like an American girl!"

If there is anything that Princess Margaret is *not* like, of course, it is an American girl. Although she will be eighteen in August, Margaret has never sat anywhere at the movies except in the specially constructed royal box. She has never hailed a taxi, and, so far as is known, she has never been caught out in the rain.

She has never mixed with crowds except on V-E Night, when she and Elizabeth walked with two detectives from Buckingham Palace to Charing Cross, a distance of about two miles. She has had only one subway ride, a ten-minute jump from St. James's Park to Tottenham Court Road, and even then she was reprimanded by the ticket collector for failing to hand in her ticket, which she tried unsuccessfully to keep for a souvenir.

As for her other characteristics, they are mostly human instead of British, American or anything else.

Physically, Margaret is shorter than Elizabeth, being only a shade over five feet. Her hair, which distresses her because it is not naturally curly, is darker than her sister's. By the usual standards she is not beautiful but she is blessed with intense blue eyes, impossibly lovely skin, and an engaging smile. Margaret actually *is* bandy-legged and narrow-shouldered. She tends to be witty, but her audiences are exceedingly indulgent and in their haste to applaud they sometimes fail to distinguish between Margaret's "wit" and what is simply native exuberance.

Fortunately, Margaret is aware that this sort of acclaim accrues to her because of her royal station as much as for her own legitimate conquests. She has known it, in fact, ever since she and Elizabeth won prizes at the Windsor Horse Show some years ago.

"Were the prizes for us just because we are princesses?" they asked their governess.

"Well, partly," the governess conceded.

"Oh," the princesses said, the dawn breaking over their heads. "We see."

Not Eager for the Cares of Empire

According to palace intimates, Margaret is not disposed to brood over the fact that, barring almost total disaster, she can never be queen. In this connection, a rather moth-eaten anecdote is frequently trotted out to illustrate Margaret's lack of concern with the throne. According to most versions, Princess Elizabeth, acting as councilor of state in the temporary absence of King George, was required one day to reprimand Margaret rather sharply for some breach of court etiquette. In her anger, Margaret is supposed to have snapped, "Oh, go mind your empire and leave me alone!"

This anecdote, of course, can also be used—and sometimes is—to illustrate exactly the opposite: that Margaret is actually jealous of Elizabeth's position and gives herself away by occasional fits of temper. Most people who have entry to Buckingham Palace, however, believe Margaret is sincerely not interested. The only thing that she seriously objects to is the tendency of people to look upon her as Elizabeth's little sister.

In any case, she could ascend to the throne as Queen Margaret I, only if her father (the king) a a childless Princess Elizabeth should both expi One thing seems fairly sure, though: Should the unhappily, die, their demises would probably n occur simultaneously, since the royal family tak special precautions not to tax the laws of chan and probability.

The king and Princess Elizabeth, for examp never fly in the same aircraft together if they c help it. The usual arrangement is for the king a Princess Margaret to go in one, with the Queen a Princess Elizabeth in the other. When Elizabe has her expected baby, this arrangement will harc be necessary since Margaret will then be demot even further down the line of succession to ma room for the newcomer.

Margaret's life inside the plush, red-carpeted p ace is anything but easy. For a seventeen-year-c girl, her days are full to overflowing, and or narily by eight, she is up and dressed and at brea fast, which she sometimes has alone and sometin shares with the king before proceeding to t business at hand. The queen is reputed to hav notoriously difficult time getting up early, and c sequently she seldom appears at breakfast.

Lunch is usually a family affair. If the king a queen are away, Princess Margaret lunches w the Lord Chamberlain, the king's equerry, a other members of the royal household in *th* dining room. Elizabeth was different. If the fam was gone, she ate alone. Until recently, Marga was considered too young to appear at the fam dinner table and was required to eat a so-cal "nursery dinner" in her rooms. Now, however, has been promoted.

Margaret is still studying under special tut and spends most of her mornings in close comm ion with constitutional history, taught her by provost of Eton; French, in which she excells; ge raphy, with special reference to Australia and N Zealand in anticipation of the royal visit next ye the English novel as exemplified by Jane Aus and the Brontë sisters, her favorite authors; and piano.

Margaret's talent for music is considerable, a while in the eyes of her teacher she appears to h less real feeling for music than Elizabeth, her te nique is superior, a fact which Elizabeth is graci in acknowledging. Margaret plays for the qu nearly every morning about eleven, and also ta a leading part in promoting the regular Thursd night madrigal sessions.

The palace has a list of about thirty-five pe who can carry their weight in madrigals, which Elizabethan part songs, and a different group eight or ten is invited each Thursday night to

Here is Princess Margaret Rose (right) with her sister Elizabeth, who'll be England's next queen, and Elizabeth's husband, the Duke of Edinburgh

BRITISH COMBINE

palace to participate. Margaret is also fond of the conga and recently led a wildly squirming conga line through the state rooms of Buckingham without apparent damage to either the furniture or the royal atmosphere.

Outside of $80,000 left her by Mrs. Ronald Greville, a onetime family friend and famous hostess who died not long ago, and an unspecified sum left her by the late King George V in his private will, Margaret has no money of her own. She is not the beneficiary of any state grants, and consequently must depend on her father for whatever allowance she receives, the exact amount being a palace secret. Elizabeth, of course, receives $160,000 a year as heiress presumptive, while the king receives $1,640,000 annually to provide for his personal needs and the upkeep of such royal establishments as Buckingham Palace, Sandringham and Windsor Castle.

Taboo on Gifts to Royalty

It goes without saying that Margaret's possessions are beautiful and costly, as befits a princess, but she is not permitted to supplement them with gifts from the "outside." Though people frequently try to press even their most prized possessions on the king and queen or one of the princesses, no member of the royal family accepts presents except on special occasions, and usually then only from such sources as national bodies, Cabinet members, or close friends.

Margaret does not have her own staff. She has a bedroom, sitting room and study overlooking the palace gardens and is attended only by her governess, her maid and a footman who is available to her on request. When she appears in public, she borrows a lady in waiting from either the queen or Princess Elizabeth. Elizabeth, by contrast, has now succeeded to a full staff comprising, among other people, a comptroller, a private secretary, three ladies in waiting and an equerry.

The Palace servants call Margaret "Your Royal Highness," but most people are instructed simply to call her "Ma'am." Her governess, Mrs. Buthley, who is still boss, calls her "Princess." To her intimate friends, she is simply Margaret, which she prefers to Margaret Rose, her full name.

Margaret, like Elizabeth, is a stickler for form, but she does not go to the extremes that Elizabeth has been known to reach in demanding strict observance of the rules of royal etiquette. Elizabeth, for example, once passed a sentry box at Windsor Castle with her dog, who promptly rushed at the sentry and got tangled in his feet as the harassed young man stepped forward to salute. The unfortunate result was that he got his bayonet stuck in the ceiling of the sentry box and nearly fell on his face. Though the fault lay with the frisky dog, Elizabeth looked him up and down severely and said coolly, "I'll overlook it this time." Margaret would undoubtedly have collapsed, laughing.

At Windsor, young officers on duty are frequently invited to dine at the

stricken with malignant malaria
had to be sent home at on
Amexco talked a freighter into
ing half its load on the dock, in o
to hasten the sick man to a
bound steamer at Panang. In all
of these emergency cases, the ha
traveler originally had bought a t
through the American Express C
pany. But the ride-to-the-rescue
free—including the Peruvian loco
tive. Why?

"What else can we do?"

An American Express "sitter"
an anxious mother arriving by
train at Gare St. Lazare,

mexco plaintively. "Our customers pect it, so we do it. It's like the time sick man on one of our Oriental uises asked if he could see Mt. Fuji-ma from his cabin window. The ly way he could see it was if the ip was turned around—so we rned it around. Just because he emed to *expect* it!"

Amexco, with 139 far-flung offices, an invisible giant whose services are ed by an estimated 90 per cent of l traveling Americans, as well as reigners of every nationality. From world-coverage standpoint, it is the rgest shipping agency in the world. countries such as Italy, Switzer-nd, England, France and Germany is a bank of no mean proportions; in ermany the official American bank U.S. Army contract. It is the big-st private mail service in the world. And behind all of this, strong as a anite rock, flutters a small piece of per known as the American Ex-ess Travelers Cheque, one of the eatest inventions since the electric ht bulb.

The travelers cheque appeared hen Amexco was middle-aged. The mpany was born in 1850, the year ter the California gold rush; it was e name given to a combine of e famous horse-and-buggy express mpanies. The Wells-Fargo pony press was bought a year later. mexco was still a simple domestic eight company in 1891, when its esident, James C. Fargo, went on harrowing trip to Europe and in-nted the travelers cheque in a spell sheer rage.

He started for Europe armed with a tle money and a large letter of edit, with which he tried in a series angry arguments to wrest some oney out of the countries he wanted travel through. He returned to the nited States sadder, wiser, and far orer. He also returned convinced at some new medium of exchange for travelers ought to be invented.

"A paper that would represent solid dollars, and would therefore be easily converted into francs, lire, rubles, pounds, or whatever," he ruminated. "Furthermore it should be better than cash, so that if it were lost or stolen the owner could get his money refunded."

Thus he designed the travelers cheque which has the simple but superb device of a double signature by the owner. He signs his name when he buys the cheque under the watchful eye of the seller, and signs it again when he cashes it—this time under the eye of the person who cashes it. A further check on the cheque is an identification number in the upper right-hand corner.

Since few thieves run the risk of forging a signature, that worry is almost entirely eliminated.

Refunds for Lost Cheques

As for the owner, if he loses his cheques he always gets his money refunded by Amexco. Purchasers pay 75 cents for every $100 worth of cheques bought. By this time, several million Americans a year buy the cheques in most banks in the country, in Western Union offices, Railway Express offices and some hotels.

They bought the cheques right from the start in 1891, and then set about forcing the structure of Amexco into what it is today. When they went to Europe, they demanded Amexco offices in which to cash their cheques. Once the dazed company had opened offices—the first being a cubbyhole in Paris in 1895—the public bustled in and demanded travel information while the cash register jingled. "What trains leave on Monday morning for Switzerland?" they asked. "What's a good hotel in Florence?"

And so the American Express Company became a travel agency, pushed into it by the public. In 1918 it gave up its original destiny by presenting all its domestic express business to the Railway Express Agency in exchange for that company's foreign shipping. (Although they are often confused, there is no actual connection between these two. The railroads own Railway Express; 30,000 stockholders own Amexco.)

By this time, Amexco's Paris cubbyhole has grown into a six-story landmark for all tourists. Beyond those 139 offices straddling the globe, there are thousands of "bureaus" or representative offices in every byway of the world. The cubbyhole has become a colossus . . . by public demand.

The traveling public had become a colossus too, at exactly the same time. By 1900, tourism had developed such importance it was a department in most European governments, and tagged by Europeans "the great invisible export." Until then, only the very rich had traveled, but toward the beginning of the 20th century, with the aid of the industrial revolution and the steam engine, the great middle classes began to move. The result was that the end of World War I brought the greatest era of international travel in history. Between the two wars, traveling Americans spent a cool $8,000,000,000 in foreign countries.

"Foreign nations gained more money from traveling Americans than from any other source during that period—more than by the sales of coffee, rubber, sugar, copper or tin," says Ralph T. Reed, president of American Express. "And as soon as the recent war was over, they began doing it again. The State Department only let down the bars on postwar European pleasure travel this last June; yet even on such short notice about their favorite vacation place, Americans spent $600,000,000 traveling there and elsewhere in 1947."

Like cats after catnip, traveling Yanks search out American ground away from America . . . with their first love still their favorite: Paris. In Paris, as many as 12,000 Americans a day tell one another, "Meet me at American Express!"—and rush to the world-famous Amexco office at 11 Rue Scribe. Here they bustle up to the mail desk to collect mail from home, make out forwarding slips to have future mail follow them to their next stop, and scream greetings to one another. Here they scan the registry book on the desk to see where other American friends are staying in Paris.

At the cashier's cages they cash their travelers cheques into francs. At the information desks they go wild. They have French messages translated, they want trunks and furniture put in storage, and they machine-gun questions. They ask about sight-seeing tours, about hotels, boats, doctors, dentists, hairdressers, and where to buy perfume.

In the big Paris office—the largest outside of New York City—15 clerks work all day long giving free information. Upstairs in the huge fourth-floor mail room, more clerks turn over the 20,000 letters that arrive in a single day. This too is free.

One of Amexco's firmest policies (usually aided by the laws of the country) is to employ the citizens of each country in which they open offices. In the big Paris office, for instance, out of the 220 employees only four are American. The rest are English-speaking French. Ordinarily, the sole American in an office is the manager. "All we try to do is keep a touch of America in each office," explains President Reed.

Even away from the offices Amexco has created an American atmosphere—every international train and plane all over the globe finds an Amexco "sitter" awaiting its arrival. He wears a navy-blue uniform and he speaks four languages, one being English. There are 140 such sitters in the airports, stations and harbors of the world, ready to rush up to any overexcited stranger and help him past customs, through the mysteries of baggage and tipping, and finally into a taxi headed for his hotel. Again this is a free service. On New York's piers, newly arrived Europeans treat American Express Company sitters like human reference books.

Group Tours Are Popular

The estimated 90 per cent of traveling Americans who use Amexco offices can be explained by the fact that Amexco handles not only thousands of individual globe-trotters a year, but also endless cruises—and dozens of big groups. In 1947 they handled the British movie magnate J. Arthur Rank's entourage on its triumphal tour of America, as well as fifty America-bound groups of French, Swiss and Italian businessmen.

Meanwhile, they were further responsible for all the seals, gorillas, Shetland ponies, chimpanzees, polar bears and elephants that were sent from a dozen ports to America for the Ringling Brothers Barnum and Bailey Circus.

Corpses are an irregular but steady part of their shipping department. Americans die everywhere, but always want to be buried in America. Amexco does everything: witnesses the funeral service if there is one abroad, obtains the undertaker's certificate and the doctor's death

(Continued on page 61)

weden, a two-month-old tiger cub, had her passage arranged by Amexco from Malmö, Sweden, to a U.S. circus

MORE BEAUTIFUL THAN MURDER

I reached inside the door and snapped on the light. At first glance I saw what had brought that look into Patricia's eyes. It was Conchita

CONTINUING A NOVEL OF A TENDER LOVE AND CRIMINAL INTRIGUE

The Story:

STEVE BLAKE, young aeronautical engineer, is on trial for the murder of JEFF NULTY, ex-convict, who had managed the Casa Linda night club. Testimony has shown that on the afternoon of October 4th, Nulty barged in on Steve's cocktail party, already drunk. When Steve asked him to leave, Nulty became ugly, knocked Steve down and kicked him in the face. Blake, violently angry, threatened to kill him, but other guests hustled Nulty out.

That night, Nulty was found in his apartment, shot to death with a .38 which the police can't find. Neighbors fixed the time of the shot at 10 P.M.

Blake's defense is that he went to see Nulty that evening to settle accounts, but found him docile and apologetic. Blake also says that he left Nulty at 9 P.M. and arrived home at 9:20 P.M. [illegible] says he didn't leave his apartment [illegible] night, he does not know where his [illegible] .38 is. But he has no proof of his sta[illegible] ments.

Suddenly BRIAN GARLAND, Blak[illegible] chubby attorney, produces a MRS. [illegible] TRICIA KINGSLEY, whom Blake can[illegible] place. Under oath, she testifies that [illegible] knows Blake was in his apartment at [illegible]

BY OCTAVUS ROY COHEN

on the fourth, because she spent the
t with him. She frankly admits to
g Steve's mistress. Only Blake, sit-
there stunned, knows her statements
utterly false.
e is at first relieved to be provided
an alibi, but then, on impulse, not
ting his acquittal through perjury, he
s the stand himself and flatly denies
statements.

COURT reconvened at two o'clock. Noon editions of the papers had blazoned the news to an eager public. I knew all the lurid details had been on the air.

The state and the defense did their summing up. Both Walderson and Garland played it cagey. Neither ranted, neither raved. They were like two poker players, each of whom thinks he has the winning hand. For my money, Walderson made the better showing—he had more to go on.

Simply and graphically, he dwelt on me. He lauded my fearless honesty—which was a smart move. He established me as a man to whom lying was an impossibility, except perhaps on the little matter of claiming that I hadn't killed Jeff Nulty. He stated that he rarely had seen such courage, or heard such unequivocal truth. Voluntarily—without guidance or coercion—I had sworn that Pat Kingsley's testimony was false.

Garland played it the other way. He ignored my testimony and dwelt on Mrs. Kingsley's story. He drew a graphic picture of Mrs. Kingsley's social position and reputation; he reminded the jury that she was so obviously a lady. And, he claimed, her testimony must therefore be believed.

The jury retired. The guards trotted me back to my cell, but came back for me shortly before five o'clock.

The expressions of the seven men and five women in the jury box told me nothing. The quiet was something you could cut with a knife.

Judge Gaston said that the verdict would now be read by the clerk. He warned against any demonstration. Every muscle in my body was rigid. My head was throbbing.

The foreman of the jury handed an envelope to the clerk. The clerk opened it. Veteran though he was, his fingers were unsteady. He started to speak and his voice cracked. He gulped some water and started again. He read the preamble . . . he reminded everybody that this was the case of the People of the State of California versus Steven Blake. He said, "We, the jury, find the defendant . . ."

He paused again. He drew a deep breath, and then he said, "Not guilty!"

I didn't move. Not even when an incredulous Brian Garland started pumping my hand, not when George Walderson came over to congratulate me. The strength had drained from my body.

Photographers' flash bulbs were popping all over the place. One young man shoved a microphone at me and asked me to say something to my millions of well-wishers. I shoved the microphone away.

"Not guilty!" The sheer surprise of it drained me, left me flat.

An ample-bosomed lady shoved through the crowd and took one of my hands in both of hers. I recognized her as a member of the jury. She was crying.

She said, "I'm so happy, Mr. Blake; so very, very happy. Your effort to save that woman's reputation was the most heroic thing I've ever heard."

FREE. Now I could do what I wanted, when I wanted, how I wanted. I was amazed that there wasn't any red tape. The jury said, "Not guilty," and I was as free as anybody. No papers to be signed, no formalities, no nothing. I could answer questions if I chose, and refuse to answer them if I didn't choose.

I got through the crowd somehow, although dozens of people tried to talk to me. I felt like a fighter who had been awarded a close decision. I thanked Brian Garland for what he'd done and left him standing by the elevator looking as dazed as I felt.

Down on the ground floor there were a lot of people. Nobody knew me. Nobody cared about me. I was just someone walking out of the Hall of Justice. I went down Temple Street to Spring. I looked up at the magnificent white city hall, stretching high up into the clear dusk. I walked up the wide steps and stood between two of the massive pillars near the bronze entrance doors and smoked two cigarettes. I was thinking about what I intended to do, about what I had to do. Maybe it made sense—and maybe it didn't.

I went inside the building. I walked down a long, impressive corridor that angled off to the right through an archway. Leaning against the wall was a painted sign informing Mr. John Q. Public that he might proceed only if he wished to transact police business.

I went ahead, because that was what I wanted to do.

I HAD been in this corridor before, but not alone. I'd been brought here for questioning. I could turn around now and walk right out. The other time had been different.

Down the hall was a door marked "Homicide Division 43 Entrance in Room 42." I went to Room 42 and walked in.

I stood just inside the entrance and looked around. Conversation eased off. The Homicide detectives all looked at me. I had a feeling that they recognized me. They didn't say so, but I knew. They looked neither hostile nor friendly. I asked whether Lieutenant Marty Walsh was in, and a heavy-set detective with a slight Spanish accent motioned toward a larger room on the north side of the one in which I was standing.

That was the room where the big shots of Homicide had their desks. It was the same size as the reception room, and the desks were newer and neater, but the calendars on the walls were still advertisements for morticians.

The skipper—the captain of Homicide Division—was at his desk. Two men were talking to him. One was Marty Walsh.

Walsh had given my case his personal attention. He was slender, but that slenderness was deceptive. He was wiry as a coiled spring of tempered steel. He was one of the conservative dressers. He had brown hair and cold brown eyes. He was the smallest man in the room.

As I walked in, another man got up from a desk in the corner and moved forward. I recognized him, too. He was Sergeant Vic Tremont, who had been the partner of Lieutenant Walsh on my case. He was a big man, as straight up and down as six o'clock. He had a face like granite and a deceptively soft voice.

Obviously the skipper recognized me. He jerked his head in my direction and started reading a memorandum on his desk, which was the same as saying to Marty Walsh that he wasn't butting in. I noticed that the next room had quieted down, as though the detectives there were all humanly curious about what had brought me over to Homicide fifteen minutes after having been turned out of superior court.

Walsh straightened up. That still left him shorter than I was. He looked straight at me, but his eyes told me nothing. He said, in a flat voice, "You played that mighty cute, Blake."

"How?" I asked.

"Taking the stand. Defending a woman's honor. I didn't know you were that smart."

I shook my head. "You get hold of an idea, Marty—you never let go, do you?"

"It was very nice. On Mrs. Kingsley's testimony alone, they might still have convicted you. There wasn't any rule they had to believe her. But when you made your pitch, fella, that slew 'em. You handed 'em so much reasonable doubt they couldn't ignore it."

Two or three of the boys drifted in from the next room. They were as curious as a bunch of women. I said, "You don't agree with the jury, do you, Marty?"

"There's lots of things I don't have to agree with."

I said, "You and Tremont here rode me pretty hard."

"That's our job. We try to be smart. But we ain't ever half as smart as a slick lawyer."

I smiled. It was the first time I'd smiled in a long while. I said, "Why do you think I'm here?"

"To gloat. You got the right. You're just a citizen again. You can laugh at cops all you want."

"I came for something else, Marty." I looked around. "Could it be just you and me and Tremont?"

"Sure." He shooed most of the others out of the room and closed the door. The nice-looking man with the prematurely gray hair remained seated behind the desk. "You can't object to him, Blake," said Marty Walsh. "He's the skipper. Meet Captain Carnes."

I shook hands with Captain Carnes. He had a hard grip, but he didn't overdo it. I took the chair that Tremont shoved forward. I said, "I've come here to find out whether you're willing to help me."

Marty looked puzzled. He said, "You seem to be doing all right. Why do you need help now?"

I spoke carefully, "As I understand the law, I could confess to the murder of Jeff Nulty and you couldn't touch me."

"Right. You thinking of doing it?"

"No. What I wanted to tell you is that you've still got an unsolved murder on your hands. Jeff Nulty was murdered. I didn't do it. I'd like to know who did."

MARTY and the skipper glanced briefly at each other. Then Lieutenant Walsh faced me. He said, "Maybe you ain't as bright as I thought. Look, fella—you're clean. They washed you and hung you out to dry. Even if it's true you didn't knock Jeff Nulty off, what's it to you who did?"

"Can't you figure that one, Marty? Let me diagram it for you. My statement to the jury was the truth: nothing added, nothing held back. I've heard of Patricia Kingsley, but I never saw her before, except casually at my cocktail party. But fully half the citizens of this town are going to think your way. I'll always have the feeling that I'm suspected of murder, whether I'm technically free or not. It's a feeling I don't like."

"Just the same, it looks as though you're stuck with it."

"Not quite. You did a lot of talking about your job. Well, isn't it your job to find out who killed Jeff Nulty?"

"*That* again. I still think you did."

"Would I be here if that were true?

Ella was an old hand at worrying. She'd always worry more about less—and twice as often

Are You SURE?

BY SAMUEL W. TAYLOR

He was trying to go to sleep when she said, "Clyde, did I pull out the iron cord, or—"

ONE thing you can say about Clyde and Ella Harris. They certainly are a source of contentment for others. After an evening at Clyde and Ella's, you notice couples leaving arm in arm, feeling pretty good about each other. And in the street during the short pause while men get out their car keys and the women remind one another of next Wednesday afternoon at three, somebody will say, "Poor Clyde." A wife will remind her husband, "You think *you've* got it rough." He will grin and admit he could have done worse. "He was always such an easygoing guy," somebody will say. The answer to that is that that's why he takes it. And generally there will be the old prediction about the redheaded stenographer: "You just wait. He'll take off with some dumb babe one of these days. There's a limit." Then somebody always mentions that trip to L.A., which is good for a laugh as we drive off.

Personally, I think Clyde and Ella are a very happy couple. But I've learned not to argue the point. All I get is that knowing look. Well, okay, Clyde did beat me out with Ella. She married him instead of me. But that's over, and so is what I felt for Ella. And it's not merely a case of taking fiendish pleasure in seeing Clyde on the rack. I'm just saying there's a Jill for every Jack.

Okay, *take* that trip to L.A. I know something about that. I got involved in it.

That was shortly after they'd moved into the new house. Over the long week end—Monday was a holiday—they'd planned to get the lawn in. But when Clyde called up Friday afternoon to arrange for renting a power tiller and a roller, he found that the equipment had already been reserved for the week end.

"Clyde, I *told* you to arrange for that stuff early this week," Ella said. "I should have done it myself, and made sure."

Clyde shrugged. He wasn't one to worry. "Why do we have to put the lawn in this week, anyhow?"

"What's more important?"

"We've been tied down to the place. Why don't we just take off and go someplace?"

"Where?"

"How about dropping in on Bill and Elaine in L.A.?"

So they packed up that night and got off in good time next morning, nothing planned ahead, the sort of trip you always have the most fun on.

They stopped in Gilroy for breakfast. As they ate, Ella said, "Clyde, did you lock up the house?"

"You watched me do it."

"As long as we're sure." Presently she looked about. "My purse! Did I leave it in the car? Did you lock the car?" Almost immediately she found the purse beside her on the bench. She looked through it, making sure she hadn't forgotten her sun glasses and address book, the credit card, the extra car key she always carried in case Clyde lost his, and other things she'd made sure of a dozen times before. "Clyde, we ought to do this oftener. Just take off. It does something to you."

"We had a grind with the house. But n we're in."

"Just pick up and go and forget everything fo couple of days. Clyde—"

"What?"

"You know, we could lose everything. I've hea of people who watch. Particularly with new hous before you get to know the neighbors. They w until you're out, and then back up a truck a simply strip everything to the bare walls. It's ha pened while people have just stepped out to go the grocery store."

"We've got the best locks money can buy."

"Yes; but did you lock up? Are you sure?"

"You were right there when I locked the do You looked up and down the street to make sure r body was watching while I dropped the key in t mailbox."

"But that was the front door, Clyde. What abo the back?"

"I locked it from inside. Then I went throu the house checking the windows, and locked t front door as I came out."

She said, "I wonder if we'd ought to give Bill a Elaine a ring. Maybe they'll have company, or away, or have something else planned. There's phone right over there. We could just say he and tell them we'll be dropping in."

"And put them to a lot of fuss getting ready a planning ahead," he said. "We'll just pop in. Ta things as they are. You always have more fun t way."

The Secret Papers of HARRY L. HOPKINS

BY ROBERT E. SHERWOOD

The war in the Pacific becomes desperate. Roosevelt's suggestions on India arouse Churchill. The British agree to 1943 invasion of Europe

PART VIII—WE PREPARE FOR A SECOND FRONT

RESIDENT ROOSEVELT and Winston Churchill announced at the beginning of that the United Nations had ed a great coalition against the but within one month there were ning evidences that it was about knocked to pieces. The danger from blows delivered by the re- ced Germans in Africa and the ering procession of Japanese uests southward and westward. e most dreadful of all prospects, h came perilously close to reali- n, was that of a German break- gh into the Middle East and a nese march through India, which d have enabled the two powerful partners to join up and pool re- es. This, of course, did not hap- but there were many moments bsequent months when the "best informed sources" would not dare to bet against it.

Harry L. Hopkins was very much worried about public morale. (He always worried a lot more than Roosevelt did.) He was afraid that the flood of bad news would produce a resurgence of isolationist sentiment.

Hopkins at this time was virtually hospitalized, but on January 24th, he drove to the White House for an evening with the President and subsequently noted:

It is perfectly clear that the President is going to have to go through just what Lincoln had to go through with this Senate committee on the war and I fancy he is going to do it with the same imperturbability as did Lincoln.

He is going to have many of the same problems that Lincoln had with generals and admirals whose records look awfully good but who well may turn out to be the McClellans of this war. The only difference between Lincoln and Roosevelt is that I think Roosevelt will act much faster in replacing these fellows.

This war can't be won with . . . men who are thinking only about retiring to farms somewhere and who won't take great and bold risks, and Roosevelt has got a whole hatful of them in the Army and Navy that will have to be liquidated before we really get on with our fighting.

Fortunately he has got in King, Marshall and Arnold three people who really like to fight.

At this time the Russian front provided almost the only good news of a military nature and Roosevelt kept pressing to get supplies to the Red Army. In mid-January, he wrote to Admiral Land saying:

I am still terribly disturbed about the fact that an adequate number of ships are not available for Russia. . . . This government has made a firm pledge to Russia and we simply cannot go back on it. . . . You simply must find some ships that can be diverted at once for this Russian business.

Roosevelt cabled Stalin as to progress and added:

Our reports suggest that you are getting on well in pushing back the enemy. I believe that despite our Far East difficulties, we will have that area reinforced in the near future to such an extent that we can stop the Japs, but we are prepared for some further setbacks.

(Continued on page 54)

ACME

When President Roosevelt brought MacArthur (shown arriving in Melbourne) from Corregidor it was like ordering the captain to be the first to leave a sinking ship, but Roosevelt did it to bolster the morale of the people of Australia and New Zealand

ON BAKEOVEN GRADE

BY ERNEST HAYCOX

Web Gordon had the common disease of the country: He thought old. But Ellen had the cure: She acted young

AT ELEVEN o'clock, with September's aromatic heat full upon the land, the Antelope stage appeared on the bench rim five miles above John Whitman's ranch and swept along the loops of Bakeoven Grade.

John Whitman stood in the barn's doorway and felt a puff of hay-fragrant air come from the loft. Every driver has his own style and, noting the reckless way the stage traveled, Whitman guessed it would be Ek Long at the ribbons; someday Ek would turn a stage over on that grade and kill his passengers. The road, leaving the hairpin curves, traveled beside Bakeoven Creek—meager waters now, moistening a rocky bottom—and split the yard of John Whitman's ranch, separating the barn from a long, low house weathered into the universal tan-gray of the country. He saw his wife's face at the kitchen window and he called, "Stage in sight."

She gave him a short glance from a face more thoughtful than usual. Something worked on her mind and would come out when it suited her to let it out. His daughter Ellen stood in the young orchard with Web Gordon, who had come from his father's ranch two miles away; in the last few months Web had done a lot of aimless riding in this direction, and rather suddenly it occurred to John Whitman that his daughter was nineteen and ready to have men on her heels. He thought to himself: Hard to think time's gone that fast, and returned his attention to the stage and to the land, which, rising bench on bench, knew no flatness till it reached the high, rolling desert ten miles away.

That was eastward. To the west, it pitched down over other successive benches until it reached the deep canyon of the Deschutes twenty miles distant. In any direction from this ranch the land was up or down, never level, and though John Whitman had lived here for ten years he still had the occasional feeling that he walked with one leg braced against a tilted earth.

When the stage was two miles away he observed that nobody rode on the boot with Ek Long. He called to his wife, "Light load today," and went into the barn to water and harness the fresh relay horses.

Ellen said in her quietest, gentlest voice, "I wish for the rain to come," and looked beyond Web Gordon to the parched row of fruit trees jammed like spikes into the iron-dry ground. They needed water soon, she thought; it was a quick thought that broke into her other thoughts and went away, leaving her discontented with herself and with Web. What had begun with such rising excitement three months earlier had settled into something silent, something desperate. Everything turned old too soon in this country; the sun and the wind dried out the grass and the trees and every living thing. Nothing happened on the grade; it was a thousand miles from anywhere. The earth was forever brown and dusty; the ridges lay frozen in shapes that would never change. Even people got frozen into their shapes and lost the power to grow.

Web said, "Never wish for rain. It can drive people crazy."

She knew him, but of late she was uncertain about him. He wasn't talkative. He was a young man with a round hard body and a face made deeper than amber by the sun. It was a restful, easy, healthy face; his eyes had a powdery-blue depth in the sunlight. He looked at her with his honest concern; he felt the change between them, too, and couldn't understand it.

She said, "When we stop wishing, we stop exp ing anything—and then we're old."

"No use wishing for things you can't do anyth about. Better to keep your mind on things that know we can get."

"No. People get in a rut by just being pract You've got to want a lot of things, and want th hard."

His smile came as he watched her with his t bled wonder. "Well," he said, and he had no ma in his voice, "wish for the moon, but you w get it."

His fingers sought his shirt pocket for cigar pouch and papers; he rolled a smoke, his calm not as good a thing to her as it had been before. liked his life, he endured the monotony and work and the heat and the dust; he took it all v out complaint. She waited for him to say the

ng she wanted to hear, and at last she knew he ildn't say it. She decided to prompt him.

"There's a dance at Antelope tomorrow night."

He drew in a breath of smoke and expelled it. looked down at the hard earth. "Dad and I have to light out for the mountains tomorrow and t hauling wood." He raised his head and caught guarded disappointment. "It's getting late in year," he added.

he said in her lightest tone, "There was a dance week, too."

I was down in the canyon working fences for nin. I'd have lost two days' wages, coming back the dance."

he stage turned the last loop of the road, a mile ant. She said, "Time to dish up for the passen-," and walked away. He stood still, not able to tify the trouble between them. He rubbed a film of sweat from his face and looked at the dull brass sky. . .

The stage rolled into the yard and came to a tearing stop. Ek Long threw down the reins to John Whitman and dropped from the seat, all legs and torso and rangy arms. He was a redheaded young man with a hard bright smile, and an assurance that rushed out of every feature and expressed itself in every gesture. He grinned at Whitman and walked into the house for dinner, preceding the passengers who crawled stiffly from the coach. Whitman unhitched the old horses, ran them into the corral and led out the fresh set. The sudden racket of dishes and people's voices came out of the house, and from the barn's arch he saw Ellen standing beside Ek Long at the head of the table, Ek smiling at her and she smiling at him. Web Gordon strolled forward and stood a moment in the barn's opening

"You're too easy with other men's girls," Web Gordon said. "I've got to teach you better." But Ek Long jabbed Web's face three times

with John Whitman. He said nothing but he, too, saw Ellen's smile for Ek Long, and presently he went to his horse and rode out through the hard sunshine toward the Gordon ranch.

These meal stops were always short and hurried things. In twenty minutes the passengers returned to the coach while Ek Long paused in the house doorway to say one last word to Ellen and to receive her nod; then he climbed the boot, caught the reins which John Whitman tossed to him and kicked off the brake in a single motion, breaking the horses from a standstill *(Continued on page 66)*

Laughter MUST BE SHARED

BY WILLIAM CHADWICK

"May you have happiness," Mr. Li said. "I have saved a special incense cone for this important occasion"

THE evening that my beautiful, slender, black-haired mother went with me to Mr. Li Fu's shop the clouds were hanging black and swollen over the city, threatening snow. I had been to the shop often before. But only to look. This evening I had come to buy.

My mother halted at the door of Mr. Li's shop. I went forward into the yellow lamplight, then paused and looked back at her, expectantly.

"I'll wait here, Bud," she said.

But I could not go the rest of the way inside. Remorse prevented me, even though I still kept my two dollars clenched in my fist. For in the last year I had become money-wise. The nickels and dimes which my father used to give me casually to spend just as casually belonged now to the past. There had been no talk between my mother and me about money since he had died, but I had become conscious of the lack of security.

For months Mother and I had discussed my birthday. She had promised me two dollars. And now two dollars I had. At first in my imagination I had spent it easily on a thousand things. But then a selective instinct had developed in me which changed to a heavy doubt. And it was doubt that had first led me into the side street and at last to Mr. Li's shop.

I had realized at once that Mr. Li was no ordinary shopkeeper. For as I had peered in his door he had said, "You must come in, for it is only from the center that one sees the whole."

"I'm only looking," I had said. "I'm not buying *yet*."

"That is wise," Mr. Li had said. "Before one buys, one should search diligently." Then he showed me the wonders of his shop, the rose jade and crystal, the fans and carved chests and heavy silks.

I told of my approaching birthday and promised, "I shall spend all my birthday money here."

"In which case," he had replied gravely, "you must come here frequently to see all that I have and take note of anything new that has come from China."

But now as I stood at the threshold of Mr. Li's shop the lump of coins in my hand seemed enormous. It was one thing to spend it only in imagination, and another to part with it recklessly. My mother had saved this vast sum. Now was the time to return it to her, for I knew she needed it. Then I recalled my promise to Mr. Li. And my face must have shown my anxiety for my mother bent over me and whispered:

"Hurry, honey. I'm so excited I just can't wait to see your present."

I TOOK a deep breath and with beating heart marched to the far end of the shop where Mr. Li in his yellow robe sat patiently watching me. Carefully I placed my two dollars on the counter and said, "I have come to buy my birthday present."

"May you have happiness," he said. "I have saved a special incense cone for this occasion. It is only once in a lifetime that a man may celebrate his eighth birthday and himself select the present which he desires. Would you, little Bud, like to see one more thing from China before you decide?"

My heart had been set on one of those wonderful boxes. You opened it and found another box inside: and inside that, another little box; and another and another until at last you came to the final box and inside that you would find, carved out of ivory, a miniature figure of a man in a peasant's straw hat. quite perfect and beautiful. I hesitated. Then with my eyes on the money I nodded.

"Do you like to laugh?" Mr. Li said, and with the gesture of an Oriental magician reached under the counter and put before me the queerest little ivory man I have ever seen. He was fat. His head was bent to one side. His mouth was wide open and his two teeth were showing as his hands clasped his belly in a paroxysm of mirth. He looked as if he were sore from so much laughing. And I began to laugh, too, until tears squeezed from my eyes. "Laughter is like good wine," Mr. Li said. "It must be shared."

"I want to buy him," I said. "How much is he?"

"Let me see," Mr. Li said. His head sank in thought. "Two dollars. The price includes his box."

"Just what I have! I'll take him."

"Just a moment," my mother said from behind me. "You are good and thoughtful, Mr. Li, but this is a collector's piece. You must have had high offers for it. Bud only has two dollars. You must sell him something worth two dollars. Nothing more."

Mr. Li folded his hands into the sleeves of his robe. "It is true that I have had many offers for this ivory figure. But not one was as high as the offer I have had from little Bud this evening. He has offered all he has and that is a great price."

From beneath his counter he produced a sandalwood box and in it he plac little man and round it he wrapped a of white paper stenciled with green ons. With one of his rare smi handed the box to me and saic Tungp'o, a great Chinese poet wr single hour in an evening of sp worth a fortune of gold. Let him k Laughter is the balm which eas pain of life."

I looked doubtfully at my moth

"It's yours, Bud," she said. "' Mr. Li for his goodness."

AT THE door of Mr. Li's shop I parcel under my coat. We pass into the darkness and as I caug mother's hand the first snowflake my shoulder. I looked up at my er's face and it was set and strai we hurried through the snow. I b head down and pressed my nose the parcel. Through the paper I the faint scent of warm sandalwo I thought of the little man inside felt the laughter bubbling in me spring of water.

I stumbled. My mother jerk arm.

"Bud! What on earth are you d

"I'm laughing!" I spluttered. "I laughing with my little man!"

At the thought of him my mirth and I laughed until I shouted. darkness I glanced at my moth saw the gleam of her teeth and he sudden rush of her own laughter. we were walking home through th York snow, laughing and laughing next to my heart the little man sandalwood box was doubled u mirth.

UNWANTED

BY W. B. COURTNEY

oved about like pawns in a game of high international politics are a million and a f desperate people, Europe's DPs. Their only crime was that they were brave ough to hold out for liberty; their only desire is to become useful citizens

he first boatload of Displaced Persons and ngees landed in America on the 21st of Decem- 1620; some 100 women and children and men umble means and simple crafts. They were not first permanent colonists here. But they are the t venerated in our history because they were the arrivals who had been displaced by political pression and made fugitives by religious perse- ion—and in that sense remain a foundation mbol of the United States of America.

NE day, 327 years after the Mayflower, I talked with a man in a camp near Munich, Germany, sardine-packed with 6,000 dern Displaced Persons and Refugees. The n had been a professor in a Baltic university il the Reds gobbled it.

He quoted an item he had read in an American spaper describing objections by a patriotic anral society in the United States to the admission re of Displaced Persons. Then he added, gently: Perhaps if we all were Anglo-Saxons and Episalians we'd be welcomed in the United States dily enough!"

Though it stung, I liked him for saying it. And ked him for how he said it: without either timidor ill feeling, but as one quietly trying to figure what a thing really meant.

For what it really meant to me, I recalled a day, n Yanks were dying so that people like the proor could have freedom and homes again and own could be secure. In what had been a Normdy meadow I watched identification squads do ir bookkeeping in the human debris of battle. haps some of these poor fragments were in dit line from the Pilgrims; but more, far more, nmed from ancestors who had flocked much r through America's Open Gate.

Amid the stench of quick decay in that summer t, and the commotion of near-by fighting, I ught there could be nothing worse about war. re was its Last Mile, the end of a boy's progress m school and family to a quaking slot of earth. nought, also, that in a fresh military cemetery like s, and not in palaces, the makers of peace should compelled to hold their wranglings.

But that was maudlin nonsense of course. There longer and worse Last Miles of war for the nded, the maimed, the bereaved. And there is other, seldom remembered; but measureless and gic because it is trod by *whole* and *living* people. One and a half million such people are drifting ng that sort of Last Mile now—Displaced Pers and Refugees for whom there is no Plymouth Rock anywhere. Human beings who are nothing more than "Official Statistics." One million and a half men, women and children dutifully checked, identified, sifted for spies, catalogued, stamped and filed away by the International Refugee Organization. Impersonal columns of figures, expressionless thumbtacks, faceless circles on the charts of a vague and distant "problem."

Absolute precision in human records, as in those of any perishable and expendable goods, is not possible—varying from hour to hour with deaths, births, desertions. Actually, the number is somewhat larger: about 1,100,000 in Europe and nearly 600,000 elsewhere. But 1,500,000 is a nice round, impressive statistic—easy to remember: It's equal to the population of Detroit, for example.

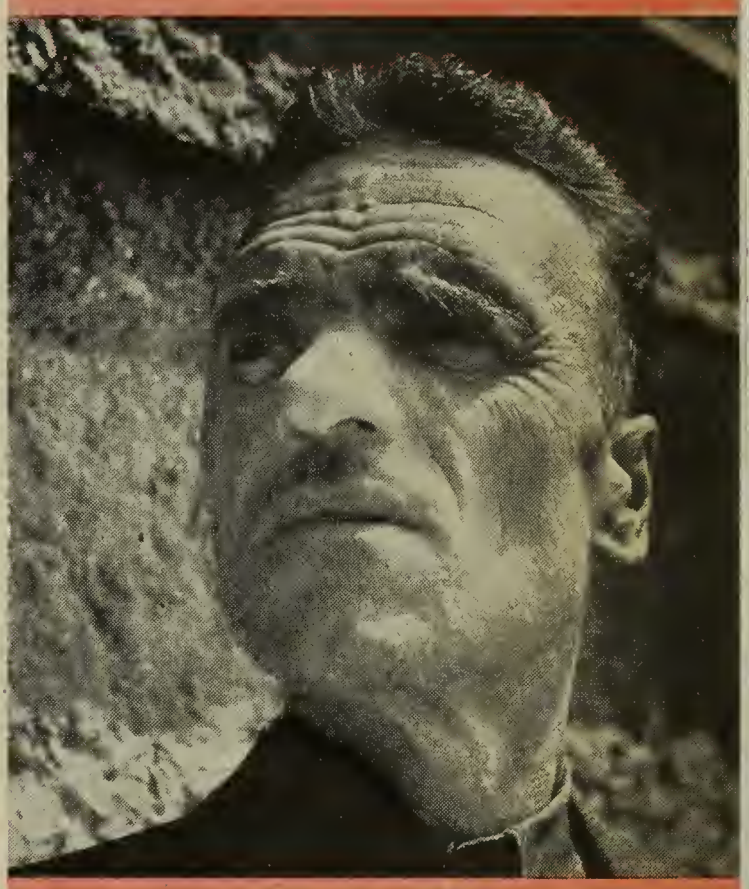
"Statistics" begin to break down when you leave IRO headquarters and visit the camps. Visit many in a rush, and they, at least, break down into persons. Visit a few, more leisurely, and persons break down into people like those you see in the pictures on these pages. Visit just one camp; see its folks crowded like goldfish in a pet-shop globe; inspect their handicrafts; watch their native dances; listen to their haunting old-country songs—or the thin and wistful laughter that sweeps a room when they hear an American Forces Network broadcast that deals with the pleasures of life in the United States or extols the virtues of the American system. Then statistics at last break down into individual human beings. Like the professor you have already met.

But they break down into something else, too: 1,500,000 broken promises.

Camps Are Hotbeds of Future Wars

Here is a place for the holding of a peace conference! Any one of these camps in which the living human debris of war is dumped. In such camps lie more seeds of future wars than in fields where the killed in action are finished with pain and suffering. Because it is not what is done in war, but what is left *undone* after war, that corrodes the years of peace.

Nowadays the wealth, power and voice of the United States are fully extended to convince what's left of Europe that democracy's way of life is better. Yet in these camps you find refugees from the Communist way of life who are:



1. Bereft of human dignity by the sordid nickname which callousness and nonchalance have added to commonplace daily usage in our language—"DPs."

2. Pawed, selected, bargained for, swapped

Mr. Walter Davenport
Editor of Collier's
250 Park Avenue
New York 17, New York

Dear Mr. Davenport:

I have read the article entitled "Unwanted" by W. B. Courtney. It is a fine presentation of the Displaced Persons problem.

We Americans cannot dismiss this topic as one represented by statistics only, we must think of it in terms of human beings. Articles such as yours will most certainly result in a more sympathetic understanding of this situation.

William G. Stratton

William G. Stratton
Congressman at Large

around—in what is virtually a "refined" slave mart.

3. Cared for at a cost of about 30 cents a day each—the price of a hamburger and a cup of coffee in an American drugstore.

4. Listed in, and picked from, a human mail-order catalogue.

5. Shuffled out like cards in resettlement schemes; families often torn apart.

6. Bullied with threats of redeportation to Germany as the price of refusing forced labor contrary to agreements under which they were resettled.

7. Used as a means by some countries to build up dollar credits.

8. Shoved around like pawns in a game of high international politics.

9. Reviled and subtly persecuted—alike by the natives of the late enemy countries in which they are confined and by some of the occupation personnel of the Western armies that "liberated" them.

10. Eager, with fervor akin to religious exaltation, to be useful citizens of free Western society; but slowly being churned into 1,500,000 potential human political time bombs, whose final disillusionment could explode them into its sourest enemies.

The mockery of their situation makes the DPs immensely useful to the propaganda of the nation that hates them most—Russia. The Soviet and satellite radio and press incessantly point to them as evidence of American philosophy that dollars alone are the world's cure-all; that America's wallet is bigger than its reason; that America's mouth is bigger than its mind.

When it became apparent that UNRRA would expire, leaving many loose threads in the universal misery, the United Nations formed an International Refugee Organization to handle the human ravelings. That was in December, 1946.

To date, of the almost 60 United Nations less than one third have shown interest enough in this human salvage problem to join IRO; and not all of these have paid their pledged dues.

Seventy-five per cent of the budget was barely reached. IRO has available for this year $117,000,000, or $78 per DP. The situation is partially saved because many DPs manage supplementary earnings outside the camps; otherwise there wouldn't be even 30 cents a day for their average care.

From the outset the humanitarian mission IRO was hamstrung by military autocracy and stuff international politics. The British forced agreement cutting IRO staff permitted in their to nearly zero; and gave the bulk of jobs pertaining to its work to British soldiers and military ernment officials. Their salaries must be paid IRO (which has nothing to do with selecting workers) to the British government in London dollars. The government, in turn, pays the personnel in occupation currency.

Lack of Tough Leadership a Drawback

IRO, meanwhile, profited neither from UNR few mistakes nor huge successes and experi Working among 50-odd nations is like worki the midst of 50 loaded rifles held by 50 tri happy marksmen. The chief reason for IRO's of momentum is lack of tough leadership; a clination to cry out the scandal of the DPs t forgetful citizens of all countries in fear of step on nationalistic corns.

When DP administration got under way, al pedals were down with respect to Russia. Th viet Union has always insisted that the only DPs in Europe are the 200,000 Spanish Re cans now sheltered in France. For others, rep tion (and not resettlement) was the only thing considered. So—we bribed the hesitant wit day rations and other pressure devices to get to submit to disappearing behind the Iron Cu Even today, IRO's Russian-appeasing constit still insists upon the ugly fiction that its chie is to persuade DPs to go home—although it is known and established that 100 per cent are gees from Communism and that return for could only mean torture and murder.

Over the DP camps hovers the air of a m for what Hugo E. Rogers, Borough Preside Manhattan, has called "refined slave labor." ernments may thumb through IRO's DP logue" like farmers through a Sears Ro annual; their representatives prowl in the can if in department-store bargain basements, the marked-down price tags feature race, size ily status, age, skill, muscles.

IRO workers have cynical military puns fo shopping for humans. "Operation Maidenl to describe a Canadian millowner's picking Polish girls with the stipulation all must be lies and virgins; "Operation Blondie," to Australia's search for blue-eyed Nordics.

Some countries offer to take single men or w but not families. Others will admit only DP ing relatives or friends already citizens wh sponsor and pay for them. Some dip into th in carefully timed and keyed proportions by and skills, to replace native workers they are by emigration.

The score? Three years after "liberation": 115,000 DPs actually resettled. Another 3 "on order" to 15 member nations of IRO United States is the only member nation th ordered—0. Lack of shipping and funds, a terminable wrangles over visas and contract g scant hope the "orders" will be filled soon.

Most Europeans believe that the lion's sh blame for the DPs' continuing homelessne hopelessness falls squarely upon the United This may jar Americans who remember how and how freely we have always given of o tional substance to lighten Europe's trouble know also that America's 46 per cent allotm IRO's budget amounts to 80 per cent of the money the organization has available.

However, our aid is usually given with toc emphasis on *policies* involved, and not enou *peoples* involved. While we have given mo all other nations combined to support DPs, w done less than the smallest and poorest n nation of IRO to give them what they want *hands out* rather than handouts.

To understand the DPs and judge our obligations, if any, toward them, it is necessa to know who and what they are *not*—in ans the misconceptions oftenest expressed to m at home. Namely:

(A) That all, or most, DPs are Jews. Even that is not true, it seems discreditable a American not to be able merely to reto what?" Actually, more than 61 per cent are lics; the second highest sect is Lutheran. Mo be it noted, world Jewry *(Continued on pa*

DEVELOP TENDERNESS AND FLAVOR by braising this way: Brown meat in a little fat. Add a small amount of liquid and seasonings. Cover; cook slowly until meat is tender.

CARVE ONLY NEEDED SLICES. Leftover meat keeps better if unsliced. Keep in the refrigerator, of course. Suggested accompaniments for the roast: Cooked green beans and clove-spiced whole peaches.

SERVE LEFTOVER ROAST in different ways—as meat pie with biscuit top; slices heated in gravy; ground beef in Spanish sauce on rice; sandwiches.

CLEVER HOMEMAKERS keep a file of interesting ways to use cooked meat and plan on several meals from one roast. A ready fund of what-to-do ideas saves time, makes it easy to use every delicious remnant!

MORE BEAUTIFUL THAN MURDER

Continued from page 21

Wouldn't I be content to let well enough alone?"

"Look," he said patiently, "why don't you lay off? What's the percentage in probing any deeper?"

I said, "I figure I'm in the middle of something. Don't ask me what, because I haven't even got a theory. But no girl of Mrs. Kingsley's character is going to do what she did without a pretty strong reason. Somehow I'm mixed up in that reason. There's an angle that's puzzled me ever since I heard her lying on the stand. If she merely wanted to cover someone, she'd have kept her mouth shut. It was easy enough to stay away. But she went voluntarily to Brian Garland and offered to testify. On the other hand, if she knew who killed Nulty, there was plenty of opportunity to say so. So why did she wreck her own reputation—and tie horns on her husband's head?"

I turned to Captain Carnes. I said, "Just for a moment, Captain, put yourself in my place. Try to believe I'm telling the truth—even if only because this play would be idiotic if it weren't the truth. After what I've been through, it seems I'm entitled to a little help."

Carnes said gently, "You intend to try to find the murderer?"

"Yes. But I'm not a detective. I haven't the ability or the authority."

He said, "Maybe if you keep this thing stirred up, it wouldn't be so healthy. If you're telling the truth, maybe the person who killed Nulty wouldn't like you messing around."

"I've thought of that. It's still not the danger I was in until a few minutes ago."

Carnes turned to Walsh and Tremont. "He's got a point. Nobody could be as crazy as he sounds. Maybe it wouldn't do any harm to string along with him."

Marty Walsh turned to me. "How?" he asked.

"The newspapers have been trying to get me to make a statement. So far I haven't. It's my idea to let them know—for publication—that I have no intention of letting the matter drop."

"You'll be leading with your chin, Steve."

I glanced sharply at Marty Walsh. It was the first time he'd used my given name. Maybe that meant something, maybe it meant that he was coming over on my side. I said, "I can't figure any other way out. I'd never have a comfortable minute the way things stand now."

Someone opened the door. A mountainous detective said, "The newspaper boys are here. They know you got Blake. They're asking why."

I said, "I'll tell them."

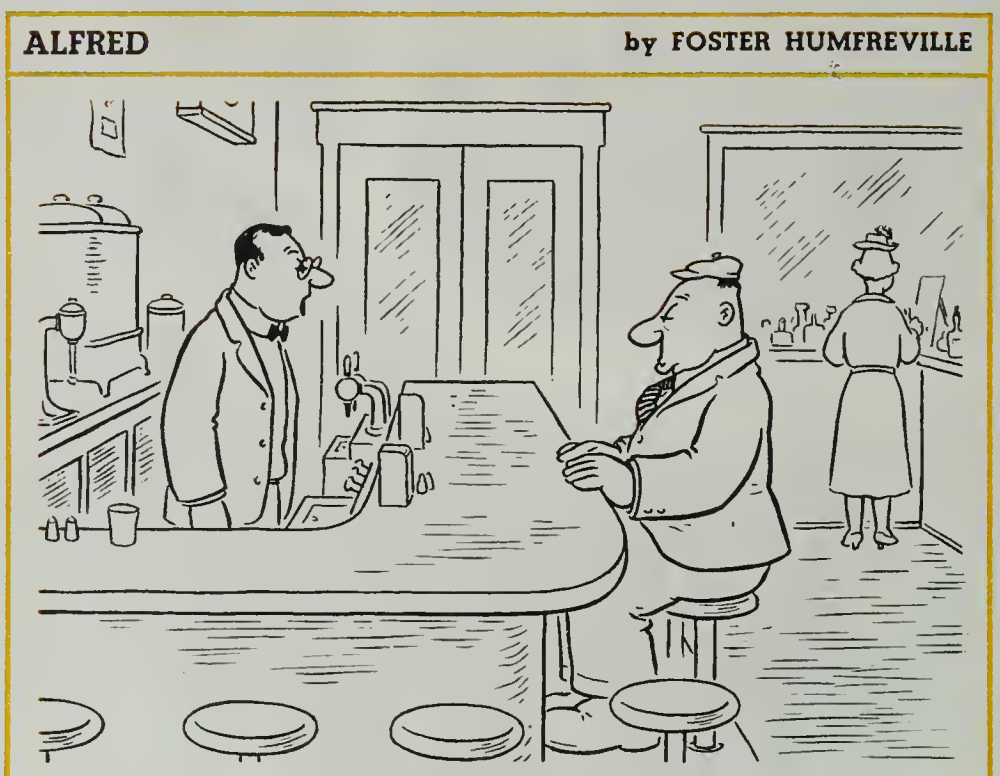
Marty got up. "Better think twice."

"I've thought twice." I walked into the main office. I started telling the reporters what I'd been telling Marty. Behind my back I heard Captain Carnes say something to Walsh and Tremont.

"I know just how he feels," said Carnes. "I'd suggest that you fellows play along with him. I got a hunch he might be in a pretty tough spot."

I PICKED up a taxi on First Street and gave the driver the name and address of my apartment building in Hollywood. My taxi made good time and I added a fifty-cent tip to the fare.

The lobby of the Collins was small and neat, the sort of lobby you'd expect to find in a building which was lived in by a young aeronautical engineer who could afford something better, but hadn't succeeded in finding it. Off to the left there was an alcove containing a cabinet which was cut up into little boxes, one for each apartment. That was where the mail was put twice a day. There were two chairs in the lobby and one in the alcove. I went in to see whether there was anything in my box and someone got up from the chair.



Mrs. Patricia Maxwell Kingsley said, "I've been waiting a long time."

I stared at her. She still looked like a lady. She didn't look like someone who would publicly proclaim that she was having an affair with me or with anybody else.

She was still wearing the gray and maroon outfit which she had worn on the witness stand. She was smiling, but with her lips only—not with her eyes. She was nervous and ill at ease.

I took two envelopes out of my mailbox and turned back to her. I said, "Well . . . ?" and left it dangling. I wasn't cordial.

She said, slowly, "You don't have to make it more difficult than it is."

"That depends," I said, "on why you're here."

Obviously, she'd been expecting more co-operation. She said, "It's important that I talk to you. Alone. Would it be possible to go to your apartment?"

I said it was possible. Then I said, "Why didn't you let yourself in? You testified that you've got a key."

"Oh, that!" She gave me a tiny little smile. "I'm afraid I lost it."

Studying her, the situation made even less sense than it had in court. She wasn't someone to be brushed off; she wasn't a person to whom it was easy to be discourteous.

I did some fast thinking. My mind had been trained to work logically. I had made a statement to the press. I had announced that I wanted to find out what was behind all this. Well, here was my chance. Why not talk to the girl?

We walked upstairs and I unlocked the door of my apartment. I had a fair-sized living room with a nice view, a tiny bedroom, a little kitchen complete with dinette, and a tiled bath. She seated herself in an easy chair and watched me walk around, opening windows to rid the place of that musty odor which accumulates along with dust and disuse.

I said, "I'm fixing myself a drink. Will you have one?"

She said, "Thanks." I went into the kitchen and wrestled with a refrigerator which hadn't been defrosted for much too long. That's the trouble with being in jail: You lose out on your housework. I fixed two Scotch and sodas, putting a double dose in mine. She took the glass I handed her and sipped it gratefully. I sat down, gave her a cigarette, and took one myself. I held a match for her. Then I waited. But not long.

She said, "You didn't seem too surprised to find me downstairs."

I shrugged. "I've become hardened to surprises today."

"I came, Mr. Blake, because I felt there would be things we should discuss . . ."

This wasn't the way it should be. Not at all. I felt a sudden unreasoning surge of anger. I said, "Isn't that 'Mister' a trifle formal from one's mistress?"

She said steadily, "Must you be brutal?"

"I never used to be. What happened in the last couple of months may have changed me. But one thing has remained the same. I've never enjoyed being pushed around. I've never liked things I didn't understand. The position I'm in now is both awkward and ridiculous."

"How so? You're clear of a murder charge. You could admit killing Jeff Nulty and they couldn't touch you."

"I'm afraid that doesn't enthuse me much, Mrs. Kingsley—or should it be 'Pat'? Up to the time you testified for me, things were running by the book. The police were wrong about me, but they were doing their duty. That was something I understood, whether or not I liked it. It could turn out well or turn out badly. What I don't understand is you."

"That's what I'm here for: to explain."

"All right." I blew a cloud of smoke at the ceiling. "I don't know why I'm telling you this, except perhaps I feel you have a right to know. I'm in the middle of something I don't like. I have no intention of staying there."

"What does that mean?"

"If possible, I'm going to find out who killed Jeff Nulty and why. You're in it somewhere. In the course of my probing, you might get hurt."

She took her time about answering. Then she said, "So might you."

"Is that a threat?"

"No. You might call it a suggestion. Why not let well enough alone, Steve?"

"Because it isn't well enough. I don't feel that I've been acquitted. I feel I've been turned loose under the Scotch verdict, 'Not proven.' Half people who've been reading about case still think I'm guilty."

She said, "Arriving at the truth wrong way doesn't make it any less truth, does it?"

I got up and walked to the windo could see all the garish neon glitte Hollywood Boulevard, hear the roa impatient traffic. Off to the right I c see the austere architectural beaut the Casa Linda Apartments stretc upward into the night. That was w Jeff Nulty had been murdered. By so one.

UNFINISHED business. A h stubborn streak in me made me v to know. It was a deeply personal th something you couldn't expect ano person to understand. I turned and f a question at my visitor, "Why did come here?"

She hesitated. "I thought you migh willing to help."

"How?"

"Testifying as I did wasn't easy. F lot of reasons. When I went on the st I took a calculated risk. I committed jury. By doing that, I exposed mysel the possibility of a term in the s prison of from one to fourteen years

I shook my head. "Somebody has l giving you false ideas."

"What do you mean?"

"The perjury laws are written into penal code to frighten people—to h them from doing what you have done. But they don't often prosecute perjury."

"They would in this case."

"Why?"

"Because they believe you're gu If they could prove that by perjuring self I had caused a guilty man to be quitted they'd get sore. They'd throw book at me."

I studied her. She was frightene could understand that. I'd been pr badly frightened myself recently.

I still didn't believe that they'd pr cute her for what she'd done, but I r ized that she believed it. That was important thing. I tried to convince that she had nothing to fear, but my guments didn't get me to first base. was scared all the way through. said, "You see, I've got a guilty c science. I'm not basically a coward, I'm afraid of this. Your assurance it isn't customary to prosecute for jury doesn't make me any less fri ened."

I saw her point, all right, even tho I disagreed with her premise. It wa unnatural that even the remote poss ity of a fourteen-year stretch in the p tentiary would frighten her.

But there were other factors to be sidered. I asked abruptly, "Do you t I'm guilty?"

"I know you're not."

She made the statement simply, w out emphasis or adornment. But it carried a wallop. I asked, "How do know?"

"I can't answer that."

"You mean you won't?"

"Perhaps."

"Who are you covering for?"

"I haven't said I was protecting one."

"Did you kill Nulty?"

"No."

"Then you must know who You're too sure about everything. shook my head. "You know, even doesn't make sense. If you were me trying to protect a person you knew guilty, you could have stayed on side lines. If I'd been convicted, the

son you were protecting would have been safe."

"I hoped you'd see that point."

"Sure, I see it. But that doesn't mean I understand. Your testimony got me off, but it didn't solve anything. Doesn't that make you understand why I can't drop it? What's this thing I'm in the middle of? What's the next move, and who makes it?"

She said, "I've never met anyone just like you, Steve. I suppose there *is* such a thing as compulsion. So I won't press the point. But I'm still going to ask the favor I came here to ask."

"Which is . . . ?"

"I'm not as brave—or as foolhardy—as you are. I loathed what I had to do on the stand. I'd hate even more being prosecuted for perjury. I'd like to give the impression that I had told the truth."

"That's reasonable enough. But where do I fit?"

She seemed to have difficulty putting it into words. "I wish we could act as we would if my story had been true. For a while at least I'd like to be seen in public with you."

THAT set me back on my heels. I said, "You and me? Playing the role of lovebirds?"

"I didn't put it quite that strongly."

"Suppose I did what you ask. Do you understand clearly that it wouldn't put me on your team? If I find the right answer, I'm turning it over to the police."

"That's a chance I'll have to take."

"There's one other chance. What about your husband?"

She said quietly, "I don't think we need worry about Rex."

"If he wanted to make trouble, he'd have a lot of unwritten law behind him."

"He won't make trouble."

"Do you intend to leave him?"

"Not now. No."

"Will he kick you out?"

"No."

She was sure of herself. Too sure.

I thought as hard as I could. She let me do it. Just sat there, and watched me. For some reason, my answer was important.

Then a thought came to me. It was simple, it was logical, and—in view of the little I knew—it seemed to be the only answer.

This girl's husband—Rex Kingsley—must have killed Jeff Nulty. She knew it. Being her husband, she couldn't quite bring herself to the point of turning him over to the police, but she also was too fine and too decent to let an innocent man be convicted.

It had to be that way. She looked like the sort of girl who could make a heroic gesture if she were pressed hard enough. And it explained why she wasn't afraid her husband would cause trouble, why she was so sure he wouldn't throw her out.

I had wanted to learn things. Well, I was learning them. My theory looked pretty neat. I thought Lieutenant Marty Walsh would see it that way, too.

I said, "Going around publicly with me won't help your reputation much."

"It won't be hurt, either. After today, it couldn't be."

"How do we start?"

"We might dine at the Club Casa Linda. Soon."

I blinked. She was throwing 'em fast. "Isn't your husband the manager there now?"

"Yes."

"Lovely setup. Family dinner. You, me and the third inglorious member of the trio."

"It'll accomplish what I want in the shortest time."

I took time out to fix a couple more drinks. She looked like she needed one, and I know I did. I had more time for thinking while I was in the kitchen.

Right or wrong, her position was understandable, her request reasonable. She had gone to bat for me for reasons of her own, reasons which she wasn't divulging. But the point remained that because of what she'd done, I was a free man—free to go and come as I pleased, free to seek my own peace of mind in whatever way I chose. For that, it was only natural that I should feel a certain degree of gratitude.

The setup was out of line, so far out as to be intriguing. I was honest enough to admit that it was no less intriguing by reason of the fact that she was young and beautiful. Forgetting the perjury element entirely, her position was not an enviable one. It would be even less pleasant if the man who had been publicly declared to be her lover should abandon her summarily after accepting the courageous sacrifice of her reputation.

I questioned myself. I inquired of me whether I'd been honest in saying I intended to follow through regardless, or whether I'd merely blown my top too impulsively. I could still back out. But if I *had* been sincere, I couldn't ask a better chance.

I handed her a drink. I raised my glass. I said, "Here's to the Great Lovers."

"Your answer is yes?"

I nodded. I started to sip my drink, then put it down abruptly.

She had placed her glass on the little end table. Quite suddenly, her poise had vanished. She covered her face with her hands. She was crying.

I liked her better this way. I liked her a lot better.

THERE'S one thing about having been acquitted of a murder charge—it puts you and your friends in a silly position. They want to say something but they can't figure what. Especially when a rich, beautiful girl—who happens to be another man's wife—is involved.

I found out all about that at the plant Friday. I went into the designing department, and everything looked about as I had left it the day before Jeff Nulty was killed. The same faces, the same routine, the same scientific ideas. The boys all looked me over and said, "Hiya, keed!" and other bright things. All eyes were full of unasked questions.

Word must have gotten around that I was there because lots of people drifted into the room who ordinarily wouldn't have come in. Even the Old Man showed up. He walked over to me and said, "Nice going, old man," without explaining just what he meant. He said he was glad to have me back, and I said I was happy to be back. That kind of stuff. It was okay coming from the Old Man because it was his way of reassuring me about my job. I'm fond of my work. I wanted to go on with it. Besides, if they'd pitched me out on my ear, I wondered what my references would be like: "Mr. Blake is an excellent aeronautical engineer except that he is slightly addicted to murder and married women."...

I wasn't supposed to work Saturday, but I had a lot of catching up to do. I had bathed, shaved, dressed and had coffee, and was about to shove off for the plant, when the telephone rang. I picked up the receiver and said, "Hello?"

A woman's voice said, "Mr. Blake?" It was quite a voice. Warm and vibrant. I said, "This is Blake."

"I'm Wilma Mason, Wade Ramsay's secretary. I'm calling for Mr. Ramsay. He wonders whether it would be convenient for you to drop by his office at the Casa Linda this morning about eleven."

"Anything special?"

"Oh, yes. I think you'll like it."

I said I'd be there. Miss Mason—provided it was "Miss"—sounded interesting. Also, there were possibilities tied up in a call from Wade Ramsay.

Ramsay was a nice guy. He had inherited the Casa Linda from his father. He wasn't in my league. He was older and he had a barrel of money. But I had known him for several years, and I'd been working on him in the effort to get an apartment in his building. They were the nicest apartments in Hollywood. Not the most expensive, but the nicest. Realizing that apartments are best obtained by pitching curves, I'd gone out of my way to be cordial to Wade Ramsay. I'd managed to establish what passed for friendship. I had invited him to my cocktail party on October 4th. That had been a good idea when I thought of it, but it hadn't worked out so well. He had brought Jeff Nulty with him. Also Pat Kingsley and her husband.

I drove to the Casa Linda. It was a truly beautiful building in the Hollywood area of Los Angeles, just east of the county line. It was at the corner of Sunset and Calzada. It was all white and plate-glass and chromium. It was twelve stories high, and from almost any apartment, except those right on the front, you could get a breath-taking view of the city.

On the street level, an awning stretched from doorway to curb. On the awning was a sign which said "Club Casa Linda." A neon sign facing Sunset verified the statement.

The lobby itself was immaculate and chaste. There were the usual sofas chairs and smoking stands and ta and lamps: everything expensive, ev thing simple, everything in the best t There was a desk, backed by a mail grille. There was a clerk behind desk. I said I had an appointment Mr. Ramsay, and the clerk told m walk right up to the office, which wa the mezzanine, just over the club.

The stairway was located at the r of the two elevators. I came out balcony which contained a couple writing tables and a few chairs. T was a hallway to my left, and sev doors. Sticking out in the hall though not intrusively, was a little which said "Office." I went there knocked on the panel which was ma with the word "Entrance." The s sultry voice I'd heard over the teleph told me to come in.

I paid little attention to the o itself; to its big desk and little c its swivel chair and two club chairs two storage closets, its row of filing inets. Those things were all there, a saw them; but when Miss Wilma M was in the picture, the average wasn't supposed to take inventory o furnishings.

She was probably on the near sid thirty, though not by much. She radiantly blond, with lots of light c colored hair which looked as thou had grown that way and had not subjected to retouching. There was than a hint of red in it, too. She deep violet eyes, a dimple and a ma as friendly as a Boston bull terrier.

MY FIRST thought was compli tary to Wade Ramsay. If this his secretary, I'd better revise my opi of him. Here was the sort of girl e wife thinks her husband prefers to ploy . . . except that Ramsay was si But I had never regarded him as the He was about forty-one, was natu stocky and had the beginnings paunch; he was also rather fussy and tidious, and definitely not the wolf ty figured maybe I was doing him injustice.

I said, "Miss Mason . . . ?"

"You're Mr. Blake?"

"Yes."

"You're early. Mr. Ramsay is tie Won't you have a seat?"

She motioned me to a chair which strategically placed so that I coul the half of her which I hadn't see fore. It exceeded expectations.

She turned her dimple in my direc and said, "You seem surprised."

"I am. I'm sorry I never visited l say in his office before."

That seemed to amuse her. She "I think you're going to like this."

"You mean I'm getting an apart here?"

"Well, I suppose Mr. Ramsay w rather tell you . . ."

I said, "Don't raise false hopes, Mason—please."

"I'm sure I'm not. And my fr call me Rusty."

I said, "There's hardly any red in hair."

"There's more than you think." tapped the ash off the end of her rette. Then she looked straight a "You know," she said, "I think y pretty wonderful."

"Huh?"

"What you did. The other day."

"Oh, *that!*"

"I probably shouldn't have ment it . . ."

"Why not? Everybody else has."

"Well, it's so personal. Of course seen lots of pictures of you . . . but didn't do you justice. Now I under Mrs. Kingsley better."

This was coming fast. Too fast. saw I was startled and said, qu "I shouldn't have said that, should mean it, anyway. There are so few

"DARLING, WE'RE RICH!"

"Don... you got your raise?"

"Sure. But I'm talking about something even better."

"What do you mean?"

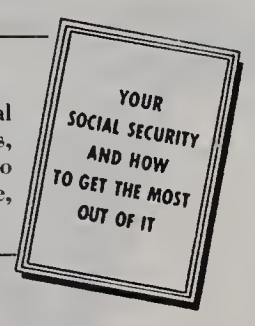
"I mean I've done something that makes me feel like a millionaire, because it puts a big chunk of our money worries behind us. Now you and the children can always count on a steady income, even if I'm not around. And what's more, if all goes well, you and I will be able to retire on a comfortable income some day."

"Don, are you trying to tell me that you've accepted that Mutual Life Insured Income program we heard about?"

"That's right!"

"Well, I'm not surprised. I knew you wouldn't pass up an opportunity like that."

* * *



Mutual Life's Insured Income Service is the sensible and economical way to provide complete security for yourself and your family, because it shows you how to get the most value out of your Social Security and your present life insurance.

Plan your future now, by consulting the Mutual Life career Field Underwriter in your community.

like you nowadays. A girl gets to think chivalry died out long ago."

I was embarrassed. I said, "You'd be disappointed if things weren't really that way, wouldn't you?"

"A hundred people could tell me, and I'd never believe 'em. I guess I know a real gentleman when I see one."

The smile she gave me was full of invitation. "I hope things work out all right for you, Mr. Blake. And I don't care if you think I'm forward, I'm going to say it: If you move in here, I hope you let me see something of you. I think you're swell."

"Thanks, Rusty . . ." I didn't know how to go on. I didn't have to.

The door opened. Ramsay was personally conducting his visitor out of the office. He said, "Right with you, Steve."

He fairly shoved the man through the door and closed it after him. Then he came across the room and shook hands. He said, "Come on in, Steve."

I followed him into the room marked "Private." It wasn't as large as the outer office, but it was warmer and more relaxing. I took a chair and sat facing him, but my mind was elsewhere. I looked at the door through which we had just come and said, "Wow!"

He chuckled. "Rusty? She been working on you?"

"I don't know. But whatever it was, I liked it."

Ramsay said, "She's nice. And I mean exactly that. Enthusiastic, intelligent and friendly."

"How friendly?"

"Not that way. She's been with me for two years, and believe me, she's the most efficient secretary I ever had."

I said, "She was certainly giving me the business. Wants to see more of me. Thinks I'm chivalrous."

He said, "That's your business, Steve. And the thing I wanted to see you about is your business, too. It'll require a bit of thinking."

I waited.

"I've had you at the head of the tenant list for some time," he went on. "Apartment 7-B has just become vacant. One bedroom, kitchen and dinette, and bath. You can have it if you want."

"What makes you think I wouldn't?"

RAMSAY regarded me steadily, an older man who was willing to explain something, but who avoided giving advice. "You shouldn't jump too quickly, Steve. Things are different."

"I know. Jeff Nulty was killed here. The Kingsleys live here."

"That's the idea. After what Pat Kingsley testified—well, there'd be talk if you moved in."

"There's talk anyway."

"You'd probably run into them occasionally." He leaned forward earnestly. "I'll be frank with you, Steve. I'd hate to have anything else unpleasant happen here. There's always that chance if Rex Kingsley should decide that he is an outraged husband."

I said, "But you didn't have to tell me about the vacancy, did you?"

"No. Except it seemed fair. I know you, Steve. I know you're a gentleman. That you wouldn't provoke trouble."

"You're a little wrong on that last count, Wade. I'll probably be seeing Pat occasionally from now on. Publicly. Perhaps right downstairs in the Club Casa Linda."

"You're not serious!"

"Yes, I am. What damage might be done has been done already. If we ever had a secret, it's not secret any more."

He said, "There's something about this I don't understand."

"There are a lot more things that I don't understand. I told the truth in court. I stated afterward that I wasn't going to drop it there."

"Why not let well enough alone?"

"I don't believe I could. No matter what I did, or didn't do, I believe I'll hear more of this. Maybe someday I'll get answer."

He shrugged. "If you intend to be with Pat—here—I don't see what difference it would make whether you here or not. But I still say you shou jump too fast."

"You're right, of course. Can hold your offer open for twenty hours?"

"Certainly." He looked at me ously. "You've got something in r haven't you?"

"Yes." I told him briefly abou talk with Lieutenant Marty Walsh d town at Homicide. "I'd like to t over with him."

Ramsay got up, which was a sign me to do the same thing. He said, "W ever you do, Steve—I'm wishing luck. But watch out for Rex King

"He's dangerous?"

"Not basically. But he's a prime He's acutely sensitive to public opi Being a husband, he could get the that he was being shoved too hard. *that* would make him dangerous."

THAT afternoon I saw Marty Wa told him I had a chance to mov the Casa Linda, and I wanted his on it. He took his time about answ and then stated emphatically that I screwball.

"What's in it for you?" he asked

"A nice apartment—maybe a c to learn something. Jeff Nulty was there. The Kingsleys live there. If thing else is in the cards, it's liab break there."

"You ain't scared?"

"I scare as easily as anybody perhaps easier. But there are some t you do whether you're scared or no

"Yes. But you're leading with chin. You're inviting trouble. Y flushing the covey, provided there i covey."

I smiled. "Of which you're sti quite sure."

"Something like that. Except it d make sense any other way." He s chuckling. "Cozy," he said. "Yo the gal friend and her husband."

"I'm not particularly worried Kingsley. If he'd been the sort to d thing, he'd have done it before this

"You haven't shoved yourself a till now. Maybe that would be the he wouldn't like." He shook his he though reluctantly becoming reco to something. "In my work you lots of guys off the beam. They g gles; maybe good ones, maybe bad. I'll say for yours, it's different. ahead. Move in. It's your neck."

I got up and started for the d said, "Thanks, Marty. Come up a me sometime."

"You ain't kidding, Steve. I around. Maybe just socially."

Darkness was settling over th when I went back to the Casa Wade Ramsay wasn't in. Rusty was. She gave me a welcome of a bomb quality, and said Mr. Ramsa gone to play golf—his regular Sat afternoon foursome, but that he'd any minute—or maybe not until later. She said she'd call me or I have dinner downstairs and cat show, and if she were with me, she check every so often to see whether say had returned.

I got the idea. I said I hated alone and asked whether she'd c join me. She would, and did.

It was about eight-thirty when tered the club. Rusty knew everyb almost everybody—and the few who didn't already know her s eager to remedy that oversight. Sh ded with the dapper headwaiter, she called Mario, and we found ou at a ringside table. "You've se show?" she asked.

I said I probably hadn't, unless the same one they'd had before

said, "There aren't many men like
Steve. I'm glad you're moving in
. Maybe you'll take pity on a lonely
de and look in on me occasionally."
said maybe I would. I started to say
thing else, but we were interrupted.
Someone bore down on us and banged me on the shoulder. It was Brian Garland, my friend and lawyer. He'd had maybe one too many. He wasn't drunk, but he wasn't feeling any pain, either. He said, "Freedom—it's wonderful!"

I introduced him to Rusty and invited him to pull up a chair. He was genial and expansive. He said to Rusty, "You know about this guy?"

"Oh, yes."

"He's lucky. He gets the smartest lawyer in the world—that's me. Then he double-crosses him. And he still goes free. That makes one of us something. I can't figure what."

"Steve is a wonderful person," stated Rusty; "the most wonderful man I've ever met."

I saw a question in Brian's eyes. He wasn't as far gone as he seemed. He looked from Rusty to me and back again.

I told him about getting an apartment here in the Casa Linda. About that time Rusty said she'd give the penthouse a buzz to see whether Wade Ramsay had come in yet.

BRIAN sobered up the minute she swayed across the room. He looked at me sharply and asked, "What gives?"

"With her?"

"Yes. You're a charming fellow, Steve. You have good looks and wit and strength of character . . . but not that much of any of 'em. Why is she making a pitch for you?"

"So you caught it?"

"Hell, a blind man couldn't miss. What's the gimmick? And who is she?"

"Wade Ramsay's secretary. Her attitude—what we might call her excessive cordiality—started the moment she met me."

He said, "That's where I've seen her. Around here." He drummed on the table with his fingers and looked worried. He said, "I wonder how well she knew Jeff Nulty? Or how friendly she is with Rex Kingsley?"

"I'd like to find out," I said. "I've got a hunch she isn't doing all this for free."

"Check." He spoke seriously: "Maybe you're smart to move into the hornets' nest, Steve. I don't think so, but I know you too well to argue when your mind's made up. But you might watch your step."

I was just promising I would when Rusty returned to say that she hadn't gotten any answer from the penthouse. I ordered liqueurs for Rusty and myself and a highball for Brian. I wasn't worried about his sobriety any more; he was strictly among those present.

• The orchestra returned to the rostrum after a brief rest. The lights went down,

I've discovered the longer, finer cigarette
PALL MALL

PALL MALLS are *good* to look at—*good* to feel—*good* to taste and *good* to smoke.

PALL MALL's greater length of traditionally fine tobacco filters the smoke of this *longer, finer* cigarette—gives you that smoothness, mildness and satisfaction that no other cigarette offers you.

PALL MALL—the *longer, finer* cigarette in the distinguished red package.

The Biggest Box on the shelf

Dogs Go For Kellogg's GRO-PUP

a spotlight made a bright circle in the middle of the floor. The master of ceremonies walked out.

This wasn't the first time I'd seen Rex Kingsley, but it was the first time I'd ever noticed him. He came out into the spotlight, walking with a slight limp, and waited patiently—happily even—for complete silence.

Rex Kingsley was a tall young man. He was lithe and dark and handsome. He was dressed in immaculate and conservative dinner clothes, and when he smiled he showed a lot of shiny white teeth.

He wasn't more than twenty-eight. He had been one of the best tap dancers in the world. He'd had one shot at a big picture and hadn't done badly. Some enthusiasts had pegged him as a second Fred Astaire. Now—as Rusty explained to me in a whisper—he was all washed up. He had injured his foot in an automobile accident, and that had ended his career. He'd been a mediocre actor, just good enough to get by on the perfection of his dancing. Take the dancing away from him and he had nothing left except what he was doing—running a night club and filling in as master of ceremonies. I felt sorry for him. I wondered what it must feel like to be slapped off the top of the ladder, to lose the only thing that made you different from any Joe Blow in the world.

I felt sorry for him, but I didn't like him. The fact that he was oddly involved in my life right now had nothing to do with that. From the minute he started announcing the show certain things became obvious. In show business they'd call it lack of personality . . . the inability to establish that necessary subtle contact which flows between first-rate performers and audience.

I tried to avoid analyzing. I kept my thoughts to myself. Anything I might say would sound wrong. Brian Garland said softly, "If the guy can't dance, he ought to stay off the floor. As an m.c., he's repulsive."

I asked why he thought so.

"Ego," he snapped. "It sticks out all over him. Smugness. An extra-special brand of conceit."

REX KINGSLEY took a long time to say very little. Then he made way for the first act, which consisted of two comely young ladies with fresh, youthful figures. They did amazing acrobatic feats. Or maybe the stunts were only amazing because the girls didn't look as though they'd be able to do them.

Then came a group of three men. The waiters trundled out a tiny piano, and the trio started a zany act, kidding radio. It was clever and funny. It drew a lot of applause.

Then there was another dose of Rex Kingsley. He made quite a talk about the Cuban sensation who thus far had appeared exclusively at the Club Casa Linda, and who seemed destined for great things. He gave Conchita such a build-up that he made it tough for her to live up to it.

The crowd quieted. You could feel its warmth and its welcome. There probably weren't a dozen people in the room who hadn't caught her act before.

She looked tinier than I remembered her. She was the friendliest, brightest, most dynamic little trick I'd seen in years. She sang with an eager breathlessness, with just enough shyness and self-consciousnes to make the crowd love her. Her Spanish was nice; her English was charming.

And then she danced. Alone. Vince Mabry's band furnished a marvelous background.

Conchita was fire when she danced. The shyness was gone. She was the personification of uninhibited youth. She swayed and whirled and spun. She finished with mad, savage gyrations of her young body, and then vanished. When she came back into the thunder o plause, she was again the shy, a childlike, demure youngster who surprised and grateful.

The lights went on. The show over. Rusty said, "I'll bring her ov soon as she's had a chance to ch You'll like her, Steve."

Brian Garland caught it. He "More and more I understand les less."

That made Brian and myself all

WHEN some person stares enough at the back of your you can feel it. You get uncomfor you fidget, then you look around. find a pair of eyes boring into maybe friendly, maybe hostile, n curious. The starer usually looks and you look away and you both embarrassed. But this man didn't away. He didn't seem embarrasse didn't seem to give three hoots wh or not I knew he was staring at me

He was sitting alone at a table was up against the wall. He was a lad, perhaps thirty-four years old weighing about one-eighty. His ha a nondescript shade of light brow was brushed carefully over an encr ing baldness. The eyes which steadily into mine were of some color: blue or gray.

There was nothing insolent in the and—oddly enough—nothing th could peg as simple curiosity. He look like the curious type. He look like a man who thought it wo fun to stare at another fellow ju cause he'd recently been acquitt murder.

He was dressed in a conservativ business suit, gray shirt and a gr that was flecked with red. He rugged face and a square jaw. We at each other a long time. It was looked away.

Rusty Mason reappeared with chita in tow. Patrons turned to and a few bright remarks were in their direction.

They were in startling contrast t other. Rusty was a pretty good-siz but until this moment I hadn't th of her as tall. I did now. She to over Conchita like Pikes Peak ov ant hill; she was radiantly blond Conchita was dark as midnight. came straight to our table and Bria I stood up. Rusty did the honors:

"Conchita, may I present Mr. land and Mr. Blake? Boys, this is ita Conchita Montero."

Conchita said she was delight meet us. She seated herself and, swer to my invitation, said yes, she to have a drink: an orange juice.

Little Miss Montero had a pers that bubbled. There was nothing cial about it. I had an idea that sh always this way: bright, eager, fr and astonishingly naïve. She smi me and said, "I know all about fro Señor Blake. I see your picture time in the newspaper."

"And I've seen yours. I enjoye act."

"Poof!" She gave an expressive "Is nothing. Only I sing and I d

Rusty and Brian seemed to be it off nicely. The waiter brough drinks, and I raised my glass.

"To Havana," I said.

Her eyes sparked. "You have b Cuba, Meester Blake?"

"Yes. It's a wonderful country

"Ah, *si.* So wonderful. So much tiful weather! So easy the life and s cult to earn the money."

rumba. Conchita said, "You dance, Steve?"

"That? I'm not awfully good at it."

"I show you. Come!" She got up and waited, vivid, vibrant, eager. I put my right hand on her slender waist, placed my left palm against her right one, and grinned down into her laughing eyes.

"I'll try to remember," I said. "How'm I doing?"

She said something in Spanish. It sounded nice. I caught a glimpse of Brian and Rusty. They were laughing about something and looking at us. Rusty made a little circle of her thumb and forefinger. Then she wrinkled her nose as though to inform me that she was jealous.

It was all over my head. I was being snowed under, and I didn't know why. I hadn't been taking magic pills or overcharging myself with vitamins; I wore the same homely mug that had been mine since birth; I hadn't acquired any bright line of repartee, and my personality was just as dull as it always had been.

But in an incredibly short space of time, three women had barged into my life. Pat Kingsley had appeared from nowhere to clear me of a murder charge. A gorgeous blonde named Rusty Mason had openly declared herself interested in me. And now this little Conchita Montero was making a much too obvious play.

There was only one possible answer: None of it was spontaneous; all of it was calculated.

I quit worrying and devoted myself to the rumba. Conchita bubbled with enthusiasm. She continued to deluge me with compliments, and I made a gallant effort to pay her back in kind.

If you dance the rumba with anything approaching correctness, you don't travel very far. We'd got only halfway around the floor when again I felt someone staring at me. This time I knew where to look. It was the man in gray, the man with the sparse, sandy hair. His gaze was still unwavering, unyielding. I still didn't like it. And other things were about to happen that I disliked even more.

THERE were two main entrances to the Club Casa Linda, one from the street and the other through the lobby. I saw Mario bustling toward the latter.

Wade Ramsay was standing there. With him was a girl, a very lovely girl with brown hair and hazel eyes—a girl who was wearing a smart suit and no hat. A girl named Patricia Maxwell Kingsley.

I was sure that I had been recognized and commented upon by some of the guests. I was also sure that not many of them would fail to recognize Pat Kingsley.

I watched what was going on near the entrance. Pat Kingsley was apparently insisting on something, and Wade Ramsay was shaking his head. Whatever the argument, Pat apparently won just as the rumba music stopped abruptly and the floor commenced to clear. By the time I got Conchita back to our table, Ramsay and Pat Kingsley were there.

Over Pat's shoulder, Ramsay arched his eyebrows, shook his head and shrugged. That was to tell me that he would have preferred to avoid this, but that Pat had insisted. He looked ill at ease, and I didn't blame him. I felt that way myself.

But Pat didn't share my embarrassment. She smiled and held out her hand. "Steve!" she said. "What a surprise!"

I flashed a quick glance at my gentleman in gray. He was still staring. But he seemed surprised, too. Everybody was surprised. That made everything just ducky.

Brian Garland said, "All we need to make this perfect is the judge and jury."

The comment sounded funnier than it was. Mario shoved two more chairs up

Exclusive Du Pont formula makes car polishing quick and easy!

to the table, and Ramsay and Pat seated themselves. Curious conversation was buzzing all around us. Well, I had asked for it, and I was getting it—though perhaps sooner, and in a larger dose, than I had anticipated.

Wade Ramsay said, "I got a message that you were down here, Steve. The telephone operator said you wanted to see me. I met Mrs. Kingsley in the lobby."

"I forced myself on him," said Pat. "It was quite a job. And he protested violently when I insisted that he bring me over to your table."

I said, "That's understandable."

She looked at me quickly, and frowned just a little. I started telling Ramsay that I was taking the apartment and asking when I could move in.

Conchita interrupted: "You have the apartment in thees place now, Steve?"

"Yes."

"Oh!" she said. "How very . . ." she groped for the word. "How very convenient!"

Rusty was in the act of sipping her drink when Conchita crashed through with that dilly. She swallowed it the wrong way, and choked. We worked her over, and we all laughed. It was funny, really. The only person who didn't think it was funny was Conchita herself—and she didn't know what she had said.

When we had quieted down, Pat said, "Do we dance, Steve?"

I shook my head and said that I was tired. But she got up and stood there waiting. I started dancing with her; but I was angry. I said, "Aren't you playing this a bit too strong, Pat?"

She looked up at me, her eyes troubled. "Ever go swimming in cold water, Steve? A quick plunge is the best."

"But not so deep."

"I understood you wanted it this way. Or have you decided you were wrong?"

I said, "I'm not accustomed to the spotlight, not even after the trial."

She said, "It wasn't very sporting of me to put Mr. Ramsay right in the middle, was it?"

"No."

"But I didn't have quite enough courage to do it alone. And I did want to make my first public appearance with you as soon as possible."

"You've done it," I said.

"You're angry?"

"No. Puzzled."

"About what?"

I didn't answer. What I was thinking right then was something I didn't care to put into words.

I'd been thinking that there might be another answer to Pat Kingsley's inexplicable attitude. My theory about covering for her husband might be sound. But there was an additional idea that kept intruding.

How did I know that Pat herself had not killed Jeff Nulty? I didn't know anything about motive or opportunity, but those were things I might find out. But suppose she had?

It would hit her pretty hard to see an innocent man take the rap for a killing she had done. And if she had murdered Jeff Nulty, her testimony wouldn't assay quite so shockingly. Or would it?

She stopped dancing. She said, "Let's go back to the table. I won't bother you any more tonight."

THE next several days I found that Pat Kingsley was constantly in my thoughts. For a while I figured it was because of the spectacular way she had entered my life. But by now I'd accustomed myself to that, and I thought of her more, rather than less.

It wasn't that she was pretty. In Hollywood pretty girls are a dime a dozen. Maybe curiosity played a large part in it, but I was beginning to suspect that the ancient and ubiquitous biological urge wasn't entirely missing from my make-up.

Up to midnight Tuesday I did my packing. Wednesday a huge van appeared and my stuff was carted out, leaving the old homestead looking naked and forlorn.

They'd done a swift and pleasant redecorating job at the Casa Linda. My bedroom didn't look like a bedroom. The bed folded away into the wall. When that happened, the apartment assumed a respectable look.

The movers helped with the unpacking, and a house-service maid showed up and swept in the corners and did a bit of dusting. A boy brought me a big vase of masculine-looking white chrysanthemums with a card saying, "With the compliments of the management." Down in the corner was written, in neat, feminine script, "And from Rusty."

After a little, Rusty herself appeared. For whatever reason, she was still pretending that she thought I was something extra-special. She asked whether everything was as I wanted it, whether I

"At 90 cents a pound you can't afford to get tired of it!"

COLLIER'S DON TOBIN

was comfortable, and she informed me that I was welcome. She also mentioned that in case I lost my key, she had an extra one in the office. "And if you're nice to me, I'll use it sometime."

"For what?"

"To haunt you. Do you like to be haunted?"

"By gorgeous blondes? There's nothing I'd like better."

She gave me a lingering, promising look. "You might be surprised," she said.

I informed Rusty that I needed a shave, a shower and a change of linen. She took the hint and shoved off.

An hour later I had done a bit of straightening up and had relaxed with a cigarette and a small drink. I discovered that I was tired, and I decided to eat downstairs. Alone. I could be through before the show went on. I'd come back upstairs and lose myself in a good book. I didn't know just where I'd find one, or whether it would be a classic novel or a scientific work, and I didn't care.

I opened my door and stepped into the hall. Right next to me the door of apartment 7-A opened and closed. Somebody else was standing there.

Pat Kingsley and I looked at each other. 7-A and 7-B. She said, "Are you the new tenant in 7-B?"

"Yes. And that's your apartment?"

"Yes."

All of a sudden she started to laugh. I watched her for a while, and then it got me. I laughed, too. It was funny as hell. I said, "You made a lot of public believe a lot of lies. Try to make someone believe that this was just an accident."

She looked prettier and sweeter than usual. She looked less like a fallen woman than anybody else I'd ever seen. I said, "Does your husband live there, too?"

"Naturally."

I started to remark that he was unusually broad-minded, but that seemed to be a type of humor that wasn't in order, so I held it back. Tactful me. Instead I said, "Going down to dinner?"

"Yes."

"Perhaps . . ."

"Delighted."

The elevator boy was still on. He'd be on until seven-thirty. After that, you worked the cages yourself; push the right button and the rest was done automatically.

The boy rode us down to the club. It held a fair sprinkling of diners, mostly tenants and people who lived in the neighborhood. The bandstand was empty. Waiters moved about unobtrusively. Mario wasn't there, but his assistant conducted us to a corner table. On the way we passed a wall table where a man sat alone.

It was the gent in the gray suit, the one who had seemed so interested in me last Saturday night. He was still interested. He looked straight at me. He was smiling, as though he saw something which amused him.

When the captain seated us, I asked whether he knew the man. He took a quick look and shook his head. "He's been in several times recently, but I don't know him."

We ordered cocktails and started fiddling with the menus. I asked Pat whether she knew the stranger and she said no, and asked why. I told her. She didn't appear to like it either.

Someone walked down the dark, narrow flight of steps that led from the mezzanine to the club. The apartment-house office was on the mezzanine and so was the apartment in which Jeff Nulty had been killed. And the dressing rooms.

Rex Kingsley stood at the foot of the stairway and looked around. He saw us. He hesitated for a moment, and then started in our direction.

I felt my right ear begin to twitch. That always happens when I'm nervous. This might be good. Quite a setup for a first meeting. Boy friend dining with wife. Outraged husband approaching. Anything could happen.

Kingsley was in dinner clothes. He looked beautiful. He also looked strong. I wondered how we'd make out if anything violent happened.

Pat didn't seem worried. But Mario had come in by this time, and he looked worried enough for two.

Kingsley stopped at our table. I didn't get up. That might have invited something I didn't want. I hate brawls, and this had all the makings of a good one. Pat said steadily, "Rex, this is Mr. Blake. Steve, my husband."

I said, "How do you do?" which sounded foolish.

He nodded and said, "I've heard Mr. Blake," which seemed to be a sup understatement. Some of the tense flowed out of my muscles. Kingsley viously didn't intend to punch first talk later.

Pat said, "Have a seat, Rex."

He pulled up a chair and sat do He looked me over at leisure and some insolence. He said, "I hear yo just moved into the building."

"Yes," I said. "7-B."

"Oh! *That* close. We'd have to sooner or later, Blake. That's wh came over."

Not bad. Not even hammy. Just common sense. Pat said, "I invited S to have dinner with me. It wasn' idea."

"What difference does it make w idea it was?"

This was moving too fast for me, didn't see any reason why I shou string along. I said, "I'll probably with your wife—right here—frequer

He said, "That's your business. hers. If you're trying to find out h feel about it, I just don't give a dam

He got up on that one and walke leaving me wondering whether to lieve him.

ON THE following Saturday ni December 13th—I invited Kingsley to have dinner with me.

I kidded myself that I did it o pulse. If I'd been honest with m I'd have known better. Pat wasn impulse any longer.

I hadn't known many girls intim but Pat was different from any of I had known. Maybe because she ploded on my limited horizon in matic way and thus had made a profound impression than she migh erwise have. Whatever the reason, her. How much, I didn't know didn't try hard to find out.

The idea was that she and I have cocktails and dinner and wat first show. That would give us a time for conversation. I was stric the mood for a little congenial fe companionship. Or a lot of it, if happened to be that way.

What I hadn't yet learned wa things never turn out exactly as pl My cozy little dinner for two dev into a big party and a large ev Maybe it was the air-conditione mate of the Club Casa Linda, ma was that things just naturally had of happening there. Maybe it warning that the snowball I had rolling downhill couldn't possibl short of becoming an avalanche.

The dinner itself was okay. Pat prettier than usual, which was plenty. She had on a black and dress, but I couldn't possibly desc She was the sort of girl who to your attention away from her clo

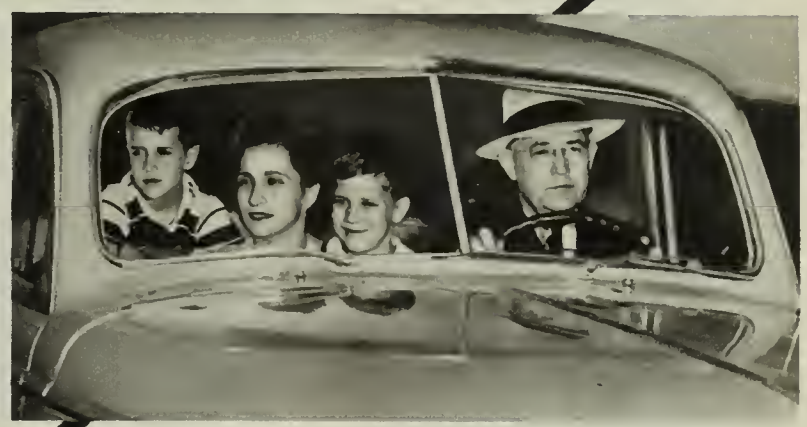
A blowout at 70 miles an hour but "EVEN A CHILD COULD HAVE HELD THE PLYMOUTH ON THE ROAD"!



A letter from A. L. Rives, Plymouth owner of Dallas, Texas

The latter part of 1946 I purchased from you a Plymouth Sedan, which is incidentally the sixth Plymouth automobile I have owned. I have often wondered in the thousands of miles I have driven a Plymouth oar whether or not there was anything to Plymouth's high powered advertising on their safety rim.

As we all know, there is nothing like personal experience to sell us on an idea and, believe me, I am now oonvinced that Plymouth really does have a safety feature in its rim. I was returning home yesterday from a trip with my wife and two boys and, while traveling at a speed of 70 miles an hour, I had a blowout on my right front tire.

Believe it or not, I had no trouble whatsoever in controlling the car even at that speed. I am convinced that even a child oould have held the Plymouth on the road without any difficulty. It is the first time that I have ever had a blowout while driving a Plymouth car equipped with safety rims but, believe me, they will do everything you say they will.

A L Rives

ISN'T the protection described in this letter the kind of security you want for your family and yourself? If it is—remember that *only* Plymouth in the lowest-priced field has Safety-Rim Wheels.

Two of the pictures below show you what can happen when a tire fails on a car with ordinary wheels. The other pictures show how Plymouth avoids these dangers. Is there any reason to gamble on blowout and puncture perils when you can play safe with Plymouth's proved protection?

PLYMOUTH BUILDS GREAT CARS . . . GOOD SERVICE KEEPS THEM GREAT.

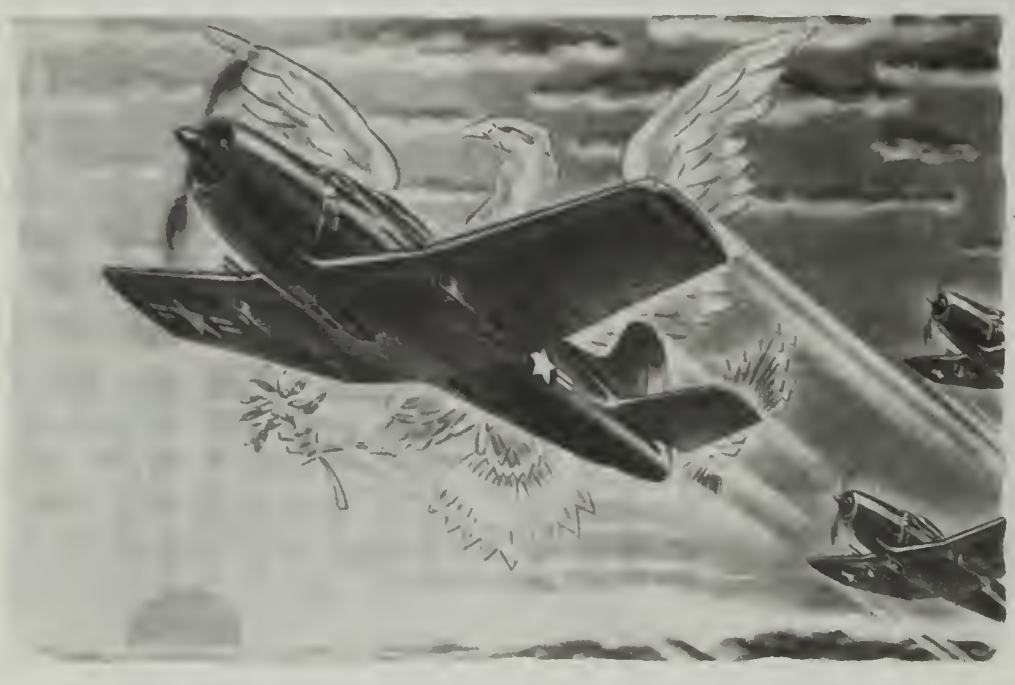
Your nearby Plymouth dealer will provide the service and factory-engineered parts to keep your present car in good condition while you're waiting for your new Plymouth.

PLYMOUTH Division of CHRYSLER CORPORATION, Detroit 31, Michigan.

PLYMOUTH BUILDS GREAT CARS

h ordinary rim wheels. Here's what con s a tire blaws aut an a cor with im wheels. Such wheels depend an re alone ta hold the tire in ploce. air lets ga, the tire pulls awoy from . is likely ta twist crasswise (as shawn y above) ar to jump the wheel

Blowout with Plymouth Safety-Rim Wheels. This is haw o blawaut laoks when yau're riding an Plymouth Safety-Rim Wheels. The oir lets ga, but potented retoining humps are there to hald the tire stroight and tight an the rim. Thus centrifugal farce is able ta give the effect af a certoin omount af oir pressure. As the cor slaws down, the tire goes down, and so daes the donger.



Deflated tire on ordinary rim wheel. This picture clearly shows why the cor with ardinory rim wheels swerved, jerked on the steering wheel, campelled its driver ta *fight* it to a stop after the blawaut. The tire has came oway fram the rim and is twisted. Any ather sort of tire failure involving sudden lass af oir pressure could have had the same dongerous effect.

Deflated tire on Plymouth Safety-Rim Wheel. See how firmly the tire stays an the Safety-Rim Wheel. Thanks to its potented retaining humps, Plymouth's stop wos straight, easy and safe. Why da without this praved pratectian when every new Plymauth has Safety-Rim Wheels and many ather safety advantages? Isn't it comman sense ta insist an Plymauth?

New Wings for an Eagle!

FOR THE NEWS OF THE FUTURE . . . keep your eye on the Martin star! Martin has been pioneering new fields, helping to guard the peace and build a more abundant world through research in commercial airliners, military aircraft, trans-sonic speeds, rocketry, plastics, other projects. Martin research is blazing the trail to a bright tomorrow!

OUTSTANDING

... among the eagle's new wings is the Martin Mauler dive-torpedo bomber, shown above. During the past year, according to top Government officials, we were a poor third in airpower . . . but your Navy foresaw the need for powerful new carrier-based planes and worked closely with Martin engineers in developing this rugged slugger. Now, with America aroused to the need for additional airpower, Maulers are entering service with the Navy to help maintain security along the far-flung outposts of freedom.

TIMESAVER!

Thanks to numerous easily accessible hatches for inspection or maintenance, and high-pressure underwing refueling, the Martin 2-0-2 airliner cuts ground time to a minimum. Shorter stops between hops mean time gained for passengers, more revenue for airlines. Look for more 2-0-2's on the nation's airways as the year progresses.

FOR A FLYING START

...to a real future, learn aviation with the Air Force, Navy or Marines. If you've got what it takes, you can build a lifetime career in a field with a real future. Ask for details at your nearest recruiting office.

AN INTERNATIONAL INSTITUTION

MANUFACTURERS OF: Marvinol resins (Martin Chemicals Division) • Martin 2-0-2 airliners • Advanced military aircraft • Aerial gun turrets. **DEVELOPERS OF:** Rotory wing aircraft (Martin Rotawings Division) • Mareng fuel tanks (licensed to U. S. Rubber Co.) • Honeycomb construction material (licensed to U. S. Plywood Corp.) • Stratavision aerial re-broadcasting (in conjunction with Westinghouse Electric Corp.) **LEADERS IN RESEARCH** to guard the peace and build better living in many far-reaching fields.

TOUGH OLD EAGLE!

That's the Martin B-10 bomber which won the Collier Trophy for Glenn L. Martin. Although 10 years old at the time of the Jap attack, these planes, flying with the Netherlands East Indies Air Force, gave a fine account of themselves. For advanced new military planes, as epoch-making as the B-10 in its day, count on Martin!

"E" FOR EFFORTLESS!

Easy to fly . . . that's another feature of the Martin 2-0-2 airliner. All control handles are different shapes and colors . . . pilot seats are superlatively comfortable . . . and the panel is simplified. Result: less pilot fatigue, greater ease of handling. Yesterday, today and tomorrow, Martin sets the pace! The Glenn L. Martin Co., Baltimore 3, Maryland.

Air Power to Save the Peace
Air Transport to Serve It

Rusty, he looked like an exclamation point alongside a telegraph pole.

He was about thirty-two, but he had that oddly boyish quality which belongs to very small men. He was flashily dressed, but still looked somber beside the girl he was escorting. He had black hair and a swarthy complexion. He was wiry and hard, and he didn't wear elevator shoes. You couldn't mistake the fact that he was either crazy about the girl or giving a good imitation of it.

Rusty saw us. She grabbed Pete Connolly by the arm and dragged him toward us. A dozen people spoke to him. He waved back at them and smiled with his lips, thought not with his hard black eyes. Rusty performed the introductions, pulled up a couple of chairs, and they both sat down. She told the little jockey that I was the most wonderful man she'd ever met. He didn't seem to agree with her. She continued to pile it on. I caught him staring at me, and I grinned and winked. He seemed to like that. He winked right back. That made everything fine between us. I liked him, and for some odd reason I hoped he would like me.

RUSTY was playing him strong. But she was playing me, too. Maybe that's the way she was: chronically friendly and not too exclusive. It didn't quite check with being a hard-working secretary, but I figured she was entitled to live her own life after hours. Watching her work on Pete Connolly, I understood more about her approach to me.

They definitely dug in at our table. A little while later Brian Garland came in. He and Pete knew each other, and Brian wanted to talk racing. So Mario had two waiters shove up another table, and we now had grown to a party of five.

Conchita Montero breezed in, all wrapped up in a cloth coat and shivering as though it were colder outside than a California December. She stated that it was not so cold like this in Cuba. She said she had to dress for the first show, but she wanted to talk to Rusty. She dazzled Brian with a smile, and reminded me about our trip to Tia Juana to see *jai alai*, which was getting to be a gag. My hope of a quiet evening with Pat Kingsley already had gone overboard, so I invited Conchita to rejoin us after the show, and she accepted eagerly. I figured we might as well make a convention of it, so when I saw Wade Ramsay talking to Mario just before the show started, I invited him to the table.

Up against the wall was my inquisitive friend in gray—except that tonight he was wearing blue. He was still interested in me, or seemed to be.

The place was fairly well filled by the time the show went on. It would be packed for the second show. Everything ran according to schedule: same acts, same applause, same encores, same handsome, arrogant, long-winded Rex Kingsley as master of ceremonies. Once, as Rex left the floor, I fancied that he glanced at my table and saw his wife. I couldn't be sure, but it didn't seem to matter anyway.

A few minutes after ten thirty Conchita returned. She had been only slightly less than sensational, and she exuded good humor.

Rusty looked across at her and said, "What was it you wanted to ask me about, Conchita?"

"Is pictures. You have the memory of many pictures was sent to you from Cuba before I come here?"

"Pictures of you?"

"*Si*. Much, much pictures. Conchita singing. Conchita dancing. Conchita not too much wearing clothes. My agent, he tell me he would like. You give me?"

Rusty looked defeated. She said, "You can have 'em, all right, if you're willing to dig. There are two closets in my office. One is neat as a pin. The other is a catchall. Everything I get that hasn't a proper place is pitched in there. mess. Somewhere in the middle that junk you'll find your pictures honest, I'd hate to tackle the job m

Conchita rose promptly. "I look said. "You maybe show me whe

like to hear whatever she is going you."

"I may sound repetitious, but I'll ask again: Why?"

Her lips were pressed tight. She said, "No particular reason."

"I don't care about playing it that way, Pat. Whatever Conchita wants to tell me, I'll listen to alone."

She argued. She argued with more vehemence than the situation seemed to justify. We killed a lot of time tossing the ball back and forth. My answer remained no.

IT WAS getting along toward twelve o'clock. The second show would be on at 12:30. I thought of Conchita waiting for me in the hallway upstairs, and told Pat I was on my way. She walked with me through the lobby to the elevator. No operator on duty at this hour.

Pat followed me in. I didn't like it, and I said so.

The cage was moving upward toward the seventh floor. She said, "I'm not going in with you. I'm going to my own apartment."

That was next door to mine. I knew it was an excuse, but there was nothing I could do about it. Except that when I found Conchita, I could take her into 7-B and lock the door.

The hallway was empty. No Conchita. I said, "You could have saved yourself the trouble, Pat. She's evidently still with your husband."

"We'll go back downstairs."

I said, "I thought you were going to your apartment?"

She didn't say anything. More to get rid of her than anything else, I took out my key and unlocked my own door. I wanted to be alone, to do a little private thinking.

I reached inside the door and snapped on the light. I turned to say something to Pat and caught a glimpse of her face.

She looked awful. Her lips were parted and her eyes were wide with horror. Then she moved forward. Swiftly. She shoved past me, into my apartment. I heard her say, "Good God . . ."

I followed her. I closed the door. For the first time, I saw the thing which had brought that look into her eyes.

It was Conchita Montero.

I looked at Conchita and knew that she wouldn't ever dance again, that she wouldn't go with me to Tia Juana to see *jai alai*. She wouldn't laugh and she wouldn't sing. Not ever.

She was lying on the floor.

I didn't have to be a medical expert to know that she was quite dead.

(To be continued next week)

"It's the police, Mom! Hello, Pop" STANLEY BERENSTAIN

America's favorite picture-takers

Brownie Cameras

. . . with new accomplishments.
All models take color pictures—
most take "flash" shots as well

Oversize black-and-white prints available from all negative sizes at low cost. Kodacolor snaps come to you already enlarged.

Baby Brownie Special Camera
Tiny but a true Brownie. Makes good snaps simple, sure. Full-color snaps too, in bright sunlight. Fixed focus lens; no "adjustments." Negatives, 1⅝ x 2½. $2.75 plus tax.

Brownie Flash Six-20 Camera
Makes splendid snaps "right around the clock." Full-color snaps too, in bright sunlight. Two-position focusing helps you get sharp, clear snaps. Pictures, 2¼ x 3¼. $10.50 plus tax; Flasholder, $2.50 plus tax.

Brownie Reflex Camera—You see your picture *before* you snap, so it's easy to get everything just right. With Flasholder, makes splendid snaps indoors at night. Full-color snaps too, in bright sunlight. (Negatives, 1⅝ x 1⅝.) $8.25 plus tax; Flasholder, $3.45 plus tax . . . Eastman Kodak Company, Rochester 4, N. Y.

Continued from page 22

guess you're right. I'm just a fuss-et."

hen they went out to the car, she "The worst part about it, we don't the neighbors. We're new. We t know anything about them. And don't know us. Clyde, it's still early. ather be safe than sorry. I'll never a minute's peace, until I'm sure doors are locked. And anyhow, I 't bring anything for the beach. ebody will have a beach party, and ave to buy a whole new outfit. It'll unday with everything closed, and ave to borrow things."

yde clashed the gears as he headed to Palo Alto. The front door, the door and the windows were se-ly fastened. Ella got the things she'd for the beach, ironed them, and started off again. It was no longer early start. It was past midnight they reached Los Angeles. She "We can't just pop in on Bill and ne at this hour, when they're not cting us."

All right; we should have phoned d."

didn't mean it that way, Clyde."

ney spent an hour finding a rather down auto court. They were tired the long day, and Clyde's eyes were ting from night driving.

HEY went to bed and he was going o sleep when she said, "Clyde." He ended to be asleep. She nudged him. de."

Huh?"

Did I pull out the iron cord?"

e took a long breath. "Oh, for ven's sake, Ella."

was ironing my blue slacks and you saying let's get going. I was trying urry."

t's my fault."

Now, Clyde. I felt awful, making drive back from Gilroy for nothing. r all, I could have borrowed some-g from Elaine if there was a beach y. I made you lose your early start. I the board down with the iron on it to l. But did I pull the cord out?"

Of course you pulled the cord out."

How do you know?"

Ella, if there's one thing you are, it's ful. You never leave taps running -"

Taps running?" she said quickly. "Do think—?"

Wait a minute; take it easy," he broke "That's just an example. You're ays careful about things, like taps and gas and rugs people might trip over putting sharp knives in the drawer the handles out. You never in your left an electric iron plugged in."

There's always a first time."

Forget it."

I wish I was sure."

Forget it," he said firmly. "And if did leave it on, let the damned thing on."

He went to sleep. Practically.

Clyde," she said in a small meek e, cuddling close to him.

He grunted.

Clyde, you've got every right to be ry. It's all my fault. I'm not blam-you. We never should have gone k. Do you think it would burn the se down? Our new house?"

No," he growled. "And anyhow, you er left it on."

You don't know. I was using the n. For the life of me I can't remem-pulling out that cord. Clyde, what uld it do?"

It all depends."

Depends on what?"

Run the bill up, I guess. Maybe burn iron out. We're here now and let's get it."

"But what if I didn't leave it on the stand?"

"Ella, be sensible. Of course it's on the stand."

"But I felt so bad about making you come back. I was in a hurry. What if I left it sitting there on the pad? Couldn't it get hot enough to start a fire? It isn't the kind that keeps a certain temperature. It just keeps getting hotter and hotter. I've been wanting a new iron. One of the kind that won't—"

"Okay, it's my fault."

"Now, Clyde. We've been saving for the new house. It's all my fault. You don't know how bad I feel. We've done without things and now we've got the place and I burn it down!"

She began to cry.

Slowly, Clyde sat up. He got out of bed and swung his arms about in the darkness for the pull chain. "Okay, we'll go back."

She kept on crying.

He said, "Well, what the hell *do* you want me to do?"

"Clyde, I—know it's silly. You're probably right. But we're not sure. Maybe we could phone somebody."

"Who? We don't know anybody in the neighborhood."

"What about Don?"

And that's where I came in. Good old Don.

"Don? He's in the city. And Lord knows what time it is."

Ella began getting out of bed. "Maybe we *had* better start back."

He said, "Okay, I'll phone Don."

He put on his shoes and a robe and went to the manager's office. After he'd rung the bell a while a voice from within called that there were no vacancies.

Clyde explained that he'd left the electric iron on at home and had to use the phone. The manager was not exactly happy when he appeared at the door in a nightshirt. . . .

The phone woke me up in the middle of the night and Los Angeles was on the wire. Clyde told me Ella wasn't sure she'd pulled out the iron cord, and—well, if it wasn't too much trouble . . . I asked how to get in and he said, "The key's in the mailbox. Thanks a million, Don. I know it's silly, but—"

And I said, "Not at all, Clyde. I understand."

There was a bit of silence, and then he said, "Yeah. I guess you do."

I understood if anybody did. There had been a time in my life when nothing in the world seemed worth while unless Ella came with it. There had been a black period when she decided to marry Clyde. The blow to pride was as bad as anything else. I hadn't even considered Clyde a rival. He was so casual and easygoing. He'd forget his dates and call around to see Ella on the wrong night, needing a haircut, having forgotten to shave. Not that he was a screwball, or incompetent; he just wasn't bothered about little things.

Well, one thing, he'd been strictly on the ball since marrying Ella. Like it or not. She saw to that. I'd remained a friend, and I spent an evening with them occasionally when they, with that peculiar habit of married people, found some girl they thought I should know and invited me down to dinner.

It was a raw night. Any night is raw when you've got out of bed conscious of your stomach and with fur on your tongue. Here I was, driving down the peninsula in the middle of the night on a fool errand. But it was just once. Clyde had had six years of it.

Their apartment in Burlingame, where they'd lived since they were married, was in the basement of a onetime mansion. Of course I knew they were building in Palo Alto, but I didn't know they had moved in. I suppose with his irritation, and with the human tendency to assume that everybody knows what is such a big thing in your life, Clyde hadn't thought to mention it. Anyhow I went to the apartment.

The key was in the mailbox, but the door was unlocked. It wasn't a fool's errand after all, I thought; they'd left the door unlocked. I went in and switched on the lights. The ironing board was folded into the wall; the iron was cold. That was that.

I looked in the refrigerator. There was milk, liverwurst, half a jar of sweet pickles, and some blue cheese. I had earned a snack. I set the stuff on the table of the breakfast nook, got bread, butter, a glass and a knife, and began on the snack. There was a San Francisco paper on the table, and I was reading the latest development of the perpetual police department shake-up when a girl walked in from the living room.

She was wearing a quilted red robe over her nightgown. She was a rather smallish person with a good figure, a lot of tan hair, beautiful eyes, and a revolver in her hand. The revolver was pointed at my chest.

"Well," she said.

"Hello," I said.

"Make yourself at home," she said.

"I felt like a snack," I said.

"You've got everything you need?"

"Yes, thank you."

She said, "I woke up when you slammed the refrigerator door."

"I should have been more careful at this time of night."

"I thought you'd be interested in my war souvenirs," she said, indicating the revolver.

"You were a Wac?"

"Yes. I know how to use it."

"I was over there myself. Air Force. Do you do this sort of thing often?"

"This is the first time I've found it necessary."

"You poor kid," I said. "There's no future in it."

"Particularly," she said, "when a burglar doesn't show good sense. As I understand it, the first principle is to case the joint."

"Exactly," I said. "But you didn't know Ella."

"I didn't know who?"

"Sit down," I said. "Let's talk things over. I don't want to make any trouble. I'm a friend of Clyde and Ella's."

"And I," she said, "am a friend of the Sweeneys. You've got your nerve with you."

I didn't go into that. It seemed to me the height of brass for a burglar to go to bed on a job. And such a cute little trick, too. She must be in trouble to be driven to this sort of thing. I said, "I brought one of those back. You haven't got a shell in the chamber."

She looked at the gun and I hit it with a length of liverwurst. The weapon went off with the most unearthly blast I ever want to hear. Then she began to scream, which was worse than the sound of the shot. She would have escaped except that I grabbed her.

It is amazing how people pop up from nowhere out of the middle of the night. And a man wrestling with a screaming girl just doesn't have a chance. It looks bad on the face of it, and a man doesn't have time to explain. I got some rough treatment from utter strangers, and pretty soon the police had me. After a while I began to understand what had happened. But the police didn't seem interested in that part of it. In a way it was very funny, except they didn't see the joke. They weren't even remotely interested in Clyde and Ella.

NOW, after Clyde had phoned me, he went back to the cabin and got in bed. Ella said, "You got Don?"

"Yes. He's driving down to make sure."

"I knew he'd do it. Don's a good egg. I feel so awful about forgetting that cord."

Clyde said nothing.

She sighed. "That's off our minds. It's so good just to pick up and leave and forget everything. We're going to have a swell time. Do you think we'd ought to give Bill and Elaine a ring and tell them we'll drop in in the morning?"

"No."

He was almost asleep when she said, "Clyde."

"Ella, for Heaven's sake."

"You told Don how to reach us, in case anything *had* gone wrong?"

"Well, uh—sure I told him." He hadn't, but he wasn't going to start something.

A few minutes later she said, "Clyde."

He groaned.

"Clyde, are you sure he can find the house?"

"He's been there."

"No; he hasn't. You remember we met that Mills girl. The one we thought Don ought to meet. And then she couldn't come to the housewarming and we thought it might be better anyhow if we had just the two of them for dinner some night. But we haven't had them yet. Does Don know about the new house?"

Clyde remembered he hadn't told me over the phone. He said, "Of course he does."

"Are you sure?"

"We told everybody."

"Then you *didn't* tell him when you phoned!" she said. "If Don went to the apartment— Maybe our house is on fire this very minute!"

Clyde got out of bed and swung his arms around in the dark for the pull chain. "What do you want me to do?"

"We could at least make sure. Maybe he hasn't left yet."

"He said he'd go right away."

"Then maybe he's back."

CLYDE rang the manager's bell again. The manager's temper had degenerated. Clyde put in a call for me and got no answer. He went back to the cabin. "He's not back," he said. "He must have gone to Palo Alto."

"Why do you say that?"

"If he only went to Burlingame, he'd be back before now. Say he did go to the apartment. He'd find out we weren't there. He'd talk to Mr. Meeker." Mr. Meeker was the landlord. "Mr. Meeker would give him the house address, and Don would drive to Palo Alto. We know he went to Palo Alto, or he'd be back by now."

Ella considered. "How do you know he talked to Mr. Meeker?"

"I don't know that he talked to Mr. Meeker. But he isn't back, so he had to either go to Palo Alto in the first place or talk to Mr. Meeker. Reason it out. Let's say Don *didn't* go to Palo Alto. Say he *did* go to the apartment. Well, it's either rented again or it isn't. If it isn't rented, he'd talk to Mr. Meeker to find out where we'd moved to. If it is rented, he'd talk to the new tenants, and they'd tell him to see Mr. Meeker. And if that hadn't happened, he would be back before now."

"Clyde, you know very well that Mr. Meeker goes to bed at nine o'clock every night, and nothing will raise him until five in the morning because he takes off his hearing aid. Remember the night the hot-water tap came off in the bathroom? We just had to tie it up with rags until morning. You know very well that Don didn't talk with Mr. Mecker. Don doesn't know where our new house is. It's on fire. It's burning to the ground, and it's all my fault!"

"Well, then, where is Don?" Clyde asked.

"That's beside the point. It's not our business where Don is. I don't trust Don anyhow. That's why I married you. Don's not reliable. I don't think he even tried. I know he didn't. It's just like Don. He doesn't care if our house burns down. He'd like to see it happen. I've never trusted him. He's always held it against us that we got married. He just hung up the phone when you called, and went back to sleep. He's there now. He won't answer the phone. Why didn't we think of Mr. Lee in the first place?"

"Mr. Lee? After all, Ella." Mr. Lee was the agent who had sold them the house.

"Well, he told us, didn't he? If anything came up, just call him. He said his job didn't end with closing a sale. He wanted us to be perfectly satisfied. He said to feel free to call him any time about anything."

"This is hardly in his line."

"I'll call him, Clyde," Ella said. "It's all my fault, anyhow."

"Never mind; I'll do it."

The manager was hardly happy at being routed out again. But his manner was sweetness itself compared to that of Mr. Lee. Gone was Mr. Lee's friendly tone and genial manner.

Clyde hung up bleakly.

"Friend," said the manager, who had heard Mr. Lee's loud comments over the wire, "if you're afraid your house is burning down why don't you call the fire department? That's their business. They'd appreciate it. They'd a lot sooner unplug an iron tonight than fight a fire tomorrow."

"Thank you," Clyde said, humbly grateful. "That's a great idea." So Clyde called the fire department. They said they'd call him back. Clyde sat in the office with the manager a few minutes. The fire department of Palo Alto called back to say the iron hadn't been plugged in. Clyde said thanks a million, and to put him on the list for ten tickets for the next fireman's ball.

"Well," Ella said, when he went back to the cabin, "I guess it *was* silly, dear. I feel so foolish about it."

"Better safe than sorry," he said gallantly. He jerked the pull chain and got into bed.

He was almost asleep when she said, "Clyde." She nudged him. "Clyde."

"Don't bother with that stuff, dear. If I had wanted a beautiful wife, I would have married one!"

COLLIER'S HENRY BOLTINOFF

"Huh?"

"Did the firemen go into the house or just look through the kitchen window with a flashlight?"

"They found the iron cord pulled out. What difference does it make?"

"What difference does it make? It makes all the difference in the world. If they went into the house, how do we know they didn't forget to lock up when they left?"

Clyde groaned.

She said, "You know how firemen are. Did you tell them the key was in the mailbox? Otherwise they probably broke down the front door with an ax."

"I told them about the key," Clyde assured her.

"They were thinking of fires, not doors. Who ever heard of a fireman locking the door behind him?"

This sort of thing went on for a while. Finally Clyde got out of bed and swung his arms for the pull chain. "I'll call them," he said, "and make sure."

There was a knock on the cabin door. "You'd better come out, Harris," the manager's voice said. "It's the cops."

Two police officers were on deck with a patrol car. They asked Clyde a number of personal questions. Then they asked him if he knew me. In checking my story the Burlingame police had contacted the Palo Alto police. The Palo Alto police knew of Clyde's call to the fire department. The fire department had furnished the address of the auto court in Los Angeles.

I was released a little after daybreak.

THAT afternoon I phoned the girl whose apartment I had broken into, and paid my apologies.

"I think it's awfully funny," she said. "We each thought the other was a burglar."

"I ruined your liverwurst and ate up practically everything in your refrigerator. Would you like to have dinner with me to get even?"

"I'd love to."

I called around a bit early that evening, and she was not quite ready. She was ironing something. We drove down the peninsula for dinner. While we were eating I said, "Say, did you leave that iron on?"

"Why should I?"

"I wonder about my cigarette? I left it burning on the ash tray. Maybe it burned down, overbalanced, and fell onto the sofa."

She sighed, "Are you a worry wart?"

I didn't propose right then; I wai until after dinner.

Ella phoned me Tuesday afterno She was awfully sorry for getting me i jam, she said. She and Clyde wanted make it right. Could I have dinner Fric evening? There was a girl named M they wanted me to meet. An awfu nice girl.

"I'd like to meet her," I said, "but I getting married Friday. Could I tak rain check?"

She said, "What?" and I repeated She said, "Why didn't you tell us?" a I said they had been in L.A. She asked she knew her, and I said her name v Mariom Edwards and I'd met her in th old apartment Saturday night. She sa "You mean—you met her that ni when you were arrested? Didn't y know her before?" I said that if known her before I wouldn't have b arrested.

She said, "Just a minute; Clyde wa to say hello."

The minute stretched into four or fi I knew she was bending his ear. Then voice came. "Hi, Don. What's about you getting married to a girl y met last Saturday night?"

"That about covers it. Except sh awfully nice and she's a knockout looks, and she can make up her mind that." I snapped my fingers at the pho

"But how can you be sure it will t out all right?" he said dutifully, Ella his elbow.

"I don't think a person can be sure anything in this life," I said. "So w worry about it?"

He said, "You've got something the Don."

It was a trite phrase, worn out; but heart was in it.

Then why am I saying he's happ married? Let's take another exam when Ella went to the hospital the n summer with the baby. When she v ready to come home, Clyde called her in a taxi. He'd mislaid the car ke She found the floors warped.

He'd left for work one morning wi out turning off the shower, and washrag had clogged the drain. The frigerator needed repairs because i left the door open. The lawn was bro And there was a hole burned ri through the ironing board.

Clyde is nobody's fool. He never one to worry about things. And w Ella for a wife, he can just relax and her do the worrying for both of them.

THE END

COLLIER'S "Just follow me. Goin' there myself" HANK KETCHAM

The wonderful time we've spent together . . .

FOR OUR ANNIVERSARY—the finest watch I could get,
to remind you, every moment,
of the wonderful time we've spent together,
so many hours that have gone so very fast—
from that first day that seems like yesterday.
Bless you for the time we've had—
and for the promise of the years to come.

FOR A GIFT to cherish—none is more perfect than a watch.
Your jeweler has a wide choice to show you,
achievements of the skill of free craftsmen—
of America and Switzerland—oldest democracies
on two continents. And, no matter what the make
of your watch, it can be repaired economically and promptly,
thanks to the efficiency of the modern jeweler.

For the gifts you'll give with pride—let your jeweler be your guide

The WATCHMAKERS OF SWITZERLAND

TRAIL OF THE LEANING S

BY RAFE GIBBS

JACK BREED

On some of these mountainsides in Glacier Park, you can walk on ice 500 feet deep and thousands of years old, acquiring a sun tan at the same time

JACK BREED

En route to Grand Teton Park, you may pass through Jackson Hole, once an outlaws' lair. Dominating scene above is Grand Teton Peak

Three Western parks—Glacier, Yellowstone and Grand Teto—are outposts on a long, long trail that goes a-winding throug some of the most superb scenery and colorful history in the U.S

DESIGNS FOR TOURING—IX

SLAP a Leaning S brand on your road map of the Northwest, and meander down the mountain trail it marks. What you will see once made pioneer trapper Jim Bridger, one of the West's most dexterous liars (mountain style), muse: "Ain't necessary to lie about this country nohow."

Traveling some 700 miles from the top of the S in northwestern Montana to the bottom in northwestern Wyoming, you can:

Acquire a sunburn at Glacier National Park in thirty minutes while standing on ice thousands of years old . . . Put on a miner's tin hat at Butte, Montana; descend 3,300 feet and see for yourself why Butte's hill has been called the "richest on earth" . . . Step back into the atmosphere of the past at Virginia City, Montana—the Williamsburg of the West . . . Drive through Yellowstone National Park where the pedestrians are bears . . . Gasp for breath by climbing or merely looking at the cloud-balancing peaks of Grand Teton National Park.

The best way to start along the trail up at Glacier is hunched over the saddle of one of the park's 600 horses. We took the trip up to Grinnell Glacier from Many Glacier astride a gentle mare in Jim Wilt's string.

A big, easygoing, ageless fellow beneath a big, aged hat, Jim makes a horse look undernourished when he settles in the saddle. He expounds on the lore of the park as you jog along.

"That's Poison Point," he says, swinging a gloved hand toward the trail where it leans over a thousand feet of nothing.

"It is?" says a dude.

"Yeah," grins Jim. "One drop is fatal."

Seven miles up the trail you come to a mountainside covered with ancient ice, 500 feet deep. The sun up there is hot. Your neck burns. You dismount and follow Jim out over the ice, covered with new snow. Everybody moves cautiously, for you are on a glacier of many crevices.

If you are not inclined to riding, you can view typical park scenery by merely driving over Going-to-the-Su Highway, the only road across Glacie National Park. But it pays to get horse, or at least a hiking urge.

At Sperry Chalet you can go t sleep listening to the patter of littl mountain-goat feet on the porc floor. One night Ed Beatty, chie park naturalist, was sleeping in chalet room, when he awoke with th feeling that strange eyes were upo him. He looked at the big, ope window. Perched on the ledge, read to spring, was a mountain goat.

"I let out a war whoop," sai Beatty, "and that goat jumped—back ward, thank God!"

A lot of folk come to Glacier t see the 1,200 different wild flowers i the park. They're at their showie from July 15th to September 15th.

Soft-spoken J. W. Emmert, supe intendent of Glacier, tells about a Easterner who paused just before h snapped a color picture of the Hang ing Gardens at Logan Pass, heav with golden glacier lilies.

"If I take this picture, it will co me $500," said the Easterner. "I have to bring my wife out here ne year."

But most impressive of all are th mountains themselves with their bi ness and isolation and calm strengt They manage to look at once bot violent and restful.

Almost until 1910, the year the are was made a park and put under go ernment protection, the Blackfeet I dians kept the white men pretty we out. You'll see plenty of Blackfeet t day at the eastern entrance of th park, which adjoins their reservatio Solemn-looking fellows on the su face, they have a sense of humor b neath.

"Our people never wash feet." o old boy assured us. "Called Blac feet."

Actually, legend has it the Blackfe got their name from scuffing throu burned prairie grass.

Following the Trail of the Leani S south of Glacier, you travel f miles beside Flathead Lake which beautifully framed by the Missi

ROUTES: U.S. Highways 2, 10, 20 and 89 are among tha major roads to the parks. To reach Virginia City, take U.S. 10S from Butte and turn off on Montana 41. Roads ara generally good, though rough in spots. Be sura car is in good repair. Garages are sometimes few and far between. Trail describad hera runs about 700 miles.

ACCOMMODATIONS: Excellent hotels at Missoula, Butte, Virginia City (Mont.), Jackson (Wyo.) and other towns. Motor courts all along the way. Glacier and Yellowstone have top-flight hotels, beside chalets, lodges, cabins and free camping grounds. Glacier hotels $9.50-up per person American plan. Yellowstona hotels $3.50-up European; lodges $2.25-up; cabins $1-up. No overnight accommodations in Taton Park. These are supplied by duda ranches, lodgas, cabins and hotels in Jackson Hole and in town of Jackson. Reservations should be made in advance.

FOOD: Excellent food in major towns and in the parks. T-bone steak dinners along the way, $1 to $3. Buffalo, elk, venison and bear meat available in Virginia City.

CLIMATE: Mountain variety. Warm days, but not humid. Cool nights. Blankets comfortable in July and August. Yellowstone Park accommodations open from June 20th to September 10th; Glacier Park accommodations, from June 15th to Septembar 15th.

WHAT TO WEAR: Keep it informal. Sport clothes. Riding breaches or denim dungarees are preferred for hiking and riding—plus a pair of ankle-high shoes. Warm wool sweater or water-repellent jacket on park trips. Raincoat tied behind the canle on every saddla horsa.

WHAT TO DO: Sight-seeing comes first. Slogan of the par is: "Ask a ranger." Also hiking, mountain climbing, hors back riding, dancing, boating and fishing. No fishing licen required in Glacier or Yellowstone. Wyoming licen necessary in Grand Teton; $5 for five days if you are out-of-state resident.

FOR FURTHER INFORMATION: On the parks, write to I formation Department of the National Park Service, Depa ment of the Interior, Washington, D. C. On Virginia Ci write to Fairwaather Inn, Virginia City, Mont.

Mountains. If it's raining, go back and start over the next day. Honest. The scenery is that good.

Midway on the Leaning S you come to Butte, sprawling over a scarred hill. It's the biggest city in Montana—population about 50.000.

This great mining center regularly gets kicked in the teeth by word-of-mouth advertising. A recent best seller brands Butte as the "black heart of Montana." Other so-called authorities on the city state that Butte is ugly as sin.

But these slanders overlook the city's main attribute—character.

Butte has been scored for its first-class gambling joints and second-class dives. But its 46 churches are better attended. The hill has been badly torn up in the scramble for the riches beneath. But in the flat below are hundreds of attractive homes, many of them owned by the men who lean on jackhammers or fill ore cars. Such organizations as the Garden Club and the Hardy Perennial Club flourish.

Town Offers Variety of Arts

Butte has always been known as a "good fight town," with a long line of fistic greats—Sullivan, McCoy, Jeffries, Walcott, Gans, Johnson and Dempsey—showing their wares there. But the town's biggest entertainment support is given to music. Last winter the townfolk raised $26,000 by popular subscription, and sent their 136-piece high-school band to the Tournament of Roses in Pasadena, California.

Butte is actually two cities—one upstairs, one down. You can visit the one downstairs by simply applying at the chamber of commerce upstairs and getting a free ticket. Mine guides will take you beneath the hill that, since 1864, has produced 13,000,000,000 pounds of copper, 3,500,000.000 pounds of zinc, 1,000.000.000 pounds of manganese ore and 600,000,000 ounces of silver.

Further along the Trail of the Leaning S you may visit Virginia City, a mining town that prospered, almost died, and came stomping back with its old clothes brushed up a bit to greet tourists.

Main thing to remember about Virginia City is the number 3-7-77. Back in the early 1860s it sent men riding for their lives out of the town, then a frontier mining camp as tough as bull buffalo meat.

Virginia City once harbored the toughest gang of outlaws this side of hell. Generally, the gangs killed for gold, and frequently for practice. Finally, a group of indignant citizens formed the Virginia Vigilantes. They held quick trials, and quicker hangings—24 in all. But sometimes they warned a man of his impending doom, and if he had a fast horse, he could escape death.

The warning consisted of scrawling the number 3-7-77 on a door. There are many stories as to what the number signified, but we'll string along with the one that says it stood for a grave—3 feet wide, 7 feet deep and 77 inches long.

Virginia City's old buildings have now been brought back to life. You can walk into the false-fronted Bale of Hay Saloon, and park your foot on the brass rail of a bar that was floated up the Missouri from St. Louis to Fort Benton, Montana, and hauled overland by ox team. As a bartender with low-slung sideburns waits for you to "prescribe your medicine," a memory-haunted tune twangs from a music box.

Sometimes the past and present ride tandem in Virginia City. While we were standing in the Bale of Hay, Mike Bresnahan, a prospector, walked in and tossed a poke of newly panned dust on the bar.

"Where'd you strike it?" the bartender asked.

Bresnahan waved a hand with deliberate vagueness toward the edge of town. "The old-timers who through here in the early days wer too big a hurry," he said.

In the Wells-Fargo office, wax d mies, dressed in frontier garb, are p in the business attitudes of eighty y ago. "Buckskin Joe," with dusty h a don't-give-a-damn angle, is writing his stage report. A clerk with har bar mustache is weighing gold fro leather poke as a bustled lady waits her ticket.

Or there's the general store of late and famed "Judge" Douglas. J slept in a haystack one night, forgc pull in his legs, froze them, and them amputated at the thighs. But J got around right well.

One day a bullwhacker, entering t with a big freight wagon, spotted J crossing muddy Main Street, promptly began unyoking his oxen. boss in the freight wagon deman "What's the idea?"

"Think I'm crazy enough to try ta this outfit through that mud?" reto the bullwhacker. "Look at that fe crossing the street. He's up to his pockets now."

Alder Gulch, which stretches l down the sage-specked hills thr Virginia City, once produced a $150,000,000 in gold. When the ore faded early in the present cen so did the 10,000 population of Vir City.

Then, in 1945, along came Ch Bovey. Charlie is a wealthy Mon rancher in his early forties and a senator from Great Falls, but mostl is famed for his efforts to pres Montana's rich history.

Charlie was mighty pleased with he saw in Virginia City. The fr structures, although a mite sway-ba from age, were still standing. Ne reshingling and some general renova That was all.

Charlie got the Historic Landr Society of Montana interested in viving Virginia City. He also pun new enthusiasm in the Vigilance Clu Virginia City. He began to spend e ings from his Montana ranches on town, personally buying up most o old buildings. Three of the struct he put back in actual business—Wells-Fargo Coffee House, the Bal Hay Saloon and the Fairweather I to take care of hungry, thirsty and sl tourists in that order. The other b ings he restored as show places.

Besides money, Charlie and his have spent considerable time on ginia City. Mrs. Bovey has becom authority on furnishings and style the past century.

Memories of the Vigilante Er

Assisting the Boveys is Mrs. Hoff, former Mack Sennett bat beauty and tourist guide extraordi Mrs. Hoff has lived alone for some in the town, but she said she has n been lonesome "because Virginia is so crowded with memories."

From old books and old native the area, she has gleaned rich lore. can tell you, for instance, about tana's first professional sporting eve Virginia City—a 185-round fight tween a saloonkeeper who drank water and a miner who drank e thing else, redeye preferred. (The t ing values of water versus whisky not settled by this fight as it ended draw.)

One of the biggest tourist attrac in this area is Yellowstone, oldest largest of our 27 national parks. tablished in 1872, Yellowstone c 3,471 square miles, or 2,213,000 acre timbered country in the middle R Mountains.

V carved more than a thousand
ep into the mountains, with the
stone River racing through it,
twice taking deep plunges to form the Upper and Lower Falls. But all these things are unimportant compared with the colors of the canyon wall.

Rangers like to take a tourist blindfolded to Inspiration or Artist Point, and suddenly whip off the blindfold.

"I've seen people darn near strangle to get out oh's and ah's," said Ranger Munkwitz. "Other folks are in such a hurry, though, they don't even take time to get out of their cars for a good look at the canyon. Matter of fact, one fellow from Ohio pulled up to a park gate last summer, and said, 'I haven't got time to go into the park, but just gimme a sticker to prove I've been here. I'm seeing the West, and, man, there's a lot of it.' "

Education in Bear Behaviorism

Keeping the tourists at a safe distance from the bears is a major headache of the park rangers. Feeding, molesting, touching or teasing of bears is prohibited. But rangers have come upon such hair-raising sights as Daddy photographing two-year-old Sonny astride a giant black bear.

"We who live with the bears don't have any trouble," said Superintendent Edmund B. Rogers. "We keep our distance."

Superintendent Rogers traces the American public's lack of respect for the bear's ripping and tearing powers to a bear hunt in Mississippi back in 1902. Chief hunter was President Theodore Roosevelt. Press releases described Roosevelt as refusing to shoot a small bear brought into camp. Cartoonist Clifford Kennedy Berryman did a sketch in a Washington, D. C., newspaper portraying the incident. It was reprinted throughout the nation, and toymakers started turning out Teddy bears by the thousands.

"The bear became in the minds of the general public a cuddly, playful fellow," said Rogers. "People who get hurt change their minds."

Habitually bad-acting bears are carted back into the remote areas of the park or destroyed. A notable exception was the Phantom Red Bear.

District Ranger John Jay chuckles about it now, but it wasn't funny to him at the time. Some Yosemite National Park rangers had advised him that the thing to do with an obstreperous bear was paint it red. The bear was then supposed to become so self-conscious it would slink off by itself.

Jay decorated this particular bruin with a spray gun, but the bear seemed

"Don't try turning your charm on me!" SIDNEY HOFF

Holes in cement walks, floors, walls, steps
easily mended with Rutland Concrete Patcher

It's easy to repair broken cement or concrete with Rutland Concrete Patcher. Rutland Concrete Patcher is a scientific mixture specially made for patching purposes. So simple you can do an expert job the first time. Just mix with water and apply with a trowel. Rutland makes a firm, solid, permanent patch.

To save money and be sure of having enough, ask for Rutland Concrete Patcher in the thrifty 25 pound bag.

downright proud of his new color, and paraded up and down in front of the hotels and lodges, creating havoc and consternation, then rolling away like a ball of fire when Jay and his colleagues went after him.

A few more miles down the Trail of the Leaning S from Yellowstone is another national park—Grand Teton—where the bear plays second fiddle as a wildlife attraction. In Grand Teton, the moose is number one.

And right here, stranger, you might as well pull up a chair in park headquarters with Superintendent John S. McLaughlin, and hear the story of Bill, the bull moose.

"He was left an orphan early in life," said McLaughlin. "His mother was killed on the highway by a car when Bill was only a couple of weeks old. The rangers here at headquarters adopted him, and fed him on a bottle. Bill got to be quite a pet, but an expensive one. He was soon drinking one case of canned milk a week. So he had to be taken out into the mountains to shift for himself. But, even after Bill went back to the wilds, he remained friendly to rangers who would come across him.

"Then, one winter day two half-frozen skiers came in. Said they had been treed for five hours by a moose that would just stand and look at them. They were afraid to come down and were freezing to death, so they shot and killed the moose with a pistol. Rangers found him. It was Bill. But he's still here."

McLaughlin pointed to the mounted head of a moose that looked down from the wall with sad eyes. Bill.

Teton's big attraction is its mountains, however. Tourists like to hike or ride along the 90 miles of trails, or to scale the rugged slopes. But before they start climbing they should look up a park guide.

There are always some who neglect

From next week's installment of THE SECRET PAPERS OF HARRY L. HOPKINS: The first atomic bomb might have fallen on Berlin instead of Hiroshima.

to do this, and it is a mystery why there aren't more broken necks. Last party to start an ascent of 13,766-foot-high Grand Teton in the 1947 season consisted of five middle-aged farmers tied together with 250 feet of somebody's ⅛-inch clothesline.

The farmers were doing everything wrong when Glen Exum, park guide for 19 years, met them and gave them some advice. They didn't take it, though. The lead man reached the top of a point known as Owen Chimney, then slipped, rolled and catapulted to the base of the chimney. He was just about to drop 3,500 feet more when the last man on the rope tackled him.

"Best tackle I ever saw," opined Exum.

He and his partner, Paul Petzoldt, who operate the School of American Mountaineering in the park, have 40 years of guiding in the Tetons behind them and have never had an accident with anyone in their parties.

On either side of Grand Teton National Park is a valley famous in Western history. On the Idaho side is Pierre's Hole; on the Wyoming side, Jackson Hole. The valleys are now peaceful dude-ranch country, but they weren't always thus.

Pierre's Hole, 30 miles long and 15 wide, was once one of the most important points of rendezvous for the early mountain trappers.

The trappers were paid off, then were encouraged to drink and gamble themselves into debt to the compan they would have to head back ir mountains for more beaver skin tween fights, the trappers li stacked the cards against the li They palmed off decks of them as at exorbitant prices, and told t dians they would suffer eternal nation if they didn't provide ther their best-looking squaws.

Jackson Hole was also quite pers' hangout. But it is most fa a hide-out for outlaws in the rustling days.

If you would like to do a little ure hunting, you might start look the buried loot of such badmen Nose George and Teton Jackson are supposed to have hidden the somewhere in the valley, which 400 square miles.

The main point in the valley frontier cow town of Jackson, strives mightily to stay frontier—v sidewalks, false-fronted stores an open gambling. At Jackson we visit to a grand old man of the tains, Charlie Hedrick.

Charlie, who served as a guide mountains for a half century, st his front porch, his tall figure straight as it was at twenty-one w rode horseback into Jackson H the first time in 1896.

"When I came into the valle Tom Smith, my partner," said C "the grass was knee-high to my In one meadow there were a th elk. Deer and antelope, too. C up into the sky behind them w Tetons. Mighty pretty. 'Tom,' 'you can go on, but I'm staying grass doesn't grow so high any and except for the big herd of these parts, the wildlife isn't so ful. But the mountains haven't cl and, do you know, after 52 ye view still seems pretty good."

THE END

NIGHT LIFE OF THE CARDS

Continued from page 6

Patton travels more than a yard in a tenth of a second—probably four feet at the finish where his momentum is greatest. Consequently, Mel can win by three feet, yet finish in the same tenth-of-a-second time interval with the runner-up. The sprinter who equals Patton's 0:09.3 may be a foot slower or faster in distance, but the discrepancy will not show on a tenth-of-a-second watch.

When Harrison Dillard set his 0:07.1 indoor record for the 60-yard hurdles last winter, he beat Bill Porter of Northwestern by approximately five inches. An experimental hundredth-of-a-second watch timed Dillard only two one-hundredths of a second faster than Porter. Yet the rules arbitrarily gave Porter 0:07.2.

Had Porter run the same race a night later—with Dillard absent—he would share the 0:07.1 record.

The shorter the race, the less a tenth of a second means. Oddly enough, Patton might have started the stop-watch controversy last summer, but he strained a leg muscle.

THE ATKINSON STORY

The theory that jockeys grow up around barns and horses doesn't apply to Ted (Slasher) Atkinson, the ambidextrous whipper whose mounts earned $1,036,825 in 1946 and $1,070,260 in 1947. Ted was working as a shipping clerk in a Corning, New York, factory when a trucker growled, "Don't ride that crate, kid. Lift it. You ain't no jockey."

The taunt started Ted to thinking of better ways to use his 105 pounds. He hitchhiked to Goshen, and asked for a job galloping the horses. "That's how dumb I was," he admits. "I thought a horse was a horse. Certainly was surprised to learn the trotters and pacers at Goshen did their running in front of sulkies."

Next stop, Brooklyn. Ted labored in a bottling plant and exercised horses at New York tracks for fifty cents an hour. He landed a job riding on the Ohio circuit, jumped to Cuba, backtracked to New England, and finally got his big break when he steered War Relic to a four-length triumph over Whirlaway in the 1941 Narragansett Special. Atkinson has whipped close to $5,000,000 across the line in 12 years. Only two jockeys —Eddie Arcaro and Johnny Longden— have enjoyed greater prosperity.

Ted is a pleasant, relaxed little guy right up to the starting gate. On and off the track, he likes to talk about his children. Riding postward at Hialeah with a fellow father, jockey Herb Claggett, Ted remarked, "Cathy's on a new formula."

"That's nice," Herb said. "My kid won't drink orange juice. Imagine a kid not liking orange juice!"

Atkinson shook his head. "Worse'n a horse not liking warm mash."

The baby talk disturbed the pony boy, a wizened ex-jockey. At the gate, he turned and advised Atkinson, "Better tie yourself on, Daddy. The kiddies would hate to have anything happen to you."

UNWORRIED MANGRUM

Sergeant Lloyd Mangrum crouched behind the stone fence and binoculared the high trees.

"The barn—in the loft," a patro ber whispered.

"Huh?" Mangrum turned hi left ear toward the whisperer.

Z-I-N-G. The bullet nicked t of Mangrum's helmet. The snip was perfect, but the instinctive h —prompted by a deafened righ saved Mangrum's life.

Eighteen months later, M crouched on the ninth green of t terbury Country Club in Clevela wife leaned forward on her seat c whispered, "How are you doing?

"If I sink this," Mangrum grimly, "I'll be six." Lloyd had his tee shot out of bounds. He Byron Nelson and Vic Ghezzi 18-hole play-off for the 1946 Open title. He had to sink the putt or fall three strokes behi virtually out.

Lloyd banged the pay-off pu It sprinted for the cup—hit the ba —popped up six inches—rattled Lloyd rallied and won the title in the second play-off when putt stopped half an inch short 18th.

". . . and the moral to those tw isn't hard to figure out," Mangr telling Sam Snead at the recent "An inch here and a half inch the difference between a dead and a live champion. That's wh fatalist. The ball's goin' in or Why worry?"

DON WILCOX, Flint, Mich.

ALFRED, THE GREATSKI!

SIRS: I've often wondered where reville *could* have found his model Alfred"—now I know, see enclosures!

MARJORIE C. FULLER, La Jolla, Cal.

Alfred

Vassily

ow I know what our Alfred does in are time—he poses as young Stalin. n it be that young Vassily Stalin has coming over here—in which event ust call your cartoon "Alfredski" in e. It only shows how up to date Col- is. CHARLES E. WHITTAKER, Beverly Hills, Cal.

MEN'S DOGS

EDITOR: Your ill-advised editorial of 5th anent men's dogs (Many Dogs Help) should be resented and con- ed by all comfort-loving men, as it to stir up an age-old conflict in fam- where the women have from 15 to 20 of shoes each, and the menfolk must s be on the alert to save their best- shoes from the garbage man.

st women are style-conscious, hence umber of shoes available regardless in or expense. Men like comfort, ess of the nagging they may have to e from their womenfolk, but they d at least have their shoes shined.

ES F. DINN, Port Washington, N. Y.

was reminded of Uncle Jack Derry owned a wholesale grocery in Indian- , forty years ago. He was then in his ties and came to work, at 7 A.M., with black shoes well shined. When I remarked about the appearance of his feet he said, "Anyone can be a gentleman for a nickel."

W. D. WIGHTMAN, Winter Park, Fla.

SOUTHERN CALIFORNIA DISCRIMINATION

DEAR SIR: Apparently Mrs. Elvera Dawson (The Week's Mail, May 29th) disapproves of anything but adverse criticism of the South. In her anxiety to concern herself with Southern racial problems, she has overlooked the California version of racial prejudice: I refer to the notorious anti-Oriental policy prevalent on the West Coast. First things first, Mrs. Dawson; remove those "No Japs Allowed" signs in public establishments.

FOREST NEWMAN, Nashville, Tenn.

WEEP AND THE W.W.W.Y.

SIRS: I compliment Eric Hatch for his G.A.R. story (June 5th).

Not since the early 1900s has a magazine story amused me to the point of laughing aloud. Then, a little-known author named Ellis Parker Butler wrote Pigs Is Pigs.

During the intervening years, never has a piece of fiction forcibly affected my emotions until G.A.R. got me to bawling. I stopped to wipe my bifocals a time or two toward the end, but right on the last I really let my hair down.

P. R. SHEAFFER, M.D., Cabot, Ark.

OUR FAR-FLUNG READERS

DEAR SIRS: I read with keen interest the article by Jorge Garcia-Granados, Behind the Palestine Reversal (May 22d). I cannot say with what feelings your countrymen view the situation but I feel impelled to state that many Englishmen are aghast at our Foreign Minister's attitude.

Two questions I whimsically ponder over are: (1) What is a "breach of the peace" in Mr. Bevin's enlightened opinion? (2) Is U.N. all gas and no power?

And now excuse me while I see how many more have been killed by Spitfires in Tel Aviv. FRANK BENNETT, Cumberland, England

BEAR PIG, OR PIGBEAR

DEAR SIRS: Our good old Republican party has its elephant, our Democratic its significant ass, T.R.'s its bull moose and the Prohibition party its camel. But what, oh, what is Mr. Wallace's emblem?

Nichevo!

I should like to propose a Russian bear cub but then I remember Mr. Wallace's little pigs. Maybe because Henry's famous for his hybrid corn we should select a hybrid animal. How's this?

E. LAURENCE PALMER, Ithaca, N. Y.

FEMALE PRIVACY

DEAR MR. DAVENPORT: Why, oh, why must every magazine, newspaper, movie, billboard, comic strip, cartoon, etc., etc., feature the seminude female OR else the female with a terrifically accentuated bust line? . . . Many teen-age boys today are either going to be oversexed or sex maniacs.

It is now almost as embarrassing to sit in the same room with a man reading a newspaper or magazine as it is to attend a burlesque show in mixed company.

LOUISE ROBERTS, Lynn, Mass.

Remember—
TARTAN lets you Tan—never burn!*

Stay in the sun far longer—with far more protection! Tartan, the amazing new suntan lotion, lets you tan so beautifully, so smoothly, so much more pleasantly!

1 **No Painful Burn!** Tartan screens out about 90% of the sun's harmful burning rays.

2 **A Glorious Tan!** Tartan admits about 90% of the sun's beneficial tanning rays.

3 **No Grease!** Tartan is non-oily—won't make sand or dirt cling to your skin.

*When you apply Tartan thoroughly and completely over all exposed skin areas, before and after bathing, and frequently enough to offset its removal from the skin due to excessive perspiration.

TESTS PROVE TARTAN GIVES MORE PROTECTION!

Tartan was laboratory-tested against other suntan lotions and found more effective for suntanning. Results proved that Tartan, when used as directed, permits longer exposure of the skin to the tanning rays of the sun and at the same time gives protection from possible burn. Rely on Tartan!

THE SECRET PAPERS OF HARRY L. HOPKINS

Continued from page 23

The importance of getting our supplies to you at the earliest possible date is realized here and every effort is being made to get shipments off.

To this Stalin replied:

At the present moment, when the peoples of the Soviet Union and its army are exerting all their powers to thrust back, by their determined offensive, Hitler's troops, the fulfillment of American deliveries, including tanks and airplanes is of the utmost importance for our common cause, for our further successes.

Stalin always gave evidence of very considerable respect for Roosevelt, but Soviet propaganda at that time was expressing scant admiration for the character of the American or British contribution to the total war effort.

A Little Psychological Strategy

A marked change in the nature of this propaganda was brought about in a curious way. The 24th anniversary of the foundation of the Red Army was to be celebrated on February 23d, and in preparation for that event, the Tass News Agency was collecting expressions of tribute and salute from various eminent personages throughout the United Nations. It occurred to some enterprising psychological warriors in Washington that it would be a fine idea to include General MacArthur in this greeting to our Russian allies.

Of course, MacArthur had by then become a tremendous figure, but being on Corregidor, he was not easy to reach. The War Department scornfully refused to put through a cable from an obscure civilian agency suggesting that General MacArthur take time from other duties to pay tribute to the Red Army. However, a short daily file of world news was then being sent to Corregidor, and the psychological warriors, without authorization from anyone, tacked a note on to that message to the general calling his attention to the forthcoming anniversary. MacArthur immediately replied with the following:

The world situation at the present time indicates that the hopes of civilization rest on the worthy banners of the courageous Russian army. During my lifetime I have participated in a number of wars and have witnessed others, as well as studying in great detail the campaigns of outstanding leaders of the past. In none have I observed such effective resistance to the heaviest blows of a hitherto undefeated enemy, followed by a smashing counterattack which is driving the enemy back to his own land. The scale and grandeur of this effort marks it as the greatest military achievement in all history.

This message from MacArthur was turned over to the Tass Agency and transmitted to the Soviet authorities who broadcast it to the entire world as coming from the heroic and brilliant American general who commanded the valiant forces in the epic struggle for freedom in the Philippines. From then on, the Russian propagandists were much more favorably disposed toward American fighting men.

After the fall of Singapore, Churchill faced the worst predicament of his career as Prime Minister. He made a broadcast speech in which he attributed the series of misfortunes in the Far East primarily to the fact that America's shield of sea power had been "dashed to the ground" at Pearl Harbor. There were numerous expressions of irritation at this statement in Washington, as though Churchill were attempting to escape censure by blaming it all on the U.S. Navy, but it did not bother Roosevelt at all. He merely remarked, "Winston had to say *some*thing."

Roosevelt then cabled Churchill:

I understand how the fall of Singapore has affected you and the British people. The well-known back-seat drivers are now given a field day but no matter how serious our setbacks have been, and I do not for a moment underrate them, we must constantly look forward to the next moves that need to be made to hit the enemy.

You will be of good heart in these trying weeks, I know, because I am very sure that you have the great confidence of the masses of the British people. I think of you often and I know you will not hesitate to ask me if there is anything you think I can do.

During the last few days I have given much thought to the Far East. We must at all costs maintain our two flanks—the right based on Australia and New Zealand and the left in Burma, India and China.

Because of our geographical position the United States is able to reinforce the right flank much better than you can and I think that the United States should take the primary responsibility for that immediate reinforcement and maintenance, using Australia as the main base.

From next week's installment of THE SECRET PAPERS OF HARRY L. HOPKINS: Reporting to Roosevelt from London, Hopkins said, "The Prime Minister threw the British Constitution at me with some vehemence."

Burma and India can be better reinforced by Britain and I visualize that you would take responsibility for that theater. We would supplement you in any way we could, just as you would supplement our efforts on the right flank. . . .

Do let me hear from you.

Churchill replied:

I am most deeply grateful to you for your warmhearted telegram. The pressure here has never been dangerous and I have used it to effect wholesome changes and accessions. You may take it everything is now solid. . . .

I do not like these days of personal stress and I have found it difficult to keep my eye on the ball. We are however in the fullest accord in all main things, and I will teleprint you more at large over the week end. Democracy has to prove that it can provide a granite foundation for war against tyranny. . . .

The "wholesome changes" referred to a shake-up in the British Cabinet, announced, February 19th.

Grave troubles continued, however, among the Allies. The Australian government demanded that their divisions in the Middle East be returned to their homeland for its defense. These troops could ill be spared nor could the shipping for their transport. Churchill begged that at least one Australian division be diverted to Burma. Prime Minister John Curtin, the head of Australia's Labor government, refused this point-blank.

It was this "strained relationship," and the desperate predicament of Australia that caused it, which influenced the President to order MacArthur to Australia. Roosevelt knew full well that the departure of MacArthur from Corregidor would be a grievous blow to the heroic men of his command and thus to the whole United States. It was orde captain to be the first to leave the ship. But Roosevelt had to weig considerations against the fact move he could make would be calculated to bolster the morale people of Australia and New Z He made his terrible decision at ference with Hopkins, Marsha King in the White House on S February 22d, but the news did n out until MacArthur arrived in A three weeks later. During thos weeks a sense of panic de throughout the entire southwest area.

The Japanese surge on land t Burma, and a series of devastatin to British naval units and shippin Bay of Bengal, brought India i zone of war and, although this dous problem was one for which velt wanted to have no responsil was deposited on him and remain him for a long time.

On March 10th Roosevelt ser markable cable to Churchill sayi he had given much thought to th lem of India and had tried to ap it from the point of view of his the hope that he might thus be sistance to you."

He recalled the beginning United States government and t thirteen states joined in the Art Confederation which became "a ous stopgap government" until ence and trial and error achi permanent union. This prompted suggest that a temporary gove might be set up in India charg creating a more permanent gove for the whole country in a pe five or six years. Roosevelt's cal cluded:

"For the love of heaven, don me into this, though I do want t help. It is, strictly speaking, non business, except in so far as it i and parcel of the successful fight t and I are making."

How the Advice Was Rece

It is probable that the only part cable with which Churchill agre Roosevelt's admission that it is " my business." Hopkins said a lo later that he did not think that th any suggestion from the Presider Prime Minister in the entire war t so wrathfully received. As Churchill's closest and most affe associates has said to me, "Th dent might have known that In one subject on which Winston never move a yard." It was ind subject on which the normal, minded, good-humored, give-a attitude which prevailed between statesmen was stopped cold. It said that Churchill would see the in ruins and himself buried und before he would concede the righ American, however great and ill a friend, to make any suggestio what he should do about India. be added that, four years later, th government in Britain made a p to the Indian leaders which, Welles has written, was "almost i in principle with the suggestion by President Roosevelt in 1942."

Although the first meeting Pacific War Council was h Wednesday, April 1, 1942, aga background of seemingly unr disaster in the Far East, atte Washington still centered on G On Saturday, Hopkins and Gene shall took off for London to pro invasion of the continent of E

invasion plan was originally
n as BOLERO and later as
NDUP; it was eventually replaced
VERLORD. The main operation,
ving 30 American and 18 British
ons, was planned for the spring of 1943. The code name BOLERO was retained for the enormous preliminary process of building up the required forces and supplies in the British Isles.

Provision was made for a more limited operation, known as SLEDGEHAMMER, to take place about September 15, 1942. Because of the shipping limitations, no more than 12 American divisions could be made available in the U.K. by that time. Speaking of SLEDGEHAMMER, the plan stated:

THIS LIMITED OPERATION WOULD BE JUSTIFIED ONLY IN CASE

(1) THE SITUATION ON THE RUSSIAN FRONT BECOMES DESPERATE, [or]

(2) THE GERMAN SITUATION IN WESTERN EUROPE BECOMES CRITICALLY WEAKENED.

In the event that the operation was undertaken as a purely desperate, emergency measure to relieve pressure on the Russian front, it was clearly foreseen that it might involve the loss of most of the troops involved as a "sacrifice in the common good."

Normandy Bridgehead Favored

A further and more enduring justification for SLEDGEHAMMER was later added: It might be employed to seize a bridgehead on the Continent *and hold it* until such time as sufficient American forces were available for the major drive through France. In this event, the most favorable target area would be the Cotentin Peninsula in Normandy.

Roosevelt was inclined to be leery of a trans-Channel frontal attack. He was still in favor of GYMNAST, the North African operation which had been planned and then shelved because of the need for diverting ships to the Pacific and the Indian Ocean plus the terrible tonnage losses in the western Atlantic. However, he was persuaded of the desirability of BOLERO-ROUNDUP by Stimson, Marshall and Hopkins. He also attached great importance to the political weight of this in relation to Russia.

He approved it on April 1st and told Hopkins and Marshall to present it to the Prime Minister and his Chiefs of Staff. Hopkins sent a jubilant cable to Churchill: "See you soon. Please start the fire." (This was another of the frequent references to the chilly temperature at Chequers.)

Roosevelt cabled Churchill:

A survey of the immediate and long-range problems of the military situations facing the United Nations has been completed and I have come to certain

Marshall-Hopkins party had an Pan American Clipper to itself on ht. Hopkins asked a great many ns about the use of Pan Ameri- lippers for carrying civilian air For more than a year he had been and stewing almost constantly civilian use of passenger and space in commercial transport A month before he had written llowing angry note to Robert A. in the War Department:

oticed in the paper the other day e New York Giants were flown to a and back in two or three trans- lanes.

o authorizes such a trip as this, g out engines and burning high- gasoline?

m then on he never stopped agitat- remove all civilian air mail from ippers. A month later he cabled to ll Harriman:

trying to get chitchat mail off commercial airplanes. President new instructions. Some people to think it is more important that anes be used to find out how Aunt is getting on with lumbago. It is f damned nonsense and if you are nough I hope you will continue to ell on your end.

rshall and Hopkins arrived in Lon- the morning of Wednesday, April begin their conferences.

Churchill Knew of U.S. Plans

llowing are Hopkins' notes on their essions at Number 10 Downing :

as perfectly clear that the Prime er was well aware of the propos- hich we were going to make, be- he stated they had them under l consideration for many weeks ere prepared to go ahead, imply- at they would go ahead without e made it, however, perfectly clear that he did not treat the proposals iously as either the facts warranted did the United States.

the other hand he indicated that d told the Chiefs of Staff that, in f all the difficulties, he, Churchill, repared to go along. He repeated veral objections that had obviously made to him by the Chiefs of Staff, which we had heard in Washing- efore coming to England. Marshall ore optimistic about the interview I was. Churchill told us that the pore business was a mess and he that the whole thing was very handled and that there is no ex- tion of the lack of resistance on art of the British. He simply thinks folded up and let him and the h army down very badly.

e next day Hopkins again saw chill and noted:

discussed again the purposes [to a second front] of General Mar- s and my visit to England and im- ed upon him the serious weight the President and Marshall gave r proposals; and I made it very that our military leaders had, after assing the whole world situation, up their mind that this plan was ne of all considered that was by far ost advantageous from a strategic of view. I impressed as strongly could on Churchill that he should gree to this proposal on any as- sumption that we do not mean business, nor should he assume that in all probability it will not require the use of ground forces.

I told him that the President and Marshall were prepared to throw our ground forces in and that he did not wish an agreement on the basis that in all probability the ground forces would never be used. I said this to him because, in conversations the previous day, I sensed that his advisers had told him that the ground attack would never be made at least for nearly a year. Churchill took this very seriously and led me to believe that he didn't fully take in before the seriousness of our proposals.

Hopkins cabled Roosevelt that he felt "sure that our main business here is going to turn out satisfactorily. Churchill has invited Marshall and me to meet with Cabinet Monday and Defense Ministers and Chiefs of Staff Tuesday night, at which time I believe the matter will be decided definitely. Everybody asks me

COLLIER'S "Did I wake you?" STANLEY BERENSTAIN

to convey to you their warm regards. Am not allowed to discuss weather, but my heavy underwear itches like the devil."

That same day Hopkins received a copy of a cable which Roosevelt had sent to Stalin:

Geographical distance unfortunately makes it practically impossible for us to meet at this time. Such a meeting of minds in personal conversation would be greatly useful to the conduct of the war against Hitlerism. Perhaps you and I could spend a few days together next summer near our common border off Alaska if things go as well as we hope. But, in the meantime, I regard it as of the utmost military importance that we have the nearest possible approach to an exchange of views.

A very important military proposal involving the utilization of our armed forces in a manner to relieve your critical western front is in my mind. This objective carries great weight with me.

Would you consider sending Mr. Molotov and a general upon whom you rely to Washington in the immediate future? . . .

I send you my sincere regards.

On April 14th, Hopkins and Marshall met with the Defense Committee (Operations) of the War Cabinet. Churchill opened this "memorable meeting," as he called it, with all the grace and courtly flourish of which he was master. Speaking of the "momentous proposal" which had been brought from the President by Mr. Hopkins and General Marshall he gave it his cordial and unhesitant acceptance, stating that it was in accord with the classic principles of war.

However, he pointed out there was the problem immediately presented by the ominous possibility of a junction being achieved by the Germans advancing through the Middle East with the Japanese advancing through India. A substantial portion of the resources of Britain and America in men and matériel must be set aside to prevent this junction.

General Marshall then expressed the great relief that he and Hopkins felt that agreement had been reached on basic principles for a frontal assault on the enemy in northern France in 1943.

The discussions at this meeting produced the contradictory circumstance of the American representatives constantly sticking to the main topic of the war against Germany while the British representatives repeatedly brought up reminders of the war against Japan. As he listened to the exchange of views, Hopkins had been scratching notes and doodling on Downing Street note paper. When it came his turn to speak, he started off by saying that there was no question of doubt that American public opinion was generally in favor of an all-out effort against Japan.

However, Hopkins said, the President and the American military leaders and the American people were all agreed on one point: *"Our men must fight!"* Obviously, western Europe was the one place where the enemy could be fought most quickly. Hopkins said that Americans did not want their men to be sent across oceans merely for purposes of sightseeing: They wanted to engage the enemy and finish the war.

He said very positively that once this decision was taken to go ahead with the trans-Channel operation, it could not be reversed, for the United States would consider this its major war effort.

Churchill gave Hopkins assurance that the British government and people would make their full and unreserved contribution to the success of this great enterprise.

The next day Hopkins cabled exultantly to the President:

British government at long meeting last night agreed to our main proposal.

Marshall cabled to the Secretary of War:

After oral presentation our proposal was formally accepted. Churchill asserted a complete agreement and a deep appreciation of the purpose and time of our visit.

When Hopkins and Marshall returned home, the whole atmosphere in official Washington was changed. There was a feeling, unfortunately not justified by the immediate facts, that we had passed from the defensive to the offensive phase of the war.

Roosevelt cabled the Former Naval Person that he was . . .

Delighted with the agreement between you and your military advisers and Marshall and Hopkins. . . . This move will be very disheartening to Hitler, in my opinion, and may well be the wedge to accomplish his downfall. . . .

A cordial message from Stalin tells me that he is sending Molotov and a general to visit me.

The main work that now confronted Hopkins was the problem of supplies for the Soviet Union. The Germans were increasing the severity of their attacks against the route to Murmansk by submarine and by aircraft and surface craft based in northern Norway.

Disastrous Convoy Losses

Roosevelt cabled Churchill certain suggestions about speeding up shipments via England to Russia but the Prime Minister replied: "With very great respect what you suggest is beyond our power to fulfill." He pointed out that the convoy problem east of Iceland was no mere matter of antisubmarine escort craft but involved major naval operations.

Churchill added his assurance that "we are absolutely extended"—and begged that they be pressed no further. Later he added that only about 25 per cent of shipments were getting through to Murmansk and pointed out that out of nearly six hundred tanks in one assignment little over one hundred arrived and nearly five hundred were lost. This, he added, could help nobody but the Nazis.

On May 5th, Roosevelt cabled Stalin:

Grave difficulties have arisen on the northern convoy route. You may be sure, however, that no effort will be omitted to get as many ships off as possible. . . . I do hope Molotov can stay with me in the White House while he is in Washington.

The reply from Stalin arrived ten days later expressing thanks and saying he had already requested Prime Minister Churchill to contribute to the speediest overcoming of certain difficulties. Since the delivery of materials in May from the U.S.A. and England is of the utmost urgency, I make a similar request to yourself, Mr. President. . . . In regard to the place of residence of Mr. Molotov in Washington, Mr. Molotov and I thank you for your kind suggestions.

With the approach of Molotov's visit to Washington, plans for the great offensive in Europe occupied more and more attention in the White House.

On May 28th, Churchill cabled Roosevelt a report of his talks with Molotov. Both the Prime Minister and Foreign Secretary Anthony Eden had been careful to avoid making any of the positive commitments that the Russians wanted regarding the establishment of a second front in 1942. They had urged Molotov to stop again in London when, they felt sure, it should be possible to talk more definitely about the future. (Meaning, of course, after they had been advised what the President said to him.)

In this same cable, Churchill said that Mountbatten was soon to arrive in Washington to inform the President and the Chiefs of Staff concerning certain difficulties that had arisen in the planning and to present a new suggestion (known as JUPITER) for a landing in the north of Norway.

Churchill added: "We must never let GYMNAST [North Africa] pass from our minds," and said that he and Molotov had made great progress in "intimacy and good will." This cable provided the first danger signal that British thinking was beginning to veer toward diversionary operations far removed from the main point of frontal attack across the Channel.

Forget harsh laxatives!

TRY GENTLE, HEALTHFUL LEMON IN WATER

JUICE OF ONE FRESH LEMON

IN A GLASS OF WATER

FIRST THING ON ARISING

No more harsh laxatives that irritate the digestive tract and impair nutrition! No more worrying: "Shall I take a laxative today or wait till tomorrow?"

Instead take the juice of a lemon in a glass of water, first thing on arising. It's all that most people need to insure prompt, normal elimination.

NOTHING MORE HEALTHFUL! Generations of Americans have taken lemons for health—and generations of doctors have recommended them. They're among the richest sources of vitamin C; supply valuable amounts of B_1 and P. They help prevent colds. They alkalinize, aid digestion.

Not too sharp or sour, lemon in water has a refreshing tang—clears the mouth, wakes you up. It's not a purgative—simply helps your system *regulate itself.* Lemon in water is good for you every day. Try it 10 mornings.

THE BLOOMING OF MARGARET ROS

Continued from page 17

castle, one or two at a time, after being examined by an equerry to see if they measure up to it. Invariably these uncomfortable young men are charmed by Princess Margaret, who is gay and sprightly, and does not insist that all conversations originate with and be developed by members of the royal family.

This is a fairly recent relaxation of the rules. It used to be that dinner guests were not much more than ventriloquists' dummies who spoke only after being spoken to. On one classic occasion, at Queen Mary's table at Sandringham, a nervous vicar spilled a small mountain of salt on his meat and was immediately challenged.

"Do you always use that much salt?" the queen asked.

"No," the vicar said, and that was the last word he spoke all evening.

Margaret has only recently begun to appear at official functions by herself, one of her first acts being the christening of a ship in Belfast not long ago. During the ceremony, a fifteen-year-old apprentice shyly presented the princess with a bouquet of roses. Margaret immediately captured the hearts of the crowd by plucking one of the roses from the bouquet and, in turn, fastening it to the boy's overalls.

Unfortunately, however, Margaret is not geared psychologically to enjoy christening ships, for example, and she would much prefer to leave the official chores to someone else. Even as a child who could reasonably be expected to be mildly curious, she revealed a strong aversion to this sort of thing and on one occasion complained petulantly, "Guess what their idea is of a day out for me—the Battersea Power Station!"

Laughter at the Right Places

Nevertheless, as time goes on, there will be more and more demands made on the gay young princess. But at the moment—and within limits prescribed by her mother and father—she is free to do pretty much as she likes. The court circular listing the occupants of the royal box at Ascot still omits her name when she attends the races, but she appears frequently at parties given in leading West End hotels and restaurants, and she recently witnessed a performance of The Relapse, a bawdy Restoration play. One man from the palace watched her closely during the somewhat hair-raising performance and said afterward, "Margaret must be growing up. She laughed in exactly the right places."

When Danny Kaye appeared in London several months ago, Margaret was particularly enthusiastic and, with Elizabeth and Philip, insisted on meeting Mr. Kaye in his dressing room following the performance. A short time after the royal party entered the dressing room, Mr. Kaye's manager emerged with a thoughtful look on his face. "I hope we aren't going to get into trouble," he said, "but I just heard Kaye tell Princess Margaret, 'Well, you see, honey, in America it's like this . . .'"

The effect of Danny Kaye on Margaret was also a source of concern to Queen Elizabeth. Margaret is an accomplished mimic, and after noting that she was paying unusual attention to the Kaye routine, the queen shook her head and said, wearily, "Oh, dear. Now Margaret will be in my room tomorrow morning to show me how it is done."

Margaret is fond of riding and has what the English call a "fine seat"; she learned to drive a car last fall at Balmoral Castle, Scotland; she enjoys swimming; and she is a collector of stamps after the fashion of her grandfather, King George V, who retired to his stamps whenever the affairs of st came too burdensome.

In an unguarded moment recen expressed the rather wistful hop she might one day be the best-d woman in England. Unfortunate cording to people who profess to about such things, she is simply a type of girl who can be expected excruciatingly smart.

Recently, she appeared in the papers wearing what the British ginning to suspect is a family he —a beige, beaver-trimmed outfit had for an eternity. The hem, ho had been let down to keep pace w New Look and for a brief, happ ment, the public thought Margar a new number. Then the truth c and a howl of anguish went up see it once more," an English gi "I think I'll scream."

There is a campaign on at the now to induce Margaret to we lipstick in view of her tendency to it on. It has also been suggested cately as possible—from other qu of course—that she would be be if she traded her present Scottish for a French maid, but this is u since Scottish maids are much in at Buckingham Palace. Howeve garet's aunt, the Duchess of Kent of the best-dressed women extan the public is hoping that she will eventually to make her influen

Ordinarily, in the case of sev year-old girls, there is no great i acy attached to the problem of ma but in the case of royalty it is a p pastime to start guessing as soo is decently possible. As it came to beth, the time has now come to garet, and the public has been during the past few months to orgy of matchmaking in the news

At various times Margaret's he been handed by the press to George of Denmark, Prince John embourg, the Marquess of Milfo ven and a dozen others. The M of Milford Haven, as Philip's be had the longest run of anybo when he failed to pursue Ma hand, as had been confidently pr the papers abandoned his cau turned to other "eligibles." At t ment, anyone who gets within seven feet of Margaret in a publi is immediately checked for eligibi his name goes into the file to av velopments.

Actually, of course, Margaret in love with anyone so far as is nor is she likely to be for some ti One rumor is that the king has ins her to wait until she is twenty considering marriage. In any when the time does come, Marga be able freely to marry anyo chooses so long as he is not divo a Roman Catholic. There is not the law that says Margaret *canno* a divorced person, but divorcés for example, permitted in the rc closure at Ascot and it is ge assumed that this will not be allo happen. If Margaret wished, h she could marry a commoner of tionality, even American.

Such a thing is not anticipate is not beyond the realm of pos As long ago as 1937, when Marga seven, the royal family began to uncomfortable feeling that the princess had a mind of her ow suspicion was borne out conc when the queen asked her one she tucked her into bed, "Darlin would you do without Mummy

Margaret considered briefly, t swered, "I'd do what I like, M

THE END

GEORGE PRICE

A remedy for dentists' flat feet and bunions has been suggested—a love seat with dentist and patient sitting face to face.—News Item

TAKE A LETTER

Miss Ruth De Witt,
141 Terrace Drive,
San Francisco, Calif.

My dear Miss De Witt:

I wish to apologize for getting absolutely nowhere yesterday with your impacted wisdom tooth. In all my years of professional experience I have never been so completely carried away by a patient. Giving you that familiar little pinch on the cheek instead of the customary injection of novocain was a most unorthodox procedure, as was my staring into your eyes instead of your mouth for 45 minutes; but, believe me, I was the victim of circumstances: The idea of a love seat in place of the usual dental chair originated at a New York dental convention and I was a cad to fall for it.

Sitting so close to you in the half-light I found myself powerless to stuff your pretty mouth full of those nasty dry rolls of cotton. Peppermint candy seemed ever so much more appropriate at the time. Ah, fool that I was for lighting incense rather than my alcohol lamp! My subconscious mind kept whispering, "Start your buzzer, Doctor, and forget the Casbah—Mix up a small batch of amalgam—Fiddle around with a stick of gutta-percha and stop playing footie-footie." But I was weak and you were so beautiful.

And the little jiggers of pink mouthwash I kept insisting you rinse out your mouth with. I lied to you, Miss De Witt—that was not mouthwash at all, it was vin rouge; and to think I was secretly wishing you would swallow enough of it to make you want to dance with me. That's why I had turned on the record player instead of the waste basin. I even removed my headlight thinking I'd look more like Charles Boyer without it. Your reflection in the X-ray machine brought out the beast in me.

Can you find it in your heart to forgive an old wolf and return, Thursday, the 17th, at 11 A. M. if I promise to sit you in a regulation dental chair, cut out the winking and get down to business? I'll even wear my white, starched coat instead of that maroon smoking jacket with the black piping; and I'll stand on my own two flat feet the entire time, bunions or no. And, to make doubly sure of myself, I'll cover your face with one of those ugly rubber dams.

Yours truly
Jack Cluett, D.D.S.

If you want a Wonderful Bracer, say "PLANTERS"

These long summer days, when the energy just seems to ooze away, are the days you need and appreciate PLANTERS more than ever.

Those crisp, tasty PLANTERS SALTED PEANUTS in the cellophane bag are famous as America's "Nickel Lunch." The finest, big Virginia peanuts roasted and salted as only PLANTERS can. They pack more energy—vitamins—proteins—than meat, fish or eggs.

If you've a sweet tooth, try PLANTERS famous Jumbo Block. Just pure peanut candy at its most wholesome, delicious best. They're both, still only 5c—both Planterrific.

These PLANTERS products are also made in Toronto, and sold everywhere in Canada.

PLANTERS is the word for PEANUTS

UNWANTED

Continued from page 28

has done a superb job of caring for its 20 per cent of the DPs: a job that shames the ignorance and inaction of Christian blocs over the plight of their kin.

(B) That all DPs hanker to go to the United States. Every poll indicates that practically 100 per cent of the Jews are hell-bent for Israel—and nowhere else. Similar polling of the non-Jews shows more than half preferring resettlement in western Europe, or in Africa, South America, Mexico, Canada. The remainder give the United States as first choice.

(C) That DPs are the "scum" of central Europe. In the light of traditional American principles they must be the worthiest people of the nations from which they fled or to which they refused to return: intelligent and brave enough to hold out for liberty. Those of the Hitler slave millions who desired to go home, having no quarrel with Communist regimes that replaced Nazi ones, were sent back. Of those who evaded repatriation, undoubtedly a few had sooty reasons; but the majority simply were people who saw no difference between the swastika and the hammer and sickle.

(D) That DPs are principally from "slum" nations. In reality more than 66 per cent are north Europeans: Balts, Poles, Czechs. The Balts are from Latvia, Estonia and Lithuania; the republics whose independence is still recognized by the United States. Fifteen per cent are Ukrainians—from the "California" of Europe, the most highly developed state in every sense in the Soviet Union. Five per cent are Yugoslavs. The remainder, less than 14 per cent, form a pattern of 30 countries and 50 racial strains. Look well again at the illustrations for this article. Considering the modern racial make-up of the United States, by government bureau studies, one in four of us might find among them faces that could be Grandpappy or Grandmammy as they arrived here with nothing in their pockets or bellies except gladness and courage.

(E) That all the DPs are poor. Right! If they weren't they would not be DPs: The rich have no difficulty resettling in whichever nation they choose. The DPs *are* poor. So were the Italians and Irish who built our transcontinental railroads; the Scandinavians who pushed fertility across our north central prairies from the Mississippi to the Rockies; the Poles, Scotch, Welsh and Lithuanians who respectively backboned our auto, textile, mining and steel industries. The DPs are poor.

The DPs are not candidates for charity. They are candidates for life in any country that will give them a chance to own a cow, a barn, a house, a kit bag of tools: life of the kind Americans believe men should be allowed to live.

The U.S. Needs Such People

American economic and labor experts have called the DPs a "rich pool of human resources" that, justly divided and cultivated by the free nations, would add notably to the prosperity of each. They point to Sweden, which during the war gave sanctuary to 30,000 Balts who have not only repaid her expenditures in their behalf but are now adding $200,000,000 annually to her national income. The DP "pool" is particularly rich in experienced workers in fields that are shorthanded in the United States: trained nurses, domestic help, farmers.

(F) That hordes of the DPs are criminals and quislings. It is doubtful if the endless "screenings" by military and civil agencies have left a single criminal undiscovered among those who still qualify as DPs under the exacting stipulations of IRO. Besides, IRO's constitution specifically forbids assistance or shelter to quislings, war criminals and traitors; and holds ordinary criminals extraditable.

Persistence of qualms about the DPs, therefore, is a tribute to both Communist and German propaganda. Little Reds like Tito, big Reds like Molotov screech that every DP who doesn't relish going home to a bullet-nicked wall is a quisling. The Germans, forgetting their original barbaric responsibility for them, detest the *"verdammten Flüchtlinge"* (damned fugitives) and resent their presence in Germany. They have subtle means of stoking anti-DP sentiment. Unfortunately, certain occupation-weary military personnel assist the German plot; unwittingly or not, but at any rate in mood with the official idea that amiability toward Germans will fetch them into the general Western palisade against the Big Bad Bear.

Thus, the DPs live out their democratic "apprenticeship" imprisoned in a fog of hatreds, recriminations, fears, injustices.

Obviously, neither justice nor reason dictates our taking *all* the DPs. Our Constitution did not guarantee unlimited immigration. By Section 9 of Article I it did prohibit Congress from controlling "migration or importation" of persons until 1808. But it was more than a century after that, when the greed of continental and industrial expansion for cheap sweat-and-callus labor had subsided, before Congress got around to fixing quotas.

The present law permits each year, from all over the world, a total of 153,929 immigrants who are eligible for citizenship and otherwise meet stern tests of literacy, health, character, finances, nonsubversive politics. Since 1930 only 20 per cent of the quotas have been used. Since V-E Day scarcely 20,000 authentic DPs have got in—and those, whose fares were paid and whose upkeep was sponsored by relatives or welfare circles, were not necessarily the cream of the DPs so much as the luckiest.

What constitutes a "fair share" of DPs rests in such things as national income, per capita wealth, natural resources, farm and labor needs, population density per *arable* square mile. Belgium and Great Britain have each already taken more DPs than the United States; yet they are crowded respectively with 2,126 and 2,421 persons to each mile, compared with 259 per mile here.

Of the various DP bills, that of Representative William G. Stratton of Illinois was the only one deemed by American and international statesmen and economists fair in relation to our size, wealth and prestige among the member nations of IRO. Mr. Stratton, after cautious study and weighing of all elements, proposed that 400,000 be let in, s over a period of four years.

Aside from industrial and farm ues there is, according to militar perts, a possible benefit to na defense in this human grab bag. A percentage of DPs are sturdy young within the ages of 18-25, many bo the sea or forests; these, it is bel would eagerly serve in the Am forces. Also, some Army men co that resettlement of 200,000 Ba Alaska would be feasible because are, in the main, big, rugged, cl hard-working outdoor people bred climate like Alaska's—and profita security as well. and taken to Santo Tomas prison
where he stayed for three years.
s liberated in February of 1945, a
ied skeleton dressed in rags, and
ted for his old house. There was
g left but the foundation. Then he
searched for the American Express office. "It too was gone, and I made up my mind to stay in Manila until I got it reopened for business," says Cecil.

He did. While the other ex-prisoners went back to America, he stayed on for six months. He spent days walking the pock-marked roads until he found a portion of a building with an office in it that the Army hadn't requisitioned. He ran into some of his former Filipino employees, and with them he cleared out the office. He talked Army engineers into building a new cashier's cage, found a workman to put bits of glass into the empty windows, dug a well for water, and exhumed the office records.

He bought typewriters, desks and adding machines from Filipinos who had stolen them while the city was being destroyed. Meanwhile he himself stole two twisted safes from a bombed-out bank, and then talked an Army locksmith into repairing them. Finally all was ready for the start of banking and shipping again. Two Amexco men arrived from New York to take over, and Cecil went home for a long rest.

Amexco's four offices in Switzerland remained open during the war. They made money, too, although most of their business was as new as their new problems. At first they found themselves operating as emergency travel offices. Jewish refugees from Austria, Rumania, Czechoslovakia, Poland and Germany poured into Switzerland throughout 1940 and '41, all with the single demand: "Get us to America."

Amexco did its best with them all. Once the French railroads were disorganized, they sent them by bus to Spain and then Lisbon. When busses were no longer running, Amexco invented a private car service to Spain, which operated until France was divided into occupied and unoccupied territory, thus bottling Switzerland up. Other refugees had been herded out through Antwerp's Amexco office onto ships.

In London, on the other side of the channel, another Amexco office was open during the war—again learning new types of business. Often the staff stood knee-deep in splintered wood and glass—the office was hit four times. But surprising requests hit them more often than bombs. Amexco was in complete charge of the mass evacuation of children to the U.S. during the early part of the war. This meant that they shipped 1,800 youngsters across the Atlantic.

"One night," says a London official, "we had 200 kids asleep in the ballroom of a hotel, waiting for a boat train. Suddenly there was an air raid. We tried to wake up the kids, but they slept like dormice. Finally we had to *carry* all 200 of them to the nearest air-raid shelter!"

When the mass evacuation of children ceased, the mass arrival of American G.I.s began. They swarmed into the office, and right along with them came trouble. To them, the two biggest days in the year were Mother's Day and Valentine's Day, and messages poured out over the London cables that curled straight British hair. "Chick wish I were therc love (signed) Sleepy," is an example that is still quoted, and "Cuddles all I want are your curves."

With the end of the war, Amexco snapped back into place like 139 rubber bands. Sometimes their offices opened the day after liberation. John J. Fornacca, new manager of the Rome office, marched into Rome with the American Army, and the next day the office was open for business.

Since the war hundreds of people have come into Amexco's European offices with the same demand: "I bought a ticket through you for a U.S.-bound ship in 1939. Because of the war I couldn't go—so I want the trip now. Don't forget I paid for it!"

With anguished steamship officials, Amexco works out such problems. Others comc in to claim that they buricd $2,000 worth of travelers cheques in their back yards during thc war. Since then their cheques were bombed out along with their yards . . . but they want their money refunded. So far, every claim of this type has proved correct, and Amexco has refunded thousands of dollars.

No Profit for Pickpockets

Amexco has always had little trouble with its demands for refunds. Usually travelers cheques are stolen by pickpockets, and by mistake. Their instant reaction is to rush to the nearest mailbox and drop them inside, whencc they begin journeying back home to Amexco in New York City. One day last September Amexco's main office received a bulging envelope postmarked Detroit. It contained 22 different folders of travelers cheques, evidently collected by a frustrated pickpocket who had been worrying about them for some time.

Despite such thoughtfulness on the part of thieves, Amexco employs 25 detectives whose sole job is to explore cases of missing cheques—15 of them in America, the rest elsewhere. Often their explorations have led them into finding criminals such as Gerald Chapman, at one time Public Enemy Number One. Although he was wantcd for everything from robbery to murder, he might still be at large if he hadn't made the error of holding up Amexco's office at Niagara Falls. There he foolishly pocketed a lot of travelers cheques along with all the cash he could carry.

Outraged, Amexco's detectives sent Chapman's description to every Amexco office in America, together with the numbers on the cheques he had swiped. Every time the gunman cashed one, Amexco notified the local police of his whereabouts—and finally, following a trail of cheques throughout five states, he was caught and jailed.

Amexco's experience in handling 90 per cent of all traveling Americans has taught them a lot of interesting facts about us. For instance, it can tell you that in 1930 more Americans flooded Europe than in any other year of our history: 279,599 of them (excluding cruises). Almost as many went again in 1939, evidently to patch up business and personal affairs ahead of the coming war: 277,341.

The greatest travelers of all turned out to be housewives, comprising 13.93 per cent of American tourists. Students came next (11.76 per cent), then teachers (9.11 per cent). After that came the idle rich who list no occupation—8.55 per cent. Oddly enough, the least traveled Americans were pharmacists, interior decorators, actors and writers, in that order.

There are five solid reasons for Amexco's conviction that more Yanks will go traveling in the next ten years than ever before: pent-up demand from wartime years; a greater national income than ever before in our history; the overseas wartime service of millions of Americans; increase in paid vacations; and swifter travel facilitics. A Yank on a paid two-week vacation will be able to visit Europe the way he used to visit a neighboring state, thanks to the airplane.

He'll be doing it too, by the hundreds of thousands. And spending $15,000,000,000 in the process. He'll also, no doubt, spend a lot of time telling his fellow travelers, "Meet me at American Express!" Why not? Didn't he create it?

THE END

ONE DAY, ONE LIFE

Continued from page 14

from her glass and popped it into her mouth. "She has a baby."

"So?"

"Well . . ." Mildred seemed disappointed. "Can you feature a girl like Alice having a baby?"

"It happens to a lot of women."

"It hasn't happened to you."

Eleanor let that go till the waiter had taken their order. All she wanted was clam bouillon, but Mildred was hungry and ordered an avoeado salad and *boeuf Bourguignon* and a glass of milk. When the waiter had gone she looked at Eleanor and smiled apologetically.

"After all," she said, "I'm feeding two of us."

"You weren't being subtle a minute ago, were you?" asked Eleanor, arranging the napkin on her lap.

"Subtle? Me? No, darling, you know me better than that. No, I was just wondering whether you were ever going to get around to it. Here I am with two already—two and a half, you might say—and even Alice has made her contribution; while you, the one girl in the class who should be, well, duplicating herself . . . I mean, you and Clay—"

"Perhaps," said Eleanor, making little crosses on the tableeloth with a sharp red nail, "perhaps with me it's not entirely a matter of choiee."

"You mean Clay—"

"No, I don't mean Clay. I mean I don't think I'd have the time. That sounds funny to you, I suppose, but it happens to be true. Just to give you an idea," she said, opening her bag and taking the little book out, "here's my schedule for today." She found the place and turned the book around on the table, so Mildred could see for herself how busy she was. She did not, however, relinquish her hold on it, because if Mildred pieked it up she might notice the blank sheets for the days that followed.

MILDRED looked over the entries till she eame to the last one, and then she laughed.

"Bed," she said. "Do you have to remind yourself of that, too?"

"I have to remind myself to be there not later than one," said Eleanor, closing the book and putting it baek, "beeause it happens I need eight hours' sleep. If I started relaxing my discipline, pretty soon it'd be three or four every night, and you know what that can do to your health, to say nothing of your appearance."

"But after all, Eleanor, do you *have* to ram around like that? I mean, that lecture this afternoon, for instanee. Do you *have* to go all the way down to Eighth Street to listen to a Japanese painter, or whatever he is?"

"Yes," said Eleanor, "and I'll tell you why. I've got to make myself complete. That's a poor way of saying it, I suppose, but it's the best I can do right now. After all, Clay has many eonnections, and it's a dull week when we don't entertain twenty or thirty people, ranging all the way from existentialists to deep-sea divers. If I expeet to be a good hostess I've got to talk their language."

"You mean tomorrow Salvador Dali might drop in and quick-like you rummage around in your mind and open a drawer labeled Fujiyama, or whatever this joker's name is, and presto, there's your conversational wedge, all wrapped up and ready to use?"

"Something like that," said Eleanor, refusing to take the bait. She knew what Mildred meant—that up in Scarsdale there was no need for such artifice; that when friends dropped in, the things they talked about came naturally. Why not? They were always the same—business and babies and politics, and the high price of everything; but when they were through with these there was nothing else, and they had a ehoice of repeating the eyele or lapsing into silence.

". . . sometime soon."

"What's that, dear?"

"You haven't heard a word I've said!"

"Sorry, Mildred, I have so many things on my mind."

"I was just saying I wish you'd try to find time to come up and see us one of these days. I mean before Little Nemo puts in his appearance. Some afternoon, maybe. It's only about thirty-five minutes on the train. We could have a nice little ehat while the kids are asleep . . ."

Yes, and when they wake up, God help us, every one. She remembered the last time she had visited Mildred: the six-year-old ear at the station, with a harness strapped to the back of the seat for Tommy to ride in—there had been no Barbara then—and the smell of diapers competing with the fumes from the engine; the Cape Cod bungalow with its aggressively eute candles cut out of nonfunctional green shutters; the bare patehes on the lawn, souvenirs of Jocko, their springer spaniel; and inside, the matehed maple and the Van Gogh reproductions and the scars on the window sills where Tommy had experimented with a hammer. Later Tommy had upset a eup of hot tea over his mother, and though all Mildred had said was "Oh, *Tommy!*" he had bawled as though someone had stuck a pin in him; he was, as a matter of fact, still howling when Eleanor left.

"We'll do that," she said.

"When?"

"Darling, I'll have to let you know. The next few weeks are going to be pretty awful and I don't want to make a date and then have to call it off. I'll give you a ring as soon as I'm in the clear."

The waiter asked if they would like dessert and Mildred said she would have a vanilla éclair and a cup of coffee. Eleanor shook her head; she ate almost nothing during the day, concentrating on the evening meal to enhance the legend that she was one of those fortunates who ean eat like a wrestler and never get fat.

"Two thirty," she said, looking at her watch as the cheek was placed discreetly at her elbow. "I really must be going." She opened the bag and took the little gold pencil out of its scabbard and scrawled her name across the chit, aware that Mildred was leaning forward to see how big it was. It was big enough. Together they went out, past the suspended forks and the suspended conversations.

"It's been fun," said Eleanor on the sidewalk as a taxi summoned by the doorman came roaring up to the entranee. "Can I drop you anywhere?"

"No, thanks," said Mildred. In the candid, midafternoon sun she looked tired and dispirited; there were shadows under her eyes and her mouth drooped. She pushed a wisp of hair baek under her flamboyant hat and tried a smile, but it was not a sueeess. "I think I'll just walk up the avenue a eouple of bloeks," she said, "to see how the elite live."

She looked, thought Eleanor, as the door elosed after her, she looked like the *Hausfrau* she had always been, even in college; the chubby ehin that everyone had thought so cute was fast becoming a double chin, and, as the years passed, the vigorous body, once kept lithe on tennis and basketball, would beeome thick, as it was thick now. For a brief moment, just before the taxi lureled into the traffic, they stared at each other through the glass; then the lights changed, horns blared, and Mildred was gone. . . .

The leeture at the Feinstein Galleries on Eighth Street was disappointingly short, and this was a shame because Eleanor had counted on two hours, from three to five, and it was only a little after four when Tetsuo Fujihara stepped down from the platform. She felt cheated and a little panicky, as she always did when something went wrong and she found herself with time, that least flexible of all elements, on her hands.

She returned home as slowly as she could, traveling by bus to delay her arrival. She got off at Fifty-seventh Street and Fifth Avenue and walked east to Sutton Place, pausing to observe anything of even moderate interest along the way—the windows of restaurants and shops, the displays of florists and jewelers, the titles of books in a secondhand bookstore. In this fashion she disposed of the extra hour that had disturbed the beautifully precise pattern of her day.

The ehimes from the Church of the Redemption were sounding as she entered the lobby. Seeing her, Joseph rose from his bench beside the elevator and went baek to the desk to get her mail. "Right on time again, Mrs. Huntington," he said, handing her a sheaf of letters.

"Am I?" said Eleanor breathlessly. "Am I really, Joseph?" she asked, as the doors closed and the car went swiftly upward. "Such a day . . ." Her voice trailed off as she checked return addresses: *New York Guild for the Blind . . . Lewis & Conger . . . The Metropolitan Muse Art . . . Henrietta Crabtree, Wood New York* . . . Henrietta wanted to portrait, but her priee was two tho dollars, and generous as Clay w was a question whether he would g high—partieularly since Henrietta l so heavily toward greens that her jects, no matter how healthy, a looked as if they had been dead a long time. Still, it was something It would keep her afternoons occ for ten days or a week at the lea need to east about for people to se places to visit. She would speak to The doors elanged open and shut.

"Any ealls, Lawrence?"

"Mr. Strove phoned, Madam."

"Did he leave a message?"

"He said he was sorry but he wo able to meet you for lunch tomo He said he has to go to Chicag won't be baek till Sunday and he' you Monday morning."

"Anything else?"

"No, Madam."

You rying Clay because he was hard rienced and a little dangerous, t coldly contemplative look in and that hard smile that turned one corner of his lips, so that if a hand over the left side of his you got something warm and rry; while if you covered the e you got the expression that had many chairmen of so many Yes, that was why you were him—because he was exciting tradictory, tender and ruthless, strong . . . and only incidentally he was rich and you were so r widowed mother had had to wedding ring, the last item of a of jewelry already pawned or buy your graduation dress.

question unanswered, heavy eir own thoughts, they had gone he inn, and Eleanor had left him r while she went up to change. n hour it would be all over—he ive her down to the station in the ad rented for the week end; she ss him goodby on the Pullman d the episode would be ended.

ve minutes later there was a the door, and when she did not because she knew who it was t would happen if she let him in), k was repeated: *One-two-three- . One-two-three-four;* and she nsely, excited and afraid, in the f her room with a hand on her nd the beat of her heart was an that summons. . . .

wo-three-four . . . Slowly she erself, and her eyes focused not om at the inn but on the familiar furnishings of this room in he had slept and thought these for six long years; and the hat had come crowding to her lips—*Yes, Jeff, yes, darling, I'm coming*—faded and died.

"Come in."

"Hello, dear, were you asleep?"

"Just resting. Did you have a busy day?"

"Not terribly. Did you?"

"So-so."

As usual, when Clay leaned over to kiss her, she closed her eyes. For a moment, as he prolonged a casual greeting into something more than that, she thought she was going to gag; but with an enormous effort of will she forced the feeling back, and by the time he had straightened up she was smiling. She could do that, now. She could turn her smiles on and off; and if occasionally he saw the emptiness in her eyes, he never mentioned it.

Caesar, she thought, as she looked up at him. Caesar was small, too, with a lean, alert face and a thin, strong mouth. All Clay needed was a toga in place of his dinner jacket, and a wreath on his head, to become the mightiest Roman of them all. *Morituri te salutamus. . . .*

WITH a lithe movement she got up and, wrapping the robe about her, went to the dressing table, where she started brushing her hair. In the mirror she could see that he had stopped walking around the room and was regarding her with a speculative eye. She knew that look by now—the cocked eyebrow, the mouth pursed like a patron deciding whether to buy; she knew it preceded the extra round of cocktails, the hand-holding in the car, the intimate embrace at the end of a dance, and finally, home again, the knock on the door.

"What are you wearing tonight?" he asked, coming up behind her and putting his long, slim hands on her shoulders.

"White, I thought."

"Do me a favor."

"Of course."

"Wear that red dress—you know, the one with the bow in back."

All right, she would wear the red dress—the one with the bow in back, and the deeply plunging V in front, which was what he had been thinking of; and though men would stare, none would stare so long and so hungrily as he.

"Need any help?"

"No, thanks."

At the door he hesitated, like a guest who, having announced his intention of leaving, stands hoping to be called back. The twin lights on the dressing table picked up the glint of his pearl stud and the glitter in his small, dark eyes.

"Cocktails are ready," he said.

"Ten minutes."

The last thing she did before she joined him was drop the little engagement book into her bag. There was no telling what might happen to round out her appointments for tomorrow. Anything—even lunch with Peggy, who was still a sophomore at heart—was better than being alone.

Clay was standing before the fireplace with a drink in his hand as she walked, elegant and half naked in the red dress, into the library. On the coffee table was a pitcher of Martinis—the big pitcher they used only for parties, and for the times Clay had that look in his eyes. . . .

Dinner was a gay and brittle occasion—so desperately gay, in fact, that they lost track of the time and almost missed the curtain. This would have made no difference to Clay, who could take his shows or leave them; but for Eleanor, geared to a schedule which accounted for every minute of the day, arriving late would have been an admission of failure. So she hurried them through dessert, and when Peggy asked for a second cup of coffee she began putting on her gloves, and for once Clay took the hint and signaled the waiter.

He was laughing as they entered the taxi for the short ride to the theater. "Eleanor," he said, arranging himself on

one of the folding seats, "is the nearest thing to a chronometer I've ever known. She reminds me of an old man back home named Mark Hathaway. He lived alone in a big, gloomy, crumbling house, and what he did there nobody ever knew; but once a day, at noon precisely, he would open the front door and go down the walk to see if he had any mail. He never had, of course, but that has nothing to do with the story. What I'm trying to say is that though he observed this little ritual for thirty years, even he was subject to the final variation. One day he didn't come out at all, and his neighbors, who'd been setting their watches by these occasions, knew something terrible must have happened. The old man had died.

"There's where Eleanor has him licked," he went on, as they stopped for a light at Sixth Avenue. "She wouldn't let a little thing like death disturb the even tenor of her way. If she had a dental appointment for three o'clock, say, and the old Reaper called at noon, she'd tell him to come back later. Wouldn't you, dear?" he asked, putting a hand on her knee.

"But what do you *do?*" asked Peggy, before Eleanor could think of an answer. Peggy was a large, dark, ebullient young woman with a Junoesque figure and a special kind of vitality. No matter where she was, or what the hour, she was always quivering with the urge to act. Though she was only two years younger than Eleanor, she managed to give the impression that the braces had just been removed from her teeth.

AS THEY swerved in front of a large sedan, she went on, "I mean: What's the *point* of all this rushing around? Seems to me a girl in your position," and here she rolled her eyes at Clay, because Clay was rich and maybe someday could do George a favor, "a girl in your position would want to take it easy. My God, if *I* had twelve servants, and houses all over the country, you can bet your boots I wouldn't be dashing from breakfast to meeting to lunch to meeting, and so on all day long. Not Peggy. I'd get up when I felt like it and play golf till I got tired, and when I was hungry I'd eat; but you wouldn't catch me following a timetable, like the 20th Century."

"Maybe," said George, her husband, an unremarkable young man with a round, red face and a gap between his two front teeth, "maybe if you did, darling, you'd acquire a few interests besides Bergdorf's windows," and he smiled to show that though he had uncovered one of her failings he thought no less of her.

"Beast," said Peggy.

"No," said Clay, and his hand tightened imperceptibly on Eleanor's knee. "I don't think you're being fair, Peggy. I don't think you understand what Eleanor's up against. It's her conscience. Me, I'm just a second-generation New Englander—a geographical accident; but she comes from a long line of hard-working, Bible-thumping pioneers, and it disturbs her when she finds herself with leisure on her hands. That's why she keeps that little engagement book so crammed. Have you seen it, by the way?"

"Who hasn't?" said Peggy.

The pressure on Eleanor's knee increased. What would he do if she told him to stop? Would his cast-iron aplomb see him through, or would he redden and stammer out some lame excuse? She never knew the answer, because at that moment the taxi stopped, someone opened the door, and they stepped out under the glare of a marquee.

Inside, as if at a signal that royalty had finally arrived, the curtain went up on a suburban living room with synthetic sun shining through windows without glass; a tall, thin youth in levis and battered white buckskins strode in, munching an apple; and Eleanor, with Clay's thigh warm against her own, tried to lose herself in a world of make-believe. . . .

"Another waltz," said Peggy, making a face. "I think waltzes should be put on the shelf with antimacassars and mustache cups. Somehow they always remind me of Dorothy Gish. Darling," she said, turning to George, who was making designs on the tablecloth with his muddler, "I know this'll rend you, but try to be brave. I'm leaving you for a few minutes. Coming, Eleanor?"

"All right."

"That is, if you can tear yourself away," said Peggy, with a glance at the hand—Clay's lean, elegant hand—that lay so casually, and with such tender possessiveness, on Eleanor's.

In the powder room a bored maid was sweeping cigarette ashes from one corner to another; and a very large woman with fat rolling over the top of her bodice was at one of the dressing tables, staring into the mirror with an odd expression, as if amazed that any face, in spite of paint, powder and treatments, could stay so bleak. Sighing, she got up and started out, glaring at Eleanor's pale elegance and Peggy's exuberant figure. The music, sweet and sensuous, filled the little space as she opened the door, and from a nearby table came the sharp, dry, expensive pop of a champagne cork. Finished, the maid returned the broom to a closet and slumped dejectedly into a chair.

Peggy said, "Well, blow me down, here I've been looking high and low for a lipstick like that, nice and chunky. . . . May I see it, please?" There was a pause as she admired it. Then she said, "Where'd you get it, Eleanor, or is that one of those secrets—"

"It's no secret," said Eleanor. "Clay had it made for me. There's a little man on Lexington Avenue, a refugee from Poland—"

"I know," Peggy said, sighing and handing it back. "A little man. How come there aren't any little men in *my* life? Me with my ready-mades! How come some people have *all* the luck?" and she made a face at herself as she shaped her mouth.

Outside, in the big, dim-lit room, the waltz ended on a long, smooth note; there was a moment of silence, and then suddenly there was a roll of drums as the orchestra went into a rumba.

"Still," said Peggy, "I've got George. Maybe that sounds funny, coming from me, but I've just made an amazing discovery. I love the guy. What's more," she said, patting a stray hair back into place, "he's in love with me. I never thought the day would come when I'd admit this, but I think if anything happened to him I'd die. I mean that. It'd be like bleeding to death. I'd just go all to bits and pretty soon they'd be putting me in a box. Love," she said, closing h

that never ceased completely
uld be heard, softly and distantly,
one who might lie awake through
pty night, staring at the long-since-
ized shadows on the ceiling. She opened the window and stood shivering in the cold.

Swiftly she went to the door and, after listening a moment, slowly and carefully turned the lock. How quiet it was, she thought; how serene the room, how sweet-scented and beautiful. Still shivering, she opened the bag on the dresser and took out the engagement book. Sliding in between the cool sheets, clutching the book like a talisman, she finally heard what she had been waiting for—a small, dry, familiar sound in the corridor—and she reached out and very quietly put the book on the table. Two minutes past one, said the clock. Slowly, gently, so the click would not be heard beyond the door, she turned out the light, and immediately the ceiling began flashing in time with the sign across the river.

CLENCHING her fists, feeling the sweat start on her forehead, she waited for the sound that invariably followed—the whisper of slippers on the carpet—and when it came she closed her eyes, thinking: Maybe he'll go away. Maybe this time he'll go back. Please, God, make him think I'm asleep.

The sound stopped. It seemed to hold its breath; there was a tiny, hollow groan as the knob was turned, first one way and then the other, then an infinitesimal echo, like the rustling of a leaf, as the door resisted the secret pressure; and finally, frankly, as though these overtures had existed only in her mind, a rap of knuckles: *One-two-three-four. . . .*

Desperately she tried to thrust it aside; but in the midst of the rapping, augmented now by Clay's voice, harsh, insistent, accepting no excuse, the image returned, and she saw herself in that unhappy little room at the inn, leaning against the wall with her hand on her mouth, listening to the sound of knuckles on the door; and suddenly she heard her voice, thin and wavering, as if it came from far away: *Yes, Jeff, yes, darling, I'm coming.* Slowly, with the precise deliberation of the very old, or of those who know horror, she turned the covers down, stood up and walked across the room.

A handkerchief spilled out of the breast pocket of his brocade dressing robe, and in the soft light his hair, slicked smooth for the occasion, gleamed like wet paint. For a moment they stood looking at each other, two strangers in the night; then Eleanor stepped back to let him in. From far below, somewhere on the river, came a long, derisive hoot.

Continued from page 25

into a full trot. The coach rattled over the stony yard, leaving new dust steaming in the still air. Half an hour later, when John Whitman had eaten and returned to the yard, it was a cloudy dust ball in the distance.

He went into the shadowed heat of the barn to mend harness, listening to the talk of the two women in the kitchen, and the rattle of dishes; then those sounds faded and the afternoon marched slowly toward its silent climax of heat. His awl punched holes, his needle carried the heavy thread through. A waxy clicking of insects drifted in the air's thinness; the odor of hay grew stronger around him. He was thinking it was time to plow the section at the head of the creek, and time to haul water for the trees. He looked up at the sound of steps on the rocky road and saw his wife come into the barn shadows. She was hot and she was tired; she sat on a box near his bench and she stared through the door into the sunshine. Now, he thought, she meant to tell him what the trouble was.

He said, "Light passenger load today."

"Light or heavy," she said, "it's people to feed."

"You want to quit cooking for travelers? We don't have to do it any more."

"If we didn't feed them they'd go somewhere else, and the stage wouldn't stop here."

"No harm in that either."

"If the stage didn't stop we'd never see anybody here. It's a lonely enough place now, without shutting everybody away."

HE WENT on with his sewing, weighing her answer and not finding in it the reason for her worry. She would tell him eventually, of course; but she liked to have him work for it. He said, "Web and Ellen have a quarrel?"

"How would I know? She doesn't tell me her affairs." But from the quickening of her voice he knew he had struck the source.

"Well," he said, "some quarrels always come up before kids get married."

"How do you know they'll get married?"

"I thought it was settled."

"It's just drifted along until maybe he's taking it for granted, or maybe he's not." Then she turned to him and he knew she meant to speak her mind. "How can she know if she wants him? There's no other man she can put against him, to judge him by. If there's only one man, how can any girl know if he's the right man? Ellen ought to have more than one man around her, but there's no other men in this godforsaken country. We're buried. We're clean out of the world. We might as well be Indians living in the willows down in the canyon.

"What's she got ahead of her? Just this one man to take or not to take. No other man. Any woman likes to know there was at least one other man who wanted her. Ellen's not got that. It's just Web. If she marries him, there's nothing ahead for her except to be a rancher's wife on the side of the hill in a hot little house without trees, without flowers. In an ugly, dirty land where it's too windy or too hot or too cold, nothing ever in between. No neighbors—nobody to talk to. That's what she's got ahead of her. She ought to be having fun. She ought to dance and flirt. It's such a little time she's got before she's old and worn out and her children grow up and leave. She ought to have that little time to be foolish and free. But she hasn't got it."

He stood heavily against the bench, both hands supporting his weight. He stared at her and saw she wanted to cry but wouldn't let herself do it; and her words were cruel things gouging through him and a stricken expression came around his mouth. She saw it and got up and, angry as she was, and as much as she had meant to hurt him, she showed her immediate regret. "Oh, well, John, it's just so hot, I guess."

He stared after her as she went back to the house; then he walked to the corner of the box stall and got his pipe and tobacco and made himself a smoke, and leaned against the barn door to look at the land around him—not to look at it as he always had, but to look at it from her eyes. For she had said more to him than she thought she had said. It was not only Ellen who was lonesome here; it was his wife, too. He hadn't known that.

The benches rolled forward from the canyon, one after another in their monotonous sloping and turning and twisting. Beyond the house lay a feed lot beaten into barren concrete by the feet of livestock; and upon the house itself the sun pressed, and no green thing grew about it. Chickens crouched beneath the broken porch boards, the gray-black rocks protruded like ugly teeth from the eroded soil, and over everything lay the dust of summer, which, in another month, would turn into the mud of winter. The leaves of the fruit trees hung limp; the burnt and thirsty shades were the only colors. This was the way his wife saw it. No doubt she had seen it this way for ten years, yet had said no word of complaint to him. He pushed the harness aside, sat on the bench and solemnly smoked his way through thoughts that little by little tore his good world apart.

The peak of the afternoon came on with its silence and its searching heat. He felt it arrive and he felt the moment of change when it began to lessen. He rose to hitch a horse to the water barrel sled and began his patient trips from spring to orchard. Coming in for supper he stood a moment at the door and looked across the falling slopes westward, then inside.

It was a silent meal—he depres his thoughts, his wife in the grip disturbed emotions, and his da carried far away by her own thi He rose immediately after his s brought in the cows, fed and them; he strained the milk and po into skim pans at the springhouse. light thickened while he worke brutal hand of the sun drew back the earth, and the long-suffocate began to exhale its heat and to suck faint moisture of the air. FRITZ WILKINSON

SPORTING ODDS

There was a track meet in which the winning pole vault scaled 3' 4" less than that taking second place. It happened in the 1918 annual interscholastic track and field meet for the high schools of Montague County, Texas. Here's how:

The meet was held in a drizzling rain, which made the vaulting pole so wet that contestants could not get a firm grip on it. With the bar set at 8' all entrants missed three times. It was lowered to 7' 6". All missed three times except one. He managed to get over on the third try and was declared the winner.

A moment later the rain stopped and the sun came out. The remaining contestants fought it out for second, third and fourth places. With a dry pole the second-place winner cleared 10' 10". Those who got third and fourth places easily topped the first-place 7' 6"

She watched hange, outwardly sober but in- pleased that some heat burned him to make his solidness a little avy. He said in sudden roughness, night," and wheeled away. . . .

At five, when John Whitman left the ranch, an early sunlight had begun to thaw the gray-green shadings of the earth into warmer colors and the air had a pearly translucence which brought far things forward. By seven he was at the top of Bakeoven Grade and moving over the undulating flatness of a table which ran for fifteen miles forward. Around ten he came upon a break and looked into a valley far below him, with the little cluster of buildings and poplars of Antelope town nested therein. Passing down the crooked grade he reached Antelope within an hour. He visited his friends, had his beer at the saloon, and went to Erd Merkle's house for dinner. It was Merkle who told him about the Gustavson couple who had come from Portland to find work; he located them —a big plain woman and a colorless man—talked with them a few moments, and hired them at fifty dollars a month.

That was his main chore completed, but he strolled through the town a longer while having a close look at it for the kind of work he might do when he moved here; and as he passed along the houses he noticed the things his wife would like, the closeness of the neighbors she longed for, the flowers growing against the porch walls, the shade, the grass yards, the church with its socials which she had missed for so many years. Going back to his horse he had a feeling of sadness from knowing that he had taken so much out of her life. Then, as he left town, he observed the sign on the Odd Fellows Hall door, DANCE TONIGHT, and sudden comfort came to him. This was where Ellen could meet many young men. It was a little late for his wife; but it was still time enough for Ellen.

He passed up the long climb from Antelope's valley to the table in a poor frame of mind. The place on Bakeoven Creek suited him. There he felt free, beholden to no living soul, whereas Antelope's houses would always be a shadow on him. Towns he hated; never had he lived in one longer than three months, never had he felt at ease while in them—and wouldn't now. He thought about this as he rode across the flats, and saw a rig coming in from Bakeoven way at a steady run. Habit made him watch it closely and habit set him to guessing who was in it; yet he had the other thing in his head at the same time and knew he would make the move into Antelope as soon as he could sell the Bakeoven place. It was his wife's right. And Ellen's, too.

THE rig whirled forward. Suddenly, identifying the two people in it, he drew his horse to a stop and waited until Ek Long, driving the rig, came abreast and halted. Ellen sat beside Ek. She had been laughing.

He said, "What's this?"

"I'm going to the dance," she said. "I'll stay with the Prettymans tonight and come back on the morning stage."

"Not worried about my driving?" asked Ek Long in his easy, insolent way.

"Not your driving," said John Whitman and gave Ek a long, drilling glance. He held it on Ek a long while, giving the man the black, dangerous edge of the aroused thing in his head. Then he looked at Ellen and quietly said, "I hadn't known about it."

"Mother knew," she said.

"Why, then," said John Whitman, "I've nothing to say. Have a good time."

He sat motionless for a moment, watching the rig run on, and then resumed his homeward travel, going down Bakeoven Grade in the last full blast of sunshine. He put up his horse and went directly to the house. His wife looked at him with her covert curiosity as he went by her to wash up on the back porch; and gave him the same expectant glance when he sat up to the table. She was waiting for his anger to come out.

"Why didn't you mention it?" he asked.

Another good picture "gone to pot"?

"You wouldn't have let her go."

"You know his reputation as well as I do."

"She can take care of herself. She's no wild girl."

"It'll do her no good to be seen with him."

"It'll do her better to be seen with him than never to be seen with any man."

He sat silent; it went hard with him to think of Ellen with a man like Long. His father's dream of a daughter's sweet child purity came roughly against another thing he ought to have seen earlier; for, bringing the image of Ellen before him, he recognized the woman in her eyes, in her mouth, in all the turnings of her body. Why had he been so slow? He had kept her a child in his thoughts too long.

His wife had her sharp retort waiting for him, but she studied him a drawn-out moment and spoke with unexpected kindness: "Nothing's wrong. She just wants to be alive."

"If she's giving Web up for Ek, she's made a bad choice."

"She's just going to a dance with a man who had spirit enough to ask her. Every girl's got dancing in her bones. They're born that way. They've got a right to it." She felt her daughter's loneliness again—it was bright and bitter in her eyes. "Maybe Ek's a chaser, but he knows what a girl hungers for. If Web Gordon wants her he'd better treat her like a woman instead of an old crone of fifty. She'll be fifty soon enough."

He saw how hard it was for her to think of Ellen growing away from girlhood and he said, most gently, "We all get old. No use to hate what can't be helped."

"Too old too soon," she retorted.

He felt again a leaden regret. She was speaking out of her own life. He said, "There'll be a hired couple coming on the stage in the morning."

She made no answer; she seemed not to find pleasure in the thought of help. It made him say, "Is that all right?"

"How much you paying these people?"

"Fifty dollars a month."

Her mouth tightened. She looked down at the table. "It's your money to waste, Whitman."

He left the room and took a seat on the porch to smoke his pipe. He was a slow man, he thought; he had taken pride in his slowness but maybe he had spoiled her life by it. He watched the freighter's fire blooming in the growing shadows and he listened to the music of a guitar drift along. Ellen came to his mind and his worry grew. Neither his wife nor Ellen knew how bad a man Ek Long really was, having and using a woman in whatever town he passed through. He sat in the chair and slowly suffered from his imagination, and decided he had to kill Long if Ellen came home crying.

HE WAS at his harness mending in the middle of the forenoon when Web Gordon rode up and came into the barn.

"Ellen back?"

"No," said Whitman. "Noon stage."

"Doesn't she know what kind of a fellow Ek is?"

"I can't say what she knows, or what any woman knows. It comes to me, though, that they know what they want to know."

Web Gordon said, "He's no good." He paced the barn aisle, suffering from his imagination as John Whitman had earlier suffered. His face was squared by anger and his eyes were rough with the desire to get his hands on Ek Long. It surprised John Whitman to see this excitement come out of a boy who had always taken things as they came. Web halted. "You shouldn't have let her go. I don't know what got into her. She's going to marry me. It's no thing for her to be going off with somebody else."

"Maybe," said Whitman, "she wanted to get away from here and have some fun."

"Work comes before fun," said Web.

"That's for old people to think. You sure she's going to marry you?"

Web Gordon walked out of the barn. Whitman thought he had gone home but, at eleven o'clock when he stepped from the barn to sight the stage breaking over the rim into Bakeoven Grade, he saw Web in the orchard, staring up the slope toward the stage's unrolling ribbon of dust. Whitman thought: *He's all shaken up about the girl. That's what the damn' fool ought to show Ellen, instead of his poker face. That's what she wants—it's what they all want. It's why men like Ek get so far with women.* He called across the dust to his wife in the kitchen. "Stage in sight," and went back to harness up the fresh relay horses. The Gustavsons were due on the stage, and so was Ellen. Thinking of her suddenly, a quick fear unsettled his stomach. He let the horses stand in the stable and walked to the house bedroom to get his .44 and return it to the stable, laying it on a ledge of the box stall. If he saw the wrong thing on Ellen's face he'd have to kill Ek Long.

The stage came down from the grade and struck the ranch meadow with a tremendous swaying and lifting; it was Ek Long showing off to Ellen, who sat beside him. John Whitman steadied his glance on his daughter while the stage came into the yard and the four horses, hard-pulled, came to so sudden a stop that their iron shoes struck sparks from the rocky road. Ek Long threw down the reins, dropped from the seat and swung Ellen to the ground. Whitman never let his attention waver from her face; he saw her laughing, he saw her pleased, he saw no shadows. She had danced most of the night and she had ridden all of the morning, but still the freshness was on her.

Whitman said, "Is everything all right?"

"Why, of course," she said and kissed him and wheeled away. She threw a glance at Ek. "Now I have got to work." Then, half around the horses, she noticed Web Gordon standing near the corner of the barn, and the smiling died and she stared at him with a mysterious smoothness that told him nothing and hurried into the house.

The passengers went in for their meal; the Gustavsons were waiting in the dust. Whitman said to Mrs. Gustavson, "Go in and see my wife." To the man he said, "Get your luggage out of the boot." led the old horses away and brough the fresh ones and hitched them up stood by with the reins in his watching Gustavson slowly lift anc down a collection of boxes and v and quilted bundles. The woman all right, but the man didn't have energy. It was always that way man-and-wife combination: one of pulled the load for the other.

WEB GORDON remained a corner of the barn. Whitman his pipe and lighted it, and cast a glance toward the young man, seeir temper crowded into his face. thought Whitman, it's to be a fight could stop it if he wished, or he cou it go on; and he gave a little thought No, he decided, I'll let it go on watched Ellen and Ek Long come the house. They walked aroun horses, ignoring Web Gordon, slowly moved forward. Ek laid his on the coach rail to lift himself t seat.

Web Gordon said, "Step behin barn a minute, Ek."

Ek Long turned about. His face stiff and his glance was a bright j Web Gordon. "I've got a sched keep, which comes before lickin' da fools like you."

"You're too easy with other girls. I've got to teach you better.

"You'll teach hell," said Ek Long was careful, even in his insolence, to his eyes on Web Gordon. He n aside, cat-quick, figuring this heav to make a bull rush at him. He w be the ax and Web the chopping b But Web Gordon swung when Ek swung and he caught the stage d arms in a tight hug and pinned the lifted Ek Long from the groun slammed him back against the side coach. It was a first show of str He released Long and stepped bac quite sure what he wanted to do the man. He said, "You've bust too many homes. Like Bissner ar wife. I've a notion to crack your da neck. I'll tell you. Don't drive on this line any more. I don't wan around."

Ek Long stared back, so willful his eyes that Web Gordon slashe across the face and became a terrier ing in. Long whirled to clear the and put open ground behind him retreated until he had room for hi

The young man dismounted
at the foot of the porch, look-

ing past Whitman to the door. Ellen, Whitman thought, must have been long waiting at the door, for she immediately appeared and the two walked toward the trees. They didn't begin to talk until they had got well beyond his hearing; all he caught was the rise and fall of tone in the darkness.

Web Gordon said, "Maybe it was a bad thing to do, but I know him too well. I know you wanted to dance. Well, then, we'll dance, Ellen—if it means that much."

"I thought you'd be hauling wood out of the forest."

They reached the orchard and paused here. She stepped away from him, putting her back to a tree. She looked up to him, closely watching his face.

"Do you think I could?" he asked. "You think I had any heart to work? You think I've had any peace since you left, thinking how you were, and other men making you laugh when I ought to be doing that?"

She was silent, intently reading him, clearly feeling what was in him; and suddenly she came away from the tree to him, and he put his arms around her with the rough haste of a young man at the end of his tether. She laid a hand gently against his chest, having first a thing to say to him, "Web, I'll never cause you trouble again. If you truly want me, everything's all right."

JOHN WHITMAN had finished his third pipe and his wife had joined him on the porch, when the youngsters strolled in from the orchard. He observed how stiff his wife was until she saw Ellen's face, and how loose she became when she heard Ellen's voice gaily cross the night. "We're going down to look at the two-room place."

John Whitman's wife said, with a calm that made him marvel, "Why don't you hitch the buggy and drive down?"

The two had drifted past into the darkness again. Ellen's voice came back with its laughter, "Plenty of time to walk," and thereafter the footsteps of these two softened and grew small in the distance.

Whitman said, "It seems settled. You're not pleased?"

"Of course I'm pleased," said his wife.

"I had thought you wanted her to see more men."

"It was just that—" Then his wife gave a little sigh and added, "Oh, never mind. It's come as it ought. I'm happy enough to cry."

"Well, then," he said, "we can think of moving to Antelope."

"And leave Ellen with one less neighbor? Do you think I'd go before the first baby comes? Now isn't that foolish?" She dropped her voice: "Whitman, I don't want that new woman around. She's underfoot. She makes me feel like it's not my place. Get rid of that couple."

"It was to give you a little help," he said.

"When I want it I'll say so."

The crickets were singing for winter, and night came solidly in and a breath of breeze crept along Bakeoven Creek. It was the faintest touch of wind that gave him the sensation of the earth rushing outward into the blackness and endlessness of space. He relighted his pipe and his lips made puckering sounds. Yesterday he and his wife had been young, and Ellen a child, and tonight she was a woman anxious to sleep with her man. It had come on before he knew it. He grew entirely still in the chair, patiently waiting to catch the close-by meaning of that strange thing which carried him so cruelly, so rapidly, through the days of his life; it was for an instant at the end of his fingers, and then he lost it entirely. He relaxed in the chair.

"We'll keep the couple a week," he said. "I can dig some ditches with the old man's help."

THE END

Is this included in your son's school budget?

Oops! Looks like a siege at the hospital for this lad . . . and stiff medical expenses for his dad!

Suppose this happens to *your* boy or girl at school. Can your pocketbook stand the jolt? It will if you have provided for protection: Hartford's Medical Reimbursement Accident Insurance. This policy is designed for students five years old and up, offers a choice of combinations. For instance:

	ANNUAL COST *GIRLS*	*BOYS*
(1) Up to $500 hospital, nursing and medical expenses	$12.75	$14.00
(2) Up to $500 hospital, nursing and medical expenses; up to $5000 for accidental loss of limbs or sight*; special allowances for specified fractures, amputations and dislocations, up to $162.50*.....	15.00	18.00
(3) Same as No. 2 plus $1000 for accidental loss of life*	16.00	19.90

*Double for special accidents.

Now, before the Fall term starts, give your child—and your budget—this low-cost protection! See your Hartford agent or broker for full details.

"GIVE ME THE RIGHT EQUIPMENT TO PROTECT YOU" Fire-fighting is a bigger-than-ever job today. Your Fire Department can do it better if you see that they have the latest equipment. It's a sound investment!

FRIEND TO GENERATIONS OF AMERICANS

Ever since 1810, Americans have been turning to their Hartford agents for expert help in protecting their homes, savings, businesses. Join the protection parade!

Collier's believes...

...CONGRESS BETTER BE CAREFUL

WELL, the House Appropriations Committee the other day came near putting its foot into its mouth in just about the most ghastly manner imaginable.

The committee okayed a $56,000,000 fund for the legislative branch of the government—meaning Congress and its appurtenances—and included a recommendation that no federal funds be paid to any employee belonging to a union whose officers had failed to file affidavits that they weren't Communists.

The main object was to prod Government Printing Office employees belonging to the International Typographical Union (A.F. of L.), whose leaders up to that time had refused to swear that they were no minions of Moscow.

Come to find out, though, several members of Congress itself belonged to unions whose leaders were similarly stubborn on this point. That meant that if the fund were approved as recommended by the Appropriations Committee these union congressmen's $12,500 salaries would stop.

The danger was perceived in time, and now it's a 1,000-to-1 shot that Congress won't ever put such a knife to the bank accounts of its own members. But the incident is certainly a lesson that lawmakers should take to heart; the lesson being that you can't be too careful in drawing up even minor laws or appropriation bills.

When it comes to explosive powers and the ability to blow up in your face, TNT sometimes hasn't a thing on the pen or the typewriter.

. . . WE NEED LABOR STATESMEN: The phrase "labor statesman" is a bit of a mouth-filler, and perhaps overworked, to boot. But we don't know of a better term to describe the kind of man we think the United States badly needs today.

We have a crop of labor leaders who are highly competent so far as they go. John L. Lewis seldom fails to get what he starts out after for his coal miners. The Steelworkers Union (C.I.O.) hasn't done at all poorly under Philip Murray, for all Phil's moans and groans to the contrary. The Railway Brotherhoods have succeeded in fastening impressive wage scales and even more impressive featherbedding rules on the carriers.

So it goes; and within reason it's fine. As Henry Ford, Sr., loudly remarked in 1914, workers in a capitalist economy must be in position to buy a lot of the goods they make if the economy itself is to survive.

But there is a limit. That limit is reached when employees or their leaders lose sight of the company's or the industry's over-all productive power and potentialities and set out simply to milk it of every dime they can.

When that happens, we have a few rail unions threatening to tie up the country with a strike unless granted higher wage hikes than those their fellow unions have already accepted as fair. We have Lewis choking the mine operators—and the nation—for higher and higher coal prices regardless of what those prices will do to the general public. And we have many other sinister and dangerous episodes in this same category.

The end of it could be the wrecking of the American system and people; nothing less.

If we are to by-pass such a catastrophe, it seems to us the nation will have to evolve a new kind of labor leader. He would be a man who understood economics as well as he knew how to fight with his mouth at a collective-bargaining table. He would have the courage to educate his followers in the basic facts of industrial and economic life: that it is suicidal for any one group to play the hog; that the only way to get more pie all around is for everybody to produce more and more efficiently, and thereby keep enlarging the pie; and that neither laws, smart labor politicking nor strikes can change or dilute these facts. This new-style labor statesman, too, would be smart enough not to let himself be maneuvered into positions where the hopped-up ambitions of his men forced him to demand bigger pay increases or more benefits than he knew the traffic could safely bear.

On occasion, he would have the superlative courage to say things like this: "Now, boys, I'm sorry; but we've come to a point in this company or this industry where we'll have to agree to a pay cut. If we don't, we'll kill off our own jobs, because the boss(es), in the present market, can't sell enough of the product to pay the wages we've been getting, let alone go for a raise."

There have been and are a few of such labor statesmen in this country. It is surely no coincidence that these few have always had the respect of their followers and those followers' employers, and haven't driven employers to the wall and employees out of jobs by impossible demands. Unless we can develop quite a number of true labor statesmen, and rather swiftly, it looks as if the country is in for a bad if not calamitous time laborwise.

. . . JOE MUST BE RADIOACTIVE: Some strange stories come out of Soviet Russia these days; but, if you ask us, the most wonderful one in at least two years last past was the recent yarn in the Moscow Izvestia about Joe Stalin's Black Sea trip in August, 1947, aboard the cruiser Molotov.

To hear Izvestia tell it, a sort of supern glow was still clinging to this Red Navy vesse months later. The Molotov's sailors were sol reported to treasure in their memories every of Stalin's stay with them. Those who had near to him at any time, or had spoken wit great man, were alleged to "enjoy special sym from their comrades, as if there still lies in t trace of Stalin's attention."

We suppose that if one of them had snitc lock of Joe Stalin's hair from the ship's b shop the lad would be a Hero of the Soviet U by acclamation.

All we can say is that Joe Stalin must be active, to leave an afterglow like that in his Ain't it too bad we don't grow such miracle in our own benighted country?

. . . THESE ARE THE WORST DRIVERS: Lo back over quite a number of years of ridi motor highways of the United States we hav nominations to offer for the title of Most Da ous Driver.

They are: the snail on wheels, who drives a deal more slowly than the traffic around h her; and the road hog who waddles along at surely pace in the fast lane and refuses to over to the slow lane.

We have no statistics on the subject. Pe none can be had. But we think it stands to r that these two driver types are the most dang of all. For one thing, there are so many of as a Sunday-afternoon ride on any fairly pop highway will demonstrate. For another, slowpokes and road hogs infuriate many drivers, and tempt them to take chances on p on the right, cutting over momentarily into t posite-direction lane, or even giving the offe car a nudge with the trusty old front bumper

Any of those measures of desperation can an accident. You can't lay the whole blam such mishaps on the slow or hoggish driver, l our opinion he or she rates at least 75 per c the blame.

If these birds would just get off the road stay off, or let somebody else do the driving they admire the scenery, we have a hunch th terrific annual motor-accident totals would t nose dive.

Any other nominations for Most Dang Driver? Pending receipt of powerful proof t contrary, we think we've got the two champ to which of the two is the champ of champ the chump of chumps—we haven't yet been a make up our mind.

re you chained your Whisk-Broom?

RE USING a whisk-broom to get after embarrassing telltale flakes of the in- s type of dandruff you're fighting a battle.

e's a better way . . . a tested way . . . s helped countless men back to better ealth.

Listerine Antiseptic and massage used ly. It treats infectious dandruff as an on should be treated . . . with germ- action.

es? Scales? Listerine Antiseptic Quick!

have the slightest evidence of this on—flakes, scales, or germs—start with e Antiseptic now! Douse it full strength scalp, and follow with persistent and us fingertip massage.

As Listerine Antiseptic spreads over the scalp it kills literally millions of scalp germs, including the "bottle bacillus" (P. ovale), a causative agent of infectious dandruff in the opinion of many noted dermatologists.

Quick Results!

You will be delighted to see how quickly ugly flakes and scales begin to disappear, how readily itching is alleviated. Your scalp feels so clean, so cool, so healthy.

Remember, in clinical tests twice-a-day use of Listerine Antiseptic brought marked improvement within a month to 76% of dandruff sufferers.

Incidentally, Listerine Antiseptic is the same antiseptic that has been famous for over 60 years in the field of oral hygiene.

ECTIOUS DANDRUFF? LISTERINE ANTISEPTIC — Quick!

P.S. IT'S NEW! Have you tried Listerine TOOTH PASTE, the MINTY 3-way prescription for your teeth?

BOSTITCHING "GROWS" GARDENIAS 6 TIMES FASTER

Improving on Nature, florists now fasten gardenia leaves to make corsages better. One of the largest growers upped his production SIX TIMES with Bostitch stapling machines. Workers are happy and costs are down.

OTHERS SAVE WITH BOSTITCH

Furniture maker staples plastic strips over rattan joints more neatly and securely at 30% lower cost with Bostitch tackers. *Bottle-cap manufacturer* cuts carton-sealing costs in half with Bostitch Autoclench staplers. *Market-basket maker* also halves costs by Bostitching handles and rims.

YOU CAN SAVE, TOO

Bostitching offers you better, faster, lower-cost fastening of combinations of wood, metal, cloth, paper, plastics and other materials. The chances are that one of the many hundreds of Bostitch machines will fit your requirements exactly. 275 field men in 112 key cities in U. S. and Canada are ready to apply 50 years of skilled Bostitch research and fastening experience to your fastening problems.

Ask Bostitch for suggestions that will make your production "grow", too. Send coupon today.

BOSTITCH

fastens it better, AND FASTER with wire

THE WEEK'S MAIL

THE PERENNIAL ASTOR

DEAR SIR: Re your editorial on Lady Nancy Astor (You Needn't Ask for It, June 12th): Why waste space and irritate Anglo-American relations with such pernicious nonsense? If you must print such rubbish why tell only half a tale? Why not continue to tell your readers that the Astor family is an old American one and that Nancy Astor was born at Miradon, Virginia, in 1879? Perhaps the "advice and manners" were home-grown in this case.

T. W. HARVEY, Temple City, Ca.

. . . As a Britisher I wholeheartedly agree that Lady Astor is a difficult alien who came to Britain and had the bad taste to mingle in politics. She sure has caused us a lot of trouble.

We don't claim her as one of us and you don't want her back, for that, nobody can blame you.

JOHN BULL, New York, N. Y.

IS YOU IS OR IS YOU ARE?

DEAR SIR: Here I am on a business trip parked in a lonely hotel room, far, far away from my Oakland, California, and I'm down to reading about international affairs. It irks me to pick up a grammatical error such as John Foster Dulles made in Can We Guarantee A Free Europe? (June 12th), when he says, "None of the special circumstances which exist are important enough, etc." John should have said, "... important enough."

JAMES C. PRINDIVILLE, Salem, Or.

Webster's International states: "As subject, 'none' with a plural verb is the commoner construction."

SPEECH SHE ARE FREE

EDITOR, COLLIER'S: In your editorial Wallace Should Be Heard (June 12th) you say Henry Wallace is peddling the Communist party line and anybody who votes for him knowingly or unknowingly next November will be voting to sell the United States down the river to Joe Stalin. But you say Wallace should be heard. I do not agree.

Article IV Section 4 in the Constitution says the United States shall guarantee to every State a Republican form of government. Do you think the two articles above are consistent? Why raise hell with a few actors who have no great amount of political influence, spend time and money investigating their alleged Communist leanings by Congress and give a free pass

HUMAN GYROSCOPE

BY BILL FAY

AT THE audacious age of sixteen, Bruce Harlan grasped the railing of Media Bridge near Philadelphia, flipped forward and upward, found a smooth spot for his head and, balanced comfortably thereon, enjoyed a unique and inverted view of the Pennsylvania countryside—300 feet below. Several weeks later, still looking for upside-down worlds to conquer, Bruce executed a handstand on the rooftop ledge of an Ocean City, New Jersey, hotel.

Either performance might have launched Bruce prematurely on the diving career which has made him the national platform and low-board champion. Fortunately, neither did and there were no encores. Parental pressure brought him down to earth, or close to it.

During the next two years Bruce merely crossed his bridges when he came to them. Meanwhile, he pole-vaulted 12 feet—a stratospheric height for a fellow only five feet six inches tall—and won the Philadelphia interscholastic wrestling title by throwing three 112-pound opponents in four minutes and one second. Around Lansdowne High School they expect Bruce's record to last forever.

In 1944, shortly after his eighteenth birthday, Bruce went into Navy boot training at Bainbridge, Maryland, and accidentally executed his first dive—without hitting the water. He wandered onto a diving board, bounced a bit and—intrigued by the springy action—casually rolled into a somersault.

Swimming instructor Adolph Kiefer, the former world backstroke champion, couldn't believe it. "Do that again," Adolph ordered. Bruce

Bruce Harlan's phenomenal sense o balance gained him his gyroscopi label and the intensive coachin that made him a diving champio

turned three more somersaults an made perfect two-point landings o the whippy board each time. "K you're a human gyroscope," Kie declared.

After that, wherever Harlan we in the Navy, Kiefer saw to it that gyroscopic protégé had plenty coaching. Lieutenant Jack Smith a Wave Lieutenant Helen Perry, bo ex-diving champs, tutored Bruce the Jacksonville, Florida, naval a station.

Within a year Bruce won the So Atlantic States junior title. Then captured the 1945 national spr boards, the 1946 national three-mete and swept the national three-met and platform titles last summer.

Considering his youthful ha standing, it is not surprising tha Bruce has done his best diving o doors Indoors, his Ohio State tea mate, Miller Anderson, usually w Not that they are much more thar soft splash apart in any meet. Bruc beat Miller for the national three-m ter title last summer by 5/100 of point—198.35 to 198.30.

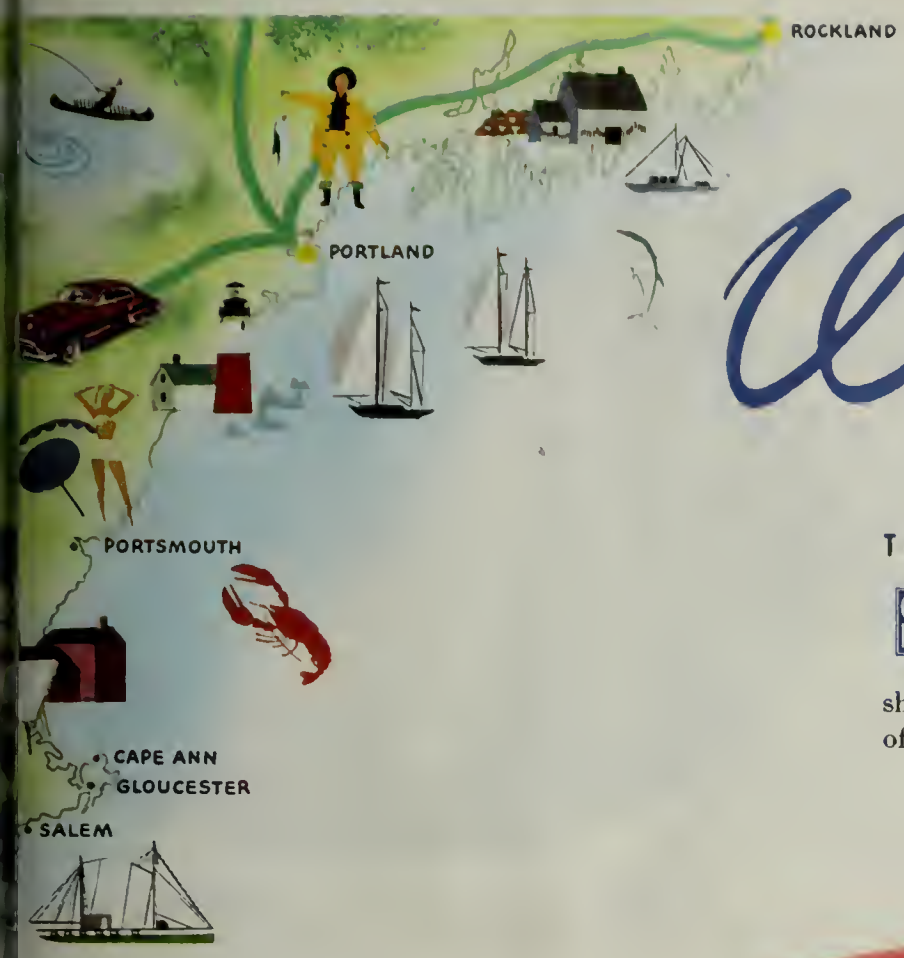
Anderson, a P-47 dive-bomber p lot, was shot down near Rome on h 112th mission. In bailing out, his le leg was almost torn off by the P-47 whiplashing tail. When Miller limpe back to Ohio State in 1945, doctors o dered him to stay out of the water u til his left knee—riveted together b silver plates—healed completely. Mi ler made the shattered leg stron enough to challenge Harlan for t Olympic title by practicing take-offs into a sand pit.

CONNIE'S KID

Back in the middle 1930s, Con Mack's Philadelphia Athletics stopp en route from Florida for an exhi tion game in the mule-trading town Kannapolis, North Carolina. A loc citizen buttonholed a newspaperma

"Who is that," the fan wanted know, "Connie Mack's older brother

The fan was pointing to Ea Mack, Mr. Mack's son and heir a parent for 24 years.



It is not true that Earle has be around the A's long enough to Connie's older brother. It just seem that way. Earle Thaddeus McGil cuddy was born February 1, 1892, a did not enter upon the Shibe Pa scene until 1910. Earle was listed a catcher, but he played one gam without proving it. Then began wearying trek through the minors wi sporadic returns to Philadelphia. Ev though Connie loves Earle dearly, t record book testifies that Earle parti pated in only five American Leag contests.

Meanwhile, Earle was meeting w some minor-league managerial su cess. He maneuvered Moline to couple of Three-I pennants a steered Martinsburg to the Blue Rid flag in 1923. Next spring, he was warded with a Philadelphia coachi post and designated Connie's su cessor.

When Connie took Earle off first-base coaching line this spri someone asked if it was because age.

"That's it," Connie laughed. "Y know he's getting up in years."

KEEP UP WITH THE WORL

BY FRELING FOSTER

Shoppers in a new type of grocery store, opened recently in Houston, Texas, sit in chairs facing a long counter and select their foods from the variety passing before them on a moving belt. After taking off all the items wanted, the customer places them, with a slip bearing her name, on another belt slightly higher which carries them to a desk where they are checked, wrapped and delivered.

An unusual attraction touring the United States this year is the Dunn Bros. Circus, a miniature model that required 18 years to complete and is built on a scale of one-half inch to the foot. With its electric lights, public-address system and animated sections controlled through a panel, the circus occupies a platform 34 by 83 feet and contains, besides scores of cages, trucks and ticket booths, 54 tents, 3,500 animals and 4,500 performers, employees and spectators.

American slang terms whose use is confined almost wholly to a particular region or occupational group include, for example, City Juice (water), Dazzle Dust (face powder), Skull Doily (a wig), George Washington (a hatchet), Fire Drill (a henna rinse), and Flame Thrower (a man successful with the ladies).

No known record for siring offspring equals that made by the Holstein bull, Rag Apple, before his untimely death on February 29, 1948, at the headquarters of the New York Artificial Breeders' Co-operative in Ithaca, New York. During the three years and four months Rag Apple was in service, he sired, through artificial insemination, more than 15,000 sons and daughters (an average of 87 a week), or 150 times as many as he would have produced through natural breeding.

During the Revolutionary War, George Washington used 19 houses as his military headquarters at various times for periods of several weeks. A recent checkup of these houses shows that 15 are still in existence and are being preserved by government agencies or patriotic societies.

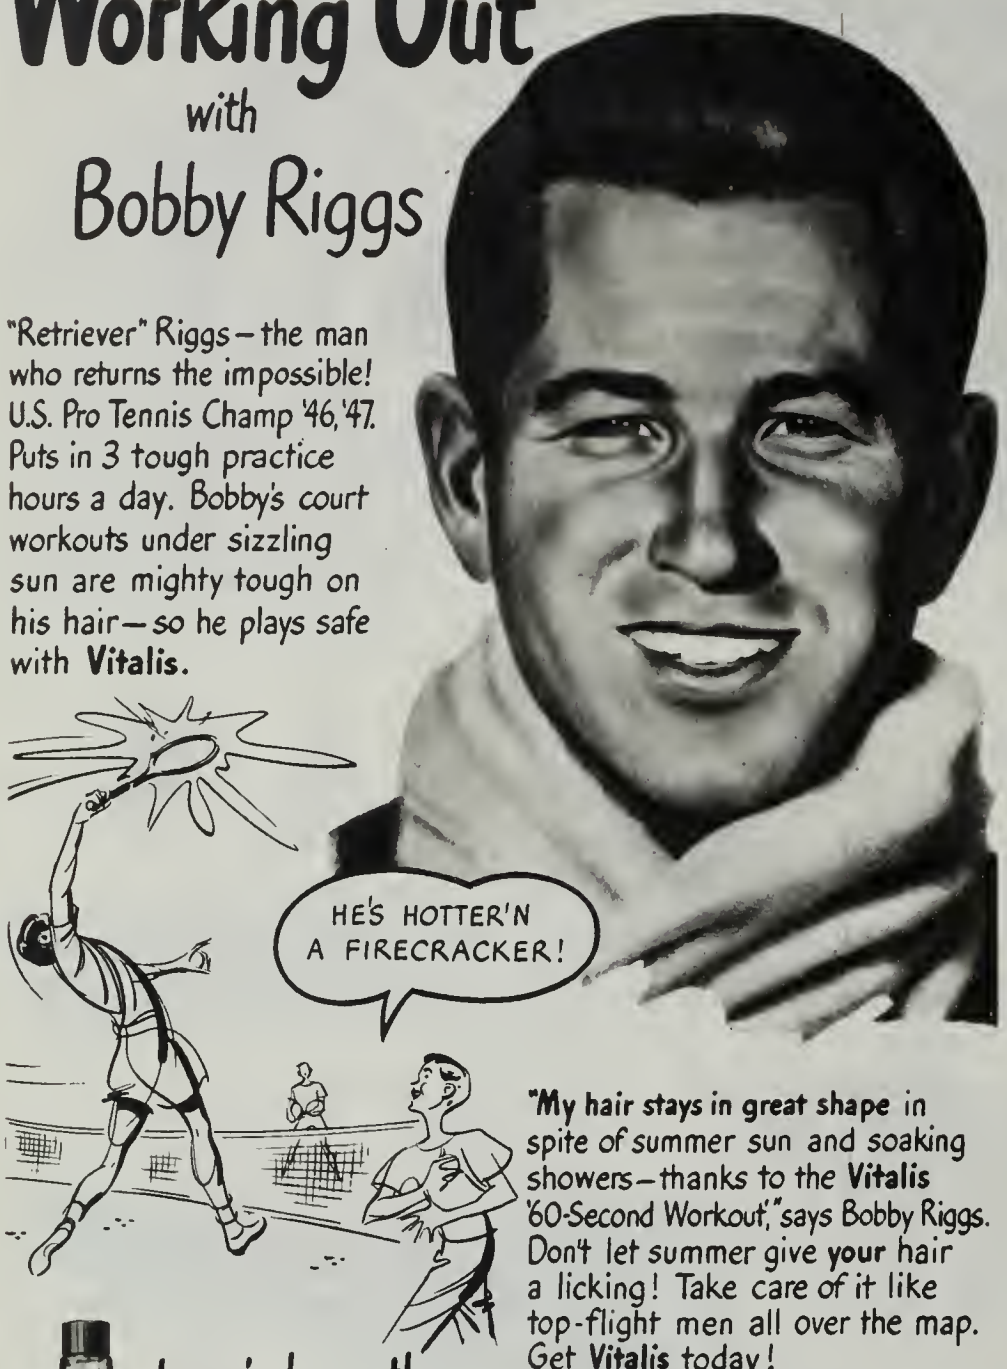
ound in warm water on both the At-
Pacific coasts, has only small pincers.*



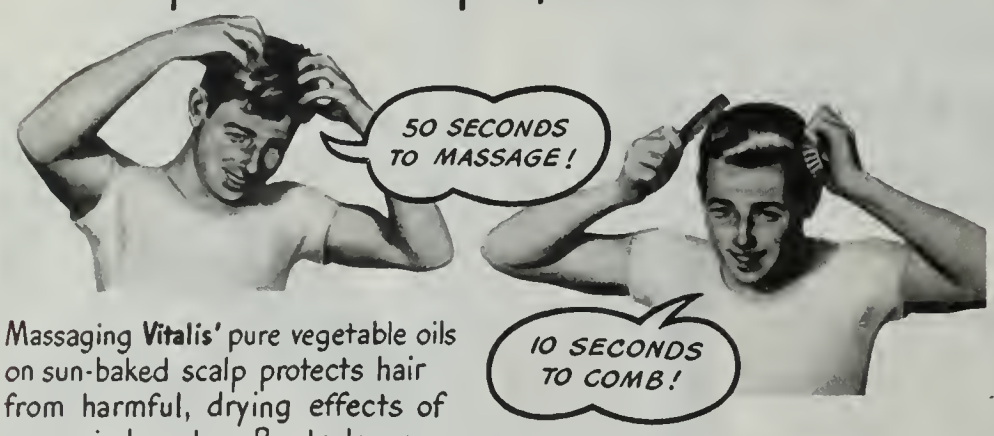
To get the best performance from your car, use high quality gasoline improved with "Ethyl" antiknock fluid—the famous ingredient that steps up power and performance.

To show you their best gasoline contains "Ethyl" antiknock compound, oil companies display "Ethyl" trademarks on their gasoline pumps. "Ethyl" fluid is made by *Ethyl Corporation, Chrysler Building, New York 17, New York.*

Working Out with Bobby Riggs

"Retriever" Riggs—the man who returns the impossible! U.S. Pro Tennis Champ '46, '47. Puts in 3 tough practice hours a day. Bobby's court workouts under sizzling sun are mighty tough on his hair—so he plays safe with **Vitalis**.

"My hair stays in great shape in spite of summer sun and soaking showers—thanks to the **Vitalis** '60-Second Workout,' says Bobby Riggs. Don't let summer give **your** hair a licking! Take care of it like top-flight men all over the map. Get **Vitalis** today!



here's how the

Vitalis "60-Second Workout"

Product of Bristol-Myers

keeps hair summerproofed and handsome

Massaging **Vitalis'** pure vegetable oils on sun-baked scalp protects hair from harmful, drying effects of sun, wind, water. Routs loose dandruff. Helps check excessive falling hair.

Now hair is no longer dull, brittle, hard to handle. Looks **naturally** well-groomed. No greasy, "patent-leather" shine—**Vitalis** contains no mineral oil. For a complete summer hair-conditioning, use **Vitalis!**

P. S. Your barber is an expert. He knows how to keep your hair looking its best for summer. Ask him about Vitalis and the individual, sanitary Sealtube application. *Vitalis and Sealtube are Bristol-Myers trade marks*

THE WEEK'S WORK

Igor Cassini and his beautiful wife Elizabeth, lately acquired

IGOR CASSINI (see dissertation on current unemployed royalty —Royalty in Wraps, p. 22) is grandson of Count Arthur Cassini, for whom Port Arthur was named, and who became first ambassador of Russia to Washington. Igor was born in Sebastopol, Russia, in 1915, was educated in Switzerland and Italy, arrived here in '37 with $11 in his pocket. He started writing for a New York Italian paper, and improved his English sufficiently to found These Charming People, a society column in Washington's Times Herald.

Uncle Sam then called Igor, who treated the Army brass for Stars & Stripes just as so many Charming People. On his discharge William Randolph Hearst drafted Igor for the post of Cholly Knickerbocker, social chatter writer. Now Igor dissects society with a capital S-s-s! for millions of anxious syndicate readers.

"MY NAME is Max Shulman. I am squat and moonfaced. I write all kinds of stuff," the author of The Small Time, strictly a yamola of a Broadway yarn (p. 14), assures us. "In fact, I write nearly everything except radio scripts. That is because comedians go around talking about 'my writers.' Like 'my neckties' or 'my ulcers.'"

The Shulman writing is done in an office in downtown Westport, Connecticut, from ten to four thirty, on a typewriter, using paper. This takes the Shulman mind off the distractions of the home: three sons, one wife, the phone and doorbell, the noise of the kids hacking away at the foundation, and the hiss of crab grass popping through the flagstones. "How can you concentrate on how the Boy gets the Girl when your mortgage hangs directly over your typewriter?" he cries.

The Small Time is a Shulman office-done job, and he wrote it because he was touched by the would-be entertainers who, having panicked 'em in the senior-class play, flock to the theatrical agents with stolen material instead of sensibly going directly into the insurance business.

Mr. Shulman's knowledge of Broadway, he says, is recent. He's from Saint Paul, Minnesota, University of Minnesota '42, and among his classmates were Tom Heggen and others now writing instead of working for a living.

Mr. Shulman has several zany books to his credit, adapted one of them, Barefoot Boy with Cheek, to the musical comedy stage, collaborated with Tom Heggen on the first draft of the play Mister Roberts.

SEVERAL years ago a friend of Lewis Nordyke's, out hunting armadillos for basketmaking, saw one disappear into a hole in the ground, and grabbed what he thought was the animal's tail. It turned out to be a rattlesnake, which promptly i the man's shoulder. He lived struggle and it impressed Mr dyke so, Mr. N. stopped pul madillos out of holes, and studying them. He chucked arm into lakes, learned that in ord float they pumped themselves gasping in air; even devised th ory that the reason armadillos well armored is because in things are never done halfway.

One day when Mr. Nordyk prised an entire tank corps c hardened little beasts in a woods, the idea for The Amazi madillo (p. 48) was born. "F years of observation went into says.

Mr. Nordyke's a native Te graduate of the U. of Missouri, writing Texas politics for the A (Texas) Globe-News. His affin animals and writing of them from the days of his trapping "I've since learned there's more in the former activity," he says.

Does your job make you SICK?

BY LESTER VELIE

Staff psychiatrists of big corporations, experimenting in mass mental health, may change our whole concept of round pegs and square holes and of why some people fail or are unhappy in their jobs. It's most apt to be due to emotional troubles seldom connected with their work

URING one great corpora-
tion's work week recently,
a middle-aged executive,
treaming down his cheeks, told
perior, "I'm just no good." He
ained of stomach pains and
unhappily for several months'

y had class. She was beautiful—she was phony as a seven-dollar bill. In fact she was a Boy Malverne-type girl, he thought

OY MALVERNE had an important busi- ness engagement, so he put on his con- servative suit—the one that didn't glow in k. He chose a circumspect crimson and ca- avat which he tied into a knot the size of a l. Then he clipped the six inches of necktie ng below the knot to his white-on-white shirt horse's-head clasp. In his flaring lapel he in- a gold-plated discharge button with a small n the eagle's eye. Boy was a veteran of three malingering in domestic Army hospitals. his jet-black hair, freshly retouched at the , he put a gray Homburg, one of the only mburgs in New York with a Tirolean brush Boy had the other one, too. He examined closely in the cracked mirror, baring his in-capped teeth in a practice smile and, sat- e left his six-dollar-a-week room and went g into the morning sunlight.

was a comedian who had started in bur- as a candy butcher, became a straight man ally a second comic. After he caught pneu- one night from getting squirted with Seltzer afty theater he quit burlesque in favor of lubs, building his act out of stuff stolen from red comics. In the early years of the war, s was good and he prospered. But the Army derately interrupted his career and then at of the war there was a wholesale closing of lubs. All the fly-by-night cellars that Boy work in were being used again for coal.

his Monday morning in October, Boy was way to see Monte Apple, his agent, to dis- eans of eating. He strode down Forty-sixth with high head and springy step, happy in usion that passers-by were commenting on th. Boy, born Alfred, was thirty-seven years t admitted only to twenty-five. And he no older except that his flat blue eyes were as youthful as a cobra's. Only the eyes be- him. His face was firm and unlined; his tall as as lean as a man's who took exercise.

swung around the corner up Broadway. He a grimy building where Monte Apple had ce. The tiny lobby was jammed with actors one another and bailiffs repossessing office re. Boy elbowed his way into the open-grille r and went up.

"Hiya, Monte," he cried cheerily as he entered his agent's cubicle. "Got a sensational idea for a new bit."

Monte received the news calmly. To understand how rare that was, one must first know Broadway. It is a street where, at intervals of six feet, one can see little groups of people standing and screaming at one another, their necks thrust forward, their arms gyrating wildly. Tourists sometimes stop and wait for the battle to begin. But it never does. These volatile demonstrations are nothing but casual conversation. On Broadway to be publicly passionate is to be normal.

But Monte was always calm, even serene. He never raised his voice, he never leaped about, he never grew red in the face. And something that distinguishd Monte even further from his colleagues was his scrupulous honesty.

"Listen," Boy continued loudly, pacing the six-foot length of the office, "it's dynamite. It'll kill people. I do a bit on how to dunk a cruller. What yocks I'll get. What yamolas. Everybody will fall down."

THE agent, fat and impassive, indicated a chair beside his roll-top desk. "Sit down, Boy," he said gently. "Red Skelton was doing that bit fifteen years ago."

"But I got a switch," protested Boy. "Skelton used a doughnut. Mine is with a cruller."

Monte shook his bald head. "Don't knock yourself out, Boy. It'll be a long time before you're working. "You'll steal something better by then. I have confidence in you. There isn't a better thief in the business."

Boy took the chair. "No jobs, huh?"

"You know how night-club business is."

"Well, how about a Broadway show? I'd like to do something legitimate."

"That would be a change," Monte observed. "No, Boy, there's nothing in your line. Only two shows are casting. Maurice Evans is doing another Hamlet, which is hardly your type show, and George Abbott is doing a college musical."

"How about the Abbott show? I could do that."

"If you did," said Monte, "you'd be the oldest actor ever to play an undergraduate."

"Whaddya mean?" asked Boy heatedly. "How old do you think I am?"

"Please," said the agent. "I got your Social Security card."

Boy changed the subject quickly. "And nobody else is doing a show?"

"That's right," replied Monte. "Times are tough in the legitimate theater too. Lots of people want to do shows, but they can't get a bankroll."

"Then where did Nelson Estabrook get the dough for that new turkey of his?" Boy demanded.

Boy was referencing to a musical comedy called Let 'er Rip which had opened only two weeks before, and it had already been announced that it was closing soon. The star of Let 'er Rip was Chick Hagen who had once been one of the country's great comedians. Back in the twenties and early thirties Chick had appeared in one smash hit after another, and had earned and spent fabulous sums of money. Then in 1934—Chick had been forty years old and at the peak of his success—he had suffered a heart attack. He had scraped up what was left of his money and retired to California. Nothing was heard of him until 1944 when all the papers carried stories of his marriage to a twenty-year-old Hollywood starlet named Nancy Faricy. Soon came an announcement from Nelson Estabrook, a minor Broadway producer, that Chick was returning to Broadway to co-star with his wife in a revival of Let 'er Rip, one of Chick's great successes. The revival was a resounding flop. Although everybody wished Chick well, they had to admit that age and sickness had robbed him of his talent. As a performer, he was washed up.

"Where did Nelson Estabrook get the dough?" Boy asked again.

Monte shrugged.

"I coulda told Estabrook," Boy smirked. "It hadda flop. It don't make sense, diggin' up a broken-down comic like Chick Hagen when the town is full of bright young comics lookin' for work."

"Like you?" suggested Monte.

"Sure," replied Boy defiantly. "I can do anything Chick Hagen can do."

"You can do anything that Groucho Marx and W. C. Fields and Bert Lahr and Bob Hope and Phil Silvers can *(Continued on page 64)*

WINDOW TO THE UNIVERSE

BY IRA S. BOWEN AS TOLD TO JIM MARSHALL

Palomar is furnishing the bi gest look man has ever had his more distant surrounding In this article the director the observatory describes t operation of the 200-inch mirr

IF MAN were to develop a jet plane as fast as the speed of light—a highly improbable feat —it would take four or five years to travel the distance between Earth and the nearest star. But he could never complete his journey because he would be burned to a whiff of gas long before he got close to his objective. So, no matter what he does about getting around the neighborhood of our own little solar system he will have to be content with *looking* the rest of the way.

This is where the big mirror atop Mount Palomar comes in. Palomar is the world's newest window to the universe. It's the biggest yet—200 inches in diameter, as everyone has read. It will furnish facts about our universe and countless other universes that no other instrument ever discovered before. From what it reveals, human brains can construct new theories about creation, and prove or disprove old ones. We hope to be able to photograph and examine objects a billion light-years away.

When we try to discover basic facts about the stars, we are handicapped by the impossible distances. We have to bring star facts down to earth. To do it we use a light-ray traveling at the rate of 186,000 miles a second.

The ray is trapped in the astronomer's mirror which concentrates its brightness into a tiny dot and photographs it, or, by means of a simple triangular prism, makes it write in colored lines what the star is composed of and to some extent how hot it is, how far away, and in what direction it is traveling.

The astronomer studies the photographic plate and a spectrograph and says: "This star is a whirling mass of gas; the surface temperature is 3,000 degrees Centigrade; it contains helium, oxygen, hydrogen and so forth; it is 62 light-years away, about 400 times as large as our sun, and is traveling away from our solar system in such and such a direction at about a quarter-million miles an hour."

Most people know that the distance of an object can be measured by triangulation. We have all seen surveyors do it. From one end of a base line they measure the angle between the base line and a line pointing directly to the object. Then they go to the other end of the base line and measure that angle. By a simple formula, they calculate the distance to the object.

The farther away the object, the longer the base line has to be for accurate results. The longest base line we can get, using the earth alone, is about 8,000 miles. This is the distance between two points opposite each other on the earth's surface. But this base line is so short that we have to invent something longer. So we find the angle of a star on a certain night, and then wait six months, until the earth is exactly halfway around on its yearly journey. Then we take another angle. This gives us a base line 186,000,000 miles long, which is still far short of what we really need, except for stars comparatively near us. But it is the longest we can possibly get.

Gauging Distances to Less Remote Stars

Proxima Centauri, the nearest star to our solar system, is about twenty-five million million miles away. To realize how difficult it is to determine this distance, imagine a silver dollar set up, facing you, at a distance of four miles. Then try to find the angle between lines leading to the right and left sides of the dollar. It is almost zero—in mathematical terms—not much over one second of arc.

With such microscopic measurements, the distances of our nearest star neighbors have been worked out fairly accurately. (The sun is the only star in our solar system.) But only a few hundred stars have their distances known.

How about the billions of suns, solar systems, nebulae on the outer fringes of space?

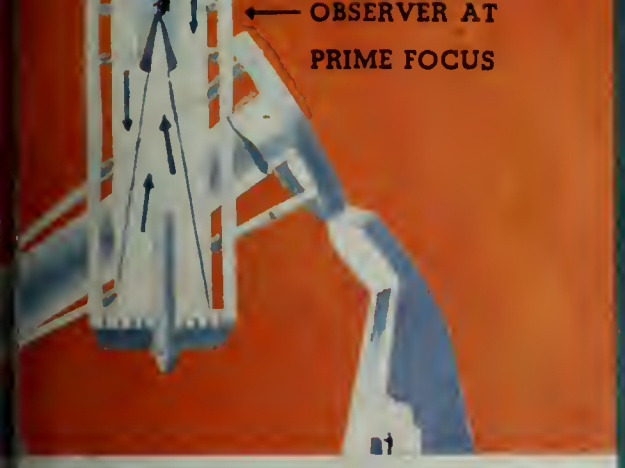
There is another method of measuring. If you stand on a hill and look at a row of street lights running into the distance you notice that they fade away by regular gradations. By a simple formula, we know just how much a given distance decreases the apparent brilliance of light. So, if we know that each light we are looking at is rated at a thousand watts, and then measure the amount of light we get from each lamp, we can figure out almost exactly how far away each light is from us.

Now if all the stars were of the same brightness, our job would be easy. All we would have to d compare the rest of them with Sirius, the bright star in the sky, whose distance from us is kno fairly accurately. But stars vary all the way fro dull red to an intense blue or white. So a dim near to us may seem brighter than a brilliantly sh ing star that is far away.

The task is complicated still more by the fact t a star does not always maintain uniform brilliar Some go from high to low intensity in a few ho some take several years. These are the so-c variable stars. There are thousands of them.

One thing has been found that gives us a clu working out star distances: All stars composed the same materials and having the same type period of light-variation have the same abso brightness, or candle power.

Now, suppose we want to find out how far a we are from a giant nebula. Far out beyond Milky Way, which is our little nebula, are m others. No one knows how many. If we take tures by telescope over a series of nights, we find that one or more stars in the nebula we studying will change their brightness, and finally will be able to put them on a definite schedule



The next step is to find a variable star, relati close to the earth, whose characteristics and tance we know and whose fluctuations are the s as the stars we are studying far, far away. Then can calculate the ratio of the distance of the stars. All we have to do then is multiply the tance of our near-by star by the ratio figure, and get the distance of the nebula.

Besides speed and brilliance, light from the s has color, or a combination of colors. Most o have seen a glass prism split up light into a s trum, starting with red at one end and runn through orange, yellow, green and blue, to viol the other end. If the light-source is a hot, glo solid, like the filament in an electric bulb, the co blend into one another. This is known as a " tinuous spectrum." But if it comes from a glo gas under low pressure the spectrum is broke into bright, disconnected and parallel lines. I get our light from a solid that is shining throu cooler gas placed between *(Continued on page*

DRAWING BY T. W. VOTER

Light-rays from celestial bodies are collected by the 200-inch mirror and directed through a narrow slit of the spectroscope. By means of a lens they are made parallel. Then a prism or a series of prisms disperses the light into a spectrum. Other lenses focus the spectrum onto a photographic plate for spectrographic study. You'll Find Out

BY CHESTER L. SMITH, JR.

Predicament of a rash young man who made his colonel suffer, his general mad, and himself miserable—for a girl

THE other pilots in the squadron flew up to the new base in Maine on Monday, but the colonel left me behind to wait for the mechanics to finish checking the new jet that had just arrived from the factory.

So I said goodby to Jean, Evelyn, Marilyn, etc., and the following Monday, when the plane was ready, I took off, circled back for a last fond look at the big city, and then swung around and headed north.

I reported in at our new field about noon, found my quarters, tossed my bag on my bed, and then started out for an inspection of the new base.

As I walked up to the door of the Officers' Club, I heard somebody call, "Hey, Jim!"

I twisted my head around and spotted Ed Robinson, one of the other captains in my squadron, coming up the walk behind me. He was wearing a flying suit and was carrying an oxygen mask in his left hand.

"Hi, Ed. Been flying?" I said, taking his hand and grinding his knuckles together.

"Test hop," he said, gently slapping my face with the oxygen mask. "Just get in?"

"Right," I said. "And how are Mary and Ed, Jr.?"

His tanned face brightened. "Fine," he said. "We've got a nice little cottage about a mile from the field that we were pretty lucky to get. Got it pretty cheap, too."

"Glad to hear it. How's the rest of the town?"

"Well, it's got a nice theater."

"Great," I said bitterly.

"And how did you leave Jean?" he asked tactfully.

"Single," I said bluntly.

"And Evelyn?"

"The same."

"And—?"

"The same."

He nodded his head thoughtfully. "Good," he said. "None of them was the right girl for you."

I stared at him suspiciously, and he shifted his long legs a little uneasily. Here it comes, I thought. Ed and Mary have picked out another girl for me.

"Incidentally," he said casually, "Mary has an old school friend, Joan Walters, coming up next week end to visit her for a couple of weeks. Why don't you drop around Saturday?"

"Now look, Ed—"

"Now, Jim, Mary says she's a very attractive girl. Been singing or something the last four years and—" He dropped all pretense and gave me a firm, man-to-man look. "Anyway, can I help my instructions?" he said.

I was lost. "Well, all right. I'll be around." I stopped and then added, "But just to help you out."

And we shook hands on it.

The rest of the week passed slowly. I spent my days getting a squadron training program organized and my nights reading historical novels. I got pretty tired of reading about beautiful women, preferring them closer at hand, so by Saturday afternoon I felt rather pleased over the prospect of meeting a new girl.

I came up the walk to Ed's house, skirted carefully around a pair of roller skates lying on the front steps, and knocked on the door. No answer. I walked around in back, and prepared my best half smile when I spotted the auburn hair that rose slightly above the back of a white lawn chair.

"Hello," I said. "Ed and Mary home?"

THE auburn hair swung around, revealing a slender face and warm, blue eyes. All thoughts of Jean, Evelyn, and Marilyn vanished from my mind.

"They're shopping," she said, letting a book—poetry, I noticed—drop into her lap.

"I'm—"

"Jim Nelson," she finished. She was smiling.

"Why, yes. I take it Ed and Mary told you about me?" I said. "Ed insisted that I drop over."

"Ed insisted, did he?" she repeated slowly, inspecting me from the top of my head down to my not very well polished shoes. The warmth in her eyes vanished and was replaced by a rather cool look. "Yes, they told me about you," she said. "All about you. Captain. War hero. Lots of money. From your dad. Crazy about f jets so you stay in the service. A vices except alcohol. Like wo Lots of them. They like you."

"Well . . ."

"And, as you just pointed ou practically had to drag you over h she said flatly, "but when you sa you were pleasantly surprised an that I might as well be the next quest."

I couldn't say anything.

She took a deep breath. Her flashed. "I came up here for a she said, emphasizing each wor good, long rest. I don't want to any more passes made at me. I specifically, want you to make th don't want to get married. I don' cifically, want to get married to She picked up the book, opened i started to read.

I coughed, groping despairing something to say. "Ed's out ping?" I said.

"Yes," she said, "I'll tell hin called." She continued to rea

"Well, thank you," I said.

She turned the page. "Good

"Oh—good day."

A few minutes later I was b the field, sitting at the bar in the staring at myself in the n Straight nose. Firm chin. Nic No previous gripes.

I glanced down the bar and was Art, the bartender, staring curiously. "What'll it be, Cap he said. "The usual ginger ale'

"Thank you, sir."

"And to celebrate you bought everyone drinks that night, Captain."

"Yes, sir."

"But you drank ginger ale."

"Yes, sir."

"And in the six years I've known you, Captain, whenever liquor was being served, I've never seen you drink anything but ginger ale."

"That's right, sir."

"But, Captain, you weren't drinking ginger ale last night."

"No, sir."

"And, Captain . . ."

"Yes, sir?"

"I know now why you have always drunk ginger ale."

"Yes, sir."

"And you owe the club some two hundred dollars for a new mirror."

"Yes, sir."

"And you'd better apologize to Major Smith's wife."

"I didn't—?"

"Yes, you did."

"I'm sorry, sir."

"So is Major Smith."

"I'll do it immediately, sir."

"Thank you, Captain."

"Will that be all, sir?"

"No, one more thing. You are to see Doctor Rasmussen, our new psychiatrist, this afternoon."

"Yes, sir."

"Good day, Captain."

"Good day, sir."

I breathed a little easier once I was outside; it hadn't been as bad as I'd expected. Age was mellowing the colonel.

I walked over to Doctor Rasmussen's office, wondering why the colonel wanted me to see him. Routine checkup, probably.

WHEN I walked into the doc's office I found myself facing a square-jawed man of about thirty-five with gray streaks in his hair that gave him a rather distinguished look.

I coughed uneasily. "I'm Captain Nelson. The colonel sent me," I said.

"Yes, I know," he said, surveying me with piercing, black eyes. "Sit down, please," he said, pointing to a chair at the side of his desk.

I sat down, noticing that the chair left me sitting a little lower than the doc. We sat there a few seconds. No one said anything.

"Just tell me what's happened to you in the last few days," he said helpfully.

I was a little puzzled, but I started in anyway and told him about Jean and Evelyn and Marilyn; the training program I was organizing; the girl visiting Ed; what had happened last night. He just sat there, his chin resting in his hands, nodding his head, staring at me, saying nothing. I finished and waited for him to speak. He didn't say anything.

"Well, what do you think, Doc?" I said finally.

"Rather simple," he said. "And it's none of my business. But you'll find out."

"Find out what?"

"Good day, Captain," he said.

"Good day?"

"Good day," he said again.

I stared at him for a few seconds, amazed. Then I said disdainfully, "Well, good day, Doctor," and I got up and left. Everyone kept saying "good day" to me. The doc certainly was no help. . . .

The next week didn't go any faster than the first week. We started to fly a little and I took a few hops to look over the countryside. It started to look pretty much the same. In the evenings I kept on reading historical novels. They were pretty much the same.

That girl kept coming into my mind. Ed had been sent away for a week on special duty, so I couldn't see him and find out anything. Somehow, in the evenings, it didn't seem quite right that she should be reading and that I should be reading.

On Friday, the colonel's wife called up to invite me to a party she was giving Saturday night. I very truthfully assured her that it would be a pleasure. Of course, it didn't make much difference: you more or less have to go to those things anyway.

I got there well after the party had

THE SECRET PAPERS OF HARRY L. HOPKINS

BY ROBERT E. SHERWOOD

The Soviet Foreign Minister and Roosevelt agree on a second-front effort in Europe in 1942, but Churchill turns the war toward North Africa

It was pretty difficult to break the ice when Soviet Foreign Minister Molotov arrived in Washington t cuss with Roosevelt our plans for a second front in Europe. But the visit ended on a pleasant note. Sh here, left to right: Marshall, Hull, King, Molotov and Litvinov. (Left) Hopkins passed this note, " damn depressed" (presumably to Marshall), at a London meeting with Churchill to plan the African

PART IX. MOLOTOV DEMANDS AND GETS AN ANSWER

ON MAY 29, 1942, Soviet Foreign Minister Molotov arrived in Washington for important second-front talks with President Roosevelt.

Harry L. Hopkins and Samuel H. Cross, professor of Slavic Languages and Literature at Harvard University, were present at Molotov's first visit to the White House, and Cross made an official record:

Mr. Molotov expressed his intention to discuss the military situation fully. He had covered it in detail (in London) with Mr. Churchill, who had not felt able to give any definite answer to the questions [especially regarding a second front in Europe to relieve Nazi pressure on the Red Army] Mr. Molotov raised, but had suggested that Mr. Molotov should return through London after his conversations with the President, at which time a more concrete reply could be rendered in the light of the Washington discussions. . . .

To Mr. Molotov's remark that Hitler was the chief enemy, the President noted his agreement and mentioned his repeated statements to the Pacific Conference that we should remain on the defensive in the Pacific until the European front was cleared up. It had been difficult, he added, to put this view across, but, in his opinion, it was now accepted.

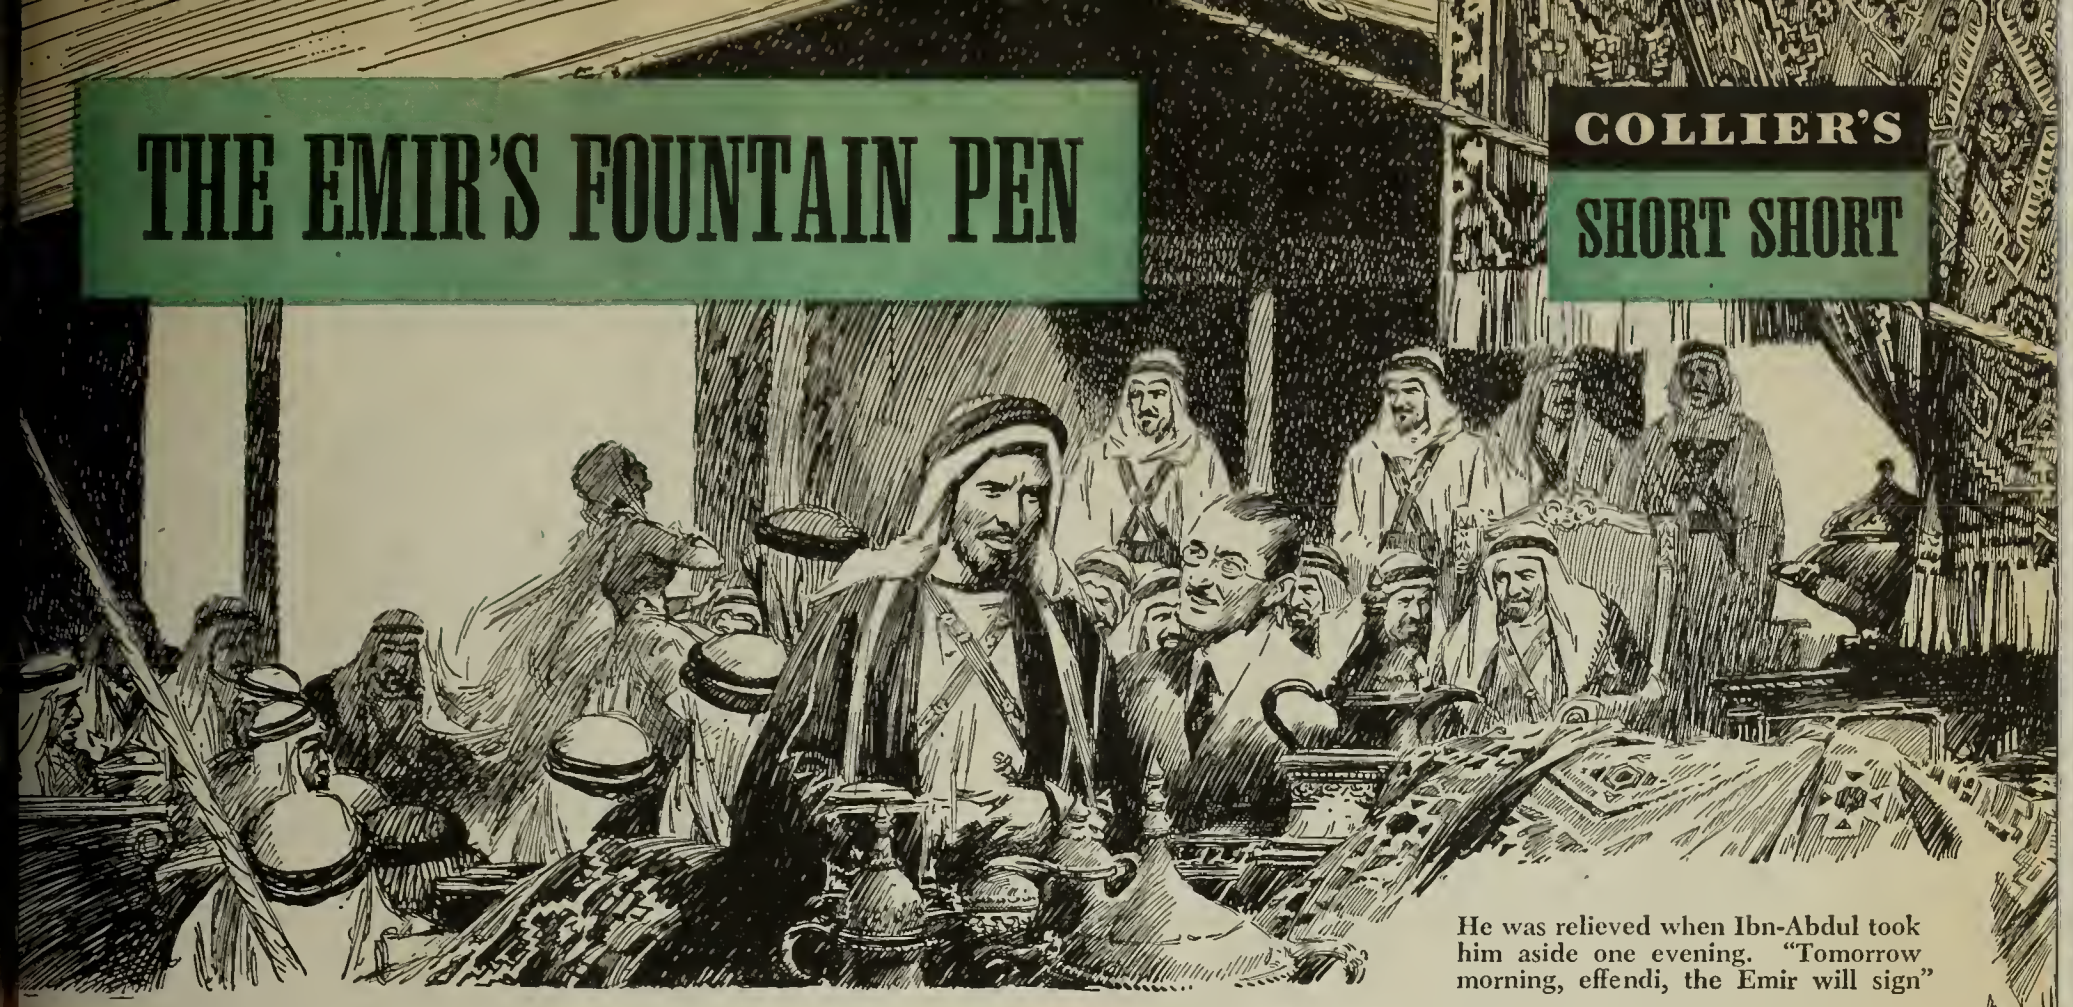
Hopkins' personal record of this same meeting included the following:

It was pretty difficult to break the ice, although that did not seem to be due to any lack of cordiality and pleasantness on the part of Molotov.

The President had two or three memoranda which I had never heard of before, which were obviously given him by the Department of State, in which the department was offering their good offices in alleged difficulties between the Russians and the Iranians on the one hand and the Russians and Turks on the other. I gathered Molotov was not much impressed. He raised the point that they thought they knew a good deal more about their relations with Iran and Turkey than we did. I confess I did not see in what way our good offices were to be executed. . . .

The conference seemed to be getting nowhere rapidly and I suggested that Molotov might like to rest.

Maxim Litvinov (the Russian ambassador) acted extremely bored and cynical throughout the conference. He also made every effort to get Molotov to stay at the Blair House tonight but Molotov obvi wanted to stay at the White H at least one night, so he is put the room across the way.



I went in for a moment to t him after the conference and he that one of the girls he brough as secretaries be permitted to and that has been arranged.

The group reassembled in the Study for cocktails and dinne conversation that lasted until night. Roosevelt talked a great d his desire to start the process d armament after the war, maint arms only for the purpose of p the world, particularly Germar Japan to make sure that they not regain powers of aggressi was his persistent belief that economy could not recover

They went into the conference tent. "Remember," Ibn-Abdul was saying, "that our king, the Emir Mahmoud, is wealthier than any Anglo-Saxon millionaire who pays supertax. Not only is he master of thousands of square miles of territory but he has leased concessions to foreign oil companies for enormous sums of money. Would it not therefore be below the dignity of the Emir to buy anything that was cheap, merely because it was built to last a long time?"

Scarsdale, quite speechless with astonishment, had no time to reply. He and the British delegation stood up respectfully as the Emir Mahmoud himself entered with his retinue.

Leisurely and courtly greetings followed. Gifts were exchanged, then huge piles of steaming food were brought in with French wines. There were long speeches of welcome and mutual flattery, and finally dancing girls, acrobats and a fat woman who sang for four hours.

Next morning the British and Arab delegations, belching reminiscently, settled down to business. "You have heard, O Powerful One," Scarsdale began, "that men speak of new rivers to be made in these parts of the earth. Rivers that would link the Persian Gulf with the eastern Mediterranean and the Red Sea. Now that the Suez Canal is ceasing to be the free gateway from east to west—"

"I understand, effendi."

"It is thought, O Mighty King, that these man-made rivers could most conveniently be cut through your illimitable domains, which they could scarcely avoid."

"Very true, effendi."

FOR several days this kind of dialogue went on. The Emir and his entourage were in no hurry; and, neither were the British. There were nightly entertainments for the visitors. Autographs and souvenirs were constantly exchanged. The British negotiators were perplexed to find that their signatures were not regarded as true autographs. It was their thumbprints that the Arabs treasured. The Arabs explained that signatures could be forged, but thumbprints never. Therefore they were more valuable.

Life with the Emir was pleasant and timeless. Nevertheless Scarsdale was getting anxious, and after a week or two began to press for a decision. He had brought with him an agreement to be signed, and until he had the Emir's signature on it he could not feel at ease.

He was relieved, therefore, when Ibn-Abdul took him aside one evening. "Tomorrow morning, effendi. The Emir will sign."

"Splendid!" Scarsdale beamed. "You know, I was beginning to fear he wouldn't give us the concession."

"You Anglo-Saxons are always in such a hurry!" Ibn-Abdul said reprovingly. "We like to combine business with pleasure. Haven't you enjoyed your stay here?"

"Tremendously. But I remembered that last year the Emir refused our invitation to London, and I thought—"

"Have you ever considered what it is like to have lived all your life in a tent in the flat desert?" Ibn-Abdul interrupted. "Here we have *no* stairs, effendi. Do you know that when I was in London I could not walk up steps like your people? I was forced to go on all fours like a beast in order to negotiate them, effendi. And I was ridiculed. It was not pleasant for *me* to be ridiculed; but for the Emir Mahmoud it would be an everlasting shame!"

"I never thought of that," Scarsdale muttered. He felt as if he were being held upside down by his ankles. The impact of West upon East had never before seemed so grotesque. Only the other evening the Emir had proudly shown him an elaborate television set.

"But surely, O Mighty One, there's no television transmission anywhere in this area?" Scarsdale had objected.

"No." The Emir smiled with a dignity of perfect simplicity. "But is it not nice to have a television set, even so?"

The Emir's vacuum cleaners, his dishwashing machine, his numerous gold cigarette lighters (he was a strict Moslem, and did not smoke), his golfing and yachting clothes (which he never wore), his library of hand-illuminated books, his private cinema—all were possessions wherein he took a delight and pride which had nothing whatever to do with their utility.

Next morning, the day of the signing of the agreement, the Emir was in excellent humor. His secretary, a young Arab graduate of the American University at Beyrouth, read the document aloud.

Did this—fear suddenly stole up Scarsdale's spine—did this mean that the Emir himself could not read? He had often spoken contemptuously of reading. For if he could not read, then he could not write. And if he could not write, he could not sign the concession. Certainly no one else's signature would be valid.

The clerk's voice ceased. From the many folds of his robes the Emir drew forth a gleaming new fountain pen. Scarsdale gave a sigh of relief. So it was going to be all right after all.

THE Emir did not hurry. "See, Scarsdale Effendi," he smiled, rolling the pen on his palm. "This is my newest toy. The very latest thing from America, made specially to my orders."

It was made of pure platinum. The gold nib was set in a ring of sapphires. The cap was scrolled and embossed in exquisite tiny designs, and the tapering cylinder was engraved with the Emir's full tribal and family names in Arabic characters.

"It needs to be filled only twice a year," the Emir whispered reverently. "The ink can be changed to any color I choose. See, there is an attachment at the top which lights up so that one can write in the dark; and the manufacturers guarantee that the pen is waterproof, and will write equally well at the bottom of the sea!"

The Emir's eyes caressed the fountain pen for several seconds more; then he bent over the agreement. The tension of the British delegation grew acute. Write, you damned old rogue, Scarsdale thought; you perfumed savage, write!

But the Emir did no such thing. Tongue sticking out of the corner of his mouth, absorbed as a child, he pressed a button at the top of the cylinder with his left forefinger. A small blot of ink fell onto the paper, directly underneath the typewritten matter. With a fastidious gesture he pressed his right thumb firmly into the blot.

A servant appeared with a bowl of water and soap to wash the ink off his hands. The clerk poured fine sand onto the thumbmark to dry it.

The Emir leaned back and regarded his mark with deep satisfaction. Beaming, he handed the document to Scarsdale. And Scarsdale, adding his own precise little signature beneath the bold smeared whorls of the thumbprint, felt that it looked curiously insignificant by comparison. ★★★

Royalty UNDER WRAPS

Playboy or recluse, rich or poor, exiled monarchs have one thing in common—their dreams of returning to a world that has crumbled. A famous society reporter tells about them

BY IGOR CASSINI

THE incessant taxicab din filled the drugstore, and busy New Yorkers pushed hurriedly in and out of the establishment. None of them, not even those who rubbed elbows with her at the lunch counter, knew the sad-faced woman in black was the former Empress Zita of Austria and Queen of Hungary. She ate her sandwich and coffee and ignored the shoppers, too.

The empress wouldn't have been much news had the passers-by recognized her, or even known about her. She is just one of those of the world's royalty who have been uprooted from the lands of their former rule and booted unceremoniously into the cold outer world. Dispersed in this way are 36 jobless monarchs, all of whom still hope to regain the thrones from which they once reigned so regally—"by the grace of God," sometimes, and sometimes by the will of the people.

Today the only European sovereigns still ruling are those in England, the Scandinavian countries, the Netherlands, Greece, Luxembourg and the tiny operetta principalities of Liechtenstein and Monaco. And Greece is ridden with civil war.

Some of the "eject" are wealthy. Others, like the Empress Zita, are not. Since the day her world crumbled Zita has been entirely dependent on a modest subsidy from the Catholic church, which is not forgetful of the fact that her late husband, Emperor Charles, was "His Apostolic Majesty." She has brought up her eight children—three daughters and five sons—in almost monastic simplicity. But she never permits them to forget who they were and what they may again someday be.

Her daughters, the Archduchesses Adelaide, Charlotte and Elizabeth, are employed in social work in New York. They use the inconspicuous name of the Misses de Bar. The Archduke Otto, her oldest son, is never permitted to forget that he is pretender to the throne and head of the Hapsburg dynasty. But there is nothing regal about his quarters. The thirty-five-year-old Otto and brothers Felix, Karl-Ludwig and Rudolph (Robert is in London) occupy a small suite in a Washington, D. C., hotel. Here, surrounded by faithful aides and followers, they plan the reconstruction of a Federation of Danubian States—and do their own laundry.

Otto's uncle, His Royal Highness, Prince Gaetan de Bourbon-Parma, a brother of Empress Zita, did more than just wash his socks. He lived in a New York basement, owned by a charitable friend, with a cot, a chair, a table and an income of $20 a week, which he drew from the government as an unemployed ex-G.I. When the government aid ran dry, Bourb (as his Army pals called him), unable to find a job, went to Europe to visit relatives.

A bit more to the taste of the New York socialites is Prince Abdul Medschid Khan, who can technically aspire to the sultanate and caliphate of Turkey. He is the nephew of the Red Sultan, Abdul Hamid, so called because he killed so many Armenians and Greeks. The prince moved from Paris to New York some ten years ago with his wealthy Greek wife. At present they are separated.

A roly-poly *bon vivant*, Abdul and his younger brother, Prince Omar Farouk, unlike their rugged ancestors, are two very peaceful citizens, whose most militant activities consist of attending cocktail and dinner parties.

While these forlorn and forsaken royalties have taken a back seat and quietly accepted their position as has-beens, the Duke and Duchess of Windsor have been acting as if they just made their debut yesterday. Their life is an endless round of parties, to the delight of America's snobility. And to the press, too, which never ceases to be fascinated with David and Wallis.

On the other hand, the recently arrived Yugoslavs, twenty-three-year-old King Peter and his twenty-four-year-old Queen Alexandra, a lovely and shy creature, don't expect any of this adoration from New York society. They would like Americans merely to accept them.

Peter Karageorgevitch looks more like a schoolboy than a king. Slick-haired, short and slender, he has the build of a jockey. But he fools you. He has tremendous hidden energy and courage. He proved this in training as an R.A.F. pilot during the war.

A King Banished by Communists

Another young king who hit New York like a ton of marshmallows was twenty-six-year-old Michael of Rumania, recently dismissed by the Communists and deprived of his Rumanian citizenship and all his properties at home. Michael came here with his mother, Queen Helen, whom King Carol divorced when he fell in love with the striking red-haired Magda Lupescu.

Michael—who recently married the Princess Anne de Bourbon-Parma—was invited by the State Department, who told him not to worry about expenses; they would be taken care of.

U.S. taxpayers' money, however, didn't pay for his suite at the Waldorf-Astoria and for his traveling expenses. Uncle Sam unfroze just enough of the Rumanian gold stored in this country to take care of all this. But not a penny more.

Socially, Michael's visit wasn't much of a show. He wasn't a bit interested in going to parties.

As for café society, it never even got a glimpse of Their Rumanian Majesties.

Michael's father, Carol of Hohenzollern, would have given his royal eyeteeth to have received the courteous welcome accorded his son here. Carol tried to overcome the U.S. official reluctance by seeking the good offices of Elliott Roosevelt and Cornelius Vanderbilt, Jr., son of the New York social czarina. But they were of little help. And when he tried to pave his entry into the U.S. with a wave of good publicity by hiring press trumpeter Russell Birdwell, it was a definite flop.

Carol was eager to come to America to get his hands on the sizable amount of Rumanian gold frozen in U.S. banks. But he failed and he and Magda contented themselves with the bows and scrapes of society in Mexico, Cuba and Brazil.

Today, Carol and Magda, whom he elevated to the title of Princess Helena after their "deathbed" marriage in Rio de Janeiro, live in Estoril, 30 miles from Lisbon, Portugal. They lead a secluded life because Carol doesn't feel that his Magda is being treated with the proper respect.

So far as money goes, however, Carol is considerably better off than his son Michael, for he managed to take out of the country enough gold and jewelry to cover leaner days.

Carol is not the only ex-king or pretender to have settled in Estoril. Today, this once sleepy, seaside village has become the sanctuary of royal refugees. The Portuguese government's attitude is one of compassion and amused sympathy. This is remarkable because Portugal cashiered its own royal family in 1910 by revolution. Since then there has been a law in Portugal prohibiting the use of titles, but the once reigning House of Braganza limps painfully on, headed by Dom Duarte, the Portuguese pretender, who maintains a villa in Estoril and calls himself the Duke of Braganza.

Dr. António de Oliveira Salazar, Portugal's "silent dictator," allows the Duke and House of Braganza to remain. He feels that so long as Dom Duarte and, for that matter, all the other guests behave, there is no harm in having them stay. The only thing the doctor will not tolerate is political talk.

Of all the Estoril colony, the Spanish pretender, Don Juan, finds it most difficult to control his tongue. That's probably because he can almost smell the royal palace in Madrid, once occupied by his father, the late King Alfonso XIII, and now taken o by General Franco.

There was a time, not so long a when Don Juan could have gone b to Spain as king. Franco made plain he was willing to call back t Bourbons if they would promise play ball with him. But the pretend thought he could dictate terms. Wh Franco sent an emissary to Esto Don Juan bluntly told him that would consent to set foot in his cou try only if Franco left.

Franco was angry then and beg to encourage the Carlist pretender the Spanish throne, young Don C los, Duke of Madrid, younger brot of the Archduke Franz Joseph of t House of Hapsburg. Don Carlo permitted to live in Spain, unmoles by Franco's police.

Old Law Exiles French Royalty

An incurable romanticist and a p tender who has almost no chance e to reign is the Comte de Paris, w keeps a bowl of French soil on mantelpiece so that La Belle Fra may always be within his reach. T Comte de Paris is forbidden access French territory by an old law e ing the heads of former French rul families and their direct heirs.

That puts him in the same bas with Prince Napoleon Louis Bo parte, who as head of the Napolec dynasty is also banished from Fra The prince, enormously wealthy, h ing inherited the entire fortune of late Empress Eugénie, resides pea fully and undisturbed in Brussels, B gium, only mildly interested in small but still active Bonapa movement in France.

The Comte de Paris, howe hasn't given up his monarchic asp tions, and he has slipped into Fra more than once in defiance of the thorities.

In 1942, traveling as a Lieute Bertrand, he turned up in Algier help direct the liberation of N Africa following the American l ings. President Roosevelt and G eral Eisenhower, however, we quite ready to turn conduct of war over to the Comte de Paris an was ordered to beat it, which he Unlike Don Juan, who has to w his budget, the *comte* is really loa Besides money he has a farm. About Rama, a country elephant who went to the city

A BEAST FO

THE road winds like a black snake through the hills to Kandy.

At first it runs straight; as though to escape as quickly as possible the teeming crowds, the street calls, the smells and bazaars of Colombo—that low, sprawling port on the southern coast of Ceylon. Then it lifts itself eagerly into the hill country. Through the terraced tea plantations, lush with glossy leaves and white flowers, it goes. Up and up into the bracing air blowing down from Adam's Peak; through forests of cashew nut, satinwood, ebony, tamarind, kittul and cinnamon it stretches its steady climb. It curves around mountain spurs and burrows through the hillsides when it can find no other passage. It flows past insubstantial palm huts and solid-stone dagobas, those towering, bell-shaped monuments to Buddha that have stood for two thousand years and have not yet begun to age.

At last the road climbs the last height and slips quietly into the ancient city of the kings of Ceylon. There it stops before a building marked out by millions upon millions of people as the holiest spot in all the world. The road has reached the Temple of the Tooth.

There, in a building within a building, is enshrined a true tooth of Buddha. It is enclosed in a framework of silver—bell-shaped, with ropes of pearls and gems woven about it. Inside that is another covering of gold and gems, then another and another—seven in all before the tooth is revealed. Although the tooth is carried by elephants in procession very occasionally and shown only to kings and very holy priests, it is a magnet to the faithful, drawing them through the mountains, up the road to the old and beautiful city.

Bayini, the boy, and Bayin, his father, went up the road this morning on their way to Kandy. Bayin walked ahead, a slight, slim figure of a man. His only garment was a red skirt, wrapped tightly around his waist. The sheath of cloth fell elegantly to his delicate ankles. His straight, shining black hair was gathered into a neat bun at the nape of his neck. Like all Singhalese, Bayin was tiny. From his bare soles to the top of his graceful, birdlike head was no more than a few inches over four feet. He stood straight and walked with the unconscious fluency of a woman or a wild thing. But his fragility was deceptive. That small, lithe, perfectly proportioned body was as hard as steel. Bayin lived by the labor of his hands.

FOR hundreds of years Bayin and his fathers had planted and harvested the same fields. The land belonged to the Temple of the Tooth, twenty miles away in Kandy. Rice, coconuts, tea and cinnamon—most of the produce went to the temple where it was used by the priests or sold for profit. But Bayin was given his fair share and enough rupees besides to buy the things he could not grow. He was content with the arrangement. His son would be content and his sons and their sons so long as there was land and the temple.

Today, however, Bayin was troubled. There was no hint of it in his steady walk: no sign in his oval face that was the color of cinnamon bark. But small clouds drifted over his mind and would not go away. He should be elated this morning on his wa Kandy. It was not often that he t this trip, usually not more than o in every two or three years. What more, he was taking Bayini for first time up the winding, macad ribbon to visit the temple. It w great occasion, for himself as wel the boy, but still Bayin was une He glanced behind him for a mon to look fondly at his son. Bayini not walk behind him. The boy perched above the broad, domed f head of a shambling elephant, res securely on the lofty head, lool with calm curiosity at the exci scenes all about him. He rode the phant with casual confidence, ri and descending, as the animal m beneath him, like a small sea bir the crest of a wave. Bayini wa delicate as his father; brown, sm boned and pert. Contrasted with huge bulk of the elephant, he see even more elfin. His slim legs st dled his mount's ponderous neck body sat straight and bold on eminence above the road, unkn ingly proud and regal.

Like his father's, Bayini's frail

And now, thought Ba- ir companionship has come to

y, at the temple, he must de- ama to Mahinda the overseer and come back with his son from Kandy alone. Ten years ago, Mahinda had brought the elephant to him as a hairy baby, captured in a kraal far in the northern jungles of Ceylon. He had been dedicated to the temple as a ceremonial beast then, because of his promise of unusual size and magnificence. Now, thought Bayin, looking at his gray bulk, he was indeed a glorious animal. Ten feet tall he stood, the dome of his forehead curved like a dagoba, the ears perfectly placed, the long tapering trunk without a blemish. He was tuskless, like all Ceylonese elephants, smooth-sided and immense. Mahinda would be proud of such an elephant. But what would Bayini say when he learned that Rama must go?

Smiling, he called to his son.

"Come down and walk with me, little man. Let me tell you about the sights on the road."

Bayini bent forward and hissed softly into Rama's fanlike ear. Slowly the sinuous trunk twined up, wrapped itself around Bayini's waist, lifted him through the air and placed him gently at his father's side. The soft, pink tip of the trunk rested affectionately on the boy's shoulder as the three of them began to walk once more.

"It is such a smooth road, Father." Bayini's soft, black eyes were round with wonder.

"Yes. It is made of tar for the motorcars to ride swiftly from Colombo to Kandy," said Bayin. "But once, many hundreds of years ago, our people made roads as smooth as this. At Pollanarus, which was a city thirty miles long and four in breadth, there were roads paved with blocks of stone. They ran straight through the city and beside them were buildings with gilded towers whose brightness shone again in the waters of the lake below. Now there is nothing there but the vines and trees of the jungle."

BAYIN was silent and they went quietly up the road. Now and then they passed huts nestled at the foot of slender coconut trees. There were occasional roadside fruit stands with bunches of small, red bananas and spiky pineapples hanging on display —trays of dates and mangoes piled on crude tables. Bayin did not talk again. He was trying to think of a way to break the news to the boy gently. At last he decided that he would wait until they reached the temple. Perhaps Mahinda would let them keep the elephant for a little more time. If he did not, the boy would have at least seen the temple before his day was spoiled.

They glided on together, hand in hand, Rama shuffling along behind. At times his trunk reached up into a tree by the side of the road, stripped the leaves from a branch and tamped the wad into his mouth with a grunt. Usually he paced behind them placidly, blowing softly on the boy's back through the wavering tip of his trunk.

The traffic was slight this morning. Now and then a Tamil in a white turban passed them, sedately pedaling his bicycle, jangling the bell importantly. Braces of water buffalo pulling big-wheeled carts came down the road and slowly passed them. At times, far up or down the road, they would hear the imperious honking of an automobile clearing its path. Then it would swish past them, blaring

CONTINUING A NOVEL OF TENDER LOVE AND DESPERATE CRIME

BY OCTAVUS ROY COHEN

The Story:

STEVE BLAKE, young engineer on trial for the murder of JEFF NULTY, manager of the Casa Linda night club, is saved from almost certain conviction by the testimony of beautiful Mrs. PATRICIA KINGSLEY, who swears that she is Blake's mistress, and that she was with him the night of Nulty's murder. Steve is astounded; Mrs. Kingsley is almost a perfect stranger to him.

Steve is acquitted, but he knows that many people, including MARTY WALSH, tough detective, think he is guilty; for one thing—Jeff Nulty was killed with a .38 revolver, and Steve cannot explain the disappearance of his own .38 revolver.

Steve feels sure Mrs. Kingsley can lead him to the real murderer, so when she asks him to escort her in public so she can avoid the charge of perjury, and says that her husband, REX KINGSLEY, will not interfere, Steve consents. He even moves into the Casa Linda Apartments, where Nulty was killed, and where the Kingsleys live.

The following Saturday night Steve and Pat go to dinner in the Casa Linda club, which is on the first floor of the Casa Linda Apartments. Gradually their party grows. Among the arrivals are: WADE RAMSAY, owner of the Casa Linda Apartments and club; PETE CONNOLLY, escorting Ramsay's blond, voluptuous secretary, RUSTY MASON, who is making an obvious play for Steve; CONCHITA MONTERO, petite Cuban rumba dancer, who is in the floor show, and who likes Steve very much. During the evening, Steve notices a man in gray staring at him.

Conchita leaves, briefly, to search for some pictures in a closet in Rusty Mason's office, but she soon returns, obviously disturbed, and whispers to Steve that she must see him. He agrees to meet her outside his apartment in a half hour. When Steve and Pat go to meet Conchita, she is not there. Then Steve opens the door and they look into his apartment. Conchita is lying on the floor, dead.

III

FOR a few seconds we stood staring down at what had been Conchita Montero. Then we knelt beside the body and felt for the pulse that wasn't there. There was no blood. Pat pointed to some ugly red bruises on Conchita's throat and looked at me inquiringly. I nodded. That must have been what did it. She had been choked to death.

We stood up. I felt as though I might be sick; Pat was beginning to tremble. Her slender body started shaking all over. So I put my arms around her and held her tight. It wasn't a caress. It was a crude effort to keep her from breaking down completely. I said, "Steady, kid—steady."

She nodded. Finally she withdrew from my arms and said, "I'll be all right, Steve."

I didn't like what I saw in Pat's eyes. There was more than horror; there was fear, too. Of what or for what, I couldn't guess, and this was no time to ask. Even to an amateur this was unmistakably murder, except thought hit me that maybe the might not peg me as an amate was fresh out of superior court, I'd been tried for murder. A m which had happened in this building.

I called City Hall and said I w to report a murder. That broug a man's voice in a hurry. He i few questions at me: my nam address, and said not to touch thing. Just before he cut off, him that Lieutenant Marty would be interested in this.

I took Pat's arm and walke across the room. I turned a around so that she could sit without looking at Conchita. Sh crying. It was a quiet, terrible s crying, and there was nothing I do about it.

I couldn't understand what w ing on inside myself. Pat hadn't for her husband, or expresse

The LODGE BROTHER

BY DAVE GRUE

Meet L. T. Smyth, who'll slap your back all night—and cut you dead in the morning

MY MISSUS was a Curtis. That was on her mother's side. Her pap's folks was Caldwells and you just ask anyone from Marshall County if there was ever so much as a whisper of censure about ary one of them. Not that me and Jessie lives fancy. I don't mean to say that. When Jake—he's our youngest—married Elsie Singletree from down at Hundred, we figured Elsie's folks was used to a little extry, so Jessie went down to Blankensop's Furniture Store and bought a dozen silver napkin rings for the dinner. But you couldn't say we was folks to put on airs. But on the other hand we're just as good as the next one and that was what made me so blamed hot at the way he served me and that's why I'll defend what I done to my dying breath even if the whole state of West Virginia says I'm a shame and an abomination to my family.

It was last July. Jessie and me never goes nowheres for a vacation in the summer so whenever the Loyal Order of Eskimos throws a convention I take her along for a little change. And when the lodge was to meet last summer me and Jessie packed up and drove down to Clarksburg and got us a room at the Travelers' Plaza.

After we et supper that evening we strolled around the lobby for a while, looking at the palm trees in the pots and directly I bought Jessie a candy bar and a movie magazine and we went back up to the room. I smoked a stogie and directly I says to Jessie, "Mother, I'm going back down to the lobby and see if any of the other brothers is driftin' in yet."

As I went down the hall I knowed there was a few had come in for I could hear them whooping and hollering in one of the rooms. And directly a young man with a tray of ginger ale and cracked ice steps off the elevator and right behind him is none other than Will Zerby. Well, him and me hollered and pounded each other like we hadn't laid eyes on one another since we was partners back in the barbershop at Roseby's Rock twenty-five years ago, and directly Will says, "Where you headin' for now, John?"

"Nowheres special," I says.

"Well," says Will, "then come on back to 718 with me. They're just startin' a little get-together and there's always room for one more!"

I said I didn't think I'd better since there'd be drinking and anyhow me and Jessie had drove all afternoon and was tired but Will wouldn't have it. He said if I wouldn't come with him peaceable he'd have to whip and drag me there. I wharped him a good one across the shoulder and I said, "Who's throwin' this party, Will?"

Will looks all around him like he wants to make sure no one is e… dropping and then he pulls me … so's he can whisper.

"Mr. L. T. Smyth!" hisses Wil… bug-eyed and wild-looking, lik… was saying just about the bi… name in the U.S.A.

"Who?" I says.

"Mr. L. T. Smyth, you dernec… fool," says Will. "L. T. Smyth-… coal bigwig. Made a fortune … night stripping coal down in Bar… County! Worth a million if he's w… a lead cent! But, John!—just as … *mon*—just as *plain!* Never puts o… more airs than if he was just a … bage man!"

Well, he kept on coaxing me … pulling my sleeve and he said a… old gang was there—Fred To… and E. W. Snyder and Barky Lo… —and like a fool, like the dern… fool that ever was, I said I'd go. S…

MORE BEAUTIFUL THAN MURDER

Continued from page 26

need for him. That should have surprised me, but it didn't. I couldn't make myself remember—not constantly, anyway—that she was a married woman, that she was Rex Kingsley's wife.

That made less sense than usual under these circumstances. By all the rules, I should have been thinking of Rex Kingsley. For one thing, I couldn't rid myself of the belief that Pat was covering up for him, and with that thought there came the inevitable, additional one: Why?

But the important thing was that we were in this together, though I couldn't quite grasp what it was we were in. We were alone, and that seemed right and natural. Even under these ghastly circumstances—or perhaps because of them—she had a disturbing effect on me. The sort of effect you might expect to get from a pretty, intelligent girl who was not the wife of another man.

Things happened swiftly. The sound of a police-car siren split the night. A few seconds after that I heard another car. Neither one would be Marty Walsh. He'd have to come from way downtown, and that was quite a distance. I heard the elevator door open and close, and then someone rapped on the door.

I OPENED the door. Two uniformed radio-car men came in. Both were young, stocky, efficient-looking. They asked me if I was Steve Blake and I said I was. They took a quick look at Conchita and one of them said, "Dead as a mackerel." He asked me whether I had murdered her, and I said no. He looked at Pat, and I said that she hadn't, either.

Two more men came in, men in plain clothes. One of them was tall and rawboned and looked like a farmer except that his gray eyes had that unwavering coldness that you learn to associate with policemen. He showed me a badge and said he was Lieutenant Lane of the Hollywood Detective Bureau. The man with him was shorter, heavier, and rather handsome. He was introduced as Sergeant Ehrlich. Lieutenant Lane told the uniformed officers to stand outside the door and keep people away.

They were coldly efficient. They examined Conchita, and Sergeant Ehrlich started searching the room. Meticulously. If there was anything around that was of importance, he'd find it.

Lane's voice had a slow drawl and seemed friendly. He asked whether we weren't the same Steve Blake and Patricia Kingsley who had been in the middle of the Jeff Nulty case. I said yes. He asked who the dead girl was, and I explained. He asked, almost apologetically, whether either of us had killed her, and we said no we hadn't. He asked whether we knew who had, and we said no again.

Ehrlich had opened Conchita's bag. He jerked his head toward the lieutenant and the men went into a brief huddle. Then I heard Lane say, "We'd better leave all that for Walsh. This is his baby."

We must have killed more time than I knew. Or else Marty Walsh had driven faster than police cars usually drive, which is pretty fast. First thing I knew, the door opened and he came in. Behind him was Sergeant Vic Tremont. Walsh still looked dapper, dynamic and dangerous. The four detectives did a little quiet talking. We couldn't hear them.

Walsh walked across the room and stood looking at us. He said, "You two again, eh? How did it happen?"

I told him. I told it briefly, and as straight as I could remember it. Once or twice Pat broke in to correct me on some minor detail. The recital didn't take long because Walsh didn't interrupt. His unswerving attention was rather disconcerting; it was as though he were reading into each sentence something that wasn't there.

When I finished, he took his time about asking questions. But once started, he did pretty well.

"No quarrel downstairs?"

I said, "No."

"You intended to come up alone to see her?"

"Yes."

"Mrs. Kingsley just trailed along?"

"Yes."

"That seem odd to you?"

"No. Her apartment is next door."

Marty said, "Oh?" Then: "See anybody on this floor when you got here?"

"No."

"Just you and Mrs. Kingsley?"

"Yes."

"You can testify that she didn't kill Miss Montero?"

"But you didn't come up immediately."

"No. Rex Kingsley wanted to talk to her in his office. They left the table together."

Walsh said to Pat, "Kingsley is your husband?"

She nodded.

"He didn't get sore about your testimony in the Blake trial?"

"I don't know how he felt about it."

"Not so good, Mrs. Kingsley. Not half good enough. Something's wrong with this whole setup."

She didn't say anything. Walsh pulled up a straight chair so that his eyes would be on a level with hers. He said, "I'm not interested in morals, Mrs. Kingsley. I don't care who's playing house with who. My job is murder. You got Blake here out of a murder rap by testifying that

BUTCH by LARRY REYNOLDS

COLLIER'S "That's a break. The cops hit the meter"

"Yes."

"And you, Mrs. Kingsley, can testify that Blake didn't do it?"

Pat said, "Yes."

Marty said, "Sounds like where we came in. You two alibiing each other seems to be a habit."

I'd been thinking the same thing. I'd also been thinking that in the Nulty affair I had told Walsh that Pat's story was untrue. There wasn't anything to compel him to believe that this was different.

He started throwing questions again: "You give Conchita your key?"

I shook my head.

"But when you got here, she was inside the apartment, wasn't she?"

"Yes."

"How did she get in?"

"I don't know."

"Does she live here? In this building?"

Pat Kingsley answered. "I don't think so. I'm rather sure she doesn't."

Sergeant Ehrlich wanted to know why it wouldn't be a good hunch for him to find out from downstairs where Conchita lived and then go there and shake the place down. Lieutenants Walsh and Lane thought that was a good idea. Ehrlich said he'd be back right away, and before he left, Marty Walsh told him not to tell anybody downstairs that there had been a murder.

Walsh said, "Did Conchita give you any hint why she wanted to see you alone, Blake?"

"No."

"Who suggested meeting here?"

"She did."

you were his mistress. You come back from court and move in with your husband again. Blake starts living right next door to you. You don't leave your husband, and he doesn't kick you out. You're partying together publicly in the night club your husband is running. You come upstairs together and walk into Conchita Montero. Maybe she was dead when you saw her, maybe she wasn't. Even accepting what you say, it still comes out bad. What's your idea, Mrs. Kingsley?"

Pat said, "I don't know, Lieutenant. I only know that what Steve told you was the truth."

"Okay. Something else, then: After Conchita went to your husband's office with him, did you see her again before you found her lying here dead?"

"No."

"Did you see your husband?"

"No."

"Did he hear Conchita make the appointment to meet Blake?"

"I don't know."

I said, "I don't think either of us knows how long Kingsley had been standing there."

"How long after Kingsley and Conchita walked off did you two come upstairs?"

I said, "I don't know."

"Why don't you know?"

"Pat and I danced. Not long, but some. Then we went to the bar."

"Anybody see you—that you know?"

"Pete Connolly may have. He was at the bar."

"Where were the others?"

"Miss Mason had gone to the p room. Conchita was with Kings thought Brian Garland and Wade say were with Connolly."

"But they weren't?"

"Not when I saw him at the ba was with a group of men I didn't k

"So nobody can say positively th —or you and Mrs. Kingsley— come straight up to the apartme wait until Conchita came in?"

I said, "I don't know who else have seen just what we did."

"Provided it was like you tell it. I ain't sure of. Maybe we can pr like you say, but if we can't—it mean anything." He let that si Then he started again: "You a were—Steve Blake's mistress, Kingsley?"

I could see that this was getting for Pat. I said, "That's what she t Marty."

"But you told me it wasn't tru told everybody it wasn't true. One lied. So let's make you the pats minute, Blake. Suppose it was l jury thought, and you were simpl chivalrous. Suppose Mrs. Kings jealous of Conchita falling for y

"She didn't fall for me."

"Didn't she say something abo taking her to Tia Juana?"

"That was all kidding."

He looked me over, but he speak to me. He turned to Lie Lane. "How you figure it, Bert?"

Lane said he didn't know.

Walsh said, "Someday I gott Blake's technique. Maybe he's so girl might strangle another girl than leave her alone in an ap with him."

I said, "You're not talking to it sounds?"

"I reckon I am. But it doesn too bad, either."

He got up and went into a con Lane and Tremont. They did talking. I put my hand over Pat ley's. I said, "I'm sorry, kid. I have to ask questions."

"I know."

"You really haven't any id might have done it, have you?"

Her eyes flashed to mine. Th fear in them. She pressed her l against her lips and shook her said, "You think it was your h don't you?"

No answer. I couldn't guess w was thinking. I said, "If he'd do you—or to me—I could understa why Conchita?"

MARTY walked back to w were talking. He was holdi chita's bag. He said, "Ever see fore, Blake?"

"Yes."

"Before you came in this roo

terests me is this: How come Conchita had it in her bag?"

That was a hot one. I said, "You're sure . . . ?"

"I ain't just playing games, Stevie boy. Right there in her bag, it was. One shell fired."

"But she wasn't shot, was she?"

"Nope. Strangled. This gun hasn't been used for a long time. Since October 4th maybe. But finding it on her still brings up an idea."

"What sort of an idea?" I asked.

"Just suppose . . ." He was deliberately dragging it out, letting it sink in: "Just suppose you killed Nulty with this gun. Suppose you gave it to Conchita to keep on account she was crazy about you, and you thought you could trust her? How do you like that idea, Steve?"

I said, "Not very much, Marty. And besides, I've been tried and acquitted on the Nulty thing."

"Right." Walsh smiled cheerfully. "But you haven't been tried for the murder of Conchita Montero. Not yet!"

The Casa Linda was a very sound building. It was strictly prewar construction. The walls between the apartments were almost soundproof. However, noises could filter out through the doors which opened into the corridors.

THERE were plenty of noises now. Every few seconds you could hear the cops in the hall telling people to stand back, you could hear them saying that they didn't know what was happening inside, and that they wouldn't tell if they did know. Then one of them opened the door and motioned to Marty Walsh. He said bitterly, "There's a slew of reporters out here, Lieutenant. They want in. They say they got a right."

Bert Lane went into the hall, leaving the door just a little ajar. I could see his pleasant, friendly face and hear his soft voice. He asked the press boys to take it easy; there'd be plenty to say after a while, but not quite yet. He was a sharp cookie, that Lane; he knew how to handle them without making them mad. Then I heard his voice tighten. He said, "Look, Mister—nobody's allowed in."

Another voice: "But I'm Wade Ramsay. I own this building."

Lane stuck his head in the door and looked inquiringly at Walsh. Marty nodded. "Hell, yes—let him in, Bert. We need him."

Usually, Wade Ramsay looked as serene as a desert sunrise. But not now. His forehead was corrugated with worry lines, and he was mopping his face with a crumpled handkerchief. He said, "What goes on in here?"

Then he saw Conchita's body. He said something under his breath. He said, "Dead?" and Marty Walsh nodded.

Ramsay's eyes flashed to mine. Then he looked at Pat Kingsley. He didn't ask questions in words, but it was simple enough to guess what he was thinking. Bert Lane said, "We don't know anything yet, Mr. Ramsay—except that somebody killed her."

"But good Lord! Conchita! Who in the world . . ."

I knew what he meant. It was one of those things you could know and still not believe. She was—she had been—a kid—a vivacious, gay, lovely kid. She couldn't have had any enemies. Walsh was saying, "That's the way murder is, Mr. Ramsay. We're sorry. We know this is bad publicity for the Casa Linda."

"I'm not worried about bad publicity. I'm shocked, that's all." He looked again at where Pat and I were standing.

Walsh was talking: "Isn't there some place we could use as a conference room, Mr. Ramsay? The technical boys will be here in a little while."

Ramsay said, "The office, if you'd like. It's on the mezzanine."

Walsh said, "You were in the group tonight, weren't you? With Steve Blake?"

"Yes."

"I wonder whether you'd be good enough to round up the rest of 'em. Take them to your office." Walsh consulted a list he had made while Pat and I were talking. "That'll be Miss Mason, Pete Connolly, Brian Garland and Mario"—he paused for emphasis—"and Rex Kingsley. Definitely Kingsley."

I saw a strange, frightened light deep inside Pat's eyes at mention of her husband. That setup was still something I couldn't understand. Maybe I never would. Ramsay left to find the others. I said to Marty Walsh, "Have you been having me watched since I moved in here?"

Marty said, "No. What gives you the idea?"

I told him about the man I'd caught staring at me in the club, the man in gray who was wearing a blue suit tonight. Walsh said, "He's not one of our men. We're too shorthanded as it is. The people who vote the money for the police department forget we're not a village

"Everything at home is fine, dear. Not quite the way you left it, but livable"

COLLIER'S — HANK KETCHAM

any more. If this lad is interested in you, it's probably just because you're a famous person. Had your picture in the paper and all. That carries a lot of weight around Hollywood."

Someone showed up from the coroner's office, and right behind him came the photographers and fingerprint men. Marty went outside and closed the door after him. I learned later that he herded the reporters down the hall and gave them enough for their stories.

Lieutenant Lane offered to stay with the body, and Walsh accepted the offer and thanked him. Then Marty led the way through the crowd which jammed the hallway. We trailed behind: Pat and myself and Vic Tremont acting as rearguard. We rode down in the elevator, got off at the mezzanine, and went to Rusty Mason's office.

RAMSAY had worked well. The others were all there: Connolly, looking small and hard and bewildered; Rusty, gorgeous and frightened; Brian Garland, still short and portly, but looking less like a cherub than I'd ever seen him. And, leaning insolently against Rusty Mason's desk, with his arms folded—Rex Kingsley. He looked us over as we entered and said, "Again! How interesting!"

Wade Ramsay was acting like a nervous mother hen with a brood of very young chickens. He opened the door to his own office and told Marty that if there was any private talking to be done, he could use that room.

Marty checked over the events of the evening as Pat and I had related them, and asked for confirmation. Everyone agreed that was the way they remembered. Walsh said, "Miss Mason, where did you go when you left the table?"

"I powdered my nose."

"And after that?"

"I went back into the club. Our table was empty. I looked around for the others, but didn't see them. Then I found Mr. Connolly in the bar. He was with a group of men who looked important. So I waited until I could catch his eye. Then he left them and joined me. We danced."

Walsh checked with the others. The stories they told sounded plausible enough. Pete Connolly said that he had gone to the bar and stayed there until he saw Rusty waiting for him. Brian Garland stated that he'd had a couple too many and had gone outside for a little fresh air. No, he didn't see anyone he knew. No, he hadn't gone upstairs and hadn't seen Conchita. Wade Ramsay had chatted with Mario, had visited the lobby and had relaxed there long enough to smoke a cigar. He said he hadn't seen Conchita, either; nor had he seen any member of the party in the lobby. Mario had been skittering around, he said, looking after the comfort and well-being of the guests, listening to their complaints, receiving a few tips for better tables. Walsh turned to the tall, handsome man who was still leaning against Rusty's desk.

"And you, Mr. Kingsley?"

"I was in my office."

"That's on the same floor with the club?"

"Yes."

"How long was Conchita with you?"

"Two-three minutes."

"What did you want to see her about?"

"I wanted her to start rehearsing a new song. I also told her to change her rumba routines. She's been doing those same numbers too long."

"Did she like your suggestions?"

"No. She gave me an argument."

"Where did she go when she left you?"

"I'm sure I don't know."

"And you stayed alone in your office? No one came in?"

"Correct."

"Then nobody can prove that you were there, can they? No one can prove that you didn't leave the office?"

Rex said, "You smart cops give me a pain. But you can't tie me up to Conchita's death."

"Maybe not . . ." Marty left that hanging. "But the fact remains that you could have walked up to the mezzanine and gone from there to the seventh floor either on foot or by the automatic elevator, couldn't you?"

"Sure. And I could have followed Conchita into Blake's apartment and killed her and come back downstairs without being seen. Except that I c I never commit murders on Sat night."

"Jeff Nulty was killed on a Satu

"So he was. But I didn't do that, This is my sabbatical year. One every seven, I don't commit a singl der."

Marty Walsh's voice was hard as He said, "Jeff Nulty hired Cor didn't he?"

"Yes."

"How did you and she get alo

"I'm usually irresistible, but sh aged to fight me off."

"Did she fight Nulty off, too?"

"I'm sure I don't know. They sell tickets when they were togeth

RUSTY MASON asked if she say something. Walsh nodded. chita came here from Cuba," plained. "This was her first engag in the States. She had picture amb They all have. She and Jeff Nulty quarrel. I don't know what abou think he was making passes at he idea is based on things I put to from what she told me. Anyway, night of October 3d—that's the before Mr. Nulty was killed—h Conchita. She told me about it th day. She was terribly upset. She contract and would continue to her salary, but the fact that she ha fired promised to ruin any movie c she might have had. Right after death, Mr. Kingsley was made m of the club. He put Conchita back show."

She stopped talking. Rex K said something, and Pete Co moved fast. He looked like a m about to attack a leopard, but he get there. Sergeant Tremont cau arm. He said, "Take it easy, fella."

Rex ignored him. He said to "What's all this talk about Nult way? I thought that issue was clos

"Oh, yeah? Well, listen, Mister ley: It ain't closed. For the firs we're finding out things we didn' before. Miss Montero's death se tie in with Nulty. So do you. S the Casa Linda. Mr. Blake was t that—and acquitted. But that's say that if somebody else killed Nu couldn't start all over again."

Walsh turned his attention b Rusty Mason. He asked about C ta's pictures, and Rusty showed i catchall closet where they ha tossed. She had described it pre curately. It was a mess. The flo piled high with theatrical photos— that had been sent in by perform agents. At Walsh's request, Ru down on her knees and rooted. Sh up with four excellent pictures dead girl. "She evidently didn them," she said, holding them Marty.

He said, "She found something thing she recognized. Somethi was more interesting to her than tures she wanted. She found Blake's gun. I've got an idea w able to prove that's the gun tha Jeff Nulty. So it keeps right on ty He stopped long enough to light rette. "This your office, Miss Ma

"Yes."

"How long have you been M say's secretary?"

"A little more than two years."

"How long have you known ley?"

"Ever since I came to work h was Mr. Nulty's assistant then."

"Does he have free access to fice?"

"Mr. Kingsley? Sure. He com the time to discuss business w Ramsay."

"And if Kingsley had had a would have known that the close might be a good place to hide it.

Vic Tremont said, "Conchit

found the gun in that closet. It adds up that way. She'd recognize it by its broken butt. If she had fell for Steve Blake, she'd wanna give it to him."

I said, "Listen, Marty. Just before Conchita left the table tonight, she dropped her bag. I picked it up for her. There was no gun in it. Nothing heavy. So she obviously found it sometime between then and when she came back to the table all excited and said she wanted to talk to me privately."

Walsh let his eyes rove over the assemblage. He asked, "How many of you heard her make the date to meet Blake in his apartment?"

Connolly said, "I did."

Pat Kingsley said, "So did I."

The others all said they hadn't. Walsh asked, "How about you, Kingsley?"

"I don't remember."

Walsh continued, as though talking to himself: "Of course, the gun doesn't have to have been in that closet at all. We don't even know for sure Conchita went there. But we do know that the last time she was seen, she was on her way to Rex Kingsley's private office. That had been Jeff Nulty's office, too. What's to say she might not have found the gun there, that Kingsley might have seen her, and that he followed her upstairs. If it was that way, then hearing her make the date with Blake would mean plenty to him."

Rex asked, "Of course you couldn't think of the obvious thing, could you?"

"Which is?"

"That the date might have been filled as planned. That Conchita could have given Blake the gun. And that he might have killed her."

"Why?"

"I wouldn't be knowing, but why couldn't it be that Blake was willing to do a second killing in order to protect a lady."

"Meaning your wife?"

"Perhaps." Rex was loving it. "After all, it wouldn't be the first time he risked his neck to protect her."

The telephone rang and Rusty Mason answered it. She said, "For you, Lieutenant."

Walsh spoke briefly, and in monosyllables. He put the phone back on its cradle and looked at us.

"We're on the right merry-go-round," he said. "That was the crime lab. Jeff Nulty *was* killed with Blake's gun."

AT FOUR o'clock in the morning, Marty told us all to go home. Vic Tremont had taken our names, addresses and telephone numbers. So many questions and answers had flown back and forth that none of them made sense any more. Walsh told us to hold ourselves in readiness for the inquest. He said it might be Monday or Tuesday.

Someone asked him about discussing the case, and he said we could use our own judgment: Some of us were going to talk anyway, and it was silly to try to put the brakes on. He shooed us out of Rusty's office.

There were two elevators. Rex Kingsley pressed the down button on one. Where he was going or why, I don't know, and was too tired to care. Wade Ramsay poked his forefinger on the up button of the second elevator and let Pat get in first. He and I followed.

Pat and I got off at the seventh floor and walked slowly down the hall. At my apartment I took out my key and looked at her. Fatigue showed in dark circles under her eyes. She looked completely drained out. I said, "Does coffee keep you awake?" and she said that nothing could keep her awake now. I suggested that she come in my place.

The apartment looked different. Not even a dead body lying on the rug. The cops and technical men hadn't done a perfect job of leaving things neat, but it was pretty good. I motioned Pat to a chair, gave her a cigarette and went into my little kitchen. I put coffee percolator and started it going. I in the doorway while it perked.

I said, "It's none of my business, but I still don't get it."

"You don't get what?"

"How you can live with a lou Kingsley. Why you went to bat while I was on trial. Why you walk out on your husband right ward, or why he didn't kick yo Why he led with his chin tonigh got the cops sore. Why you came with me, knowing he might con stairs any minute and discover we gether. What there ever was b you and that sort of stuffed shirt gin with."

Far back in her eyes a little g amusement tried to break throug said, "Is that all you don't unders

"Not quite."

The percolator started makin bubbling noises. A delicate, tant aroma began to fill the tiny kitch seep through into the other room

him how sorry I was. I said, at I'm really concerned about u're involved, Wade. What hap- pened last night only proves that I was right. It was all unfinished business. I had a hunch things were going to keep right on happening."

Ramsay seemed worried, which was only natural, but he took it philosophically. Maybe the curtain had been rung down, maybe this would be all, he suggested. I shook my head. I said, "You don't think that, really?"

"Why not?"

"Because nobody knows anything yet. Because Jeff Nulty is coming back into the picture. Whether you believe it or not, I didn't kill Nulty. But the case against me was so strong that the cops didn't bother looking for anybody else. I've managed to stir things up. Nulty has suddenly become important again. And I still don't know anything about him."

Ramsay said, "You knew he was an ex-convict."

"Everybody knew that. But I'd like to know more."

"I haven't all the minor details," Wade said, "because they never seemed to matter. He was convicted in San Francisco for armed robbery. He served approximately three years in San Quentin, from 1938 to 1941. I haven't the faintest idea what he did immediately after being released. But I do know that he went to work for my father in October, 1943." He broke off for a question. "Do you know anything about my father?"

I said I didn't.

"He was an invalid," Wade explained. "He was also somewhat eccentric. He was a shrewd businessman, of course, and a successful one." He made an apologetic gesture. "He wasn't at all like me. As a matter of fact, he didn't approve of me. He thought I didn't take life with sufficient seriousness. He was bitterly disappointed because I didn't take advantage of the profession he had forced on me. I was a graduate electrical engineer, and he wanted me to work at it. But I didn't. Oh, I always enjoyed fooling around with gadgets, and electricity, as such, amused me. But that's as far as it went. I couldn't see burdening myself with hard work I didn't like, when we had plenty of money. Result: I enjoyed myself. I went at it rather efficiently. Dad didn't have much tolerance for gaiety. But he was a charitable man. He had established the Ormond Ramsay Foundation, and he was always reaching out a helping hand.

"He suffered his first paralytic stroke in August of 1943. These apartments were new then. Dad lived here in the penthouse, alone. He had a male nurse—not a very satisfactory one. Through one of his charities he met Jeff Nulty. Nulty had worked in the hospital at San Quentin. That appealed to Dad. Anyway,

Nulty went to work for him—as nurse—on October 10th of that year.

"For a big, tough man, Nulty was amazingly good. He was gentle as a woman with Dad. There was a housekeeper, too, of course, but Jeff apparently became a companion as well as a nurse. He was the shining star in Dad's diadem of good deeds. I didn't see very much of them, because I had the unfortunate faculty of making Dad angry when we argued about things. But from what I could observe, and what Dad told me, Jeff Nulty was tops.

"When Dad died in June of 1946, I wasn't surprised to discover that he had left Nulty ten thousand dollars in cash. He also left ten thousand dollars to Mrs. Martha Collins, his housekeeper. I got what was left, which was quite a bit. It included this apartment house.

"In spite of the fact that I hadn't been too close to my father, I was fond of him. I deeply appreciated the care he had got from Nulty. So when Jeff came to me and reminded me of the many times Dad and I had discussed a night club here in the building—a proposition which my father vehemently disapproved—I was interested. I built the club and put Nulty in charge. Anywhere but in Hollywood, it would have been a silly thing to do."

It was simple enough, and understandable. I said, "As far as you know, Nulty never slipped back into any criminal activities?"

"Never. He didn't need to. Dad had left him ten thousand dollars. I gave him a large salary, a percentage of the club profits, and an apartment on the mezzanine."

"Who lives in that apartment now?"

"No one. Not since . . ." He paused.

"I remember the place," I said. "That was where I visited him the time I didn't kill him." I lighted a cigarette. "How do you like Rex Kingsley?"

"Not at all. But he was the logical choice for manager of the club."

"Why?"

"He knows show business. He probably did the actual running of the place for Nulty. I'm giving him the same salary and bonus that Nulty got."

"Who do you think killed Conchita?"

He shook his head. "We'd all like to know that, Steve."

"Do you tie it up with Nulty's death?"

"I haven't any fixed opinion. But it looks that way."

"It could have been Rex Kingsley in both cases."

"I don't agree with you."

"Why not?"

"Not enough in it for him. The most you can figure he'd get out of it would be Nulty's job as manager. That's not a terribly strong motive."

I said, "Motive doesn't have to be financial. Suppose they both liked Conchita?"

"And . . . ?"

"Well, if she was fond of Nulty, and if she discovered that Rex killed him . . ."

Wade Ramsay got up and dropped a friendly hand on my shoulder. "I think you're squeezing that idea too hard, Steve. It could be, of course. But it's not likely. And I'd like to advise you—"

"—To stay out of the mess? It's a little too late for that, Wade. I've got to keep going. It isn't curiosity any more. It's self-preservation."

"And Pat Kingsley, perhaps?"

I nodded. "Yes," I admitted. "She probably has a lot to do with it."

THE inquest was held on Tuesday. It was brief, chatty. There were lots of questions and answers. After careful deliberation the jury decided that Conchita Montero was dead, that she had been murdered, and that they didn't know where to place the blame. I don't know much about legal procedure, but I had a feeling that Marty Walsh had engineered that. I knew he wasn't sold on my innocence, but he also wasn't starting the old rat race again unless he was sure could make it stick.

Tuesday, after the inquest, Brian G land talked things over with me. used a lot of words and said nothing least he said nothing I hadn't heard fore. Except that now he agree couldn't get out if I wanted to. He this was the damnedest thing he'd e run across, and that if we ever go washed up, he'd stick to civil practic

That night I ate alone in the C Linda. I had no intention of seeing show. A dance team had been booke replace Conchita, but I didn't want to them.

There was only one thing about meal I found hard to take. My fri with the gray suit, the sparse hair, compact figure and the inquisitive g eyes was at his usual wall table, watch me. He had been too inquisitive long. He made me nervous. I ha hunch that he wasn't interested in one there except me.

Well, that made us all even. I wa to know more about him: who he w where he lived, why he made so little fort to conceal his interest in me.

I FINISHED dinner, paid my ch and strolled into the apartment-ho lobby. Soon thereafter the gent in appeared. He stopped long enough light a cigar, looked me over once, then went out into the street. I watc him through the slab of plate glass served as one of the doors.

He climbed into a car. It was a vertible, one of the less-expensive ma and the top was down. He sat at wheel, looking back at the Casa L as though undecided whether to c back. His decision was evidently aga that because I saw him take out a bu of keys and fit one into the ignition.

I acted on impulse. My car was side, not far behind his. I had pa there because when I returned t downtown the basement garage of Casa Linda had been full. I had not to do, and no place to go. It migh fun to follow this man.

When he rolled west on Sunset, I lowed. It was easy enough. Convert are as common as termites in sout California, but in December there a many with their tops down. I stay block or so behind him, being ca that he didn't lose me behind a char traffic light.

He drove fairly fast once he pa the Beverly Hills line and traffic thi out. Then he swung off into one o roads that wind into the mountains.

If he was headed home, he sure in a wild area. The canyons of the S Monica mountains are all of that. air was crisp, and it had the fragran fresh green that you get in southern fornia after the first rains.

The road turned and twisted and more and more lonely. There were on one side and steep drops on the o The sky was full of a million stars. of the time I couldn't see his headli the road twisted so, but there was no he could lose me because until reached one of the main highways, were no turnoffs. I could afford to my time.

I didn't see the car behind me un started coming up fast. It came u road behind me, and I felt myself ting tense. No reason; just an id forgot the car I'd been following. concentrated on the car which seem be following me.

"Wise guy," murmured Shorty in a hurt tone. "Always wise guys I run into."

"You been buildin' up trouble," Slim said. "You keep on throwin' fast ones, an' you'll be in a nasty little jam."

"Who are you working for?"

"Just us. Just me and Ernie. We work for ourselves."

"Did you know Jeff Nulty? Or Conchita Montero?"

"Fella, you ain't takin' us serious enough. Ernie, you show him how serious he oughta take us."

I didn't see Ernie move. He swung with his right hand, and the barrel of his gun slammed against the side of my head. I staggered. The blow hurt so badly that I forgot to go on being afraid.

"We got to teach the guy a lesson," stated Slim from what seemed like a great distance. "He ain't reasonable."

THIS time I saw Ernie's right hand move. I ducked and hit. It was a nice, satisfying blow, though it didn't seem to hurt the stocky guy. I stepped in and grabbed the gun hand, and at the same instant a pair of steely arms closed around me. That was Slim, attacking from the rear.

It wasn't a very even battle, nor a spectacular one. Slim was strong. Ernie was vicious. He let his gun drop, wrenched his left hand loose and swung at me. The blow caught me on the cheek, the cheek the gun hadn't hit. It hurt plenty.

Ernie slugged me again. Before I went down I kicked him in the groin. Slim did something to me and I hit the road like a sack of meal. I hurt all over. Ernie jumped on me and I started butting and kicking. He said, "I'll kill you, you so-and-so," and I didn't question his sincerity.

Slim kicked me in the side while I was down. He said in his harsh, grating voice, "This ain't only a sample. Next time you get it all the way."

I'm fairly powerful; but either of these men could have handled me alone. Ernie quit punching me. He reached for his gun, but Slim picked it up. He said calmly, "We'll save that for later, Ernie."

A car whirled around the curve, coming toward us, coming straight into our headlights. Brakes screeched, a door opened and a piece of human dynamite landed on Slim before he could produce the gun again.

This guy was good. He fought fast and he fought hard. I tried doing a little better than my best. I don't know whether I shook Ernie off, or whether he got off by himself. The battle between the stranger and Slim was sizzling. Ernie yelled, "Let's get the hell outa here." He jumped

for the car and I was too bruised and wobbly to follow.

The motor was still running. I heard Ernie mesh the gears. Slim's right hand came up. He hit the stranger with something. The man sagged long enough for Slim to make the car. It roared away. The stranger stood looking after them, swearing steadily in a low, intense, bitter tone. He spoke to me without turning, "You hurt bad, Blake?"

I got a good look at him. It was my friend of the gray suit, the man whose car I had been chasing. There was a thin trickle of blood running down from his forehead. I said, "I'm not hurt at all. I feel lovely. I . . ." Then I fell flat on my face.

When I came to I was stretched out on the road, a seat cushion under my head, and the stranger was giving me the business. I struggled up to a sitting posture, and said, "I'm all right now. Really."

He said, "Stickup?"

I started to say, "Look, Slim, the guy wants to know is this a stickup," but it didn't seem funny enough, so I didn't say it. I said, "They were working me over, trying to scare me. They succeeded on both counts."

"They know you?"

"Yes." My face felt like forty-two cents' worth of ground round. I said, "I owe you plenty."

"Forget it."

"How'd you happen to come back?"

He grinned. "I wondered why you stopped chasing me."

"Oh! So you knew?"

"Hell, yes. Can you drive?"

"I think so. If I go slow and use only one eye at a time."

"You go first. I'll follow." He grinned again. "You were doing all right, Blake."

"You just say that to be sweet. I was having the tar knocked out of me." I lurched toward my car and climbed in. I said, "I don't even know your name."

He fished out a card and handed it to me with a flourish. I glanced at it in the glow of the dash light:

FLOYD ANDREWS
Insurance

"Insurance," I said. "I'm the wrong guy, Andrews. On the basis of what those monkeys promised, I'm the world's worst risk."

I CAME out of the bathroom, seated myself opposite Floyd Andrews, knocked off a slug of straight Scotch, and tried to make believe that I didn't feel like a disaster. Andrews had a knot on the side of his head, and his natty gray suit wasn't natty any more, but otherwise he didn't look too bad.

"I'm supposed to be sore at you, Andrews," I said. "But after what happened . . ."

"Hell!" he said, "I'd have done that for anybody." He lighted a cigarette, blew a long, thin streamer of smoke and looked me over. "Nothing wrong with you that time and sleep won't cure. How serious were those guys?"

"I don't know."

"Know 'em?"

I shook my head.

"What'd they say? What gave you ideas?"

"They didn't say much. Just that I'd better start minding my own business or it would be just too bad."

"Why were you chasing me?"

"Because I wanted to know who you were and where you lived and why you were spying on me."

"I wasn't spying. You're a famous person. I like to look at famous persons. That's why I dine in places I can't afford."

"You're really an insurance man?"

"What else would I be?"

"A private detective, for instance."

"Naah! I was almost one once. Insurance adjuster. You learn the ropes that way."

"You didn't," I said. "You were as obvious as a crinoline girl in a burlesque chorus line."

"That was the idea. I thought maybe you'd brace me eventually."

"If you were that anxious, why didn't you introduce yourself?"

Floyd Andrews shrugged. "And have my ears pinned back for impertinence? That wouldn't have been very smart. I wanted you to do just what you did do. The two mugs and the battle royal were just icing on the cake."

"Did you hire those guys?"

He shook his head and said, "No."

I said, "What's it all about? Try telling me as much of the truth as you can."

"I will. But not all of it. Let's have that understood. I'm interested in you."

"Why?"

"Private reasons. I'd like to ask you a question."

"You haven't been shy so far."

"Who told the truth on the stand—

"I'm not writing to my parents today. I can't think of anything I want"

COLLIER'S CHARLES PEARSON

when you were being tried for Jeff Nulty's murder: you or Mrs. Kingsley?"

"It's none of your damned business."

"Granted. But I'd still like to know."

"You a friend of hers? Or Kingsley's?"

"I don't know either one. Never even met 'em."

"Then where do you fit in?"

"I don't. I'm merely trying to find out things. Maybe I'm on your team. I'm not sure yet."

"What would make you sure?"

"A word-of-honor answer to my question: Who told the truth on the stand, you or Pat Kingsley?"

"I did."

His eyes looked straight and hard into mine. "I'll buy that," he said. "You wouldn't make a good liar. So that puts me on your side."

"So you say."

"Believe it or not. It doesn't matter to me. But if you've handed it to me straight, then I can give you a lot of information."

"About what?"

"Pat Kingsley. Her husband. The general setup around here. How much do you know about Pat?"

"Nothing."

"Like her?"

I felt a slow flush mounting to my face. I started to say something and found myself looking right into Floyd Andrews' grin. "That's enough answer, Blake. You like her. Or you could, easy as pie. I don't blame you."

I said carefully, "I don't know why I'm talking to you like this. Just because you saved me from a really prime beating—and maybe saved my life . . ."

"If it'll make you talk, go on being grateful. Talking and listening might make things easier for you. You say you want to learn the score. So do I."

"What's it to you?"

"That's the thing I'm not telling."

"I thought you were a cop."

"I'm not. I never was. But I think it's a hell of a good profession. Shall I tell you a few things about Pat Kingsley and why she stays hitched to a louse like Rex?"

That was something I really wanted to know. I massaged a couple of my sorest spots, and listened.

"Pat's old man," Andrews said slowly, "is Carey Maxwell. He's nice people. He's also rich. He never handled the reins right on his daughter. He'd let her run wild for a while, and then try to check her. It didn't work out so well.

"About four years ago—she was twenty then—she met Rex Kingsley. He was a lovable louse, and one of the best tap dancers in the world. He was drawing top salary, and had made a picture. Maybe he was going to make others. He was hell with the women. One word from him and they'd fall flat on their faces and yell, 'Uncle.'

"To Kingsley, Pat represented the things he hadn't been able to win for himself: a million dollars, social position, the works. He wasn't the marrying type, but this was something extra special. He slung his personality at her in chunks. She either fell in love with him, or convinced herself that she had.

"Her old man went wild. He wasn't class-conscious or anything like that. If it was what was good for her, she could have married the iceman. But Kingsley was a wrong Joe. He was wrong clear through: crammed full of ego, big in the head and small in the brain. A guy with a good torso and a pair of clever feet. Carey Maxwell warned his daughter a dozen times. He tried every form of parental persuasion. She accused him of being prejudiced, and he admitted it. They quarreled, which was bad tactics on the old man's part. She up and married Kingsley. He prophesied that she'd regret it, and she said if she ever did, no one would know. And she's just the kind of girl who could take a beating and keep her mouth shut—which is precisely what's she's been doing."

Floyd Andrews was making things clear as crystal. He was doing it with an earnestness which interested me. I figured there had to be something between him and Pat.

"Pat married Kingsley in 1944," Andrews went on in his quiet, steady voice. "I don't think it took her a hell of a long time to discover that she had drawn a blank. But she wasn't the kind of gal to advertise it. In 1945, he got a two weeks' date headlining the show at El Rancho in Las Vegas, Nevada. They drove up together. She was doing the driving. In her car.

"Between Barstow and the N line the road isn't too good. It's s enough, but it's narrow. Mayb dozed off. Maybe she was ca Maybe it was the truck's fault. An there was a bad accident. Rex ley's foot was crushed. He had a dozen operations. He came out with only a slight limp, but with tl tainty that he'd never dance again haps he could do a simple ta certainly never an acrobatic tap. accident took away from him th thing he'd ever had.

"He's a whiner. He started blan on Pat before he was ever out hospital. She had been driving. her fault. She had ruined his caree couldn't get a job dancing; he know how to do anything else. H her on the idea that she was respo He never let her forget it. And n ter what she really thought abou she never let on. She took it on th and is still taking it.

"She supported him. Probab had always supplied most of the lu but from the day of the accident, h tributed absolutely nothing. Her ol knew Wade Ramsay. When Rams cided to install a swank night clu his father died, Pat made a pitch husband to be manager. The on he knew was show business.

"But Jeff Nulty got the job b he'd been Ormond Ramsay's pe got the job plus ten thousand dolla the best Rex Kingsley could get v sistant manager. I'm making a there, an important point. To th age man being manager would be job; to Rex Kingsley it was mor that, it was getting somewhere a show business."

ANDREWS paused, obviously ing me to say something, obliged: "You mean a job woul much motive for one man's killi other, but that *this* job meant a lo than that to *this* man?"

"Something like that. I'm not it was enough motive for murd Kingsley has become nasty and b ent since his accident."

"Why couldn't Pat leave him?"

"That's not the way she stac For better or for worse—that stuff not the sort who would stick with when he was riding high, wide and some—then throw him over whe had his teeth kicked in. Especiall she felt responsible. She's got a streak a mile wide. Maybe a st streak, too. My guess is that th mance died long before the accide that he's her albatross. Which is never got the angle of her public ation of him by testifying that y she were playing games. Unless .

"Unless what?"

"Unless she *knew* that you killed Nulty."

"How could she be sure of that

"Only by knowing—actually k —who did kill him."

"And she would protect a m didn't love even if she knew he murderer?"

"That's more than possible. I possible that while she would not him to the wolves, she wouldn't innocent man take the rap."

I said, "I've thought—even th didn't want to—that she may hav Nulty."

"It doesn't hold. She'd rather a killing than wreck her own cha Which brings us back to tonight."

"What about it?"

"Let's assume that Rex K killed Nulty. Let's say Pat knew i and she start going together—r the open for anybody with the pr Casa Linda cover charge to see. K wouldn't like you. Perhaps it w jealousy. Or hurt pride or som But more than that, you've proc

d, "I won't need any more help." hrew back his head and laughed. aren't that dumb," he said. "All ing you is this: You'd better keep uard up every minute. For my you're in a dangerous spot."

week before Christmas, Los An- s gets pretty excited about the , but nothing the merchants could thing the chamber of commerce ook up, no mike-amplified greet- m the phony Santa Claus in the uper float, could imbue me with as spirit. I felt lonelier than I'd t before in my thirty-one years. that I had to be lonely. That was ny part of it. Rusty Mason was ving an excellent imitation of a ul woman pursuing a homely was the man.
wanted me to talk about myself. couldn't guess. An aeronautical r hasn't got much to talk about . She certainly wasn't interested ting board development of super- lanes, or of jet-propelled commer- nsports. But I played along the ould because there were things to bout the voluptuous Miss Mason: tionship to the gone-but-not-for- Jeff Nulty, what personal interest ght have had in his demise, where d been at the moment Conchita o had been murdered in my ent, what went on between her x Kingsley. Those two ignored her so obviously that it looked ral.
I talked to a couple of detective nts, Marty Walsh of Homicide n and Bert Lane of Hollywood, he slugging I'd received out in the They thought they knew the two nd all detectives and prowl cars n instructed to watch for them. greed to identify in case they were t in. The cops didn't make me feel re comfortable by suggesting that wise to keep my guard up at all They told me they had checked yd Andrews and that he really the insurance business. Neither y theory—so they said—about had taken so much trouble in my or why he had told me as much ad. They said they couldn't peg all—didn't know why he was in- , or where he fitted in. Sure, he e in love with Patricia Maxwell y, but then again he might not. he was just one of the many peo- o didn't like Rex Kingsley. He y wasn't a private detective—or a public one. And he had been very much present the night Conchita had been killed. Where he might have been when Jeff Nulty journeyed into the hereafter no one could do any more than guess. They asked whether the whole affair in the canyon could have been staged by Andrews—whether it looked like one of those things—and I said I didn't think so. They didn't tell me what they thought. They went away and Marty asked me to get in touch with him as soon as I stumbled over my next murder victim.

Another thing that puzzled me was the obvious friendliness of Pete Connolly. He was another stranger who suddenly liked me for no apparent reason. I figured I ought to write an essay: How to Make Friends and Murder People.

Pete Connolly was one of the best jockeys in America. That rates high in any book, in California it puts you two up on the Emperor of India. Pete was presently taking treatments for a sinus condition and getting himself in shape for the opening of Santa Anita. Most people sought him out because they figured he had private conversations with the horses and might be prevailed upon to tell them profitable things once the racing season got under way. Others enjoyed being with him because he was just naturally a right guy. And—in or out of silks—he was a celebrity.

I liked him. He was so small that I looked on him as a kid when actually he was a year older than I. He had a terse, graphic manner of speech and an astonishing vocabulary. He was hard as nails, yet ingenuous as a kid. If I hadn't felt sure that he was cultivating me for reasons of his own, I'd have let myself go and enjoyed a most unusual companionship.

That was where Rusty Mason intruded again. No matter which way I turned, there was Rusty. She was making a play for me, for no discernible reason. She was obviously fond of Pete Connolly. And the little jockey was completely overboard about her. Like a high-school kid in the throes of his first grand passion. There were times when he just wanted to talk about her, there were other times when he seemed worried. Of only one thing I was sure: He and Rusty were not having an affair. I don't know how the lady might have felt about that, but Pete had other ideas. What he was thinking of in connection with Miss Mason was matrimony.

I saw Pat Kingsley occasionally. I hated the thought that she was all wrapped up in trouble. I had a lurking fear that what I was doing might not be so good for her. We met around the building, chatted casually, said nothing serious, and went on.

Then one night it happened. It wasn't exciting to anybody except me. I had come in from the plant, and as I passed through the lobby, I saw Rex Kingsley chatting amiably with the cuddly little number at the switchboard back of the lobby desk.

I went up to the seventh floor. I stood outside my apartment and fumbled with my keys. That was when I heard a woman crying. In 7-A. That had to be Pat. Maybe she was alone, maybe not.

I entered my apartment, closed the door, and stood there thinking. The more I thought about what was happening next door, the more I wanted to do something about it.

I picked up the phone and asked the operator for 7-A. I didn't realize until later that Rex might still be downstairs trying to make time with the operator. I heard Pat's voice. It sounded nice—awful nice—but kind of choky.

I wasn't at all adroit in my approach. I said I thought it was time for us to get together without spectators. I said I wanted to take her out to dinner. Anywhere except the Casa Linda. Where we could talk. Where we could perhaps get to know each other a little better. I sounded silly, even to myself, and was actually surprised when she said yes. I asked her when, and she said I could name the time. I did some lightning calculation, figured bathing, shaving and changing time down to a split second, and said I'd rap on her door.

SHE was waiting when I did. She was wearing a natty little maroon outfit, with an ascot at the throat. She had on a cute little hat that looked like a beret but wasn't. She looked young, fresh, lovely.

I said, "Let me explain something before we start out. I've wanted to do this for a long time. But I never had the courage. Then I heard you crying . . ."

She looked embarrassed. "I get that way occasionally. Not often. I'd been thinking about Conchita. It got me."

"I understand. But my idea is this. We'll get out of this goldfish bowl. We'll find a place where nobody knows us We'll agree not to talk about anything unpleasant. Right?"

She put her hand in mine and said, "Right." Her eyes were eager and lovely. We went down to the basement garage and climbed into my car. It wasn't much of a car, but it was nicely tuned and easy to drive. We went out Sunset to Beverly Glen and cut across toward the valley.

This was my real introduction to Pat Kingsley as a person: as a nice, wholesome, attractive, pretty girl. Nothing we talked about was important, yet somehow it all seemed important.

Out Ventura Boulevard we approached a huge, brilliantly lighted drive-in. We ordered sandwiches and got productions. And coffee. And salad. The order came on two trays. Mine was hooked onto the steering wheel, hers on the side of the car. Nothing was important except that nobody seemed to know us, nobody was staring and we were not under any strain.

I paid the check and gave the waitress a fancy tip. She gurgled her delight and invited us to come back soon. We backed through the crowd of cars, and I turned toward Hollywood.

I drove right past the Casa Linda. I glanced at Pat and thought that she pointedly refrained from looking at it. We rolled along Sunset to the Strip and climbed a curving road lined with snug homes which all seemed a little surprised at finding themselves up so high.

WE CAME to a promontory and I pulled over to the side of the road and parked.

The view was impressive. The soft air crept in through the open windows so that you couldn't believe it was December. We were close to, and above, a great city; we were surrounded by homes with lighted windows . . . and yet we were alone.

I said, "I'm going to do a little cheating, Pat."

She looked at me, as if not understanding.

"It was my suggestion," I explained, "that we have one evening together without talking about things we'd like to forget. But I'm not strong enough. One question has been hammering at me."

She said, "Go ahead, Steve. What is it?"

"This. The thing that gave me the idea of calling you tonight was that I heard you crying. It worried me."

She didn't look at me. Finally she said, "I was crying about Conchita."

That didn't register very strongly. I said, as gently as I could, "That doesn't make much sense, Pat. Sure, you were fond of Conchita. But not to the extent that you would suddenly begin crying about her."

She said, "I was reminded . . ." Then she turned and looked at me. "Lieutenant Walsh had been visiting me."

"Oh!" I said. "Walsh."

"He was there quite a while. He was talking about Conchita. Questioning me about her. As though he thought I might know a lot of things I wasn't willing to tell. He's a shrewd detective, Steve. By the time he left, I was pretty badly upset. I started crying."

I said, "Did he find out anything?"

"There wasn't anything to find out . . . except what I'd already told him."

Pat dabbed at her eyes with a filmy bit of handkerchief. She was trying not to cry. For a few minutes I sat there like a dope, wondering why I felt the way I felt.

I was doing flip-flaps inside. Timidly, I reached over and took her hand. She sighed, ever so lightly, and relaxed against the cushions. After a while she said, "This is nice."

I said I thought so, too. We sat there, not talking much and it wasn't too difficult to cast unpleasant thoughts aside. What was happening to me was new and exciting. I didn't even warn myself that I had no right letting myself fall in love. It wouldn't have done any good, anyway. It was something completely out of my control.

I was afraid to try to kiss her. I'm not the bold type, and I had a lurking fear that she might not like it. The fact that we talked very little made small difference. We were alone in the world; that was what counted.

After a long time she said, "I feel better than I've felt in months."

I pressed her hand and she gave mine an answering squeeze. I knew what she meant and she knew I knew. That was

enough. I said, "I'd better watch my step, Pat."

"Why?"

"I'm getting too fond of you."

"Is there any such thing as being too fond?"

"I don't know . . ."

Not much brilliance. But people in love aren't usually brilliant. They feel things too deeply to say them well.

I don't know why I was taking so much for granted. All I was positive about was the way I felt. And I was sure that her mood matched mine. Perhaps I'd merely done her a favor, making it easy for her to forget trouble.

A lot of time passed swiftly. We still hadn't said anything, and we'd said everything. I started the motor and started downhill toward the Strip.

We rolled into the garage without meeting anyone we knew. We rode up to the seventh floor together, and I went to her door with her. I knew she wasn't going to ask me in.

She put her hand in mine and said, "Thanks, Steve."

I felt myself flushing. I said, "Now that you're safe, I'll confess something."

"What?"

"When we were parked up yonder . . . I wanted to kiss you."

She said, "I would have liked that."

AFTER a solitary dinner a few nights later, I was about to leave the Casa Linda, when someone beckoned me from the bar. It was Pete Connolly, looking smaller, more wiry, more dapper than usual. He was alone. On the bar in front of him was a glass of ginger ale. Pete wasn't a drinker.

I liked the little jockey. He was a rough, tough character, but I'd gotten to know him well.

He motioned me to a place beside him, and insisted that I order something. From the moment I sat down, I sensed that Pete had something on his chest. He was a long time getting around to it, but finally it came out.

He said, "I'm asking you something, Steve—just between us. Have you noticed that I'm kinda crazy about Wilma?"

"Wilma?"

"Rusty."

I said that a blind man could have noticed it. I also raised my guard a trifle because I figured he might have observed the play Rusty was making for me, and maybe he didn't like it.

"You think she likes me?" he asked.

"Of course . . ."

"She runs with a lot of men. They won't leave her alone. But I don't mean that. I mean more."

I said I didn't know, that Rusty had never discussed him with me. He said, "She's a funny babe. I can buy her dinners and drinks. I can take her stepping. But that's all. She won't let me give her any presents—except just cheap stuff."

I didn't think that was in character, but I didn't say so. Rusty had impressed me as a young lady who knew the score, and would not be too reluctant about accepting presents: the more expensive the better. I said, "Maybe she's in love with you."

"Then how come she won't marry me?"

Another surprise. I hadn't known for sure that that was what he wanted. I said, "Have you asked her?"

He gave me a twisted grin.. "Hell, I always ask her. It's gotten to be a gag. I meet her and I say, 'Evening, Wilma. Will you marry me?' And later maybe I say, 'How about another drink? Will you marry me?' "

"What does she say?"

"She stalls. She says, 'Maybe' and, 'Perhaps.' She says if she ever marries anybody, it'll be me. That's all I got to hang onto. It ain't enough." He leaned forward confidentially. "Look, Steve, I'm spillin' my guts on account I know Wilma likes you. She thinks you're real people. So maybe you can do something for me, huh?"

"What?"

"The only argument she gives me against this marriage business is her job. She says it wouldn't be fair to Mr. Ramsay if she walked out on him, and she says she likes to stand on her own feet. But the more you think that over, the less sense it makes. She earns maybe seventy-five bucks a week. That's peanuts. I make around twenty thousand a year. So if she likes me, why won't she marry me? I ain't that repulsive."

I wasn't saying anything. Not right then. I never had been able to peg Rusty Mason to my own satisfaction. She hadn't impressed me as the sort of girl who would refuse fancy presents or say no to a twenty-thousand-per-year marriage bid. There had to be a reason.

Pete was talking again. "I got an idea, Steve. It ain't as screwy as it sounds. You and Wade Ramsay are like that . . ." He held up two fingers, close together. "You throw a lot of weight with the guy. I got an idea that if I upset her applecart, she'll leave me to pick up the apples."

I said I didn't get what he was driving at, which was an understatement.

"Okay. So I'll lay it on the line. Supposing you was to go to Ramsay and ask him to fire Wilma. Then she couldn't go on giving me this malarkey. She'd either have to marry me or think up a new excuse. But I ain't figuring to do her dirt, either, see? If Ramsay will play ball, why, you explain the setup. And arrange that if Wilma still doesn't marry me, he's to give her back the job. So you help us—maybe—and no matter what gives, nobody gets hurt. How's about it, Steve?"

Instinct told me to keep out of this, but there wasn't any logic to go with the instinct. I said I'd do what I could. I had the feeling that Rusty Mason wasn't good enough for him. Okay as a playmate, perhaps, but not as a wife. But she hadn't been gold-digging. . . .

I didn't get hold of Wade Ramsay until the next morning. He was out on his terrace enjoying the warm sunshine of a December summer. He said, "Who could believe that Christmas is only a couple of days away?"

We settled ourselves in a couple of wicker chairs with fancy cushions, and Wade asked me what was on my mind. I told him. It sounded silly, but there it was—just as Pete Connolly had dished it out to me. He didn't start talking the instant I'd finished. Instead he thought it over as though it were a major problem. Finally he said, "I don't quite see myself doing that, Steve. I think she'd be lucky to land Connolly. From what you tell me, he's really in love with I I'm too fond of both of them to rig machinery."

I told him I didn't get it.

"If she wants to marry him, she say yes. But if they're ever going to h a chance to be happy, it should be way." He smiled apologetically. "' know, Steve—every once in a while I a streak of my father's righteous cropping up in me. This is one of times. I wouldn't feel right about p ing Cupid with brass knuckles.

"You can tell Pete that I think his proach is all wrong. I can replace R if she wants to get married. I woul stand in the way of her happiness. I'll be damned if I'll try to shove into something she doesn't want."

"Your answer is definitely no?"

"That's it. The scheme seems ju little too sly and underhanded." smiled pleasantly. "I hope you'll te to Pete so he won't be sore at me."

THE buzzer sounded. Wade's Fil boy came in to announce Rex Ki ley. I got up to go, but Ramsay wa me down. Rex and I said hello to other, but without cordiality.

Rex and Wade plunged into a cussion of a Christmas Eve gala w was scheduled for the club. Fun souvenirs for all. Personal visit f Santa Claus promptly at midnight. V your reservations early. When they ished discussing it, Wade surprised m saying to Kingsley, "Is Rusty Maso love with Pete Connolly?"

He said, "Hell, how would I kno

"Pete wants to marry her," Ra explained. "She isn't having any. P been confiding in Steve Blake. It' odd situation."

Kingsley said, "I thought they just having fun."

"Maybe that's the way Rusty w like it. But Pete has different ideas

"Wants to make an honest woma her, eh? Well, that'd be a novelty!"

CUP DILEMMA

United States Davis Cup com- d a full schedule of tournaments for Jack Kramer when the No. 1 tennis player returned nning the All England tourna- Wimbledon last summer. But was tired.

," Jack said to the committee. nt to beat Australia and keep nd you know I can play tennis. 's the use of making me play gh weeks at Orange and Sea The tournaments will do me rm than good. Just let me rest e in shape."

omised, a refreshed Kramer wal- e Aussies with the help of Ted er. Ted wasn't refreshed. He nt Kramer's vacation period a position on the team in cut- ompetition at Sea Bright. Ted will have to do the same thing again in a few weeks—and that could be fatal to America's Davis Cup chances.

Kramer, now a pro, sizes up American prospects this way: "Schroeder should be told definitely that he is the No. 1 singles man. We know what he can do. He can raise his game higher than Parker or Mulloy or any other American amateur—Ted's record in the last two cup challenge rounds proves that.

"But if Ted has to win a couple of grass-court tournaments before the cup matches to win a job on the team—and that's the story you hear in California—he may be worn out physically before the first Davis Cup shot is fired. He's a nervous, intense player with definite physical limits. He should be allowed to stay out of tournaments before the cup battle and gradually build his game up to a peak.

"We'll probably have to beat Australia again. Adrian Quist has regained top form and Jack Bromwich is much improved, according to reports. Schroeder—at his rested best—can beat them both, but he's probably the only American who can. Schroeder and the right doubles partner—my choice would be Billy Talbert—have an even chance against Quist and Bromwich. So we have to count on Schroeder's winning three matches on successive days—perhaps all three of them five-setters. He won't be ready for that much work if he has to raise his game to top tournament pitch in August."

Kramer's plan makes sense, but there probably would be a player revolt if the cup committee followed it. There is excellent reason to believe that several leading Americans with Davis Cup ambitions have delivered an ultimatum, roughly as follows: "It's us or Schroeder. Make him earn his place."

It adds up to a nice Davis Cup dilemma.

TYCOONS ON WHEELS

Amateur harness-horse drivers have their problems. If they go too slow, they lose. Naturally. If they go too fast, they lose. Not so naturally. To win, they must pace their horses just right—not faster than 2:12 on a mile track or 2:15 on a half-mile track.

At Milwaukee last summer, wealthy sportsman Octave Blake drove Brittanic across the line in first place, but was disqualified for exceeding the speed limit by one fifth of a second. Blake didn't carry a stop watch—mechanical timing aids are against amateur rules.

An instinct for timing is more important than wealth or social position in harness racing. During the 1947 Du Quoin, Illinois, meeting, a groom named Jimmy Fitzgerald rode home in front of four drivers whose combined assets topped $18,000,000. Oddly enough, Fitzgerald looked like a Driver of Distinction among the poor beaten millionaires. There's something about the Grand Circuit that brings out the worst in a wealthy wardrobe.

One Middle Western tycoon allegedly makes the circuit on one dark wool shirt. As a gag last summer, a Grand Circuit official warned the shabby eccentric: "You'll have to change that shirt. We've had complaints."

"I suppose," he replied, "that (name of millionaire with two shirts deleted) has been making trouble again."

"No," the official said, "this time the horses are complaining."

GOLF TRAGEDY

Craig Wood once played a par-4 hole in 11. When asked to explain how it happened, Craig declared, "Well, I had a long putt for a 10, but I missed."

THE END

YOU'LL FIND OUT

Continued from page 19

nd began to wander around, hello to everyone. Someone drink in my hand and I took it cally. Then, remembering my with the colonel, I started to und for a place to set it down. Captain, that you now have all , including liquor," said a very and very cool female voice.

d around. She was sitting on a udying me very calmly. Mary ng beside her.

," I said, equally cool. I turned very obviously away from her ke to Mary. "It's good to see in, Mary. How are big and ?"

ed toward Joan. "You might t way," I said dryly.

nly those big eyes filled with a warmness. "Apologies are futile, d Joan, smiling at me, "particu- ce you deserved what you got. I resist the temptation."

lden joy ran through me but, y managing to fight down the n that threatened to cover my gured my next few moves coolly. I understand it, you can resist aid gravely.

is a correct summary of my " she said, equally grave.

Bowing slightly, I took her right hand in mine and smiled into her eyes. "But you would dance with me," I said.

"I would." She rose and slipped into my arms.

She was a fine dancer and, of course, I'm not so bad myself. So we got along pretty well. I told her a little about myself and she seemed interested. All in all I was pretty impressed with her.

Ed and Mary left early—the sitter had to get home herself—so when the party broke up, I walked Joan back to Ed's house.

When we got to the door, she unlocked it, turned and said, "Thank you very much, Jim. It was very nice."

"Good night," I said softly, extending my right arm at the same time.

She slid smoothly around and through the door, and said, "You're nice to play with, Jim, but I meant what I said the first day I met you." The door snapped shut in my face.

Most of Sunday I spent sitting in my room, staring at my phone. Again and again I reached out my hand and then drew it back. Lighting one cigarette after another, I paced up and down. What if she said no? It would be too humiliating.

Monday morning I took a jet up on a test hop. She checked out fine so I went on up to ten thousand feet and did a few slow rolls, a dozen to the right, a dozen to the left. During the last few rolls I could feel my mind clearing—acrobatics always clear my mind. I built up a little speed and pulled back smoothly. The nose of my plane came up past the horizon, climbing up and over, and I rolled her right side up at the top to finish the Immelmann turn. Then I knew; I would call Joan. I nosed over and headed for home.

A half hour later I was on the phone. I didn't waste any words.

"Why don't we go out and play tonight?" I said.

She didn't waste many words either. "If we're agreed on the definition of the word 'play,' all right," she said.

"We're in complete agreement," I assured her.

And we went out that night and every night for the rest of the week.

Saturday evening, as I was walking down the road to Ed's house, I thought about the last week. We hadn't done much—gone walking, played bridge with Ed and Mary, sat in the club and talked. Those nights that we talked I told her about my family, my childhood, my schooling, my war experiences, my hopes for the future and the like. She was certainly a fascinating girl. It had been a wonderful week.

"And believe it or not," I said to the nearest tree, "I haven't made a pass at her." I was amazed at myself.

About midnight, after the dancing at the club was over, we walked back to Ed's house, hand in hand, swinging our arms like school children. We tiptoed up the steps to the porch; she opened the door, and I stood back, as usual. Joan hesitated, then turned to me and reached up and brushed my lips with her lips. I

It Takes TWO HOLES to make a PUNCTURE!

...and Both Need Expert Repair

● It's not enough to repair the tube alone. Even the smallest hole in a casing will "suck in" dirt and moisture, causing fabric rot which leads to serious blowouts.

BOWES tire repair does BOTH jobs Safely and Quickly

Bowes tire and tube repairs are quick, lasting and *safe*. Your Bowes repairman is equipped, not only to repair your tube, but also, where necessary, to make rapid inexpensive repairs to the casing. For greater tire mileage and—*safer driving*, look for the Bowes tire repair sign!

"On Monday, I watched you make five passes at the field before you got in, and, when you did land, well . . . those were rather vicious bounces."

"Yes, sir."

"On Tuesday, in spite of such things as radio, maps and perfectly clear weather, you managed to get lost, you had to land at an airport some one hundred miles from here, and we had to fly up a supply of fuel for you."

"Yes, sir."

"On Wednesday I watched you make a very nice landing . . ."

"Thank you, sir."

"And run off the end of the runway."

"Yes, sir."

"But the plane wasn't damaged much and it's all fixed up now."

"That's good, sir."

"And I know that you are a good pilot. I realize that these were merely temporary lapses on your part, and we'll forget about them."

"Junior doesn't need the car tonight— Don't you think we ought to celebrate by going somewhere?"

COLLIER'S GARDNER REA

"Thank you, sir."

"That brings us to Thursday, Captain."

"Thursday?"

"Yes, Thursday."

"Nothing went wrong on Thursday, sir."

"You might say that, Captain, and you might not. Do you remember that Thursday you were up flying around to the northwest of the field?"

"Yes, sir."

"There was another plane that passed by very near you, Captain."

"I didn't see him, sir."

"I know you didn't, Captain."

"Did I come close to him, sir?"

"Very close, Captain."

"The pilot must have been irritated, sir."

"Yes, Captain, the general was irritated."

"General?"

"General."

"Oh."

"Yes, Captain, Brigadier General Ramsey Thompkins Wilder. He has been here for the past week, inspecting the new air base."

"I knew that, sir. I didn't know that he was flying Thursday, sir."

"He needed flight time for flight pay, Captain."

"Of course, sir."

"And, Captain, the general is pleased with the new air base."

"That's good, sir."

"He is displeased with our squadron, our pilots, and particularly one of our pilots."

"That's bad, sir."

"True, Captain, true. You know, Captain, I am a lieutenant colonel."

"Yes, sir."

"I'm not going to be a full colonel, Captain."

"I'm sorry, sir."

"And you're a captain."

"Yes, sir."

"You're not going to be a captain much longer, Captain."

"They wouldn't push me down to first lieutenant, sir?"

"Second."

"That's a rather horrible punishment, sir."

"I'm sorry, Captain."

"Thank you, sir."

"Good day, Captain."

"Good day, sir."

I walked outside and just kept on walking. It was a lovely day—for some. There was a bird somewhere for happy people to hear. It was all my fault. And the colonel was in trouble because of me. That was the really bad part because you have to like the colonel. A straight guy. The kind you can always talk things over with.

I wandered through the streets of the town. And then I was in front of Ed's house. I stood there a moment, just looking. Then I decided I might as well drop in—just for a visit. I walked up the sidewalk and up the front steps. And the last thing I remembered was my foot up there above my head with a roller skate stuck to it.

THINGS were black, then gray, and all I could think of was that I had let the control stick slip out of my hands when I blacked out pulling up from that dive. I reached out and grabbed for the stick. Then I opened my eyes and there was Joan about two inches from my face.

I searched for something to say. I said, "Are you going to marry me?"

"Of course, darling," she said soothingly. "After you let go of my jacket." She reached down and untwisted my hand.

"Oh, sorry."

"Hush," she said and leaned forward. She didn't just brush my lips this time.

A minute or so later I loosened my arms and let Joan draw away, and I found myself staring straight up into the smiling faces of Ed and Mary. They were shaking hands as if they had just been introduced.

"Oh, hello." I said.

"Congratulations," said Ed.

"Yes, congratulations," said Mary.

"Oh, thanks," I said.

"Joan and I will get our hats," said Mary.

"Hats?" I said.

"Yes," said Mary. "Ed knows a fine place near here."

I saw her kick Ed's ankle. "Near here?" I said.

"Of course," said Ed. "I'll get the car."

Frankly, I never realized it was so easy to get married. A wonderful feeling. . . .

Several days after we were married, while we were waiting for my leave papers to come through, Joan and I went for a walk. Down the street came the colonel and another officer. I took a good look at that granite face and knew who it had to be: Brigadier General Ramsey Thompkins Wilder. I cursed my luck. The colonel had told me yesterday that the general had made no formal complaint. We were praying that he'd forget it. If he did, I was going to tell Joan about it; if he didn't, I didn't know what I was going to tell her.

But there was no way to duck out now. I saluted, hoping they wouldn't stop. Both the colonel and the general answered with a salute, and I could see the colonel was walking a little faster past me. Joan stopped and said, "Good day, Colonel." The general stopped. The colonel stopped. I stopped. What could I do? She didn't know. It was my fault—again.

THE colonel smiled rather feebly and introduced us. "Captain and Mrs. Nelson, this is General Wilder."

Blood suddenly covered the general's eyes. "The one who . . .?" said the general, but he restrained himself as he looked at Joan.

"Oh, are you *the* General Wilder," said Joan in a thrilled voice.

"Why, yes," said the general suspiciously. "I believe there's only one."

"The one my uncle speaks of all the time?" said Joan.

"Your uncle?" said the general.

"Yes. You know, Senator Cartwright. I think he said he met you when he was dealing with appropriations or something like that."

"Senator Cartwright!" said the general in a stunned voice. His face went white. A shudder ran through him. "Of course!" he said emphatically, struggling for time. "My old friend, the Senator. Well, well. What a sho . . . shurprise."

The colonel and I stood shoulder to shoulder, staring at Joan in awe. Then everyone was laughing and talking all at once. Then the colonel reminded the general that they had to get to a staff meeting. As we parted, the colonel glanced back and winked at me. I winked back, whisked Joan around the corner, stopped and kissed her.

"It's all right by me," she said wonderingly, "but why here, Jim?"

"Tell you later, darling," I said. "Kiss me again."

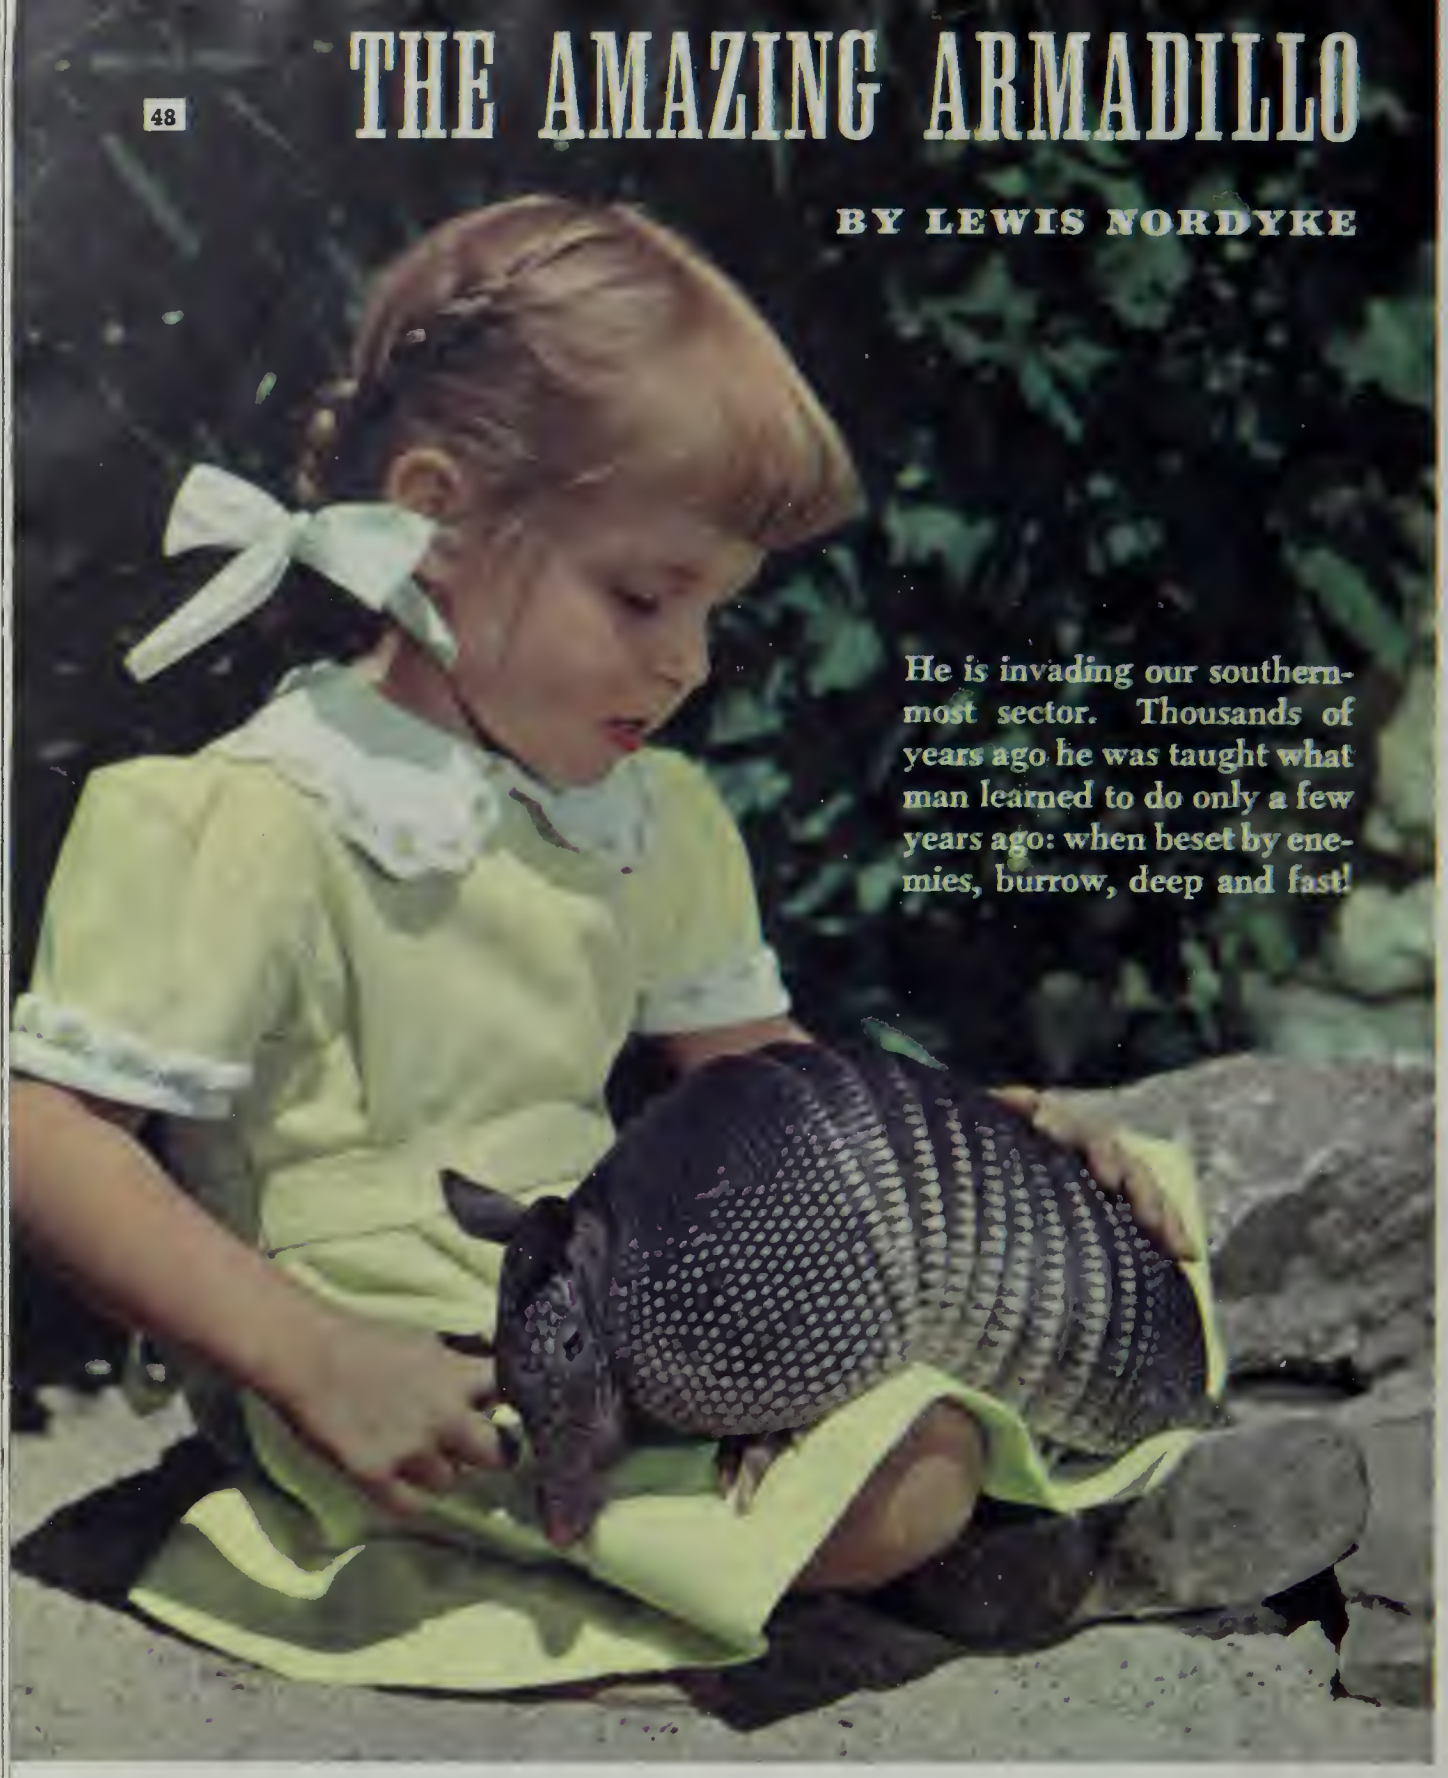
"Hello, Captain," said an amused voice.

I turned and there was Doctor Rasmussen. I hadn't seen him since we'd had that talk. "Oh, hello, Doctor. Glad to see you. I don't believe you've met my wife," I said.

"A pleasure, Mrs. Nelson," said the doc, nodding his head very politely. "I imagine you'll be going away on a honeymoon shortly."

"That's right," I said. "Bermuda."

"That's a fine place," he said encouragingly. He glanced at his watch. "Well, I must get on. Have a nice time. I'll see you both when you get back. Socially, I mean," he said.



"Well, thanks, Doc," I said. "But, say, that reminds me. You know when we had that talk, I never did understand what you meant by that 'You'll find out.'"

The corner of the doc's mouth wrinkled up in a smile. "You've found out, Captain," he said. Then he nodded to both of us and walked on down the street. An odd guy. But a nice guy.

THE END

THE AMAZING ARMADILLO

BY LEWIS NORDYKE

The sharp-clawed armadillo, dangerous when cornered, befriends this tot

IN THE early evening of a summer day down in Texas a hard-shelled old armadillo and her four daughters amble about an open glade. Grunting hungrily, they root and dig. Occasionally a long, slender tongue darts out and licks in a bug, grub or worm. A man, dog or beast approaches. The armadillos leap into the air. They throw off a strong, musky odor which warns all of their kind in the vicinity; then they dash with amazing speed into the thorniest brush at hand.

With his heavy, hard shell that looks like carefully tooled mail, the armadillo is America's only armored animal and is much older than man. He is a native of South and Central America—a descendant of a family of dim-witted, toothless anteaters. Counting the foot-long tail, the Texas variety is between two and three feet in length. His coat of mottled mail makes him heavy for a small animal. Males, slightly larger than females, weigh up to 17 pounds. More than half the weight is in the armor.

No smith in the days of the knights ever hammered out so perfect a piece of mail, or one with as delicate lines and even patterns, as that protecting the armadillo. The best of man-made mail squeaked at the joints and had weak, vulnerable spots, but not that of the armored pig. Even when in full flight, his mail doesn't rattle. The shell is not a part of the skeleton, but a full suit of bone-hard armor in precision-joined pieces.

One saddle-shaped piece that is studded with bumps like the rivets in an airplane wing fits over the neck, shoulders and front legs. The middle section is a series of nine horny bands that work like a telescope when the armadillo bends his body. Another bump-lined piece of plate fits over the lower part of the back and hips. The separate tail piece is made of fourteen bands that taper from the body like a stack of ice-cream cones. There's a separate plate over the forehead, eyes and long snout, and the ears are covered with tough hide that feels like the pebbled surface of morocco leather. Alligator-like hide protects the legs down to the root of the long, sharp claws.

Even the skin of the belly is studded with warty scales that grow tufts of coarse hair. The bottom of the armor barely clears the ground when the armadillo walks or runs. When he retracts his head, curls up and throws his tail under his belly, he is completely covered by armor, which is a quarter-inch thick and as hard as heavy bones.

Only the nine-banded armadillo has invaded the United States, and Texas Game Department experimenters have never been able to make him curl up in a ball and roll downhill, as hunters claim they have seen armadillos do. He curls tightly—but not in a round ball—only when exhausted or disabled so badly that he can't kick or run.

Contrary to popular belief, the nine-band doesn't play dead when attacked. He has a more clever use for his armor. He dashes into thorny underbrush that discourages or delays even the most vicious animal. In the time gained he can dig himself out of sight in the earth. I have seen an armadillo dig into sandy earth so rapidly that it looked as if it had run into a hole already there. Once in a burrow, even a shallow one, the animal braces his strong legs and sets his claws, and it is almost impossible for dog or man to pull him out.

Although he looks awkward and weighted down, the armadillo is agile; he can climb over a high fence with ease, but he never attempts a tree because it offers him neither food, refuge nor shelter. He's so swift he can outrun a man for 150 yards. Dogs can overtake him, but his hard armor and fast movement make it difficult for them to nab him; it's about like trying to stop a ground-skinning baseball.

Only the trained 'dillo dog knows how to knock the animal over and sink teeth into the comparatively unprotected belly. And that isn't the safest thing in the world; many a trained hound has been gutted by the sharp claws of an armadillo. Like other anteaters, the armadillo has no fighting teeth—only embryo pegs of molars far back in the mouth. The armadillo never picks a fight, preferring simply to escape trouble, but he's a tough scrapper when cornered.

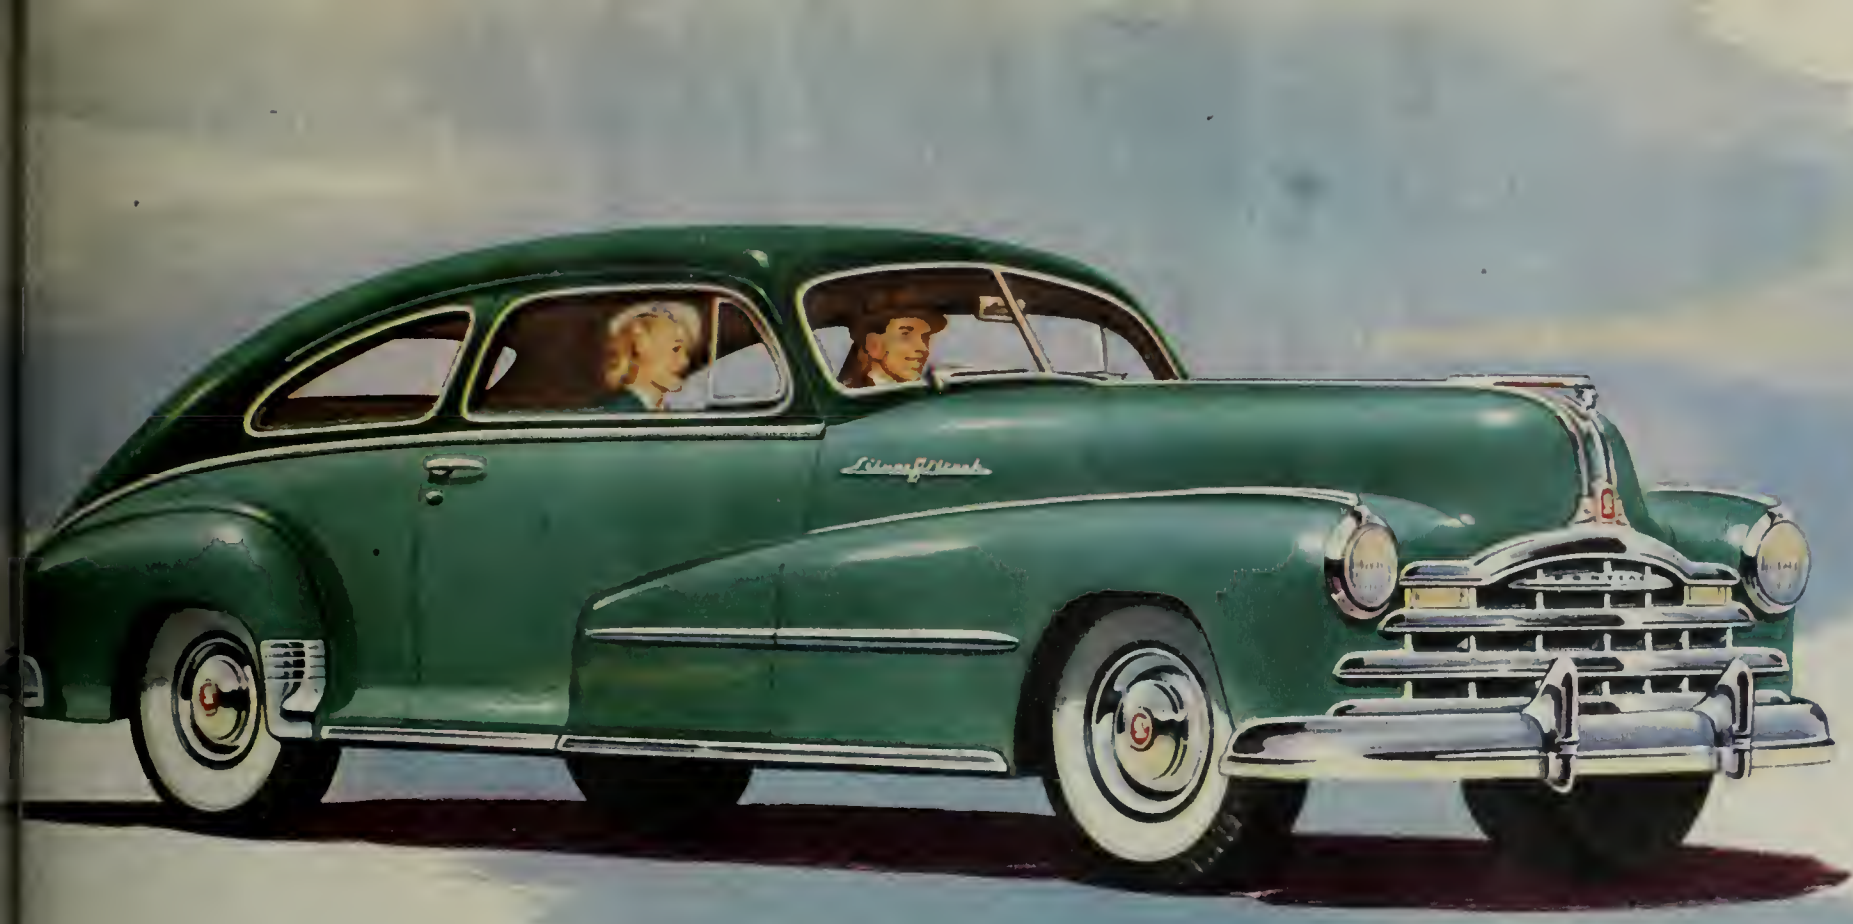
A Neat Trick for Swimming in Armor

For a long time, naturalists had known the animal could cross narrow and shallow streams by walking on the bottom under the water, but they didn't think he could negotiate broad, deep rivers which seemed too formidable for so small an animal. But the 'dillo has his own trick, which he picked up long before man made a stone ax. When he wants to swim, he pumps up his intestines with air. The added buoyance compensates for the heavy armor. In several conclusive experiments by the Texas Game Department, an armadillo placed in deep water could barely keep his head out at first but after several pumping gasps, he floated high in the water and swam like a dog.

The armadillo's manner of reproduction is baffling to biologists. There are always four young ones and all are of the same sex. It is one of the biological puzzles of the animal world. After the mating there is no development in the embryo for 14 weeks; then the gestation period starts. Most of the mating is in July, and the young arrive in March. Deducting the 14 weeks of inactivity of the embryo, this means the gestation period is much longer than that of most animals of equal size. The opossum requires no more than two weeks and the much larger hog only about 115 days.

The young are born with their eyes open. The mother suckles them for a few weeks and then takes them with her on her foraging trips. The father doesn't hang around and never lives with the mother and young.

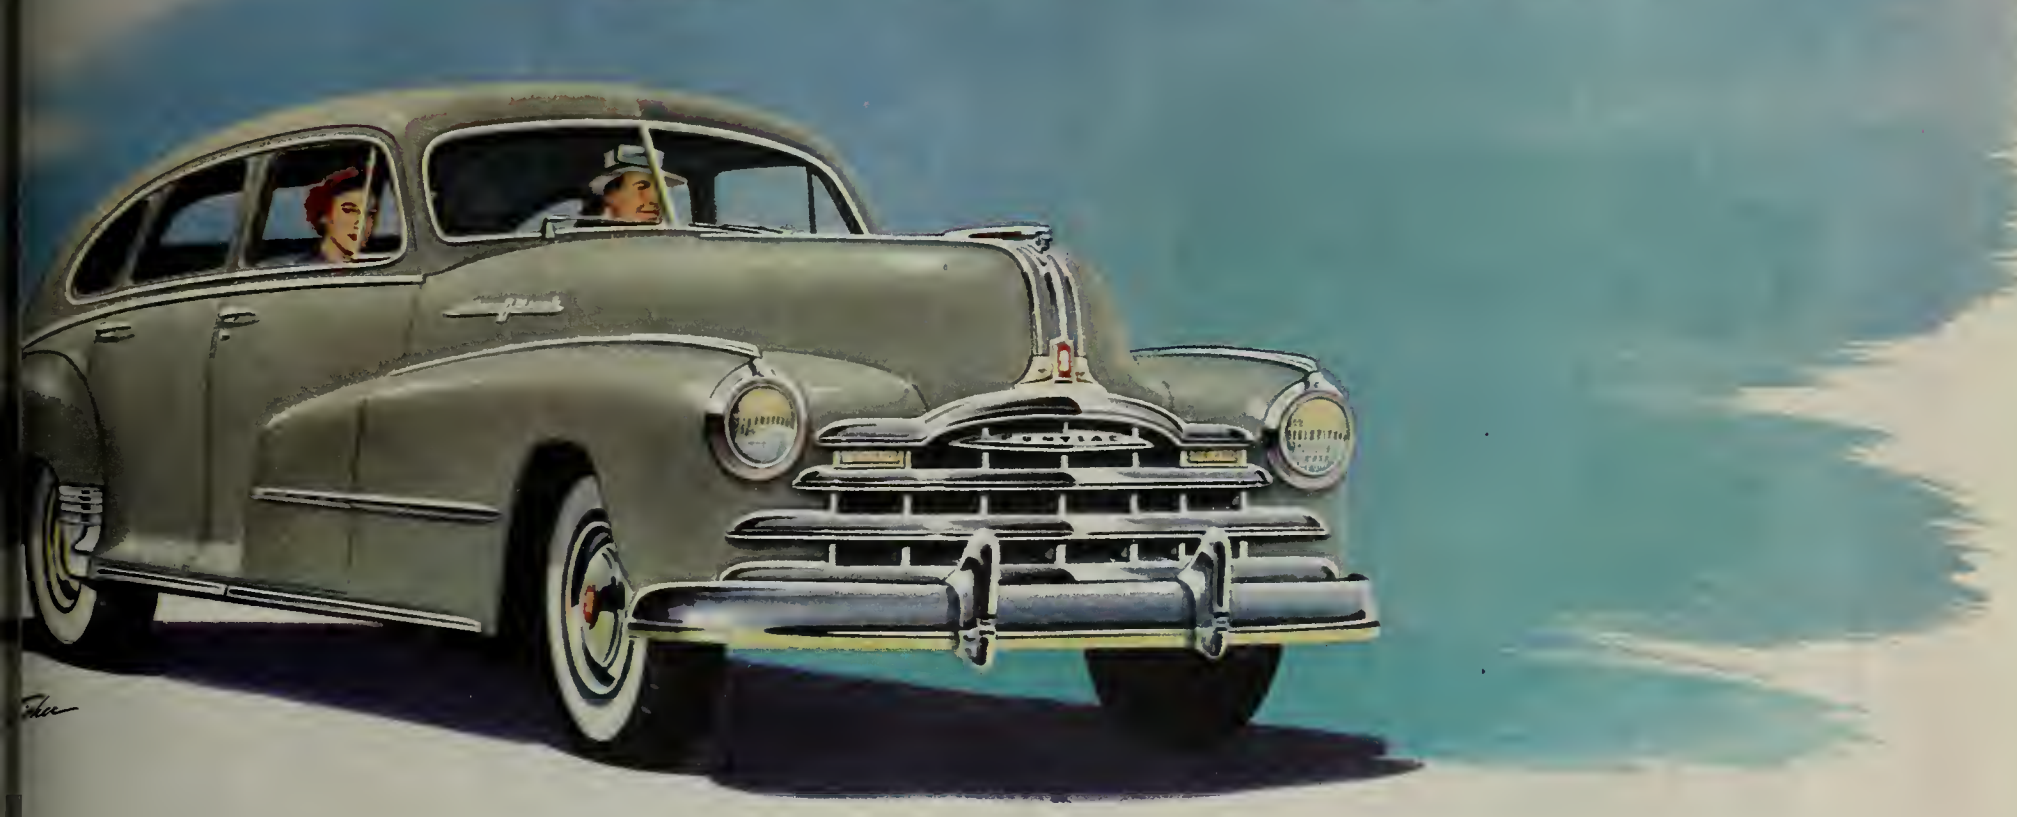
Only the burrow in which the young are born has any furnishing. The 'dillo enlarges the interior end of the burrow and carries in about a half bushel of leaves and small sticks for a bed.



The 'dillo, like the little prairie dog of the Western plains, is forced to take in boarders. Excavation of one burrow in southern Texas uncovered a rattlesnake, an owl, a cottontail and five armadillos.

The 'dillo isn't vigorous in his habits. As a rule he snoozes during the day and forages at night. On cloudy days he crowds the clock and starts his hunt for food by midafternoon. In places where he has not been molested by man he often emulates his friend man, and stays out all day.

In his search for food the armadillo is guided by his keen sense of smell. When he uncovers a bug, grub or worm or spots a beetle on the surface, he licks it in with his long extensile tongue, which is covered with a substance as sticky as glue. His diet consists mainly of insects and their larvae, and the armadillo's appetite is enormous. One stomach analyzed contained more than 3,000 different insects.



In several communities in Texas and Mexico the armadillo is considered good food. The meat has a pork flavor. During the economic depression of the 1930s, the eating of armadillos became a widespread practice, and the animal was generally known as "the poor man's hog." One 4-H Girl Club in Texas preserved more than 2,000 cans of armadillo meat. ★★

A fine car made even finer

PONTIAC

Record is Your Guarantee

The first Pontiac was designed to be definitely better than any other car anywhere near its modest price. Every *year* and every *model* since has added to Pontiac's reputation as a thoroughly good car.

Pontiac owners have always found that Pontiac combines, to an exceptional degree, all the things they want most in an automobile—beauty, performance, safety, economy and dependability, mile after mile, month after month.

Typical of the advances that make a fine Pontiac continually finer is General Motors Hydra-Matic Drive*—available as optional equipment on all 1948 Pontiac models. *Pontiac is the lowest priced car in the world offering you this masterpiece of automotive engineering.*

Whether you get a new Pontiac this year, next year, or *any* year, you can buy Pontiac with the assurance that you are getting an outstanding car and an outstanding value—*for Pontiac's past is its finest recommendation!*

*Models Illustrated: DeLuxe Torpedo Sedan Coupe and DeLuxe Streamliner 4-Door Sedan. *GM Hydra-Matic Drive and white sidewall tires optional at additional cost.*

us and the glowing solid body, we have a combination of effects: black lines cutting across the colored band of the continuous spectrum. This third type is the dark-line or absorption spectrum. Most of the spectra of stars are this kind.

Now, the number, thickness and arrangement of these black lines are determined by the sort of gas through which they pass, and by pressure and temperature. Hydrogen gives one set of lines, helium another, and so on. These line arrangements were all charted years ago and it is a simple matter to "read" on the spectrograph of any star just what that star is made of. By measuring the relative intensity of the lines we can even tell in what proportions the gases exist in a star.

We now have the stars' distances and their chemical make-up. Next, we want to find their temperatures. We all know that as a body is heated it turns red, then yellow and finally white. So if we get a star spectrograph showing an oversupply of red, it is safe to assume the star is of a comparatively low temperature. More blues and violets in the picture tell us that the star is at white heat.

We would like to know where the star is headed: Is it coming toward us or going away, and how fast? This we can also tell from studying the spectrum. If the lines shift slightly to the red end of the spectrum (compared with the lines made by a stationary object), the star is rushing away from us; and vice versa.

The spectrograph consists of a narrow slit with an opening only a few thousandths of an inch wide, which rejects all light except that of the star under study. After passing through the slit, the star's light reaches a prism (or occasionally a grating) that sorts out the light. This is brought into focus with a priate small lenses. The result is recorded on a photographic plate

In studying nebulae, the 20 telescope is used as a giant cam obtain a photograph showing ma the individual stars in a nebula most telescopes the great outer ga show as nebular spirals or und masses. It takes the largest telesco resolve these into the individual st which the galaxies are composed, s show that they are not gaseous—a supposed—but are similar to our Way, composed of millions of se stars.

Measurement and interpretati photographs are done in the obser offices in Pasadena, which are equ with comparators that can measu position of a star image or a spe to within a few hundred thousand an inch. Microphotometers m quantitatively the blackening o photographic images, from whic brightness of the star or the stren the spectrum line can be determine hence distance and chemical m of a star calculated. Often the taken in a single night at the tel may require weeks or even mon measure and interpret adequately.

The 200-inch telescope will cally never be used for visual ob tions. Very few, if any, astron discoveries will ever be made l directly through the telescope The new astronomical facts w brought to light often months or after the photographs are taken. they are measured, interprete compared with other photogra the Pasadena laboratory.

I should have explained before me into the city that there is so traffic where these streets cross policeman must stop the traffic on reet while he lets that on the other I had forgotten it myself in the . But we have stopped in time." ini looked at the policeman in the e of the intersection. He was a with a tall white turban and curl- lack beard. He wore a white shirt, shorts, white shoes and white socks were rolled just below his knees. A leather belt crossed his chest di- lly, holding a pistol in a leather r. Bayini saw that he was standing little wooden platform, waving for cars to come on the intersecting t. Truly, Kandy was a splendid city e a man must spend his whole day telling the cars to stop and go, be- e there were so many of them! king advantage of the halt, he ed down into a shop window on the er. It was filled with fine silk and of gold. Bayini wished he had a e so that he might take a present e to his mother. He was lost in this rie when his father shook him again.

"Bayini! The policeman is telling us to come!"

Bayini looked up with a start. The Sikh was waving his arms for them to move. All at once, the horns of the cars that were waiting behind Rama began to blow impatiently. A man leaned from the window of the car directly behind Rama and shouted.

"Come on! Get a move on! You're blocking up the whole road!"

Bayini did not understand the English words but their meaning was clear. But to Rama, the horns and shouting were just another annoyance. He curled his long trunk high in the air and trumpeted wildly. His ponderous front feet stamped the road in irritation. Quickly Bayini told Rama to move and leaned down to comfort him. The huge beast trembled all over in his excitement. He trumpeted angrily again as they passed another elephant. Bayini was glad when the roads widened and the buildings and shops fell behind. Rama stopped shaking and walked more slowly.

"No matter how skimpy suits get, men still stare at them!"

COLLIER'S JEFFERSON MACHAMER

"See," said Bayin pointing, "there is a lake on the right. It was built by a king many years ago. But it is only the smallest puddle compared to the mighty lakes that were built in the north. One of those was forty miles around."

The lake lay beside the road, a calm, shimmering sheet of water, bounded by a fanciful stone balustrade, overhung by tall clumps of eucalyptus trees and conifers. Bayini had never seen such a large body of water before.

"And there," said his father reverently, "is the Temple of the Tooth."

The temple was a low, rambling building of gray and yellow stone. Vines grew along its weathered walls; a great, spreading tree rose above them from an inner courtyard and cast a deep shade far out into the road. The main entrance faced the road, looking across the lake. The lintel was friezed with worn sculpture.

They tethered Rama to a stone post before the temple, and Bayini spoke to him before they entered the building. The elephant stood with immovable delight as the boy patted his trunk and whispered softly to him. Bayin's throat choked, his chest constricted with pity watching the small boy soothe the massive animal.

I must tell him soon, he thought, sadly, but first I shall plead with Mahinda and he shall see the Temple and the Shrine.

The temple was dusky and cool. Shaven-headed priests in loose, saffron-yellow robes glided up and down the corridors, their sandals slap-slapping on the smooth stone. Singhalese stood in the shadows, chatting in low tones, their voices making a dim, indistinct murmur throughout the ancient building. Bayin and Bayini walked hand in hand through the halls, the father pointing out the sculptured frescoes of the damned and demented in the Buddhist hell, the saints in their ageless nirvana.

At last they came to the Shrine of the Tooth.

The cubicle seemed to be sheathed in gold; fretted, embossed and pierced with countless symmetrical patterns. The broad steps at its base were banked with flowers. There was no noise in this part of the temple. The walls seemed to exude a slow, smothering quiet. The boy and his father stood silently before the shrine for a few minutes; and then they turned and walked back the way they had come.

"Now," said Bayin gently, breaking the spell, "I must see Mahinda. That is the reason that we have come to Kandy."

"What about, Father? He came to look at the land only a few weeks ago."

"I know. But we have some business to talk over, son. Run out and stay with Rama until I am finished." Bayin watched the boy glide softly out of the dark corridor into the sunlight beyond. Then he turned to seek Mahinda. He was determined to see if he could not convince the overseer to let the elephant stay with them for a little while longer. It would be so much easier for the boy.

BAYIN found Mahinda in the overseer's room. He waited respectfully outside while a temple attendant went in to announce his presence. In a few minutes the attendant returned and told him he might enter. Mahinda inclined his head kindly toward Bayin.

"You have brought the elephant, as I asked?"

"Yes, Honored Sire. He is tied at the main gate." Bayin looked hopefully at the overseer. He must speak now or lose the chance.

"I beg that you let him remain with us for a year or two more, Sire. He is such a help in the fields. My—we have grown so fond of him."

Mahinda shook his head sympathetically.

"I am afraid that cannot be, Bayin. You have had the beast for ten years and now he is full-grown. The temple has need of him. But do not grieve. He will be pampered and cared for here, without work or trouble. He must serve the temple, in his way, just as you serve it in yours and I, in mine. Come, let us have a look at him."

Mahinda led the way out through the yawning mouth of the temple's main entrance, followed by Bayin, whose heart was filled with sorrow. The dread moment of telling Bayini had come at last

He did it manfully, as he knew he must. Calling the boy to him while Mahinda admired the massive bulk of Rama, he sat beside Bayini on the worn steps of the temple and told him that the elephant must stay behind. Bayini did not speak or move, but his father knew that the joy had gone out of the day for him. Clumsily, he tried to console his son.

"It will be best for Rama, don't you see? Here he will be kept in a splendid stable and given the best and tastiest food. The priests will hang him with fine cloths and jewels for the processions. Why! He will be the most magnificent elephant in the world!"

Bayini looked sadly at his father. He was too well bred to cry.

"But he will not be happy here, Father. Rama likes the fields and the jungles, not this noisy city with the automobiles hooting by!"

"That we cannot judge, Bayini. He is the temple's elephant and he must do as the temple commands. Come! You must pay your respects to Mahinda."

THEY walked over to Mahinda. Bayini saluted him deferentially. Rama was uneasy in the nearness of this stranger who walked all about him, poking his thick legs and smooth sides experimentally. Mahinda seemed pleased.

"He is a splendid specimen, Bayin. There is not a finer animal in all of Ceylon. He will be a great addition to the temple elephants. Is he well behaved?"

"Yes, Sire. He is gentle and well mannered. My son, Bayini, has trained him to work and obey. He will answer to no one else."

"Well"—Mahinda patted the boy's cheek—"we will find him another mahout in the temple's stables. It will not take long to train him to a new master. But now I should like to see him walk, to judge how he will move in procession." He smiled down at Bayini. "Will you ride him for me, boy?"

"Yes, Sire," said Bayini numbly. His feet were like lead as he dragged them over to Rama, loosed the tether and hissed to be lifted. Joyfully the long, gray trunk curled down and deposited the boy behind the domelike forehead.

"Where shall I ride, Sire?" Bayini called down to Mahinda.

"Into the town. Your father and I shall go beside you on the sidewalk. I wish to see how the beast handles himself with others about."

Chirruping and tweaking a waving ear, Bayini turned Rama down the road back into Kandy. The elephant moved with cumbersome grace, slowly and methodically, as Mahinda and Bayin walked by his side appreciating his fine points. Bayini took no pride in Mahinda's admiration. The blow of losing Rama was almost too much to bear. He sat dejectedly on his perch, small brown head sunk on his chest, his black eyes hazy. He did not know where Rama was going, nor did he care. For one wild instant, passing the lake, Bayini was tempted to turn Rama into the water and swim away. But he knew that escape was hopeless. Rama, his friend and companion, was lost.

And, although Bayini was too numb to

notice, Rama was also nervous. As he shambled nearer to the center of Kandy, the horns began to blow again and the cars whizzed by his flanks. His ears vibrated uneasily. He lifted his sensitive trunk to catch the disturbing scent of other elephants, and a strange, sour taint that—although he did not know it—was the smell of horse. Wicked things on wheels cut in front of his path, making alarming noises and smothering him with acrid fumes. People with queer clothes and scents ducked in front of him and watched him on the street. He thrashed his trunk nervously.

RAMA did not walk fast but, even so, they were a little ahead of Bayin and Mahinda by the time they came to the traffic policeman. This time Bayini saw that the Sikh had his hand up. He was glad for a reason to halt. He hissed softly into Rama's ear and the great beast shuddered to a stop. Bayini sank back into his unhappiness. He thought dolefully of Rama, dressed in gorgeous hangings, filing along this same street with the other temple elephants. He closed his eyes as if to shut out the sight in his mind.

The heavy folds of skin on Rama's legs twitched peevishly.

Bayin and Mahinda were coming down the sidewalk, Mahinda full of praise for the elephant. He was praising Bayin also, for the careful training he had given the animal and had just promised him fifty rupees for such excellent care and devotion. Bayin would gladly have given them, and the small store he had saved in addition, just to keep Rama for another year. He was looking at his son, almost lost on the tremendous back looming up before him, and thinking of the gloomy walk home.

Suddenly the horns in the street began to blow. The policeman was motioning for the traffic to move ahead. Bayini evidently did not see his waving arm. Bayin called frantically to his son.

Bayini emerged from the depths of his misery to hear his father calling. He turned swiftly to reply. Then he noticed the line of cars behind, the drivers blaring their horns and yelling at him to move. He bent quickly to Rama's ear, but he was too late.

The car directly behind the elephant was trying to pull out of line and pass. Its fender scraped painfully against one of Rama's back legs.

The street was filled with wild, angry sound as Rama loudly trumpeted his fury. He remained rational but for one instant and in that time he plucked Bayini from his back and dropped him softly on the sidewalk. Then, as irresistible as the tide, he turned to demolish the hateful thing that had struck him.

It takes a good deal of provocation to turn a domesticated elephant wild. But once turned, there is no more terrifying living thing on earth. Rama's ears lay back against his head, his eyes burned like red danger signals, his trunk curled fifteen feet above the street and shrieked with clamorous malice. Every one of his thousands of pounds shook with violent rage. Gone was the ponderous walk, his heavy shuffling movement. Rama turned in the narrow street, agile as a cat.

Once more before he attacked the car, he trumpeted. The high, insistent bleat blew down the street like the wind of a monsoon. Then he rolled his trunk inward, to protect it while he attacked, and made for the car. Fortunately the driver had opened the door and run into a shop when he saw Rama turn. The crowd on the sidewalk had prudently followed his example. Peering from windows and doorways, they watched in breathless wonder.

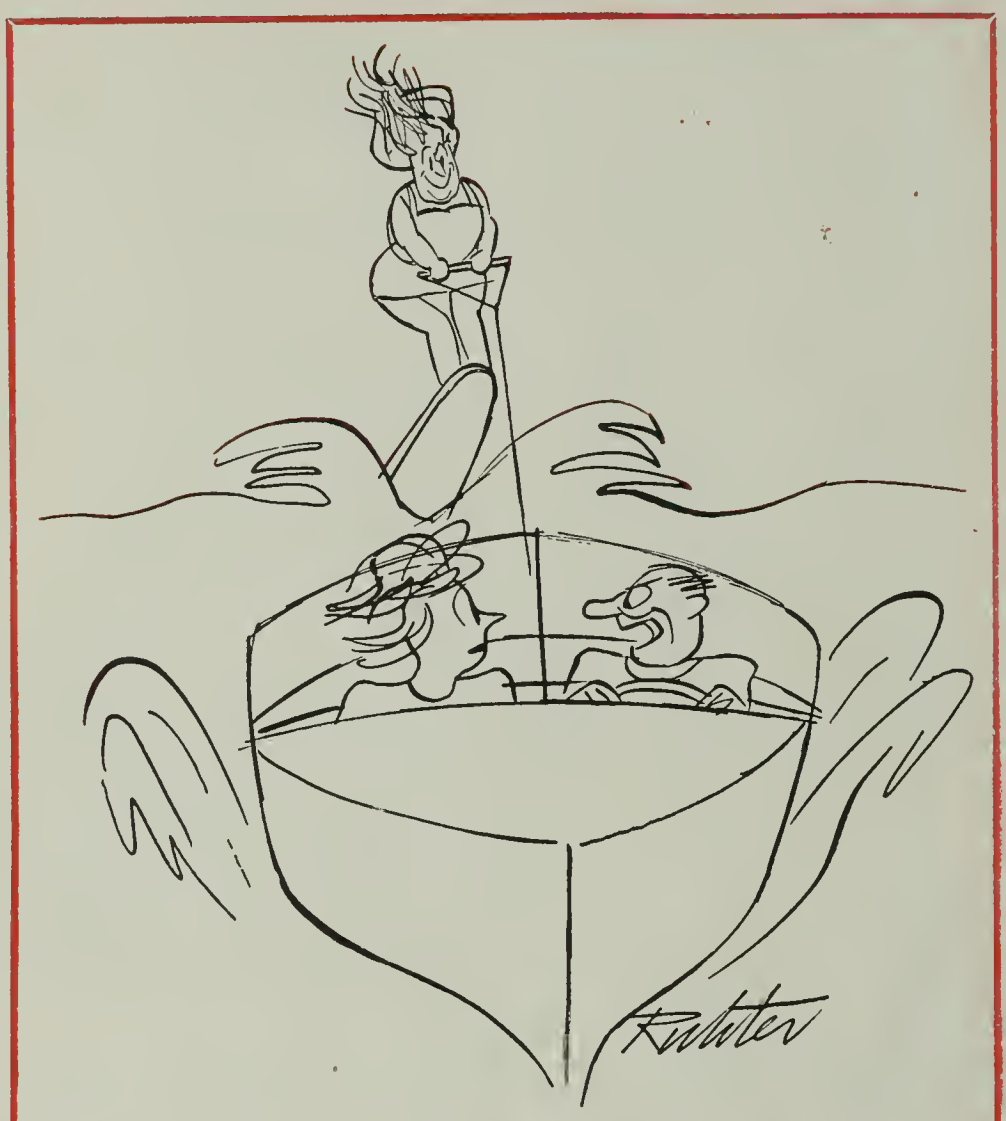
Rama reared high above the car. His forefeet smashed down on its top like twin pile drivers. The automobile buckled with a noise of rending metal and broken glass. Disdainfully, Rama kneeled on the car and pressed his tremendous weight upon it to complete the ruin. A fender fell off in the road. He picked it up with his trunk and tossed it contemptuously into the gutter. Still shaking with fury, the mastodon bore down on a line of cars at the curb.

Bayini had stood dazed on the sidewalk during this instant of carnage. He could not believe that this was Rama wreaking such destruction. Never had he imagined that in his gentle friend could lurk such untrammeled savagery. Gazing in horror at the twisted remains of the car, he called fiercely to Rama to come to him.

He might as well have whistled at a hurricane. If Rama heard, he did not heed him. The elephant was intent upon wrecking every automobile in sight.

"Come here! Quickly!" Bayin shouted

"Stop! Stop, you fool!" Mahinda called sharply to the policeman.



Startled, the policeman turned.

"What do you mean, 'Stop'?" he bellowed. "I must shoot this beast quickly!"

"You shall do no such thing!" Mahinda stepped from the doorway to argue. "You know the law. No elephant shall be shot without a permit, even if running amok! The animal belongs to the temple and I insist that the law be kept!"

"I cannot stay and quibble about the law, old one! The animal is doing damage and must be stopped!"

"With your revolver?" Mahinda's cry was scornful. "You can but wound him with that and goad him to greater evil. He will turn on you and the rest of us and grind us beneath his feet."

COLLIER'S "Must your mother go everywhere we go?" MISCHA RICHTER

to his son from the doorway where he and Mahinda had taken refuge. "He is running amok!"

Shocked and still unbelieving, Bayini obeyed his father. Crouching in the doorway he watched his friend vent his frightful wrath.

Rama carried out the destruction of his enemies swiftly and implacably. He trotted down the street, trunk swinging and eyes blazing, toward the parked cars. Before each one he blew the terrible trumpet call of the young bull elephant, reared swiftly on his hind legs and fell with a ponderous crash. Then he kneeled on the crumpled metal to flatten the car to the road. He moved like the wind at his work. His ears flapped angrily, the round feet pounded with ominous, hollow sounds, as he moved from car to car. One, that took him longer to demolish than the others, he flipped over with exasperation to thump its motor and underpinning to bits.

He was starting on the fifth car when Bayini saw the policeman sidle around the corner, a heavy revolver in his hand.

"Father!" Bayini pointed in terror. "He's going to kill Rama!"

Bayin looked helplessly at the approaching form. The Sikh was trying to get near Rama without attracting his attention.

"Yes! Yes!" Other voices took up the argument. "Do not anger him further or he will kill us all!"

The Sikh hesitated, struck by the truth of the cries. He knew, like the others, that he could empty his revolver into that tough hide without even slowing the elephant down. And the overseer would be a hard antagonist in the courts, if one of his shots was lucky enough to drop the beast. The elephant was temple property, and the laws of Ceylon were strict about the killing of elephants. Even to kill a mad one required a permit from the governor's office. The animal must be running mad when shot and the shooter must carry a signed permit. He slipped the revolver back into its holster.

"Very well, old one!" he called to Mahinda. "I shall go to the government office for a permit and come back with an elephant gun. Then you may quote the law all you wish!" Satisfied that his honor had been upheld, the policeman ran swiftly around the corner.

"Hurry, boy," Mahinda beckoned to Bayini. "You must calm your elephant before the policeman returns. Are you afraid?"

"No, Sire!" Bayini smiled eagerly. "Rama will be quiet when I speak to him. You will see!"

Without another word, the boy darted down the street toward Rama. He lo like a flickering bird flying towa mountain—a David approaching G ath. As he ran, he began to sing in a h honeyed chant.

Rama had crushed the last car in street. He stood in the middle of road, legs apart, like a victorious ch pion bracing himself for another glor battle. He weaved rhythmically lik clever boxer, his trunk high in the scenting the smell of man-things, sea ing for the gassy smell of automob The round eyes were glowing eml set in his massive skull.

As Bayini approached, Rama's t reared threateningly. It paused in air as he heard the boy's lulling s Finally it wavered and fell slack. elephant cocked his huge head to l more closely. Watching him from doorway, Bayin and Mahinda couk Bayini come closer to the mad ani singing louder as he walked forward lessly. Now the song rose and fel seemed to reach out and comfort R. to soothe and lull him hypnotic Gradually the elephant relaxed. Th faded and died in his eyes. His t reached out tentatively and rested ir yini's hand. The boy stroked it ge

Rama's ears dropped. The ma legs ceased trembling and stood still bent his head toward Bayini. The hissed and Rama lifted him gently t him behind his head. The gesture see to be at once an act of contrition a sign of defeat. Slowly, at a nudge Bayini, Rama shambled down the s and stopped in front of Bayin and hinda.

THE crowd, which now clus around the elephant, cheered. people of Ceylon are highly sentim and are more impressed by the red tion of an elephant than the destru of a dozen motorcars. Bayini st proudly down at the people from throne.

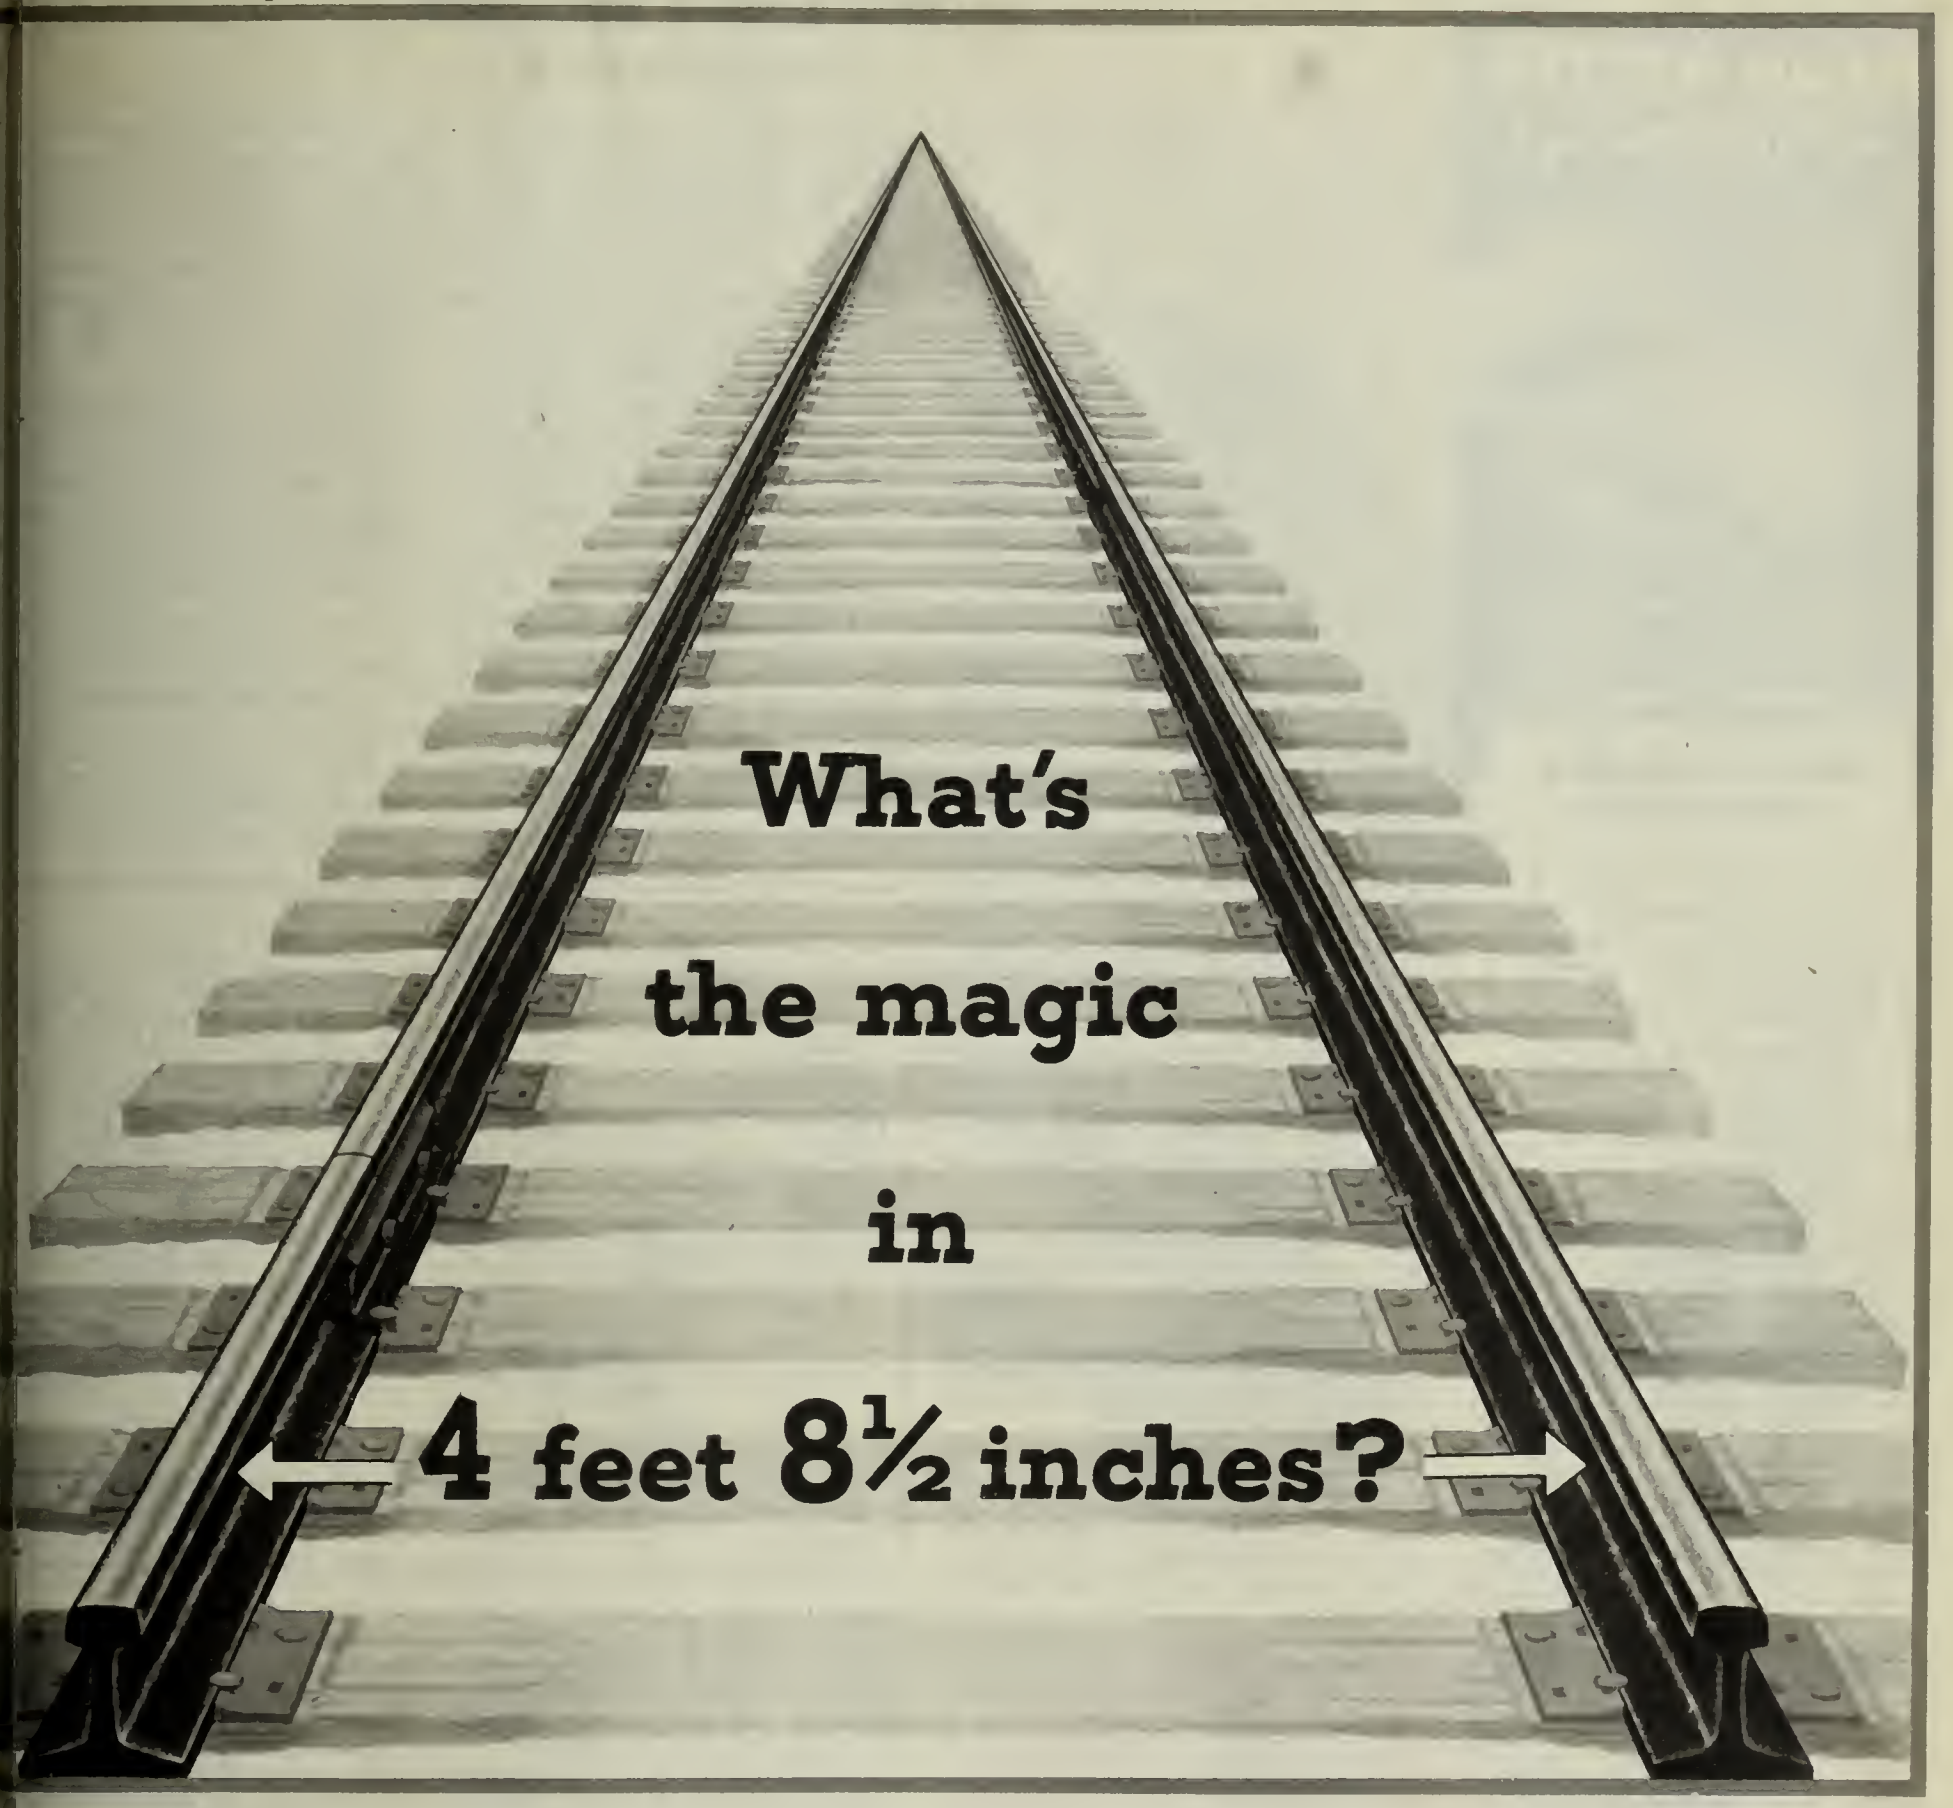
"Good work, boy!" Mahinda call from the street. He turned to Bayi spoke with a conspiratorial air.

"Take the elephant back to the fi he said quietly. "He must not rema Kandy. After seeing him amok to do not think he could be trusted to through the city in processions. S shall work for the temple with you your son."

Bayin thanked the overseer w quick look of gratitude. Then his fa bered as he gazed ruefully at the tw shapes of the cars. Mahinda smiled suringly.

"Do not worry about the da Most drivers in Ceylon are in against such accidents. No one but is responsible when an elephant amok."

"But the policeman and his per Bayin remembered him with alarm



"He can do nothing now, for th mal is not mad. He will not lightly the law to kill a temple elephant. Bu safety's sake, do not bring the bea the city again. He is too nervous to among the cars."

Bayin shouted the good news up son. The boy's face radiated his b ness. "Let us go, Father. The Sikh mean look when he ran for the gu

"Yes, Bayini."

They waved to the overseer as h started down the road. This time went rapidly through the streets; pa shops, the tall buildings, the hotel the people. When they reached th skirts of the city, Rama broke i lumbering trot without urging; so was he to quit the smells, the nois the automobiles he hated. Swift topped the slight rise beyond th house. Then Rama, Bayin and h vanished beneath the arch of tree dropped down the mountain road from Kandy.

THE END

agic in 4 feet 8½ inches lies in this: he exact distance between the rails of ly all railroad tracks on the North an Continent.

that means the cars of any railroad the rails of every other—a fact which ry foundation of American mass pro- and continent-wide distribution.

great advantage didn't just happen. lly, tracks were built to more than a ifferent gauges, ranging from 2 feet t. The change to one standard width come about by the requirement of ion, but was the result of voluntary tion of the railroads.

y any railroad car can be coupled up y other car or locomotive, can go anywhere on standard-gauge track, can be repaired with standard and interchangeable parts at any railroad shop in America.

Thus shippers and travelers have the benefit of through service; farmers have national markets for their crops; manufacturers can get raw materials from the four corners of the nation; consumers everywhere have the choice of goods from every part of the country.

These advantages are the result of cooperation among the railroads which, while competing for business, also work together through such organizations as the Association of American Railroads, their mutual agency for the improvement of all railroading. And today, as in the past, they are engaged in a progressive program of research and development in equipment, materials and methods to the end that the American railroads shall continue to provide the most economical, the most efficient, and the safest mass transportation in the world.

HEAR BETTER or Pay Nothing!

MAIL COUPON BELOW FOR NEW
"75"
Zenith
THE HEARING AID THAT NEEDS NO "FITTING"

Sold Only by Mail
...Money Back Trial!

Wear the New Zenith "75" at home, at work, anywhere. Compare its QUALITY, PERFORMANCE, OPERATING ECONOMY (less than 1¢ per hour battery cost) with that of ANY other hearing aid. If the Zenith "75" isn't better than you ever dreamed ANY hearing aid could be, return it within 10 days of receipt and get your money back in full.

Never before has it been so easy to find out how much a hearing aid can do for you! No "fitting" needed, no salesman to pressure you, no embarrassing visits to salesrooms. Simply mail the coupon below—*you don't risk a penny!*

MADE POSSIBLE BY ADVANCED PRINCIPLE

The Zenith "75" is not only new, but is an improved *kind* of hearing aid. For it employs Zenith's "Full-Range Audio" principle, designed to amplify the *full range* of sounds covered by the instrument. This eliminates the need for "fitting"—enables *you* to adjust instantly for *your* best hearing in any surroundings. The correctness of this principle was recently confirmed in U. S. Government-sponsored research at Harvard University.

SAVES YOU OVER $100, TOO!

This amazing advancement enables the world-famous Zenith Radionic laboratories to bring you as fine a hearing aid as money can buy, for only $75. If its price had to include the expense of "fitting," distributor and dealer profits and high-pressure sales commissions, it would have to sell for $195. So *you* save the difference—well over $100!

Tens of thousands have already ordered the New Zenith "75." Do as they have done—take the first step toward new happiness and success. You have everything to gain, *absolutely nothing to risk!*

THE LODGE BROTHER

Continued from page 28

went down to 718 and Will knocked and directly the hollering let up and the door opened and there, in his lodge robes, stood the high and mighty Mr. L. T. Smyth with a glass of whisky in his hand.

"Enter, brothers!" he cries. "Enter! There's plenty of chairs and free seegars and whisky! And if it gits too crowded we'll just knock out a few walls!"

So we went on in and sure enough there was Fred and Barky and E.W. sitting around drinking.

WHEN I'd shook with them Will puts his hand on my shoulder and says he'd like to introduce his old business partner and good brother in the Loyal Order of Eskimos.

"Welcome, brother Karcher!" booms Mr. L. T. Smyth. "Just as long as old L.T. has a single drop of liquor left in his bottle and money in his pants for more there'll always be a drink for any brother in the lodge!"

Then he give me the lodge password "Mush!" and the lodge grip and dragged over a straight-backed chair for me. Now Will Zerby knows I haven't touched a drop of hard stuff since I married Jessie and took the pledge and he don't mock me for it and I don't censure him for having himself a nip now and then for his throat trouble. Back when I was single I just couldn't get enough of the stuff but then I married Jessie and never touched it again. So when Mr. L. T. Smyth shoved that glass in my hand I started to open my mouth to explain how it was and to thank him just the same but Will shot me a look as much as to say I'd be a bum sport not to take it. So I took it and sat down and felt like a derned fool. Mr. L. T. Smyth grunts and plops down in the easy chair and throws his feet up on the bed.

"Did yuh hear?" he booms, waving his glass in the air, his face all red and beaming. "Did yuh hear about the cross-eyed schoolteacher?"

He leaned forward and looked us over with a wild look in his eyes.

"She couldn't keep her pupils together!" he bellers out directly and then goes to pounding his knee with his empty glass. "Got that one, did yuh! Did yuh get that one?"

Will and the boys was laughing fit to be tied and I reckon I was, too, for I didn't want to seem like a bum sport, though I couldn't see it was so extry comical. But directly I took a little sip of whisky and before I knowed it me and the mighty Mr. L. T. Smyth is jawing away like a couple of lawyers on a fishing trip. He said how he'd started out when he was a boy as a tool-dresser in the Taylor County oil fields and how he'd married into the coal business and he said he'd be danged if he wasn't happier back then—thirty-seven years ago—drinking beer in the bar of the old Traders' Hotel with only fifteen cents in his pocket.

"It ain't money, friend!" he roared. "That don't make a gentleman! It's like the poet says: 'A man's a man for a' that and wimmen is sisters under the skin'! It ain't a fancy hundred-dollar suit like this one here I'm wearin'! It's in the heart, friend! It's in the heart!"

And he whacked himself on the chest.

"Well," I says, clearing my throat and crossing my legs. "Well, you can't always tell a mare by her saddle."

"Oho!" hollers Mr. L. T. Smyth. "Hey, brothers! Did yuh get that one! Brother, that's the best one pulled yet! Here, lemme fill up your glass!"

I stood up real quick and said I was mighty sorry but I'd told the missus I'd be back in half an hour and she'd be sore enough as it was for me staying this long and Mr. L. T. Smyth said he was sorry I had to go and he give me a thirty-five-cent Havana. Fred and E.W. and Barky and Will said they was leaving, too, as they wanted to go down on Pike Street and see who all had come in. So Mr. L. T. Smyth sticks his bottle in his coat pocket under his robes and grabs his lodge cap and says he's going, too.

"Look out, girlies!" he hollers, prancing down the hall ahead of us. "Your dingdong daddy is comin' to town!"

Will and the boys done their best to get me to go along but I said I'd just go down as far as the cigar counter with them to get me a stick of clove gum to cover up that drink.

"Friend!" hollers Mr. L. T. Smyth when we steps off the elevator. "I want to see a lot of you durin' the meet this year! And I want your missus and mine to get together! Tomorrow, by damn! How's about breakfast? I want to talk some more about the old days in the oil fields. You know what they say! There's no fool like an *oil* fool! Got that one did yuh! Did yuh get that one!"

Well, with that, him and Will and the others went hollering out through the revolving doors and I got my gum and went up on the elevator thinking what a friendly, common sort Mr. L. T. Smyth was and how nice it was going to be for Jessie to get to meet his missus.

And this happened the next morning at breakfast—the very next morning, mind you. Me and Jessie got off the elevator and went into the dining room and there sat the high and mighty Mister and Missus L. T. Smyth.

"Come on, Mother," I whispered. "I want you to meet a couple of mighty nice folks."

Jessie sort of hung back at first but I give her elbow a little shove and when we was right up by their table I cleared my throat. And Mr. L. T. Smyth's missus went to snatching around in her dress for her eyeglasses which was on a black ribbon, and the mighty Mr. L. T. Smyth himself looked up and put down his spoon and studied us, like he was trying to figure out what we was selling.

"I don't believe," he says directly, "I've had the pleasure, brother."

Them was his exact words. Jessie was there and she heard it.

Well, I was just praying for the floor to swaller us both, and Jessie was tugging my sleeve and I was so red-hot under the collar it's a wonder I didn't set it afire.

"K-Karcher," I says. "John Karcher. I— Last night with Will Zerby and—"

"Oh, to be sure!" chuckles the mighty Mr. L. T. Smyth. "I recall now. Splendid morning, isn't it, brother Karcher?"

I swallered and I said, "This he my missus. Jessie, this here is Miste Missus L. T. Smyth. We—him and n

"Charmed," says L. T. Smyth's n with a voice like a spoonful of ba ice cream sliding down your back.

"We'd ask you to join us, brother cher!" says Mr. L. T. Smyth. "But expecting some guests. Ah! Here come now!"

And with that he jumps to his fee across the dining room come all th wigs and high potentates in the Wes ginia Igloo of the Loyal Order ar their women and directly everyb standing around the table pumping l and clucking and chirping and I'm my best to steer Jessie over to the corner table by the swinging doors.

"John!" whispers Jessie over th of the bill of fare. "You shouldn't done that! Those folks never laid ey us before!"

Right then I got sore. Jessie an has been married for thirty-five and never had a cross word, but then I got sore.

"Next time I turn around when a boy whistles at me, I'll make sure it's not my brother"

COLLIER'S STANLEY BERENST

"Mother," I said, trying to sto hands from shaking. "Shut your r and order the number-three break

Well, by suppertime I had my back down to normal, since most day was taken up with roll call a rade plans at the Igloo Headquart the ballroom and Jessie spent most forenoon with the Northern Lights iliary hearing a speech on "Matt Their Care and Protection" which h take her mind off what had hap We was dog-tired after supper an sie had went up to the room and just buying a magazine at the cigar ter when I heard a loud, familiar screeching at me over by the palms. Well, I couldn't believe m

HERE he come, dancing acro lobby in his fur lodge cap a blue and yellow lodge robes, and one of them trick canes with an au bile horn on the end of it and b him here come his missus in her co of the Exalted Princess of the No Lights Auxiliary and taking up th was Will Zerby and the boys an womenfolks.

"Brother Karcher!" bawls the Mr. L. T. Smyth, wharping me back and honking that fool cane ear. "Meet the little woman! She Kain-tucky, suh! Ol' Colonel D field's fairest daughter! Minnie, th is John Karcher—a brother in the and a mighty dear friend of mine

Well, I couldn't just walk off wi

e Palace!" And when we was
right up to their table I cleared my throat.

"Oh, hullo, brother Karcher," says Mr. L. T. Smyth, looking up just as cool as you please. "We're just finishing up coffee. You and your missus can have our table. I see the dining room is crowded this morning. We've got to be running along to the Initiation of the Auxiliary down in the main ballroom! Probably see you there!"

And with that everybody jumps up and folds their napkins and heads for the elevator.

Jessie was crying this time—not making no noise but setting there staring at me across the coffee cups and the stogie butts and the gummy plates, with her handkerchief pressed against her mouth.

"John Alexander Karcher," she whispered, "I'll never forgive you if I live to be a hundred for the way you've humiliated me these past two days!"

I never opened my mouth. I guess if I'd said anything it would have been full of words I didn't want Jessie to know I knew. So I just sat there thinking to myself: He's gone just a little bit too far this time. Two hours before, I'd have been willing to pack up my troubles in my old kit bag and smile, smile, smile, and never went home from the convention holding a grudge for no man. And even now, I guess—even setting there at that table of dirty dishes, feeling like a nut and a derned fool and with Jessie crying and sore at me, I'd have been content to go my own way in peace if it hadn't been for what was to happen that night.

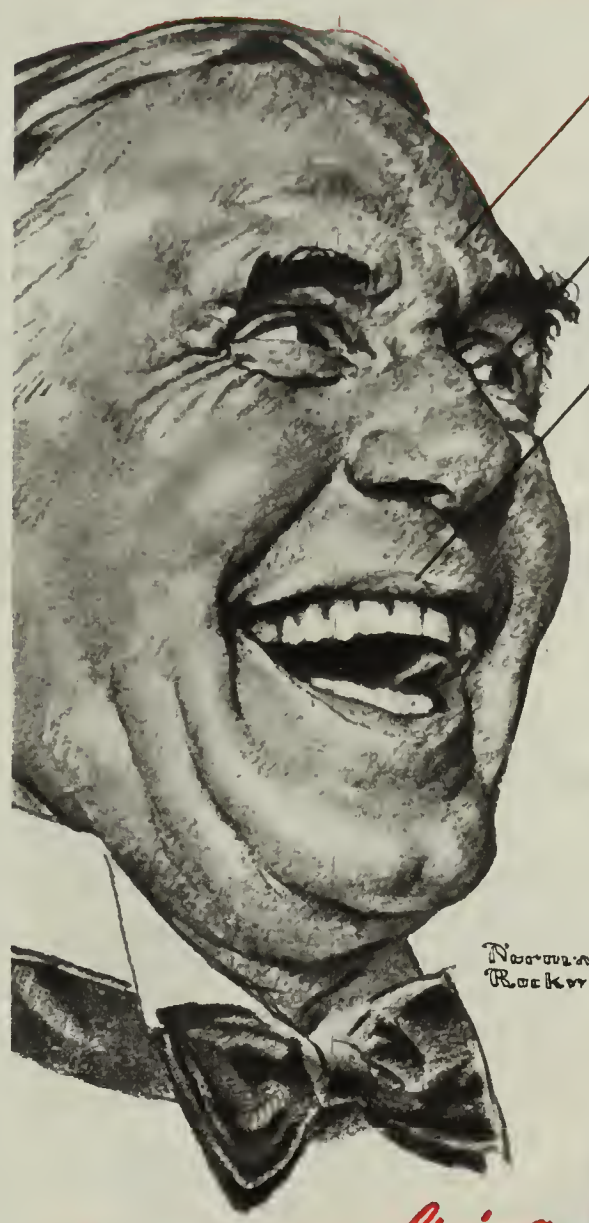
IT WAS just after supper. Jessie had went up to the room and I was standing out in front of the hotel smoking a stogie and getting a breath of air. I was watching some of the brothers playing leapfrog over in the courthouse yard and not thinking of a derned thing when all of a sudden I seen him coming. For jest a minute I thought I'd took leave of my senses. He was all dressed up in a cowboy suit and was shooting off two little cap pistols in the air and striding across the street all bowlegged and simple-looking with Barky and E. W. Snyder.

"Reach for yore shootin' irons, pardner!" he hollers, cracking them fool toy guns at me. "Thar hain't room enough in this hyar town for you and me, ombree, and one of us is a-goin' out feet fust! Howdy, brother Karcher! Did I skeer yuh?" And he wharped me on the back so hard it shook my upper plate loose.

I never opened my mouth; standing there, getting madder by the minute and trying to gum my dentures back in place without dropping my stogie. And I started to walk away but he grabs me.

"Oh no you don't, pardner!" he bellers. "Oh no you don't! If'n these hyar shootin' irons was real I'd plug ye! Deed I would! Where you been hidin' yourself all day, you danged bootlegger! Me and the little woman—"

"I seen you at lunchtime," I said.



"Oh shucks, yes!" says Mr. L. T. Smyth, pushing back his cowboy hat and scratching his bald head. "I'm right sorry about that, brother Karcher! Got my schedules all mixed up. How was lunch? Say! A feller come up to me today and says he ain't had a bite in two weeks! So I *bit* him! Got that one, did yuh! Did yuh get that one!"

Well, sir, it was a funny thing. When I knowed what I had to do I felt just as calm and peaceful as if the Lord had sent me a sign. And I mean no disrespect nor sacrilegion. It was just like a big load sliding right down off my shoulders.

"Brother Karcher!" hisses Mr. L. T. Smyth, shoving one of them toy guns in my ribs. "Let's go up to 718 and have ourselves a good old snort!"

I'd just like to have said, "All right, Mister L. T. Smyth. You'll see directly that you ain't the only joker in this town with a suitcase full of smart tricks!" But instead I hollered out, "Judas priest,

Does your face say "I love life"?

FOREHEAD: A love of good things is written in the expressive lines of this jutting forehead!

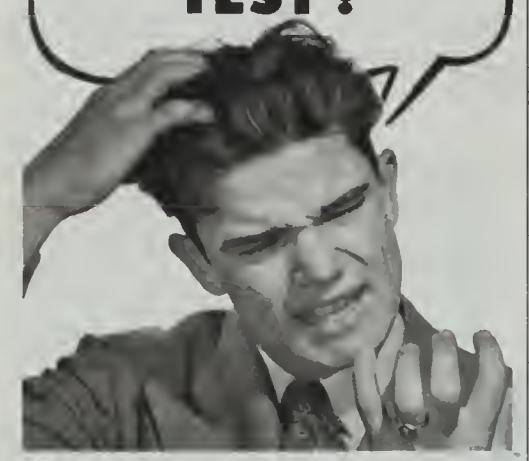
EYES: Bushy browed, deep-set, they twinkle with the joy of living!

LIPS: Long, thin, their satisfied curve seems to say, "I'll never grow tired of living—or of that '*Double-Rich*' Cream of Kentucky!"

Norman Rockwell

Here's great living...

"DOUBLE RICH"



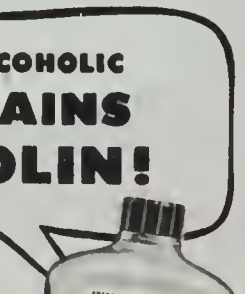
Cream of Kentucky

With that "Double-Rich" Kentucky Taste

A Schenley *Mark of Merit* Whiskey

Blended Whiskey. 86 Proof. 70% Grain Neutral Spirits. Copr. 1948, Schenley Distillers Corp., N. Y. C.

CAN YOUR SCALP PASS THE
FINGER-NAIL
TEST?



TRY IT! Scratch your head. If you find signs of dryness, loose ugly dandruff, you need Wildroot Cream-Oil hair tonic. Grooms hair... relieves dryness... removes loose dandruff! Contains soothing Lanolin, an oil resembling the natural oil of your skin.

YOUR HAIR CAN LOOK
LIKE THIS WITH NEW
WILDROOT
CREAM-OIL

A LITTLE WILDROOT CREAM-OIL does a lot for your hair. Keeps your hair well groomed all day long. Leaves no trace of that greasy, plastered down look. Makes your hair look and feel good.

NON-ALCOHOLIC
CONTAINS
LANOLIN!

AGAIN AND AGAIN the choice of men who put good grooming first—that's Wildroot Cream-Oil. No wonder when new users from coast to coast were questioned, 4 out of 5 who replied said they preferred it to any other hair tonic they had used before. Ask for it at your barber or drug counter.

IMPORTANT: Smart women use Wildroot Cream-Oil for quick grooming and for relieving dryness. Also excellent for training children's hair.

TUNE IN . . . "The Adventures of Sam Spade" Sunday evenings, CBS Network.

L.T.! What the heck are we standin' here for! Let's go!"

"Now yore talkin', pardner!" sings out Mr. L. T. Smyth, walking bowlegged so's folks would think he was a cowboy and poking a young girl in the back with one of his cap pistols and then ducking in through the revolving doors with an ornery holler of glee. "I'm an old cow hand—from the Ree-oh Grande!"

"Judas priest!" I hollered. "Let's raise Ned tonight, L.T.!"

"Well, I'd just like to see someone try and stop us!" bawls Mr. L. T. Smyth. "That's what I'd by damn like to see!"

And then we got on the elevator.

We hadn't hardly got started up till Mr. L. T. Smyth gives out a beller and points to the youngster that's running the thing.

"Karcher!" he hollers. "That ugly ombree there looks to me like a derned Apache Indian!"

And he pushed his hat back off his eyes so's he could get a better look and he glared at the poor youngster like he meant to eat him up.

"I'll drill him!" hollers Mr. L. T. Smyth, cracking away with both cap pistols. "I'll plug him full of holes! Has he bit the dust yet, pardner? Has he had enough?"

"Judas priest, yes!" I hollered. "I reckon he won't bother us no more!"

WHEN we got to 718 there wasn't nobody there but his missus and she must have heard us coming for she was just pouring the drinks.

"Hold her, Newt, she's a-rarin'!" I yelled, and snatched up mine and drank her down. And Mr. L. T. Smyth done the same with his, only it was derned near a water glass full and when he'd got his breath back you could see it had hit him pretty hard.

"It ain't gold in the bank, brother!" he croaked. "It's the gold of Human Friendship that makes a true man! That's the way I got it wrote down in my little book! Ain't that the truth, Minnie?"

And he wharped his missus on the back so hard she lost her balance and fell face down on the bed.

"Ain't that true!" he hollers at her. "Ain't you always found me to be that kind of a man, Minnie! Ain't it!"

"That's right, Lawrence," she said, her face all muffled in the bedclothes. "That's exactly right!"

"And when friends and lodge brothers gets together," roars Mr. L. T. Smyth, "they sure ought to raise hell and have fun! Do what yuh feel like doin' is what I say! If a man can't do what he feels like doin' then it ain't a free country! Right, pardner?"

"Why, Judas priest, yes!" I hollered.

"Is this a democracy?" he hollers. "Wait a minute! I'm askin' you one simple question! Is—this—a—democracy?"

"You bet!" I hollered.

"Then it's a free country!" yells Mr. L. T. Smyth, banging his fist down on the washstand. "Do what you want to do is what I say!"

He put his hand on my shoulder and hiccuped in my ear.

"What did you always want to do, brother Karcher?" he says. "Remember—it's a free country! You want to know what I always wanted to do, brother Karcher? Always wanted to raise alligators in Florida! Alligators, Karcher! That's the life! What did you always want to do, Karcher?"

I frowned and scratched my head like I was studying it real hard and never let on like I had it all figured out ahead of time. Then I let out my line and fed him the hook.

"Well, sir," I says. "To tell you the gospel truth, brother Smyth, I've spent most of the years of my life smothering the urge to throw furniture out of hotel windows!"

"Throw furniture—! Say now!" he hollered. "That's a dang good idea, pardner! Put her there! Furniture! Get rid of it! Throw it—throw it out that dang window! Minnie! MINNIE! Open the window!"

And the great Mr. L. T. Smyth's missus went over and opened the window and leaned out waving her handkerchief at the people down on Pike Street.

"Yoo-hoo, you all," she crooned in a soft, happy voice.

"Is this a free country!" boomed Mr. L. T. Smyth.

He leaned out the window and hollered down at the people in the street, "Twenty-three skiddoo, you derned bootleggers! Bombs away, brother Karcher!"

And we all looked over the sill, watching the little straight-backed chair spin down and kind of explode on the sidewalk with everybody standing back in a circle and gawking up at us like nuts.

"Now the dresser drawers!" bawls Mr. L. T. Smyth. "The danged bureau is too big to get through the window, curse the luck! Just like my missus! It's a lucky thing for you, Minnie, you're too big to get through the window!"

And his missus just giggled at him and pitched a whisky bottle at his head and watched it bust and the whisky run down the wall. A real crowd had gathered in the street now and they gave a big cheer when the dresser drawers and the washstand hit the sidewalk. Then out went the slop jar and the washbowl, and another chair follered that. The little bench to the dressing table was pitched out next; then the mirror, the mattress, the easy chair and the writing desk.

"Now!" hollers Mr. L. T. Smyth, dusting off his hands and swaggering around the room all simple and bowlegged. "Pardner! Le's go down and build us a campfire with all that nice kindlin'! It's mighty cold on the ranch tonight! And the fire will keep them pesky kiyotees away!"

"That's a good idea, L.T.!" I hollered.

So he stuck his whisky bottle in the blouse of his cowboy suit and went out the door waving his cap pistol in the air and shouting some foolishness about an alligator ranch. All the way down on the elevator he kept cracking his gun at the poor youngster and his missus was giving the rebel war cry. I sighed to myself and felt kind of sad for Jessie's sake—knowing how it all was sure to turn out—but knowing deep inside there wasn't no other way. And then when we went out through the revolving doors I seen the three constables. Quick as a wink I grabbed Mr. L. T. Smyth by the sleeve of his cowboy shirt. For this tim really thought up a humdinger.

"Judas priest, L.T.!" I whisp "Them fellers looks like Texas Ran Let's sneak up and kick 'em in the pa

The poor souls was standing the the crowd—scratching their heads looking up at the window and then ing down at the pile of busted fur and scratching their heads some Mr. L. T. Smyth blazed away with cap pistols and his missus give the yell and we charged. And we c them all square in the seat of the bc at the same time.

"I'm an old cow hand!" Mr. Smyth was hollering as they dragg off down Pike Street.

"From the Ree-oh Grande!" si missus, trying to put her arms a the constable that had her in tow.

JESSIE never did understand never will, I reckon. There is things you have to do in this worl you can't explain to a woman. She to see me next morning at the Ha County Jail in the cell where I wa the great high and mighty Miste Missus L. T. Smyth. He was be and shaking the bars and holleru his lawyer and yelling something the Constitution might as well b up and this here was a democrac what with all the racket I could hear what Jessie was saying. An her crying to boot.

"I'll stick by you, John," she "Even if you get life."

Then she just plumb went to and was led away sobbing and sl and directly here comes the jaile our breakfast. I could see out courthouse lobby—Jessie setting bench now with her handkerchief her upper lip and Will and E.V Barky and Fred all standing arou ting her on the head and Will's holding the smelling salts.

I hate to say this but I felt just When the jailer shoved through t of hot mush and bacon and black and passed out the spoons I got hungry as a bear. And I couldn't back no longer.

"Hey there, Mister L. T. Sm hollered. "You and your missu join me at breakfast this n Nothin' fancy, understand! But charmed if you was to have a bi me! Did yuh get that one! Got t did yuh!"

THE SECRET PAPERS OF HARRY L. HOPKINS

Continued from page 20

nations, large and small, had to carry the burdens of heavy armament in order to survive. Hopkins later told me that Roosevelt was unusually uncomfortable and "his style was cramped" in these meetings primarily because of the enormous language difficulty and the inevitable waits while each statement was translated.

The next morning the President and Hopkins met with Molotov, General Marshall and Admiral King.

Angles on Aid to Russia

Professor Cross's record included:

The President remarked that Mr. Molotov had just come from London, where he had been discussing with the British authorities the problem of a second (invasion) front in western Europe. He had, the President added, been politely received, but had as yet obtained no positive commitment from the British. . . . We regarded it as our obligation to help the Soviets to the best of our ability, even if the extent of this aid was for the moment doubtful. . . .

Mr. Molotov thereupon remarked that, though the problem of the second front was both military and political, it was predominantly political. There was an essential difference between the situation in 1942 and what it might be in 1943. . . . To be sure, as was devoutly to be hoped, the Russians might hold and fight on all through 1942.

But it was only right to look at the darker side of the picture. On the basis of his Continental dominance, Hitler might throw in such reinforcements in man power and material that the Red Army might <u>not</u> be able to hold out against the Nazis. . . . In such circumstances the outlook would be much less favorable for all hands. . . . The decisive element in the whole problem lay in the question: When are the prospects better for the United Nations—in 1942 or in 1943?

Mr. Molotov observed that . . . if Great Britain and the United States, as allies, were to create a new front and to draw off 40 German divisions from the Soviet front, the ratio of strength would be so altered that the Soviets could either beat Hitler this year (1942) or insure beyond question his ultimate defeat.

Mr. Molotov therefore put this question frankly: Could we undertake such offensive action as would draw off 40 German divisions, which would be, to tell the truth, distinctly second-rate outfits? If the answer should be in the affirmative, the war would be decided in 1942. If negative, the Soviets would fight on alone, doing their best, and no man would expect more from them than that. He requested a straight answer. . . .

The President then put to General Marshall the query whether developments were clear enough so that we could say to Mr. Stalin that we are preparing a second front. "Yes," replied the general. The President then authorized Mr. Molotov to inform Mr. Stalin that we expect the formation of a second front this year [1942].

General Marshall added that we had the troops, all adequately trained; we had the munitions, the aviation and the armored divisions. The difficulties lay in transport.

Strategically the idea was, said General Marshall, to create as quickly as possible a situation on the Continent under which the Germans would be forced into an all-out air engagement, but they will not engage on this scale without the pressure of the presence of our troops on the ground. . . .

There was a meeting with the Chiefs of Staff Sunday afternoon, of which Hopkins wrote:

The President told General Marshall and Admiral King that he thought the matter was a little vague and the dangerous situation on the Russian front required that he, the President, make a more specific answer to Molotov in regard to a second front. The President read a draft of a cable which he had prepared to send to Churchill.

The cable referred to said:

Molotov's visit has put us on a personal footing of candor and as good friendship as can be acquired through an interpreter. I think the visit is a real success.

His real anxiety as to the next four or five months has been made very clear and I think this is sincere and not put forward to force our hand. Therefore, I am more than ever anxious that BOLERO [then the code name for the invasion of western Europe] proceed to definite action beginning in August and continuing as long as the weather holds. . . .

When Molotov leaves, I will cable you and I am especially anxious that he carry back some real results of his mission and that he will give a favorable account to Stalin. At present all the Russians are a bit down in the mouth, I believe.

The final meeting of the President, Molotov and Hopkins was held at 10:30 on Monday morning, June 1, 1942. Cross's record said that:

Mr. Molotov was much more gruff and assertive than in the previous interviews, perhaps for the purpose of playing the big shot in Mr. Litvinov's presence. In this case, at any rate, he immediately became terse and pressing.

The President remarked that he wished Mr. Molotov would take up one other matter with Mr. Stalin. We knew, he said, that there would be two kinds of postwar settlements: first, those among the United Nations, and second, arrangements for the reconstruction of the other nations with a view to ensuring a more stable form of peace. The President continued by saying that he had a new thought based on old experience. He believed that, instead of requiring interest on wartime advances, all the United Nations should work out a plan covering a long-term repayment of capital only. He hoped Mr. Molotov would discuss the point with Mr. Stalin for the purpose of exploring it without commitments. Mr. Molotov agreed to do so. The President observed that some such arrangement would facilitate matters for Great Britain, the Soviet Union and the United States, and also prove helpful for other nations. . . .

Mr. Molotov commented that he thought Mr. Stalin would be interested.

The President repeated that we expected to set up a second front in 1942, but that every ship we could shift to the English run meant that the second front was so much the closer to being realized. After all, ships could not be in two places at once. The Soviets could not eat their cake and have it too.

To this statement Mr. Molotov retorted with some emphasis that the second front would be stronger if the first front still stood fast, and inquired with what seemed deliberate sarcasm what would happen if the Soviets cut down their requirements and then no second front eventuated.

"What answer," he asked, "shall I take back to London and Moscow on the general question that has been raised? What is the President's answer with respect to the second front?"

To this direct question the President answered that Mr. Molotov could say in London that, after all, the British were even now in personal consultation with our staff officers on questions of landing craft, food, etc. Mr. Molotov should also say in London that we could proceed toward its creation with the more speed if the Soviet government would make it possible for us to put more ships into the English service.

The conversation ended with decreased tension on the Russian side. The President bade Mr. Molotov a cordial farewell, wished him a safe return home and presented the commissar with his photograph.

Later the Americans and Russians issued a statement about Molotov's visit, making reference to the second-front problem. Hopkins noted that he "talked to General Marshall about this and he felt that the sentence about the se front was too strong and urged that t be no reference to 1942. I called this ticularly to the President's attentio he, nevertheless, wished to have i cluded."

The reference to the second which Molotov wrote and which peared in the public statement issue June 11th was: "In the course o conversations full understanding reached with regard to the urgent of creating a second front in Euro 1942."

The exact meaning of those w and all the implications involved in provoked interminable and often lently acrimonious discussion for a time thereafter.

Hopkins later was aware of an *aide-mémoire* which the British authorities handed to Molotov on this subject said:

We are making preparations landing on the Continent in Aug September, 1942. . . . Clearly, how it would not further either the Ru cause or that of the Allies as a wh for the sake of action at any price embarked on some operation w ended in disaster and gave the e an opportunity for glorification a discomforture. We can therefore no promise in the matter, but, pro that it appears sound and sensibl shall not hesitate to put our plan effect.

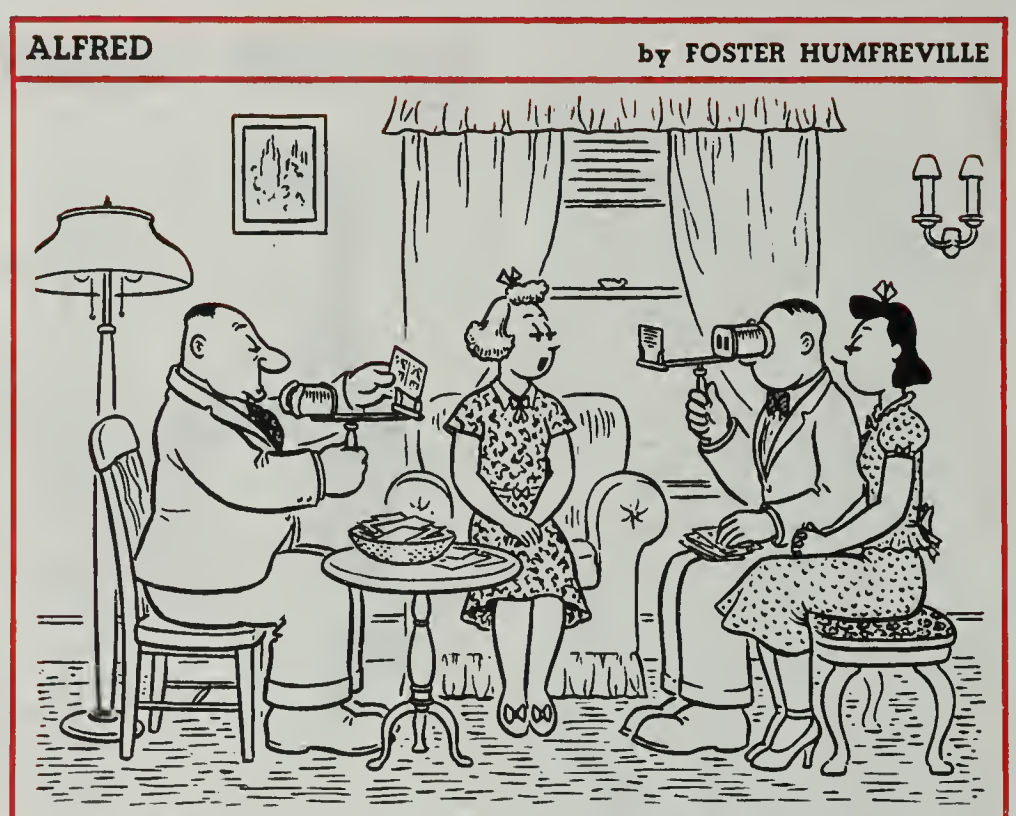
Roosevelt cabled Stalin that he a ciated ever so much your sending Molotov to see me. Our visit wa satisfactory and I shall await anx the news of his safe arrival.

F.D.R.'s Reaction to Molotov

This same day Roosevelt Churchill:

The visit greatly pleased me. tov warmed up far more than any expected and I feel confident th has a far better understanding situation here than when he arriv confess that I view with great co the Russian front. . . .

These two cables were sent on J 1942—which was two years to th before the real second front was opened in northern France.



Hopkins wrote a letter about th general to Winant:

Molotov's visit went extremely He and the President got along fa and I am sure that we at least b one more gap between ourselv Russia.

There is still a long way to go must be done if there is ever to real peace in the world. We simp not organize the world betwe British and ourselves without b the Russians in as equal partners.

June 6th brought the climax Battle of Midway, which was, in cific, what the Battle of Britain ha in stopping the Germans on the C and what Stalingrad was to bec the war on the Russian front. It Admiral King has written, "the cisive defeat suffered by the Ja navy in 350 years. Furthermore an end to the long period of Ja offensive action, and restored the of naval power in the Pacific."

General Eisenhower and Somervell were then on a quick London for discussion of probl planning and supply. They retu Washington a few days later, as d eral Arnold who brought with h miral Lord Louis Mountbatte conveyed to the U.S. Chiefs of S disturbing impression that there

be some question of revision of the BOLERO-SLEDGEHAMMER [second front] agreements made by Marshall and Hopkins in London six weeks previously. It was believed in Washington that Mountbatten was expressing the attitude of the British Chiefs of Staff, rather than his own.

There was an increasing conviction in Washington that the British were now inclined to dissuade the Americans from entertaining any ideas of engaging the Germans in force on land or in the air in 1942.

Churchill arrived on June 20th and stated his conception of the problems, in writing, to the President when they met at Hyde Park.

Weighing Chances of Failure

Churchill pointed out that the plans then in progress called for six or eight divisions to invade the northern coast of France early in September. At the same time, he stated that the British would be opposed to any move that was certain to result in failure. Such a failure could not in any event help the Russians, he argued, and would merely cause the Nazis to retaliate violently against any French inhabitants who assisted the Allies. Furthermore, he felt that such a failure would seriously delay a full-scale European invasion such as was planned for 1943.

Only if the Allies firmly intended to stay should they attempt any important French landing, Churchill emphasized. He then brought up the question of preparing some other operation which would directly or indirectly give relief to the Red Army. In this connection he suggested that a study should be made of the proposal known as GYMNAST which called for an invasion of North Africa.

Here, then, was the argument that the proponents of the second front had feared: the revival of the North African operation, instead of the trans-Channel assault in 1942. Stimson noted that Churchill had "taken up GYMNAST, knowing full well I am sure that it was the President's great secret baby."

This was the beginning of the protracted and often bitter dispute over the second front. Much has already been written on this extensive subject, and in most of it Churchill appears as the arch-villain from the American and Russian points of view. Certainly, in this argument, he demonstrated to the limit his qualities of indomitability, or of pig-headedness, whichever word you prefer. He was accused by some of a cowardly fear of risking British lives—and that accusation was made by Stalin in brutally blunt words to Churchill's face.

The charge of cowardice could hardly stand up against Churchill who, in 1940, had deliberately risked the lives of the entire British population, including his own, when the United States was still "neutral" and the Soviet Union was associated with the Germans in the Molotov-Ribbentrop pact; but there was no doubt about his reluctance to sacrifice British lives, and American lives, on the beaches of northern France. He persisted in the belief that Germany could be defeated by the combination of superior sea and air power *plus superior wits*. He said time and again that a disastrous defeat suffered by the Allies on the French coast would be "the only sure way for us to lose this war."

It has often been said that Churchill's advocacy of the "soft underbelly" approach to Europe demonstrated his far-sightedness—that he was motivated by the long-range purpose of keeping the Red Army out of the Danube Valley and the Balkans. In the opinion of some of the American authorities who were involved in the strategic discussions, this claim gave Churchill credit for too much prescience. He may have had such thoughts in mind in 1944, but certainly not in 1942.

The American Chiefs of Staff believed that Churchill's strategic concepts were much more easily explained: He had an incurable predilection for "eccentric operations" which depended on surprise, deception and speed. He shrank from the conception of a frontal attack.

Right or wrong, for better or worse, Churchill's arguments always made an appeal to Roosevelt, who was also interested in saving lives. One can only guess at the extent of the conflicts that went on in Roosevelt's mind and heart and soul when he had to decide whether to follow the advice of his own most trusted advisers (including Hopkins) or Churchill's warnings that the Channel would be a "river of blood."

In this period the British were suffering severe military reverses in North Africa and on Sunday morning, June 21st, in the White House, the President handed the Prime Minister a slip of paper with the news that Tobruk had fallen. There was little left with which to stop Rommel's Afrika Korps from pushing on to Alexandria, Cairo—and beyond.

"Never mind how bow-wow goes and moo cow goes and pussycat goes. How does Joanie go?" PERRY BARLOW

COLLIER'S

This sudden turn disrupted the Allied staff talks in Washington even before they could be started. Churchill poured out his matchless prose in opposition to the trans-Channel operation in 1942, and in favor of GYMNAST as a means of relieving the crisis in the Mediterranean. He was vigorously opposed by Marshall and Hopkins, and Roosevelt—for all that GYMNAST was "his secret baby"—refused to depart from the previous agreement.

Thus, there was no revision of plans then, but concentration of attention was forcibly diverted from the northern French coast to the Valley of the Nile.

British Attitude Causes Doubts

On June 25, 1942, Churchill had a final dinner with Roosevelt and Hopkins and then departed for London. He left behind him a growing sense of alarm that the second front was not going to be established in 1942 or in 1943 either.

Disagreement at this stage gave evidence of becoming so acute that the United States Chiefs of Staff seriously considered radical revision of their grand strategy which called for defeat of Germany first, instead of Japan.

General MacArthur in Australia had made his own plans for an offensive in the Southwest Pacific. These were co-ordinated with Navy plans in Washington into the conception of a major operation in 1942 and 1943 along the line of eastern New Guinea to the Admiralty Islands and up through the Celebes Sea to the west of the Philippines to Kamranh Bay in Indo-China, and Hong Kong. This would have involved committing the major part of American ground forces to fighting the war against Japan on the mainland of Asia in 1943—which would have meant leaving the war against Germany in Europe to be fought out by the Russians and British.

Henry L. Stimson has said that this drastic plan was a "bluff"—designed "to bring the British into agreement with the U.S. and Russia on plans for some sort of European invasion in 1942. Roosevelt called it "a red herring" and said that using it to force British agreement was a little like threatening to "take up your dishes and go home."

There is, however, considerable dispute as to this; the Hopkins papers shed no light on it, but it is my impression that the plan was far more than a bluff in General Marshall's mind and certainly in Admiral King's. Indeed, the first step in it—the assault on Guadalcanal—was approved on June 25th. One may indulge in some pretty wild speculation as to the consequences had the plan been followed through—including the thought that the first atomic bomb might have fallen on Berlin instead of Hiroshima.

In any case, the situation became so critical on the Russian front and in Egypt and in the Battle of the Atlantic early in July that a showdown was enforced. With the fall of Sevastopol, the storm of German offensive broke at last in full fury and the *Wehrmacht* swept eastward across the Don in the advance that ended only in the streets of Stalingrad and the mountains of the Caucasus.

Roosevelt had to make some very rapid and difficult decisions concerning diversion to the depleted British forces of Lend-Lease material that was in the Middle East en route to Turkey, Russia and China. The most important items in this were bombers which could be used in hammering Rommel's Nazi supply lines.

When some heavy bombers that were destined for China were turned over to the British, Chiang Kai-shek made emphatic protest in Chungking to General Stilwell, who reported to the President that "both Chiang Kai-shek and Madame were bitter about this matter and they were not mincing words when they asked for an unequivocal answer to the question as to whether or not the Allies were interested in maintaining the China war theater."

On July 4th, Churchill cabled, mentioning that there were 40 A-20 bombers which were then approaching Basra headed for Russia. The Prime Minister asked if the President would feel i to suggest to Stalin that these 40 b were desperately needed by the Br Africa.

On July 7th, Roosevelt Churchill that Stalin had no objec the transfer of these bombers to th ish and he cabled Stalin:

I deeply appreciate your attitu am arranging to slip to you at on hundred and fifteen additional n tanks with ammunition and spare

A month later when Churchill Moscow, he expressed his tha Stalin for the 40 bombers, and Stal "Those were American aircraft. be time enough to thank us when you some of our Russian bomber

In the Battle of the Atlantic, i Churchill advised Roosevelt that s were at "a rate unexampled in t or the last." And on July 15th, Cl sent Roosevelt for approval a co cable that he proposed to send whom he addressed as "my comra friend." The cable made the pain gestion that convoys on the Mu route must be suspended during maining summer period of perpet light. Roosevelt reluctantly agre

July 15th was a very tense da White House. The U.S. Chiefs were in a "fish or cut bait" moo gard to the British opposition to a front in Europe in 1942. Allied ur in immediate peril—and Marshal soldier who had an extraordinary ciation of the strategic necessity o unity. Roosevelt decided to sen shall, King and Hopkins to Lon settle the question.

Quotes from a Dinner Confer

On the evening of July 15th, H had dinner as usual with Roose a long conversation afterward. H careful notes during this conve quoting Roosevelt directly:

I cannot agree that if it be im to develop BOLERO (a limite pean attack) in 1942, we shou our faces away from Germa toward Japan.

Even though we must rel agree to no SLEDGEHAMMER pean invasion) in 1942, I still t should press forward vigorously 1943 enterprise. I see nothing message from England to indic lukewarmness on their part for t enterprise. I am somewhat di about this readiness to give u Will they also give up 1943?

But my main point is that I believe we can wait until 1943 at Germany. If we cannot s SLEDGEHAMMER (Europea sion), then we must take the sec —and that is not the Pacific. T are conducting a successful war. Troops and air alone will decisive at once—it requires creasing strength of our Navy- takes time.

If SLEDGEHAMMER can launched then I wish a deter made while you are in London specific and definite theater w ground and sea forces can against the German ground f 1942.

The theaters to be conside North Africa and the Middle E

The conversation summarized notes led to the drafting of the ders which Hopkins, Marshall a took with them to London. The included:

I am opposed to an America effort in the Pacific against Jap the view to her defeat as qu possible. It is of the utmost im that we appreciate that defeat does not defeat Germany a American concentration again this year or in 1943 increases th of complete German domin

nd Africa. On the other hand, ous that defeat of Germany, or ling of Germany in 1942 or in eans probable, eventual defeat nany in the European and heaters and in the Near East. f Germany means the defeat of obably without firing a shot or life. . . .

remember three cardinal prin- peed of decision on plans, unity attack combined with defense lefense alone. This affects the te objective of U.S. ground hting against Germans in 1942.

d) FRANKLIN D. ROOSE- COMMANDER IN CHIEF

as an expression of belief that, conquest of Germany, Japan's could be enforced without the n invasion of her home islands. he instructions given by Roose- opkins and the Chiefs of Staff, important—and, indeed, the ul- letermining factor—was this: *nd forces must be put into po- fight German ground forces re in 1942.*

s, Marshall and King flew from on on July 16th.

ival at Prestwick in Scotland, it d that the weather over Eng- too bad to permit flying on to Churchill had, therefore, pro- special train and asked that it Chequers so that they might there directly and spend the . However, that did not fit in shall's and King's plans. They o get to London immediately their talks with Eisenhower, aatz and Stark, as Roosevelt ed. So the train did not stop at

after their arrival at London, had Hopkins on the telephone, onversation about their failure ust have been a hot one. Hop- rted to Roosevelt, "The Prime threw the British Constitution th some vehemence. As you s an unwritten document so no amage was done. Winston is lf and full of battle." Hopkins st over the telephone to try to the Prime Minister that no had been intended, but his best ntly not good enough, and Hop- y concluded that he must go to himself to try to absorb some th. He did so.

The preliminary talks in London showed that it was unlikely the American viewpoint would prevail. During one conference Hopkins wrote on a sheet of Downing Street note paper, "I feel damn' depressed." This was written as a note —to whom, I do not know, but probably Marshall—on Wednesday afternoon, July 22d.

Soon after this meeting, Roosevelt was informed that the British would not willingly go ahead with SLEDGEHAMMER. Furthermore, as Hopkins indicated, the U.S. Navy officers involved had been inclined to respect the British position.

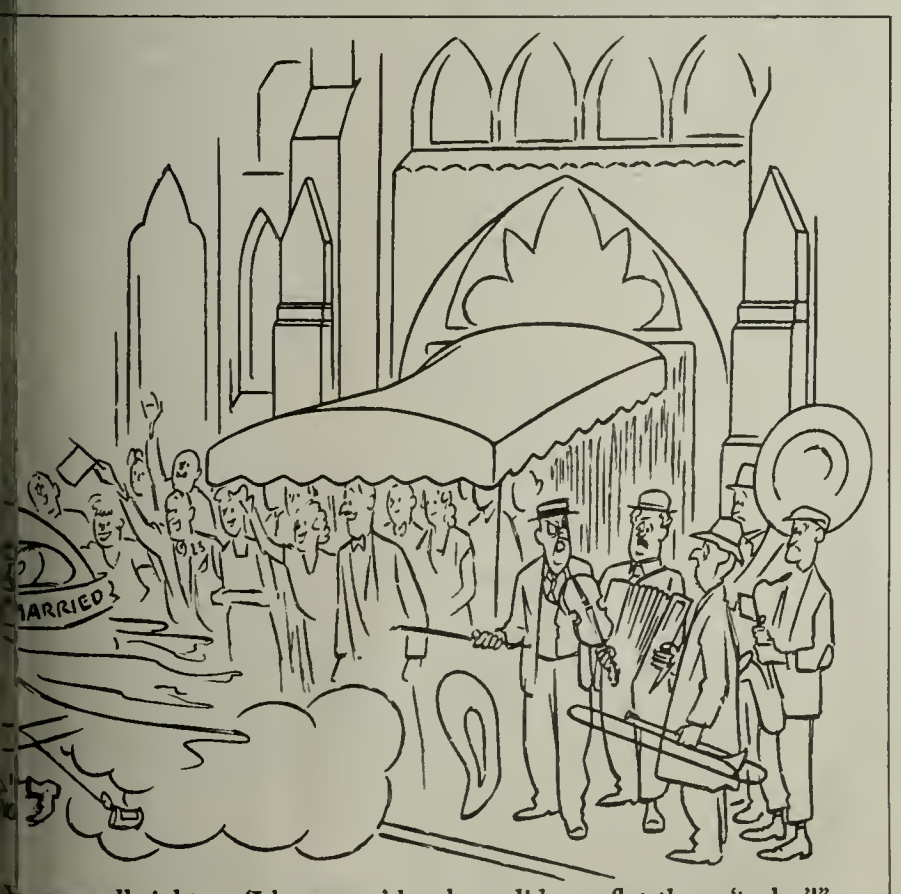
There was sufficient unanimity on the British side and a large enough fragment of doubt on the American side to make it impossible to push through the agreement for European invasion in 1942.

A Strong Plea for "Gymnast"

Roosevelt then cabled "that some other offensive be worked out for American ground forces in 1942. Tell our friends we must have a speedy decision."

The next day, the President again cabled:

GYMNAST (North Africa) is preferable in my opinion because relative distances will enable us to obtain control of Mediterranean more quickly and more surely than if we decide on mere reinforcements in Near East. . . . Using many of our troops now in England and Ireland together with expeditionary force from the United States I see no reason why we cannot put 80,000 American troops and air into the initial operation.



Late in July, Hopkins cabled Roosevelt that GYMNAST seemed acceptable but there was a tendency in the discussions to postpone a final decision until September 15th. He said, however, that "I urge very strongly that you recommend a date not later than October 30, 1942 . . . (as) the Russian situation is very serious."

Roosevelt replied to this:

In my opinion GYMNAST should be started with landing not later than October 30, 1942, and plans to that end proceed at once. Tell Former Naval Person I am delighted that decision is made.

In this way was the decision made to strike into North Africa instead of France.

Next Week: The Soft Underbelly.

HERO ON HORSEBACK

Continued from page 27

arrived. Thousands of kids boast an even hundred of Roy's pictures; one girl claims the championship with twelve hundred.

No one knows how many kids belong to Rogers fan clubs, started eight years ago by an admirer—a girl, Gene Ernst, of Hammond, Indiana. The clubs, collectively known as The Roy Rogers Fan Club, get out a publication dedicated to Rogers; they also answer innumerable questions about him.

If the kids make or break Western stars they also furnish more heartbreak than any one man ought to endure. There never are weeks in which some sobbing mother or pleading doctor doesn't call Roy to come and see a desperately ill, or dying child. Sometimes, if he can, he goes; if he can't, he telephones or wires the kid, or writes him a note.

With Only Two Months to Live

There was the boy out in the San Fernando Valley, for example. He had two months to live—and no hope. All he wanted was to see Roy; it was the one thing, his parents and the doctor said, that would build up his fading morale. So one evening, after a day before the cameras, Roy rolled out to the kid's home, not stopping to change clothes or make-up. He walked into the boy's room, unholstered his guns and tossed them on the bed.

"You don't mind if I park my shootin' irons on your bed, partner?" he asked.

The kid grinned and feebly tried to lift a gun.

"You'll have to do better'n that if you're going to make a picture with me," chided Roy. "You better hurry up and get better; then have your folks come to the studio and we'll find a part for you. . . ."

The kid did get better—temporarily. He made it to the studio one day, and Roy made good on his promise, putting the boy into a scene or two. He lived eighteen months—instead of the two his doctor gave him. He was a proud and happy kid—he was a pal of Roy Rogers, and the neighborhood kids knew it.

Roy was born in Cincinnati thirty-six years ago. His father worked in the U.S. Shoe Factory at $11 a day and the family, including sisters Mary, Kathleen and Cleda, lived comfortably. When he was a year old, the family moved to Portsmouth, Ohio, and later bought a farm in Duck Run, a dozen miles from town "up in th' hollow." This was where, under his real name, Leonard Slye, the kid grew up, learned to ride and shoot and play banjos, guitars and other instruments for country dances.

Leonard had a way with wild life. Horses obeyed him; bees wouldn't sting him; his pet skunks never let go; yellow jackets whose nests he disturbed always lit out after innocent bystanders and left him alone. A pet pig won first prize in a "4-H" Club contest, giving young Lenny a free trip to Cleveland and the Slye family a cellarful of lard, ham, bacon and fat back.

On the farm the boy learned to ride on a plow horse—a little black mare named Babe.

Time went along and in 1929, when he was seventeen, the boy went to work with his father in a shoe factory in Portsmouth. This looked like a lifework until one morning they got a letter from sister Mary who had got married and gone to live in Lawndale, California. Then the California fever got them and with a couple of hundred dollars they all set out in an old sedan for the West Coast. Out around Lawndale, Roy drove a gravel truck and did odd jobs during the summer. In November they were back at Duck Run. But the West was in the kid's blood and six weeks later he was headed out again.

He worked at anything that came along and in 1931 his family joined him. The depression was on, and everybody worked at anything handy—one summer they spent fruit-picking around Merced. Meanwhile, the youngster kept working on the clarinet, the fiddle and various stringed instruments, and the notion came to him that maybe there might be money in playing and singing. There certainly was little money in anything else in those dark days.

So he got a start in show business in 1932, at a time when theater owners were leasing out stretches of the balcony for deer stalking and mountain climbing. He got an audition with a show called the Midnight Frolic at a small radio station in Inglewood, a Los Angeles suburb. No dough, but a chance to sing, yodel and play the guitar.

Figuring that six could starve as cheaply as one, he got five other lads together and they formed The Rocky Mountaineers.

Four of them lived in one small house, three sleeping in one bed. They subsisted on chipped beef and gravy mainly, eking out with tips they made by shoving cars out of mudholes. Luckily southern California was having a wet spell at the time and the boys picked up a little change by patrolling local morasses and heaving when necessary.

"The usual tip was a dime," Roy remembers. "Once we got a quarter—but a lot of times the guy just said, 'Thank you,' and drove on."

But the dry spell came on, and the mudholes vanished and The Rocky Mountaineers fell apart. One took to caddying, another to driving a truck. Roy gritted his teeth and formed a new singing group called The International Cowboys—on the strength of one Mexican and one Hawaiian in the outfit. As soon as they got a little cash together they started out barnstorming around the West.

By June, 1933, this outfit had been changed to a group of five called The O-Bar-O Cowboys, which finally landed in Roswell, New Mexico, flat broke. A radio station there let them go on the air, but had no money for them. They used part of their air time to describe the kinds of food they liked, and how hungry they were and how they wished they were back in Mother's kitchen eating those swell doughnuts. . . .

"We must have sounded hungry," says Roy, "because people used to send in pie and cake and doughnuts and we lived on those for a long time. Sometimes we would mention sizzling steaks on the air, but we never got a sizzle. Just carbohydrates."

However, they got a few jobs playing for country dances and one week the five of them made $97. With this they toured Texas, playing for dances and mentioning food prominently over one-lunger radio stations. Back in California in the fall they split up and Roy organi another outfit—this time The Te laws—in which he played as "M Slye."

The Texas Outlaws went the the others. Next came The Son Pioneers, which went on the KFWB in Hollywood and stay Rogers worked up to $35 a wee ing only two hours a day, and co economic security in sight. Bu he heard that people were get for playing and singing at the Te tennial at Dallas, he quit and all for the Lone-Star State. A centennial he homed to Hol joined the Sons again and with t a few jobs singing and playing erns at Columbia.

He did so well in one of the that he got a fan letter—or at l studio did.

The honor of being Mr. Rog fan, and perhaps starting an tional trend, goes to Mrs. J. A. P of Little River, Florida. On July Mrs. Pent viewed The Mysteriou ger, a picture in which Mr. Ro peared anonymously. She sat once and wrote to the studio, e admiration and a belief that th man would go far.

Fan mail now runs around a pieces a year, but Roy still kee Pent's letter in his scrapbook.

While he was playing the gu singing in an occasional pictur show called Hollywood Barn Roy one day called at a store dale to pick up a hat he'd bee cleaned. At the moment, a h stranger—with slightly bowed came in and bought a new hat, ing that he had to hurry out to Studios to take a screen test.

Mr. Rogers inquired about c in the oat-opera field, was told t favorable and tagged along to t for a test himself.

A Short Trail to Stardo

He passed with all A grades signed October 13, 1937, "but starred until March, 1938, i Western Stars," he apologizes little ashamed that it took so l tain stardom.

Trigger, the fourteen-year-o mino stallion who gets equal bil Rogers, probably is the worl known horse—and the most p movie star in Hollywood. Businessmen write Rogers hundreds of letters, though you might not believe it. They are usually apologetic; not interested themselves, but their kiddies are just crazy to have a letter from Roy, or a signed picture. Often they send him shirts—and report that their little ones are wearing outfits "endorsed" by Roy.

Endorsing products may be a dangerous thing, because if a kid gets a "Roy Rogers Cowboy Shirt" and it shrinks, Mr. Rogers' name is thereafter mud in that home. After several unhappy experiences in early days Roy now spends a lot of money testing everything before he puts his name on it.

Money Pours in from Many Sources

Just how much all this outside-the-studio money totals, neither Roy nor his manager, Art Rush, knows. It may run well over $300,000 this year—and that figure doesn't include the rodeo, personal appearances, movie work or what the ranch may bring in. Roy keeps thirty-six brood mares and five palomino stallions busy and sells the results at handsome figures.

All this fame and fortune have not been attained for nothing. Herbert J. Yates, president of Republic Pictures, figures his studio alone spent around a million dollars in three years in publicity and exploitation for Rogers.

While Roy—as Leonard Slye—was making his first picture at Republic some aesthete balked at his name. So there was a conference between Sol and Moe Siegel, Bill Saal and Herbert Yates and somebody suggested "Rogers." Yates tossed in the "Roy"—and young Lennie was told of the decision. He took it very well, on the whole, and in 1942 made Roy Rogers his legal name.

On a barnstorming trip through Texas he and a friend saw a horse up for sale. The animal, a palomino, was rather mangy, but Roy took a fancy to it and the owner was glad to sell it to him for $150. Roy borrowed the money, figured he should name the animal something people could remember "quick on the trigger." So that's how Trigger got his name.

While making My Pal Trigger one scene called for the birthing of a colt. One was rented from a California horse rancher who was so pleased with the deal he gave the youngster to Roy. It was an awkward, leggy, ungainly little thing and no one figured it would ever amount to much. But today, the two-year-old is Trigger's understudy. Trigger has never missed a show but there may come a time. . . . So Trigger Junior, who has appeared in two pictures as Trigger's son, has been carefully trained, knows all his old man's cues and tricks and goes along on tours. Roy and Glenn Randall, who have trained him, consider him the second wonder horse of the age. Eventually he will step into the famous stallion's shoes and do all right.

Rogers and Trigger represent quite an investment in clothes and equipment. Rogers' shirts start at $30 and run up as high as $150; trousers come around $65; boots cost $75 a pair up. He designs most of his costumes. Of course a "cowboy outfit" can cost anything: One of Trigger's saddles came to $5,500. Silver and gold embellishments on riding gear and guns have practically no limit.

Final accolade for any star is the approval of the crews who work in his pictures. The Western crew at Republic is all for Rogers.

"He's a good guy," said a grip. "You take late last year, when he was sick and under doctor's orders to lay off. It was near Christmas and he knew how the boys needed pay checks. So he goes ahead and makes the picture, just so we'll have some cash instead of a layoff. How can you help but like a guy like that?"

disposition to release it. However, every month the British government sends him a check to take care of his and his family's living expenses. This income won't permit extravagance, and Umberto is now a subdued and retired gentleman. He and his wife, Marie-José separated after they left Italy.

Villa Jela, in the Smuha quarter, is the home of the widow of King Victor Emmanuel III, Helena of Montenegro. With a small income, she lives a completely secluded life. Blinded in her right eye, the tall queen never recovered from the loss of her daughter, Princess Mafalda of Hesse, who died in the Nazi concentration camp of Buchenwald.

Queen Helena's two other daughters, former Queen Giovanna of Bulgaria and Countess Iolanda Calvi di Bergolo, live in small, simple villas near by. Giovanna, a widow since the mysterious death of her husband King Boris (who was rumored to have been poisoned by either Nazis or Communists, depending on the source), is busy raising her two children, King Simeon and Princess Ludovica, and never goes out.

Her sister Iolanda, however, is gay and active. She has no servants and does all the cooking and housework herself, while her husband, a former general in the Italian army, looks for a job.

While the Savoias are poor, their former foe, ex-King Zog of Albania, is happy and fairly well off financially, despite the fact that he has four sisters dependent on him.

Zog still likes colorful uniforms and paraphernalia. At official functions, he is always covered with decorations, like a true operetta king. He dolls up his pretty half-Hungarian, half-American wife, the former Countess Geraldine Apponyi, the way he thinks a queen should look. Zog and Geraldine are in sharp contrast to some other royal exiles. He has had the unique satisfaction of seeing the king who dispossessed him of his kingdom, the late Victor Emmanuel of Italy, drift into exile himself.

The head of the czarist Russians and legitimate pretender to the throne of All the Russias, Grand Duke Vladimir Kyrilovitch is now a resident of Spain, where he travels extensively, unmolested by Franco's police. But he keeps an office in St. Briac, Brittany, known as the Imperial Chancery and headed by a former czarist admiral. Here all the mail of Russian royalists is opened and answered, and here decisions of titles, morganatic marriages of other Romanoffs and questions of precedence are made.

A lover of outdoor sports, the tall, strapping thirty-year-old Vladimir looks almost exactly like his late granduncle, Czar Alexander III, a fact that his followers consider a lucky omen. British educated, he thinks it silly for him to proclaim himself czar as long as Stalin rules Russia. Grand duke will do, he says, for the time being.

To Vladimir's credit, he didn't care enough about his claims to the throne to sacrifice his honor and love of country. When Hitler offered to make him Czar of the Ukraine and perhaps of the whole of Russia, Vladimir answered: "A Romanoff will not let himself be placed back on the throne by an adventurer and a butcher of the Russian people." That took courage, as Vladimir lived in Germany during the war.

There are other jobless kings and queens and pretenders scattered about the earth. In Switzerland we find the melancholy Leopold of the Belgians and his beautiful commoner wife, Rethy. The Belgians don't seen them back or to place their so Louis Napoleon, in line for s to the throne.

Montenegro has a Prince who aspires feebly to its mo throne. Germany has its Hoh pretender, in the person of F William, the former crown pri lives in the gloomy 400-room (room) Castle of Hechingen in th can zone of Germany. His Prince August Wilhelm, was condemned by a denazification two years of hard labor. His so Louis-Ferdinand, who is ma Grand Duchess Kyra, sister of sian pretender, is the Ford repr in Bremen. If you want to be there are 14 former kingdom duchies and principalities whic the Second Reich that can cla mate pretenders.

Also in Germany, in the Brit we find eighty-six-year-old ex-k dinand of Bulgaria, a sad old m of his sons, King Boris, died; t Prince Kyril, was liquidated by sians.

Brazil has its pretender in th of Dom Pedro of the House of Braganza, great-grandson of the peror of Brazil, whom title-cons de Janeiro society refers to pr "Our Prince."

There's also a Chinese pretend Henry Pu-yi, former Emperor and Manchukuo. But he's in captivity and no one has hear out of him these last few years. tender he has less than a Ch chance.

THE END

THE SMALL TIME

Continued from page 15

do," said Monte. "And you have."

Boy grinned, proud of his larceny.

"Well, call me in a couple of weeks," said Monte.

"Hey, Monte," said Boy, putting on his most winning smile, "you wouldn't let me have twenty bucks, would you?"

"That's right. I wouldn't."

"You gotta, Monte," Boy cried, changing his expression to despair. "I'm gonna get ulcers eatin' in them one-arm joints."

"Wait a minute," said Monte, remembering something. "If it's a good meal you want, I can take care of you. Come to lunch with me. I got two tickets to a testimonial luncheon for Chick Hagen."

Boy leaped to his feet, his face strained with incredulity. "A testimonial for Chick Hagen? He gives a performance that smells, the show flops, so they throw him a testimonial. I don't get it."

"When a man is down and out," said Monte quietly, "that's when he appreciates a testimonial. Chick's done a lot of things for a lot of people. They want to show him they haven't forgotten."

"Aaah," sneered Boy. "If they really wanna do him a favor, they should send him to a good psychiatrist. The guy was nuts to let that young wife of his talk him into comin' back to Broadway."

"Have you ever met Nancy Faricy?" Monte asked.

"What do I hafta meet her for? A guy fifty years old marries a dame of twenty. She wants to play on Broadway. Why do you think she married the old geezer? She needles him till he crawls back to Broadway and puts her in a show. Any schmoe could figure it out."

The agent was silent for a minute. "So you don't want to go to the luncheon."

"I never said that," replied Boy quickly. "Let's go."

They walked cross-town to the Waldorf and took the elevator up to the banquet room reserved for Chick's testimonial. Boy was instantly awed. The room was crowded with great names—not only theater people, but politicians, newspapermen, professional men and clergymen.

Boy looked around him with mounting enjoyment. He had never been in such big-time company before.

A flower-laden speakers' table stood in front of the room. In the toastmaster's seat was Nelson Estabrook, a tall, thin, blond man. On his right sat Chick Hagen. He was fat and gray and hunched; his complexion was sallow. He looked like a tired, old man—except for his face. He had a wistful, helpless-looking utterly innocent face. It was the look of a man who can never be discouraged. "Indestructible cheerfulness," a critic had once called it.

Next to Chick sat a young woman of truly astonishing beauty, even for Broadway. She had none of the vacuous perfection of the typical show girl. Her smile was a little too crooked to advertise toothpaste, but there was infinite good nature in it. Her gray eyes were not made up to look lavishly large, but they shone with intelligence.

Boy's eyes, roaming eagerly around the room, came to rest on this girl. He felt a sudden strange lurching sensation inside of him.

"What's the matter?" asked Monte, noticing Boy's slack-hanging jaw.

"Nothing," snapped Boy. He was angry at himself. He did not believe in love, particularly not love at first s that Nancy Faricy?"

Monte nodded.

"She's beautiful," Boy said re

"What's the matter with yo You falling in love or something

"You got rocks in your head Boy indignantly.

"Well, quit gaping at her."

"I was just thinkin'," Boy said it doped out right. Now that her, I'm sure. Can you picture a thing like that marrying that down Chick Hagen for love?"

"She's a nice girl," said Mont "and she loves him."

"Ha!" snorted Boy. "She's a l niver if I ever saw one. Look, ki around. I know a phony when I

"Eat your chicken croquett Monte.

A moment later Nelson E rose and rapped on his water g the room fell quiet. "Ladies an men," he said, "we are gathere pay tribute to Chick Hagen, to s how grateful we are for the hap has given us. I would like to ca His Excellency, the governor."

The governor rose and began of Chick Hagen. But Boy was n ing. He was staring at Nancy The lurching feeling was upon h This time he did not try to fig did he find it unpleasant.

ped up and seized Estabrook's lapels. "But that means the cast will lose a week's salary. Chick wouldn't want to be the cause of that. He'd worry about it, and right now you shouldn't give him anything to worry about."

Estabrook hesitated.

And Boy knew that he had him. "Honest, sir, I can do it. I worshiped Chick. I know all of his parts cold. Ask Monte. You'll believe Monte, won't you?"

Estabrook turned to the agent. Monte nodded. He turned back to Boy. "Well, if Monte says so—" He paused. "How much money do you want?"

"I'll work for nothin', sir," cried Boy. "I just wanna do it for old Chick."

Monte's eyebrows ascended abruptly.

"All right," said Estabrook, plainly impressed. "I'll do it. Be at the theater at five."

Boy grabbed him again. "Sir, may I make a suggestion? I think Chick would like it if he knew the show wasn't closin' tonight. Would you announce it now?"

"I'll tell him at the hospital," said Estabrook, exasperated.

"Well, sir," Boy argued, "they'll probably give him a sedative as soon as the ambulance gets here. Why don't you announce it now so he's sure to know?"

"Oh, very well. Come along."

With a quick, and unreturned, smile at Monte, Boy accompanied Estabrook to the speakers' table. Chick was sitting in a chair, pale and shaken. Nancy held his hand For a moment Boy felt himself falling again under Nancy's spell, but then Estabrook was making the announcement.

"This is Boy Malverne," said Estabrook, "who is going on tonight for Chick."

"Without salary," Boy whispered.

"Without salary," Estabrook added. "Boy asked me to let him go on and keep the show open until Saturday so Chick would not have to worry about making the cast lose a week's pay."

Chick reached for Boy's hand. "Thank you, son," he said weakly.

"It's nothin'," replied Boy and turned to Nancy. But at that moment the men from the ambulance arrived and Chick was carried out with Nancy and Estabrook following.

Boy rejoined Monte. As the guests filed out, they stopped at Boy's table to shake his hand and assure him that they would be present at the theater that night. Finally Boy and Monte were left alone.

Boy threw back his head and laughed with pure exultation. "I had you fooled, didn't I? Couldn't figure out why I said I'd work for nothin', could you? Well, now you know. All these big shots are gonna be there tonight to see me. And will I give 'em a show! I'll fracture 'em. They'll go outa there ravin' about me. Tomorrow I'll be up to my neck in offers. I'll be rollin' in dough. C'mon, Monte, I'll buy you a drink."

"I'll see you later," said Monte and walked out.

"What's eatin' him?" Boy wondered, but he did not wonder for long. There was work to be done. He spent the rest of the afternoon brushing up on Chick's part. When he got to the theater at five, he went over the part again for Estabrook, and then he went down to the wardrobe department to have Chick's costumes altered to fit him. At seven thirty he retired to Chick's dressing room.

He had just stretched out on Chick's couch when there was a knock on the door. "Come in," he called. Nancy Faricy entered.

"I didn't mean to disturb you, Mr. Malverne," said Nancy. "I came to thank you for what you're doing, and tell you how much Chick and I appreciate it."

The lurching sensation began inside Boy. First love at age thirty-seven is not likely to be a tranquil sensation. *Easy,* Boy told himself. *Take it easy. You ain't a schoolboy no more. Keep cool. You gotta use your head to get this baby. This is a shrewd customer. This ain't one of the dopes you been used to. This is a smart cookie. You be smart too.*

"Don't mention it," he said. "How's Chick?"

"Better, thank you. He's resting quietly."

Listen to her. Somebody would think she gave a damn if the old boy croaked. It takes class to four-flush like that. This is a high-type chiseler, this baby. Nothin' small-time here.

"Of course," said Nancy, "he'll never go on a stage again. The doctor absolutely forbade it. He said Chick had to go to a nursing home for several months. He recommended an inexpensive place up in Saratoga. It better be inexpensive," she added wryly. "We're broke."

If she thinks she's gettin' any dough out of me, she's got holes in her head. Still, I gotta admire her for tryin'. She's got plenty of nerve to go with that class.

"If we hadn't sold our place out in California," she continued, "we could go back there. But that's out. I'll have to try to get a part in a show so I can keep Chick in Saratoga. And I simply detest acting."

And a cat simply detests cream. You beautiful, double-dealin' wench. I love you. What a team we'd make!

"I begged Chick not to come back to Broadway. I was perfectly happy. We had a nice little house in Encino. We'd drive over to the beach twice a week. Sometimes we had a few friends over at night. I was so content. But Chick insisted that we do a play together."

If any other dame came in here and told me big lies like that, I'd hit her over the head with a sofa. But this one is wonderful. No wonder old Chick got took. What we couldn't do together!

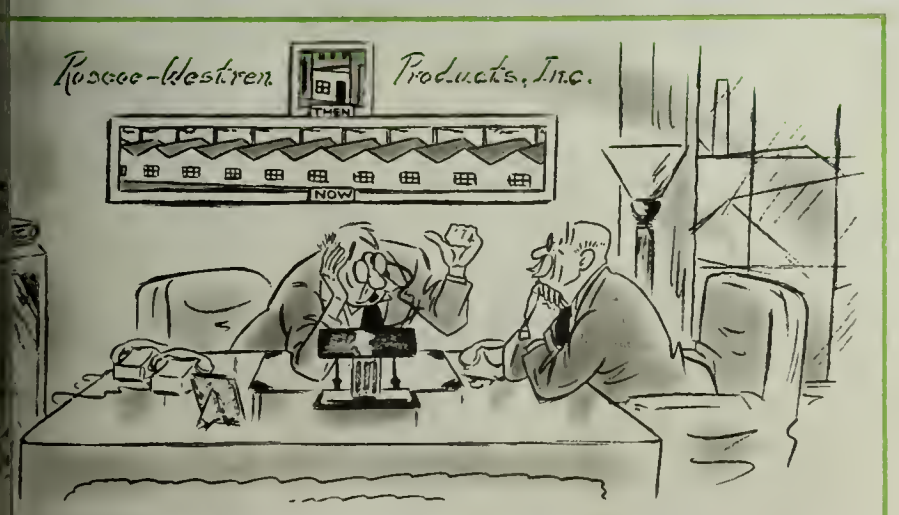
She gave a short, embarrassed laugh. "I'm sorry. I didn't mean to cry on your shoulder. Please forgive me. I've had an enervating day."

Enervating. Such classy words she knows. Classy, that's what she is. Classy and beautiful and phony as a seven-dollar bill. My type girl.

She offered him her hand. "Thanks again, Mr. Malverne, and good luck. I'll see you on stage."

A cool, firm handshake and she was gone. Boy sat down slowly on the couch.

IN a moment there was another knock on the door and Monte entered. He looked at Boy's dazed face. "What's the matter, Boy? You in love?"



"Yeah," said Boy, nodding his head deliberately. "Yeah."

Monte lighted a cigar before he spoke. "Boy, she's Chick's wife and she loves him, no matter what you think."

"What are you givin' me?" snarled Boy. "Loves him. In a pig's eye, she loves him. She married the old creep so he'd put her on the stage. Now she's on the stage, and she don't need him no more."

"You're wrong, Boy. Dead wrong."

"Listen." Boy prodded the agent's chest with his forefinger. "I can be wrong

about a lotta things. But when it comes to spottin' phonies, I can't miss. I know phonies, Monte. Don't gimme no song and dance about Nancy Faricy. I know what she is and I'm in love with her and I'm gonna have her."

The agent puffed silently for a moment. "Look, Boy," he said reasonably. "Tonight you're getting your big chance in show business. Nobody ever played to such a distinguished audience. You can move right into the big time tonight. Why are you thinking about this girl? You've got a job to do. You've got to go out there and make yourself a star."

"That's right," said Boy, his face lighting up. "That's right. I'm gonna make myself a star tonight. Then it'll be a cinch to get Nancy. A lead-pipe cinch."

"Boy—"

Boy was on his feet, striding back and forth in the small dressing room. "I ain't gonna miss tonight, Monte. I know all of Chick's business and I'm gonna do it all. But that ain't all. On the entrance I'm gonna walk like this—"

"Groucho Marx," said Monte as Boy demonstrated.

"And I'm gonna swing my cane like this—"

"Bobby Clark."

"And take off my gloves like this—"

"Walter Catlett."

"And pick my teeth like this—"

"Chaplin."

"And do that Leon Errol thing with the legs and the Frank Fay business with the coats and Bert Lahr's bit with the songs. And I know a character who can write me some S. J. Perelman-type gags. Sort of. Then there's some more stuff I can do from Red Skelton. I tell you, Monte, there ain't gonna be a dull moment."

"There sure ain't," agreed Monte.

"But clever, Monte. I mean I mix everything up so nobody recognizes it. I do little switches, combine things. See?"

"Yes," said Monte. "I see."

"What do you think?"

"I don't know, Boy. But I will say this: if anyone can do it, you can."

"First curtain," called a voice in the corridor.

MONTE watched from the wings as Boy went on with his potpourri of plagiarized tricks. At first the laughs were scattered; the audience was frankly puzzled by Boy's hybrid antics. Then the sheer energy of Boy's performance began to break down the audience. The laughs multiplied. They became howls and shrieks. Boy, encouraged by his reception, increased his efforts, and the audience responded by laughing louder. The more they laughed, the harder Boy worked; the harder Boy worked, the more they laughed. Everyone in the theater was helpless by the last curtain, writhing in his seat, tears streaming down his face, his laughter utterly out of control. Never in his long theatrical experience had Monte ever seen an audience so overpowered by a performer. He counted eighteen curtain calls for Boy at the end of the show.

Monte was waiting with a robe when Boy finally came off. He covered his perspiring body and rushed him to his dressing room. But before Boy could get out of his soggy costume, a riot of well-wishers had invaded the dressing room. Boy's hand was shaken until it throbbed; his back was slapped rosy. Not for more than an hour was Monte able to push and cajole the crowd out of the room so Boy could change.

Still they would not leave. Monte came back into the dressing room and told Boy, "They want to give you a party at the Stork. They're waiting."

"Fine," said Boy. "Go get Nancy."

"Now, look, Boy, she's had a tough day."

"She's had an *enervating* day," said Boy. "Now go get her."

Monte shrugged and left. Boy was dressed when he returned. "She coming?" he asked.

"Yeah," said Monte.

Boy grinned triumphantly and joined the throng in the corridor.

At the Stork Club the adulation continued. It was, in fact, compounded. For news of Boy's performance had spread through café society, and now he was being congratulated by great numbers of people who had not been at the theater.

Boy accepted all the praise gracefully, with smiles and murmured thank-you's. Not that he had been suddenly struck modest; it was preoccupation. Across the table from him sat Nancy. Her cheeks were flushed and her eyes sparkled; her frequent laughter bubbled merrily. Boy nudged Monte, who sat beside him. "Hey, Monte. If a dame was in love with her husband and her husband was layin' flat on his back in the hospital, would she be havin' such a good time?"

Monte poured himself another glass of champagne without answering.

It was dawn when the party broke up. "Go get a suite for me and you at the Waldorf," Boy told Monte. "I'm takin' Nancy home."

"Don't be a sourpuss . . . Let the kids cover you with sand"

COLLIER'S VIRGIL PARTCH

She readily accepted Boy's offer to escort her home. They hailed a cab and rode for a few blocks in silence, she leaning against the cushions with a smile of deep content, he examining her with a calculating eye. He slid his hand carefully across the seat toward hers, letting it brush hers as though by accident. She took his hand, held it firmly.

"Boy," she said, "you've made me very happy tonight."

"This is only the beginning, baby. I'm gonna keep makin' you happy from now on."

"I hope so," she said.

The cab stopped in front of her apartment as he was closing in for a kiss. He took her to her door, figuring how to maneuver her into kissing position again. It was easy. She turned at the door and kissed him—a hard, long kiss. "Thanks for everything," she said and went inside.

Boy rode in a glow to the Waldorf. Monte was in bed when he entered the suite. "Hey, Monte," he called.

"There's pajamas and a robe on your bed," said Monte.

"She kissed me."

"Go to sleep."

"So she loves her husband? That's a yell. This babe is mine, Monte."

Boy laughed and slapped Monte's bulging behind. Then he undressed, got into bed, lay congratulating himself for a little while, and fell asleep. . . .

It was late afternoon when Monte woke him. "Here's the papers," said Monte, throwing a heap of them on Boy's bed. "Read all about yourself. They say you're every comic rolled into one."

"They're right," said Boy shamelessly. He glanced through the extravagant praise in the columns.

"I was over at the theater this morning," said Monte. "There's a line two blocks long in front of the box office. Estabrook isn't selling any tickets, though, until he finds out if you'll sign a run-of-the-play contract. He offered $500 a week. That's his top price."

"You got the contract?"

"Yeah, right here. But listen, Boy—"

"Nuts!" Boy interrupted. "Cimme the contract."

"Now, wait a minute, Boy. I've got an offer for you to go into the Copa for $3,000 a week. And another one for the Colonial Inn in Miami Beach for $4,500. Metro wants you for a picture. Max Gordon wants you for a new play. Don't sign with Estabrook; you'll be losing a fortune. And you'll be stuck with him for as long as the show runs. That might be two years."

"Gimme the contract. I know what I'm doin'." He wrested the contract from the agent's unwilling fingers. He walked over to the desk and affixed his signature.

The phone rang as Boy signed. Monte picked it up. "Yeah? Just a minute, Mr. Estabrook." He put his hand over the mouthpiece and addressed Boy. "You sure you want to sign, Boy?"

"Of course I'm sure. Tell him it's all set."

"Yes, he's signed your contract, Mr. Estabrook. All right. Goodby." Monte hung up the phone. "He's sending a boy right over to get it. Listen, Boy, you can still change your mind."

"Look," said Boy patiently, "I know what I'm doin'."

"I know what you're doing too, Boy, but you're making a mistake. You're not going to get that girl, and you'll lose a fortune to boot."

"Don't make me laugh. How can I help gettin' her? While her husband is layin' up in a nursin' home in Saratoga—layin' up there at her expense, I might add—I'll be with her every night, remindin' her how nice it would be to get married to a young, healthy fella—who also happens to be a star."

"You're passing up a lot of dough."

"I got plenty of time to make dough," said Boy lightly. "I'm still a young man."

"Got yourself believing it," muttered Monte.

Boy was suddenly serious. "I gotta h her, Monte. That's the way it is. I d care how much dough it costs me. Th the perfect way to get her, and I'm go do it."

"I don't suppose this matters to Boy, but have you stopped to thi Chick? He loves her and he needs now, more than ever."

"You're breakin' my heart," said "Now, if you'll excuse me, I'm go take a shower."

He walked briskly into the bathro singing as he went. Monte sank gra into a chair and lighted a cigar. In a minutes a messenger came from E brook and picked up the contract. A tle while later Boy emerged from shower, pink and beaming. "Nice su ers in this hotel. I think I'll move in manent. Last place I was in had room and an adjoining mouse."

"Bob Hope," said Monte morose

"Who's he?" asked Boy. "Cheer Monte. Things ain't so bad."

"Boy," said Monte slowly, "yo making a mistake about Nancy. I not what you think."

"Get a new bit, will you, kid? Yo gettin' pretty stale with that one."

"It's the truth, Boy. You'll find

Boy whirled angrily on Monte. "W do you want, affidavits? You saw way she was actin' last night. What proof do you want?"

"You're wrong," repeated Monte bornly.

BOY glared furiously at the a There was a knock on the "Who's there?" shouted Boy.

"It's Nancy," came the voice outside.

Boy laughed silently in Monte's "Just a minute, baby." He put o robe and went to the door. "Come in," he said, taking her arm possess

"Oh, hello, Monte," she said. "I I'm not interrupting anything."

"Not at all, not at all," said Bo pansively. "Sit down."

"I can't, Boy. I've got to rush. saw them putting your name up in at the theater. I had to come and te how pleased I was."

Boy looked smugly at Monte patted Nancy's hand. "Your name in lights, too, baby. Just stick with

"Oh, no," she laughed. "Not I'm leaving the show next week."

"*What?*" said Boy, panic rising him.

"Yes, I'm leaving, thank heaven. test acting so. Chick and I are go buy back our old house in Calif This time we can really retire. We ever have to set foot on a stage either of us."

"Now, wait a minute," cried Bo grasped her roughly by the shou "What kinda fast riffle you givin Yesterday you told me you was broke. Now you're gonna buy a and retire. Where's all this dough c from?"

"But yesterday we *were* dead b said Nancy. "Chick put every ce had into the show. Yesterday the was a flop and we were going t everything. But today, thanks to the show is a big hit and we'll be m money for years."

The color drained from Boy's fa groped his way to a chair and sank

"That's swell, Nancy," said B smiling broadly. "Boy and I a lighted."

"Well, I must run now. So many to take care of. Thanks again, Goodby."

She left. Boy sat motionless chair.

Monte put on his hat. "See you Boy," he said softly and softly the door behind him. He walked elevator whistling. Monte hadn't tled in years.

THE END

The Famous Old Forester Mint Julep

A Favorite for 78 Years

● Throughout the years, drinks made with famous Old Forester Bonded Bourbon Whisky have been judged outstanding wherever they are served. But perhaps the most famous of these drinks is the Old Forester Mint Julep, a traditional favorite for 78 years.

Bottled in Bond
•
100 PROOF

Recipe for the Famous Old Forester Mint Julep

One teaspoon of sugar in just enough water to dissolve. Bruise three mint sprigs and place in 12 ounce julep cup with sugar mixture. Fill three fourths with crushed ice, and add 2 jiggers of Old Forester Bourbon Whisky. Stir gently, then add ice to fill cup. Trim the ends of the bunch of mint, and place stems down around the cup. Let stand until frosted.

DOES YOUR JOB MAKE YOU SICK?

Continued from page 13

causes of ills ranging from headache and upset stomach to asthma, diabetes and even heart disease.

The first thing the company psychiatrists had to overcome was an ancient prejudice about psychiatry itself. As a hang-over from days when the mentally ill were held to be possessed by devils, most employees felt shame and resentment at being sent to the "nut doctor." Managements feared to hire psychiatrists lest outsiders think their companies were infested with screwballs.

When Dr. G. H. Gehrmann, Du Pont's medical director, named Dr. Frederick Dershimer to the medical staff, the latter came as a plain doctor. Slowly, as emotional cases were directed to him by the medical department, his real function became known. When Dr. Walter D. Woodward came to American Cyanamid, he felt it necessary to "desensitize" the word psychiatrist with an explanatory article in the company's house organ.

At Metropolitan Life, Dr. Lydia G. Giberson, a motherly woman of forthright character, had to establish herself as a trustworthy human being before officers and employees accepted her as a psychiatrist and stopped sidling, shamefaced, into her office when they are in trouble.

These psychiatrists regard their work as primarily medical. Up to now, most of the psychiatry tried by industry (and largely abandoned) concerned itself with helping personnel executives screen out the emotionally unfit, determine aptitudes and guide promotions. The doctors at Du Pont, American Cyanamid and Metropolitan Life oppose the use of psychiatry for screening.

"If you do a good enough job of screening out the folk with emotional problems," one psychiatrist said, "you may get people that are as normal as hell. But you would have screened out people who discovered things like nylon. And you would screen out the men with neurotic drives for power who can carry a company to new heights."

Anxiety—A Symptom of Disease?

The company psychiatrists do no orthodox psychoanalysis but usually deal with a patient briefly in three or four visits, turning him over to outside medical aid if necessary. A careful physical checkup by the company medical department comes first, for some psychiatrists contend that early stages of tuberculosis, syphilis and even cancer manifest themselves by states of anxiety.

John Doe, the weeping executive, enters the office of the company psychiatrist. With the door closed behind him, he finds himself in a sanctuary where confidences are respected, and no judgments are passed. Here Mr. Doe can say the things he can't even tell his wife or his boss.

"I'm a failure, Doc," he begins. "I'm not half the man I should be."

"What makes you think you're a failure?" the psychiatrist asks.

"Look at me crying," says Mr. Doe. "If I were any good I wouldn't give in like this and blubber, would I?"

"You're an engineer, a technical man," says the doctor. "Technicians judge by results. Well, look at the results. You feel better, don't you?"

John Doe nods, relieved.

Out pours his story. As a child he had formed a picture in his mind of what a great engineer should be. He would be interested in his work 24 hours a day, and nothing about it would annoy him. When reality didn't fit the picture ideal, he felt guilty and depressed. The psychiatrist tried to boost his opinion of himself a notch, move it closer to what the man actually was.

The next step was to get Mr. Doe to modify his ideal, move it down nearer reality. This cured his free floating anxiety, and the migraine and stomach-aches into which he was trying to escape.

The solution of John Doe's troubles was to get them out into the open where he could fight them himself. Uncritical listening by the psychiatrist played an important part.

In dealing with the hundreds of John Does who troop through their offices, psychiatrists have learned four basic lessons:

A mentally ill man is better off if he stays on the job and is treated as a normal human being instead of as a problem. Unless, of course, he's *too* ill. "If you want to turn an emotionally sick person into a chronic case," says Dr. Dershimer of Du Pont, "say to him, 'You're nervous; take time off.'"

Change of Work Isn't Helpful

Patients who say they're unhappy because they're square pegs in round holes will generally get worse if shifted to other jobs. A man's job seldom makes him ill, say psychiatrists. It's his own emotional reaction to people and things about him.

Factory accidents don't happen by accident. Most accidents happen to emotionally ill, accident-prone workers who are literally walking accidents looking for a place to happen.

When a whole group of workers is insecure and jittery, it might be well to have a look at the boss. Up the line somewhere there may be an insecure, emotionally ill supervisor who is a focus of contagion, a carrier of mental ill health for those below.

At Du Pont, where research has paid off with such discoveries as nylon and neoprene, some top-flight research executives give their emotions the same detached going over that they apply to the contents of a test tube. It's done in one of the most unusual series of meetings known to American business—a Seminar in Emotions.

Around the conference table fortnightly gather a dozen of Du Pont's Rayon Technical Division executives who hold more than 100 chemical patents between them. The sprightly sandy-haired man with the skeptical look is Dr. William Hale Charch, who made Cellophane moistureproof. The fluent man with the round face is Hood Worthington, who helps advise the Atomic Energy Commission.

In the group are Andrew Buchanan, the division's boss, and Dr. Lester S. Sinness, a six-foot-four giant who likes to deflate scientists' pretensions. Dr. Dershimer, the psychiatrist, looks like a chunky plant foreman, and by abjuring the jargon of his psychiatrist's trade, he even talks like one.

Today, the emotion before the seminar is anger. "What does anger do for you—or to you?" someone asks.

The psychiatrist gets the discussion around to fundamentals. "What are emotions anyway?" he wants to know.

The seminar chews on this for about an hour and, prodded by the psychiatrist, concludes that emotions are the nervous energy that sparks us. The psychiatrist explains that when emotions are blocked and turned inward, mental and bodily ills follow.

"Do you mean it's all right to let yourself go and get mad?" one executive wants to know.

"As mad as you like inside," the psychiatrist says; "as long as you control your behavior."

"Control your behavior but no emotion?" a skeptic argues. "It ca done."

"I think Doc is right," an exe chips in. "Look at the war. This w first war in which it was generall sidered all right to be afraid. Th chiatrists said so. The boys let emotions go, but controlled their ior. Performance paid off, not fee

"I wonder if we haven't been more emphasis on how our peop than on the way they perform?" s executive.

"I'll bet that's what I've been wrong with my children," says a "They misbehave to beat hell, bu ward, if they say they're sorry, all given."

The executive with the misbe children took his seminar lesson with him and laid down the law: " care how you feel inside. But you to behave." To his amazement, th line not only cleared up his childr havior, but his allergy troubles, some experts say are due to em disturbances.

Other ideas radiated from the s "Performance reviews" were in for staff workers. Cut out were on loyalty, ambition and attitud stead, only performance counted a year the executive tells subo individually that work is good, too poor to pass. Subordinates tell the boss (or are supposed to he has succeeded or flopped. Th is written up and filed as a part men's company records.

The seminar once took apart admonition: "'Stop worrying." entists, the men looked for cases port the idea that people stop v when told to do so by friends or They couldn't find any.

"Go ahead and worry," the executives decided. "You'll eith your way out of your problem c nothing can be done about it trying."

Noting that Hollywood p boast about their stomach ulc seminar member asked, "Do ulc ing emotions bring success, or c cess bring ulcers?"

That set off a half dozen ses "What is success?", which wan into "Who is secure?" and w with "Do I dare be ridiculous?"

The Seminar Defines Suc

Success, the seminar conclu state of mind in which you can r thing that comes along in a ma is satisfactory to you. In an world, that is about as secure a be.

Since a secure and emotionall boss helps keep a whole plant emotionally stable, the Du Pon has turned out to be excellent p psychiatry.

"I've long noticed things like one psychiatrist. "I go to a hos I am met by a cheerful doorma and find a mentally healthy m head of that hospital. The wh reflects his personality. Durin even troops reflected the cha their better commanders."

When a company with an e safety record had a series of ac one plant, the management cal company psychiatrist. He fo tery group of employees who ness at working with dangerou contrasted sharply with the s and secure work done by em other plants.

"Look up the boss!" the p decided. In a week of gums

n the cause—the superintend- plant. Insecure, the superin- ad made a shambles of his with his men, resorting to a ck of clever tricks and schemes s people submissive."

treme insistence on authority, iatrist explained, is usually to in adults who were submissive s as children. When the su- nt was straightened out emo- he accident rate in his plant

ts aren't always the boss' fault. ases out of five, psychiatrists hey can be traced to an "acci- " repeater. To Dr. Lydia Gib- letropolitan Life, *"an accident le symptom of emotional dis- temporary or permanent."*

ident-Prone Employees

ctors say they can even predict ave accidents. The company t's job is to find the accident- ker before the accident hap-

e accident-prone as well as disturbed workers, psychia- ise foremen and managers, normal!"

e year of service, the Du Pont grants full pay for illness up to ths. Other companies have nerous provisions. Since the will not suffer financially, cticing doctors tell "nervous" ffering from fatigue, anxiety ison to "take a rest; go away ."

appens?" asks Dr. Dershimer t. "The patient already feels d. Then his company, which p to, also says, 'We believe good, and we're willing to pay y away.' You give the man ental unrest. The longer he's worse he's likely to get."

titude is neither as radical nor iled as it sounds, Dr. Wood- merican Cyanamid points out. man on the job (unless his case gone) is to apply occupational ealing through work—more curative than basket weaving. For the emotional fugitive from reality, there is no greater reality than a productive job.

When company doctors could find no organic reason for the headaches and vomiting spells of employee Florence Jones (that is not her name) they sent her to the psychiatrist. Protesting that she was not insane, only exhausted from overwork, Florence Jones, a secretary, asked for a rest.

Florence, it turned out, had come recently with her husband from the Southern town where she was born. Inside, she was a caldron of boiling emotions: rage at being uprooted and moved to an uncongenial (to her) Northern industrial town, and guilt at feeling outraged.

"It's wrong for a wife to feel angry about leaving her home town for her husband," she said.

"Go ahead and feel angry," the psychiatrist assured her. "It's human to be angry, or afraid. Trying to curb such emotions is like trying to curb steam or electrical energy. We can and should control our behavior. That's one thing. But rooting out your emotions and feeling guilty about them is another."

The secretary stayed on the job. With her new understanding, her feeling of guilt and shame vanished, and with them her headaches and exhaustion. Treating her normally had worked the cure.

"Treat 'em normal," worked with the returning veterans, too.

Concerned over the ex-G.I.s' possible emotional problems, many companies prepared elaborate programs of special treatment to "fit the veteran" into civilian life.

At one company, personnel experts prepared a film, They'll Be Coming Back. They wrote a detailed Vets' Manual, instructing foremen how to greet the veteran "cordially," how to watch for "nervousness," "unusual fears," "self-pity," and even for evidence that "he lives just for today." Experts set up seven 90-minute sessions to teach supervisors how to handle vets.

Hard-bitten and earthy plant managers had their doubts. Asked how he would greet a returning vet, one plant man said: "Hello, you old—!"

The plant men took their doubts to the company psychiatrist, who heartily endorsed this sort of greeting.

"Why treat the veteran as a special problem?" he asked.

The company dropped its elaborate plans. The vets turned out to be normal Joes after all.

"One of our most persistent stumbling blocks in controlling mental ill health," a company psychiatrist told me, "is the well-intentioned supervisor who plays psychiatrist and treats subordinates as problems instead of as normal folk from whom he should get a full day's work.

"One of our boys was discharged from the Army as a psychoneurotic," the psychiatrist recalled. "He took the attitude: The whole Army thinks I'm nuts. When he returned to his job, the foreman asked him daily how he felt, if he needed any special help. The boy grew shyer, then morose, and finally landed in my office. We convinced the foreman that the boy would snap out of his sulk when his boss began to expect normal behavior from him. He would accept this attitude as meaning that his boss regarded him as normal. It worked."

When an employee lays his burden of fatigue, anxiety and depression before the company psychiatrist, he is most likely to say, "It's my job, Doc. I'm just a square peg in a round hole. If I could only get a transfer to another job!"

Cure Was Worse Than Ailment

One company psychiatrist studied the careers of patients who had been transferred because their jobs didn't agree with them, and he found that transfers seldom solved mental ill health. To keep a half-dozen employees happy, a foreman transferred them from night production work to day maintenance chores. Then everybody became unhappy. Management found the shifted workers the most discontented group in the plant. The union complained that the shifts had disregarded seniority and were, in effect, a reward for poor work. The psychiatrist found the shifted men were becoming tougher emotional problems.

"You're creating spoiled children," the psychiatrist told the management.

Checking back on his records, he found that about 90 per cent of emotional troubles didn't stem from the job at all. Of five patients who complained about their jobs one day, the psychiatrist found that the following were the true causes:

A secretary disclosed that her boy friend had stalled her for so long she had become terror-stricken at the prospect of losing him.

A young salesman said two girls were in love with him. He was ashamed that he couldn't make up his mind.

A foreman's wife was so depressed that she threatened to kill their two children. The foreman was sick with the feeling of guilt that he was responsible.

A patent lawyer whose mother had died of a heart attack and whose father was a paranoiac feared that he would inherit both diseases.

Flight to another job, some psychiatrists insist, is a flight from reality. When emotions of fear, anxiety and shame that have been churned up by home problems are smoothed, employees become round pegs in round holes after all.

The use of psychiatry in industry is the biggest peacetime experiment in mass mental health. From this experiment will radiate influences on all medical care so that doctors will look for the real causes of physical ills. This experiment may affect the relations between husband and wife, and between parents and children. To the many half-happy, distracted products of our civilization, mass mental health will give a chance for the fullest use of the capacities and the talents with which they were born.

THE END

SPORTING ODDS

Big-league baseball clubs don't usually pay opposing pitchers defeating them, but the Washington Senators did on one occa- n. It happened in August, 1938, when the Nats gave Pitcher s Ferrell his unconditional release. With his walking papers got ten days' pay. Ferrell immediately signed with the New k Yankees and on August 19th, with the ten-day period still xpired, pitched against his former teammates. In an eleven- ng tussle, Ferrell pitched the Yanks to a 6-5 win. It was prob- y the only game in major-league baseball in which the ning pitcher was paid by both teams.

Collier's believes...

...NOW IT'S UP TO EUROPE

IF PAUL G. HOFFMAN, the automobile manufacturer who is now Economic Co-operation Administrator, is as wise as his words, the Marshall Plan has good chances of success.

Soon after he was appointed, Mr. Hoffman said that the ECA would "lean toward those projects which will get reasonably quick results in productivity." In plain words Mr. Hoffman plans to use American dollars to help people who exhibit a very active determination to help themselves by work. Sounds sensible to us.

Already remarkable progress has been made in increasing production in various European countries. Coal production in Britain and on the Continent has notably expanded. Steel production in north British centers exceeds all previous records. This year's food crops still depend on the weather, but if nature smiles, food production will be increased. The British and other countries are living on lean rations in order to provide products for export. France, Italy and other European countries are already discussing the details of a customs union in order to facilitate the exchange of products. Europe, outside the Russian zone, is giving tangible evidence of a determination to increase production.

Nobody can guarantee the success of the Marshall Plan. If Russia wants to start an unprovoked war of conquest in Europe, Russia is just as free to do so (God forbid) as was Hitler nine years ago. But if Russia is not determined to start a war, the Marshall Plan well administered provides the best hope for the achievement of peace.

However we look at it, the Marshall Plan is one of the remarkable episodes in modern history. Just a year ago Secretary Marshall in the course of a speech at Harvard College made a remark that set in motion vast forces. General Marshall observed that European hunger and need would undoubtedly appeal to American sympathy and charity. He surmised that we would give, and hoped that we would give wisely, so that Europe might be self-sustaining. General Marshall also said that Europeans might well try to increase their own production.

Ernest Bevin of Great Britain read that speech and called up Georges Bidault of France. They invited other European countries to meet and make some plans for a quick recovery. Russia was invited and for a time seemed likely to co-operate. Then Russia, for reasons never clearly divulged, decided to oppose the Marshall idea for European self-help and recovery.

Within less than a year the American people considered, debated and decided that the Marshall idea was good and useful as an insurance policy against war, as well as a plan of international aid and good will. So Congress has authorized loans of $6,030,710,228 to nations struggling to get back to peaceful, normal living. That act of international good will is unique in history.

Paul Hoffman, who has been chairman of the Committee for Economic Development as well as a successful manufacturer, will administer this huge fund.

So we have quickly set into operation this tremendous effort to use American capital to help Europeans recover their own energies and their own productive powers. We don't expect even the loans to be repaid. All we can get out of it is a chance to be at peace with the world. The only magic in the Marshall Plan is the commonplace magic of work and thought and good will. It can fail as other nobly conceived efforts have failed. We hope we succeed. But succeed or fail, we have embarked upon a great enterprise of which we, and those who come after us, can always be proud.

—W. L. C.

. . . DISTILLERS ARE GETTING SMART: Ever since federal prohibition was repealed in 1933, most of the nation's distillers and brewers have been shy and timid creatures. They have cringed when the Drys have yelled at them, as the Drys are still doing. They've preferred to clam up rather than sass back at even the most blatant of the dry fabrications about alcohol.

We're glad to note that these apprehensive gentlemen are turning at long last. The Licensed Beverage Industries organization has budgeted $180,000 for a seven-month advertising campaign to put reliable, factual information on the drink industries before the public.

No frontal attacks on the Drys are planned. But at least these advertisements will concentrate on such significant matters as the enormous taxes paid by the beverage industries (almost $2,500,000,000, for example, in federal taxes alone for 1947); encouragement of moderation in the use of alcohol; the truth about the grain consumed in distilling and brewing, as opposed to the Drys' wild d tions on this subject; and what the liquor in itself has done since repeal to support law forcement.

The general idea, according to one spokesm to "present a few positive points and depend o inherent intelligence of the public to draw conclusion."

All of which leads us to feel that the li wine and beer people are finally getting s The way to fight fanatics is to stand up to before the bar of public opinion with facts figures; pull no punches; make no apologies. most encouraging, we think, to see the bev industry make a start, though a mild and servative one, in that direction.

. . . YOU NEEDN'T BE BORED: Princess Ire Greece blew into this country recently, was viewed by some New York reporters, and i course of the conversation got the followin marks off her mind: "I think everybody is int ing . . . Just people I adore. I have never stupid person in my life."

That can be taken with a mite of salt; but ju same, we believe that Princess Irene has some there.

It is a fact that if you're determined to be ested in the people you meet or associate you'll find most of them interesting to you. dom is not a one-way affair. There has to be son who is bored before some other person c a bore.

As for stupidity, it's more or less a relative A man can be monumentally stupid or uninfo about philosophy, for example, but he can same time be an expert mechanic or lawyer clear physicist. If you can get him to talk on ever subject he knows, you won't find him s and he'll find you an understanding, inter person.

All that, we imagine, is about what Pr Irene meant in the clipped remarks above q Anyway, it's a pleasure to pass them on to th tomers for what use they may make of them we'd bet the lady herself gets a big and ically continuous bang out of being alive. we're not boring you.

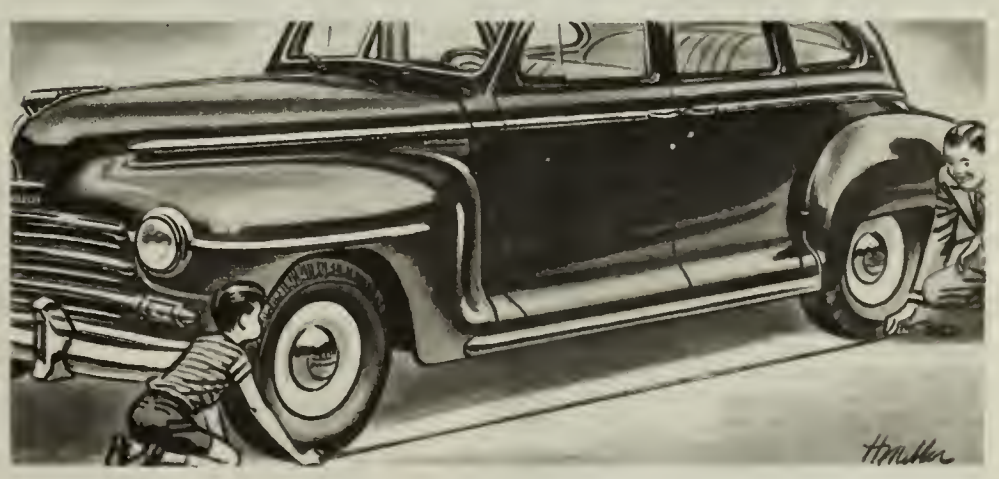
ook what PLYMOUTH buyers get

VALUE FOR VALUE, COMPARE THE ENGINEERED COMFORT OF PLYMOUTH'S FAMOUS AIR-PILLOW RIDE

Airfoam Seat Cushions, available on Special De Luxe models at moderate additional cost, to give you a buoyant, relaxing ride. You sit on millions of tiny air cushions that soak up the shocks of the road. The seat restfully conforms to the shape of your body.

Look → **Super-Cushion Tires on new, wider Safety-Rim Wheels.** Only Plymouth in the lowest-price field offers you as *standard equipment* these fatter, bigger, low-pressure tires that absorb road impacts from sides *and* below. They put a pillow on every highway—you ride more comfortably.



Safe-Guard Hydraulic Brakes. Easy does it! Pulling up to a light, or in emergency stops, when action must follow thought in a split second, Plymouth hydraulic brakes obey instantly. The gentlest foot pressure finds a smooth, *controlled* response. Braking power is 32% more effective.

Look → **Floating Power Engine Mountings.** Another big factor in the comfort of the Plymouth ride. The powerful Plymouth engine is insulated from the frame by patented mountings of live rubber bonded to steel. So smooth you can place a glass of water on the hood and not a drop will spill!

Hotchkiss Drive. A Plymouth feature of long proved success. The Hotchkiss Drive adds to your comfort by permitting rear springs to cushion the shocks of starting and stopping. And it lessens unsprung weight—another aid to comfort.

Look → **117" Wheelbase.** Plymouth is the *only* car in the lowest-price field with a wheelbase of this length. There's more *base* to ride on—all passengers travel *more on the level* and ride more comfortably doing so, whether occupying front or rear seats.

There's a lot of difference in low-priced cars—and these are only a few of the great Plymouth features that make the difference. Your Plymouth dealer will be glad to tell you of more.

PLYMOUTH BUILDS GREAT CARS

PLYMOUTH BUILDS GREAT CARS...GOOD SERVICE KEEPS THEM GREAT

Your nearby Plymouth dealer will provide the service and factory-engineered parts to keep your present car in good condition while you're waiting for your new Plymouth.

GREER GARSON · WALTER PIDGEON

in

"JULIA MISBEHAVES"

PETER LAWFORD · ELIZABETH TAYLOR

CESAR ROMERO

LUCILE WATSON · NIGEL BRUCE

MARY BOLAND · REGINALD OWEN

Screen Play by WILLIAM LUDWIG, HARRY RUSKIN and ARTHUR WIMPERIS
Adaptation by GINA KAUS and MONCKTON HOFFE. Based on the Novel "The Nutmeg Tree" by MARGERY SHARP

Directed by.....JACK CONWAY
Produced by.....EVERETT RISKIN

We've just received the most side-splitting surprise of our movie-going career . . . and we hasten to declare that we are filled not only with mirth but with admiration. For we have just seen Greer Garson, with a wicked twinkle in her eye, shed her famous dignity to become one of the most delightful comediennes you could hope to see. Don't miss seeing her, with Walter Pidgeon, in M-G-M's hilarious new comedy hit, "Julia Misbehaves," adapted from Margery Sharp's famous best-seller "The Nutmeg Tree."

Greer Garson gives an uproariously funny performance as a woman who wouldn't be done wrong. She holds her creditors at bay in a bubble bath . . . joins an acrobatic troupe in tights . . . tries frantically to be a lady and an adventuress at the same time . . . and is found in assorted pairs of arms. But somehow Walter Pidgeon's seem to fit best.

You'll be delighted with handsome Walter Pidgeon's performance, too. As a suave, high-hatted clown, he reaches new heights in comedy characterization.

And with this wonderful pair is the most brilliant supporting cast in years. There's Peter Lawford, Hollywood's brightest young romantic star, giving a gay and charming performance as the lad who loves Elizabeth Taylor, whose fresh young beauty and sweet, spirited performance are completely captivating. And you'll laugh and laugh again at Cesar Romero as the man on the flying trapeze—who lands in Greer's net. Besides these great performers, there are Lucile Watson, Mary Boland, Nigel Bruce, and Reginald Owen . . . and every one of them will have you in stitches.

The director of this merry film is Jack Conway, veteran Hollywood perfectionist. Everett Riskin, noted for a long list of dramatic hits and comedy riots, is the producer.

"Julia Misbehaves" is everything a great comedy should be and can be—with all the gaiety, sparkle, and charm that spell great entertainment.

We've outgrown the old size, too

The telephone facilities that seemed big enough before the war are not nearly big enough for now. So we've been hard at work on our biggest expansion program.

Just in the past year, we started work on 1500 new telephone buildings or additions to present buildings. In the three years since the war, we've added nearly 9,000,000 new Bell telephones. And still more are needed!

It shows how the Telephone Company must keep growing to meet your needs. To serve a nation like ours, the Bell System can never be too big.

We're going full speed ahead with this expansion program so that everybody, everywhere, can have more and better telephone service than ever before.

BELL TELEPHONE SYSTEM

Frankie Parker is one of the few non-Californians ever to win the national junior tennis title. He is a Milwaukee native who migrated to Los Angeles

TENNIS' RHYTHM BOYS

BY BILL FA

ONLY two non-Californians—Frank Parker and Buddy Behrens—have won the National Junior tennis title since 1932. Why the monopoly? What have Californians got that youngsters in other parts of the country haven't got? Rhythm, mostly. Rhythm and speed.

"Court surface is the big factor," Bobby Riggs insists. "Californians grow up on hard courts. Every ball bounces absolutely true. They develop smoothness and timing—the attributes which produce speed.

"Youngsters in the East, Middle West and South play mostly on clay—a slow, unpredictable surface. On clay, the bounce of the ball varies with the weather. On damp clay, the ball skids. On dry or dusty clay, it takes a long slow hop. You have to make constant little stroke adjustments to compensate.

"Consequently, few clay-court players attain the smooth power you see in Budge's backhand, or Kramer's forehand. However, hard-court players like Budge and Kramer, once they get their timing down pat, can make the switch to clay or grass without any trouble. Once you get the rhythm, you never lose it."

The Californians who dominated the juniors—Budge, Riggs, Hunt, Schroeder, Kramer—have dominated American tennis. That's why talent scouts will be watching the impending National Junior tournament at Kalamazoo, Michigan, college. Chances are the winner will be the Davis Cup hope of 1951.

The form sheet says Tony Trabert of Cincinnati has power, Dick Mouledous of New Orleans (the '47 finalist) has experience, but either George Gentry of La Jolla or Jerry de Witt of Vallejo probably will win. George and Jerry are from California. They've got rhythm.

LARCENY IN THE OUTFIELD

Tris Speaker—the fellow who used to cover center field like a circus tent for the Boston Red Sox and the Cleveland Indians—visited Manager Mel Ott on the New York bench in Phoenix last March. Naturally, the conversation got around to the Giants' pitching, or lack of it. Mel remarked he'd like to find a third reliable starter—somebody to follow Larry Jansen and Dave Koslo.

"Maybe," Speaker said, "you'll find that extra starter out there." Tris waved toward center field. Whitey Lockman, Bob Thomson and Willard Marshall were spinning and running—practicing the almost forgotten outfield art of chasing back after fly balls.

"You mean make a pitcher out of Thomson?" somebody asked.

Speaker shook his head. "About 85 per cent of your outfield hits drop in front of the outfielders," Tris explained, "because the lively ball has backed them up against the fence. But Thomson and Lockman are so fast they can play in close—say 10 feet closer than average—and still backtrack to grab balls that go over their heads. That 10-foot edge could cut the percentage of short hits that fall safe. Maybe those kids will snag enough singles and doubles to make winners out of average pitchers."

Thomson made Speaker's analysis look good during the Pirates' first Polo Grounds invasion. Dixie Walker was on third base, and Jansen was protecting a 2-1 lead in the seventh, when Danny Murtaugh punched a liner into left center. Thomson stabbed the liner on the run and threw Walker out at the plate.

Murtaugh really "singled" into a double play. Thomson had edged forward to within 100 feet of second base—daringly close by modern fly-retrieving methods, but the normal position for Speaker when he was the best of the center fielders around 1920. In pre-Ruth days, Tris played close enough to the infield to cover second base in sacrifice-bunt situations.

Manager Ott applauded Thomson's thievery, but worried when Kiner came to bat. "Imagine," Mel remarked later on, in the clubhouse, "Thomson and Lockman both played Kiner close—practically on the backside of second! I waved Tommy back, but he just pointed his glove at himself with a surprised who-me look and moved in another foot. I had to remind him that Kiner smacked 51 homers last year!"

In rebuttal, Thomson observed: "By playing close I can catch four or five singles a week. There are only a few hitters who can drive the ball so far I can't reach it. And when they smack it over the fence it doesn't matter how deep you play."

Rival managers credit the Giants' surprisingly steady early-summer pitching to this larcenous outfielding by Lockman, Thomson and Marshall. "You can't keep a rally going on those kids," Cincinnati's Johnny Neun commented. "You have to drive the ball right in the slot to get a hit."

ROUGHRIDING ARCARO

The Jones Boys, Ben and Jim surprised a good many people w they picked Eddie Arcaro to ride C tion after Jockey Al Snider was lost a fishing trip off the Florida keys. Hialeah last winter there was pers ent talk that Arcaro would never w for Calumet again. Reason: Ec shoved Calumet's Armed aro more than a little, while riding Ass in the $50,000 Widener.

While Arcaro was committing sault and battery on Armed, outsi El Mono slipped home in first pl After the race, Jimmy Jones was as if Arcaro apologized for the rough ing. Jimmy shrugged. "We get si seven apologies from Eddie e year."

Arcaro salts his conversation w double negatives—expressive and quently humorous. Once, descrit a popular woman owner, Eddie marked admiringly, "She's a hi class lady. She never has nothin say." Another time, asked for ass ance by an eager apprentice, Ed gravely advised, "Never get beat no noses." Eddie's little pearl of sp wisdom ranks with Walter Hag helpful hint to a young golf Warned Walter: "Never miss a inch putt on the home hole."

KEEP UP WITH THE WORLD

BY FRELING FOSTER

A strange tale about an egg-stealing method used by rats has been published, with drawings, in many countries since the 13th century. And the story is still widely believed, although it has never been proved by photographs. To transport an egg to a distant burrow, one rat, it is claimed, gets on his back and clutches the egg tightly with his four feet while his partner pulls him by the tail—against the lie of his fur and under and over any kind of obstacle.

The hundreds of strangely named towns in the United States today include Accident, Maryland; Anvil Location, Michigan; Assawoman, Virginia; Birthright, Texas; Boxspring, Georgia; Burnt Corn, Alabama; Cuckoo, Virginia; Doctor Phillips, Florida; Dime Box, Texas; Soso, Mississippi, and Wounded Knee, South Dakota.

Among the Ouled Naïls, a tribe in northwest Africa, the girls are not eligible for marriage until they have earned a considerable dowry. So between thirteen and eighteen years of age, they serve as entertainers in the native cafés of Algiers, Tripoli and other Mediterranean ports. As the dowry grows, they display it in the form of gold coins worn as ornaments, totally disregarding the danger of robbery.

One of the most daring swindles in American history was that perpetrated by Charles A. Ponzi through the Securities Exchange Company which he opened in Boston in 1919. Claiming he was making huge profits by dealing in international postal coupons, Ponzi offered a return of 50 per cent on any sum invested with him for 90 days. Before he was stopped, seven months later, through the disclosure that the few demands made on him for interest had been paid out of the mounting capital, he had taken, from some 50,000 investors, about $18,000,000, half of which was never found. After serving two prison sentences Ponzi was deported to his native Italy in 1934. Today, half paralyzed, he is a charity patient in a hospital in Rio de Janeiro. *—By Mary Ford Roslyn, Long Island, N. Y.*

One of the strangest situatio ever saved the life of a conc man arose as a Negro, Jim W was about to be executed in th ida state penitentiary at Rail 1926. After he had been strap the electric chair and the blac placed over his head, both the and the sheriff on the case ref pull the switch, each claiming the duty of the other. At the their futile and heated arg which lasted 20 minutes, W was unstrapped and returned cell. For being subjected to t ture, his sentence was comm life imprisonment, and eigh later, for saving two lives on a farm, he was rewarded with pardon.

Probably the oddest incic American railroad history v mysterious disappearance of frigerator car from the cent long freight train during a r trip of 25 miles in Pennsylvan night in 1898. Until the c found by a farmer three wee concealed by a group of tree foot of an embankment no on imagine what had happened While rounding a sharp, steep the car had become uncoupled ends and, after it had topple the rails, the rear section of t caught up with and coupled the front section.—*By Gustav Mt. Vernon, N. Y.*

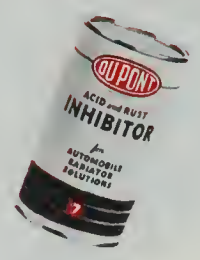
Radiator rusted— Vacation busted

Clean out rust with

DU PONT Cooling System CLEANSER



Before your engine is ruined by overheating, clean out rust and scum in the radiator. Just pour in a can of DU PONT COOLING SYSTEM CLEANSER, run the engine 30 minutes or more, then drain. No reverse flushing is necessary. It dissolves rust—cleans thoroughly, quickly, and safely.

Then keep out rust with

DU PONT Acid and Rust INHIBITOR

After cleaning out the radiator, you can keep it free from rust all season by pouring in a can of DU PONT ACID AND RUST INHIBITOR. This neutralizes the acid and prevents damaging rust from forming.

Avoid radiator leaks with

DU PONT Cooling System SEALER

You can stop leaks quickly and securely—and make cooling system LEAK-PROOF—by pouring in DU PONT COOLING SYSTEM SEALER. It will not clog the radiator.

DU PONT
REG. U.S. PAT. OFF.

OKAY

NOKAY

THE dossier on the Jekyll-Hydeish gentleman above is as follows:

Born: Fred John Balk, Aug. 30, '05
Profession: Cartoonist
Height: 6'1" (Slightly higher in mended socks)
Weight: 210 lbs. (Slightly less when Cartoon Editor Wms. isn't buying)
Reach: Table length
Chest: Normal—for a man
Expanded—when bragging
Waist: Beltless, suspender type
Education: American grade; Chicago Academy Fine Arts; various ateliers around Dill Pickle Club & Bughouse Square in Chicago

General

Has cartooned for past 10 years; except for 3½ years spent in service. Enlisted in Navy in May, '42, jumped into sea of matrimony six weeks later. Now, with wife chained to Oar No. 2, paddles own free-lance galley ship. No children; deeply engrossed in raising small mustache; if it can be made to behave, may tackle a baby next.

Remarks

Has two sides to nature: the "Okay" and the "Nokay." Nokays cause him to retire to his lair, make himself up as illustrated above, and ponder the question: "After arms and legs have been removed from humor editors, should torso be filed under finished or unfinished business?" Nokay side also takes care of friends who rush up crying: "I saw something today that would make the funniest gag for you!" The Okay side is accounted for by the cartoon on p. 48.

THE story Flannagan's Last Resort (p. 18) springs out of Nord Riley's early exposure to the northern Minnesota lake country. Nord himself was born in Wyndmere, North Dakota (population 500), where the land was so flat Riley claims water couldn't pull itself together for a stand. "We swam in the railway ditch, then went home and washed the mud off," he tells.

"For a fish we had lutfisk, a Norwegian yuletide horror with one of the most powerful odors known to man. Strangers should approach it with a bad cold. Lutfisk turns silverware blue-green, but all it does to Norwegians is make them want to chase Swedes." This sort of thing drove the Rileys to Minnesota resorts each summer. "Flannagan is about a man pursuing a woman; I should have known better. It is basically unnatural and contrary to the facts of American life," continues this Gaelweigan. (Chaise longue appearing in illustration for Flannagan's Last Resort (pp. 18-19) courtesy of C Stupell.)

Since the war Riley has liv Manhattan Beach, California, a town perched on a sand dune front beams on the Pacific, its buried in Los Angeles smog," unnative son reports. "My little ment has a view every day but day, when I see the Pacific throu trap door of a small boy's unde as it dries on the patio."

How to be Coffee-Happy

(on a hot summer day!)

Good iced coffee starts with good hot coffee! You get a rich, full-bodied brew every time . . . with a General Electric Tastegard Coffee Maker.

t a joy to have coffee the way *you* like it—*perfect* coffee—day after

d you can, simply by switching on a General Electric Coffee Maker.

r General Electric has found the way to take the guesswork out of ng coffee. The result is that each and every General Electric Coffee er brews your coffee under *scientific control.*

e secret is *Tastegard*—a tiny but important hole in the stem of the r bowl.

And ONLY General Electric has it!

egard controls exactly the temperature at which your coffee brews. r doesn't boil up the stem until it's at just the right heat to make a mellow, and full-bodied brew.

ery General Electric Coffee Maker, no matter how little it costs, has egard. And *only* General Electric has this wonderful, sure-fire way to perfect coffee!

d think of this! Tastegard controls the brewing of your coffee exactly, her you make two cups or eight, or any amount in between. With a ral Electric Tastegard, *you need no other coffee maker.*

ere are five models to choose from, at prices to suit your purse. See two and the other sparklingly beautiful General Electric Tastegard e Makers at your retailer's.

Lowest-priced, all-automatic glass coffee maker there *is!* $17.95

Press a button . . . that's all you do! And this push-button marvel makes coffee *automatically.* Keeps it piping hot *automatically*, too, until you pour out the last delicious drop. No watching—to make 2 to 8 cups of heavenly coffee!

A complete G-E Tastegard Coffee Maker for only $6.95

Two-to-eight-cup coffee maker, *plus* chromium stove, *plus* plug-in cord. Adds up to one of the lowest-priced *complete* coffee makers sold! No extras to buy! Like all General Electric Coffee Makers, it has wide-mouth bowls for easy cleaning . . . and Tastegard, of course. *General Electric Company, Bridgeport 2, Conn.*

Prices subject to change without notice.

G-E Tastegard Coffee Maker brews 2 to 8 cups . . every cup perfect, every time!

It lifts the limit on luxury

with DYNAFLOW DRIVE

PROPER as an ascot on the best man is the name that goes with this most bountiful of Buicks — *Roadmaster.*

Here, indeed, you ride in luxury as long on comfort, room and distinguished design as that of a car built to your own custom.

But beyond that, here's where you become master of the highway as in no other car at any price — through the magic of Dynaflow Drive.

For the Buick Roadmaster alone offers this advanced answer to simplified driving — the only drive in all America in which you move swiftly and smoothly through varying speeds *without a gear ever shifting.*

Usually, that's enough said. We hope it is for you, too. Enough, at least, to send you to your Buick dealer to see about getting an order in for this fleetest of fine motorcars.

BUICK *Division of* GENERAL MOTORS

Buick Roadmaster

When better automobiles are built Buick will build them

Tune in HENRY J. TAYLOR, Mutual Network, Mondays and Fridays

ROUTES: U.S. Highways 6 and 50 (east-west); 87, 138 and 285 (north-south). Roads generally hard-surfaced, but check conditions en route. Cars heat rapidly in high altitudes, so don't overload.

ACCOMMODATIONS: Plentiful in larger cities and along highways, but reservations advisable. Trailer parks and dude ranches throughout Colorado Rockies and at Mesa Verde National Park during season (May 15-October 15).

FOOD: Good restaurants in all towns; local produce available en route.

CLIMATE: Cool in summer, cold in winter. Quick summer rains. Best season, early June through September.

WHAT TO WEAR: Casual clothes, except at resort hotels. Lightweight coat to double as raincoat. Sturdy shoes. Plenty of outdoor garments.

WHAT TO SEE: Mesa Verde National Park, Black Canyon of the Gunnison National Monument, Great Sand Dunes National Monument, Royal Gorge, Colorado National Monument, old mining towns (Ouray, Telluride, Silverton, Leadville).

WHAT TO DO: Fishing, hunting, hiking, riding, sight-seeing, plus usual facilities at resorts.

FOR FURTHER INFORMATION: Write Colorado State Highway Department, Denver, Colo.; Information Division, National Park Service, Department of Interior, Washington, D.C.

gh Kenosha Pass at 9,990 feet. San Francisco via U.S. 40 to ake City, then over Soldier Sum- to western Colorado on U.S. 50. ou are ready to abandon motor- for the horse trails of the high ry, then we had better take a t the outfit we will follow on the o timber line. . . .

s is the Crosby Vandeburg band the Bird Ranch on Little Cimar- 989 ewes and their 1,200 spring . They have wintered down in rigated meadows and on the ush mesas of the home ranches feet up. The bucks—rams to still are down there, held against eeding season in the fall. The ill stay up in the high country, d the old ghost camp of Capitol eeding until the frost cuts down ass in September. Then they will slowly down the hills again—so as not to take off meat—and t lambs and culled ewes will be l onto the double-decked nar- auge cars of the Denver & Rio e for market.

mmer Range in the Rockies

tton chops and lamb roasts will pensive this fall and winter—you've climbed around in the do Rockies with a band of for a few days you stop wonder- hy. This summer thirty-seven of sheep have walked, balked, l, galloped and clawed them- up into the highlands around npahgre Peak to reach their r range ten thousand feet in the . If your lungs and legs will it let's go back and join one

vn on the home ranch it is early r and the timothy and red clo- d dandelion cover the meadows. a master stock country—a pio- g "homestead" country; and it take genius to go hungry in it. ople who have been in the high all their lives live high on a of food the land provides—to their hard work and savvy—anton extravagance—deer and d beef and mutton and fresh golden butter spread thickly on homemade bread; fresh eggs, eam you can stand a fork up in: es made from half a dozen of wild and cultivated berries ot everywhere.

ut up 800 quarts of food last r," says Crosby's mother. ther put up 1,200 quarts one says Crosby, "because she t world conditions were a little ed. . . ."

trail herd—there are no " in the mountains—have been randed with the S-Quarter- mark; the lambs' tails have ocked. Now the outfit starts forty-seven-mile trail. A pack four mules and a horse carries ar for four mounted men: . two herders and a camp Three dogs and a pup in training help keep the band together.

The camp tender has gone on ahead, located a site with good horse feed and a spring for water, spruce and aspen for the fire—a place where the visibility is good and the sheep herd can be watched through the night. The sheep come up about sundown and bunch on a selected bed ground. Ewes mill around looking for lambs they've lost on the trail and the blatting and baaing die down.

"Daylight'll be a little late in the morning," says Crosby. "No use turning out until about 3:30. . . ."

Just before dawn the alarm clock goes off and the herders eat breakfast and move off with the sheep (with or without herders, sheep are ready to leave a bed ground at dawn). The trail leads up a forty-five per cent grade along historic Ute Trail to the top of Horse Mesa. A few crippled ewes and weak lambs can't make it, and are left along the trail to be picked up later. The bunch grass is two feet high and the sheep feed on it and on dandelion greens as they move up. The land on the mesa is an open park of aspen, blue spruce.

Some of the native ewes are old mountaineers. They have been up and down the trail four or five times and lead the way. Here and there is a black sheep.

"We try to keep a black sheep spotted about every hundred ewes," says Crosby. "Use them for markers. If you're short markers, you're short sheep. We used to use goats for leaders, too, but we don't any more. They get spoiled and feel superior."

From ten to fifteen sheep in each thousand are belled, and the tinkling blends with their baaing and the barking of the dogs and the shouts of the trail crew. The more bells you have in a band, the more the sheep will scatter and the density of a herd is regulated in this way. The bells also scare off coyotes and cougars.

The camp tender, left behind at the bed grounds, strikes camp and packs his string. Then he moves on, detours around the trailing herd and gets ahead to set up the noon camp. The sheep cross a ten-thousand-foot flat and plunge down a steep slope into the canyon on the Big Blue River, at an elevation of 9,500 feet. There's a sheep bridge over the brawling stream. This is a permanent bridge, eight feet wide. The herders rush the sheep onto the bridge with a yell, an old ewe and a lamb in the lead. Crosby watches.

"Lucky this time," he says. "Usually a couple of them fall in the creek and we have to ride in and save them. . . . You ought to see some bridges. If you come to a creek and have to get the herd across, you cut a couple of poles, lay them close together, spread pack-paulins on top, fill in the trough with dirt—and haze the sheep over."

Across the Big Blue, the sheep turn upriver, feeding and drinking as they go. The tender has found a noon camp on a knoll and as they come near, the sheep "shade up" for a siesta. No tents are pitched. When the herders arrive, the portable camp stove has been set up and coffee is boiling. Lagging lambs trail in and feed from their mothers. Here and there a ewe tries to hide out in the brush or behind a rock with her lamb.

A Mountain Thunderstorm

After an hour, the herd starts on again, a herder ahead and another behind. The tender takes a short nap, repacks and follows, working around the herd and getting ahead to pick out a night campsite. The trail is still upriver into the Uncompahgre Forest. Along in the afternoon black clouds gather around the snow peaks; the lightning flashes, and the thunder cracks and rolls. This is a real thunderstorm! Red balls of fire—a mountain phenomenon similar to St. Elmo's fire—roll from the riders' metal stirrups to the horses' shoes and go rolling away across the ground. The rain pelts down, cold and dreary. Men's hair stands on end. The sheep plow on stolidly and the horses don't seem to mind. But the dogs howl miserably.

The tender is up ahead, setting up the night camp—the tent traditionally facing east. This is a survival of the days before alarm clocks, when the tender had to depend on the first light of dawn to awaken him. A good tender can set up a camp, have a fire going and everything ready in half an hour.

"I can do it in twenty-three minutes myself," says Crosby, as the herd starts to come in from the trail. Herders try to time the arrival of the sheep just as dark comes; the sheep are tired and bed down without scattering.

There is the usual sorting out of ewes and lambs. Night settles down with only the fireglow and a lone candle for the herders to eat by.

At daylight the herd starts up again toward the Alpine Ranger Station near the fork of the Big Blue and Soldier Creek. Other herds of sheep are converging on the station, where they will be counted through by a forester. Now everyone is alert, because if the herds get mixed, there's the devil to pay. Mountain range law is that the herder responsible for a mixing must unmix the mingled herds—which sometimes takes a long, long time.

It's wet and foggy, with a touch of frost, as the S-Quarter-Circles move up to the counting corrals, leaving the old Ute Trail and crossing to the Ridge Driveway.

Ahead is a band of yearlings owned by Jean Chuchuru, a Basque sheepman from Big Cimarron. They are five days out. Crosby gives them plenty of time to get ahead, then moves his own sheep into the V of the corral. At the point of this V there is a rough sort of podium and here the forester, Lyn Holman, keeps the records and waits to count the sheep through. Some counters use a notched tally stick; Lyn transfers a pebble from one pocket to another at the count of 100. Just outside the point of the V there is a squeeze gate through which the sheep must go single file. Each sheep is counted through the gate on the run.

PHOTOGRAPH FOR COLLIER'S BY CLYDE VANDEBURG

Flannagan's Last Resort

BY NORD RIIS

"If you're delivering fish," she said, "you can take them around back and give them to the cook"

N THE Minneapolis headquarters of a corporation that owned and operated a chain of hotels and resorts across the North Central George Flannagan, president, was conferith his son, a vice-president.

a $25-a-day place called the Saginac Inn," er Flannagan said. "The original owner died ft it to his sister, a mildewed old female who t want to own a resort even if it makes a little . We've had a tip that it's for sale. So far he only ones that know, and that's impor- f the place is in good shape the price we're is very fair."

vice-president, who was nowhere near as ard as he looked, smiled. "Say no more; You want me to go up there, count the tow- ck the bellhops' connections with the under- and in general snoop until I can tell you r the inn is a sound investment."

father nodded. "You've done it before, and I bank on your decisions. I've got you rvation. When you get up there, act like a guest. Find out about fishing and mosqui- Get me the whole picture. Don't let anyone d of what you're up to, or word will leak out ce is for sale and the price will be jacked up. e management might get ideas of covering gs they don't want you to see." The genial old ist eyed his son affectionately. "You won't disguise, son, you were born with one."

r rose to his feet. He was a tall young man, a soupbone and slightly stooped. His eyes lue, his hair was straight, rather fluffy and on the side. On his thin pleasant face he puzzled, faintly worried expression, as if he t quite understand what was going on him, but wished he could. The expression swindle.

start this afternoon," he said.

ac Inn, on Saginac Lake, was a six-hour almost due north. Roger arrived about at evening, registered and was escorted to cottage along the lake front.

vent fishing the following morning and re- in early afternoon with eight walleyed pike inger. As he shambled up toward his cot- s gaze fell upon an object lying on a chaise on the lawn of the next cottage. It was a body and it certainly was female. It had on a sun suit that confined itself to obeying the law and left the other stuff for the glory of man. A nature lover, Flannagan walked over and stared.

The girl looked up at him and the pike. "If you're delivering fish take them around back and give them to the cook," she said. She picked up a magazine, then glanced nervously back at Flannagan. "What do you think you are staring at?"

"I don't think I'd better say."

The girl reddened. "Maybe you hadn't, at that."

She appeared to be about twenty-five years old. Her hair was copper-colored and her eyes were bluer than his own—blue as flax blossoms. She was the loveliest creature he had ever seen.

"I'm your neighbor," he said. "I thought perhaps you would like some of these pike."

She smiled. "That's very kind."

A slight, silver-haired woman had come out of the cottage and walked down to them. She nodded affably at Roger and peered at the fish. "I'll be darned—walleyes! Every fisherman in the resort has been trying to hook just one walleye. And you get eight." She scanned Flannagan's peculiar visage and shook her head. "It doesn't seem possible."

"You'd better be nice to the gentleman," the girl said. "He wants to give us some."

"You see, I'm all by myself," Roger said.

"That's funny, I had a feeling that you must be here with your parents," the old lady said. "Well, then, why don't you dine with us tonight? You look like you needed a good meal."

"I'd be happy to come," Roger said.

"I'm Mrs. Carlson. This is my niece, Tabitha Carlson."

Roger introduced himself. "I wonder, Mrs. Carlson, if it would be all right with you if I made a few passes at your niece?"

"Hey," Tabitha said.

Mrs. Carlson pulled herself together. "I think I'd better warn you, Mr. Flannagan, that my niece is being energetically courted by a young man who will be back tomorrow. She's spoken for." She paused and her old eyes began to sparkle. "However, a few discreet passes don't seem an unreasonable request from a neighbor."

"That's very hospitable, Mrs. Carlson," Roger said. "I'll get right at it." He looked down at Tabitha.

Tabitha's mouth opened to blast him down to size, but his expression disarmed her. He looked like a spaniel who had just brought in the evening paper and was waiting for a pat on the behind.

WITH some difficulty she pulled her gaze from Roger to Mrs. Carlson. "I'm perfectly content, Auntie May, to sit around in the sun. We aren't so backed to the wall that I have to spoon with a neighbor simply because he brought us fish."

"Are you in love with this other gentleman?" Roger asked.

"That is none of your concern. What's more, I'm certainly not going to fall for a guy that looks like he's just wandered off from his mother."

Roger took a deep breath and removed the stoop from his back. He drew on a semblance of dignity. "I regret that you feel it necessary to be sarcastic about my face. I know it isn't striking, but I have to use what I came in with."

Tabitha was touched. "Gee, Mr. Flannagan, I'm sorry. Your face is swell, honest. It's just that it kind of throws me. You don't talk like your face says you ought to. It doesn't fit. It is sort of like seeing a clergyman shooting craps."

He smiled sweetly. "I accept your apology."

"Well, I guess I'll beat it," Mrs. Carlson said. "I dropped out of this sort of thing 30 years ago, darn it."

"Mrs. Carlson, I'll always be grateful to you for this," Roger said. "I estimate that with a couple good days Tabby baby and I will be hugging and kissing with vigor."

"There you go again!" Tabitha said. "Judas priest, Mr. Flannagan, you can't go around saying things like that!"

"Once you get by my face," Roger said, "you'll find I have a good heart and an affectionate nature."

"Mr. Flannagan," Tabitha said, "you take your face and your passionate nature and go take a good shower."

"Tabby baby," Roger said. "Before you change out of those britches I'd like to report that I've never seen rompers filled with nicer goods. I swear." He bowed gravely to each woman and slouched off to his cottage.

Tabitha stared after him, her lovely brows knit.

THAT evening Roger appeared at the door of the Carlson cottage clad in a gray double-breasted suit, a blue tie, and a white shirt. The sun had pinked his skin, and soap had polished it until his cheeks glowed like Winesaps. His hair was carefully brushed and parted. He could have been on his way to choir practice, except that he carried an armful of roses and a box of candy. He gave the latter to Mrs. Carlson and the flowers to Tabby.

"Thank you, Mr. Flannagan," she said, blushing. "It's sweet, but you can't do things like this."

"The candy's lovely," Mrs. Carlson said. "And don't pay any attention to Tabitha."

A tall, powerful man of about sixty came out of the kitchen carrying a tray of beer. John Carlson was head of a flour company. He was introduced to Roger, and while the women busied themselves getting ready the dinner the men chatted about fishing and business. Roger spoke with erudition and authority about walleyed pike, bait casting, corporate structure, financing, the SEC and the grain market.

Carlson studied Roger. "Are you here with your father and mother?"

Roger put down his beer and carefully wiped his mouth. "Mr. Carlson, I realize that I give the impression of being pretty moist behind the ears but I jumped the family nest ten years ago, went through college and a war without either parent helping me and in the past two years I have made enough money to afford this highwayman's resort."

"I'll be damned!" Carlson said.

"Also," Roger said, "it is my intention to woo and wed your niece, starting shortly after dinner. Any objections?"

"Hell, no; give her a whirl."

"Thank you. As a favor, I wish you would not tell either your wife or Tabby about my war or business experience." He indicated his face. "I find that a countenance like mine, if left on its own, has certain natural advantages in dealing with women."

Dinner was a jovial affair. Afterward they played bridge. With an air of engaging male helplessness Roger, teamed with Carlson, somehow won every rubber. Carlson was immensely tickled. At ten Roger looked at Tabitha. "It's time we got started with my courting. Let's go for a walk."

Tabitha reddened. "For Heaven's sake, Mr. Flannagan."

"If you go by the lodge," Carlson said, "get me a newspaper, will you?"

Tabitha eyed him, then her smiling aunt. "Oh, it's that way, is it? All right, I'll go." She turned on Roger. "But a fat lot of good it'll do you."

They went out in the warm sweet air and strolled along the beach. Several times Tabitha had the sensation that her cumbersome escort was about to stumble and it was with some difficulty that she controlled a desire to take his hand and lead him around objects on the sand.

"Tabby baby," he said.

"Now, see here, Mr. Flannagan—"

"Roger."

"Roger, I mean. You've got to stop saying—"

"I've never felt this funny before. It proves that the Lord had you staked out to be my woman."

Tabby was so sure he was going to fall over a boat pulled up on the sand that she took his arm. They stopped and faced each other. "You make me nervous," she said. "Sit down."

They sat on the boat. Ineffectual and bewildered-looking, he sat and gazed at her, and Tabby felt strongly that she ought to cuddle the young man. It was indecent, considering that she had just met him; and she decided the Martini at dinner had loosened her moral fiber.

"Flannagan," she said, "this is silly. What's happened, you've busted the regulator on some of your glands. You're kind of depraved in a nice way."

"Tabby baby, I—" *(Continued on page 51)*

Roger's utter helplessness was definitely his most engaging characteristic—and Tabitha was ripe for an engagement

Assassin of the Dance

Iva Kitchell is short, wide and handsome. What she does to the mystic art o

BY KYLE CRICHTON

THERE is the sound of a piano on stage and then this pudgy little woman comes on from the wings at the Ziegfeld Theatre in New York and begins going around on her toes. She isn't bad; she isn't good. Then she stops and takes a pose, one foot out behind, the right arm slightly extended. This is all in the classic mode, but somehow she has made the pose too little or too large or too late. There is a titter in the audience.

She sashays around some more and then makes another pause—this one with the left foot planted and the right twisted in a graceful arch. She raises her hands over her head to form a circle and has some slight difficulty in accomplishing this because her arms are obviously not long enough. The titters increase and there are even a few faint bursts of laughter. This stirs her to the point where she runs around in a circle with a fine straight-legged, heavy-footed lurch. This is to express ecstasy, passion or fear.

At this juncture the audience finally succumbs and hysteria reaches a peak. There is a spontaneous roar, a general convulsive heaving of shoulders and Miss Iva Kitchell, the dance satirist, knows that she has them again.

America is a great country and the strange ways people find to make a living prove it. As a serious ballet dancer Miss Kitchell would find herself in competition with 18,412 limpid-eyed people who have made The Dance more important than home. Mother or Congress. They suffer, they labor, they rehearse some more, they take a few private lessons, they borrow money to span the breach between their pitiful salaries and dietary decency. No art in the world is so self-conscious and precious as The Dance. It is a cult and its followers approach it with sharp devotional cries. Miss Kitchell does nothing serious to it: She simply deflates it, gently—gently, and rather lethally.

This was not the original Kitchell intention. At sixteen she was in the ballet corps at the Chicago Opera, and it was here that her life was changed. She had a habit of monkeying around with ludicrous dance steps while breaking stage waits. The ballet master noted this and gave her a word of advice that still worries her.

"I don't know whether he was being kind, tactful or just taking the easiest way out. He could have said, 'Kitchell, take that funny shape out of here and stand not on the order of your going.' I think that's what he had in mind but what he actually said was, 'Kitchell, there are thousands of good ballet dancers and only a few comic ones You ought to do something with that talent.' It all worked out the same way; he got me out of the opera house."

It might be thought that a whole evening of Kitchell kidding the dance could be an evening of exquisite boredom, but it seems not. The bill consists of Harvey Brown, her accompanist, and Kitchell, but she does break up the dance routine with pantomimic sketches. These are considered hilarious by most spectators but the *aficionados* slumber heartily through these and wake up in time for the next criminal onslaught on the dance.

For sheer concentrated murder her satire on Martha Graham and the modern dance wins the badge. For this short exercise in genocide entitled Soul in Search, Miss Kitchell uses the spoken word, as is done by Miss Graham. She wanders around the stage like a woman who has just lost her husband in a bus wreck. She is desolate, tortured and demented.

"Who am I," she cries hoarsely, "that searches and seeks and never finds?" She gets tangled up with a long robe and ends on the floor, temporarily defeated. From that position she sets out on hands and knees in her search. "Seek and search," she howls. "Seek and search." No luck —and then a thought occurs to her. She exits hopefully. "The light dawns," she says as she leaves the stage. "I will go into the fertile fields."

What she does to that old chestnut of the opera, the bacchanalia, is a shame. She uses a fake goblet, a wooden slab painted like a pitcher, a scarf, a bunch of paper grapes. She is joyous and abandoned. She is Sex Repulsive. She capers; she leers; she is the moth-eaten incarnation of every Scheherazade in history. She makes it difficult ever to take that mélange of tinkling bells, tambourines and general frenzied loping seriously again.

She was born Emma Baugh at Junction City, Kansas, where her father was in the Army, but her mother and father died when she was three and she was adopted by Mr. and Mrs. Robert Walter Kitchell. She is married to Stokely Webster, a relative of the Kitchells. If she were really a Kitchell, he would be her cousin, but of course isn't her cousin because she is really a Baugh. (Had enough?) Since the Kitchells were also Army folk, she lived in Fort Riley, Kansas, and a succession of other Army posts.

The illness of her foster parents forced her to work and she naturally drifted into the ballet, which she had been pursuing in a gasping fashion since she was four. This brought her to the Chicago Opera ballet, where she made $35 a week and took on airs rather too weighty for a girl of sixteen. It resulted also in some vaudeville work in the Balaban & Katz houses and a bit of tentative touring in spots not too far from State and Madison.

"What I really had," she says now, "was a lot of crust. I'd try anything."

Among other things she tried New York, without which no theatrical story is complete. She had the usual experiences in agents' offices, ate the usual cafeteria meals and rather hoped she would do a stretch of romantic starving, but her ambition and nerve were always too much for her.

Instead of lingering poetically on her attic pallet she went up to the Radio City Music Hall with the express purpose of backing the great Leonidoff into a corner and making him hire her. Leonidoff interviewed her, hired her as a featured dancer at $150 per week, and back she went to the wardrobe lady, who was startled but not nonplused.

"It's been true through the ages," she said, rationalizing the inevitable. "Great dancers don't need a shape. Pick out what you want."

She Goes Over Big in Berlin

After that Iva worked in night clubs and hotels—the Adelphia in Philadelphia, the Jefferson in St. Louis. She had a summer season at the Mohawk Festival, doing acting and pantomime with Charles Coburn and Percival Vivian, and then came her European break. A producer hired her for a big German show called Etwas Verrückt (meaning Somewhat Nuts) and she opened in the Scala in Berlin, where the thing ran two months. She was getting $300 and boat transportation for herself and husband. The Germans found her very droll.

She played one scene as a bratty kid in a restaurant making a nuisance of herself and did it so well that, at the end of a week, nobody in the cast was speaking to her. The producer had to call a meeting of the company to explain that she was ruining their lines at his orders. Her success was so pronounced that she was soon ordered to appear at a party for the Nazi bigwigs.

"Goebbels, Goering, everybody but Hitler," she says. "With one small tommy gun and a little guts I could have changed history."

When Austria fell the company was playing in Munich. Back in New York she decided she would have to do something on her own if she wanted to get ahead. She gave a recital in Studio 61 in Carnegie Hall and 100 people showed up and she broke even. On the strength of that she got a manager who dug up four dates in a year and convinced her that the way was going to be hard. The second year was spent in Oklahoma where Maurice Laraux of Bartlesville booked a tour of twenty towns in that fair, flat and prosperous state. Betweentimes she did t citals at the Barbizon-Plaza H New York.

On the basis of this doubtf cess she launched herself as h manager, wrote her own brochu came her own press agent and booking dates by mail. They mostly from women's clubs ar for $150 each. Her triumph field attracted the attention of Peat, the agent, and he started right well with her—30 dates on 40 the next.

But now arose a problem: H jump from women's clubs to time? What came to her rescu was the well-known Kitchell She rented Carnegie Hall an pared to put on a concert of he This is somewhat comparable t ing Yankee Stadium for a f softball game.

She badgered friends to bu seats and ran all over town as h press agent getting items into pers. It ended with her breakin financially on the engageme getting the reviews that esta her as a major attraction.

"Those costumes," said one 'those wonderful costumes!"

He was referring to the which looked as if they had be up on a very old machine wounded seamstress. They h truth, been made by Miss K herself and she still busies hersc the chore. They look exactly ri they are patently wrong.

The Carnegie Hall business b her a contract with the Nationa cert and Artists Corporation a was immediately booked for 4 and will have more this year, of them repeats. There is in p a tour to Australia and anot Alaska. In short, the girl has m and free enterprise has scored a triumph.

The Secret Papers

HARRY L. HOPKI

BY ROBERT E. SHERWOO

While Stalin was clamoring for a second front in Europe, Roosevelt Churchill planned the invasion of N Africa and in the battle of bureauc Washington, as on most of the real figl fronts, this was the lowest point of the

PART X—THE SOFT UNDERBELLY

EVEN after Hopkins, Marshall and Kin turned from London on July 27, 1942, were further attempts to change the Presi mind about the North African operation, the na which had been changed for security reasons GYMNAST to TORCH. Roosevelt, however, in that the decision had been made and must be c through with expedition and vigor.

Roosevelt made his major decision in fav TORCH entirely on his own and over the protests highest ranking advisers. He was now concerne marily with the problem of how to explain to Stali there would be no second front in northern F in 1942.

On July 31st, Stalin extended an invitation t British Prime Minister to come to the U.S.S.R. "t sider jointly urgent questions of war against Hitle menace" which has "just now reached a special c of intensity." Roosevelt then cabled Churchill a sage paraphrased here:

We must bear in mind always the personal our ally (Stalin) and the extremely difficult and da ous situation confronting him. We cannot expec one to approach the war from a world point of whose country has been invaded. We must try t ourselves in his place.

He should be told quite specifically that we determined upon a course of action in 1942. Wi advising him of the precise nature of our pro operations, I think the fact that they are going made should be told him without any qualificati

Of course we should not raise any false ho Stalin relative to the northern convoy, but I agre you that we should run one if there is any possibi success, regardless of the great risk involved.

It is still my hope that we can put air power di on the Russian front.

After Churchill had left London, Harriman on ceived the idea that it might be a good idea for h go along, and Roosevelt cabled him authority to Accordingly, Harriman flew to Moscow, arrivin gust 12th. He cabled to Roosevelt the followin this summarized report:

Stalin and Churchill had an extended meetin night. The British ambassador, Molotov and shilov were there. The main topic was Britis American military strategic plans for 1942 and and their effect on the Russian front.

Stalin disagreed at every point with bluntne proaching insult, with such remarks as you can wars if you don't take risks and you mustn't be so of the Nazis. Thus far there had been no agreem all and the atmosphere was tense.

Churchill then detailed the bombing activity Germany and expressed his hopes for subst increase with American help. At this point the first agreement between *(Continued on pag*

TELEGRAM

The White House
Washington

October 15 1942

Marshall Petain

~~My dear~~ [old friend]

I am sending this message to you [personally] as the Chef d'Etat of the United States to the Chef d'Etat of the Republic of France. [Once also as one of your friends and comrades of the great days of 1918] [May] we [friends and comrades of the great days of 1918] [live] to see France victorious again against the [~~enemy~~]

When your government concluded, [~~of necessity~~] the Armistice Convention in 1940, it was impossible for any of us to foresee the program of systematic plunder which the German Reich would inflict on the French people.

That program, implemented by black mail and robbery, has deprived the French population of its means of subsistence, its savings; it has paralyzed French industry and transport; it has looted French factories and French farms -- all for the benefit of a Nazi Reich and a Fascist Italy under whose governments no liberty loving nation could long exist.

As an old friend of France and the people of France, my anger and sympathy grows with every passing day when I consider the misery, the want, and the absence from their homes of the flower of French manhood. Germany has neglected no opportunity to demoralize and degrade your great nation.

Today, with greedy eyes on that empire which France so laboriously constructed, Germany and Italy are proposing to invade and occupy French north Africa, in order that they may execute their schemes of domination and conquest over the whole of that continent.

I know you will realize that such a conquest of Africa would not stop there but would be the prelude to further attempts by Germany and Italy to threaten the conquest of large portions of the American hemisphere, large dominations over the Near and Middle East, and a joining of hands in the Far East with those military leaders of Japan who seek to dominate the whole of the Pacific.

It is evident, of course, that an invasion and occupation of French North and West Africa would constitute for the United States and all of the American Republics the gravest kind of menace to their security --just as it would sound the death knell of the French Empire.

~~The White House~~
~~Washington~~

In the light of all the evidence of our enemy's intentions and plans, I have, therefore, decided to dispatch to North Africa powerful American armed forces to cooperate with the governing agencies of Algeria, Tunisia and Morocco in repelling this latest act in the long litany of German and Italian international crime.

These indomitable American forces are equipped with massive and adequate weapons of modern warfare which will be available for your compatriots in North Africa in our mutual fight against the common enemy.

I am making all of this clear to the French authorities in North Africa, and I am calling on them for their cooperation in repelling Axis threats. My clear purpose is to support and aid the French authorities and their administrations. That is the immediate aim of these American armies.

I need not tell you that the ultimate and greater aim is the liberation of France, and its Empire from the Axis yoke. In so doing we provide automatically for the security of the Americas.

I need not again affirm to you, [~~the United States~~] America seeks no territories [~~of Europe~~] that the United States and remembers always the historic friendship and mutual aid which we have so greatly given to each other.

I send to you and, through you, to the people of France [~~Warm greetings~~] my deep hope that we are all of us soon to enter into happier days. [~~Your friend~~] And belief

(end) Franklin D. Roosevelt

Churchill protested to F.D.R. that the original draft of this letter to Pétain, announcing our planned invasion of North Africa, was "much too kind" so the President made these cuts

The kid said, "I think the bicycle fell off this way about twenty feet"

FOR *Divers* REASONS

BY EUSTACE COCKRELL AND DANIEL GORDON

THE kid walked out on the pier and then stood a little distance away, watching the man beside ir compressor. The man was short swarthy, maybe sixty years old. It a warm day but he wore a stocking

said to the kid, noticing his ragged , his clean face, "Good evening, son, op of the evening to you; also any part of the afternoon you would to have."

e kid said, suppressed excitement in ice, "Whatcha doin'?"

e swarthy man put his head down to ne of the speaker and the tassel of ocking cap bobbed brightly. "We kid up here wants to know what doing. What *are* you doing down , Matty?"

ere was an annoyed grunt from the er that sat on a box by the com- or. Two lines trailed off into the . They were lashed together, the se and the smaller life line.

could get me a paper route," the id.

e man in the stocking cap said, puz- "You lost me, pal."

here aren't many jobs around in the ner. Deliverin' papers is about the ne and the man promised me a job d a bicycle."

e man in the stocking cap made te adjustment on the compressor. ther words," he said seriously, "you a bicycle."

e boy said patiently, "A rich sum- id lost his bicycle over the pier last n. I thought if your guy down saw it he might not mind tyin' a on it for me."

h." The man said into the speaker, any bicycles, Matty?"

m ridin' one now," the diver's voice

The boy said, "Aw, he's kiddin'."

The man in the stocking cap looked at the boy, noticing him. "H'm," he said, "why don't you get somebody to—"

"I don't take no charity," the boy said, flushing.

"He don't take no charity," the man in the stocking cap said into the speaker's cone. "So if you see a good bicycle—"

"I can hear you and him, too," the diver's voice said. "You don't have to say it all twice."

"What's he doin'?" the kid asked.

"Inspectin' the pilin'," the man said. "For an insurance company. But about that bicycle. Man ain't got the money to buy one, and needs one to make any money and won't take no charity, he's in kind of a fix. You doubtless also have strong feelings against buying on time?"

The kid grinned. "Naw, but the man runs the bicycle shop has."

"A jerk," the man in the stocking cap said carefully.

The kid said, "I think it fell off up this way about twenty feet."

A few yards out from the pier, the little circle of seething bubbles moved seaward, hovering above the diver. The man in the stocking cap considered the bubbles and the run of the lines. "About there, Matty," he said.

There was a steady and constant burbling noise coming out of the speaker, Matty grunted and started to say something, changed his mind and said, "Hell."

The kid said, "He gettin' mad?"

The man said, "He's always like that."

The diver said, "While you sit in the sun and gab." The small voice came out of the speaker in clipped words, precisely spaced from habit. "And if it ain't a kid wants a bicycle, it's some dame wants to know can I find her wedding ring she dropped in this very spot only forty years ago. I'm in mud up to my neck. I can't see my hand in front of the face plate, and you want me to find a bicycle."

"I guess," the kid said uncomfortably, "it's time I was gettin' towards home. He comin' up soon?"

"Naw. It'll be quite some time—if ever. I'm fixin' to cut his lines."

The kid looked at him attentively, then said, "You're foolin'—well, so long—an' thanks." He walked up the pier.

"Hey, kid! If I were you, I'd come down in the morning. The light is better then."

The kid said, "All right. I'll be down—" . . .

The man in the stocking cap lifted the helmet expertly, without scraping the diver's nose.

"It was a nice kid," he said, "needed a bike to get a job. Wouldn't of hurt you none."

Matty said coldly, "I should crawl around in the mud looking for a bike."

"He was proud," the man in the stocking cap said thoughtfully. "A nice, clean kid, and proud." Tugging sharply, he unbuckled a lead-soled shoe.

Matty kicked and the shoe clumped heavily some five feet away. "Let his old man buy him a bike."

"He looked to me like a kid didn't have an old man," the man said.

MATTY was just swinging down the ladder the next day, when the kid came out on the pier.

The man in the stocking cap winked at the kid. and kept paying out the lines. When he stopped, Matty said, impatiently, "Give me more slack." Then soon: "Got a bike down here."

The man shoved back his stocking cap, looked sideways at the kid. "You ever seen this bicycle?"

"Never did." The boy moved to the edge of the pier and considered the diver's bubbles in happy anticipation.

The swarthy man said into the speaker, "Hang on. I'm haulin' you up," and when the shining red bike broke water, he said, with the proper wonder in his voice, "Salt water beats all for preservin' things. That bike looks as good as new."

"Don'tcha think it's his?" the boy asked. "He found it."

The diver said, "Hurry up with the helmet."

"Get goin', kid. He never would have found it if you hadn't of known where it was."

"Yeah. I guess." The kid moved down the pier, pushing the bike. "Thanks." . . .

Turning his thin, pale face toward the swarthy man as he raised the helmet, Matty said bitterly, "Wasn't that bicycle red?"

The man lighted a cigarette and placed it between the diver's lips with a smooth, backhanded motion.

"Yes, it was, Matty."

"Which you bought and throwed in there last night?"

The man in the stocking cap blushed, stammered, but said no word.

"I had a coupla drinks and bought a *blue* one and eased her offa there about midnight," the diver said, abashed. "What the hell we gonna do with it?"

"Yeah," the man in the stocking cap said, "Now we got one bicycle too many. What we really need, I guess, is another kid."

A thin boy with great, dark eyes walked up the pier and stood at a distance. "What're you doing?" he asked.

The man in the stocking cap took one look at the boy's clean clothes, his bare feet, and snatched the cigarette out of the diver's mouth and picked up the helmet.

"Waitin' for you," he said. ★★★

Hitherto, Joe the cat has never been anything better than a happy warrior. Behold him now—a cat of shining virtue

Monkey's Uncle

BY RICHARD STERN

EILEEN SAMPSON'S phone call began th afternoon's events. Eileen said sweetly "Darling, I was in town today shoppin and I saw something in a store that I thought yo simply had to have."

"Sweet of you," Lucas said uncertainly.

"It's really for Joe. A playmate, sort of."

"Lovely," Lucas murmured, frowning. It wa just possible, she thought, that this was an overtur designed to re-establish peace and amity, to wip away memories of recriminations made upon a cer tain night. "So thoughtful," she added.

"Darling," Eileen went on, "I simply couldn resist, so I bought it and asked them to send it along I hope you won't think I'm too silly."

"Not at all. I think it was sweet of you to thin of us." Lucas hung up and leaned back in her chai and stared at the ceiling. Those recrimination had been vicious.

She was still wondering about the call when Coo brought in the afternoon's mail. A few bills, an a for a new cleaning establishment, one letter. Th letter was from Aunt Lucy, she of the unpredicta ble enthusiasms. Lucas read it, thinking of th small severe woman, thinking, too, of the Pekinges —what was his name?—who had been the old lady' current passion. "I have come to realize," sai Aunt Lucy, "and I am willing to admit, that I wa mistaken about the nobility of Pekingese. I hav disposed of Chang Poo."

Of Aunt Lucy's letters Tim had once said, " think that she gives you hints, like the time, statio and wave length. Then she settles down and start her mental broadcast and you're supposed to b ready to receive. Unfortunately, I'm not wired fo proper reception." Neither was Lucas. She put th letter down and leaned back in her chair onc more and pondered on Eileen Sampson's curiou behavior, and presently she gave that up, too, an went in to dress for the evening. She was in he dressing room when the gift arrived.

Cook answered the doorbell and glared at th

ddenly Joe's stub tail rose like a flag and began its ominous twitching. His sore whiskers laid themves flat against his cheeks. He let the growl begin deep in the furry chest, and advanced into combat

nning delivery man and signed the receipt with- t examining the package. She closed the door a peered through the slats of the little crate. ncent peered back at her. Cook recoiled a full sp. She thought of Joe, the cross she already bore, a it passed through her mind that flight is not alvys ignoble and is sometimes downright smart. E then she reconsidered, and in the end picked up t crate. Holding it at arm's length, she delivd it to the bedroom door.

"This just came," Cook announced. Overtones of approval crackled in her voice.

"Just put it on the bed," Lucas said and went on h her dressing. Vincent peered through the s in his crate, studying the room in silence. Then he settled himself philosophically, stretched o one small arm and began to pull tufts from d bedspread.

I WAS five o'clock when Tim drove in, slammed he garage door and stalked through the kitchen hout a word. Joe, crouched beneath the stove a is evening bowl of warm milk and rum, raised head and braced himself for an affectionate pull n his stub tail. It did not come, and Joe turned head in astonishment. Then he heard the clink a bottle and glasses and ice and he returned to warm punch. At the close of day, a man ded his drink.

arrying two highballs, Tim marched into the room. He handed one glass to Lucas, ignoring peculiar set of her face, and then plumped him- down upon the bed and drank long and deep. m the corner of the room, Vincent watched ough his bars in silence. Lucas said angrily, "I at going to—"

im jerked his hand. "I found out today," he sa slowly, "why we didn't get that Eastern Steel ac ount." He raised his head and looked at Lucas. ey're new out here, of course, so they didn't kn w the agencies. They went to their bank, Wester Trust, for information. I don't know who they talked to, but they got the wrong dope on our dependability, and on the basis of it, they turned our presentation down. They know better now; I talked to them this afternoon, but it's too late. They're already signed with Forbes."

There was silence. Then, "I can guess who they talked to," Lucas said.

Tim grinned at her over the rim of his glass.

Lucas said angrily, "All right, smarty, who's president of Western Trust? The new, imported president? The bulwark of respectability? The man who used to own a dog that tangled with Joe one fine night and came out on the wrong end of the engagement?"

Tim said, "John Sampson wouldn't do that."

"Wouldn't he? Wouldn't—"

"Look," Tim said patiently, "the whole thing was a mistake. Nobody, particularly a next-door neighbor, would stoop to a thing like that."

"You think so." Lucas gestured toward the corner. "Meet Vincent. He came this afternoon. From the Sampsons. Eileen phoned and told me that she was sending a playmate for Joe." Tim followed her hand. He and Vincent eyed each other. "And if you'll stand up," Lucas said, "and look where you're sitting, you can see some of Vincent's handiwork." She watched him rise and examine the circle of detufted bedspread. "Clever little fellow," Lucas added. "When I finally saw him he was pulling them out by the roots, playing she-loves-me-she-loves-me-not."

Vincent entered the discussion, chattering briefly in a high, squeaky voice.

"Articulate," said Tim, "isn't he?" He sat down upon the bed once more and sipped his highball thoughtfully. "A monkey—from the Sampsons with love and good wishes." He looked at Lucas. "What's the idea?"

"What do you think? It's Eileen's subtle way of getting even because our cat whipped her dog. Vincent's a gift, just like the Trojan horse or a bomb sent in the mail."

"And you think that the bum information at John's bank is all part of the same thing?"

"Think it?" Lucas said rather loudly. "I know it. Eileen has hated us ever since that night."

There was silence. Vincent shifted uncomfortably in his small crate. He looked at Lucas and he looked at Tim and then he chattered.

Tim studied him thoughtfully. "He's a cute little fellow," he said at last. "And he's probably tired of being shut up and he's probably hungry." Vincent listened carefully and with obvious approval. Tim got up from the bed. "Let's—"

"If you let him out of that cage," Lucas said, "he's your responsibility. I'm in favor of shouting for the Animal League."

Slowly Tim advanced on the crate. He hunkered down beside it and held out a forefinger for Vincent's inspection. "If you're right about Eileen's motives, sending him away would just make her laugh at you." Vincent studied the forefinger gravely and then made up his mind. He reached out one tiny hand, grasped the finger, and held it tight. He looked into Tim's face and chattered volubly and with considerable appeal.

"I hadn't thought of that," Lucas said.

Tim was grinning at Vincent. "He's friendly. We'll get along fine. Eileen's campaign will bounce right back on her."

"And John's little joke?"

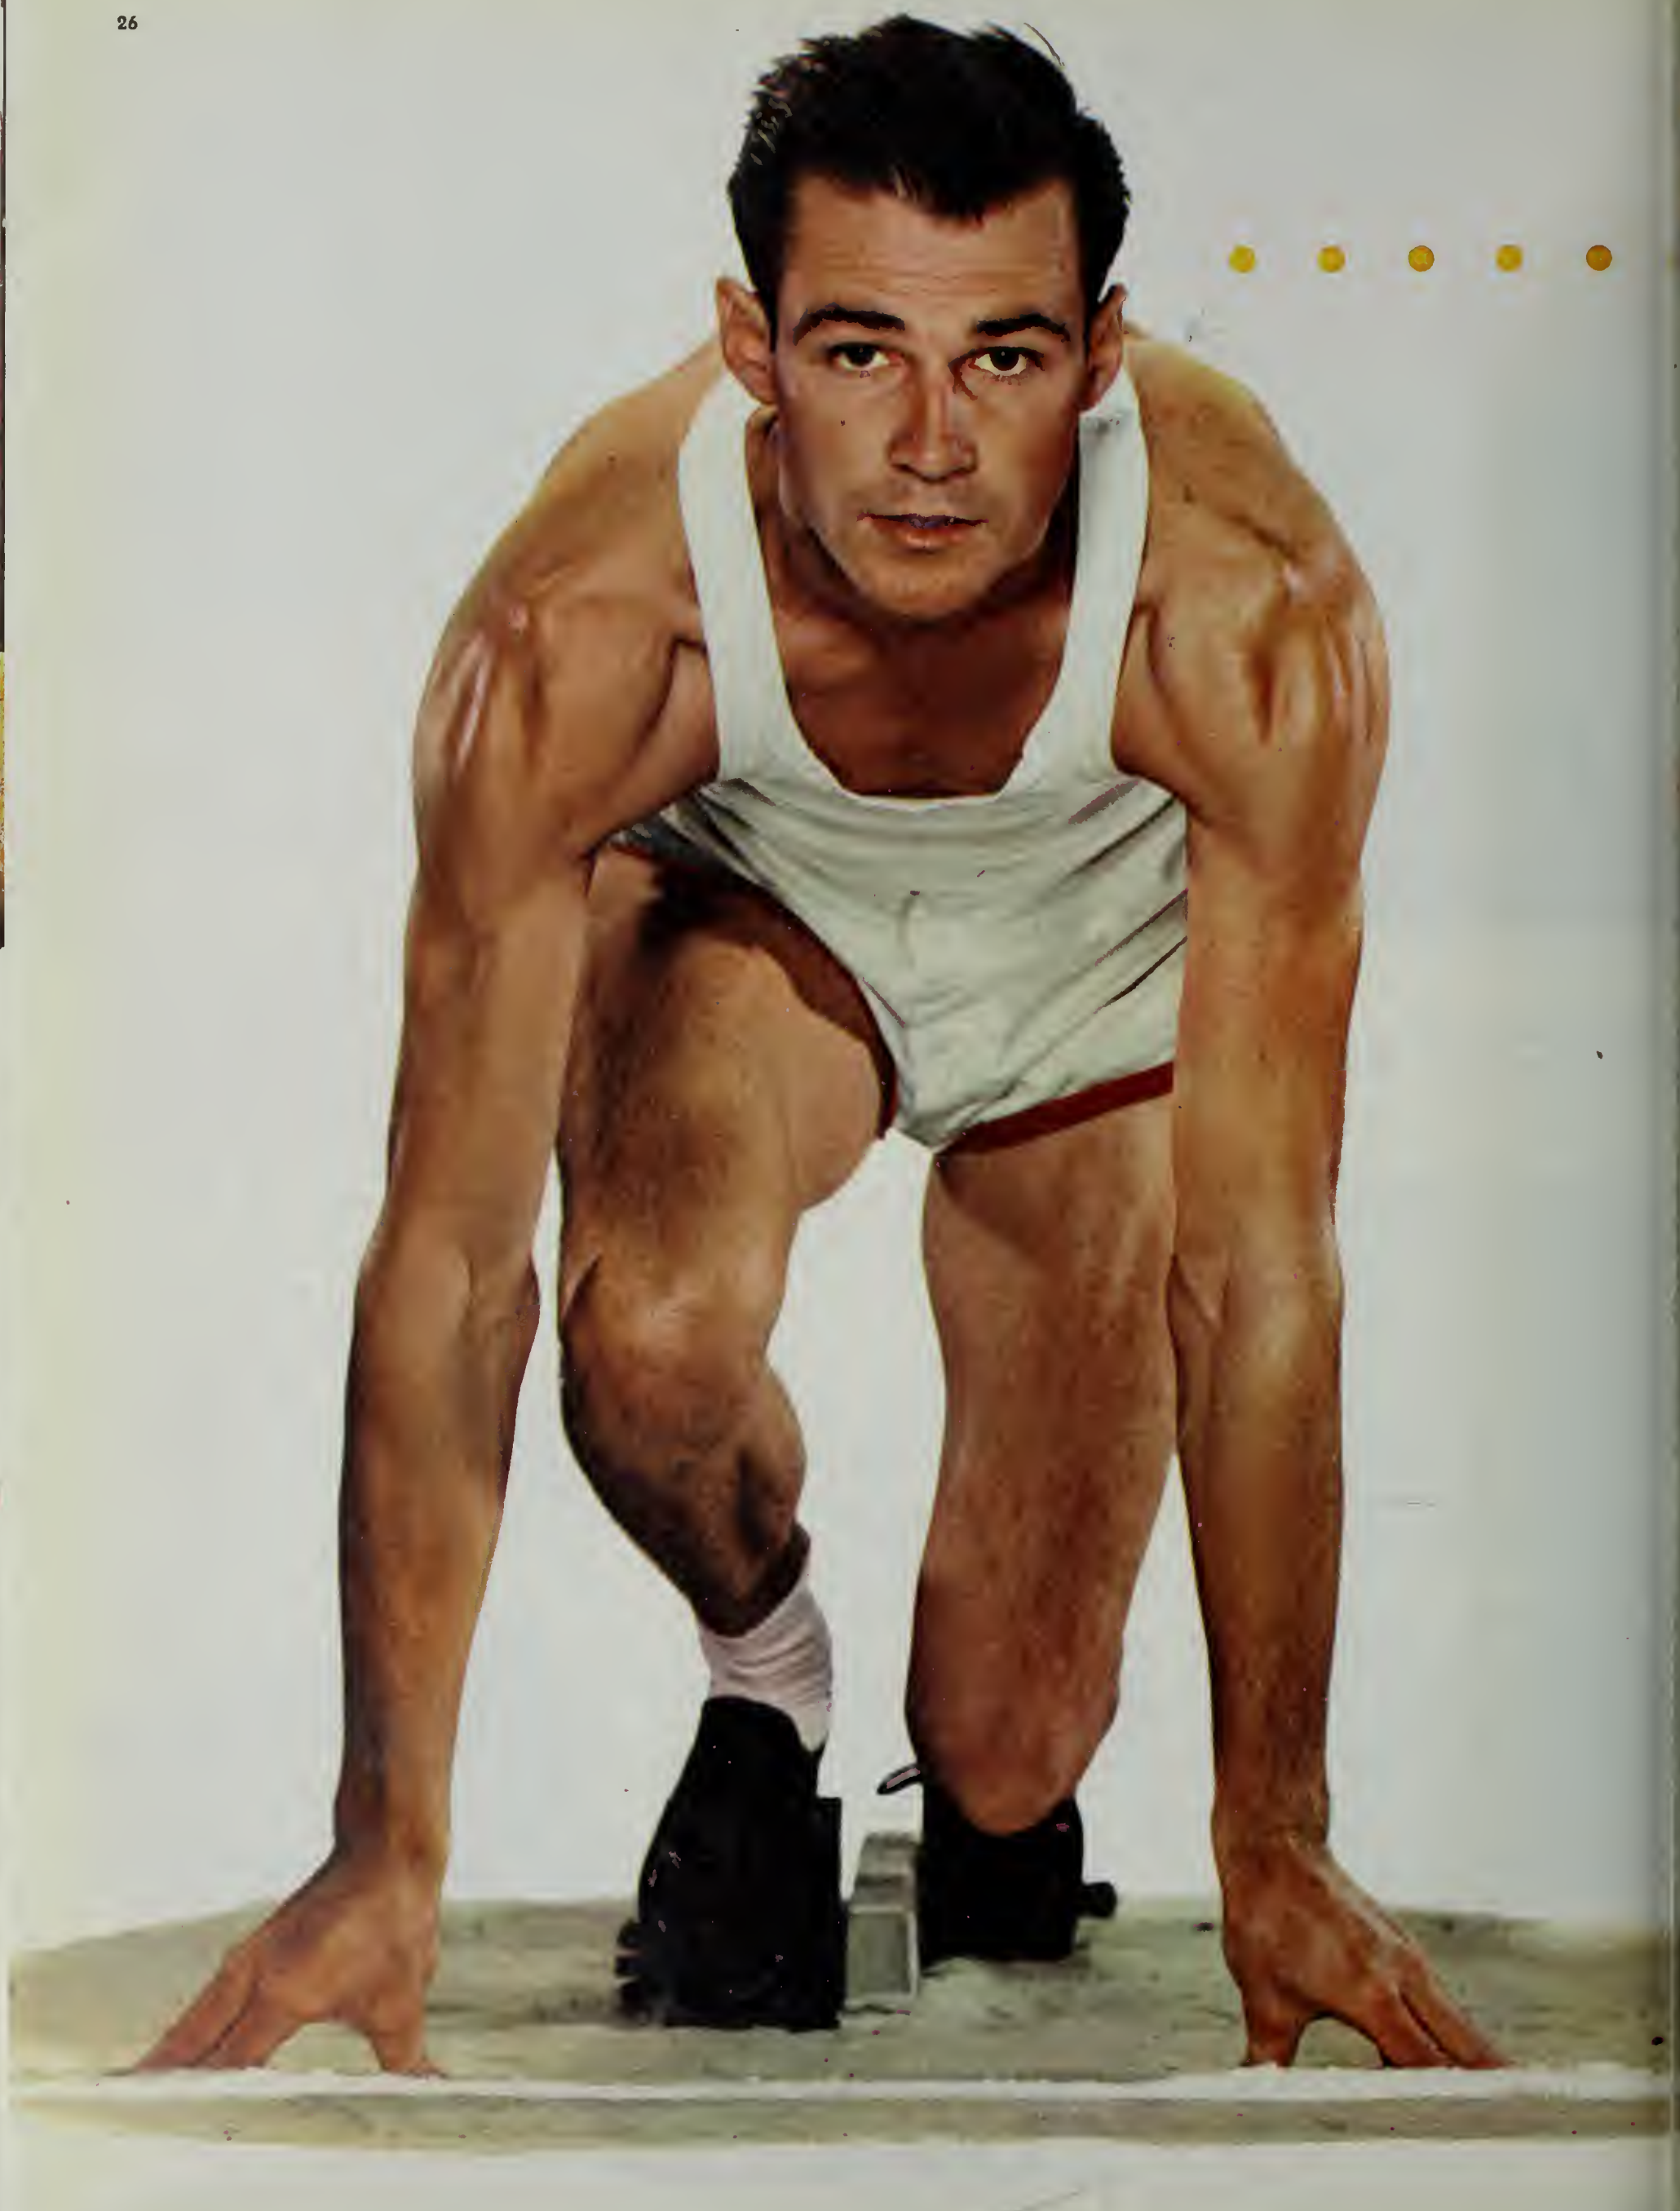
Tim undid the crate with one hand, letting Vincent hold the finger for assurance. "About John," he answered with a certain grimness, "we'll see. That's a different thing altogether."

"Joe," said Lucas, watching the opening of the crate, "is going to take a dim view of Vincent."

"Joe," said Tim, "is basically a gentleman. And his family feeling is strong. And Vincent is now part of the family."

Vincent said nothing.

NOW it is one of life's verities that relatives come in varying degrees of compatibility. Amongst in-laws, this is especially true. Joe took an unenthusiastic, although unalarmed, view of the new member of the McCoy family. His approach the next morning and his investigation were cool. He eyed Vincent's small, peculiarly human face, and he listened noncommittally to Vincent's excited chatter. Then he stretched himself out on the warm cement of the side porch and apparently dismissed the entire matter from his mind. Vincent was here, obviously under the auspices of Tim and Lucas, who kept house for Joe, and under the sufferance of Cook, who was necessary, if annoying. There was no more to be said upon the subject. Joe dozed.



Vincent, moored to a new collar and a long piece of line, sat in a hanging flowerpot, well out of Joe's reach. His fur was carefully cleaned and fluffed to the warm sun. His face, beneath the shining black skullcap that is the mark of the capuchin, was bland and guileless, but his thoughts, like his bright eyes, roamed without pause. And his small fingers picked ceaselessly at the irksome collar, endeavoring to discover the combination. His chattering had ceased. It is not on record how long the decollaring operation took, but the open collar was found, some hours later, resting in the flowerpot. By that time many things had happened.

Vincent, freed, sat quiet for a time, rubbing his neck and laying his plans. His eyes were focused upon Joe, watching for any sign of wakefulness. There was none. Vincent swarmed up the wires which supported the pot and across the porch-roof eaves to the nearest upright. There he disappeared into the heavy ivy, and only a rustling sound and the gentle shaking of leaves marked his progress to the ground. He reappeared, thrusting his head out from the foliage, and rested motionless for a time. studying Joe.

And then, quietly, stealthily, he emerged and crept across the cement on all fours. The last three feet he covered in a soundless rush and as he passed Joe's head he reached out one small arm and grabbed a handful of Joe's whiskers. He did his level best to carry them with him to the next upright.

Joe's awakening roar sent shivers up and down the back of every dog in the neighborhood. He came to his feet in a rush, his stub tail twitching and his eyes narrowed and his great head swinging slowly from side to side as he searched for his tormentor. Vincent paused halfway up the ivy vine. His bright eyes were gay and his entire small body began to shake with *(Continued on page 48)*

PELL-MEL PATTON

BY ANDREW ROBERTS

For years the world's fleetest sprinters hammered at the fabulous 9.4 seconds 100-yard mark. Some tied it, but nobody ever beat it—until Mel Patton breezed through with his smashing 9.3

OUTHERN California has been tried many times and never convicted of modesty. They ding you endlessly with climate, scen- nd general moral superiority. The lights are ter, the mountains are higher, the girls are er, the crowds are larger. Occasionally they up with somebody whose excellence can't ly be disputed, such as one Mel Patton who, ding to the records and the raucous acclaim southern Californians, is the greatest sprinter world.

ton broke the world record for the 100-yard by doing it in 9.3 seconds on May 15, 1948, esno, California. Experts regard this as a su- man feat because the 100-yard record has hammered at by the greatest sprinters in the

he quarters believed the human constitu- was incapable of anything better than the ous 9.4s mark, which had been recognized five times by the international authorities— Wykoff, Southern California, in 1930; D. J. rt of South Africa, in 1931; Jesse Owens, State, in 1935; Clyde Jeffrey of Stanford, in nd Patton in 1947.

Fresno event was something of a grudge t between Patton and Lloyd La Beach, the Negro sprinter from Panama. Since Patton efused to run in the regular 100-yard event led for the night at Fresno, there were hints e was avoiding La Beach. Patton answered reeing to a special match in the afternoon.

Tension Almost Forced Withdrawal

race generated a terrific emotional tension. were four false starts (three of them by La). Patton has said since that he was so near of collapse that one more mishap would rought his withdrawal from the race.

n they finally got off, La Beach was practi- eft at the post, but at 20 yards he was only a ehind Patton and at 80 yards he threw him- rward in a mighty lunge and only missed ng Patton by six inches. When the race was d, meteorologists, surveyors and officials ver.

weather people estimated there was a one- -hour southwest wind which was slightly the runner. The temperature was ninety. gineers brought out their instruments, meas- apes and even a plumb bob. They filed an report that the track measured exactly 300 inches.

e were five watches on the race, three official o checkers. Of the three official timepieces d 9.3s and one showed 9.4s. The alternate s had 9.3s and 9.4s.

zo Stagg, referee, officially approved the and there it was—all signed up and deliv- r the august gentlemen who meet in for- eign parts and decide whether a man is a god or a mere mortal.

On the personal side, Patton is human enough, being a long thin man of twenty-five with the lean and leathery look of a Texan, even to the skin drawn taut over his cheekbones. He is six feet tall, weighs 152 and has a stride of seven feet, two inches.

Mel has been married three years; he has a daughter aged twenty-three months and a desperate ambition to return from the Olympics in London as world champion because it might help him get a coaching job.

He was a great schoolboy sprinter at University High in Westwood, a part of Los Angeles. He did 9.7s in the hundred and 21.3s in the 220. UCLA is on his doorstep, but Mel went instead to the University of Southern California in downtown Los Angeles, under Dean Cromwell, coach of the American Olympic team.

Patton was in the Navy for three years during the war, as a seaman first class and then as an aviation cadet at Jacksonville. He had a hard time getting his sprinting form back on his return.

At the N.C.A.A. meet in 1946, he qualified for the finals but couldn't do better than seventh place in either sprint event. But in 1947, the man who runs like a ghost (the easy flowing style of Jesse Owens and Charley Borah rather than the plunging manner of Charley Paddock and Frank Wykoff) came into his own. He did 9.4s three times. The last, made in the California Relays at Modesto, was accepted by the International Amateur Athletic Federation meeting this year in London on May 14th, the day before the great record at Fresno.

But 1947 was partially ruined for him by leg trouble that kept him out of competition the latter part of the season. "It's just like a cramp you get in bed," he explains. "It leaves a soreness that stays for weeks."

He didn't help any by pushing a stalled car, and in some circles his troubles are felt to stem from this excess.

He started this season very carefully, with his eye on the Olympics. For one month he did nothing but walk; the next month he jogged but never sprinted. Coach Cromwell doesn't believe in tricky training methods, and rarely attempts to change a man's natural style.

Patton has been called a fast starter but he objects to that.

"I work out with Tom Patsalis, the broad jumper," he says, "and no matter how I try I can't catch him before 20 yards. When you can't beat a broad jumper off the marks, you're not a fast starter."

Patton thinks the 100 is his best race, but Cromwell insists he is best at the 220. "Maybe the Dean is right," concedes Patton, with a shrug. "He always is." His greatest thrill was not the cracking of the world record but an occasion in 1947 in the Coliseum in Los Angeles when he beat Bill Mathis in the 100 and Herb McKenley in the 220.

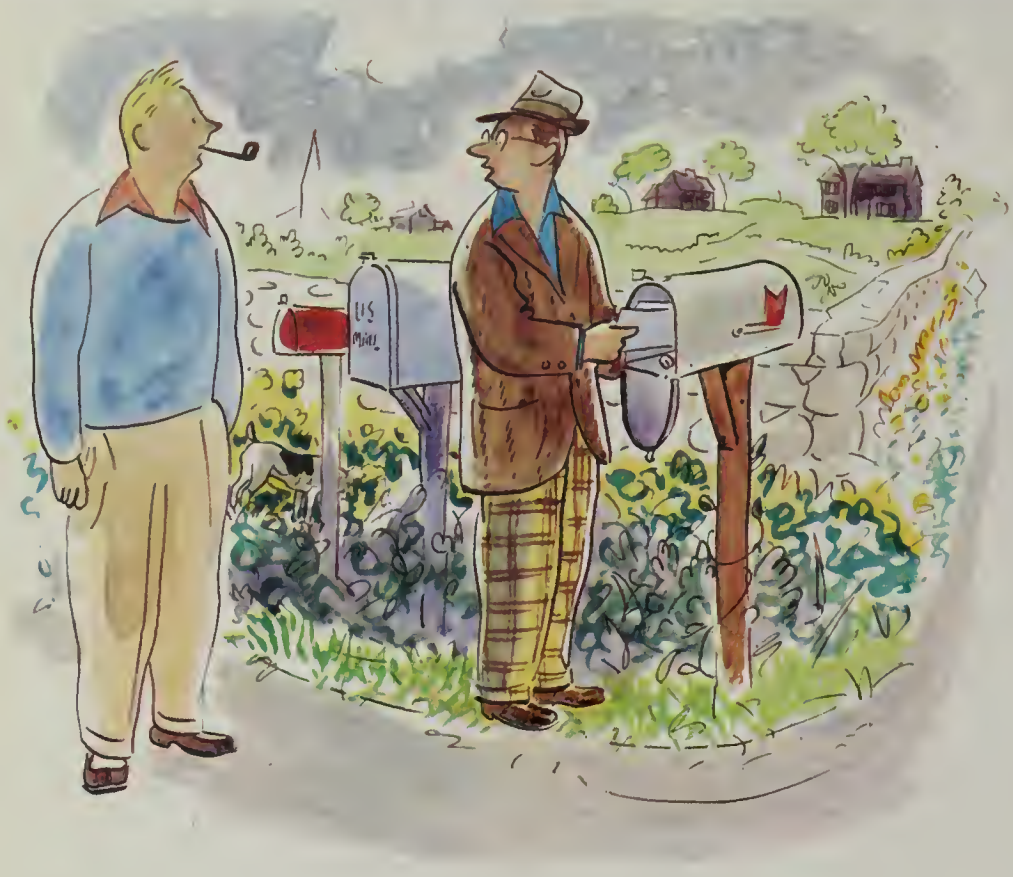
There was considerable heat over the Fresno race when Dink Templeton, Stanford coach, said it didn't look like a 9.3s thing to him. Patton added to the fire by saying: "Honestly, I didn't feel I ran a good race at Fresno. I know in my own heart that I didn't run that last 40 yards in good form. I felt I was floundering, trying to get to the tape."

Events Uphold Timers' Watches

It was generally agreed, however, that the official watches were a better guide than Mr. Templeton's admittedly keen eye, and several events occurred rapidly thereafter to clinch the argument: (a) Patton beat La Beach at Fresno; (b) He beat him by five feet in a race shortly afterward at 200 meters at the Coliseum; (c) At the Compton Relays, in which Patton didn't compete because of a leg cramp, La Beach tied Jesse Owens' 220-yard mark of 20.3s, tied the 100-meter mark of 10.2s and created a new world record in the 200 meters at 20.2s. *Ergo,* if Patton can beat La Beach every time they meet and La Beach can ruin world marks at other times, it seems plain that Patton is capable of the 9.3s record.

Now all he has to do to prove he is the greatest is to win at London. That isn't always as easy as it looks. In strange parts of the world men are working their legs into a frenzy at this very moment with little publicity to give a warning of their threat.

There was the time back in 1928, when Percy Williams, a totally unknown runner from Canada, popped up and ran the ears off everybody in sight. But if Patton doesn't tie up with his cramps the chances are slight that anybody will beat him. He has great poise as a runner and never makes a mistake in a race. Although his nerves may be breaking he will not beat the gun. This comes from Cromwell's tutelage.



"I've said this a million times to my runners," says the Dean. "Learn to react to the gun. You never see my men try to beat the gun. When they react accordingly they come out of their holes as if shot from a cannon."

Getting to the tape is all that counts with Patton. "I try to keep my mind as blank as I can when I'm there waiting to start," he says, "and then I pay no attention to anything but the tape."

Cromwell says Patton is the greatest of all sprinters, and southern California is sure the climate is responsible for the whole thing. If some monster from Iceland should beat Patton to the finish line it would be the greatest blow to Los Angeles pride since Michigan slaughtered Southern California in the last Rose Bowl game. Another one like that wouldn't be good. Patton will simply have to forget about his cramps and sail along there. ★★★

THE HIGH HIP RIDER

BY ROARK BRADFORD

TO SAY that Eutaw Graves was completely worthless would be to exaggerate his value as a sharecropper on Little Bee Bend Plantation. Complete worthlessness implies a negative quality, and there was something very positive about the way Eutaw loved to sit in the shade, pick his guitar and sing songs about how tall the Johnson grass was growing in the cotton. Yet, he was popular. The men liked him, the ladies made jokes with him and the children followed him around.

Eutaw's satisfactory financial standing at the commissary was due, chiefly, to Beena. Beena was Eutaw's ever-loving wife and one of the best field hands in the Red River bottoms. Her hoe was sudden death to grass, and the way that woman could pick cotton was the envy of many a man. And while there was a hard and fast rule on the plantation against women plowing in the fields, it had been rumored Beena threw the lines over her shoulders and drove a big two-mule cultivator team up and down the furrows while her husband lay in the shade and sang:

Oh, darlin', darlin', hit grieve me so
To see you plowin' up and down de row
But de cotton so shawt and de grass so tall,
I swear I don't b'lieve we'll make hit dis fall.

If there was any truth to this gossip, Giles, the foreman, never got around to verifying it. Eutaw's field was on the extreme back fringe of the plantation, and Giles seldom managed to get down that way. However, in the foreman's book, a man was supposed to work or "git runned offn de place."

"I don't b'lieve dat boy is worth de patience for me to run him off," Giles explained to the Widow Duck. "Efn he was, how come he ain't long gone?"

The Widow Duck laughed. "Go 'haid, Giles," she chided. "You know good as me when dat boy start pickin' his guitar and singin' dem reels, God jest natchally changes conditions in yo' heart. You lets Eutaw ride high on yo' hip."

Giles was serious. No good foreman could afford to show favoritism among the field hands. "Can't nobody ride high on my hip," he protested. "But I swear when dat boy git to whangin' dem strings and singin' dem songs he look so happy and pert dat hit make ev'ybody else feel mighty satisfied."

Eutaw was no fool. He knew exactly how he stood with the foreman and with Beena. Giles would be tolerant just as long as Eutaw's field was kept free from grass. And Beena would keep it grass-free just as long as her instinct as a natural-born cotton-raising woman drove her into the battle against the Johnson grass.

SUDDENLY in the midst of what seemed an ideal crop year for Eutaw, Beena rebelled. The first indication came at sundown one evening after she had walked all day behind Hawk and Eagle, the fastest-stepping pair of mules on the place. As was his custom, Eutaw dropped by the field at quitting time to take the mules to the barn, so Beena could go home and get his supper. Eutaw didn't believe in a woman doing all the work, and besides, it would look too suspicious if his wife showed up at the barn with the plow team.

"Dem mules," grumbled Beena, "jest about walked me to death. Seem like you c'd git me a slower-walkin' team."

"I'll git old Shotgun and Darlin' for you," promised Eutaw.

"I kin walk faster den Shotgun and Darlin'," stated Beena, "but hit would be a pleasure, after Hawk and Eagle."

At that moment a neighbor woman, Cissie Lee, who lived just across the ditch on Ringgold's Plantation, walked down the turnrow. Across her shoulder was a fishing pole, and in her hand was a string of yellow-belly catfish.

"Hit's a rule on Ringgold's," Cissie Lee announced, apropos of nothing, "which say a lady can't plow in de field. Hit's a rule on Ringgold's which say de mens got to plow in de field and de ladies kin go fishin'."

Beena was in no mood to explain that a similar rule operated on Little Bee Bend. "Ladies on Little Bee," she countered, "don't like for we's husbands to come home all tired out ev'y night."

Cissie Lee laughed. Beena did not. . . .

An hour later, Eutaw sat on his own front porch, picking out twilight-sounding chords, "playin' de seconds" to the songs of the katydids, the crickets, and the tree frogs. Half a dozen children from neighbor families were scattered about the floor at his feet, coaching him. "Play 'bout de frog waltz, when de frog went out to git his supper and dat snake got after him, and man kind! Did dat frog git hisse'f on down de road!" Or, "Play dat song about de old kaing buzzard dat didn't had no nothin' to eat for so long."

"Nawp, dat's all I'm fixin' to play," Eutaw announced. "Y'all chillun git on home to yo' supper, whilst I sits hyar and plays seconds to dat screech owl which screeches about dis time ev'y night."

The children left. From the kitchen came the noises of Beena preparing supper. Usually she worked quietly, but tonight she banged the pots and pans and grumbled to herself. "I gits mighty tired er plowin' all day in de field," she complained, "and den come home and cookin' supper on a hot stove and all."

"No mind de talk, honey," Eutaw called pleasantly. "Jest you git supper."

"De yuther ladies don't plow in de field," Beena reminded him. "Whilst I was out yonder, knockin' dem jackasses up and down de row, de yuther ladies was settin' on de bayou bank, fishin'."

"I'll catch you a mess er fish tomorrow," Eutaw promised grandly.

"I don't want no fish," declared Beena. "I jest wants to set and fish."

Eutaw noted a strangely defiant tone in his wife's voice, and he set his guitar aside. "You mean," he demanded, "you want to quit and go fishin' when hit's work to do in de field? Gal, what kind er shiftless field hand you turnin' into?"

"I mean," asserted Beena, "I'm tired er plowin' and I don't want to plow no more."

Eutaw changed his tactics. "But, baby," he pointed out, "you's mighty nigh done wid de plowin'. Hit ain't mo'n two hours er plowin' left in de field, and whar you done plowed looks so purty."

Flattery failed. "Plowin' is men's work," Beena argued. "And I don't be's no mens. I be's a woman."

Eutaw had one more argument. "Sho, you's a woman," he said bitterly. "And dat ain't all. You's a contentious woman. And you know what old Kaing Solomon got to say about a contentious woman? He say a contentious woman is a 'bomination. Now you jest stop bein' a 'bomination in de Bible, and git my supper."

Beena contritely mixed a pan of cornbread batter. Wanting to go fishing when there was grass in the cotton was a shiftless thing to do. And being named out in the natural Bible by old King Solomon was nothing short of awful. She was thoroughly embarrassed by each situation. She placed the pan of corn bread into the oven, put on water for the coffee and went to the porch. She was stung and hurt. She was also very tired.

"Eutaw, honey," she apologized, "I ain't gonter be shiftless no more, and I ain't gonter be no contentious woman no more. I'm jest gonter speak wid Giles and let him rise up hell about who gonter and who ain't gonter plow dem jackasses in we's field."

Eutaw was busily working out a complicated chord and gave no sign that he had heard Beena's threat. But when the chord suited him, he whanged the strings loudly, and sang sadly:

Ef you don't speak wid Giles
—You'll never git in trouble.
But ef you speak wid Giles
—Yo' trouble will be double.

Beena returned to the kitchen, removed the cornbread from the oven, and placed it on the table with dishes of snap beans, onions, side meat and fig preserves.

"Come and git yo' supper, Eutaw."

"I ain't hungry, jest yit," he told her. "I'm waitin' for dat screech owl to screech. I think I kin ca him in dis new E-flat minor chord I got." . . .

Next morning at the lot, Eutaw forgot to ask a slower team of mules in spite of the fact that had promised Beena. He had Beena's interest heart, but he was so engrossed in a song he composing about what a hard time a woman Beena had raising cotton and cooking and going that the slow-walkers slipped his mind. Alre the first verse of the song had come to him:

Work in de kitchen and work in de field,
Hit'll drive me to rogue and drive me to steal.
But my ever-loving husband is so kind and so t
Darlin', I'd work myself plumb to death for yo

And before he realized it, he had caught Ha and Eagle and was on his way to the field.

BEENA was not waiting for him when he rode to the cultivator. Usually she was on hand help hitch the team before she started plowing. taw waited a quarter of an hour before he saw coming down the turnrow.

"Gal, you's late," he complained. "I been ma up a purty song about how hard you works, hyar you come lazin' in late! You want me to a lie? Can't you git dem dishes washed up and to de field whilst I gits all de way to de barn gits back wid de mules?"

"I been to de barn, too," explained Beena. been speakin' wid Giles."

Eutaw could not believe it. "You been which he demanded.

"Speakin' wid Giles," she repeated. "I axed wouldn't he drap by we's field, ev'y day, and how purty hit look whar us been plowin' hit."

"You done dat?" Eutaw demanded. "Wor you know efn Giles ride down hyar and c you plowin' he'll git mad and fuss at me and bofe."

"I figger he will," admitted Beena, sullenly.

"You like to make Giles mad? Hit's a agin you plowin'."

"Dat's how come I axed him to ride by, tod explained Beena. "Cause when he come dow ain't fixin' to be plowin'. I'm fixin' to be s out yonder on de bayou bank, fishin'."

There it was! Eutaw could recognize rebe when he saw it. So he just smiled and sta plowing. Wrapping his fingers around the cul tor handles was not as pleasant as wrapping around the neck of a guitar and singing p songs. But the immediate situation was so w that his mind refused to consider it. Instea mind raced ahead to the time when things wou right again, with Beena plowing and himself ing songs in the shade.

Just how he would go about re-establishin situation, he had no idea. But he had confid "I'll trick me out some kind er trick," he pron himself. "And den I'll raley lay back and sin about hit."

The first hour, he stepped blithely behind H and Eagle. Then the sun got hot, and he beg sweat. Soft dirt worked its way into his shoes hurt his feet. He removed his shoes and threw on the turnrow. The newly plowed dirt felt go his feet, but the clods bothered his toes.

"Y'all mules walk too fast," he compla "Whyn't you slow down?" But neither Hawk Eagle varied one iota from their swift, relen gait.

BY OCTAVUS ROY COHEN

CONTINUING A NOVEL OF TENDER LOVE AND DESPERATE CR

The Story:

When young engineer STEVE BLAKE, on trial for the murder of ex-convict JEFF NULTY, is saved from almost certain conviction by the perjured testimony of a beautiful stranger, MRS. PATRICIA KINGSLEY, he is sure that she is covering for someone. Determined to find out whom she is protecting, and to remove the cloud of suspicion that sursounds him, he moves into the fashionable Casa Linda Apartments, where Mrs. Kingsley and her husband live, and where Jeff Nulty was found shot to death.

Ignoring Pat Kingsley's husband, REX KINGSLEY, who has taken over Jeff Nulty's job as manager of the Casa Linda night club, Steve takes Pat to dinner several times. She is with him one night when he finds friendly, pretty CONCHITA MONTERO, a Cuban dancer from the night club, strangled to death in his apartment. In her handbag is Steve's revolver, which has been missing since just before Nulty's murder. Ballistics tests show that this is the gun that killed Nulty.

MARTY WALSH, tough detective, who still thinks Steve killed Nulty, is now convinced that he killed Conchita, but Walsh hasn't enough evidence to make any arrests.

To complicate Steve's life even further, PETE CONNOLLY, famous jockey, asks Steve to help him get WADE RAMSAY, owner of the Casa Linda, to fire RUSTY MASON, his beautiful blond secretary. Pete figures that if Rusty is out of a job, she won't keep refusing his marriage proposals. The plan fails. Steve continues to wrestle in vain with the problem of murder, and with a new problem—his growing love for Pat Kingsley.

IV

ON CHRISTMAS EVE the Club Casa Linda was decorated as gaily as a lady of leisure who had been on a shopping spree. There were garlands of imitation holly with big, red, unnatural-looking berries. There was some real holly hanging around looking apologetic. Just inside the main entrance was a vast Christmas tree.

Rex Kingsley was in evidence, too. He was putting on only one show. It would go on after midnight, after Santa Claus had distributed his souvenirs to all the paying guests; and he moved through the crowd now trying to estimate which of the celebrities would respond to clamor for free entertainment.

I told myself that I didn't know why I was there, but I was only kidding. I knew perfectly well what had brought me: the hope that I'd ru
Pat Kingsley. Of course, she
probably at her father's home.

THE HIGH HIP RIDER

Continued from page 30

"Maybe ef I could whup up a song about dese fast-steppin' jackasses," he mused, "maybe hit wouldn't seem so bad."

He watched their steps. Eagle, tall, leggy and high-headed, took long strides. Hawk was stockily built and had to make almost two steps to one of Eagle's. This irregularity caused the doubletree to jiggle unevenly and irritatingly. Even the gifted Eutaw could not translate the situation into any kind of song rhythm. But he felt desperately in need of singing, and he tried variations on an old song:

Oh, de hawk shot de eagle, and de eagle shot de crow,
And my Beena's on de bayou, gonter catch a buffalo.

The song did not help. "I bet I sung a lie," he accused himself. "Dese mules is fixin' to walk me to death, and ain't nothin' gonter shoot nobody. And I bet Beena is fishin' wid worms instid er dough bait, and she know she can't catch no buffalo wid no worm. Yep," he concluded, "I jest hauled off and sung me a big old rusty lie."

Eutaw next began looking hopefully across the narrowing strip of unplowed field. Less than fifty yards away was the little drainage ditch which marked the lower boundary of his crop. At the pace the big team was stepping it wouldn't take long to cut that strip down to nothing.

"Another hour, maybe," he estimated, "and dis old field will be done plowed." He gritted his teeth and tried to throw his mind out of joint until the bitter ordeal should have passed.

But long before he finished, Giles rode up on Prince. "Eutaw," he greeted pleasantly, "I figgered you'd have yo' guitar along so's you c'd sing me a song."

EUTAW tried to grin, but failed. "Nawsuh, Mist' Giles," he explained. "I'm so busy plowin' I ain't hardly got time to bring my guitar to de field."

"Yo' crop looks fair," Giles said, suddenly becoming businesslike. "And I wants hit kept like dat."

"Yassuh."

"You'll git done plowin' over in about an hour," continued the foreman, "and den I want you to go back and start plowin' hit over again."

"But, Mist' Giles," protested Eutaw, "dis field is clean. Hit don't look like hit need plowin' over again."

"I don't go by de looks," snapped Giles. "I goes by de weather. Ef she come up a big rain so's you couldn't plow for a week, de grass would sprout and ruin dis cotton. So you got to kill dat grass before she git sprouted through."

"Hit don't look like hit's fixin' to come up a big rain," urged Eutaw.

"Ef hit don't come up a big rain," Giles warned, "all de moistures is gonter seep up through de cracks in de new-plowed dirt and dry up, and dat'll make de cotton suffer from a drout'. So efn she don't rain, you got to keep on plowin' to hold dat moistures in de ground. And you got to keep on plowin' to kill de grass which ain't yit come up, in case she do rain."

"Lawd, how long?" groaned Eutaw.

After the foreman left, Eutaw once more tried to throw his mind out of gear so he wouldn't contemplate the misery which lay ahead. "When I sung dat song about Giles, last night, I called him double trouble. And I was singin' de truth."

Before he finished another round, the words for a song came to his tongue, but no tune came to his ear:

Keep on plowin' in case she rain.
And in case she don't, keep doin' de same.

At noon, when Eutaw took the team to the barn for feed and water and to eat his own lunch which Beena brought in a tin pail, Little Bee Bend's happy minstrel was angry and in pain. When Johnnie T, manager and bass singer for the Old Ship of Zion Five-Man Quartet, reminded him to be sure to bring his guitar to church Sunday, Eutaw snapped, "Efn I feels like hit, I will."

Johnnie T was shocked, but he managed to call his quartet together. "Le's try dat trouble song," he suggested. "And, Eutaw, whyn't you practice doin' plink-plonk, plink-plonk wid yo' mouf like hit was a guitar. Hit'd be might' nigh as good as havin' two second tenors in de quartet."

Eutaw merely glared at Johnnie T. His feet hurt, his back ached and his skin was chafed and smarting. He sulked in the shade of a little elm tree in solitude until Giles tapped the back-to-work bell.

By sundown, there was no more pain in his feet nor smarting on his chafed legs. Nor was there any anger or self-pity in his mind. His whole being, mental and physical, was one big, dull ache.

He dragged himself upon his front porch and flopped in a chair. His guitar rested against the wall within easy reach, but he ignored it.

Beena was gay and chipper. "I done pumped you a big washtub full er water, on de back porch, efn you wants to bath off," she announced. "I always feels more better when I baths off after plowin'."

Eutaw rolled his eyes, sadly. "I'll bath off after supper," he mumbled.

"Git up and git washed," commanded Beena. "I done tuck de patience to catch a mess er dem yaller-belly catfish for yo' supper, and you ain't gonter eat none er my catfish whilst you's dirty. Now git clean."

Eutaw went through the motions. But soap and water and fresh clothing on his skin did not help much. His ache was more than skin deep. It was bone deep; it was soul deep.

He ate without appetite, although his capacity held out as long as the food lasted.

"Now, darlin'," suggested Beena, cheerfully, "whilst I'm washin' up de dishes and all, whyn't you set on de porch and play me dat screech owl song you missed last night?"

"Fish," said Eutaw, drowsily, "me sleepy." He got up from the and managed to fall across the bed.

The ne day was little different mules walked fast, the sun shon When Eutaw got home that evenir seat of his pants was just about dr out his tracks.

By the evening of the third day, began to show concern.

"Honey, you ain't picked me n on yo' guitar since I don't know v she reminded him. "Whyn't you p dat song all about how you tuck me f'm big old Buldickie, and marr fool outn me, right in front er my

Eutaw rolled his eyes sadly. "I sleepy," he said.

THE next morning when Giles Eutaw's field, he said, "Son, yo like you's offn yo' feed. Yo ailin'?"

"Nawsuh, I ain't ailin'," said Eut

"Hawk and Eagle steppin' to for you?" he suggested.

"Nawsuh," said Eutaw. "I'm plow f'm sun to sun. I'd as soo fast as slow."

Other questions popped into th man's mind, but prying too deep another man's personal affairs helped Giles get a crop of cotton After all, Eutaw's field was in good Beyond that, Giles could have no terest. He galloped off, dismissing from his mind as soon as he was sight. He had sixty-odd other plow to keep after, and that was no sm when the fields were free of gras man objected to plowing when he see the grass wither and die in the f But to believe you are killing grass unsprouted, "in case she rain," you are preserving unseen moistu case she don't rain," is a great st any field hand's imagination wh sun is hot and the fishing is good.

disremembers," evaded the fore- 'Sm like I disremembers hyarin' a song about anything, de last days."

He rode away. He had discussed fishing; not Eutaw's business. What the Widow Duck made of it would be her business, and Giles felt comfortably certain that the wise old woman would make plenty of it. . . .

The Widow Duck followed the approved etiquette for a late-arriving fisherman when she reached the bayou where Beena was fishing. She bowed a pleasant but silent howdy to Beena, unwound her line, threaded a worm on the hook, sat down noiselessly, and dropped her hook into the water. For a few minutes nothing happened. Then her cork began bobbing. She yanked out a fat yellow belly.

Beena nodded approval. The Widow Duck rebaited, and soon another catfish lay on the bank. A few minutes later a third one had tangled fatally with the Widow Duck's hook.

"Beena, dem cats is bitin' good," the Widow Duck announced. "I done snagged three, and you ain't even got no nibble. Is you sho you got yo' hook baited good?"

"Baited and spit on," Beena said, sadly. "Only I'm fishin' wid dough bait."

"Tryin' to catch buffalo, at dis time er de year?" the Widow Duck demanded.

"I know de buffalos won't bite," admitted Beena. "I just kind er hoped dey would."

"Catfish is more better, anyhow," snorted the Widow Duck. "How come you so dead sot on catchin' a buffalo?"

Beena squirmed. "Mis' Duck," she said, timidly, "efn I don't catch no buffalo, den Eutaw done sung a lie."

The Widow Duck tried to figure that one out, and failing, she commanded, "Speak on, daughter. You speakin' wid de tongues er men."

BEENA explained: "Eutaw ain't put a hand to his guitar in four whole days, and when Eutaw don't pick his guitar and sing and go on, his name ain't hardly Eutaw no more, hit seem like."

"Eutaw been workin' too hard, on account er you axed Giles to ride by de field ev'y day," summed up the Widow Duck. "I'll keep Giles away f'm de field, and you kin git to plowin'. Quick as Eutaw git rested up, he'll pick and sing."

"Dat's what I figgered," said Beena. "So yistiddy, quick as Giles rid by, I tuck de plow and put Eutaw in de shade. But last night he couldn't pick a lick. He claim de last song he sung was a lie, and hit's on his soul."

"Eutaw singin' lies?" demanded the Widow Duck. "Hit don't sound like him."

"He claim hit's de onliest lie he ever sung, and dat's how come hit's on his soul and he can't sing no more."

"What kind er lie did he sing?" asked the Widow Duck.

"He was plowin old Hawk and Eagle," Beena recounted, "and he felt like he needed to sing a song. He didn't had his guitar and he didn't had no song. But he sung one anyhow. All about old Hawk shootin' old Eagle, and old Eagle shootin' a crow and whilst dat was takin' place he sung about me bein' on de bayou bank, catchin' a buffalo. Dat's how he sung hit, but I wasn't catchin' no buffalo. I was catchin' catfish."

"So," summed up the Widow Duck, "you figgers ef you kin catch a buffalo dat'll make Eutaw's song come true and he'll pick and sing some more?"

"Yas'm," said Beena.

The Widow Duck weighed the situation carefully. "Gal," she concluded, "you's in a mess. But be not disencouraged. God will change conditions."

"I hope somebody change conditions," wailed Beena. "Eutaw ain't happy onless he's makin' songs, and when Eutaw ain't happy he look so sad outn his eyes dat hit makes me too sorry."

"De best you kin do right now," the Widow Duck counseled, "is git out yonder and take de plow f'm Eutaw."

Beena glanced toward the sun. "I kin

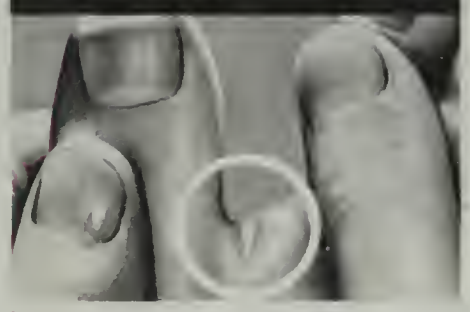
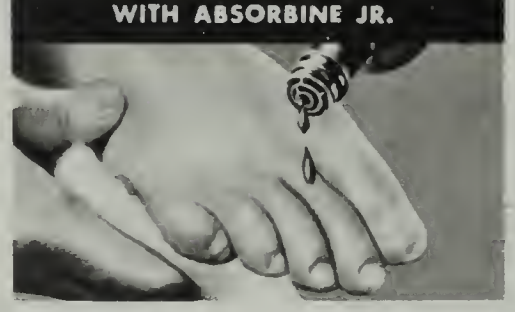
3 out of 4 victims got relief with Absorbine Jr.



● To kill laboratory cultures of the Athlete's Foot organisms is one thing. But to kill them on the *living tissues* of human feet is far more difficult. Because in some cases the organisms burrow so deeply under the skin that medication doesn't *reach* them!

When famous Absorbine Jr. was tested—under strictest clinical control!—3 out of 4 sufferers tested got relief from the painful symptoms of this stubborn skin condition!

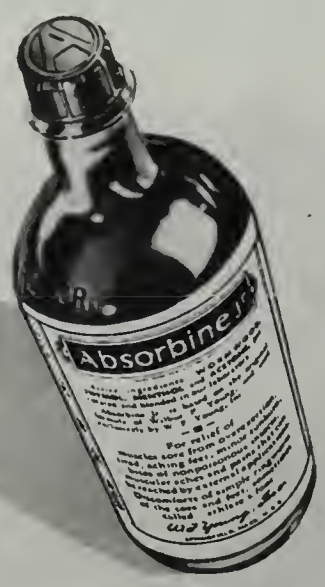
Also, in addition to *killing the Athlete's Foot organisms that it contacts*, Absorbine Jr. benefits you 4 *other* important ways:



1. It dissolves the perspiration products on which Athlete's Foot organisms thrive.
2. It dries the skin between the toes. 3. It relieves Athlete's Foot itching and pain.
4. It cleanses and in this way helps heal broken tissue.

CRACKS WARN OF DANGER

Examine the skin between your toes tonight! Is it cracked, raw? These signs often mean that your feet have been infected with the organisms that cause painful, itchy Athlete's Foot. In warm weather they multiply *fast*.



DRENCH THESE CRACKS WITH ABSORBINE JR.

Pour it on, full strength, night and morning. Guard against reinfection. Boil socks at least 15 minutes. Don't share towels or bath mats. In abnormally stubborn or severe cases, consult your doctor. Get Absorbine Jr. at all druggists, $1.25 a bottle.

Absorbine Jr.

W. F. Young, Inc., Springfield, Mass.

Play Safe! Daily Hygiene!

Help ward off Athlete's Foot by applying famous Absorbine Jr. to your feet every day! It's also wonderfully cooling after bathing.

jest about stand walkin' behind dem mules de rest of de day," she said.

The Widow Duck strung her fish on a willow twig and waddled up the turnrow toward home. Seeing Giles across the field, she waved him to her.

"I been speakin' wid Beena about Eutaw," she told the foreman.

"I ain't got de patience to hyar nothin' 'bout hit," snapped the foreman. "I ought to done run him off de place. He a no-good. He never was no good. He make his wife plow in de field, and when I put a stop to dat, he turned ev'ybody agin me. I'm gonter run him to whar de Southern crosses de Dog."

"What Eutaw did which make you make up yo' mind?" she demanded.

"Hit ain't what he done," declared Giles. "Hit's what ev'ybody else didn't done. I comed up on Johnnie T, de best plow-hand I got, layin' back in de shade, singin' 'plink-plonk, plink-plonk—yas.'"

"He was practicin' for de Five-Man Quartet," guessed the Widow Duck. "Dey gonter sing next Sunday."

GILES demanded indignantly: "And what you reckon I found Dock practicin' for? You know I kin always count on Dock to keep turnin'."

"Dock," admitted the Widow Duck, "is mighty stiddy."

"I been favorin' Dock ev'y since he sprung his ankle," elaborated the foreman. "I give him a slow team, and told him to take hit easy. But he didn't even take de patience to shade his team. Whilst his mules was standin' in de sunshine, Dock was over under a chinaball tree makin' yab-yab talk wid a frizzle-haided gal f'm Duke's Bend."

"Hit don't sound like Dock, for true," the Widow Duck declared.

"And hit's been like dat and a heap more of de same, ev'y since Eutaw won't sing wid 'em at de barn. Ev'ybody fussin' and quar'lin' and won't-workin'. I'm gonter run him plumb to Italy."

"You done runned dat boy off," the Widow Duck announced, sadly. "You done runned him plumb outn his mind. He worked so hard dat he too tired to sing, and when he can't sing he jest hauled off and went crazy. Giles, dat's a shame to work a man crazy."

"I didn't work him hard," defended Giles. "Hit takes de same thing to kill Johnson grass in his field as hit do in de yuthers. De only thing is, I made him do de plowin' instid er lettin' him make Beena plow. Beena been plowin' all summer. How come she ain't crazy?"

"I found Beena fishin' for buffalo," said the Widow Duck in a hushed voice. "In de dead er summer!"

"Dat make her crazy?" asked Giles.

"She got to set dar f'm now to next spring to catch a buffalo," said the Widow Duck. "I don't call dat actin' smart."

"I don't feel so good, myself," said Giles. "I wonder—"

"Yeah, you's right," broke in the Widow Duck. "Eutaw de cause er hit all, and he can't help hit no mo'n you kin. Ev'ybody like to hyar him sing, and when he won't, ev'ybody feel mighty sad."

"Well, git him to singin'," ordered Giles. "I got a crop er cotton to make and efn Eutaw got to sing de grass outn hit, well, make him sing."

"He won't sing," the Widow Duck reiterated. "I told you he done worked hisself crazy."

"I'll make him sing," threatened the foreman. "I'll—"

"Giles!" warned the Widow Duck. "How long since I drug you across my lap and paddled yo' behime?"

Giles laughed. "Too long, I reckon, Mis' Duck," he admitted. "Why?"

"I don't know why," she said. "But f'm de way my mind gittin' shaped up, hit look like efn you might ride down to Eutaw's tonight, say about a hour after moonup, and start raisin' sand about de way things goin' on de place, hit might be dat I'd git mad and drag you my lap and paddle de fire outn y

"I don't know what you got mind," the foreman stated, "but e git folks in high gears again, I'm Cause hit's sho liable to come a bi He glanced at the cloudless sky. ' hit ain't liable to." . . .

The Widow Duck got around t tation for the remainder of the aft Part of her plan was to get those r fected by Eutaw's indisposition g at the home of the unhappy song hope for some sort of a solution taw's troubles—and then have Gi up and raise enough of a ruckus t tain his own dignity as foreman position of complete disinterest affairs of a field hand.

B'r Charlie, the preacher, was just in case the solution included getting religion all over again quiring professional aid. Uncle who loathed B'r Charlie, was in counteract any evil which B'r C presence might generate. The and a few neighbors completed th

The Widow Duck opened the with a brief, factual statement situation. Everybody knew that had plowed the field while Euta and nobody cared. But Beena hac the issue with Giles, and now Eut to plow. Beena had done a wrc that was water under her bridge Beena was willing to plow aga Giles was willing not to notice Eutaw couldn't sing any more, he had sung a lie. She called on for a fuller explanation.

Eutaw was in his Sunday clot his guitar was within easy reac even in the pale light of the moo ple could see how sad Eutaw loo of his eyes. The atmosphere wa funereal than festive.

"Used to," Eutaw explained, somethin' made a noise, hit didn to me like no noise. Hit come to a song in my years. So I'd git m and pick out de song and mak words. And den, ev'ybody feel g dat make me mighty satisfied."

Everyone agreed he spoke w sonableness.

"But now," he continued, sorr "when hit's a sound, hit jest say, you sung a lie. You sung a big o lie.' And I can't pick dat on m nor neither sing hit."

B'R CHARLIE suggested tha had a visitation of evil "Somewhar in de Bible," he ex "hit tell about de time old Kai byka-neezer found a man full sperrits. So Nebbyka-neezer don things and put dem sperrits in a hogs, and de hogs runned and in de bayou and got drownd sperrits and all. Now, efn we ta hogs—"

"You ain't gonter drown no dis place, you old hypocrite," Uncle Henry, and B'r Charlie w

"What dat lie song you sung, asked Cissie Lee.

"I was plowin' a big old pair named Hawk and Eagle," he ex "but I couldn't git me no song. hauled off and sung, anyhow:

Oh, de hawk shot de eagle, and shot de crow,
And my Beena's on de bayou catch a buffalo.

"You didn't sing de right wor gested Uncle Henry. "When young sinnin' man, dat last line say: 'I'll ramble in de canebr catch a buffalo.'"

"Ain't no buffaloes in de can observed Beena.

"When I was a young sinnin' m plained Uncle Henry, "us fast was fast—used to call a lady a He grinned. "I caught many a b de canebrake, in my day and tim

ain't de way us ladies used to sing when I was a sinner gal," snorted ow Duck. "Us used to sing:

'awk shot de eagle, and de eagle t de crow.
ou shake hit at yo' darlin', well, ke hit kind er slow.

one except Eutaw laughed at the woman's demonstration, which anied her song. Eutaw merely sadder and pointed across the Yonder come Giles, ridin' old ke he mad at one and all."

oreman galloped up, and he lost me in getting to the point of his e had made up his mind; things ing into high gear, come sunup. ooled around with Eutaw and he e easy on Dock, and that made dy else slacken down. "Dock's o sore to plow stiddy in de field, ame ankle all okay to walk down night. Johnnie T lays in de ingin' plink-plonk—yas, whilst grows in his field. Buldickie take Dave's wife away f'm him, sends Dave up to de hills to talk wife's mamma instid er plowin' ld. Joe Boody and Eiler gittin' fist-fightin' when hit take all de fe of 'em got to do dey work in nstid er studyin' up devilment to other. And old Grant Chism rocks at de young mens 'cause kes de young ones more better —"

you, Giles," accused the Widow iolently, "spite-ridin' Eutaw's se he got de cleanest field on instid er some yuthers which er on yo' hip."

Duck, you keep outn dis," or- foreman, angrily. "You run de nd I'll make de cotton."

dled you when you was a baby, aid the Widow Duck menac- nd you ain't too big now." She l threateningly. "I'll drag you horse and wear you out."

out," warned the foreman, night kick you."

addle you *and* Prince," she "You come down hyar yippin' hat's water under ev'ybody's d den say ev'ybody got to git in s. Whyn't you tell folks what dey got to do, instid er how fast dey got to do hit?"

"I'll tell 'em what," snapped Giles. "Dock, you got to catch Hawk and Eagle tomorrow, and stop lazin' behind Shotgun and Darlin'. Johnnie T, you got to quit plink-plonk—yassin' and git to plowin'. And, Eutaw, you can't wear yo' field out runnin' up and down hit wid Hawk and Eagle. You got to catch Shotgun and Darlin' in de mornin', and plow slow. And Miss Duck, you got to keep outn my business." He wheeled Prince about and galloped off.

After Giles left, Eutaw shyly reached for his guitar, and picked searchingly at the strings. "You know, Mis' Duck," he admitted, "I reckon I didn't really sing no lie. I reckon I jest tried to sing a woman song like hit was a man song."

"How you mean, Eutaw?" she asked.

Eutaw picked soft, wistful chords as he explained, "Hit's comin' to my years, now," he said. "Hit say Hawk is more stouter den old Eagle and he kin shoot Eagle any time he want to squat down and pull. And Eagle's so long-laigged and fast, he kin shoot de crow—Beena ain't no crow, but she dark enough to be a crow—and you got to shoot things wid a shotgun. So dat make Hawk and Eagle shootin' Beena in de first line, leavin' only old Shotgun. Den in de next line, old Darlin' is shakin' hit slow alongside er Shotgun, wid Beena trompin' along—" He picked soft, rhythmic beat that sounded exactly like Beena's steps in newly plowed ground. "Beena, honey," he said, "I'm gonter catch old Shotgun and Darlin' for you, in de mawnin'."

Beena drooled pure love. "Eutaw," she said, "you de sweetest." . . .

ON HER way home that night, the Widow Duck passed the foreman's house. He was waiting for her.

"Ev'ything satisfied?" he asked.

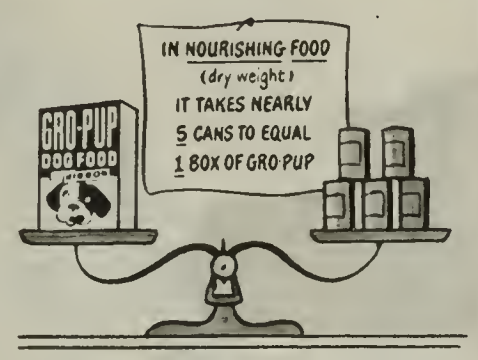
"Satisfied," she confirmed. "Eutaw done had dat one figgered out before me and you. He picked a nice little song about Shotgun and Darlin'."

Giles grinned. "I swear I'm gonter run dat no-good plumb to Italy, one er dese days."

"Naw you ain't, Giles," she told him. "Eutaw ride too high on yo' hip for you to run him off."

THE END

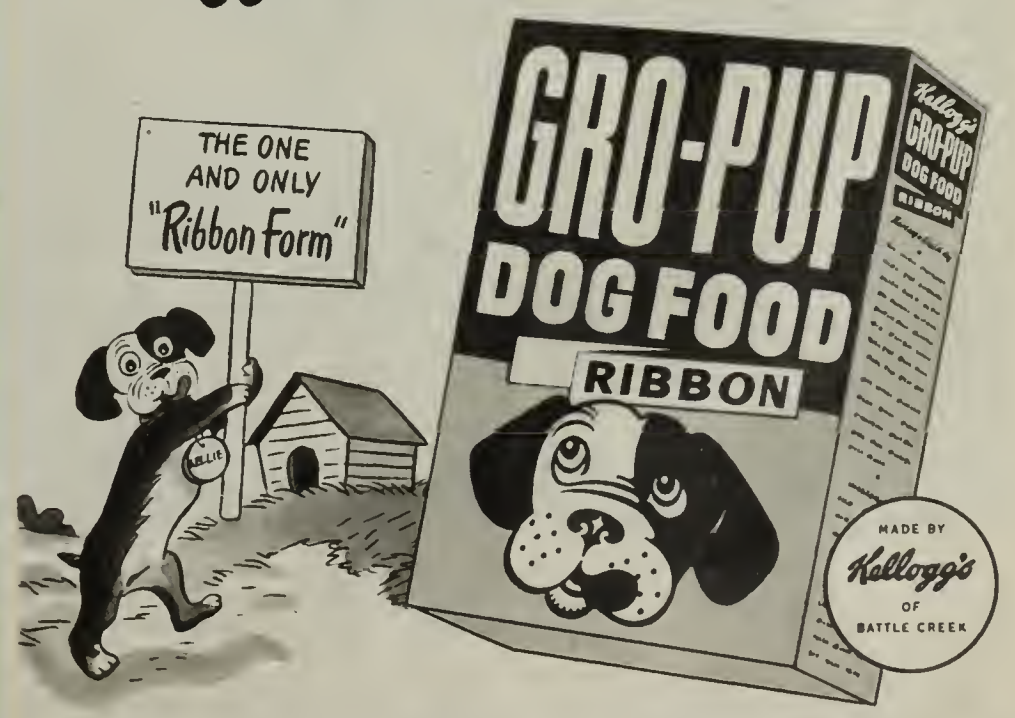
"This certainly has come as a surprise" VIRGIL PARTCH



"Hoot! I'm eatin' gr-r-and!"

23 WHOLESOME INGREDIENTS IN TASTY, TEMPTIN' GRO-PUP!

Super-tasty Gro-Pup contains every vitamin and mineral dogs are known to need. A blend of 23 wholesome ingredients—for get-up-and-go, for perky playfulness. And Gro-Pup's the *only* ribbon-type dog food. Toasted and crispy, dogs *go* for it!



"Mon! I'm saving almost half!"

Water! Do you know it's the biggest single ingredient in most canned dog foods? . . . they're 70% water, only 30% food dry weight. In food, it takes nearly 5 1-lb. cans to equal 1 25-oz. box of Gro-Pup. It's 92% nourishing food! With good Gro-Pup, you save almost *half!* (Comes in Meal and Pel-Ett form, too.)

Continued from page 13

her pettiskirts and climb down in that chute, on top of Guided Missile. Maybe she would forgive us for the loud shirts if she knew how sudden it can get out there. He was still smiling when the man's voice answered.

"Yeah," said the man. "Strictly a racket, now. These fancy jokers would starve to death on a real ranch. This stuff is nothing but a vaudeville act."

The smile faded off Jeff Hastings' face. He frowned and rubbed at his jaws with a gloved hand. This fellow is a mite unfair, he thought, and turned around. There were three people in the box behind him, and the girl caught his eye first. She was tall and lovely. A look of hauteur was written in every move she made. The man was about her age and had the same tended look. The other woman was older, but just as expensive-looking.

The man and the girl were looking past Jeff, but the other lady was not. Her glance tangled with his, and for a second they stared at each other—he in appraisal and she in amused contemplation. Like she's at the zoo, thought Jeff, turning around again.

He was still slumped on the fence when Junior Bean climbed up to sit beside him. Junior was a thin boy, and in the tight levis he seemed to have no rump at all. A smear of dirt darkened his cheek, and his forehead glistened.

"Well, I dogged it again," he said unhappily.

"Not too bad," answered Jeff. "You was working the spurs so wide you unbalanced yourself. Don't crowd the cantle so much. You got to go along with the horse. It wasn't a bad ride."

Junior lighted a cigarette, frowning into the cupped flame. "First part wasn't so bad," he muttered, and Hastings backhanded him lightly and went sliding to the arena floor. He moved with a peculiar hitching gait that was partly saddle roll and partly a broken hip he had earned at Cheyenne one year. Men called out greetings as he crabbed along, and he answered by throwing up his head a trifle. It saved talking and got the same result. He was outside the arena and headed for his tack room when Guy Dobson hailed him. Dobson was a rumpled, thickset man and all his pockets seemed to be jammed with papers, for he was road secretary for the Rodeo Association.

"You still in both events?" asked Dobson, his cigar angling up and down.

"Yep."

Dobson took the cigar out and spat. "Too much, Jeff. You're too damned old for it."

Hastings grinned at the tips of his boots. Every year it was the same. "No, Guy," he answered pleasantly, "I ain't old. Just quaint."

WHEN they relayed the signal, Jeff toed into his left stirrup lightly and swung aboard. He was under the archway of the arena gates, but still out of the crowd's sight. Taking a deep breath, he settled his hat firmly and patted Conquistador on the neck. After checking his belt and gloves, he looked up and nodded, dark face impassive. The skeins of blue smoke hovering in the rafters wavered as the address system came on.

"Next bulldogger," announced the horns, "and a distinguished fixture of this rodeo, is Jeff Hastings of Plano, Texas, two times World's Champion All-Around Cowboy . . ."

There was a burst of applause, falling out of the tiered seats like a waterfall, and Jeff galloped out and reined Conquistador up sharply. The golden horse reared, front feet pawing, and the cowboy swept his hat off. Wheeling, he turned back toward the chute, after glancing briefly at the box where the two women and the man sat. When his hazer nodded, Hastings murmured to the chute men and the gates swung open.

It was a medium steer and it broke straight out, front legs winging. The two horsemen boxed it on the run, and as Jeff leaned down he knew he had a chance for good time. He was almost out of the saddle when the steer slackened and fell behind the stampeding horses.

CURSING bitterly, Jeff cut a tight turn and thundered for the far wall. When the steer came around, he banged Conquistador in close again, knowing he had lost six seconds. Hands outspread, he launched himself and for one dangerous second seemed to be hanging in space, falling with outflung arms.

His clutching fingers closed over the steer's horns and his body pivoted down, legs thrust forward and boot heels bouncing as the steer's drive carried them forward. When the steer stopped, Jeff slipped his off hand under the sweaty muzzle and started twisting the head. Slowly, under the hush of the crowd, the little man in scarlet strained and the steer's head turned. When the circle was half done, the animal's braced legs buckled and the body flopped over. Jeff wriggled free and jumped up, fanning the oiled sawdust from his pants with both hands.

"Time for Jeff Hastings," said the horns crisply, "was sixteen and two-tenths seconds—"

There was more applause, but not so heavy, because it always looked faster than it was. The crowd was disappointed. The hazer brought Conquistador around and Jeff swung up. He went cantering out of the arena to a rippling surf of handclaps. The hazer was shouting at Hastings; he was apologizing for letting the steer break, but Jeff only winked at him and rode on out. Junior Bean was waiting at the tack room, and Jeff swung off the horse neatly. Not vaulting with both feet, because too many horses in too many shows had sapped a lot of the spring from him. Now he saved it all for that brief moment before the crowd.

"Sounded good," said Junior, unsaddling the palomino. "What was it?"

Jeff hunched the fatigue out of his shoulders and rubbed at his neck. "Little over sixteen," he answered. "He stopped on me or I'd 'a' shaded ten."

Junior was grinning into the flaxen mane. "You ain't never satisfied. Sixteen will get day money."

"Might." Jeff took off his gloves, went into the tack room and washed his face. "Let's go get a drink and eat something," he called.

"Roger," answered Bean. "Soon's I take the champ down." The tall boy led the horse away, into the barn across the alley, and Hastings combed his hair, feeling irritated. "Roger." Airplane talk in the horse stalls, he thought. Maybe the glossy people in the box were right. Maybe it was just vaudeville. . . .

Their passage into the Buckhorn was, as always, in the nature of a triumphal entry. The same cluster of kids was at the door, wanting autographs, and as Jeff balanced the pads and made his scrawl, he remembered how all this had started. It was the cereal ad, the full-color shot of him roping a calf, with a loud lettering over it to the effect that Jeff Hastings, internationally famous cowboy, never ate anything for breakfast but Peppies. If he couldn't get Peppies, the ad implied, Hastings grew sulky and wouldn't eat anything.

Remembering the pictures, plastered on billboards and in magazines, Jeff smiled. Now he nodded to all his friends, and when they were really his friends he grinned or winked. He and Junior got a small front table, and ordered two bourbons. He had taken the drink and was savoring its warmth when he heard the voice again.

"Well, well," came the ironical comment. "The clowns are here." It was the man's voice.

Jeff put his empty tumbler down and sighed. Out on the range, when cattle got excited and ready to stampede, the men who handled them said they were "choused." Now Jeff Hastings was beginning to feel a little chousey himself. He made a neat wet circle with the bottom of the tumbler, and when Junior Bean heaved up, the older man pushed him back into his chair.

"Maybe," the younger woman pl lazily, "it's all part of the act. M they get extra money for providin mosphere between shows."

The chair scraped as Jeff stood Moving with that fluid, hitching mo he took three steps and was at the c table. The three people from the watched him come, amusement fain their faces. The man looks a little loa thought Jeff; must have had the b with him all the time. The women even more alike close up. They gla at each other when Jeff put his hand the table.

"Folks," said Jeff mildly, "you for tickets to the show, so I suppose bought the right to talk about the formers." The older woman had fingers on her chin, and Jeff figure man would outweigh him by tw pounds. "But not in here," he wen "Regardless of what you think of r cowboys as a breed, in here we're having a drink off duty, quiet-like."

"Now, really—" said the you woman.

"This stuff"—Jeff pointed at his ing shirt—"is a trifle loud, but we another show to do before long. It polite to make rude remarks a clowns and atmosphere."

"I assure you—" began the woman, but Jeff cut in on her smo

with sweat and his cheek was bruised. But he didn't seem angry. He kept staring at Jeff with a kind of fascination.

"Naw," said the cowboy. "No harm done. We was just practicing."

"I see." The cop put his charge book up. "Just in case you ever decide to have a real fight, eh?"

"That's it." Hastings bowed slightly to the two ladies and went back to his own table. The crowd drifted away, and Junior went into an impassioned tirade about what a rannie Jeff was to give away fifteen years and twenty pounds. Hastings told him to hush, and they had another drink and ordered steaks. When they got up to go, the table behind them was empty.

AS HE dressed for the arena the next afternoon, Jeff could tell the crowd was big. That anticipatory rustling was louder than usual. Opening the closet door, he glanced over his gaudy wardrobe. His face and shoulders were still stiff from the fight, and, smiling a little wryly, he pulled out a dark blue shirt and put it on. It was the most subdued garment he owned, and he admitted to himself that he was wearing it because of what the fashionable trio had said the day before. He was adjusting the flaring collar when Junior Bean sidled in.

"Lady here, Jeff," he drawled. "Wants to see you."

"Okay." Hastings turned around and had a moment of complete surprise. It was the lady from the box, the older one. She wore a coat of lustrous brown fur, and a chaplet of bright flowers was woven into her hair. She held out a slender hand and he shook it briefly.

"I'm Mrs. Evans," she said, her dark eyes directly on him. "I came to apologize about yesterday."

That startled him again, and he swept his coiled lariats off the only chair and motioned at it. She sat down gracefully, but kept her eyes fixed on him.

"Why, ma'am," he answered; very formal, "that's hardly necessary. I had no business getting so provoked."

She smiled at that, and Jeff thought of the stars over Laramie, on a bright night. "Nevertheless," she went on, "we owe an apology. My daughter feels the same way." The red curve of her mouth deepened with mirth. "My son, Dan, feels that he has already—rendered a certain amount of apology."

Jeff's pulse was beginning to hammer. "The boy fights very well, ma'am," he murmured. "But he had a few drinks and I went at him without much warning." Stooping, he picked up one of the ropes and turned it nervously in his hands. "Nice of you to come back like this, but no apology was necessary."

"Fine. We'll be friends, then?" She rose and held out her hand again, and he took it gingerly. Her fragrance made him uneasy. "Will you and your friend have dinner with us?" she asked.

They were coming a little faster than Jeff could field them. He said, "Ayannh," and coughed, and dropped the rope, and said he and Mr. Bean, Jr., would be honored. Mrs. Evans nodded and moved toward the door, and he rushed forward to help her down the step that was all of three inches high. She thanked him and was going away when he called out, "Hey!" and immediately cursed himself for bawling out so crudely. "I mean," he went on, "you might enjoy the calf roping this afternoon. Horse does most of it, and I got the best horse in the world—"

She was smiling again. "I'll watch very closely," she promised. "The horse, I mean." Shrugging the coat around her shoulders she went swinging away on absurdly high heels. Now I wonder, mused Jeff from the doorway, where Mr. Evans can have got off to? Turning, he went inside, ripped the dull blue shirt off, and changed into the suit of pure silver brocade, the one he had worn before the King of England.

Junior Bean sauntered back into the tack room and stood watching silently. Although Junior hadn't said a word, Jeff told him to shut up. Then he grabbed his ropes and bolted out the door.

The roar was there, as always, and Jeff waited nervously, praying for a good calf. When the flag dropped, he fed Conquistador the spurs, and the golden horse shot forward. The calf was big, but it went straight, legging wildly. As he made the throw, Jeff's lips tightened. The loop snaked out, flared, and the running calf's head was in it. When the line tightened, Conquistador stood like a rock and the calf found the lasso's end and did a complete flip.

Backing up slowly, the horse kept the line taut from saddle horn to calf, and Jeff peeled off and went running down the rope. He grabbed the bawling animal, flanked and flopped it with a solid thump, and made three ties so fast his hands blurred. When he stepped back, the flag fell again and the crowd voice rippled in excited conjecture. One of the judges dismounted, turned the calf over, and inspected the tie. It was secure, and, as Jeff remounted, the loud-speaker horns boomed hollowly.

"Time for Jeff Hastings," said the voice, sounding pleased, "a new record for this arena is ten and five-tenths seconds!"

That turned them loose. Bedlam washed out of the packed stands until the smoky air swam with it; it was a thunder that kept shaking the afternoon. Jeff put the palomino smartly across the tanbark to a spot directly under the box. There, with uncovered head, he made the horse kneel gracefully three times, and went riding quickly out of the arena. Applause was still churning behind him and most of the people were standing up, but he did not go back in.

WHEN the dinner party sat down, both cowboys were dressed so somberly, in dark suits and conservative ties, that they looked like coffin salesmen. Jeff had insisted on this. Dan Evans was laughing and pointing out his bruises, and Mr. Bean, Jr., was beaming idiotically at young Angelica Evans. All in all, things were progressing nicely. Mrs. Evans had become Ruth; she wore a sheath of wine taffeta that flared around her bare shoulders, and the faint perfume slugged Hastings again. When they got up to dance, he had the slightly dazed look of a man under anesthetic, and he asked her casually how was Mr. Evans these days.

She smiled, moving into his arms, and asked him how was Mrs. Hastings these days. That was in the nature of a minor bafflement, since there was no Mrs. Hastings, but Jeff thought it might not be insurmountable. He was stiff to the music, at first, but she went so neatly to his lead that he relaxed and moved out with dawning appreciation. When trumpet notes showered an end to the number, she clapped her hands with delight and said he was a superb dancer. Jeff grinned and answered that many new things were drifting into the Southwest, like dial telephones, and Cellophane, and even the samba. She laughed out loud at that.

Somehow, during the next number, he allowed himself to be wheedled out of pertinent information. His ranch in Furr County (which happened to be larger than the state of Rhode Island), his college days at Hardin-Simmons, and certain other matters of personal interest.

She was properly attentive, and when the music stopped he left her standing in the center of the floor and walked to the bandstand. The musicians had finished their set and were breaking up. Hastings' hand turned green with currency, and the band leader, thus stayed, said yes, they knew the number. Yes, they would play the number. For that kind of money his glass-blowers would play it skillfully, putting in all the notes. So, while the orchestra sat back down and swun Lady Be Good, the cowboy turn Ruth Evans and took her in his again.

"It's a beautiful song," she said q

"It's the one for you," he ansv and they moved smoothly away strings rippled out the lovely melo was a moment of some enchantme when the music stopped they were a trifle subdued.

"We could not ever be happ gether," said Jeff abruptly.

"No?" She looked startled; th of the music drained off her fa gave way to faint surprise.

"No," repeated Jeff. "It would unequal contest. Never the twain– turned toward the table, but she c him.

"You are an insufferably co man," she said, a flush mantlir cheekbones. "And a very prej one."

"Yes, ma'am," he answered s "But I bet we could have a lot finding out why."

"Why what?"

"Why we couldn't ever be hap gether."

"Really!" She was blushing high "I never heard—"

"But you will, ma'am. You w answered politely, and handed he to the table with a flourish.

AT MATINEE time the next noon. Jeff Hastings stood bef mirror for last-minute inspection. blue pants were snugged into his stitched boots, and he adjusted hat to a jaunty angle. As he was to pick up his ropes, Junior Bear shadow fell in the doorway.

"Oh, my! Got on his velvet c britches," sniggered Junior. Hasti not turn around; he was seemin disturbed by such ribaldry. "Ai going to use just a dab of rose back of the ears?" inquired coarsely. Jeff turned, smiling, boy knew that look of old and treated swiftly.

He was twenty feet away and up speed when one rope walke the ground and noosed his righ The other hissed over his head a ioned his arms. Junior, arrested flight, took off on a soaring arc to the ground with a grunt. Hu Jeff walked up and trussed him s to a near-by bale of hay.

"More respect for age and Junior," he admonished, and over Conquistador's rump into dle. e result of an exchange of views cow which took place on the gust of this year, I ascertained Prime Minister of Great Britain, urchill, considered the organiza- a second front in Europe in 1942 possible.

well known, the organization cond front in Europe in 1942 decided during the sojourn of Molotov in London, and it found expression in the agreed Anglo-Soviet communiqué published on the 12th June last . . .

It will be easily understood that the Soviet Command built their plan of summer and autumn operations calculating on the creation of a second front in Europe in 1942.

It is easy to grasp that the refusal of the government of Great Britain to create a second front in 1942 in Europe inflicts a moral blow to the whole of the Soviet public opinion, which calculates on the creation of a second front, and that it complicates the situation of the Red Army at the front and prejudices the plan of the Soviet Command . . .

(Signed) J. STALIN.

From that point on, the visitors from the West encountered "very rough sledding," as Harriman put it. The cordial atmosphere of the previous night's meeting had vanished. Stalin made it painfully clear that the Soviet government took no interest in the TORCH Operation. He spoke caustically of the failure of the Western Allies to deliver the promised supplies to the Soviet Union. He spoke of the tremendous sacrifices that were being made to hold 280 German divisions on the eastern front. He said that he thought it would not be too difficult for the British and Americans to land six or eight divisions on the Cherbourg peninsula. Churchill described in great detail the perils of an operation across the English Channel, but Stalin was unimpressed.

There was considerable puzzled speculation in the British delegation as to what had produced the dismaying reversal in Stalin's attitude as between the first night's session and the second. The same technique was to be encountered on subsequent occasions and the most usual explanation of it was that when Stalin got really tough he was expressing the attitude of the mysterious Politburo rather than his own personal appraisal of the main issue.

Cordial Relations Are Restored

On the evening of August 15th, Churchill went to the Kremlin for a final meeting with Stalin and came out of it more surprised than ever—for now the atmosphere of cordiality was completely restored and enthusiasm for the TORCH Operation was again running high. At the end of this session, Stalin asked, "Why not come over to my apartment in the Kremlin and have some drinks?" Although Churchill's airplane was to take off at dawn, he accepted this invitation and remained for seven hours, discussing all manner of subjects including the possibility of a meeting between Stalin and President Roosevelt in Iceland.

Churchill got home at 3:30 A.M., then wrote and dispatched a long cable to Roosevelt. He reported that the meetings had ended in an atmosphere of the greatest good will and that a personal relationship of real importance had been established.

During this summer Roosevelt had established his week-end retreat called Shangri-La in the Maryland hills about sixty miles north of Washington. This enabled him to get away from the White House at times when it was dangerous for him to travel even as far from base as Hyde Park. It was a simple woodland lodge with three bedrooms.

Roosevelt sat by the hour on the little screened porch with a fine view over the Catoctin Valley. He worked on his stamp collection, he played solitaire, and he wrote his name or his initials in books

I've discovered the longer, finer cigarette

PALL MALL

PALL MALLS are *good* to look at—*good* to feel—*good* to taste and *good* to smoke.

PALL MALL's greater length of traditionally fine tobacco filters the smoke of this *longer, finer* cigarette—gives you that smoothness, mildness and satisfaction that no other cigarette offers you.

PALL MALL—the *longer, finer* cigarette in the distinguished red package.

OUTSTANDING

-and they are mild!

from his library. He gave one of these books to me that August, 1942. It was an old Book of Psalms that someone had sent him. He had marked certain passages—he wanted me to study them with a view to future speeches—and one that he marked was the last verse of the 39th Psalm:

Oh spare me, that I may recover strength, before I go hence, and be no more.

There was continued correspondence between London and Washington about the planning of the TORCH Operation. On August 30th, Roosevelt cabled Churchill:

I have considered carefully your cables in reference to the Torch Operation . . .

I feel very strongly that the initial attacks must be made by an exclusively American ground force supported by your naval and transport and air units. The operation should be undertaken on the assumption that the French will offer less resistance to us than they will to the British . . .

. . . I am reasonably sure a simultaneous landing by British and Americans would result in full resistance by all French in Africa whereas an initial American landing without British ground forces offers a real chance that there would be no French resistance or only a token resistance.

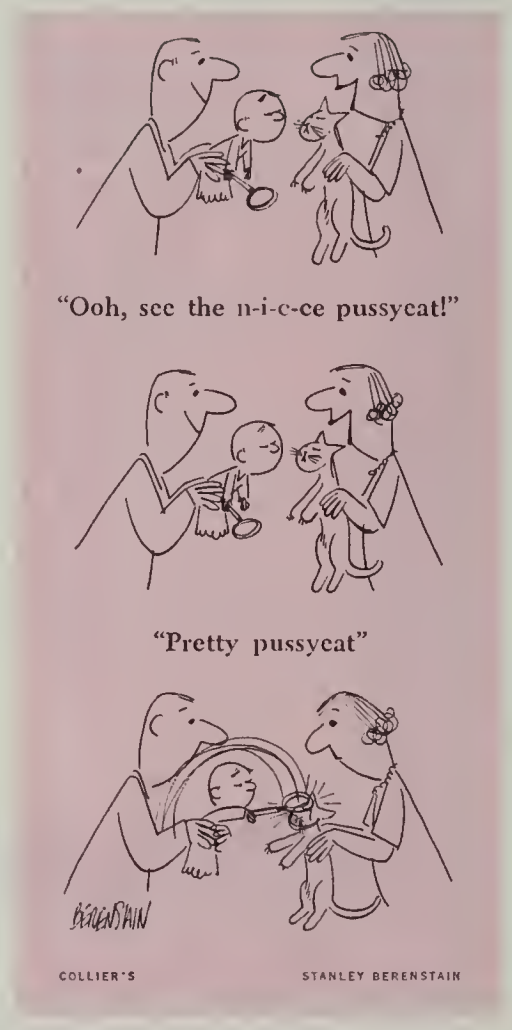
Then your force can come in to the eastward. I realize full well that your landing must be made before the enemy can get there . . .

In all the discussions preceding TORCH it was obvious that the eternally sore subject of De Gaulle and the Fighting French would again manifest itself. Roosevelt was obdurate on this point. He wrote, "I consider it essential that De Gaulle be kept out of the picture and be permitted to have no information whatever, regardless of how irritated and irritating he may become."

A Decision by Eisenhower

At a meeting in London on the morning of September 22d, Churchill, Eisenhower and their staffs reviewed the whole TORCH prospect. Because of the expansion of the operation and the added shipping required for transport of men and matériel, Eisenhower made the decision that the date must be postponed to November 8th.

The postponement had considerable political significance in the United States; November 3d was Election Day and it would have been obviously advantageous to Roosevelt to have this exciting news received before the voters went to the polls—but this was a decision, according to Roosevelt's order, that must be made by the responsible officer, Eisenhower, and not by the Democratic National Committee.



Roosevelt had to give a great deal of attention to the domestic political scene in this summer and fall of 1942. He hated it but he couldn't escape it. The Congressional election was approaching and the partisan voices were becoming more and more strident. They had plenty of targets for criticisms—more, in fact, than most of them knew about. The progress of production was in some important respects disappointing and in a few respects downright alarming. The war man-power situation was in a dreadful mess.

There was even more than the usual bickering and backbiting between departments and agencies. In the battle of Washington, as on most of the real fighting fronts, this was the lowest point of the war.

Worst of all was the failure of the Congress to do anything toward meeting the threat of inflation. The President's requests for higher taxes and more rigid controls on the civilian economy had been ignored or evaded by congressmen afraid to face the voters, especially the farmers. Roosevelt was urged to take drastic action to stabilize farm prices, for which Congress was willing to provide a floor but no ceiling.

The principal force in this urging was Leon Henderson, director of the Office of Price Administration and currently the center for the storms of criticism and complaint. A public servant of exceptional ability, courage and imperviousness, Henderson had an unfortunate flair for flamboyant publicity: He was often photographed dancing the rumba and wearing funny hats and that made him all the more unpopular with the conservative elements, which, as always, were strongest in the rural areas. Henderson, who was in a bad enough spot anyway, made it all the worse for himself by allowing himself to be represented as a frivolous fellow in wartime.

It was usual for the President to speak to the nation on Labor Day and Roose-

velt decided that this was the occasion for decisive action against inflation. The preparation of that speech was ten days' work—at Shangri-La, the White House and Hyde Park—and involved some arguments among Roosevelt's advisers. The President had the power to stabilize prices and wages by executive order without reference to Congress, and some of us believed that he should do just that immediately and not run the risk of hostile action or no action at all on Capitol Hill.

There were unquestionably many congressmen who fervently hoped that he would do it this way and thereby absolve them from all responsibility for decision on such a controversial issue. (It was an ironic fact that many of the congressmen who were loudest in accusing Roosevelt of dictatorial ambitions were the most anxious to have him act like a dictator on all measures which might be unpopular with the people but obviously valuable for the winning of the war.)

Roosevelt himself was in favor of an arbitrary executive order to achieve stabilization, and his speech was at first written as a proclamation and explanation of that; but some of his advisers, notably Hopkins and Henderson, strongly recommended that he put the issue up to Congress in the form of an ultimatum—"You act before October 1st or I will"—and their arguments finally prevailed.

Roosevelt concluded his speech of September 7th with these words:

Battles are not won by soldiers or sailors who think first of their own personal safety. And wars are not won by people who are concerned primarily with their own comfort, their own convenience, their own pocketbooks.

We Americans of today bear the gravest of responsibilities. All of the United Nations share them.

All of us here at home are being tested—for our fortitude, for our selfless devotion to our country and our cause.

This is the toughest war of all time. We need not leave it to historians of the future to answer the question whether we are tough enough to meet this unprecedented challenge. We can give that answer now. The answer is "Yes."

After this speech, Roosevelt decided to take a trip around the country to visit defense plants and various Army training camps, airfields and naval stations. It was a good chance for the President to see a great deal of production and training progress—and he was one capable of understanding the essentials of what he saw—but the main purpose of the trip was, of course, for political influence on the Congress and on the Congressional elections.

The secrecy surrounding all of Roosevelt's wartime journeys would seem to have been greatly overdone, especially on occasions such as this one when the President was visible and often audible to millions of citizens over a route of some 9,000 miles. There were many stories at the time of workers who came home late for supper, explaining to their wives that "President Roosevelt was at the plant," and when the wives saw no mention of this important event in the local newspapers, they accused their husbands of lying.

Roosevelt loved all this air of mystery. It was part of his nature to wear the mantle of military security like a small boy playing "cops and robbers." Furthermore, he loved to irritate the press which had so often irritated him.

He returned to Washington on October 1st, the deadline set for Congressional action, and the next day the Stabilization Act was sent to the White House and he signed it, expressing certainty that it would "assist greatly in bringing the war to a successful conclusion" and "will make the transition to peace conditions easier after the war." The same day he named James F. Byrnes Director of Economic Stabilization, which made him, in effect, Assistant President in charge of the home front. This relieved Roosevelt of a considerable amount of work and worry, and consequently greatly reduced the accumulation on Hopkins' desk.

Hopkins later laughed and said, "Shortly after Jimmy Byrnes moved in I went to talk to him about something and he told me, 'There's just one suggestion I want to make to you, Harry, and that is to keep the hell out of my business.' He smiled very pleasantly when he said it, but by God he meant it and I'm going to keep the hell out." It is improbable that Hopkins was entirely faithful in living up to this resolve.

In the elections on November 3d the Republicans gained 47 votes in the House which was only nine short of a majority. They gained ten votes in the Senate. Roosevelt had only just escaped the overturn inflicted on Wilson in 1918 and he was now down to the narrowest margin of his entire Presidential career.

During September and October, Wendell Willkie made the journey to Africa, the Middle East, the Soviet Union and China which he described in his influential book, One World. He flew this enormous distance in an Army transport plane with, of course, Roosevelt's hearty approval.

Willkie's trip did an enormous amount of good and it also stirred up some trouble. In Moscow he heard direct accusations that the British had "sto American Lend-Lease material inte for Russia. Hopkins was in a positi know that this charge was grossly u He himself had given instructions some ships which could not get thr to Murmansk should be unloade Scotland so that the ships thems would be freed for service in TORCH Operation. But Willkie given only the Russian version In Chungking, Willkie heard the G alissimo's expressions of bitte against the Allies in general and B in particular and also against the American ambassador, Clarence Gauss, and General Stilwell. The feud between Stilwell and Chen was then much in evidence.

Mission Ends on a Sour Note

From Moscow, Willkie chided th lies for failure to open a second and from Chungking for failure to an all-out effort in aid of China statements which caused Roosev remark: "You can't have it both w (It might have been added that a stage of the war it couldn't be had way.) Shortly before Willkie retur Washington via the Northwest P. from Siberia on October 14th, Roo let fall some remarks about "type strategists" at a press conference, ing an impish imitation of Willkie' nunciation of some words, and W consequently ended his mission o will in a fury of rage at the Presid

It is my belief that Roosevelt regretted having yielded to the t tion to indulge in unworthy wise at Willkie's expense. He was talk the record, but he had plenty of to know that his little quips wo given wide circulation by the spondents present, many of whom accurate reporters.

There is no doubt in my min Roosevelt had far more admirati Willkie than for any opponent h faced: he respected Willkie's en courage, if not his political acum he was profoundly and eternally ful for Willkie's persistent battle the isolationism of the Old Guar Republican party.

Once I heard Hopkins make slurring remark about Willki Roosevelt slapped him with as reproof as I ever heard him utt said, "Don't ever say anything li around here again. Don't even You of all people ought to know might not have had Lend-Lease lective Service or a lot of other t it hadn't been for Wendell Willk was a godsend to this country w needed him most." The skeptica suspect that Roosevelt's affectio gard for Willkie was due at least to the fact that he had defeated h he had none of the same respec gard for Herbert Hoover or Tho Dewey, whom he also defeated.

There were many messages l Washington, London and Mosc ing these critical weeks of the fig Stalingrad and the Solomons, measurably complex preparati TORCH, and the build-up of forces in the Middle East prep to the battle of El Alamein. Jus Roosevelt left for his swing aro country on September 17th, he note to Admiral Leahy:

I am anxious to get the cable from the Prime Minister and oth of government in various countr my replies to them, co-o through Harry, because so n them refer to civil things.

I am asking him to see that a military aspects of these cable ferred to you and the Combine of Staff and he will co-ordina and give them to me for my a

HEN YOU'RE FACED WITH DRIVING PROBLEMS...

Relax...

with Greyhound!

F there's one thing the swift pace of modern living demands, it's frequent and complete *relaxation* . . . letting down, taking it easy. And that is actly what Greyhound offers, in generous measure . . . full relaxation from iving strain and traffic trouble—mental ease matched with physical comfort!

heck the different kinds of trips you take in a year—*vacationing, shopping the city, week-ending with friends, commuting, traveling for business, or just ht-seeing*—and you'll find that they offer a lot more travel ease, more peace mind, if made in a Greyhound SuperCoach. The reclining-chair comfort the modern Greyhound bus is unequaled. But it is especially good to know t one of the world's best and safest drivers is at the wheel, competent cope with any kind of traffic, ready to take you quickly to city or farm, oss the state or the continent—even into neighboring Canada or Mexico.

e cost? Much less than driving your own car, much lower than other kinds public transportation. *Relax with Greyhound next time you take a trip!*

Transportation for ALL the Nation

GREYHOUND

Relax Free from traffic worries!

Week-end and rush-hour traffic is no bother, with an expert Greyhound driver at the wheel. You arrive rested, refreshed.

Relax You're Greyhound's Guest!

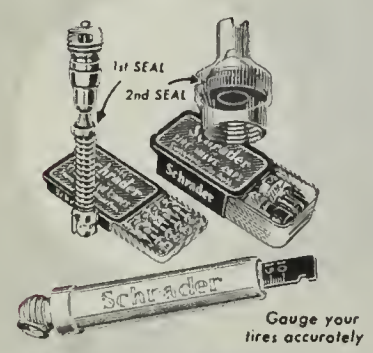
The Greyhound station (right downtown) is a convenient headquarters, with friendly help and information quickly available. A pleasant place to start a pleasant journey!

Relax Trips all planned for you!

Greyhound ticket agents (and Travel Bureaus in principal cities) will help plan trips, arrange popular Amazing America Tours, with hotel reservations and sight-seeing included.

Relax Greyhound is your other car!

When someone else in the family needs the automobile, choose Greyhound for your "second car". You'll save money . . . and Greyhound's flexible schedules will fit your plans surprisingly well.



YOU roll up More Miles

... when the two seals—and an accurate Schrader gauge are on the job to make your tires last longer.

Churchill sent cables containing a message he proposed to send to Stalin relative to the canceling of another convoy (PQ19) to Murmansk and the proposal to establish a British-American strategic air force on the Russian flank in the Caucasus. The argument for the canceling was powerful; the preceding convoy to Murmansk had lost one ship out of three but had required 77 warships for escort duty. In view of the enormous naval requirements of the impending TORCH Operation, it would be obviously impossible to assign anywhere near that number of warships for another convoy.

Hopkins immediately cabled Churchill a message paraphrased here:

The President is now at a distant point and your urgent messages are being relayed to him there. I very strongly urge you not to send Stalin the proposed message until you hear how the President feels about it. It seems very clear to me that the turning point in the war may well depend on what is now said to Stalin and what firm commitments we are prepared to make to him . . .

Hopkins also sent a telegram to Roosevelt in the Northwest:

. . . I have no doubt there are compelling reasons for discontinuing the northern convoys for the balance of this year . . .

In replying to the Former Naval Person relative to a wire to Stalin, I hope you will give full consideration to the importance of the proposal for a joint Allied air force on the Caucasian front . . .

The Canceled Convoy to Murmansk

From his train Roosevelt cabled Churchill that he agreed with him the realities of the situation required canceling PQ19. He said he realized how disappointing this would be to the Russians but that the need for the escort ships elsewhere at that time made it inevitable. Roosevelt urged, however, that since PQ 19 was not to sail for another ten days the Russians should not be notified of its cancellation until that time had expired. He pointed out that there was nothing to gain and much to be lost by telling Stalin in advance.

On October 24th, Churchill cabled Roosevelt that he was baffled and perplexed by the correspondence from Moscow—or, rather, the almost total lack of it. Two weeks previously he and the President had sent long, parallel messages to Stalin detailing the proposals for supplies and for the air force in the Caucasus. The only reply that Churchill had received consisted of two words, "Thank you."

Churchill had sought to obtain further information through the British ambassador in Moscow, Sir Archibald Clark Kerr, who had been able to gain nothing but evasive replies from Molotov's secretary. Churchill wondered what was going on inside the Soviet Union.

Roosevelt cabled him that he was not disturbed by Stalin's silence, since he felt the Russians "do not use speech for the same purposes that we do."

The mysterious silence out of Moscow at that time was not due, as some alarmed authorities (not including Roosevelt or Churchill) then feared, to the possibility of a separate, negotiated Russo-German peace; it was the direct result of the improvement in the situation at Stalingrad. The need for immediate help became less desperate day by day and the Russians never did agree to the project for a British-American air force in the Caucasus. Some time later, General Burns prepared a memorandum for Hopkins which is presented here in highly condensed form because it was an excellent statement of Hopkins' own views on the subject of relations with the Soviet Union:

. . . We not only need Russia as a powerful fighting ally in order to defeat Germany but eventually we will also need her in a similar role to defeat Japan. And finally, we need her as a real friend and customer in the postwar world . . .

It is generally conceded that the "step-by-step" plan for reaching Tokyo by way of the Pacific Islands must be supplemented by large-scale bombing attacks based upon Asia . . .

This will require very substantial ground forces for the defense of bases, and in addition a large air force, together with its personnel, its ground installations, its planes, its gas, its spare parts, its ammunition and all other supplies. This strength can hardly be placed in Asia without the assistance of Russia.

If the Allies are victorious Russia will be one of the three most powerful countries in the world. For the future peace of the world, we should be real friends so that we can help shape world events

"You'll like the little woman— after she gets through letting off steam"
COLLIER'S DON TOBIN

in such a way as to provide security and prosperity.

Furthermore, Russia's postwar needs for the products of America will be simply overwhelming. She must not only rehabilitate her war losses in homes, industries, raw materials and farms, but she must provide the resources for the inevitable advances in her standards of living that will result from the war.

From the above, it seems evident that Soviet relationships are the most important to us of all countries, excepting only the United Kingdom. It seems also evident that we must be so helpful and friendly to her that she will not only battle through to the defeat of Germany and also give vital assistance in the defeat of Japan, but in addition willingly join with us in establishing a sound peace and mutually beneficial relations in the postwar world.

On the same day, October 24th, that Churchill sent his message to Roosevelt confessing perplexity and bafflement about Moscow's silence, he sent another short cable that was full of the emotions of one who, having for long stared defeat in the face, now saw the first glimmer of victory:

At 8 P.M. London time the battle began in Egypt. The whole force of the Army will be engaged. I will keep you informed . . . all the Sherman tanks you gave me on that dark Tobruk morning will play their part.

This was the first word of El Alamein which came to Roosevelt with his breakfast at Shangri-La; it was four months almost to the day after "that dark bruk morning." But it was impos to be exultant, for those were indes ably nerve-racking days for eve aware of the fact that hundreds of carrying tens of thousands of me sailed from the United Kingdom the United States across the subm infested seas to North Africa. TORCH Operation was on and the sibilities for leakage in Washington be (and were) so terrifying that it s inevitable the enemy would kno about it and would have ample ti take effective measures for combat

Preparing the Invasion Messa

The final stages of preparatio TORCH involved a great deal o careful word-choosing for the v messages from the President to I Franco, General Antonio Ca (President of Portugal), Yves (Governor General of Algeria), th tan of Morocco and the Bey of These messages were to be flashed troops hit the beaches—and at th instant every international radio mitter in the United States and would start broadcasting the sam gram which had been in preparat weeks. Every word of General Eis er's proclamations had been cable and forth between London and W ton and scrutinized and many wo vised, for it was obvious that the s political slip could cost lives.

Most interesting of all was the ing of the message to Pétain. know who drafted this first, but wi text of it was cabled to Churchill tested that it was "much too kind Prime Minister reminded the Pr that Pétain had "used his reputa do our cause injuries no lesser ma have done." Roosevelt then took look at the message and what he it can be observed in the reproduc page 22. The original draft start

My dear old friend:

I am sending this message to y only as the Chef d'État of the States to the Chef d'État of the R of France, but also as one o friends and comrades of the gre of 1918. May we both live to see victorious again against the enemy.

When your government con of necessity, the Armistice Conve 1940, it was impossible for any foresee the program of sys plunder which the German would inflict on the French pe

looking the yard. Joe was not in sight. Vincent, his collar latch secured with wire, roamed at the end of his rope, past the potting shed, under the oak tree, out onto the drive and back, and every now and again one small hand went to the collar and fussed with it. Tim turned back to his coffee. He remembered the Eastern Steel account and Air Machinery. Thoughtfully he lighted a cigarette.

Lucas came into the study. In her hand she carried the proposed membership ballot and the return envelopes, the large one for mailing and the small, plain one which went inside. She handed them to Tim. "Decision time," she said grimly.

Tim took the papers. He held them in his hands, staring. Then he looked at her.

Lucas said, "There's only one way to fight nastiness, and that's to be nasty yourself. Eileen will know who voted against them. And every time anybody mentions the club, she'll think of it, and pretty soon she'll begin to realize that maybe feuds aren't such fun after all."

It carried a specious sort of conviction. Tim looked down at the list. Slowly he got out his pen and held it in his hand. "I suppose you're right," he said.

When he was done, Lucas said, "Now, about that beast Eileen sent us."

Out in the yard at the moment the beast was chattering furiously at an untidy dog who had appeared from nowhere and in whose attitude there was more than a trace of hunger. Vincent waved his small arms and he danced on his small legs and his voice was shrill and provocative. Behind him, in easy reach, was the oak tree.

Slowly the dog advanced, his head low and his ears tucked back. He stopped, studied Vincent, and listened to Vincent's epithets. His head dropped a little lower. Almost imperceptibly he gathered himself and then, without a sound, he charged.

VINCENT let out a little squeak of glee. He skipped nimbly to one side and sprang for the tree. The dog went past, pulled up quickly, turned and made ready for his return charge, and Vincent, chattering victoriously, swarmed three feet up the trunk and then stopped dead, his rope securely snagged around a lath of the potting shed.

Seizing the rope in his little hands, he tugged hard. The rope was caught for sure. Vincent picked desperately at his collar and his chattering rose quickly in pitch. He tugged and he hauled, and the dog, watching, gathered himself with care.

And it was then that Joe strolled into the picture, silent, unnoticed by anyone but Tim and Lucas. He stopped short to survey the scene. A strange dog, obviously out of bounds, obviously trespassing. There was temptation. On the other hand, readily accessible, the small, tormenting Vincent.

For a moment, for one brief moment, Joe hesitated. Then the ruff of fur lifted all across Joe's heavy shoulders. Family honor was the stake; against that, whisker pullings and birds' nests were unimportant. His stub tail rose like a flag and began its ominous twitching. His sore whiskers laid themselves flat against his cheeks and his eyes took on their opaque shine. He let the growl begin, deep in his furry chest, and advanced into combat.

It was not much of a fight; it was scarcely, as a matter of fact, more than a brief warmup for Joe, and it did little to discharge the emotion stored up by recent torment. It is doubtful if the strange dog, who has not been seen since in the neighborhood, really understood what it was that descended so savagely upon him. Nor did he remain to investigate. He chose the driveway as the straightest, the most direct route to a more friendly world, and he went down it at a rate that argued whippet ancestry. And then he was gone and quiet descended again upon the yard.

Joe turned around. Vincent, shaking clear down to his small toes, clung to the tree trunk, still pulling vainly upon the snagged rope. Joe eyed him carefully. In the set of his great shoulders, in the steady gaze of his opaque eyes, purpose was plain. He advanced a few steps and stopped, crouching, within easy spring of the little monkey. Vincent's eyes blinked like small lanterns and he tugged pitifully upon the rope.

And then, quite slowly, the tenseness began to leave Joe's body. The ruff of fur across his shoulders lay flat and his stub tail ceased its twitching. He sat down on the grass and his ears resumed their normal posture. Slowly he raised one great paw, examined it gravely, then put out his tongue and bent to his work.

Vincent watched him, unbelieving. His small hands stopped their tugging and the shivers died away. Relaxing a little against the tug of the collar, he drew his first full breath in minutes. Slowly, his eyes fixed upon Joe, Vincent began to creep down the tree trunk to the ground. Joe paid no heed; his tongue worked steadily, cleaning, polishing, working industriously between his spread toes. Vincent was on the grass, still watching, still moving slowly as a man moves in a dream. He crept closer, closer, and then stopped. He sat down and he stretched out one small hand and touched Joe's great shoulder. Joe's tongue worked on, undisturbed.

In the study Tim said softly, "Well, I'll be damned!"

Lucas said nothing.

Tim turned away from the window. There was a strange expression upon his face. "That ballot," he said. "If Joe can forsake revenge, I don't think we can do any less."

Lucas only nodded.

The doorbell rang. Lucas started for it. The phone rang. "I'll get it," Tim said. He picked up the phone. "Hello."

"This is John Sampson, McCoy."

There was a silence. Then, "I—uh, McCoy," Sampson said, "I find I owe you an apology."

"So," said Tim, thinking of the ballot. "Oh."

Sampson said, "After our talk yesterday I—uh, I looked into that matter of references. I found, to my chagrin, that you were perfectly correct when you said that we had misrepresented the facts concerning your firm."

"So?"

"Yes," said Sampson. "One of our employees, hoping to ingratiate himself with the Forbes agency and, as a result, gain a position with them, had deliberately maligned your firm to two prospective accounts."

"Omigod," Tim said.

"I have discharged the man and I have talked with Henry Forbes, who assures me that the misrepresentation was done completely without his knowledge and that the man will not benefit by it in any way. I have written to the two firms in question stating that the st your agency is beyond repro explaining that the mistake wa ours."

Tim opened his mouth and again. He looked out of the Joe and Vincent were still sitti side and Vincent's small fin busy in Joe's fur. He said, "I— quite know what to say about

"I understand," Sampson sa was a long silence. "Of course Sampson added, "that the acti employee has made this bank li

"No," Tim said gently. " Revenge doesn't do anybody a He was still looking out of th "It's all straightened out now."

"I—uh, I must say," Sam slowly, "that you're taking a v ous attitude, McCoy."

TIM was grinning. "I've ha of examples recently." H the phone carefully and tur Lucas was coming through the her face was red and unhapp hands she held an opened pac card and a small, unidentifia She held it out for Tim's inspe

The next morning Flannagan rose ...d walked to the main lodge, an ...us, rather ugly though com-... structure. He noted the con-... the furnishings and the courtesy and efficiency of the clerks and bellhops. He talked casually to maids and to guests. He then investigated boats, docks, outboard motors and icing facilities for shipping fish. Shortly after noon when he had finished his snooping for the day he ate a light lunch and telephoned his father. He told the old gentleman that so far the place looked good, but that he wanted a couple more days to check fishing at near-by lakes. He did not mention that he needed more time to work on Miss Tabitha Carlson. His father said the deal was hot and to get the lead out.

When he had rested from his lunch Roger changed to his swimming trunks, donned an elderly robe and strolled over to the Carlson cottage. Mr. and Mrs. Carlson were both fully attired, but Tabby and a hairy-chested young man were clad for the water.

"Hello," he said to the Carlsons. "Hello, Tabby baby."

Tabby winced and gritted her teeth. The young man rolled over and regarded Roger with sour interest.

"Mr. Flannagan," Mrs. Carlson said, "I don't believe you've met Howard Ruud. Howard, this is Roger Flannagan, our next-door neighbor."

"Mr. Flannagan—" Tabby began.

"Roger, Tabby baby," he said gently.

"All right, Roger then. Roger brought us some walleyed pike, Howard, and had dinner with us last night.

"How nice," Howard said

"Flannagan," Carlson said, "will you have a drink?"

"Thank you, no. I came over to ask if Tabby baby would like to go swimming. You can come too," he said to Howard.

HOWARD grunted and the three of them walked to the dock, dived in unison and raced to the float. Howard was first, Roger a gasping third. When he reached the float Tabby reached down and gave him a hand up.

While Roger lay on his back panting, Howard, brown and muscular, did a jackknife from the low board. Tabby glanced at Roger. "He's really marvelous in the water, isn't he?"

Roger eyed her solemnly. "Watch me," he said. "I'm going to do a swan dive from the high board."

He climbed the ladder to the upper level of the float and stood there a moment looking frail and rickety. His dive was in earnest and in its way spectacular, but he failed to come out of it fast enough and landed almost entirely on his face. When he finally came up he had a nosebleed.

"Gee," Tabby cried, "are you hurt?"

"It's nothing," he said.

"You can hurt yourself that way, fella," Howard said. "Better leave diving to grownups. Watch this one."

Howard stood on tiptoe on the high board, his furry chest bulged like a robin's, then hurled himself into a smooth somersault.

"He's pretty limber," Roger admitted. "All muscles and no brains, like a bull."

Tabby laughed sardonically. "Better wipe your nose, bub."

For some time after that, while Howard entertained the Carlsons and Tabby with accounts of the droll carryings-on of the resort's screwballs, Roger sat dripping at the nose and staring ravenously at Tabby baby. After an hour he said. "Do you suppose someone, Tabby baby maybe, could apply some ice to the back of my neck before I hemorrhage myself to death? I think I am getting weaker."

Tabby hurried into the cottage and returned with ice cubes in a napkin. She held them against Roger's nape. "Your

Setting the Pace to Tomorrow!

FOR RESULTS IN RESEARCH

. . . count on Martin! The Navy's Martin Mercator (above) is a development of Martin research in jet propulsion. Other projects include rocketry, plastics, television and supersonic speeds. When you look to the future, look to Martin!

FLEXIBLE FUEL TANK

. . . the Martin Mareng cell . . . fits in plane's wing like a football bladder. Manufactured under license by U. S. Rubber, Mareng cells increase dependability, reduce maintenance of Martin 2-0-2 airliners. From them, Martin developed America's first self-sealing fuel tanks.

AMONG THE ADVANTAGES

. . . of the Martin 2-0-2 airliner is the tricycle landing gear, which keeps plane level on ground, ends walking "uphill." And thanks to the 2-0-2's wide center of gravity range, passengers may sit wherever they wish, loading problems are ended. Count on Martin engineering for the big advances in tomorrow's planes!

MIGHTY MISSILE

. . . is the Navy's Martin-built Neptune-class rocket. These rockets will reach speeds of 8,500 ft. per second—will soar 235 miles into the ionosphere, nearly twice as high as the V-2. The President's Air Policy Commission recommends intensified research and development in this field.

AN INTERNATIONAL INSTITUTION

MANUFACTURERS OF: Marvinal resins (Martin Chemicals Division) • Martin 2-0-2 airliners • Advanced military aircraft • Aeriol gun turrets. **DEVELOPERS OF:** Rotory wing aircraft (Martin Rotawings Division) • Mareng fuel tonks (licensed to U. S. Rubber Co.) • Honeycomb construction materiol (licensed to U. S. Plywood Carp.) • Stratovision aerial re-broadcasting (in conjunction with Westinghouse Electric Corp.) **LEADERS IN RESEARCH** to guard the peace and build better living in many far-reaching fields.

GO PLACES . . . FAST!

Real careers are now open in aviation. Electronics, rocketry, meteorology, photography . . . these are some of the fields open to forward-looking young men. Ask at your Air Force, Navy or Marine recruiting office.

TOUGH OLD EAGLE!

From 1918 until the mid-twenties, this Martin "MB-2" bomber was standard with the Army. Using these planes, in 1921 General "Billy" Mitchell sank the captured German battleship "Ostfriesland" to prove, prophetically, the devastating potential of airpower. Great in its day, it pointed the way to today's and tomorrow's Martin aircraft.

PAMPERED PASSENGERS

. . . are the rule on luxurious Martin 2-0-2 airliners. Advanced soundproofing, warm-wall heating, adjustable seats with built-in pillows, large non-fogging windows—it's no wonder air travelers prefer the Martin 2-0-2! The Glenn L. Martin Co., Baltimore 3, Maryland.

mother ought to make you eat more vegetables," she said, smiling. "Don't you want to get big and strong so you can chase girls without getting a nosebleed?"

Roger regarded her with grave, hurt blue eyes. "If you have finished your ghoulish comedy I'll take my remaining hemoglobin and go home."

"So long, fella," Howard said. "Be a good boy now."

Tabby walked with Roger to his cottage, chuckling.

"It is not humorous," Roger said.

Tabby suddenly began to feel a little contrite. After all he'd gotten his bloody nose showing off for her. His heart had been in the right place even if his nose hadn't. She yearned to take his battered head to her bosom and comfort it.

At his door he stopped. "Temporarily, I'm not hemorrhaging," he said. "If it starts up again I'd like you to know I'll love you clean down to the last drip."

"I'm glad," Tabby said.

He eyed her piteously. "I suppose you've made up your mind to marry the gentleman with the built-in rug on his chest? He couldn't possibly give you the lifetime of love that I could."

Tabby rubbed her pretty nose; she bit her lip. "A girl's got to look out for her future, you know. She can't live just on love. She'd have malnutrition."

Flannagan groaned inwardly at being restrained from stating that he was a prosperous executive. "As I told you, I don't have a job right now, but I have a little money and—"

"Now, see, that's what I mean. No job, yet here you are throwing your money around in a clip joint like this."

"That's just it," Roger said. "I ought to have someone to look after me."

"Golly, Roger, don't say things like that. It makes me go all motherly-like inside. But that's all it is. It's not love. It's just that you appeal to the Red Cross in me."

He sighed glumly. "Well, that's that. I might as well go in and open another vein." He looked as if he ought to be on Mommy's lap having his hurt kissed.

She felt awful. "Take care of yourself, Roger. You're not strong you know. Maybe I ought to call a doctor."

He shook his head. "I'll probably pull through, even if I don't care to." Stooped and despondent, he went in.

After an hour's soul-searching and evaluation of his chances with Tabby, Roger convinced himself that he was whipped. She was going to marry Howard. There was no longer any point in stalling his father. When he had dressed he called the old man and read him his findings. He recommended immediate purchase.

THAT night after Mr. and Mrs. Carlson had driven in to the nearest town to see a movie, Howard and Tabitha sat on a davenport before a fire. Tabby seemed moody and detached. After circling his arm about her shoulders, Howard kissed her antiseptically on the cheek. "Honey, what day shall we make it?"

"Make what?" she asked. "Oh, that!"

"You're going to marry me, aren't you, sugar?"

"I like you a lot, but a girl's got to feel more than that."

Howard's face darkened with a noisome thought. "You're not, by any chance, falling for that goon with the runny nose?"

She turned on him with indignation. "That's no way to talk about a sweet, harmless man like Mr. Flannagan. Everybody can't be built like a bull, you know, all beef and no brains."

Howard colored. "I'll match my I.Q. against that bundle of bones any day in the week. And I don't go for the way he hangs around playing on your sympathy. He does that much more and I'll shatter him like a bulb."

"He's not playing on my sympathy! He was hurt and I helped him like I would any wounded animal. He doesn't mean a thing to me, but if you so much as twist his arm you'll never lay another hand on me."

Howard smiled. "Okay, sugar, now how about us?"

"We'll let it set a few days, Howard," she said wearily. "Maybe I'll know then." She gave him a sharp look. "And don't let me catch you pushing poor Mr. Flannagan around meanwhile."

They did not see poor Mr. Flannagan until the following afternoon when he appeared at the Carlson cottage looking, if possible, more futile and gloomy than ever. As upon an earlier day, he had fish, this time black bass that he had taken that morning. He nodded bleakly to the Carlsons, Howard and Tabitha. "Could you use some bigmouths?" he said to Mrs. Carlson. "I'll be leaving soon and I would like you to have these."

"So you're leaving?" Howard said. "That's tough, fella."

Roger was peering at Tabby. "My nosebleed never came back," he said.

"You look awfully peaked though," she said.

"He looks strong enough to me," Howard said.

Roger regarded Howard somberly. "I'm not well," he said.

"Oh, brother!" Howard said. "What an act!"

"Howard!" Tabby cried.

Roger had a perplexed, hurt expression. He looked like a pup trying to figure out why he had been booted out for something he did on the kitchen floor. "Mr. Ruud," he said, "any more slights from you and I'll be compelled to flatten you."

"It's not my policy to mangle a paying guest," Howard said, "but anytime you feel like mixing, fella, speak up."

"Howard, I told you!" Tabby cried.

"He's asking for it, sugar," Howard explained.

"Just a minute," Roger said. "You told him what?"

"She told me not to slug you, fella," Howard said.

Roger's despondency dropped from him like a dark coat. "You told him that?" he asked Tabby.

"Well, Judas, Roger, I had to. You're in no shape to defend yourself."

"That was very thoughtful of you, Tabby baby," he said. He gave her his gentle smile and looked invigorated.

"Another thing, fella, I don't go for this 'Tabby baby' routine," Howard said. "I don't go for it at all."

"You don't, Ruud? She engaged to you or something? Got a lien on her, maybe?"

"Just about," Howard said.

"Just about is not enough," Roger said happily. "Either apologize or get up on your feet where I can swat you."

Howard grinned at Tabby. "I won't hurt him seriously."

IT WAS a short bout, but absorbing. Howard swung at Roger's head and missed it. He swung again and hit Roger's forearm, banging it sharply against his nose and springing an old leak. Roger took a few more blows on his elbows and shoulders before his long thin arm, swinging like a bent rake, came whistling out of nowhere. The enraptured Carlson family heard knuckles crunch on the spot where Howard's jaw joined his skull. Howard collapsed soundlessly and lay inert.

"I'm new around here. What time am I supposed to take you out to lunch?"

COLLIER'S — REAMER KELLER

Roger gave the spectators a diffident smile. "Lucky punch," he said. "Couldn't do it again in a million years."

"Gee, Roger, you're busted open again," Tabby cried. "Here, let me wipe." She used her hanky on his face.

She took Roger into the cottage and made him lie down. She sat beside him. "You know, Flannagan, in your strange, pitiful way you are marvelous. Even if you were lucky, it took a lot of nerve to stand up there and fight Howard. I know you did it for me and a girl appreciates having bucks battle over her. I'm going to kiss you for it."

Roger hadn't felt so wonderful since birth. "Do you think that what you feel for me is what I feel for you? I mean this isn't just the Florence Nightingale in you, is it?"

She stroked his cheek. "I don't know, Roger, but I certainly feel funny."

He suddenly had a thought so horrible that he cringed. In a few hours, maybe less, the inn would be part of the Flannagan chain. News of it would be in the papers. Howard would be notified. Unless something fast and drastic was done to keep his name out of it, Tabby would certainly find out that he, Roger Flannagan, vice-president, was a liar, deceiver and a loose man with a woman's heart.

He sat up. "I've got to get to a phone," he cried. Then he kissed her quickly and raced out the door like a sprinting crane, and legged it for the lodge.

He called the main office and was informed that his father was playing golf, proof to Roger that the deal had been consummated. All that he could do was to pray that the old man hadn't tioned him to the papers or in the n that Howard was sure to get. If he h he still had time to figure something He slouched back to the Carlsons' found everyone waiting for him, e one, that is, but Tabby. Howard h telegram in his hand and appeared t on the verge of tears.

"Mr. Flannagan," he said, "I've been informed that you and your f have purchased this resort. It says h am to report to you, the vice-presi for instructions. What can I say? W it help if I let you hit me again?"

Roger waved a hand at him. "F it, Ruud. You run an efficient, plea place here. If you want it the mana job is still yours." He set his jaw a ment. "And don't let this make any ference between you and Tabby."

Obviously moved, Howard "That's white of you, sir, but I k when I'm licked. I knew last night. told me."

"She did? Where is she now?"

"There's a very funny thing. I sh her the telegram and all she did wa out a yell and charge into the hou don't think I ever saw a female wi bigger burn on."

Roger winced. "Thank you, Ruud drop in to see you and the books la He faced the Carlsons, who were more or less spellbound. "Do you I've got a chance to square myself?"

Mrs. Carlson just winked and cla her hands over her head like a fighter.

HE FOUND Tabby in the kit waiting for him. "There you you big phony! You and your p look and danged old nosebleed! M me want to protect you! Probably w ing through me to spy on poor Howa wish he'd beaten your ears off!"

"Tabitha, please don't think—"

"You don't care what you do girl's feelings. Just have a good time her as a business trick and make a of her, that's you!"

Roger suddenly straightened. The on his face set in hard little furrows eyes took on a cold, calculating He looked, in a second, forceful commanding. It was a pretty pow thing to see. "Quiet!" he roared. ' down and listen. I've had enough o sentimental jabber. I had to act like because I was scouting the resort f father, preparatory to buying it. I to be secretive in order to find out things really are, not how the o might want me to see them. The dea hot and I couldn't talk about it. I know you would be here. I had n of knowing I was going to fall in with you. When I did I was snook Can you get that through your bea head?" He sounded somewhat li irritable first sergeant addressing a ward platoon.

Tabby stared at him, impressed. ' may be," she said weakly. "Just the you didn't have to—"

"That swan dive and the nose were planned, I admit that. You mi well know too that I was on the u sity swim team and I did some boxi can dive and I can fight a little. ceived you, but damn it all an you're the woman I want for a wif I had to do it! I had to work fast!"

"Well, gee, Roger, you don't ha get sore about it. I'm sorry. I ju maybe you didn't really like me, I g

"Nuts!" Roger said. "Come here!"

Tabby baby came over and whe had completed some of the huggin kissing he had predicted for them h her down. "I've got some pull arou joint. I'll reserve the bridal suite."

"Yes, sir," Tabby said. "Shall I sa

MORE BEAUTIFUL THAN MURDER

Continued from page 32

lot of silly chatter, of gay laughter, of greetings called back and forth. When Vince Mabry and his boys gave out with the music, the floor jammed instantly and stayed that way.

About ten thirty I saw Pete Connolly standing in the archway which separated the main dining room from the bar. His clothes matched the decorations in gaiety, but his face didn't. He looked mean and ugly. Something had hit him wrong. Several people spoke to him, and he shrugged them off. I was willing to lay even money that he was drunk.

THAT was one of two surprising things about Mr. Connolly that Christmas Eve. I knew he wasn't a drinker. He was a bear cat on ginger ale, but ginger ale hadn't got him the way he was now. The second surprising thing was that Rusty Mason was nowhere around.

Pete's sharp little eyes searched the crowd. They picked me out eventually. He started toward me. I didn't think I was going to like it. He looked as though he'd had several too many.

He shouldered his way roughly through the crowd and came straight to where Floyd Andrews and I were sitting. I started to greet him, but he cut me off. His voice was hard as nails and deadly as cyanide. He said, "Blake, you're a dirty rotten louse."

I blinked. Maybe this was a Christmas gag. Maybe I was supposed to laugh and call him names, too. But he didn't give me a chance. Taking it from where he'd left off, he proceeded to express his real opinion of me.

It wasn't flattering. He called me everything I'd ever heard and a lot of things I didn't quite get, being unfamiliar with racing-stable profanity.

I knew he must have discovered that I'd seen Wade Ramsay, and that Wade had refused to check in with his little scheme for influencing Rusty Mason. But even so—take that plus all the drink he'd had—it seemed that he was carrying a logical idea too far.

I tried to keep my temper. I sat there and took it, pretending that it was all right because he'd been drinking. I didn't want to start something.

Once again it was Floyd Andrews who pulled me out of a jam. He got up slowly and ranged alongside Connolly. He said, calmly, "Let's go have a drink, Pete."

Next thing I knew he was leading the bitter little jockey away from my table. They disappeared through the archway to the bar.

Floyd rejoined me in about ten minutes. This time he was welcome. He said, "Mad little turkey, isn't he? What's his beef?"

"He's nuts about a gal named Rusty Mason—Wade Ramsay's secretary. Wanted me to grease the tracks of true love so they'd roll smoother. The deal got loused up. He probably thinks I did it deliberately."

"Did you?"

"No," I said, "I didn't. I like Connolly. I thought he liked me."

"He probably does. He merely expresses himself badly."

Shortly after 11:30, sunshine burst through the gloom. I glimpsed Pat Kingsley standing alongside the white and blue Christmas tree. Just as though she'd been passing through the lobby and happened to look in at the merrymaking. I was on my way instantly. I grabbed her arm and said a couple of silly things and smiled for the first time that night. I said, "You've got to join me," and she agreed.

Floyd Andrews stood up as we reached the table. I had a flash of sanity and watched them closely as I performed the introduction.

I still couldn't tell if they'd ever met before. I got no hint of why Andrews had seemed so interested in Pat, or in me.

He stuck around for about ten minutes. Then he excused himself. I protested, but not vehemently. This was working out as I had wanted it. Pat, myself, and Christmas fifteen minutes away.

He vanished into the crowd. Pat said, "I watched you from back yonder, Steve. You looked like a funeral."

"I was busy missing you."

Pat smiled. "You say that as though you mean it."

I said, "I was afraid you were with your father."

"No." Her face grew serious for a moment. "I was upstairs."

"Doing what?"

"Thinking a little. Maybe crying—"

"About what?"

"On the thinking part, I can confess. Some of it was about you."

"Willing to tell me more?"

"Do I have to?"

The look she gave me did more than all the drinks I'd had. I started to say something, but the band broke in on it. Vince Mabry waved his baton, and the boys started playing Jingle Bells.

A big spotlight made a circle in the middle of the floor. All the other lights went out except the little blue lamps on the white Christmas tree. Rex Kingsley limped onto the floor, looking very handsome in white tie and tails.

He told us that in a few minutes it would be Christmas. He said that on the stroke of twelve Santa Claus would appear with presents for everybody.

He stopped talking and the band hit it up. Heavy on the Jingle Bells. I wanted to take Pat's hand, but that didn't seem quite in order.

A few seconds before midnight, the big spot went off. A smaller spotlight moved across the floor and came to rest at the foot of a little flight of steps. Those were the back stairs leading from the club to the dressing rooms on the mezzanine. That was where Santa Claus had been getting ready.

The crowd hushed. The music died down, just a gentle melody of Jingle Bells to hold the mood. Rex Kingsley said, "And now, folks—Santa Claus!"

Everybody watched the stairway.

From the head of the stairs we heard a deep, jovial voice saying, "Here I come . . ." Then suddenly everything changed. The voice rose to a bellow. There was a crash which grew into a series of bumps and thuds, punctuated by the clatter of a hundred gay little packages which rolled down the steps.

A man's terrified yell rose above the din. Down the stairs came Santa Claus, battered and bedraggled. His hat was off, his whiskers were awry. He banged to the bottom of the stairway and sat there surrounded by his scattered gifts.

His eyes were wide with horror. He was gazing up the way he had come, and then, grotesquely, he scrambled away.

A body came rolling down the stairway. It rolled down awkwardly, slowly, as though reluctant to interrupt the festivities. It reached the bottom and sprawled there, sightless eyes turned upward, lean little legs spread.

Someone said, "Good God! It's Pete Connolly!" And someone else said, "He passed out."

COLLIER'S "I hope you've already had the measles, Senator" MISCHA RICHTER

A man rushed across the room. He bent over Pete Connolly's body, then straightened. He said in a voice which he couldn't quite control, "He isn't drunk, folks—he's dead."

The electrician in the basement didn't know about that. All he knew was that he had orders to do something at midnight. He threw a switch and an elaborately gay sign blinked on over the bandstand. It said MERRY CHRISTMAS.

SOMEBODY telephoned somebody. Two radio-car cops appeared. Maybe by this time there was a private line into Hollywood Division, to be used only for Casa Linda murders. Anyway, the uniformed men stood next to the Christmas tree and told everybody to keep calm and to remain where they were.

The battered Santa Claus had crawled as far as possible from Pete's body and was saying, over and over again, "He must of been lying at the top of them stairs. It was dark and I tripped over him." The doctor who had pronounced Pete dead now stated that he had been shot. The word spread. Men and women said they hadn't heard any shot, but that was understandable: There had been a lot of noise, and nobody knew when the shot had been fired. Sometime between eleven o'clock and now.

Two more cops appeared. Lanky, efficient Lieutenant Lane of the Hollywood Detective Bureau, and the sto prematurely gray Sergeant Ehr Lane saw me, walked over to my t and said, "Howdy, Blake. Just like times, huh?"

I didn't say anything. Ehrlich sai a nice, quiet, conversational tone, " reckon this is tied up with Jeff Nulty that Conchita babe?"

I said I didn't know, but that guess yes. Lieutenant Lane said already asked the complaint b downtown to notify Marty Walsh. said that this was a hell of a way to s Christmas Eve, and I agreed.

IN a few minutes Marty Walsh and geant Vic Tremont came in. All ent or accounted for. The fireworks c begin. They joined the other two d tives at the foot of the steps and st talking. Lane whispered somet jerked his head in my direction, Walsh looked over at me. His eyes cold and hostile. Then he turned and started talking to Rex Kingsley Wade Ramsay.

I closed my fingers on Pat Kings arm and begged her to relax. I go back in her chair and pulled mine alongside. I took her hand. It fe though I had picked up a piece of ic

I still didn't understand the effec tragedy was having on her. She see shocked, but not so surprised as I n have expected. I told myself that I imagining things. Well, perhaps I w

I was too interested in Pat and i own thoughts to pay close attentic what was happening elsewhere. The were talking to everybody but us. didn't mean a thing. Marty Walsh my buddy. He wouldn't neglect me

Pat and I didn't talk. We jus there with her hand warming up a lit mine, looking at nothing and seeing After a while I said, "Get a grip on self, Pat. Walsh is storing up amm tion. He's going to ask an awful l questions."

I was right, but Marty took his about it. It was almost one thirt fore he came over to where we sitting and invited us into Rex King office, which was on the same flo way over in the corner. I thought was a neat touch, but I didn't sa People stared at us as we walked a the room: Walsh, Lane, Pat Kingsle myself. On the way I passed Andrews. He was staring at us hard

Kingsley's office wasn't much. I a little square room shoved off i corner of the club. It had a modern desk and against the opp wall a flat-topped table piled with a of things which I presumed had t with the running of a night club.

Rex wasn't there, which was fine me. Marty Walsh motioned Pat t swivel chair in front of the desk pulled over a second chair, placed it to hers and invited me to sit in it. idea was simple: he could see both all the time. And what he missed be observed by Lieutenant Lane, was leaning against the door frame.

Marty Walsh said, "Quite an eve eh, Steve?"

I said it was quite an evening.

"Of course you've got an alibi. was a statement, not a question. Kingsley was with you. She alwa when people are being killed."

I didn't say anything.

"What did you and Pete Con fight about?"

I said, "We didn't fight. He w over to my table and cursed me ste and bitterly for several minutes."

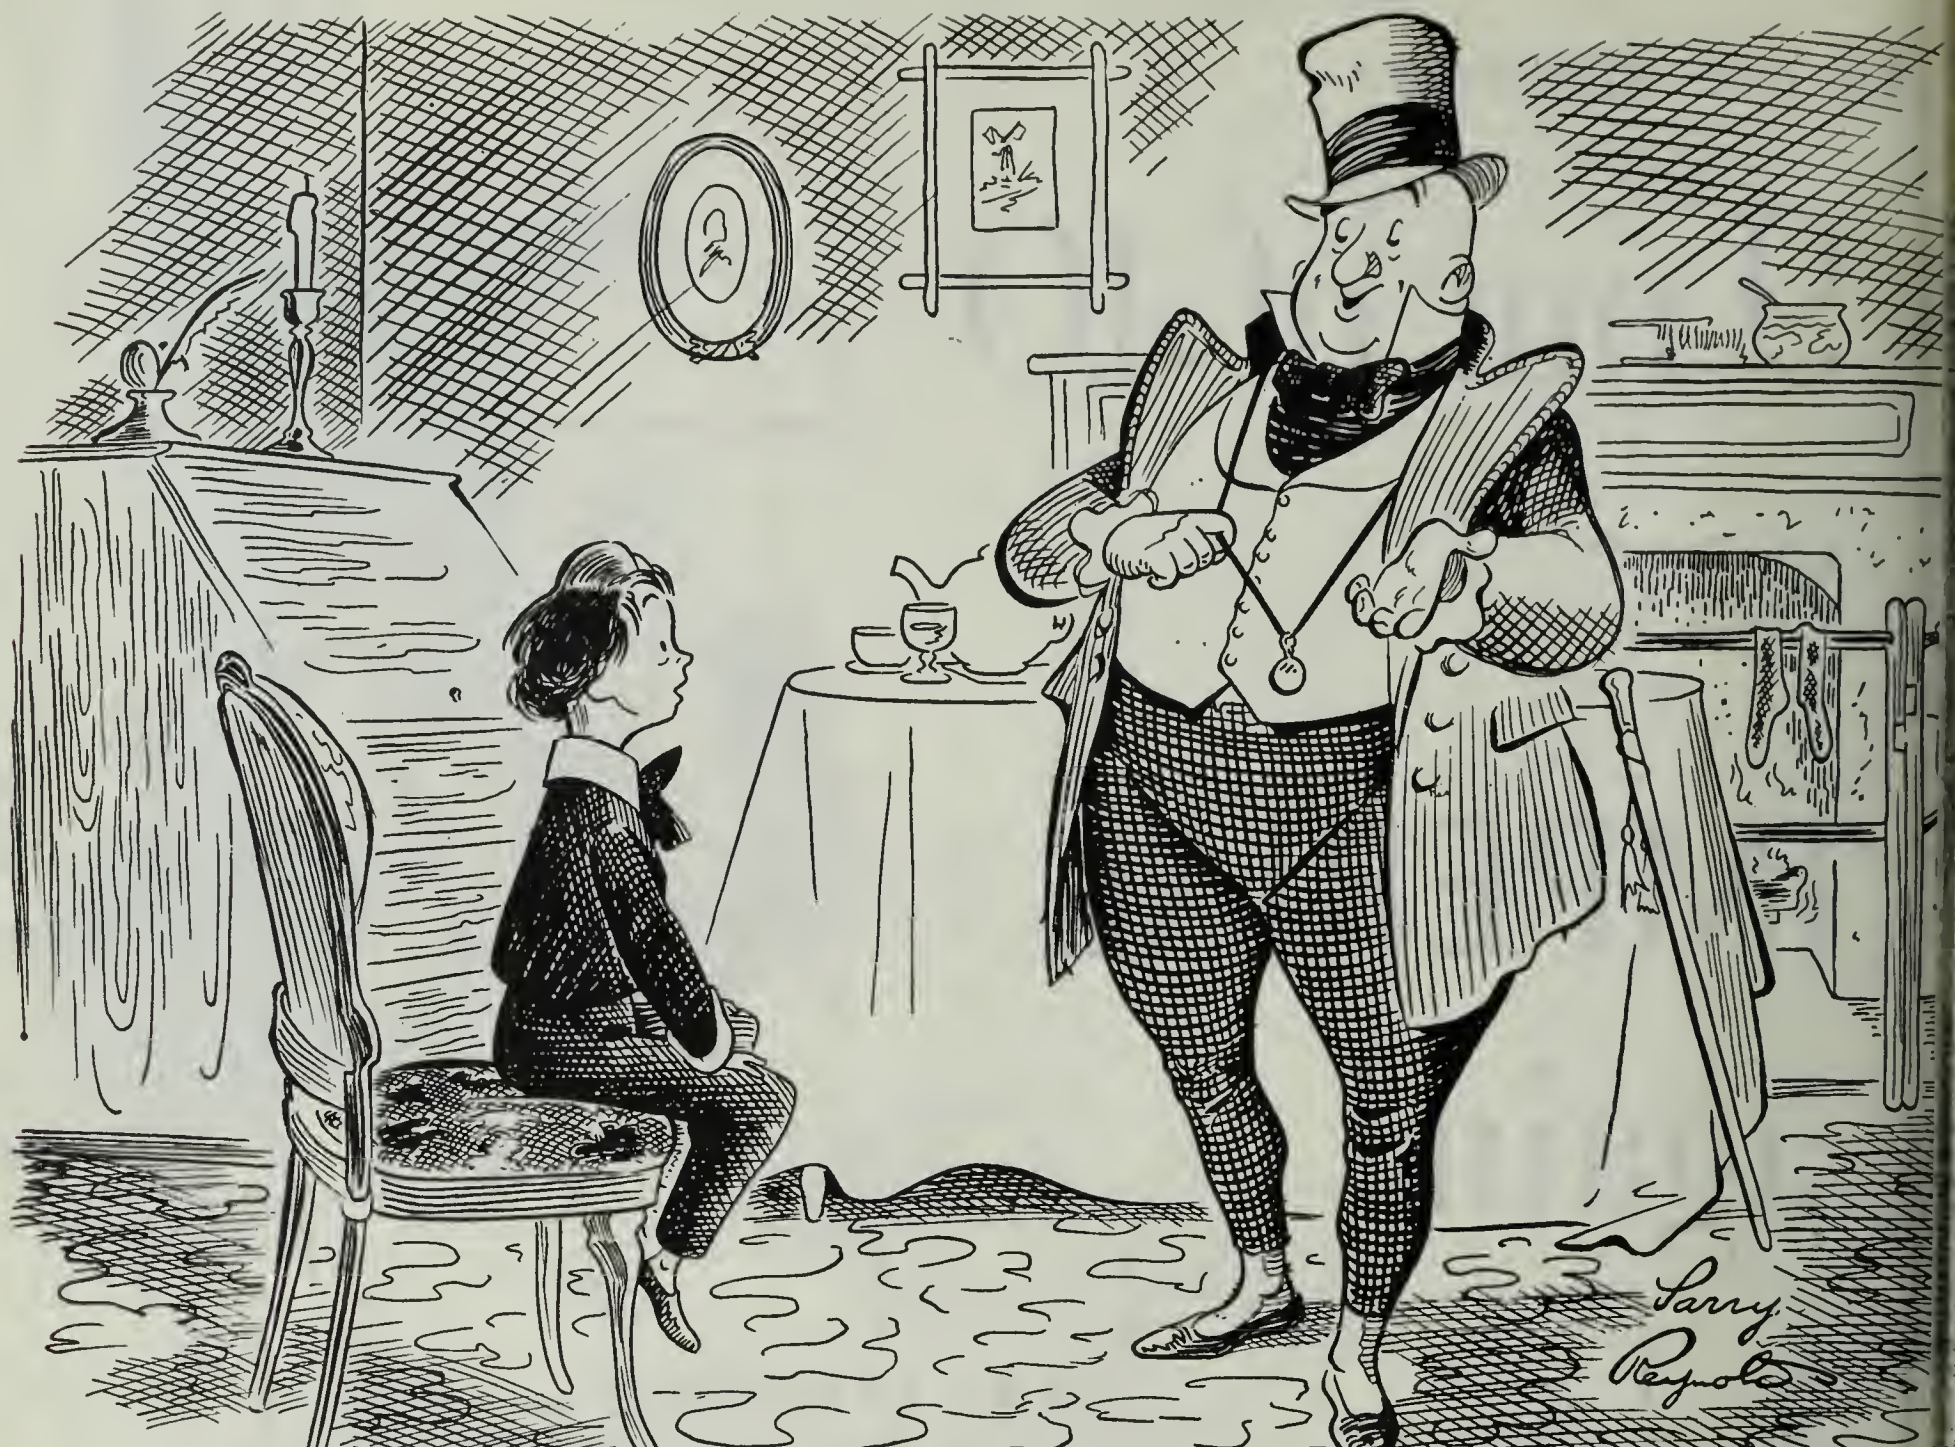
"Why?"

"I don't know."

Marty leaned back against the

All over America:

9 out of 10 say IMPERIAL again!



91.4% to be exact! From coast to coast, surveys show that 91.4% of Imperial purchasers are *repeat* purchasers. Yes, all over America, people have *tried* Imperial—and *liked* Imperial—and are buying it *again!* Why? Because Hiram Walker's 90 years at fine whiskey-making makes this whiskey *good!*

It's good to know... IMPERIAL *is made by Hiram Walker. No wonder nine out of ten say Imperial again!*

90 years at fine whiskey-making makes this whiskey good. 86 proof. Blended Whiskey. The straight whiskies in this product are 4 years or more old. 30% straight whiskey. 70% grain neutral spirits. Hiram Walker & Sons Inc., Peoria, Ill.

Mr. Micawber was only half-right !

MR. MICAWBER'S financial advice to young David Copperfield is justly famous.

Translated into United States currency, it runs something like this:

"Annual income, two thousand dollars; annual expenditure, nineteen hundred and ninety-nine dollars; result, happiness. Annual income, two thousand dollars; annual expenditure, two thousand and one dollars; result, misery."

But Mr. Micawber was only half-right!

Simply *not* spending more than you make isn't enough. Every family must have a cushion of savings to fall back on . . . and to provide for their future security.

U. S. Savings Bonds offer one of the best ways imaginable to build savings.

Two convenient, automatic plans make the systematic purchase of Savings Bonds both sure and trouble-free:

1. If you work for wages or salary, join Payroll Savings—the *only* installment-buying plan.

2. If you're in business, or a farmer, or in a profession, and the Payroll Savings Plan is not available to you, then sign up at your bank for the Bond-A-Month Plan.

Each helps you build a nest egg of absolutely safe, 100% government-backed U. S. Savings Bonds. And these bonds make more money for you while you save. For after only ten years they pay you back $400 for every $300 you put in them.

Join the Plan *you're* eligible for today. Mr. Micawber would say: "Result, security."

AUTOMATIC SAVING IS SURE SAVING - U.S. SAVINGS BONDS

Marty appeared to be amused. something here you haven't e straight. Pat Kingsley has ou often enough; so often that doesn't carry much weight any

"Telling the truth docsn't help much, docs it, Marty?"

"It might. Why don't you try it?"

I said, "You sure hang onto an idea. Any idea. Now it's Connolly. Before that, you thought I killed Jeff Nulty."

"Didn't you?"

"No."

"But if you did, you could also have killed Conchita Montcro and Pete Connolly. It's my guess they're all three tied up."

"I think so too. But I didn't do any of the killings."

"Always the little guy that wasn't there,, the boy with the cast-iron alibis. You got ideas, too?"

"Yes," I said, "but you probably won't like them. I think that so long as I was on the spot for killing Nulty, the real murderer was content to take it easy. I was the fall guy. If I'd been convicted, that would have ended it. But when I was acquitted, the case was reopened.

"We don't know how long Connolly's dead body had been lying at the top of those stairs. It could have been there even before you entered the club. Could be you're so accustomed to dishing up for Steve, here, that it had to be."

I said angrily, "That's lousy."

"So it's lousy. So I'm just a cop doing a job."

Pat touched my hand. She said, "He's right, Steve. He's got to learn the truth."

"Or anyway," said Marty, "he's got to keep on pretending like he thinks he is. Me, I ain't optimistic."

He walked across the room and started whispering to Bert Lane. Lane's head moved up and down in assent. He said, "It ain't a bad idea, Marty. Not bad at all. I'll go get her."

He opened the door. Noise surged in at us, then choked off as the door closed again. Marty grinned with his lips, but not with his eyes. He said, "Either of you see Rusty Mason tonight?"

"I do happen to have a house priced at $3,000 —but I never show it on a rainy day"

COLLIER'S ERIC PETERS

That seems the answer to why things were tranquil until they turned me loose —and have been popping ever since."

Marty said, "You make it sound good, Steve. Too good maybe."

"You were wrong before, Marty."

"I still ain't sure of that. What a jury says and what I think are two different things." He dropped his cigarette and ground out the light with the toe of his right shoe. "After Connolly finished bawling you out, what happened?"

I told him about Floyd Andrews convoying Pete back to the bar. Lieutenant Lane said, in a placid, drawling voice, "That's the lad who came up in the ninth inning when those two hoods were working Steve over."

"They been picked up yet?" asked Marty.

"No. But we think soon."

Marty asked, "What's this Floyd Andrews to you, Steve?"

"I don't know. He's interested in me, but I don't know why."

"You ever met him, Mrs. Kingsley?"

"Not until tonight." Pat's voice was under control. "Mr. Blake introduced us."

Marty was focusing on her. "Where were you before you joined Steve?"

"In my apartment."

"Do you—or maybe your husband—do either of you have a small-caliber gun? We don't know yet the exact size, but probably a .32 or a .25?"

"No."

We both said no.

"Lane's bringing her in. It oughta be good. She comes in, you keep your yap shut, Steve. Savvy?"

I nodded. I didn't know what was cooking, but whatever it was, I figured it couldn't make things much worse.

Several minutes passed. Then the door opened and Lieutenant Lane appeared. He was holding Rusty's arm.

She looked terrible. Still tall, voluptuous. But her eyes were big and wild and haggard. Grief had etched deep lines on her face.

She stood just inside the door, taking it all in. Then she looked at me.

She called me a name. She threw the epithet at me. She waited a second, then repeated it.

She said, "If I had a gun, Steve Blake, I'd kill you."

Rusty kept staring at me, stark hate in her eyes. I could understand that she had been hit hard by Pete Connolly's death, but why I rated all this was beyond me.

Marty Walsh let her run down. He didn't rush her, didn't prompt her. But he didn't try to stop her, either. He let her call me all the names she wanted, as though he'd have liked to do the same thing. Then he said, "Sit down, Rusty."

She sat down. Hard. Her lovely body sagged. Her blue eyes traveled around the room as though searching for a friend. There were traces of tears on her make-up, but she wasn't crying then.

Walsh looked at me. He said, "How much do you know about Miss Mason's past, Steve?"

I said I didn't know anything.

Marty asked, "Ever know a girl named Olive Palmer?"

I shook my head.

"Try again. Maybe you'll remember."

"The answer is still no, Marty."

"In San Francisco, maybe?"

"No."

He looked at Lieutenant Lane. The tall night-watch commander of the Hollywood Detective Bureau shrugged as though to indicate that he didn't think Marty would get very far on that road. Walsh said, "This Olive Palmer was connected with Jeff Nulty. Long time ago."

There wasn't much I could say about that. He was telling me things now, not asking questions. Only odd thing was Jeff Nulty cropping up again. He seemed to be having a hard time staying dead.

"The thing Nulty did three years in San Quentin for," Marty went on quietly, "was armed robbery. His girl friend helped him. She was the lookout. Part of the loot was a fur coat. That, he gave to the girl. The San Francisco police found her wearing it. The rest was easy. They had Nulty hog-tied in less time than it takes me to tell it. Nulty knew they had him. He evidently liked the girl, because he advised her to make a deal, turn state's evidence, and buy her freedom that way. No use both of them taking the rap. So she did. Her name was Olive Palmer."

Walsh took a long, narrow envelope out of his pocket. From it he extracted a couple of yellowed newspaper clippings. "These," he explained, "are from San Francisco newspapers. Nineteen thirty-eight. All about what Jeff Nulty did. The second clipping is about his trial, and about Olive Palmer testifying against him. Pictures of Nulty, and pictures of Olive. Take a look and see do they register."

He handed me the clippings. Nice, big, sensational stories. Nulty's picture didn't mean anything to me. I hadn't known him well enough to guess what he would have looked like in 1938.

THE girl—this Olive Palmer—jumped right out of the clippings and hit me in the eye. She looked exactly like Rusty Mason.

She was Rusty Mason.

I showed the clippings to Pat. She was as surprised as I had been, and as shocked. Walsh let her hold the clippings, as though to say she could read 'em if she wanted to. Then he said to me, "Guess where we found them, Steve?"

I looked at him.

"Right in this envelope. And the envelope was in Pete Connolly's pocket. It was there after he died and probably before he died. It was mailed in Los Angeles day before yesterday. We figure it was delivered to Pete Connolly this afternoon . . . or yesterday afternoon if you remember that it's now Christmas morning. Mean anything to you, Steve?"

"No."

"You claim you liked Connolly, don't you?"

"Yes."

"Could it be that you liked him enough to figure he shouldn't marry a girl unless he knew all about her, unless he knew, for instance, that the woman who called herself Wilma Mason was really named Olive Palmer and that she'd been mixed up in a criminal affair many years ago?"

I said I didn't know what this was all about. He paid very little attention. He continued calmly: "Of course, we might have here the answer why Miss Mason didn't rush into matrimony with Pete. Could be she was afraid to get a marriage license under an assumed name."

I said, "But I didn't know any of this Olive Palmer business. How could I know?"

"She tells me Jeff Nulty had the clippings. So maybe whoever killed him found them."

"Oh, for the love of Mike!" I made a hopeless gesture. "We're back to that!"

"Yep. We seem to swing back to it no matter how hard we try otherwise. So I'm asking you again . . ."

"Save your breath, Marty. I didn't kill Nulty. I didn't find any clippings in his apartment. I didn't mail them to Pete Connolly as a warning he'd be smarter to steer clear of Rusty Mason. I didn't kill Connolly."

"But you know now why he got drunk and started cursing you, don't you?"

"Why?"

"He obviously thought you sent the clippings. He thought it was your answer to his plea for assistance in getting Miss Mason to marry him."

I said, "I never saw those clippings before . . . ."

"He's a dirty liar!" Rusty's voice swept harshly across the room. "I've known from the first Blake had them. I knew he killed Jeff Nulty . . ."

I said, "Look, Rusty . . . that doesn't check. You've been more than friendly."

"Sure. And why? Because I wanted those clippings. Nobody in Los Angeles knew I was Olive Palmer. You're thinking I made a play for you. Well, I did. But what I wanted was the freedom of your apartment. I wanted to find out if you had 'em. I wanted to get my hands on them and burn 'em."

"But why . . ."

"I think you suspected all the time that I knew you killed Nulty. You figured I'd keep my mouth shut as long as you could hold this over me." She turned to Marty Walsh. "Jeff wasn't a bad guy, Lieutenant. He treated me swell. It was his suggestion that I turn state's evidence. I never saw him again until I read in the papers about him being made manager of the Club Casa Linda. I went to him for a job. That was a couple of years ago. Good secretaries were scarce. He recommended me to Mr. Ramsay."

"Why didn't he give you back your clippings? You knew he had 'em."

"Yes. He told me. He was an angle player; a guy like Jeff always is. He was keeping them just in case. But he wasn't using them."

Walsh asked, "How about you and Nulty? Were you playing games after you got the job with Ramsay?"

"No. That was all washed up."

"Why? Wasn't he still human?"

"We just didn't, that's all."

"But you'd have been happier if you had known those clippings were destroyed, wouldn't you?"

"Sure. But what . . ."

"Well, what's to say you didn't try to get 'em? What's to say you didn't kill him yourself and then hunt for them?"

SHE stared at him, badly shaken. She said, "It wasn't that way. Why would I make a pitch for Steve Blake—"

"You knew he'd been in Nulty's apartment the night Jeff was killed. Could be he somehow got the clippings without killing the man."

She said, "Steve Blake killed him. You don't want to think it, because a screwball jury acquitted him. You gotta hang it on somebody. You're trying to elect me."

"That wouldn't be difficult, Rusty." Marty wasn't any more excited than a teacher explaining something to a classroom. "See how this sounds. You helped a criminal in San Francisco. You got off on a state's evidence deal. You came to Los Angeles under an assumed name. You re-established contact with Nulty after he got out of San Quentin—as soon as he fell into something which looked like soft money. He held you in line with a batch of clippings which could ruin you if he ever spilled about them. You had other men on a string: perhaps Blake, certainly Pete Connolly. There may have been others. You weren't at Blake's cocktail party, but you knew all about the beef he had with Nulty. That could have been your chance. You could have killed Nulty with Blake's gun, knowing the finger would be pointed straight at Steve. You hid the gun in that catchall closet in your office, where nobody but you ever went. You maybe forgot it was there until the night Conchita found it. You didn't have anything against her personally, but you were at the table and heard her insist on talking privately to Blake. And as for Pete—it's a cinch bet you and he quarreled last night. He had received the clippings. He'd maybe ended your romance. So you killed him right there at the top of the stairs outside your office."

She said, with an odd, haggard dignity, "I didn't kill Pete Connolly. I was in love with him."

"You quarreled, didn't you?"

"It wasn't a quarrel. I was upset."

"That's the way you tell it, Rusty. A jury might not think that way."

"I don't, either. But then, as I always say, Fred works hard all year, and he certainly has a right to get away for a couple of weeks and do what he likes—"

COLLIER'S JON CORNIN

She said bitterly, "You jump on the first suspect, don't you, Walsh? Once it was Steve Blake. Now it's me. Anybody you've got a case against. To hell with you!"

Marty took that in stride. He said, "Is that why you hired those two hoods to work over Blake? Maybe if this lad, Floyd Andrews, hadn't got there in time, they'd have beat out of him where he had the clippings."

She said something to indicate her supreme disgust. But she wasn't fooling anybody. She was badly frightened.

She had every reason to be. The case Marty had built against her was good, almost as good as the one he'd constructed against me on the Jeff Nulty thing.

Pat leaned over and whispered to me: "She didn't do it, Steve. I'm sure."

"What makes you so sure?"

"Woman's intuition, I guess."

Lieutenant Lane was doing things. He pulled out the side compartment of Rex Kingsley's desk, and a typewriter popped up. He looked through the drawers and found an envelope. He examined the envelope carefully. Then he slipped it under the platen of the machine and typed slowly.

When he finished he went over to Marty Walsh and took from him the envelope in which the clippings about Olive Palmer had been mailed to Pete Connolly. He studied them for a half minute, then drew Marty Walsh into a corner. I saw Walsh's face brighten, and heard him say, "You got something, Bert—you sure got something."

Lane's soft friendly voice floated across the room. He said, "This is mighty interesting. This envelope was typed on Rex Kingsley's machine."

Pat Kingsley's hand flew to her mouth. It pressed tight against her lips. She said, "No! Rex wouldn't have killed Pete Connolly. He had no reason to."

She was too sure, too vehement. Looking at her, listening to her words, I got a sick, sinking sensation in my stomach.

THE cops worked hard on the Pete Connolly murder, but they didn't get very far. Within seventy-two hours several things were discovered, but none of them was terribly important. Connolly had been shot through the heart, once, with a .32. There were a lot of .32s in Los Angeles.

There was a bruise on Connolly's forehead which could have come from a fist, or a door. There was very little blood, and the floor of the dark, narrow mezzanine hallway indicated that he hadn't been shot where the body was lying. He'd probably been killed somewhere else, somewhere close, and carried there. Since he weighed only ninety-seven pounds soaking wet, that wouldn't have been too difficult, even for a woman.

Everybody I knew and a lot of people I didn't know could have been on the mezzanine at some time between eleven o'clock and midnight. Including myself. Of course, I hadn't been, but I couldn't prove it. Marty had been right when he said that no one of the strangers who sat at adjoining tables would have been watching me every minute. I myself couldn't have testified as to the movements of any given person at any nearby table. There had been too much activity, too much noise. Of course, Pat knew I'd been right there most of the time, but Marty had made it clear that he wasn't inclined to give too great credence to any alibi she handed me, and I couldn't blame him. As for the others: Mario and Rex Kingsley admitted they had been there, the former to see that things were going okay with Santa Claus, and Kingsley to make sure that no pieces of his costume were missing. Both said they hadn't seen any corpse.

Rusty Mason said she had stayed in her room, crying. That was because she had battled with Pete Connolly. Brian Garland, Wade Ramsay and Floyd Andrews claimed not to have been on the mezzanine at eleven. They had, according to their stories, just wandered around spreading good cheer.

The verdict of the coroner's jury was the usual thing: that deceased came to his death by a bullet fired from a .3 caliber gun in the hands of a person persons unknown. The gun wasn't foun

I spent the next few days adjusti myself. I saw Pat Kingsley infrequent and for not too long at any one tim She looked drawn and tired. I thoug she was avoiding me, but I couldn't sure. Business downstairs spurted. Not ing like a few good murders to dra a crowd. New Year's Eve was already sellout, at ten bucks per cover.

On the night of the twenty-eighth was alone in my apartment. I was stru gling to concentrate on a tricky proble of wing design, and getting nowhe fast. The telephone rang. It was Lie tenant Lane of the Hollywood Detecti Bureau. He said a couple of his boys h just brought in two men who answer the description of the pair who had b tered me around on a lonely cany road. Could I come down and ma positive identification before they start being persuasive? I said I could. asked him whether he'd told Ma Walsh and he said he was trying to c tact him.

I drove to the Hollywood station, unimaginative two-story building of y low brick. It looked exactly like a p lice station.

Downstairs there was a jail and a de behind which clustered a lot of u formed policemen. They sent me u stairs to the Detective Bureau, wh was on the second floor. I walked i a little room with a railing.

It was full of detectives, some lar some larger. Lieutenant Lane was hind the desk. He stood up to sha hands with me.

THE detective outfit occupied a se of tiny squad rooms. Lane took into one of them and beckoned Serge Ehrlich to follow. Two other detecti came in also: a long, lanky one wit round face, very little hair, glasses, a a big gun; and another, equally tall, much younger and heavier.

Lane said they had picked up the men in a bowling alley. Both had der knowledge of the incident, and the c didn't want to start really arguing v them unless they were sure. They t me back into the main office and let peep through a gimlet hole into the r room where two policemen were sitt

I recognized them right away, b wanted to be even surer than that. W I was still looking, Marty Walsh Sergeant Tremont came in. Th driven all the way from Homicide D sion in City Hall. We said hello around, and Lane asked me the score

I said, "Those are the two, all right

"Mind walking in on them?"

I said that was okay with me. opened the door and walked in: Wa Lane, Tremont and Ehrlich. They sho the policemen out of the room. and Ernie looked at me.

I repeated my positive identificat They swore they'd never seen me bef and—what was more—that they never beaten up anybody in any can at any time. Marty Walsh started t ing to me in a placid conversati voice. He said, "The public has a lo wrong ideas about third degree. St Walloping a statement out of a man worth soup. It doesn't stand up in c and it hurts your case. But when yo dealing with hoods, and when you k you've got the right ones—when yo sure of it like we're sure of these —why, we got to go as far as they us go to get some truth out of them."

He looked at Tremont and Ehr Both were big men, both powe Calmly and dispassionately, they off their coats and folded them ne One stood in front of the two priso in whose eyes the faint, flickering of apprehension was beginning to sl

sting," Walsh said. "They check nvelope Lane typed on the ma- Rex Kingsley's office, and with g on the one which was used ng the clippings about Rusty Pete Connolly. You wouldn't ng anything about them, would e?"
Lots of people had access to e. Any one of them could have typed the envelopes. And I'm sure even you wouldn't believe I'd pay two hoodlums five hundred dollars to beat me up."

"I don't think you would, at that." Walsh walked back into the squad room. He said, "One thing more, boys. Would you recognize the voice that talked to you over the phone?"

They said they thought they would. Marty said, "I'm going to talk to somebody. When Lieutenant Lane here gives you the word, you're each to pick up one of the extensions. You're not to say a word. Nothing. Just listen."

He went in the front room and called the Casa Linda. He identified himself and asked to speak to Rex Kingsley. Lane picked two telephones off their cradles and handed one instrument to each of the prisoners.

The conversation didn't mean a thing. Marty asked a few questions about how the club was running. He stretched it out for about three minutes. Then he hung up, and Slim and Ernie did the same. He said, "What's the answer, boys?"

Slim said, "That's the guy."

Ernie said, "I'll ride along with that, Chief."

"How would you know?" asked Walsh sharply. "Slim was the one talked to him from the hotel."

"Yeah. But I was interested, 'count of the five hundred, see? I was crowdin' the phone all the time they was talkin'. That's the guy."

Walsh and Lane nodded at each other. Lane said to Sergeant Ehrlich, "Take these monkeys down an' book 'em, will you? Anything you can think up."

They disappeared down the hall. Marty looked at me and then at Bert Lane. He said, "You busy, Bert?" and Lane said no.

"How's about riding over to the Casa Linda? Maybe you and me and Stevie boy could have a cozy little talk with Rex Kingsley, huh?"

Lane said he thought that was a good idea. We started down the hall. Marty Walsh said, half to himself, "And we might as well make it real good, while we're at it. We'll bring Mrs. Kingsley in, too."

MARTY WALSH, Bert Lane and I went through the lobby and up to the seventh floor. Walsh pressed the buzzer on 7-A, and Pat Kingsley opened the door.

She had on a powder-blue negligee. The general effect was Grecian, and didn't hide the fact that she was a perfect 34. It was very lovely.

She recognized the two detectives. Then she looked at me. She asked, nervously, "What is it? What's wrong?"

Marty said, "May we come in, ma'am?"

She stood aside and we walked in. It was quite an apartment. There were two doors in the living room. Both opened into bedrooms. Walsh asked which was Kingsley's. Pat pointed to the nearest one.

The living room was huge. Lots of windows, lots of view. Evidently Pat had been reading, because an open book lay face down in an easy chair under a standing lamp, and a half-smoked cigarette smoldered in an ash tray alongside. Off the other end of the room there was a dinette and quite a kitchen, much bigger than the setup in my next-door apartment. There was a telephone on the little table just beyond the archway separating living room and foyer.

Marty Walsh said he had merely dropped in for a little chat. He asked Pat to phone downstairs for her husband. She hesitated, but only briefly. Her eyes were still full of questions. I managed to grin, trying to convey to her the information that everything was all right—or as nearly all right as it could ever be while indiscriminate homicide was in the air.

"Less than ten minutes after she

phoned, a key grated in the lock, the front door opened and slammed and Rex Kingsley walked in. He looked very handsome and very annoyed. He took three steps into the living room, looked at each of us in turn and said, "What the hell goes on here?"

Marty invited him to have a seat. Rex didn't refuse, but he didn't sit down, either. He was overflowing with hostility and ill temper. It seemed to me that he wasn't playing it very smart.

Walsh started talking, his voice soft as silk. He described Slim and Ernie. When he finished, he said, "Do you know either of those men, Kingsley?"

"Why should I?"

"I didn't ask that. I asked, do you?"

"No."

"They're a couple of rough characters," Marty stated. "They trail people and beat them up. They do it for money. They're not awfully good at it, but they try their best."

Kingsley asked, "What has this got to do with me?"

"They say they know you. Not personally, but by mail and telephone. Just a little while ago when you and I were talking on the telephone, they listened in. They identified your voice. They claim you sent them five hundred dollars anonymously, through the mail, and then followed up with a phone call offering an extra five hundred if they beat up Mr. Blake and warned him to keep his nose out of things that didn't concern him."

Kingsley said, "They're both liars."

"Maybe. I'm just trying to find out."

"Couple of cheap hoods. Why wouldn't they identify any voice you asked them to identify?"

"You got a point there, Kingsley. Could be that way. Only I don't think so."

"You'd take their word against mine?"

"Here's the deal, Kingsley. Those clippings we found in Pete Connolly's pocket after he was killed: they were typed on a machine in your office downstairs. The envelope these two characters say they got the five hundred in—that was typed on the same machine."

"So what? I don't keep that office locked. People are in and out of there day and night. Anybody could use that typewriter."

"But *do* they?"

"How would I know?" He picked a cigarette out of a cigarette case that looked like solid gold, and lighted it with a lighter that also looked like gold. "You boys will have to do better than that if you're trying to tie me in."

WALSH said, "We're not trying to tie anybody in, Kingsley. We're prospecting, is all. We're asking questions, and sometimes we're getting mighty unsatisfactory answers. I'm going to try a few on you. I'd advise you to answer straight. You might fool us for a little while, but not always."

"I'm not certain of that, Walsh. You've been fooled before."

"About Steve Blake? Tell you the truth, Kingsley—I'm still not entirely sure I *was* fooled. That's one of the things I came up here to talk about. Blake was acquitted on the strength of your wife's testimony. You know what she testified, so I won't rehash it. What's been happening since ain't exactly according to Hoyle."

Rex's expression was ugly. "What kind of a crack is that?"

"You understand me, all right. Either you know she lied on the stand and know *why*, or you know she told the truth and you go right on living with her. Which is it?"

Pat started to say something, but Marty cut her off. He said, "Just a minute, Mrs. Kingsley. What I've just stated is fact. If it's embarrassing, I'm sorry. Maybe there's a good answer. If there is, I'd like to hear it."

Kingsley said, "Just what way is your dirty mind working, Walsh?"

Marty's eyes grew a shade colder. He said, "You ain't buying yourself a lot of good will, Kingsley."

"I'm not asking for it. What happens inside this apartment—between my wife and myself—is our business."

"She couldn't have been covering for you, could she?"

Rex didn't answer. He leaned against the mantel, obviously enjoying the theatric quality of the scene.

"Or is it," continued Marty easily, "that you were willing for her to play house with Blake for reasons of your own?"

"Why, you lousy . . ."

Lieutenant Lane's long figure uncoiled and ranged alongside Rex. He said, gently, "Ain't any sense getting mad."

"But when he insinuates . . ."

"He ain't insinuating. He's saying it right out. When a man's wife tells the world she's another man's mistress, the husband usually does something about it. Not shooting, or anything old-fashioned like that . . . but maybe just walking out on her, or throwing her out. He doesn't just take it. Kind of makes him a ridiculous figure if he does."

That got under Rex's hide.

"Of course," Lane went on, "could be you're a noble guy. Could be you think Mrs. Kingsley killed Jeff Nulty. Only you don't strike me as the noble type, Kingsley. You look to me like the wrong end of a horse."

Marty picked up the needling. He said, "Who pays for this apartment, Kingsley? You or the missus?"

"None of your business."

"Did she buy you that swank new convertible you're driving?"

No answer.

"And all those expensive new clothes you had tailored recently? And those gold accessories? You couldn't afford those things yourself, Kingsley."

Marty Walsh was doing a nice little job of whittling away at Rex's ego. "Killing Nulty, I could figure," Walsh went on. "You don't mind being kept by a rich wife, but you'd hate to be anybody's assistant in a night club. Maybe also you and Nulty didn't agree about Conchita. And maybe Conchita didn't agree about you. Must have hit you hard, too . . . when you're such a bear cat with the women. Now about Rusty . . . there's a gal who could have gone overboard for a collar ad like you. You're the type who might think she was worth having. You could hate Steve Blake because Rusty went for him, so it might have been worth five hundred dollars to get him beat up. And since you knew that Rusty and Pete Connolly were talking about getting married . . . that could have made you mad, too. So damned mad maybe you would put a .32 right through his heart."

Kingsley moved away from the mantel. Bert Lane moved with him, his arctic eyes watching warily. But Kingsley didn't do anything except talk. He started telling Walsh what he thought of him. His language was straight out of the gutter. It was vile and shocking.

Walsh relaxed on the couch and took it imperturbably. When Rex ran down, Marty said, "You sure waste a lot of words, Kingsley."

Rex said, "Are you accusing me of murder?"

"Not yet."

"Do you plan to?"

"It all depends. But I'm interested. You're in the middle of everything. You're neck-deep in motive. I came up here to give you a chance to talk your way out. You haven't played it that way. You know why? I think you're scared."

"Of a cheap cop like you?"

"Nope. Of something else. Of something I might have overlooked."

"You mean you haven't enough evidence to arrest me, is that it?"

"Perhaps. I believe those two hoods I've got locked up. But they could be lying. Maybe they're covering for somebody they know. What they said didn't *have* to be the truth. For all I know, that telephone call they got could even have been from a woman. Maybe they just said it was a man to throw us off." He turned to Lieutenant Lane. "Smart crooks pitch curves like that all the time, don't they, Bert?"

Lane nodded gravely. He said, "It ain't impossible that Mrs. Kingsley did the telephoning. Keeping on living together this way, how do we know but what she and this louse are still crazy about each other?"

I felt myself getting tight inside. I said, "Take it easy, Lane."

"You keep out of this, Blake. It ain't your party. And take my word for it, *anything could be*. Especially where there's a lot of murder concerned. I'll ask you just one question, then you can get back to the side lines: Haven't you done some wondering why Kingsley and his wife didn't bust up after what she testified about her affair with you?"

Pat Kingsley said quietly, "It probably does look odd, Lieutenant. But that's the way things are."

"Why?"

"Isn't that our business: Rex's and mine?"

"I ain't so sure."

"It certainly is," broke in Kings "unless you get something more to on. And I've had enough of this. Eit you arrest me or get the hell out."

Marty asked, genially, "What are y Kingsley—tough or frightened?"

Bert Lane said, "Looks like we a welcome, Marty."

"You're not!" That was King again, whipping himself into fresh f "You'd crucify me if you could."

Walsh and Lane started for the d They motioned me to follow. Rex st where he was. But Pat walked half across the living room with me.

We looked hard at each other. In face I saw worry and fear. But I di see guilt. Maybe that was because I prejudiced—because I knew then, mistakably, that I was in love with

"Some of the boys are getting up a card game for tonight and they dared me to ask you if I could go"

COLLIER'S CHARLES PEARSON

FOR several days I did nothing r than work and think. But thoughts were not on aerodynar No matter what I tried to think ab I would come back to Pat Kingsley.

That scene in her apartment h been pretty. Not much of a persona ture had been discussed that she a hadn't touched on before. But this bringing it out in the open.

They had a lot on Rex Kingsley. much perhaps. By all the rules, he sh have been scared to death. He *had* frightened, but not nearly enough. had played it like a man who held p good cards and was determined to them for all they were worth. He h even reacted violently until they ne his vanity.

Anybody could have typed the m ing envelopes. Rex hadn't lied abo office being a thoroughfare. If som wanted to cover, there couldn't more logical front than Kingsley. I like the guy, but I couldn't see that had any more on him than they h me when they'd thrown me in the for the murder of Jeff Nulty. No as much, actually.

New Year's Eve came arou watched the beginning of the show stairs and was surprised to see that Mabry, the orchestra leader, wa ceeing. I wondered what was ailin Kingsley.

I didn't see Pat. Maybe she an husband were together somewhere brating privately. I didn't relish th I finally turned in and flopped arou the bed for hours before getting to When I woke, the clock told me after nine, and outside there was th pressive quiet that follows a too- night.

The day passed miserably. I w tain of only one thing: No matte happened, I wasn't going to conta Kingsley. It was a New Year's reso and I wasn't one of these we who make resolutions idly. I ke one until afternoon: the early aft of Friday, January 2d. And eve circumstances had to conspire me.

Twice my apartment telephon Twice I answered it. Twice the li been crossed with the line to the K apartment. Twice I heard Pat ta not about anything in particula talking. Both times I replaced the ment on its cradle.

I went into the hall and rapped door. We were both embarrassed

"I've been wanting to talk t she said.

I suggested having dinner toge said I thought it'd be fine if dressed right away so we could long pleasant drive and just ta said she'd rap on my door as soo was ready.

When she knocked on the opened it with my hat in my ha said, "May I come in a minute f

I said sure, gave her my best c offered her a drink which she d

e said, "If you hadn't come to see me, was going to telephone you, Steve. I'm orried."

"About what?"

"About something we might discuss fore we go out." She looked everywhere but at me, as though wondering ether to go through with it. Then she sed her eyes to mine and said, "Rex s disappeared."

"Disappeared? You mean . . . ?"

HE said, more steadily, "Nothing wrong that I know of. He's simply he."

"Where?" I asked. "When? How?"

I don't know. The first time I was are of it was night before last, just ore the show. Wade Ramsay dropped to see me. He was up in the air a e. Asked me where Rex was. I said I n't know. He said Rex wasn't in his ce, wasn't anywhere around the club. said their special New Year's Eve w was about to be ruined."

You haven't heard from Rex since?"

No . . . I'm afraid I won't."

worried. He's my husband, le- any rate. I won't be a party to anything happen to him."

's just another way of saying you mething you're not telling. Isn't tructing justice, Pat?"

Her answer was direct, as she had thought it over for a e. "The law provides that a wife cannot be compelled to testify against her husband. There's another provision which holds that she isn't even a competent witness against him except in certain types of actions. That seems to indicate to me that if I know something which might injure Rex, I'm legally as well as morally justified in keeping it to myself."

I said I wouldn't argue the point with her. The important thing was that she had elected to follow a certain course, and it was none of my business whether or not she was right.

We got ready to go somewhere. She was standing at the door waiting for me to close the windows when the telephone rang. It rang long and loud. I knew it was important before I even said hello.

It was important, all right. A woman's voice asked whether this was my number. I said yes, and the other voice said, "Victorville calling." Pat was close to the phone. She came even closer. That was fine with me.

I said hello again. There was a brief pause and then a man said, "Who is that?"

"Steve Blake."

"Are you alone?"

I thought I recognized the voice. I said, "Yes. Who is this?"

"Rex Kingsley." He sounded shaky. "I need help. Lots of help. Right away. You're the one person in the world I feel I can trust."

That struck me as odd.

Kingsley continued nervously: "Will you keep this to yourself—no matter what you decide to do?"

I said, "Yes."

"Okay. You've got to come where I am. No one else knows where that is. It's terribly important."

"Why?" I asked.

"Because," he said tensely, "if you do exactly what I say I'll be able to give you tangible, documentary proof which will clear up all three of those murders."

THE distant voice said impatiently, "Hello—hello!" and I said, "I'm still here, Kingsley."

Rex said, "Are they looking for me?"

"I don't know."

There was a brief pause. "You know the San Berdoo-Victorville road?"

I said I knew it.

"I'll meet you at ten o'clock tonight. You won't throw me down, will you, Steve?"

"Where are you staying?"

"It doesn't matter where I'm staying. Where I'll meet you is the important thing. Listen carefully, but don't write it down. Don't write anything. Ready?"

"Yes."

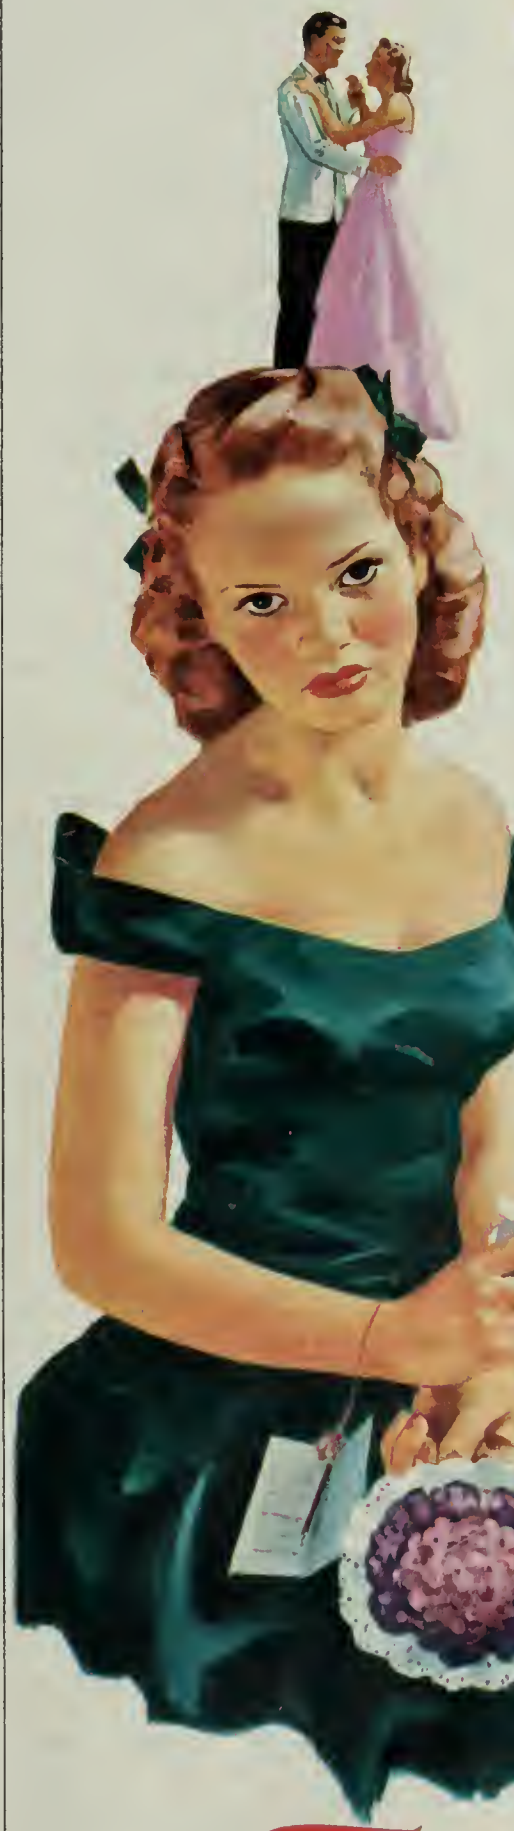
"You don't go all the way into San Bernardino. You swing left before you get into town. That'll put you on the Las Vegas road. Keep on it until you get almost to the top of Cajón Pass. There's a curve in the road—a left curve the way you'll be driving. On the right of it there's a gas station with a few auto cabins scattered around. Everything painted in black and white stripes like zebras. Your headlights can't miss it. Follow me so far?"

I said I followed him.

"Okay. Right in front of the gas pump, check the mileage on your speedometer. Exactly three and two-tenths miles from there a narrow dirt road winds off into a canyon. The mileage is important: you'd miss it otherwise. Be sure no other car is anywhere around when you turn off the main highway. Go about a quarter of a mile along that dirt road."

I said okay. I thought of a lot of questions, but I knew he wouldn't give me the right answers. He talked as though this might be pretty important. He made it sound like this was my big chance to get somewhere. He said, "You won't tell the cops, Steve?"

"No. I won't tell the cops."



"You got plenty of time. Even driv-

ing slow you can make it in less than three hours."

"I'll be there," I said. "Now let me check back on the directions." I repeated them carefully.

Rex said nervously, "You haven't written any of that, have you?"

I told him I hadn't. He said goodby and the line went dead. I put the telephone down and looked at Pat. Her cheeks were pallid, her eyes too bright. She said, "You're not going, are you?"

"Why not?"

"You might be killed . . ."

"By Rex?"

"Even that. He's frightened."

"He sounded on the level," I said. "Just because he was frightened and desperate. Figure it out, Pat. He didn't have to tell me where he was."

"What's your guess, Steve?"

"You won't like this," I said. "I haven't much admiration for your husband. Maybe he thinks I'm in love with you. Maybe he'll offer a trade: He'll step out of the picture if I'll help him. There's nothing chivalrous about that, but it might be the way he's thinking."

She looked at me oddly. "Suppose he shot you?"

"If he's got that in mind, he's certainly doing it the hard way. Uh-uh, Pat. This I've got to do."

"You'll tell Marty Walsh?"

"No."

She said, "I'm going with you."

"No soap."

"I'll either ride with you, or follow in my own car. Take your choice, Steve."

She wasn't kidding. I asked what she had in mind, and she said—plausibly enough—that she knew Rex better than I did; she'd be able to evaluate whatever it was he intended to say; she'd know whether he was trying to pull a fast one. I finally gave in.

We took my car and drove out Sunset slowly; traffic both ways was heavy.

PROGRESS through Pasadena was slow. Plenty of traffic cops lurking around, and I didn't want a ticket. We continued moving at a modest pace until after we'd passed the town and come within sight of the gaudy magnificence of the Santa Anita track. After that we picked up a little speed. Just short of San Bernardino I pulled up across the street from a big lunchroom which specialized in short orders, thick malts and juke boxes. I said, "We've got a lot of time to kill. We'd better eat something."

I finally sold Pat an order of bacon and eggs and ordered the same for myself. She ate a little, but not much. I did all right by mine. We each had three cups of coffee, and we wound up on lemon meringue pie. Some high-school kids barged in, dropped nickels in the juke-box slot, and a name orchestra began to beat out loud jive. I paid the check, tipped the waitress and we went back to the car. We leaned against the cushions and just talked. We still had too much time.

The food had helped me, and it had done wonders for Pat. She was still tense, but not jittery. Finally she said, "I can't help being apprehensive, Steve."

"I hoped you had quit worrying."

"Worrying has become a habit with me." She lighted a cigarette for herself. "Will Rex be there?"

"I think so."

"How far will you play along with him?"

I said carefully, "It all depends on what he's got on his mind."

"You'll be careful? Every second?"

I said I'd do my best. I didn't like the setup any better than she did, but it still looked like a smart play. Anything seemed preferable to the doubt which had been plaguing me for so long. And there was another angle I hadn't discussed with Pat: Marty Walsh hadn't checked me out of his calculations. Not by a long shot, he hadn't. He couldn't touch me for the killing of Jeff Nulty, and he didn't have any gripe against me personally, but he still thought the jury which acquitted me had been wrong.

We turned left at a highway intersection, and I stopped for more gas. We didn't need it, but a checkup is always in line when you're heading out into the mountains and desert.

I headed north, avoiding the town. I knew the approximate distance we still had to travel. By taking it at a conservative thirty, we ought to hit it on the nose.

The road started to climb a few miles north of the town. It would keep right on climbing. This was the beginning of Cajón Pass.

Up and up. Twisting and turning. We were in the mountains now—among peaks and ravines and canyons. There was a quarter moon and a million stars. The air was cool but not cold. It was fragrant with the odor of sage and manzanita. It was mountain and desert all together: lonely, stupendous, impressive country.

At the top of the pass, the road swung left in a long, leisurely arc. Our headlights picked out a gas station and a half-dozen forlorn cottages painted in broad, diagonal zebra stripes. This was our checking point. I looked at the speedometer, made a mental note, and added 3.2 to the total.

I drove meticulously from there on, remembering Rex Kingsley's warning about the danger of overshooting the mark. Precisely at the 3.2 point I saw what looked like a trail jutting off to the right. I made sure there were no other cars about, went into second and nosed cautiously along the path.

Thirty feet after leaving the road, it dropped downward. It kept right on dropping. I wondered how a car could manage to turn around, but that was something to worry about later. I shifted into low, and moved even more slowly.

A quarter of a mile. That's not far, but it's still difficult to estimate. I put my lights on bright. Lots of sage, a few Joshua trees. Hills, ravines, nothing else.

Then suddenly my headlights picked out a long, sleek convertible. Rex Kingsley's car. It had been backed off the trail, as though in preparation for starting its upward climb suddenly.

I didn't see Kingsley. I got out f under the wheel, leaving my lights Pat got out the other side. I took hand.

We approached the car slowly. I c Rex's name. My voice seemed to c forever. There was no answer.

That was odd. If he were anyw around, he couldn't have failed to me. But even when I called agair didn't answer.

And then, suddenly, I knew why: Kingsley was there, all right. He lying on his face on the far side o new car.

It took me less than ten secon realize that he was dead.

WHATEVER I had expected to it wasn't this. I had looked for to a long, informative, perhaps un ant, talk with Rex Kingsley. But the wouldn't talk again. Not ever.

Pat was down on her knees besic body. She was limned in the head of my car as sharply as a stage sta big scene. Only she wasn't acting, all. She had one hand on Rex King cold forehead, the other on his sho She showed more shock than grief, couldn't be sure. It hadn't been s since she reminded me that she hac loved this man.

The scene was too brilliantly li too stark. I walked back to my c got a flashlight out of the glove partment. I snapped off the head I went back to where Pat was, thr a little circle of light wherever I w it to go.

I put my hand on Pat's head. It much of a gesture, nor all that I have liked to do, but it was som More than anything else in the w wanted to help her, to soften th that already had fallen, and to shi from what was still in store.

side. It was filled with nice
y: hundreds and fifties. I
didn't take time to count it, but Pat had said he'd drawn eight thousand dollars from the bank, and this would come pretty close to being that much. In any event, it was a lot of money.

There was another wallet in his left hip pocket. Perhaps a hundred dollars in that one. In the other trousers pockets, some dollar bills and a little silver. The smaller wallet had identification cards. In his other pockets were cigarettes and matches. There was the beautiful gold cigarette case I'd seen before. He was wearing an expensive wrist watch and a ring set with a too-large diamond. You could think anything you wanted about his death, except it couldn't be robbery. Whoever had killed Mr. Kingsley had done so because he wanted Mr. Kingsley to be dead. Period.

I looked all around for a gun or a shell. No sign of either, but that didn't mean anything. A gun could have been tossed forty feet away and I could have looked for a week without finding it.

I got up and pulled Pat to her feet. She didn't protest. She followed me to Rex's car, walking like an automaton. His keys were still in the ignition. Again I had her hold the flash for me, while I went over the car. Everything seemed to be shipshape. I flicked the light around, looking for a third set of tire tracks. I didn't find them. Whoever had killed Rex had walked down the trail. Or had ridden with him.

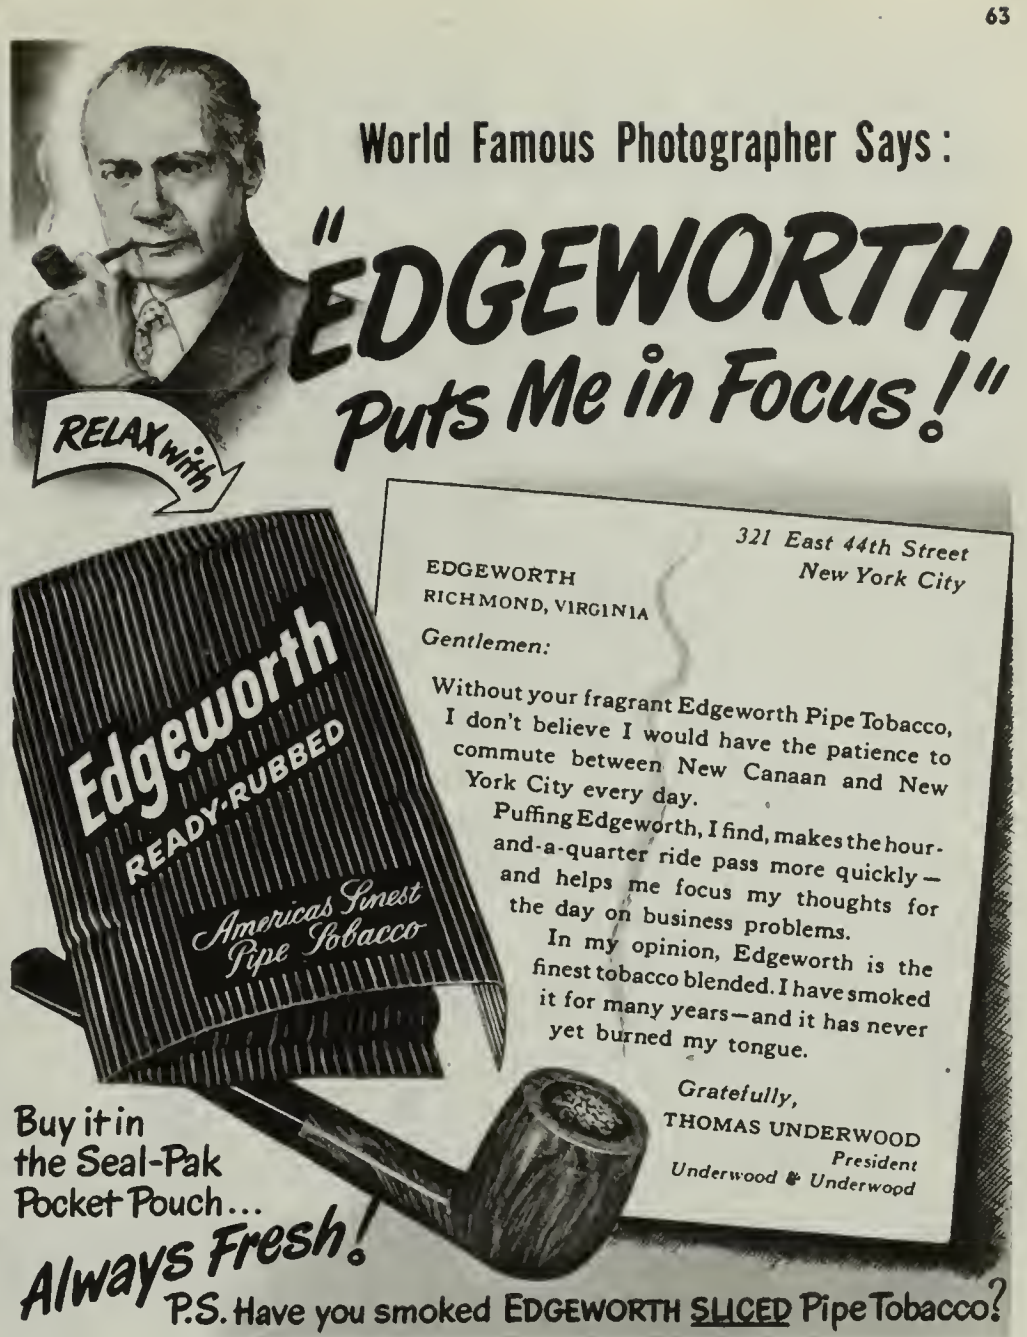
I FOUND a hummock near by which was just about of bench height. I pulled Pat down beside me, and put my arm around her. I knew that no matter what the circumstances I would always be poignantly aware of her nearness, that I would always want my arm about her. I tried to keep my feelings out of my voice. I said, "Whoever killed Rex took whatever it was he wanted to show me. It must have been in his inside coat pocket, where the long wallet was. Have you any idea what it could have been?"

She shook her head.

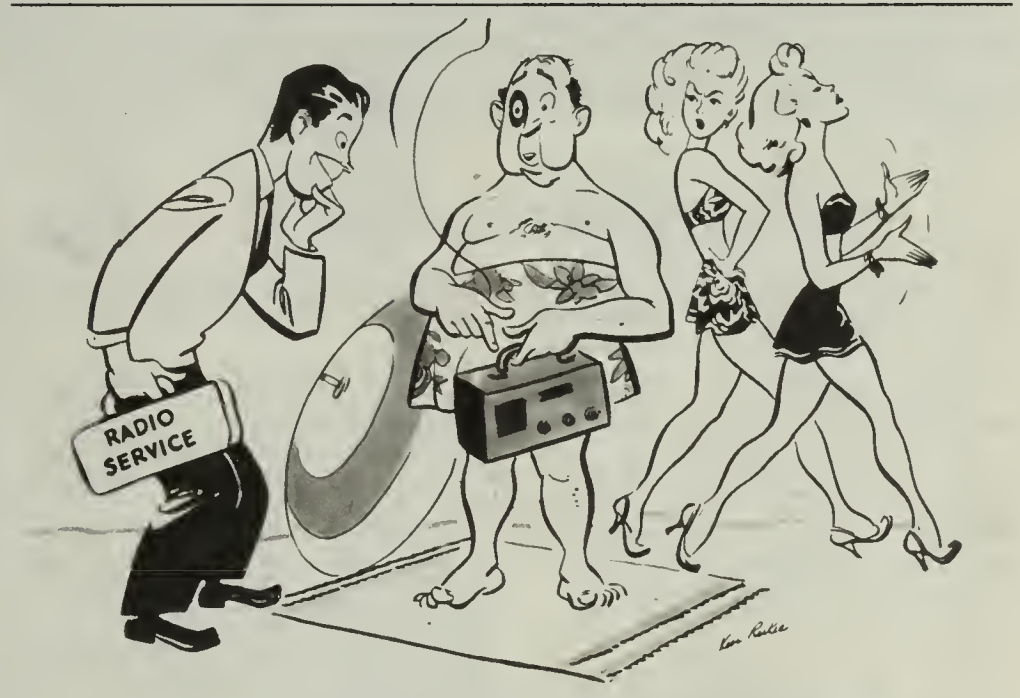
"Anything you can think of," I prompted. "No matter how far-fetched it seems."

She shook her head again. Then she began to tremble, as a person trembles at the beginning of a chill. It wasn't the cold, although it was plenty chilly here. It was a trembling that came from inside, from too much emotion pent up too tightly and too long.

She started to cry. She put her arms around me and kept right on crying. It was a quiet crying, rather dreadful. I didn't try to stop her. I didn't say a word. After all, what was there to say? I kept my arm about her, holding her body close against mine. I reached over with my free hand and stroked her cheek. Eventually the crying stopped and her body was still again, and we sat that way, just the two of us lost in a world that was bigger than all eternity.



After a long, long time she got herself under control. I told her we had to do things. We had to get word to the sheriff in San Bernardino, and ask him to notify Marty Walsh. Walsh would be mighty interested in this.



I said I was going to try to flag a car headed for San Berdoo. I explained it would be better if we didn't leave the body of Rex Kingsley. I took her hand and we walked slowly up the trail to the main road.

Three cars appeared, traveling south. They didn't even slow down in answer to my thumb appeal. I said, "They don't want any part of a man hitchhiker on this lonely stretch, Pat. I'll step back here in the darkness. You flag the next one. They'll stop for a woman."

She nodded.

One car ignored the lonely woman on the deserted highway, but the next one stopped. There was a couple in it, a young man and his girl friend. Or maybe she was his wife. They had been seeing

the New Year in at Las Vegas and were headed home. Even when I stepped into the picture, the man didn't turn a hair.

I pointed down the hill and said there had been a bad accident. I let them think it was my car. I said a man had been killed. Instantly the man and woman became solicitous.

I said there was only one thing they could do. Get into San Bernardino as fast as they could and go straight to the sheriff's office. I handed the man my card and asked him to give it to the sheriff. I told him it was of vital importance to ask the sheriff to telephone Lieutenant Marty Walsh of the Los Angeles Homicide Division.

THE woman in the car looked at my card. Then she looked at Pat Kingsley. I saw recognition leap into her eyes. Steve Blake and Mrs. Patricia Maxwell Kingsley. All alone in the mountains with a dead body. Sure, they'd know about us, if they could read.

The driver reached into the glove compartment of his car. He said, "It's cool up here. Maybe you and the young lady might be able to use this."

I accepted gratefully. He gave me his card, renewed his promise and drove away. His car was a good one. It vanished swiftly and smoothly. Pat and I found another hummock by the side of the road, far enough back to be clear of headlights. I made her take a big drink.

We sat silent for a long time. I began to think back over all the things that had happened since I had first seen her: the things I understood and the ones I didn't expect ever to understand. I took her hand and started to talk.

I said, "I don't know what's right and what's wrong about this, Pat—but there's something I'd like to say. Now. For whatever it's worth, I want you to know that I love you. I've loved you for a long time. I've never understood you, but that still hasn't made any difference."

She was silent. I started worrying. And then her voice came to me, ever so faintly. She said, "I've loved you for a long time, too, Steve. I couldn't help it, either."

I drew her closer in the circle of my arm. It was out in the open now, for better or for worse, for happiness or for misery. I made no attempt to kiss her. We simply clung to each other, not talking at all. It was a hell of a love scene, but for the moment I forgot tragedy and doubt and uncertainty, and remembered only that I was happy.

Two people in love can say a lot without words. Pat and I were that way. For a while there wasn't anybody else in the world. The mountains and the desert were there just for us. Someday perhaps we could act like normal human beings who loved each other. Now we could just sit quietly and know that it was so.

A car came whirling up the pass. I touched Pat's hair with my lips and said, "Steady, darling." It was the first term of endearment I'd ever used with her. It gave me a nice, possessive feeling.

I walked out on the road and flagged the car down. I knew it had to be the sheriff. It was.

The car jerked over to the side of the road, and three men tumbled out. One of them carried quite a bit of extra weight, but he was solid, too. He showed me a badge and said he was Sheriff Watterson of San Bernardino County. I told him who I was and introduced Pat. He, in turn, introduced the other two men. They were deputies. He said, "Who's down yonder?"

I said, "Rex Kingsley. Mrs. Kingsley's husband."

"Accident?"

"No. Murder."

He took it in stride. His soft, pleasant voice didn't betray any excitement. He said, "Got any ideas, Blake?"

I said no. I told briefly about finding the body. I didn't mention the thing Rex had called documentary proof, and which was apparently missing. He conferred with his deputies and sent them down the hill. They looked tall and rangy and efficient. I suppose they had to be. Policing an area as vast as San Bernardino County must be a considerable job. He told them to search carefully, and not to disturb anything, especially anything which might have fingerprints on it. "Even these folks' prints," he finished. "Of course, you've kind of poked around, haven't you, son?"

I said I had. He didn't seem surprised. I don't think he was ever surprised.

I asked him about Marty Walsh. He said he'd phoned right away and had contacted Marty. He said the lieutenant seemed mighty interested. He was on his way. We were all supposed to wait for him. "And if I know those L. A. homicide boys, he's practically here now," the sheriff finished.

He asked a few questions. I told my story, again—still omitting the supposedly missing document. That, I was saving for Marty. Watterson listened patiently. He spoke only two or three times, and then merely to say, "Ain't that a helluva note! Excuse me, ma'am."

COLLIER'S "And here's your pull-out bed . . ." DICK SHAW

The story took quite a while in the telling. Down the hill I could see two flashlights poking around. Then the ravine was lighted up. That would mean that they had turned on the headlights of both cars.

The San Bernardino coroner showed up. The official photographer was with him. They chatted with Sheriff Watterson and stumbled down the hill.

Watterson didn't try any tough-cop stuff. He was plain as an old shoe, and as comfortable. He put himself out to please Pat Kingsley.

Another car came racing. Watterson said, "That'll be your friend from L. A." He was right. It was Marty Walsh, looking slender and dapper and efficient. Behind him bulked the tall, solid figure and granite face of Sergeant Vic Tremont.

Sheriff Watterson and Marty shook hands. They conversed in whispers. Then they approached us. Pat and I got up.

Marty was neither friendly nor hostile. He said, "The sheriff tells me Rex Kingsley is lying down yonder, dead."

I nodded.

"You think it was murder, Steve?"

"Yes. He was shot at least twice. Right around the heart."

Marty Walsh looked up at the moon and the stars. He looked at me. He looked at Pat Kingsley.

"Same old rat race," he commented. "Just a different background." . . .

Sheriff Watterson was a nice guy. He sat around with us until they'd taken what remained of Rex Kingsley far away from Cajón Pass to the morgue in San Bernardino. Then he took us to his home—us being Pat, myself, Lieutenant Marty Walsh, Sergeant Vic Tremont and one of his two deputies.

We sat around and talked. Everybody knew the questions, but no one seemed to have the answers. It was like that. Same old story against a fresh backdrop. Cajón Pass instead of the Casa Linda. Watterson didn't try to take the ease away from Marty just because it happened in his territory. That was good, because otherwise we'd have had to do a lot of explaining about things that never had been in the newspapers.

Marty Walsh left it up to us whether we'd prefer to hole up in some San Berdoo hotel for the night or beat it right back to Los Angeles. He didn't suggest that we were under arrest or likely to be, but that didn't mean he wasn't considering it. Pat said she'd prefer to go home. It was decided that Vic Tremont would drive my car while Marty, Pat and myself rode in the police car.

Marty stopped long enough to buy gas, have his oil and tires checked and lay in a half-dozen packages of cigarettes. While he was doing that, I sat in the front seat of the police sedan with Pat. I held her hand. I said, "You've been pretty wonderful, darling."

She said, "Don't do that, Steve."

"Don't do what?"

"Call me darling. I could go to pieces on much less."

"You poor kid." It sounded silly, even when I said it, but it fitted, just the same. "Someday I'll make it all up to you."

She kissed my cheek. It was a kiss light as a butterfly's wing, but it made me tingle all over. I had just started to do something about it when a voice broke in, Marty Walsh's voice. It came from right close, and it was friendly. It said, "Like that, huh?"

He climbed under the wheel and we started west. We passed beyond the city limits and rolled into the vineyard area. Marty Walsh said, "Well . . . ?"

Pat said, "I'd like to do some talking, Lieutenant . . ."

"Couldn't you change that to 'Marty'? After all, we're old friends." He said it pleasantly, not as though he were needling her. For my money, he was being too cordial, too friendly. He was too obviously unconcerned about the part either or both of us might have played in the death of Rex Kingsley.

Pat said, "I can talk now, Marty. I was going to tell Steve while we were waiting up yonder in the mountains. But I couldn't see any sense going ov twice." She was staring at the broa bon of road ahead of us. "I can cle one part of this case."

"Which part?" Walsh's voice wa motional, but I detected a note of ness in it.

"The beginning," stated Pat q "I can tell it now because my husb dead. Rex killed Jeff Nulty."

For a few seconds, silence hung in the ear. Then Marty asked, sure of that, Mrs. Kingsley?"

"Yes."

"What makes you so sure?"

"He told me."

More silence. I could feel thinking. His profile didn't show w he was surprised.

Marty tried to make it more s He said, "Are you telling me tha husband confessed to you that he Jeff Nulty?"

"Yes."

"When?"

"The day before I went on the to testify for Steve."

"Go ahead, please."

I was sorry for Pat. She wasn't it easy. But she kept going. "Re haven't hit it off for a long time. I stuck with him because there ha been affection, because I had p too much pride . . . and maybe be was stubborn. I hadn't made o well. I had married Rex against vice of my father and friends . . was determined to make the best seemed like an exceedingly bad b

"We didn't quarrel much. you'll understand if I say he nagg Ever since I caused his injury accident—"

"It wasn't your fault," I br harshly.

"I was driving. I was careles only thing in the world that mea thing to Rex was his dancing. W learned that he could never danc I think he hated me. He didn't but he was bitter. And, no matte felt about him, I was terribly so him. Sometimes pity can be a s emotion than love."

Marty said, "Yeah. It sure ca

"From the day I heard abo Nulty being killed, I had a s that Rex had done it. I didn't b was Steve . . ."

"It couldn't have been," said "Wasn't you with him in his ap when it happened?"

I tried to stop Pat, but she igno She said calmly, "No, Marty. I You knew all the time I was lyi

"Uh-huh. Especially after I n You ain't the type you adverti was."

IT WAS a backhanded com But it was well meant. Walsh "Then, of course, it could ha Blake."

"I was sure not. Rex hated think they were both fascinated chita. What was fully as import that Rex loathed being anybo sistant, especially someone like who didn't know the first thin running a night club."

"Seems to me he did a pret job."

"Rex was doing that. He kne Nulty knew it. They never quar cause Rex didn't want to be kic But he'd get sore at Nulty and about it. After a while, his ha pretty deep. Holding it in all th suppose that can cause a sort of a sort of emotional corrosion."

"Yeah . . ." Marty was just along. "Kinda eats on you insid

"Rex was present at Steve's party. He saw Nulty's brutal at heard Steve's threat. That nigh I heard anything about Jeff ha killed, I knew something was wr had a bad case of the jitters.

ose so. I don't know how fright-
as. Or how much courage I
ve had. I cooked up the story
the stand. I went to Mr. Gar-
volunteered to testify. He didn't
s perjuring myself."

"You sure went whole hog."

"I had to. The jury *had* to believe me. The only way I could be sure they would was to show that I was sacrificing something. They'd believe I wouldn't ever do that unless it was true. I'm not defending myself, Marty. I'm not saying how you, or anyone else, would have felt or what you would have done. I'm only explaining how I felt and what I did. I committed perjury—"

"We can skip that for a while. Alongside of murder, it ain't important. Tell me this, Mrs. Kingsley—why did your husband hide the murder gun in the closet in Rusty Mason's office?"

"I don't know."

"Were there any shenanigans between Miss Mason and Jeff Nulty?"

"I don't know. But there could have been. Not only because of what we know now about their previous association, but also because Rex insisted that Nulty was a rake."

Walsh nodded. "Could be, of course. And that Rusty—she's the luscious type." He passed cigarettes around and slowed down to light his and hold the match for Pat. He said, "You sure loused us up good, Mrs. Kingsley. You sure did."

"You believe me now?"

"Why not? Your boy friend here is safe on the Nulty deal. Your husband is dead. Yeah, I believe you. Your story is just screwy enough to be true. And it sounds reasonable to me that you'd prefer to sacrifice your own reputation than to see an innocent man convicted. Provided Blake *was* innocent."

Walsh turned his attention to me. "What do you think of the setup, Steve?"

I said, "I believe Pat. I understand her motives. When a person confesses that he murdered another man, you've got to believe him. Everything she did was based on that belief. It was aggravated by her odd relationship to her husband." I drew a deep breath. "But I still don't think Rex Kingsley killed Jeff Nulty."

(To be concluded next week)

eel mounted parallel to the axis of the rod. The spool doesn't revolve like a bait spool. Instead, the line rolls easily off the forward end, much as you pull thread from a spool. But the line must be light.

Spinning tackle operates successfully in hard-to-fish spots where you need distance and light lures, or there isn't enough backcast room. It works well on trout, salmon, smallmouthed bass and pike—particularly if you like to go after pike with light flasher spoons and pork rind.

THE BIG DRIVE

Who hits the longest tee shots? Some pros say Jim Thomson. Others say Skip Alexander. Golf fans in the Pittsburgh district nominate amateur Frank Souchak, burly varsity end on Pitt's 1937 Rose Bowl champion team.

Souchak supporters like to tell skeptics what Frank did to a 575-yard par-5 hole at Grove City, Pennsylvania, where the fairway curves around a lake. Frank took the all-water route—330 yards from tee to green—and socked his drive eight feet from the cup.

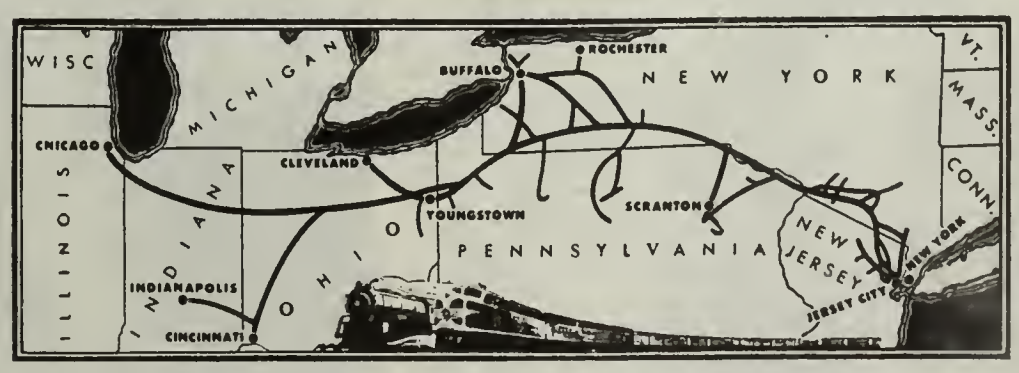
Wind and roll have to be considered in all long-drive arguments. Souchak had a slight tail wind. Alexander drove 290 yards last spring on an uphill fairway with no wind and no roll.

Craig Wood probably blasted the longest ball in major tournament competition—a 430-yard wallop in the 1933 British Open. Craig had a strong wind and a long roll on a brick-hard fairway.

THE END

ERIE ...Mark of PROGRESS in Railroading

Service station with 130 attendants



● It takes a crew of 130 men to completely service big Diesel Locomotives at one of Erie's maintenance points. At fueling station or repair pits, they work as a team to groom the iron horse for its next run.

Ruggedly built for heavy work, yet Erie Diesels are serviced more regularly and thoroughly than the finest automobile. Each time they arrive at their maintenance terminal, they are washed, refueled and lubricated, then given a complete mechanical inspection.

The new facilities and modern methods of maintenance are typical examples of *progress in railroading.*

The Erie's continuing program of research is devoted to such progress—to find even better ways of providing safe, dependable transportation for both passengers and freight.

CHASERS

MOUNTAIN MUTTON

Continued from page 17

It's all over in twenty-five minutes. "Twelve hundred lambs; nine hundred eighty-nine ewes. Right?" says the forester.

"Close," says Crosby. "The old ewe wearing a herder's hat made you miss a couple."

The herd drops down into the canyon again and fords shallow Soldier Creek. There is a steep ride through heavy spruce and a gray cloud bank and then a long climb up a seven switchback slope to a park on the ridgetop at eleven thousand feet. The timber is gnarly and stunted up here and the going is hard across the slide-rock. Down off the ridge there is a steep seventy-five-foot slope and the sheep flow down like a cataract.

Here and there are the old rock monuments, erected by early herders, that used to mark the trail, but now the Forest Service has put up black-and-orange signs: "Center of Driveway," in English and Spanish.

Sheep raising in the Rockies is always a gamble. The trick is to breed the ewes late in December so that the lambs will come just after the last snows and blizzards the following spring. Once the breeding is over, the chips are down; the crop will come 145 days later, regardless of weather.

After lunch we hit the trail again; it winds on over high mesas and bald knobs of slide-rock and so to Upper Ketchum Spring and past timber line at 11,500 feet. Here the camp tender hacks up some dead red spruce and packs it on the mules for firewood. It will be five meals farther on before he hits timber again.

A Narrow Escape from Death

After dinner—which is "lunch" in cities—the sheep climb to the big mesa between Big Blue Creek and Elk Creek, where an altimeter would read 12,000. The jutting snow peak of old Uncompahgre looms through the mists and the trail flows around it. Superstitious sheepherders call it Vandeburg's monument. Just four years ago Crosby Vandeburg was rounding the peak when lightning struck him in the top of the head. It broke an eardrum, fused the coins in his pocket and exploded out the toe of his boot. He lay on the mountain thirty-six hours but lived to go up again.

The night camp is at Ketchum Lake, 12,750 feet. Here the frost is heavy and sheep huddle in the lee of a ninety-foot snowdrift hard enough for the horses to walk over. Camp is on the bare ground beside the drift.

The lambs aren't playing tonight. "Too tired," explains Crosby, "and besides, they don't fool around much after their tails are docked. I don't know why, but it seems to take the spirit out of them. . . . Plenty of stamina, though. Once in a while a lamb will be born on the trail. We give it three days and then it has to walk along with its mother.

"And don't get the idea sheep are dumb. These old ewes are pretty wise. They can remember a trail they've been over just once. You take them around a detour this year, and they'll head around it next year, too. They can pick out their own lambs by a sense of smell from among hundreds—which is more than a human mother can do."

We ask if it is true that, if a lamb dies and its pelt is stripped off and fastened on an orphan lamb, the ewe can be tricked into accepting it as her own.

"Yes," says Crosby, "if you leave on the tail. That's what the ewe goes by. She decides by sense of smell. After a day or two, you can take off the pelt and the ewe will go on mothering the orphan as if it were her own."

The morning brings the herd around Uncompahgre Peak, through the drifts and over a slide-rock trail. The sheep must keep moving on the rock, or they'll all slide down into the canyon. It's 13,000 feet now. The herders and dogs pant and the pack train gets frequent rests. (Sometimes horses collapse and die of heart failure.) The sheep plod along, tired and nervous. The driveway leads along the ridges, down into a small basin, and onto the top of the pass. This is the summit—13,800 feet—with Uncompahgre Peak only a scant five hundred feet above. The wind howls dismally and snow flurries melt on the sheep's backs and settle on the horses. This is "high country" sheep pasture. Cattle cannot live at this altitude.

The herd moves on over a 'dobe hill and over another high pass into the Wetterhorn Creek canyon. Night camp is down a fast two and a half miles, at timber line. Here the stunted spruces appear again, the grass grows and the scrub willows sway in the gale.

A new morning, frost-laden, and the drive heads down through mountain parks to hit an old ore road built in 1857. The trail edges around iron beds, worked long ago with burros and scrapers.

Down, always down, to "Quaky Line," where the aspen start again. The end of the drive is in sight now, at the old ghost camp of Capitol City on North Henson Creek. Capitol once came within a few votes of being selected as the capital of Colorado. Here are open parks with green grass floors and willow patches, working beaver dams and the remains of the old Vulcan mine that flourished for exactly one week at a cost of $90,000—with not a cent taken out.

This is snowslide country and the scars of the runs are like strips of hair torn from the timbered head of the mountain. Bear and red fox prowl the timber. Of the camp, there remain one old cabin, a falling stage barn, the remnants of the schoolhouse, long since taken over by trade rats. A narrow-gauge line once got up here, ten thousand feet in the air, but nothing is left now.

The herd is now on its summer range, on forest land leased under the Taylor Grazing Act. Crosby has a tract twelve miles long and from one to three miles wide leased for ten years. It will c eight cents a month a sheep to past herd. For that, everything from th roots up is his; everything from th down belongs to prospectors and

The sheep will stay up here unti the fifth of September. After tha is too much danger of blizzards; th will freeze down and lose its go Lambs that straggled up in spring ing around thirty pounds will down in early fall weighing arou enty-two—having put on more than lambs kept in valley mead below on softer feed.

Grazing in High Pasture

To tend the herd during the there are one herder and on tender and mover. Trucks bring around eighty miles by an old d road, and camps are changed as is eaten down. In the fall the five old lambs and ewes not war breeding will be shipped away to

"You should have seen the bo the old days," says Crosby, as set for the last time on the driv of their favorites was baked shee —baked in the wool. They mill for drink, and for a treat they thirty feet of the milk gut arour and fried it in deep grease. T Spaniards here learned that f Indians and passed it along to ers."

But tonight it's canned goods other rack of lamb, black coffe tatoes boiled in snow water a preserve with condensed milk. sheep are bedded down in the the frost comes creeping down peaks, black in the moonlight.

Behind are forty-seven mil hardest mountain trailing in As you slide into your bedroll in your ears Crosby and the he the camp tender are speculati price of lambs this fall.

"Might make a few dollars t says Crosby, remembering ye everybody went broke.

However many dollars it'll b certainly will have earned it.

THE END

"Try to meet us later. I'd like you to see what a marvelous build Mr. Twimble has in street-clothes"

OND THE FINISH LINE

TOR: In reading your A-bomb of ort story, What Would You Do? . in which a "foreign" power to take us by secreting A-bombs y cities, I have an idea for the the story which makes me feel nfortable (?). is picking it up from the last : "Gentlemen," the President of said, "that is the situation. We than one hour. What shall we

as a moment of stunned silence gradually rising hum of con- hat took place when little knots members spoke in hushed tones ther. After a few minutes of resident asked again if anyone had the solution and the grim silence that followed told him as well as words that no one had.

At this point, the President started to speak again. "Gentlemen," he said. "I have dreaded this moment for a long time —ever since our Intelligence learned that (Russia) had an atom bomb. At that time we couldn't announce it, but I took it upon myself to order the Atomic Commission to place bombs all over (Russia) just as they have done here. (Russia) has been notified." WHAT DOES THE WORLD *DO NOW?*

I will let someone else pick it up from this point.

FRANK ROSSI, New York, N. Y.

One question: How does reader Frank Rossi propose to plant the atom bombs in Russia? Please communicate with our Chief of Staff.

HIGH SCHOOL AWARDS

DEAR MR. DAVENPORT: It has made me very happy and proud that my student, Sueo Miyagawa at McKinley High School should have been selected to receive one of the Collier's high-school art awards (Teen-Age Talent, May 29th). My confidence in his ability has just been further justified by his winning a year's scholarship to the Honolulu School of Arts, where he will continue his studies next year.

I have found Sueo to be a very intelligent and sensitive boy.

IVALEE HARRINGTON, Honolulu, Hawaii

LWV

DEAR SIRS: We cannot tell you how much we appreciate your editorial about the League of Women Voters (June 5th). We have had several letters of comment on it, many of them wanting more information. It goes to show how many people your magazine reaches and what impression your editorials make on the readers.

MRS. DONALD B. STOUGH,
Press Sec'y., League of Women Voters,
Washington, D. C.

UNHANDY MAN

DEAR SIR: In your June 12th column The Week's Work you mention Jay Hyde Barnum. Well, in 1914 he worked for Meyer Both & Company, fashion artists at Eighteenth & Indiana, Chicago, Ill. He was very good on color but he couldn't draw hands or feet. He was pretty foxy so he always tried to buy the hands and feet. If you notice on page 21 of June 12th he has part of the left hand buried as usual. But his color technique cannot be beat. How do I know this? I used to work at Meyer Both's in 1914.

GEORGE BUEHN, Los Angeles, Cal.

In all my years of study in the realm of art I never found that beauty of design went hand in hand with academic accuracy of drawing. El Greco never thought so, nor do Matisse and Picasso. So why should I worry? JAY HYDE BARNUM

James Kimble, Sr.

Collier's believes...

...SOME COMPANIES ARE TELLING 'EM

IN COLLIER'S for May 1st last, we shot an editorial entitled Collier's Believes . . . That Igleheart Said a Mouthful. It noted a recent speech by General Foods Corporation President Austin S. Igleheart, about the need for management these days to explain to employees the workings of and the reasons for the profit system—the idea being to counteract radicals' and crackpots' attacks on that system and to show workers that their interests are practically the same as those of employers.

At this writing, we have received three particularly interesting and instructive replies to that editorial, and expect quite a few more.

The International Harvester Company informs us that it has got out a booklet entitled Profits Mean Progress for Everyone, for distribution among its employees, and sends us a copy. The pamphlet is written in language that anybody can understand, and impresses us as a masterpiece in the art of social engineering, which was what Mr. Igleheart was talking about.

In Baltimore, the Glenn L. Martin aircraft concern for some months has been getting out a single-sheet company newsletter for its employees. Title: Talking It Over; and the sheet does just that, in plain English and the frankest possible manner. This is only one activity of the Martin company's Personnel and Public Relations office—a department to which any employee can take grievances or suggestions and expect a sympathetic reception.

At the Avco Manufacturing Company's American Central kitchen-equipment plant in Connersville, Indiana, General Manager Eric O. Johnson for a little more than a year has been personally running a "tell 'em what we're trying to do" program of occasional speeches to the employees. Mr. Johnson is described as a man who came up the hard way in the metal processing business, and consequently still speaks the language of the average employee. His creed: "Be honest with them. Tell them the truth. If nothing else has been accomplished, you certainly have a clear conscience."

We'd call all this most encouraging; and we hope this present report on what three leading companies are doing to explain the job to the jobholder may inspire a lot of others to similar activities. We're well aware that many others are already doing it, but the custom, it seems to us, cannot become too widespread in U.S. industry.

We don't know of a more important task facing management in these times, when the American capitalist system is under multiple attack from innumerable quarters, despite its having proved itself the most exuberantly productive and result-getting economic system yet evolved on earth.

●

...FIGURES WOULD BE HELPFUL: Every once in so often, some person or group gives with a loud blast against the comic books and/or the radio melodrama programs which are such favorites nowadays among millions of American children.

You're familiar with this complaint, no doubt—how it's alleged that these entertainments are too strenuous, and that they either tend to make nervous or emotional wrecks out of children or inspire them to go whooping out and commit murder or mayhem.

What we always look eagerly for, and don't find, whenever this complaint comes up, is a nice selection of statistics going to prove that the comic books and radio spine-wrinklers are as bad as all that.

For example, how many children in the year 1947 actually did blow their emotional or nervous tops and have to be sent to rest-cure homes or insane asylums as a direct result of reading comic books or bending the ears too steadily into the radio? And how many children in that same year did no such thing?

Again, how many children in 1947 or any other period really did try to fly out the window or up onto the roof like Superman, or kill some little playmate in ways approved by various comic-b villains? And how many didn't?

We never see figures bearing on these quest Yet without such statistics, it seems to us the mies of the present-day thrillers are merely blo off a lot of unsupported theories.

Until concrete, convincing, fully docume proofs of this kind are forthcoming, we think just go on pretty much ignoring these earnest alarmed persons. Our own guess is that the the spiritual heirs of the heavy thinkers who us moan two generations ago about what the novel would do to the youngsters of that era of the alarmists of a generation back who fo hideous evils flowing from the then popular movie serials like The Perils of Pauline and Iron Claw. None of the nightmares came tr either case.

"It's fun to be a Model Mother!" says Taffy Wood

And she's a natural . . . with a "model" smile that owes so much to her Ipana dental routine!

JUST A YOUNG Riverdale, N. Y. mother? Yes—but a famous fashion model, too!

That's green-eyed Taffy Wood, whose heart-shaped face and sparkling smile have made her a favorite with top-flight fashion photographers.

Taffy is terrific in close-ups (not an easy job—you can't fool a camera at close range!) and she loves to do fashion shows. Like all successful models, she knows how important a "model" smile is to her career.

No wonder, then, that Taffy takes no chances with her precious smile! Even at her busiest (and she has two lively youngsters to take care of!) she never misses her prized Ipana dental routine: *Regular brushing with Ipana, then gentle gum massage.*

Taffy's is the routine of so many successful models. Get started toward a "model" smile yourself—get a tube of Ipana today.

fashion headlines is the new Sally Victor hat that Taffy models . . . with its soft green veiling and white lilac clusally beguiling is Taffy's sunny smile . . . the smile she keeps so bright with Ipana Tooth Paste. How wise of Taffy! For tists recommend and use Ipana than any other tooth paste, a recent nationwide survey shows.

Daughter of a tennis champ, Taffy gets 6-year-old Melinda off to a good start on the courts. Off to a good start, too, when it comes to sound dental care. For Mommy knows that firm, healthy gums are important to sparkling teeth. If *your* gums flash a warning tinge of "pink," *see your dentist.* Let him decide whether yours is a case for "the helpful stimulation of Ipana and gentle massage."

your dentist's advice about gum massage. Corage is so important to the health of your gums and ty of your smile that 9 out of 10 dentists recomegularly or in special cases, according to a recently d national survey! *Help your dentist guard your eauty.*

THE WEEK'S MAIL

WHAT WOULD YOU DO?

DEAR MR. DAVENPORT: I want to congratulate you on the very fine short story in the June 26th issue, What Would You Do? by Russell V. Ritchey.

I think this sort of hypothetical situation, which could conceivably happen, is very helpful in the effort to make the people of our country understand the danger of aggressor nations . . . and practicably take steps to defend the country adequately. . . .

STYLES BRIDGES
U.S. Senate, Washington, D. C

. . . What Would You Do? is one of the most compelling arguments for national defense I have ever seen. I wish everybody could read it.

GEORGE E. ALLEN, Washington, D. C

. . . A loud razz to you for that phony short short. It belonged in the back, under the head, Collier's Believes.

Get back to formularized slices-of-life—boy-meets-girl. When I want a scare I read Weird Tales.

HERB WILLIG, Brooklyn, N. Y

. . . Russell V. Ritchey has scared the very living daylights out of me because of what I love, yet awakens the realization of my negligence by what I think. Still scared.

MRS. FRANCES B. CYRUS, Louisa, Ky

. . . All my roots are here in America. I know no other way of life and want no other. But this story is, I believe, a hideous distortion of reality in a time when folks everywhere want peace. . . .

G. J. SEGAL, Cleveland, Ohio

. . . Always, I have been of the opinion that the government made a great mistake selling surplus war materials. Now that opinion is stronger than ever.

MILDRED P. MARCHAK, Rochester, N. Y

. . . If I believed this story, I would have to believe that Americans are idiots, our generals crazy, and half our people traitors. And when did U.S.S.R. get atom bombs? S. KAYE, New York, N. Y

. . . One thing is sure: Mr. Ritchey did not have in mind the President who said, "The only thing to fear is fear itself."

JANE KELLER, Santa Ana, Ca

HOW SAFE ARE YOUR CHILDREN?

In the past 35 years, the death rate from disease among children 1 to 14 years of age has been reduced more than 80%. Today, *accidents*, in the home and out, are the leading cause of death in childhood. In addition, thousands of children are temporarily or permanently crippled by accidents each year.

Fortunately, many accidents can be prevented. Parents can do most to guard their children's health and happiness by removing possible causes of accidents, and by establishing common-sense rules of safety.

…s cause most fatal home accidents. So it's … parents to turn the handles of pots on a … they can't be reached, to keep matches in … place, and to place a sturdy screen around … ce or unguarded heater.

2. Falls head the list of serious nonfatal accidents. Parents can help prevent falls by providing a storage place for toys, so that they won't be left on the stairs, or on the floor. Windows should be guarded, and stairs and halls well lighted.

3. Check your home for other ways to make it accident-proof. Try to keep poisons, knives, and scissors where young children can't reach them. Guns and ammunition should be locked away. Electric cords should always be in a safe condition.

…ty in the streets is extremely important. … should learn to cross only at crossings, to …affic lights, to look both ways before step… to the street, and to face traffic if they … walk on a road.

5. Bicycle riding can be much safer if children know and obey such rules as keeping to the right and signaling for turns. Parents should be sure the bicycle has good brakes, a warning bell, a front light and rear reflector.

6. Drowning accounts for many accidental deaths. That's why a grownup should be present whenever children are playing in or near the water. During the winter, parents should regularly check ice conditions where children skate.

…rents can also be helpful in protecting their …ren by setting a good example and by show… …hem safe ways to work and play. If, in spite …l your precautions, your child seems to have … than his share of accidents, it may be a … idea to consult your family doctor. Some… …s accidents may be caused by physical or …tal conditions which he can help correct. … learn more about protecting your child, … for Metropolitan's free booklet, "Help Your …d to Safety."

KEEP I WITH THE WORI

Among the world's half-dozen miniature public railroads, the busiest and best equipped is the Romney, Hythe & Dymchurch of England. Fourteen miles in length, its gauge is 15 inches and its nine steam locomotives and 56 coaches are five feet high by 16 feet long, or about one quarter the size of standard rolling stock. Although each coach seats but eight passengers, the road has carried as many as 5,000 in a single day.

Of the some 110 species of mammals known to have become extinct since the beginning of the Christian Era, at least 70 have died out within the past 100 years. Furthermore, 600 other species of mammals are now vanishing and will disappear unless measures are taken to preserve them.

In British history, no swindler ever approached the record of Whitaker Wright who, starting in London in 1889, floated 42 companies, most of which were purported to be engaged in gold mining in Australia. By making members of the nobility large stockholders and directors and by duping them and the public with faked financial statements, Wright built a vast and profitable empire—on paper. When it collapsed in 1903, its total capitalization of $110,775,000 was found to be 91 per cent water; and Wright, upon being convicted of fraud and given a sentence of seven years, swallowed poisoned pills and died in the courtroom.

Sand hogs, the men who dig tunnels or do other work under compressed air, command exceptionally short hours and high wages, yet there are only about 1,500 of them in the United States. Depending on the pressure of the air, their work ranges from two three-hour shifts to two 30-minute shifts a day; and their wages range from $19 to $26 a day.—*By Reese Wade, Independence, Mo.*

The largest spectacular electric sign in existence, erected on a building between 44th and 45th streets on Broadway in New York, features a real waterfall 27 feet high and 130 feet wide. Behind it, 23 giant pumps return the water from the base to the top at the same rate it falls—600,000 gallons an hour.

Few figures in history becam mous in as strange a way as Aug the minstrel who is commemorat statues and festivities in his n Austria and immortalized by the Ach, Du Lieber Augustin. One in Vienna nearly four centuries the gentleman became highly ir cated in a tavern and, upon le through an alley door, stumbled and fell asleep among several b of plague victims. Awakenin dawn and finding himself being b with them in a cemetery trenc fled from the scene and thereafte celebrated for his "resurrection the dead."

A weaver in Paris several ago made an "antique" tapest skillfully that it defied detectic experts and sold for a record The fraud would probably hav mained a secret had it not bee closed some months later b weaver's assistant to avenge hi on his employer. Woven of a s thread, the tapestry had been away by being dragged behind a tomobile, given a musty odor certain smoke, faded with ultra rays and even ingrained with ries-old dust collected from the ers of a church.—*By Harr Kidston, Centreville, Nova Scot*

The International Peace C ence, held at The Hague in 189 the first meeting of the princip tions called to discuss and means of maintaining world Proposed and promoted by Nicholas II of Russia, it was at by delegates of 27 countries. It accomplishment was the creati the Hague Tribunal for the settl of international disputes.

To win the large Negro vot elected him military governor o isiana in 1868, Henry Clay Wa made an incredible campaign ise. If put in office, Henry pl he would invent a machine that pump out black blood and rep with white blood in all colored p

news about NYLON

NYLON IS STRONG! Here's the fisherman's new delight—nylon fly lines; nylon-strong, even when wet, yet smooth, light and resilient. Fact, too: they're fast-drying (no need for line racks), and are not weakened by rot or mildew.

NYLON IS LIGHT! Light, airy, lovely is a nylon tulle capelet. Moonbeam-sheer—but surprisingly strong! It's a nylon-nice accessory with amazing resistance to wrinkling and crushing. Even a summer shower won't steal its fresh look.

Du Pont makes the nylon fibers used in the products shown. The manufacturers of these products use nylon because products made with nylon can have these outstanding properties:

- ✓ STRENGTH
- ✓ LIGHTNESS
- ✓ EASY WASHING
- ✓ LONG WEAR
- ✓ ELASTICITY
- ✓ TOUGHNESS
- ✓ RESILIENCE
- ✓ FAST DRYING
- ✓ RESISTANCE TO MOTHS AND PERSPIRATION
- ✓ CAN BE "SET" TO HOLD SHAPE

THE WEEK'S WORK

Mr. Adam's Pat Frank

THE tip that Collier's send down someone with a powerful nose to learn what's rotten in Philadelphia came in from a citizen with a conscience. Bird dog Dickson Hartwell was dispatched forthwith. He found plenty (Philadelphia: Corrupt and Not Contented, p. 14). "When I went to Pennsylvania twenty years ago," Hartwell says, "Philadelphia was a pretty quiet town. Now some of the cops accept a pay-off casually. I watched a slew of them get folding money after a sporting event. They didn't even have the decency to be furtive about it. This is not the patrolman's fault, however. If he arrests a gambler he may get into trouble."

Hartwell was also impressed by the intensity with which Philadelphia's new political boss, Sheriff Austin Meehan (whom you'll meet in Hartwell's article) works. When Meehan isn't listening to the problems of the citizenry, his phone rings from morning to midnight—Saturday nights it's later—with incessant requests for favors. Says Hartwell: "Meehan will see anybody. He isn't interested in money. He has eight kids and loves them dearly. He's just the kind of guy who can clean up the town—and he'd better. I can smell it from here."

ALTHOUGH he was educated by the Jesuits at Boston College across the Charles River from Harvard, Joe McCarthy confesses that his Mrs. O'Brien Holds That Tiger (p. 28) —all about a boarding-houseful of Harvard Law students—isn't entirely imaginative. Joe's draft board met in the basement of the Phillips Brooks House in Hahvahd Yahd and it was from there McCarthy reported for induction at 6:30 A.M., February 21, '41. "I spent the next year in the field artillery as a hinny chiropodist. I cleaned the feet of mules."

Hartwell, Cleanup Man

But such are the vagaries of Army life, McCarthy was elevated to Yank, the Army weekly, winding up 3½ years later as its managing editor, and a master sergeant to boot. On his discharge, McCarthy was drafted by Hearst as article editor for Cosmopolitan. He recently resigned to write, a craft he'd once tampered with on a Boston paper. "This story is the first piece of fiction I've ever written," announces Sergeant Joe, modestly adding, "as any fool can see."

Incidentally, when the yarn from McCarthy, it fell into th of Knox Burger, one of our fic itors, and an old comrade-in- the ex-mule skinner. "I h exquisite pleasure of asking while boss to make some slig sions," says Burger. "He'd much for me when he edited for Yank."

THE new serial: Pat Frank eign correspondent in E during the terrible inflation when he got to thinking abou Little Man's personal probl affect the foreign policy of a g tion. Last October, after two contemplation on the theme trip back to central Europe ther material, Pat got to wor Affair of State, which begins away on p. 11.

"I found it hard to ge started," Pat says. "I gues scared. After a guy's first no unexpected success, the secon like hitting 00 twice in a rov lette."

That first book, it is he plained, was Mr. Adam, a d Frank discussion of the pr the only virile man left in a wrecked world. It sold arour 000 copies in this country, a its way into eight European l "It was never published in R was banned in Spain," s Frank. "I think this significa

An Affair OF STATE

BY PAT FRANK

n his first novel since Mr. Adam, Pat Frank has written an exciting tale of deep ove and high adventure. It eoneerns Jeff Baker, a young U.S. State Department Foreign Service offieer. The girl he loves nd many of his assoeiates in the Depart-nent seem sure there will be war. As he oards a plane for the United States Em-assy in Budapest, Jeff resolves to put verything he has into the fight for peace

ONE day late in September, 1919, Nicholas Baker ran up the steps of the State, War, and Navy Building at five to nine and when reached his office on the third floor, West Execu-ve Avenue side, he was gratified to find that as ual he was first. Miss Grimsby, the red-haired enographer, came in a bit after nine, and the others Eastern Mediterranean not long after that, and en at ten Horace Locke arrived.

Mr. Locke accepted a cigar and pumped his hand. Nick," he said, "you did it. You produced a boy. m proud of you."

"Thanks, Mr. Locke." Nick was senior to Horace ocke by six years, both in age and in the depart-ent, and had given him his elementary instruction tariffs, visas, admiralty law, code and cipher, and otocol. Within this room they were friends. As en of comparable mentality and similar feelings ey discussed the department's policies and the eat issues of the day—the peace treaties, the ague, the Army's Siberian adventure, the disas-ous strike of steelworkers the month before and e threatened strike of coal miners within a few ys, the disquieting international organization lled the Comintern formed in Russia, Alcock's n-stop flight across the Atlantic, the new Vol-ead Act, and the high cost of living. But Horace cke was a Foreign Service officer, and Nicholas ker was a clerk, and so it was always "Mr. cke," and "Nick."

"What're you going to name him? Nicholas, of urse."

"Well, my wife wants me to call him Nicholas."

"Nick," Mr. Locke asked, his long, handsome ce suddenly sober, "did you hear the news?"

"No. What news?"

"The President had a stroke yesterday. In Wich-a. Apoplexy. It isn't generally known yet. I heard from the Assistant Secretary last night at dinner."

"Do you think it's serious?"

"Apoplexy is always serious."

"I wasn't thinking of that, exactly. I was thinking the League." Nicholas Baker had a theory, hich he discreetly pushed when the moment was ght, that the League of Nations would fail unless was led by the United States, and there would be other war. He had another theory. It was too dical to voice openly. He believed that all the untries in the world should be formed into one

"Susan, this isn't the way I was hoping it would be. Look at me"

government, as all the states were bound together in the United States.

"The League is finished, I'm afraid," said Mr. Locke. "It seems that our people are aroused and united only when they are immediately threatened. You take away their food or their jobs, or put fear of sudden death into them—then they are aroused. But this League seems to them a faraway thing. It's like joining a lodge in another city. They don't see any quick benefit. They don't see how it can help them personally."

"But certainly they must think of their children."

"They don't think of their children. Only one generation in ten considers its children." Mr. Locke sat down in his swivel chair and looked out of the wide window, over the White House, and over the Capitol beyond, so that the warm autumn sun was full on his face. "Poor Wilson," he said. "Poor, idealistic Wilson. What was it Jefferson said? It went something like this: 'The tree of Liberty must be refreshed from time to time by the blood of patriots and tyrants, for this is its natural manure.' "

"It's always the patriots' blood. The tyrants never seem to bleed," Nicholas said.

"Well, that may be because most of us are patriots, really."

"Do you think so, honestly?" Nicholas asked.

"Yes, I do. The world is getting better. It must."

"Perhaps. We're due, and overdue."

Nicholas Baker spent his lunch hour at the hospital with his wife, and washed down a cheese sandwich with a glass of milk at the drugstore on the way back to the department. Mabel had assured him that she was perfectly happy, and so he did not ask for the afternoon off. Just before he left the office at six he drew up a chair to Mr. Locke's desk and announced: "Well, I've decided on a name, Mr. Locke. Do you know what I'm going to name him? I'm going to name him Jefferson Wilson Baker."

"That's a very ambitious name," said Horace Locke.

"For my son," said Nicholas Baker, "I'm a very ambitious man."

As he left the department he was already considering where little Jefferson should go to school, and what he should be taught at home.

WHEN Jeff Baker got out of the Army he knew it was time for him to try to become a Foreign Service officer. The War Manpower Act was a godsend. It saved him a written examination. Two years as a line private, and three as a company grade officer, and then two more on occupation duty didn't fit a man for passing written examinations. He mailed his application after he returned from Vienna, while still on terminal leave, and then tried to forget about it.

He was offered jobs, and he could have stalled them, on the grounds that he had to settle his father's estate, but he turned them all down. Ever since he could remember, he'd wanted only one job.

Early in 1949 the department sent him a letter regretting the delay in passing on his application. There were thousands ahead of him. In addition, he must realize that delays and bottlenecks had developed in conducting the necessary investigations. That was easy to understand. With things as they were, practically everybody was being investigated. So he went to Canada and Mexico because he had never been to Canada and Mexico. His friend, Stud Beecham, said the war had given him a chronic case of itchy foot. But he just felt restless. When his savings ran out he returned to Washington.

There was pitifully little to do about the estate. His father had died while he was in Italy, about the time of the campaign on the Garigliano. (He hardly remembered his mother at all, for she was gone when he was six.) Nicholas Baker left the house in Georgetown, encumbered with a mortgage, and some Victory bonds, and two thousand in cash after all debts were paid, and the deed to five building lots in Florida, at a town called Welaka Springs. The building lots had been purchased in 1927, and Jeff surmised, from his father's correspondence over twelve years, that they would still be under water.

The house on Q Street, its bricks crumbling under the porch and its bedroom wallpaper peeling, seemed dreary and aloof as a summer cottage in January. It held him a stranger, and hostile. When Jeff found he could sell it for twice the mortgage, and he might never get such a price again, and that he could move in with Stud Beecham, he sold it. They had grown up together in Georgetown, he and Stud, and together fought the tough kids from Foggy Bottom, and double-dated to their first dances. Now Stud was a field inspector for Interior and had a three-room apartment in Riggs Court, off Dupont Circle; it was ample for both of them.

The letter from the department reached him there. His application had been approved. He shortly would be asked to report for the oral examination. "Well," said Stud, who was watching him, "you're in! I can tell by your face. You'll have to do something about that. Diplomats have poker faces."

"Not yet," Jeff said. "Not hardly. Four out of five flunk the oral. It's supposed to be like the Spanish Inquisition in a one-hour capsule."

"You won't flunk it. You teethed on the stuff."

"Then there's the physical, and the final security check."

"Physically," Stud estimated, "you'll be the finest specimen in State. They'll keep you in Washington, and use you once a year to model striped trousers at the English garden party."

He was okay, Jeff knew, so far as any Army medic could tell. But there was something about his physical condition—or maybe it was mental—that he never mentioned. It was a souvenir from September, 1944. It was very simple. Sudden, loud noises blacked out his mind and panicked his will and on occasion menaced his dignity as a human being.

"And as to security," Stud went on, "I guess you're secure enough. You don't know any Communists, do you?"

"Sure, I know some Communists," Jeff said, "but they're all Russians." He wasn't certain this was an accurate statement. He had met Russians in Bari and Trieste, and later in Vienna, but he wasn't sure all of them were Communists. "Stud," he said, "do you remember that girl at the Eaton party?"

"What girl? There were six or seven, or maybe ten or twelve."

"The one—you know, Susan something." He knew very well that her name was Susan Pickett, and she lived at the Bay State Apartments, 1701 Massachusetts, and her telephone number was Michigan 8218, and she worked in the office of the Secretary of State, and on the night of the Eaton party she'd come with Frederick Keller, who had some sort of a hush-hush job in the European Division.

All this he'd managed to learn, although he'd been alone with her for only a minute or two.

"Oh, you mean Susie Pickett?" said Stud.

"That's the one." At least once each day since the Eaton party he'd thought of her. She'd said, "I want you to call me," and it had seemed a definite invitation, and not cocktail courtesy.

"Well, what about her?" Stud said. "If you're going to celebrate tonight, why experiment with new stuff?"

"She's pretty nice."

"Nice, hell, she's gorgeous. But how do you know she's not going steady with Fred Keller?"

"I don't think so," said Jeff, but at the same time he suspected this might be true. In a city where most of the women seemed as gray and sexless as sheets of mimeograph paper, it wasn't likely Susan Pickett would be unattached.

AT SIX that evening he called her apartment. She said of course she remembered him, and wondered why he'd asked for her telephone number if he didn't intend using it. He asked whether she'd like to go out that night, and told her of the letter from the department. She said that was very exciting, and she would like to go out, and should she wear a long dress. He said not to bother, and he'd be around at eight.

The apartment was a Washington two-and-a-half—a bedroom, living room with alcove, and compact kitchen. She poked her head out of the bedroom, and said she'd be a minute, and he prowled around outside. It didn't look like a woman's apartment. There were too many bookcases, and they were not lined with women's books. There were too many utilitarian ash trays. The bar in the alcove was solid masculine teak. There was a man's photograph on an end table, a Marine Corps colonel in his forties, or older.

When she came out of the bedroom he wanted to put his hands on her, right then, and she instantly sensed this and seemed a bit amused and said, "Must be the perfume."

"It's something!" he said, surprised that the girl could have such an immediate effect on him.

"It can't be the dress." She pivoted with a model's confident grace, and he saw that the dress was not daring, except for its color. Only a woman of her lustrous dark shading could wear such brilliant emerald.

"It could be the dress, or it could be the perfume, but it isn't. You know exactly what it is, and you ought to be ashamed."

"You're pretty direct, aren't you?" she said. "I'll be direct too. I'm hungry."

He took her to Hall's, down near the water front, and they ate lobster flown from Maine that morning. She cracked the claws expertly, and neglected nothing, not even the succulent globules of flesh hidden under the base of the legs. "You must have eaten here before," he suggested.

"My husband used to bring me."

She would have been married, of course, but it didn't seem the proper time to ask about her husband. "Did you know this was General Grant's favorite restaurant?" he asked.

"No, I didn't know."

"Five cartons!" he said. "I don't know if I can take that many through customs." She dropped everything in his lap. "That's just exactly what a dispatch case is for, Jeff"

PHILADELPHIA: CORRUPT AND NOT CONTENTED

BY DICKSON HARTWELL

After eighty-one years of graft and corruption, the good people of Philadelphia are beginning to ask pertinent questions about their city government. The answers are not calculated to please anybody

Even the Chamber of Commerce acknowle
that the Schuylkill is the "world's dirtiest ri
Above, city barges load trash and garbage
outside the multimillion-dollar Art Mus

THE sickest city in the land is Philadelphia. It is suffering from the longest case on record—eighty-one years—of the dread malady known as machine politics.

Philadelphia has every known symptom of the ailment and some that are brand-new. It has a self-sustaining political machine that would be the envy of old Tammany—and a freshly uncovered financial shortage estimated at $300,000 to $1,000,000. It is run in secret by a one-party city council that holds two sessions—a private one at which some of the councilmen are advised to vote a certain way, and another one in public, when they follow the advice.

In Philadelphia motorists in restricted parking zones pay off many of the cops with a quarter, or even use old parking tickets as camouflage tags on their cars. Summonses are ignored (in one recent month there were 2,989 such cases in traffic court) or handed to a district committeeman to fix. In one court nine of every ten summonses were fixed before they ever got to the court. It is a city of petty crimes, small-time gamblers and five-and-dime shakedowns, where too often a citizen's first protection is not the law, the courts or the police, but his ward leader.

Philadelphia's political machine is simple enough. It is called Republican, but this is only a label. It has no political philosophy except to win elections with whatever promise, slogan or chicanery it believes will succeed. Its guiding principle: Do a man a favor and you've got his friendship: do two favors, and you've got his vote.

To this principle, the cornerstone of power, the machine is dedicated. Most public officials and even many of the janitors hold their jobs because they can do favors or get out the vote. "A magistrate who doesn't play ball with the machine," a Philadelphia judge said recently, "can count on 5,000 votes and that's all. Without 350,000 you can't win." Playing ball means refraining from carefully investigating certain cases; fixing tickets for ward leaders; springing Saturday-night drunks from jail; and tipping the scales of justice just very lightly for certain gamblers, tavern keepers and miscellaneous miscreants who, as registered voters, become first citizens on Election Day.

The average Philadelphia citizen soon grows to believe that the only man who can get things done is the ward leader. Citizens who vote right, contribute right and don't complain are seldom troubled by government inefficiency. Yet most Philadelphians haven't known the satisfaction of clean streets, unbroken pavements, unpolluted air and water, alert, impartial police and a rigidly enforced sanitary code.

Without political influence the ordinary citizen is helpless. In 1946, a maiden lady living on Master Street despaired of persuading her landlord to repair a leaking roof and appealed to the city in writing. Nothing happened. The following year she wrote the mayor begging him to please do something. What the city did was to condemn the property, and the non-political maiden lady was requ

Mayor Bernard Samuel stirred up a fuss when he appointed the Committee of Fifteen

County Sheriff Austin Meehan was not unhappy to see the Fifteen continue investigating

Outside City Hall a twenty-four-sheet poster bearing the mayor's name appeals to Philadelphians to drive carefully. But this worthy project is scant indication of the city's major ills, which afflict both young and old. Recently the Committee of Fifteen, appointed by the mayor, has exposed inefficiency and recommended some drastic curative measures

s having his day. One of the nteresting political experiments history of American munici- s has been the Committee of n, which was appointed by Phil- ia's Mayor Bernard Samuel. e the elections last fall, city em- s, restive for wage increases, eld in line by fulsome promises. the city machine was re-elected mands became insistent. With asury empty and borrowing ca- vanishing, the mayor had to e heat off. He handed the prob- a committee composed mainly iness and civic leaders.

s Committee of Fifteen, headed thur Binns, top Philadelphia , had two jobs: (1) to determine ould get a raise and how much,) to find the money. Given less hree months to make a report, mmittee was expected to sug- face-saving compromise and ut. But the Fifteen had other On March 1st they filed a rev- nary report showing how the uld add $5,000,000 to its in- come in 1948 mainly by aggressive, efficient collection of wage taxes and water rents. They showed how fire and police department streamlining alone might save $2,000,000 in 1949, and recommended a thorough efficiency check on all departments.

By way of padded pay rolls, the Fifteen reported city employment of approximately $150,000 worth of matrons to make beds in firehouses for many firemen who sleep at home. They found 211 janitors on the pay roll at City Hall Annex, one third more than required in comparable commercial buildings. They discovered policemen working as typists, messengers, cleaners and clerks—and some not working at all—and about 100 firemen assigned to the fire marshal's office, a spot generally regarded as among the city's less serious fire hazards. These and other revelations brought a clamor for the committee to continue, though its work was officially ended.

An even stronger impetus was the go-ahead signal from County Sheriff Austin (Aus) Meehan. Gargantuan (300 pounds) and bald, Meehan became top man in Philadelphia politics last election when he defeated Dave Harris for control of the Republican city committee, which runs the town.

Mcehan is simon-pure honest himself, and he finds it hard to believe that people he knows and likes will actually steal. As a contractor, he does little business in Philadelphia but a great deal elsewhere. He gives away his salary as sheriff ($15.000 a year) every payday to the first people who touch him.

When the question of continuing the Fifteen arose, he realized that two vulnerable spots in city government might be the office of the receiver of taxes, which collects the city's money, and the Department of Supplies and Purchases, which lets contracts.

The Fifteen quickly showed that the Department of Supplies and Purchases was operating on a six-hour workday; that the annual report required by the city charter had not been made in nearly seven years, with no accounting for some $40,000,000 spent; that it took an average of 31 days to place an order, and longer—from 60 to 90 days—to pay for it, causing the city to lose up to $30,000 a year in cash discounts. There were no trained buyers, purchases being made by bookkeepers and clerks.

Nowhere in Philadelphia is intimacy with petty theft and light larceny more evident than in the magistrates' courts. Top magistrates' pay is only $5,500 annually. But some stretch-a-penny Philadelphia magistrates manage on such a salary to maintain homes which at first squint resemble the palace of a movie queen.

How this financial necromancy is accomplished is indicated in the story of a certain Philadelphia magistrate.

This magistrate, it appears, sees gamblers through slightly rose-colored glasses. He could not find it in his heart to think ill of horse players and numbers operators—especially when they were so grateful for kind

(Continued on page 64)

The High Cost of Collette

BY IRVING GAYNOR NEIMAN

Dexter Lawson's wife objected to his keeping a beautiful girl in their guest room. Dexter said it was strictly business. With the girl it obviously was not

IT IS never an easy matter for a talent agent to explain to a client why that client isn't working. But on the morning in question, Dexter Lawson, the agent, felt that his explanation was formidable enough. If I had any more excuses, he thought, I would be a candidate for clinical confinement.

"You see," Dexter told the young man in his office, "my situation is not uncomplicated. If I don't sell the Brute Cosmetics people I may lose not only my business but my happy home as well. You have to be understanding."

The dark young man who sat across the desk from Dexter nodded morosely. This was Nick Sandore, known to the radio faithful as The Sender. "Explain it to me again," he said. "I'm a reasonable man, hey."

"I'm counting on your reason, Sender."

"Okay," The Sender said. "Only the part I don't get is whether your wife left you or she didn't."

Dexter sighed and ran his fingers through his prematurely graying hair. "It's a moot point," he said. "She left me, but at the same time, she didn't."

The Sender nodded gravely. "All on account of this dame is living with you. Right?"

"Collette."

"Yeah, Collette Only what I don't get—"

"What I want to know," Dexter said suddenly, "is what I did wrong."

"Wrong, huh?"

"I discovered a million-dollar piece of talent, that's all."

"Collette, huh?"

"At the time, Katherine Strudel. I named her Collette. She's sort of French. From Louisiana."

"Your wife hates her, huh?"

"Only because she is temporarily in our guest room."

The Sender nodded. "The guest room," he said reminiscently. "Six of the happiest months of my life I lived in your guest room."

"I have been proud," Dexter said, "to turn over my guest room for the advancement of young artists."

"For ten per cent," The Sender said moodily. He frowned. "Returning to the earlier question," he said, "did your wife leave you or not?"

"That's the question," Dexter said. "She was about to, but she couldn't."

"I don't get it."

"Figure it. If Mary Alice left, who would remain in the apartment?"

"Remain? You and Collette—Oho!"

"Exactly. Oho."

"So she didn't leave you."

Dexter sighed. "The point is moot," he said. His features, normally somewhat handsome in a bright, eager way, were gray and drawn. "Have you got a studio couch at your place, Sender?"

"Sure. That's where my friends sleep when they visit me."

"Get rid of it," Dexter said. "Your friends hate you. Believe me."

"You're sleepin' on the— Oho!"

"For the past week," Dexter said with a melancholy sigh.

"He's sighin'," The Sender said. "How about me?"

"What's your trouble?"

"I ain't even workin', hey."

Dexter looked pained. "Please," he said.

The Sender said, "What's so special about this Collette? She got a bilt on her, hey?"

"With minor exceptions, yes."

"In radio, bilts are a dime a dozen," The Sender said moodily.

"It's her speaking voice," Dexter said. "Sensational."

"What's so sensational?"

"Sex," Dexter said simply.

"Her voice?"

"Loaded. It's like a baritone sax at 2:00 A.M. It vibrates. Like a muted violin. Makes you shiver. Like a—"

"So?"

"Figure it. What do the Brute Cosmetics people make?"

"Cosmetics?"

"For men!" Brute Cosmetics for Men! Get this." Dexter pitched his voice low in approximate imitation of husky feminine tones. " 'I can't resist your advances, beeg boy, now that you're using Brute cologne.' "

"That's Collette, huh?"

"Approximately."

"She's sold?"

"Practically. I—"

The phone rang. The Sender sat in gloomy silence as Dexter answered.

"Charley Kendall, Dex," a voice said. He was account executive with the Baylor Advertising Agency. "Great news for you."

Dexter held his breath. "Collette? You'll buy Collette?"

Charley said, "I'd buy her sight unseen. Got to sell the sponsor, Radcliff. That's the big news. I've set up a little party for tonight. Radcliff and wife. My boss and wife. To meet Collette."

"That's wonderful, Charley, but—"

"You're the host. Your apartment. I'll bring Collette. Eight thirty."

"Tonight?" Dexter felt perspiration in his palms. "Did you say tonight, Charley? My apartment?"

"Radcliff leaves town tomorrow. Clinch the sale tonight. One thing, Dex. He's very moral. Keep it extra clean. You know, sacred family relationship."

"Moral? My apartment?" Dexter said. "Charley, I—" Kendall had rung off. Dexter hung up slowly and stared straight ahead of him.

"Tonight," he said dully. "We're not ready. We're not ready at all."

Resilience is a universal attribute of talent agents. Although he was unable to shake a sense of onrushing doom, Dexter swung frantically into action.

AFTER a brief conference with The Sender, he was engaged in a number of phone calls that took him almost to the lunch hour. He finally leaned back wearily in his chair and switched on a record player at the side of his desk. He felt a strong need for reassurance.

The loud-speaker hummed a moment and then a woman's voice said, "Hold me close, beeg boy. Clos-air! I love to smell your Brute cologne." The voice was low and vibrant, with soft passionate overtones. Dexter felt his scalp tingle.

If there is a grain of truth in Freud, Dexter thought, we will yet win out.

The campaign to sell Collette to the Brute Cosmetics people, Dexter felt, was his most inspired. Each day for two weeks Collette had made recordings like the one on the turntable, which had promptly been rushed off to Charley Kendall. Like water ping on his head, Dexter thought friendly.

Although he had never seen h person, Kendall had heard Co each day on records. The text o records was innocent and simpl was the way she said it.

Charley, Dexter thought, is d ing. All that remained was to se sponsor and the head of the a tising agency. Dexter thought o approaching party and shuddered

He put another recording o turntable. Collette's voice said, could not have reached first base me before you used Brute, beeg But now—" The voice broke of vibrant sigh. Dexter felt chills r his spine.

The brown eyes suddenly hardened. "That's what you said after The Sender left."

"But you liked The Sender."

"I didn't know at the time that he was inaugurating a house policy."

"You mean Glockins?"

"Glockins, for one. The soap-opera writer who was always threatening to commit suicide."

"He never did, though," Dexter said hopefully.

"And then that sex-mad announcer, Greg Martinson, who spent the greater part of his four months with us chasing me around the dining-room table."

"But, darling—"

"I know. He never caught me. It's the principle of the thing."

"They were all clients," Dexter said.

"Collette is the straw that breaks my aching back. That woman has made more passes than a crooked dice player."

"She doesn't make passes," Dexter said. "She just sounds that way. But I will sell her tonight, and then she is gone."

Mary Alice shook her head and stood up. "Frankly, Dex," she said, "I don't believe you could sell that no-talent package on bargain day on the Street of Regret. But I will do my best to help."

"That's very kind of you, darling."

"It's just to get Collette out of the apartment. When she goes, I will be close on her heels."

Dexter stood up and said, "Mary Alice, you've got to reconsider. Believe me, I am blameless in my soul."

Her eyes grew soft again. "You have the most awful bags under your eyes, Dex," she said.

"I need you."

SHE avoided his embrace and opened the door. "I suppose you'll be busy this afternoon."

Dexter felt his face grow pink. "Why, yes. That is, of course."

Her lips tightened. "Collette?"

"Why, no—that is, no."

She smiled and said, "I'll see you tonight, darling." Then she was gone.

Dexter stood looking out of the window of his office for some minutes. He felt a strange mixture of elation and foreboding, something like the sensation that comes to an amateur skier at the head of a ski jump. He shook himself, and shoved off to pick up Collette. . . .

The Park Towers, where Dexter lived, was a rather elaborate apartment hotel in the East Fifties. It was just past three o'clock when Dexter walked through the lobby to the bank of elevators in the far wall. He buzzed.

"Going up, Mr. Lawson?"

Dexter turned quickly to find a vast expanse of blue serge in front of his eyes. Looking up, he saw the large head that rose out of the serge.

"Did you speak to me?" Dexter said.

"Yeah. You said you were going up. Your wife isn't home."

Dexter stepped back to get a better look at the man. He was huge. His heavy features were topped by thin blond hair. There was a pensive look in his pale blue eyes.

"My wife? Oh, she isn't home. That's good."

JUDGE GOLDSBOROUGH TAKES THE STAND

BY BILL DAVIDSON

As a congressman, he fought on labor's side. As a judge, he fights only for justice. John L. Lewis, the mine operators, and government departments have all found him formidable but fair

IN 1939, when President Roosevelt appointed T. Alan Goldsborough as federal district judge for the District of Columbia, he said, "You've worked hard for 18 years in Congress, Alan. Now you can relax, get out of the public eye and enjoy yourself listening to interesting murders."

That remark has turned out to be a classic misstatement. For, as an Assistant Attorney General recently put it, "Every time you pick up the paper, you read about Goldsborough making another decision that affects the welfare of every man, woman and child in the United States. He is hotter news than Congress and the Supreme Court."

This is only a slight exaggeration. During a typical ten-week period last spring, for instance, Judge Goldsborough (a) found John L. Lewis and the United Mine Workers guilty of contempt of court for the second time, and affirmed an important provision of the Taft-Hartley Act; (b) slapped an injunction on Attorney General Tom Clark, preventing the Justice Department from deporting (without an impartial hearing) Gerhart Eisler and four other alleged Communist aliens; (c) signed an injunction stopping a threatened railroad strike that would have paralyzed the nation; (d) had another session with Mr. Lewis, compelling the United Mine Workers to bargain collectively with the Southern Coal Producers Association, and affirming for the first time another provision of the Taft-Hartley Act; and (e) made a pioneering freedom-of-speech decision, holding that Congressman John Rankin was protected by Congressional immunity when he called a man crazy in the cloakroom of the House of Representatives, but that when he made the same statement to newspapermen over the phone he was open to lawsuit for slander.

In addition to all this, the judge signed some 2,500 orders, heard arguments on 217 motions, and naturalized 32 new citizens. He also got off some classic oratory, saying of John L. Lewis, "It is your boundless audacity, O Catiline!" This made headlines in the newspapers. So did a new title bestowed on Goldsborough by former OWI chief Elmer Davis—"John L. Lewis' Truant Officer."

Until November, 1946, Goldsborough was just another one of the nation's 160-odd federal district judges.

Then John L. Lewis came into his life.

Coal Miners in Contempt of Court

On November 18, 1946, Justice Department attorneys asked for an order to stop Lewis' union from striking against the government-operated mines. This would be the first major labor injunction since the passage of the Norris-La Guardia Act in Congress in 1932. It would shock the country. But it was winter, and great national suffering would result if no coal were mined. And this was a strike against the government. So Judge Goldsborough signed the order. Lewis glowered and threatened, and the miners walked out of the pits. Whereupon Goldsborough, just as calmly as if he were issuing a divorce decree, declared the miners and their leader to be in contempt of court.

The trial was one of the most spectacular shows ever staged in Washington. Newsreel cameramen still remember it with glee. Lewis roared. Goldsborough sat and listened apparently without emotion. Then the roof fell in on the UMW chief. The judge thundered that Lewis was practicing anarchy by refusing to obey the courts, and declared that "This is not the act of a low lawbreaker, but it is an evil, demoniac, monstrous thing that means a threat to democratic government itself." He went on to impose a monumental fine of $3,500,000 on the United Mine Workers ($500,000 for each day the union had disregarded his order), and $10,000 on Lewis himself.

In April, 1948, Lewis came face to face again with Judge Goldsborough.

This time the miners' chief had sent a telegram to all UMW locals informing them "the mineowners have dishonored the pension agreement." As if by magic 350,000 miners remained home from work. When the government got a court injunction under the national emergency provision of the Taft-Hartley law, Lewis shrugged his shoulders and indicated he didn't know anything about any strike, that the men had walked out spontaneously. Lewis and the UMW were haled into court on the same charge—contempt of court.

The fireworks were still more spectacular this time. When Welly Hopkins, the UMW lawyer, argued that Lewis had purged himself of contempt by settling the pension dispute a few days after he had ignored the injunction, Judge Goldsborough brought the house down with his statement that "such a construction of contempt has never before been offered since Hammurabi."

When Hopkins repeated the argument that the miners had not been ordered to strike, Goldsborough said that it was ridiculous to assume that Lewis' "dishonored" telegram to the miners was anything but a signal. He banged his hand on the table and made the now famous statement:

"If a nod, or a wink, or a code was used in place of the word 'strike' it was just as much of a strike as though the word 'strike' had been used. The miners walked out when told the agreement was dishonored; they came back when told the agreement was honored. Now, what else can that be except a code?"

Lewis made no attempt to answer this question, or any others. As one eyewitness described it, "He sat like an image during the procedure. Occasionally he moved his massive head, a deep frown on his pallid face. Now and then he stroked his chin or moistened his lips. Mostly he stared straight ahead."

Again Goldsborough threatened jail sentences. But he relented. He fined Lewis $20,000, and the union $1,400,000. Some miners hinted they would go out again in protest. So the judge pulled what Washington lawyers consider one of the most astute judicial tricks ever employed by a federal jurist. Although he had found Lewis guilty of both civil and criminal contempt, he fined him only on the criminal charge. He left the civil sentence hanging in abeyance. The union took one look at this dangling sword, and the strike threats collapsed.

Then Goldsborough pulled another surprise. On June 22, 1948, a sulking Lewis came into court expecting another injunction against him in the matter of his plan to pay $100 monthly pensions to members of the United Mine Workers who wish to retire at sixty-two or older. The mineowners, conversely, were supremely confident. The Goldsborough lightning struck—and this time it didn't hit Lewis. The judge okayed the pension plan, saying, "It is meager enough, and it offers the miners a little something for their old age. It gives them enough to hold their heads up."

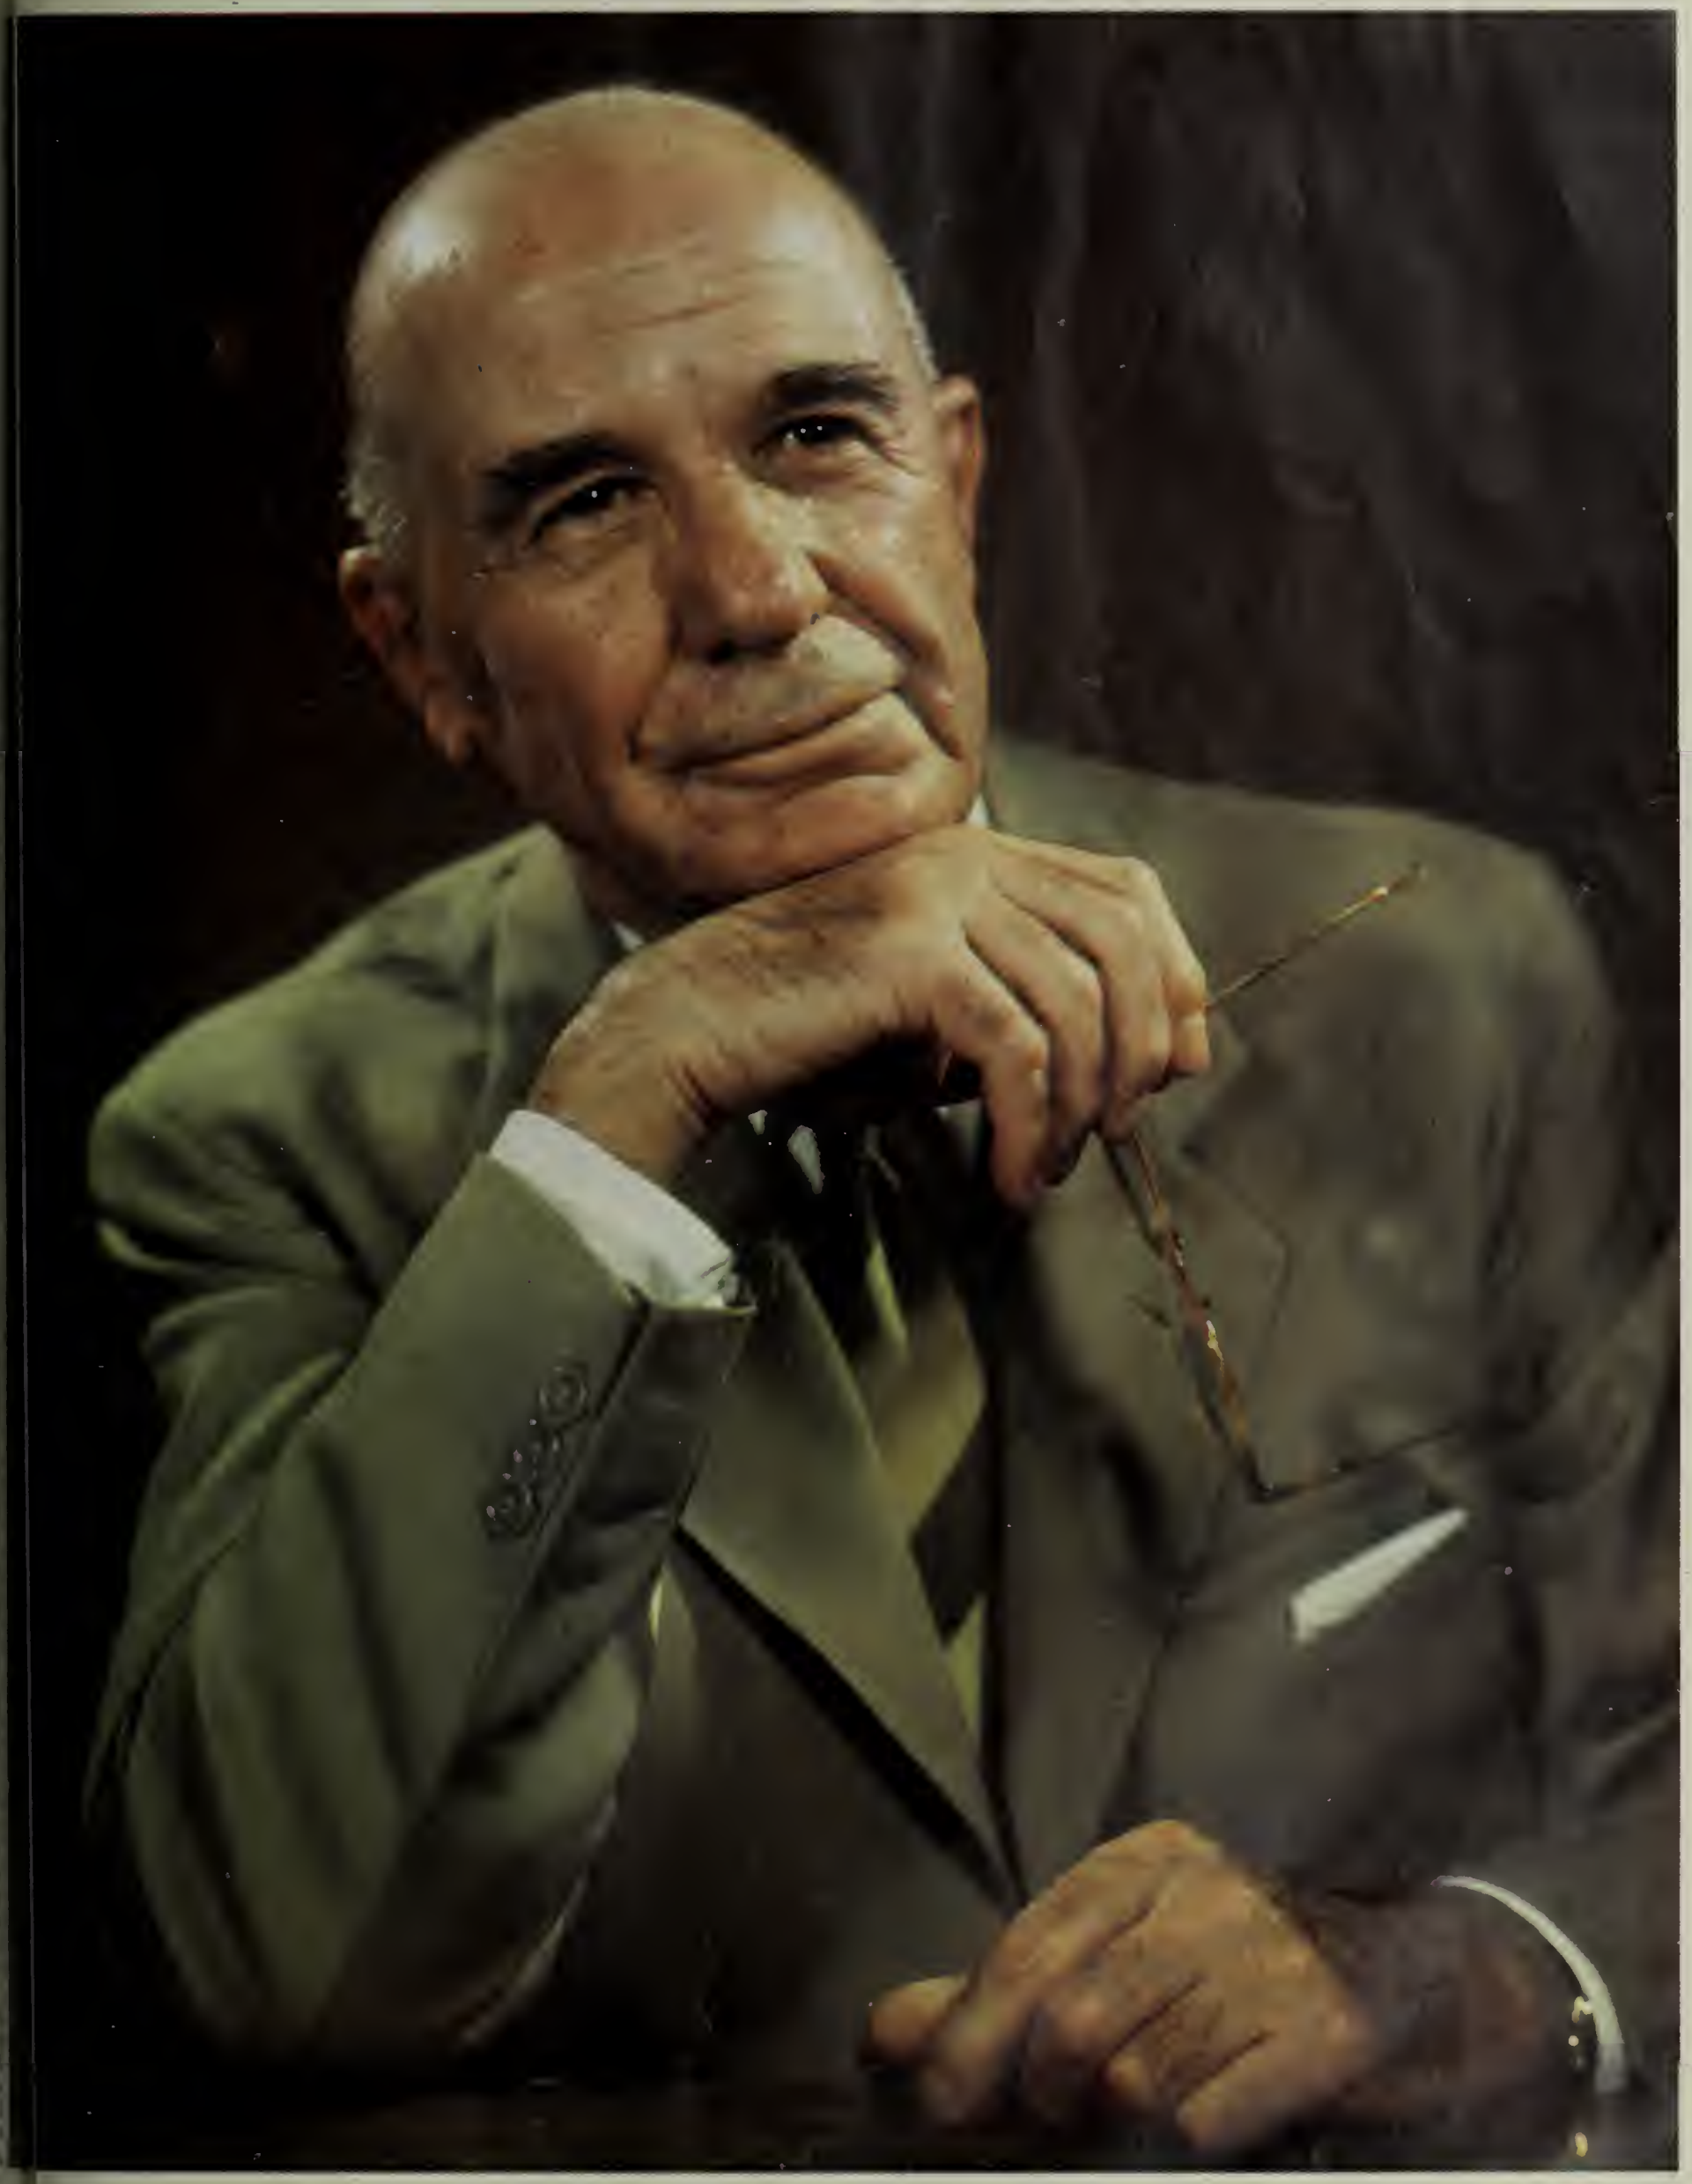
Goldsborough was immediately besieged by porters who couldn't understand the switch his unyielding anti-Lewis position. In answ their questions, Goldsborough gave a classic d tion of his responsibilities. "I may be naive said, "but I believe a judge is not supposed anti-anything. He is supposed to try each ca the facts of that case alone."

Perhaps this is the key to the fact that G borough is completely unpredictable. In th mous Langan vs. Langan case, which involve custody of Joan Langan, the twelve-ye daughter of a divorced couple, he confou bookbound lawyers by by-passing Californi Maryland decrees, and minimizing the charg the father had practically kidnaped the child.

He decided the case simply on the follo facts: that Joan wanted to live with her f that the father was a loving, fine upstanding zen; and that the mother, a singer, had by he testimony indicated that she was not as capa parent. The legal world was still more confou when the court of appeals affirmed Judge G borough, saying, "The decision of the trial could not have been otherwise."

A Decision Worthy of King Solomon

In another custody case, the municipali Washington was attempting to take away a from a woman who had wanted a baby so that she had got one without going through adoption procedures. All the law seemed to the municipality's side, but at the end of the ing Judge Goldsborough leaned over and aske city's attorney, "But she's the only mothe child has, isn't she?" He then decided in fav the woman, concluding, "And, madam, if ar bothers you or your little girl, you come down and tell me about it."



All of which indicates that while there m some doubt that Judge Goldsborough is a detached legal mind in the tradition of Oliver dell Holmes, there is no question that he among the most colorful and human jurists e sit on the American bench.

Alan Goldsborough was born in Greens Maryland, on September 16, 1877, just a few from the town of Goldsboro, named after his ily (which had settled the Eastern Shore in His father was in the consular service. When Alan was two, he was whisked away to A China. In 1881 his father became ill, and Ala brought back to Greensboro to be raised b grandfather, a fabulous country physician k to every farmer and fisherman on the Eastern S It was under old Doctor Goldsborough's win the boy began observing people and the vagar human progress.

A SUCKER DON'T WANNA BE TOLD

BY ROBERT SYLVESTER

"It doesn't matter what you v about our racket," the race-t tout said. "You can't educate sucker. A sucker wants to beli A sucker don't wanna be

THE caller was a little fellow in tweeds and riding boots and he carried a small satchel. He said he had an appointment with the boss on a confidential matter. He was ushered in, whispered that he needed utmost secrecy, and the boss' secretary was told to leave the office.

The little fellow looked around suspiciously. He opened the satchel and took out a regulation racing saddle. Once more he looked cautiously over his shoulder and then turned the saddle upside down, exhibiting a battery and wired shock points.

"Bobby Permane is riding a long shot tomorrow," the little fellow told the businessman. "This is his saddle. He just pushes this button—see?—and the nag gets a bolt of electricity that makes him run like Stymie. It's a sure killing."

On that story a New York importer recently bet $500 for himself and $100 for the tout with the electrified saddle. Silly? Sure. Couldn't happen to you? Maybe not. But this ridiculous routine is a successful stand-by with the thousands of professional race-track touts who operate all over the country. The lazier touts, the ones who are too tired or too cocksure to carry a valise, vary the maneuver by exhibiting an electrified racing whip. Both variants are known, in the touting trade, as "lugging the juice."

It's one of a dozen standard methods, all of which are classified, in the tout trade, as The Story. Some of the stories are pretty funny indeed—when they happen to somebody else. There is the Saddle Cloth Story, for instance. This is a standard and hoary with age. It works only once, but there are still thousands of horse players who haven't heard it.

"You can't lose," confides the tout using the Saddle Cloth Story. "You can't lose because this horse will be Number Six. It doesn't make any difference which horse really wins. Each jockey will have an extra saddle cloth with a Number Six under his official saddle cloth. No matter which horse wins, the jockey is going to reach down and fold back his real number. He'll go by the finish line as Number Six. You can't lose. All the jockeys are in on it."

Childish? Of course. But a Massachusetts florist bet $1,600 on the mildewed Saddle Cloth Story not long ago.

To give the more imaginative touts their due, they've usually got a better story than the Saddle Cloth. O the better stories, according t touts themselves, is the quite mc pseudoscientific one misnamed Radar Wire.

"See that man out in the inf the tout asks, pointing to some cent who is so far away he's tically a blur. "See that bundl carrying? That's radar. It co the running of the race by tuni on wires attached to the jo metal stirrups. It can slow speed up any horse in the race. jockeys are in on this killing."

The Radar Wire assumes ignc of staggering proportions on th of the sucker but it is very popu this scientific age.

The juice, the saddle cloth a radar wire are, of course, ver mentary dodges and work bes

linesmen, the scourge of every habitual horse player who can't spend every minute of his life at the race track.

Of the three classes, the double hustlers are probably the most colorful. They have, at least, a spurious horsy flavor. There are variants to the double hustle but basically it works somewhat as follows:

You are standing near a betting window, your program clutched in your hand, your mind still full of doubts, and the clock inexorably bringing starting time for the next race closer and closer. You start to edge nearer the $2 window.

The Victim Is Approached

A soft voice at your elbow asks for a match. Or for a look at your program. Almost any harmless question. And then:

"Gee, mister, you didn't see what Big Ben Bannon bet on, did you?"

"And who," you ask, startled, "is Big Ben Bannon?" Your new friend looks incredulous.

"You don't know who Big Ben is? The biggest plunger on the track! The man who won $47,000 here day before yesterday!"

Your new friend kindly points out Big Ben. Big Ben is standing right over there, a step or two away. He's scowling in approved millionaire fashion and he holds in one hand a stack of mutuel tickets thicker than the city directory. You decide that Big Ben looks very confident for a man who is wagering all that money.

"I tried to see which horse he bet," the new friend sighs, "but he had his thumb over the number. "Let's ask him what he's betting."

Both of you stroll over to Big Ben and your new friend speaks right up, asking Ben to do you both a favor and let you in on his choice. Right here is where the melodrama starts.

Big Ben whirls on your friend and bawls him out unmercifully. Big Ben says that when he gives out information on the races to ingrates like your new friend they just peddle it around the track and the odds get knocked way down.

"Get out of here!" Ben almost screams. "Beat it now or I'll call the police. Hey, officer!"

Your new friend scuttles off and you are about to do the same thing when Ben turns his wrath on you.

"Are you with him?" he demands, scowling in terrible fashion.

"N-n-n-no," you tell him.

"Who are you with, then?"

"Nobody. I'm alone. Listen," you say, emboldened by your innocence. "Listen here, you big . . ."

Big Ben seems suddenly mollified.

"Who are you, anyway?" he asks. If you're a big enough sucker you'll tell him and maybe even show him an identification with an address.

Ben seems somewhat ashamed of himself. "I guess I made a mistake," he says, smiling slightly. "I'm sorry."

The incident is over. Just a misunderstanding. You start to walk off, but Ben has a hand on your arm.

"I guess I owe you an apology," he says heartily. "You see, these petty gamblers are always trying to chisel in on what our syndicate is betting." Ben still has his hand on your arm and he seems to be arguing with himself.

"Do you really want the winner of this race?" he asks. You assure him that you do. Ben tells you to follow him. He walks you up to the $10 window.

(Continued on page 66)

rs who haven't been around But the habitual horse player is s fair game for the tout. With abitual horse player, the tout has to use a slightly more subproach. An approach like The Ink, for instance.

successful Broadway theatrical cer who is a veteran horse-race recently left his office at his time and stopped, again as in a theatrical bar for his daily us hour cocktail. Two men were bar, engrossed in their own soft rsation. They talked idly of this at. Their conversation could be overheard.

ot a letter from Eddie Arcaro " one of them said, a bit more . He took a letter from his t.

at Eddie," the other one said, g the letter. "Why does he alvrite with green ink?"

lon't know," the first stranger negligently. "He's been writth green ink all the years I've him."

strangers chatted idly for a nt more and left.

e thing made no impression on ne producer relates, "although I e it must have stuck in my scious. Anyway, when I got r addressed in green ink alwo weeks later I remember I at it for a long minute, trying ember who it was I knew who wrote in green ink. I couldn't ber. I opened the letter and it om 'Eddie Arcaro.' Then my y clicked."

At this point the producer heaves a deep sigh. "That green ink story cost me $12,000 before I was through with the bogus Arcaro," he admits.

Neither racing commissions, track detectives, police specialists, jockey clubs nor horse bookmakers can make any estimate of how many professional race-track touts are operating in America today. Every racing authority merely sighs and admits that there are thousands and thousands of them. Touting today is big business. It's a racket of staggering proportions.

Example: The last time government postal authorities became annoyed with a gang of touts using the mails to defraud they temporarily smashed one tout bureau whose files yielded a "sucker list" of 2,500,000 names. The records indicated that this gang had done a gross business of $80,000,000 in ten years. Remember, this was merely *one* tipster bureau.

Billions Wagered on Tips

Last year more than $1,680,000,000 was legally bet through the parimutuel machines of American race tracks. Of this sum a goodly portion was influenced by race-track touts. How much money is illegally bet with private bookmakers away from the race track cannot be accurately estimated by anyone. The biggest combination of New York bookmakers, which has business connections with most of the big bookie rings on the East Coast, thinks that $10,000,000,000 would be a very conservative estimate. It is safe to say that the *major* portion of this amount is influenced by touts, tipsters and information peddlers of one kind or another including the amateur.

To the race-track tout every horse player is a sucker, or an "egg." An egg is fair game anywhere. Yet it is the bane of race-track authorities and local police authorities that the egg, ashamed of his gullibility, scarcely ever makes a complaint or demands that the law track down the rascals who have fleeced him.

"And it doesn't matter what you write about our racket," one race-track tout told me, "you can't educate the sucker. A sucker wants to believe. A sucker don't wanna be told."

Scarcely a tout in the country has any particular fear of the law or of reprisals from his victims.

About the only time a tout gets into real trouble is when, through some swindle that utilizes the mails to defraud, the government authorities get nasty. Or when the tout is not satisfied just to ply his trade but steps over the line into larceny and misappropriated funds.

Race-track authorities and the touts themselves agree that touting is divided into three general classifications, each of which has its own business formula and tricks of the trade. These classifications are: (1) the double hustlers, who work in pairs near the betting windows or in the stands at the race tracks, (2) the tipping offices, which have developed telegraph and mail touting to the proportions of a great national industry, (3) the

COLLIER'S

SHORT SHORT

Good MORNING

BY MARK HAGER

WHEN I was a boy, I walked through two miles of woods to get to our schoolhouse, and I would take my father's twenty-two rifle with me and hide it in a hollow tree before I got to the schoolhouse, and get it as I came home in the evening.

One evening, coming from school, I ran into a community uprising at Mr. Epperly's house. Mr. Epperly's cow had gone mad and was bawling lonesome bawls and twisting the young apple trees out of the ground with her horns, and the whole community was demanding that Mr. Epperly's dog, Old Ranger, be shot as Old Ranger had fought and killed the mad dog that bit the cow.

Mr. Epperly wanted to know if it wouldn't be safe to put Old Ranger in the stable or someplace and keep him penned up until the danger period was over, but the neighbors said no; that Mr. Epperly's children might slip and feed him through the cracks and get bit.

Mr. Epperly said he could not do it himself, and wanted to know who would volunteer to do it, but none of the men would.

Mr. Epperly came to me, and said, "Joe, why can't you take him with you through the woods on your way home and do it?"

I told Mr. Epperly I did not want to shoot Old Ranger. I saw Mr. Epperly's three kids were already keeping close to the old dog.

Mr. Epperly then pulled a one-dollar bill from his pocket.

"I will give you this dollar bill if you'll do it," he said.

I considered. I had never yet had a one-dollar bill all my own, and while the idea of shooting Old Ranger did not appeal to me, it did seem like a thing that was demanded by the whole community, and they all put at me to do it, trying to make me feel like a kind of hero, and pointed to the danger to Mr. Epperly's children. Then Mr. Epperly put a piece of clothesline around Old Ranger's neck and I started with him. The Epperly kids began to cry.

As I walked through the woods by the little path, I started looking for a place suitable to shoot a dog and leave him lay. I saw a heavy clump of wild grapevines, and I led him down under there and then got back up in the path. Old Ranger looked at me and whined and wagged his tail. He wanted to come to me. I recollected always seeing him wherever there was a splash of sunshine in Mr. Epperly's yard when I would pass there and Mr. Epperly's kids would join me for school.

I went down and untied Old Ranger and walked on. I came to a place where there was a hickory grove in a little flat where the underbrush was thin. I recollected how Old Ranger liked to go to the hickory groves and tree squirrels. I led Old Ranger down and tied him close to the trunk of a big hickory tree.

I started to take aim, but Old Ranger started prancing and looking up the tree. I remembered then hearing Mr. Epperly tell how Old Ranger would do that when he'd tree a squirrel and Mr. Epperly would raise the gun to shoot, and I could not fool Old Ranger like that.

Besides, there was too much light and Old Ranger could see me take aim. I decided to wait for the gloom. Soon as the sun dropped a few more feet behind the Wilson Ridge, there would be gloom, and maybe Old Ranger would not see so plainly how I pointed the gun.

While I waited for the gloom, the burning started in my pocket. I took the one-dollar bill out. I had a feeling there was something nasty about it.

While I thought of that, Old Ranger reared and barked and surged at the cord leash, and when I looked back out the path I saw Mr. Epperly's three kids, but they were running away. They had turned to run when Old Ranger barked. I guessed they had slipped off from their house and followed just to see where I left Old Ranger.

The thought struck me that they would run back to their house and tell I had not shot Old Ranger yet, and that would set the folks to worrying again, and I took aim. I thought I had better fire in their hearing. I took aim at Old Ranger, but I could not touch the trigger the way he looked at me and tried to speak, so I fired in the air so the Epperly kids could say they heard the shot.

I stuck the dollar back in my pocket, went down and hugged Old Ranger around the neck. I knew I would never shoot Old Ranger. I took him and walked on. I got to the edge of our field. I climbed on the gate and sat a long time and considered. I tried to think up how I could explain to my mother why I had brought Old Ranger home with me so that she would not be scared. I could not decide how I could ever explain with a good face that I had a one-dollar bill in my pocket I had been given to shoot Old Ranger.

I remembered where I had seen an empty castor-oil bottle at the edge of the path. It was still there, and I got it, and stuck the one-dollar bill in it, and buried the bottle in some soft dirt under the corner of the fence.

My mother decided that since I had fired the shot, she could let me keep Old Ranger for a month, with the community thinking he was dead, but it was the hardest month I ever spent.

The Epperly kids would not walk with me to school. They would pucker up to cry when they saw me, and the other kids down at the schoolhouse, they would say with a sneer, "What did you buy with your dollar bill?"

I could not answer. I could not tell them about the castor-oil bottle under the fence corner or Old Ranger in our stable; the Epperly kids searched the woods on both sides of the path to our house, hunting for the body of Old Ranger, but they would not ask me where I had left him, and other neighbors spoke of how Old Ranger's great booming voice was missed.

Mrs. Epperly was kind to me. I met her in the road one day, and she told me how she had scolded the kids for treating me like that, "But," she added, "if it was to do over, I would not allow it done. The children . . . Mr. Epperly, too, they're half crazy."

THEN came the happy morning. "You can take Old Ranger home now, Joe," my mother said. "Been over a month. No danger now."

I went to the stable, got Old Ranger, and he reared and licked my face. I shouldered my book strap, and led Old Ranger down the path. I stopped at the fence corner and got the castor-oil bottle with the one-dollar bill in it. I had a time trying to hold Old Ranger's mouth shut so I could get in sight of the Epperly house before he barked.

At the right place where they could see us when they came running to the front porch, I let Old Ranger have his voice. Old Ranger let go with a great howl that rolled and rocked across the ridges, and the Epperlys came bounding. Mr. and Mrs. Epperly and the three kids. They alternated between my neck and Old Ranger's, and I don't know to this day which of us got the most hugging.

I handed Mr. Epperly the castor-oil bottle.

"Why did you do that?" he said.

"It felt nasty in my pocket," I said.

He tried to make me keep it and when I wouldn't, he just pitched it toward me and his three kids, and we started for the schoolhouse, feeling rich, with a whole dollar to spend. ★★★

I tried to think up how I could tell my mother so she would not be scared

INTERNATIONAL

At Casablanca, Roosevelt and Churchill maneuvered Giraud (left) and De Gaulle, opposing French leaders, into this unexpected photograph

THE SECRET PAPERS OF HARRY L. HOPKINS

BY ROBERT E. SHERWOOD

After the invasion of North Africa, Eisenhower finds himself on a spot because of the deal he made with Admiral Darlan. But Roosevelt backs him up. At Casablanca, F.D.R. stops a quarrel between the opposing French leaders

PART XI—CLIMAX AT CASABLANCA

TER the North African landings, liberal opinion in the United States and Britain was shocked and angered by the announcement that Generals Eisenhower and Mark had made a "deal" with Admiral Darereby this notorious officer of the Vichy ent, who had been a leading factor in surrender and in the collaboration with is, now was recognized by the Allies as eme French authority. There have been of charges brought in connection with l": It has been said that secret arrangead been made with him by Robert Murur State Department three weeks before the frican landings and that Darlan's presence rs on the night of November 7, 1942, was ged and not the surprise and embarrassAllied authorities that they pretended. If arges were true, I believe the fact would ome evident long since.

If there are those who can accuse Roosevelt and Churchill of being capable of such duplicity—and there are—it is still virtually impossible to imagine Generals Eisenhower and Mark Clark and many other soldiers and sailors suddenly developing the extraordinary talents as actors that the performance of this fabulous masquerade would have required.

There was no previous deal with Darlan, but there was miscalculation and misinformation which caused a subsequent deal with him to seem to be the only solution.

According to Murphy, when the grim-visaged French admiral was awakened to receive the news that the Allied forces were moving in, Darlan turned purple, paced the floor and exclaimed, "I have known for a long time that the British were stupid, but I always believed the Americans were more intelligent. I begin to believe that you make as many mistakes as they do."

However, it is still possible that he was not taken totally by surprise. As soon as he was sure that this was a full-scale operation, he indicated a quick willingness to do business with the "stupid" Allies, which represented a complete turning of his anti-British Vichy coat. Within a few hours of his purpling before Murphy he telephoned General Nogues in Morocco and ordered him to cease resistance—and it is most important to note that Nogues refused to obey this order.

When Murphy told Darlan that the Americans had brought General Henri H. Giraud by submarine out of France to be the new leader in North Africa, Darlan said, "He is not your man, for politically he is a child. He is a good divisional commander, nothing more."

While Darlan was pacing the floor with Murphy in Algiers, Eisenhower was having his troubles in a session with Giraud on the Rock of Gibraltar. A tentative agreement was ultimately reached and on

Monday, the day after the landings, Giraud moved on to Algiers to assume political command of French North Africa.

Darlan's estimate—"he is not your man"—proved lamentably correct. Eisenhower issued a public statement which he later regretted: "It is expected that his (Giraud's) presence there will bring about a cessation of scattered resistance." All that it did bring about among French colonial authorities was resistance to Giraud. As Roosevelt cabled to Churchill, two days later:

In regard to De Gaulle, I have heretofore enjoyed a quiet satisfaction in leaving him in your hands. Apparently I have now acquired a similar problem in brother Giraud . . . We must remember there is also a catfight in progress between Giraud and Darlan, each claiming full military command of French forces in North and West Africa. The principal thought to be driven home to all three of these prima donnas is that the situation is today solely in the military field and that any decision . . . is subject to review and approval by Eisenhower.

It now seemed evident that Darlan was the only authority who could command the obedience of the French officers in North Africa. Therefore, Eisenhower and Clark, with the powerless Giraud on their hands, with long and tenuous lines of communication behind them and the rapid push into Tunisia ahead of them, made the only arrangement which seemed practical or even possible: the deal with Admiral Darlan.

Strictly a Military Responsibility

Eisenhower took full responsibility for this. Roosevelt quoted him as having said later, when they met in Casablanca, "I believe in a theater commander doing these things without referring them back to his home government and then waiting for approval. If a mere general makes a mistake, he can be repudiated and kicked out and disgraced. But a government cannot repudiate and kick out and disgrace itself—not, at any rate, in wartime."

Roosevelt attached great importance to Eisenhower's confession of astonishment at the situation as he found it in North Africa; it did "not even remotely resemble prior calculations." When the supreme commander of a major military operation makes an admission like that it indicates that there must have been something wrong with his Intelligence Service.

This is all the more surprising since North Africa was friendly territory with which the U.S. maintained diplomatic relations. Therefore, the headquarters of Robert Murphy in Algiers and all the American consulates in that area were centers of Intelligence with large staffs which included observers of undoubted competence. Yet Eisenhower was astonished when the local French failed to hail Giraud as a conquering hero. This led to a display of political crudity which made the U.S. government look ridiculously amateurish.

Roosevelt made no bones of his own attitude. The storm of criticism of the Darlan deal reached such proportions within the first week after the landings, that Hopkins, Judge Rosenman and I strongly urged the President to issue a statement to the press. The statement as he issued it was:

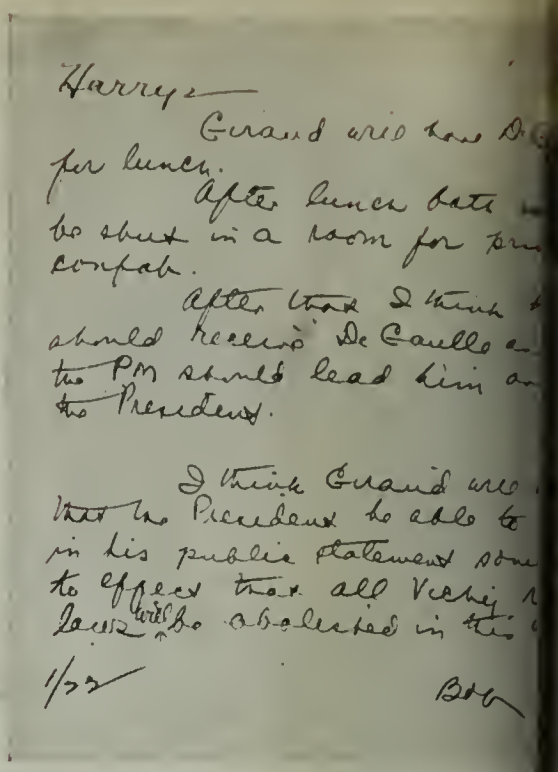
I have accepted General Eisenhower's political arrangements made for the time being in northern and western Africa.

I thoroughly understand and approve the feeling in the United States and Great Britain and among all the other United Nations that in view of the history of the past two years no permanent arrangement should be made with Admiral Darlan . . .

We are opposed to Frenchmen who support Hitler and the Axis. No one in our Army has any authority to discuss the future government of France and the French Empire.

The future French government will be established, not by any individual in metropolitan France or overseas but by the French people themselves after they have been set free by the victory of the United Nations.

The present temporary arrangement in North and West Africa is only a temporary expedient, justified solely by the stress of battle.



The present temporary arrangement has accomplished two military objectives. The first was to save American and British lives, and French lives on the other hand. The second was the vital factor of time. The temporary arrangement has made it possible to avoid a "mopping-up" period in Algiers and Morocco which might have taken a month or two to consummate . . .

It will be noted how frequently Roosevelt inserted the word "temporary" into that statement. This fact certainly did not escape the attention of Darlan himself. He wrote a rather plaintive letter to Clark saying that Roosevelt's words tended to substantiate the view that "I am only a lemon which the Americans will drop after they have squeezed it dry."

Generals Eisenhower and Mark Clark confer with Admiral Darlan outside Allied headquarters in Algiers

The Olsens' BIG SPLASH

BY BILL FAY

THERE is a limit to how much parents can stand. The Olsens endured Zoe Ann's violin scratchings and smiled when she sat down at the piano. But when Zoe Ann (grimly determined to make the high-school band) started blasting away on a borrowed clarinet—well, Mrs. Olsen decided the time had come to use strategy.

"You can have a new clarinet," Mrs. Olsen said, "or you can have the trampolin you've been hinting about. Take your choice."

Fortunately for the Olsens, and their neighbors, Zoe Ann decided to play the trampolin, which is not a musical instrument. A trampolin is a taut canvas sheet attached to springs and mounted on a metal frame twice the size of a double bed. It's the bounciest contraption in the sporting-goods catalogue.

Zoe Ann's tumbleweed afternoons on the trampolin did not make her a champion diver. The trampolin arrived in 1946, a whole year after she won the national low-board title at the ripe old age of fourteen. However, the backyard bouncing did add extra flips and turns to Zoe Ann's repertoire—probably the most complex ever mastered by a woman aquabat.

Trampolin tumbling also contributed to Zoe Ann's startling nerve and muscular control. Example:

A month before the 1947 Indoor nationals, Zoe Ann fell on the springboard and suffered a broken hand. She wore a cast for three weeks, then shifted to a metal splint, practiced three days and captured the one-meter title—without flinching! After each dive she rolled over on her back and swam to the pool ladder holding the splinted hand above-water.

Zoe Ann prevailed over terrific competitive pressure again last spring when Vicki Draves of Los Angeles executed a nearly perfect front dive with a full twist, at the climax of the national three-meter championship. Zoe Ann (in first place by a scant margin) was unperturbed. She duplicated Vicki's twist—and won.

Hollywood has shown considerable interest in Zoe Ann's lissome figure, blond hair and turned-up nose, but Zoe Ann will be hard to sign—unless some smart scenarist figures out a way

Blond, lithe Zoe Ann Olsen, breath-taking in the dive—and out of it

EARL ROSE

It was certainly the biggest hello that I had ever been given in my entire career by a good-looking girl

MRS. O'BRIEN Holds That Tiger

BY JOE MC CARTHY

The Princeton man wanted the Yale man's girl. And his two million dollars had always got him everything else

WHEN I came back from the library, I found Mrs. O'Brien sitting on the porch with a pan on her lap, snapping the ends off string beans. "Sit down and rest your weary bones," she said. "I want to talk to you."

I dropped my torts and property books and collapsed in a chair beside her. "If it's a touch," I said, "you're wasting your time."

Mrs. O'Brien threw a string bean into her mouth, chewed on it and waved to a neighbor who was walking past the front gate. She was wearing her usual daytime uniform, a flowered, cotton house dress and low white sneakers. She was a big, handsome, exuberant woman and, except for her white hair and her motherly figure, she reminded me somewhat of Gene Tunney.

"Now that you mention it, Mr. Robbins," she said, "I am in a terrible financial condition. A bill collector is after me about those evergreen trees I bought last fall. He's threatening to attach the old man's pay. The gas company called up today and threatened to turn off the gas. I asked them to leave it on for a couple of hours so I could put my head in the oven and end it all."

When I had finished Yale and nounced that I intended to tak whack at Harvard Law School, Uncle Ken advised me to v immediately for a room in l O'Brien's house. "Best place for to live in Cambridge," he said. " of a headquarters for Yale gradu who are at Harvard Law School." named several successful New Y attorneys and two former Cab members who had lived there students.

"But," he added, "I'm not sure l O'Brien will take you. In my day didn't let anybody live in her h unless his family was in the New Y or Boston social registers. Or u he made one of the top honor soci at New Haven—Skull and Bone Scroll and Key. You only got ta for Wolf's Head, didn't you?"

I was finally accepted by O'Brien, not for any merits of my but because I was a nephew of Robbins, the man who had de ished the banister of her front s in a fit of ecstasy the day D Pond's Yale football team defe Harvard.

"The men in those days were colorful," she often said, admiri "You young people today spend

time with your noses in a book."
und her house comfortable, but

," she said. She hitched her chair
to mine and lowered her voice.
Robbins, did you know that Mr.
on was out with your room-
girl again last night?"

I wondered what she expected me to do about it. "Well?" I said.

She was disgusted. "A lousy Princeton man," she said, "takes a girl away from another Yale man and you just sit there and say, 'Well?' The young people today have no spirit, no loyalty to one another. Do you think your uncle and the Yale men who lived here with him back in 1924 would have stood for a thing like that?"

Mrs. O'Brien lapsed briefly into a sullen silence, which was broken only by the snapping of her string beans. Bill Drayton lived alone in the two-room suite above Jerome Lydecker and me, which meant that he paid double rent. He was not exactly the type of person I would pick as my only companion on a two-month fishing trip but he seemed all right otherwise. Mrs. O'Brien disapproved of him because he went to Mercersburg and Princeton instead of St. Paul's and Yale and his father was a new, self-made millionaire with a department store in Pittsburgh who did not own a stable of steeplechasers.

As Uncle Fred said, Mrs. O'Brien had the same reverence for correct social backgrounds as Louis B. Mayer has for Lassie. She missed her true vocation. She should have been writing the Cholly Knickerbocker society column in the New York Journal-American.

"What's wrong with Princeton?" I asked. "James Stewart and Woodrow Wilson went there. And Einstein is there right now."

"Has James Stewart won any Academy Awards lately? Mr. Robbins, don't talk to me about Princeton men. I hate them. I've been renting rooms to Harvard Law School men for thirty years and I've rubbed elbows with graduates of every big college in the country. I've had men here from Pennsylvania, Amherst, Stanford, Michigan, Brown, Dartmouth and even Oxford and Cambridge. Of course, I like Yale men best and I try to keep this house as Yale as possible. Now and then, I let in a few Harvard men. They're conservative and stuffy but they're gentlemen."

"President Conant of Harvard would be pleased to hear you say that," I observed. "But what's this got to do with Princeton?"

"I'm trying to tell you that I get along with everybody else. But every time I rent a room to a Princeton man, I have trouble. The first one back in 1922, he had plenty of money but he owned only one shirt. He used to wash it himself in the bathtub every night and hang it out the front window to dry. And he wore a leather strap around his head when he was studying."

"What happened to him when he finished law school?" I asked. "I'll bet he became a Supreme Court justice."

"And that last Princeton man I let in here against my better judgment in 1934. He accused me of stealing one of his ski poles. Now what would I do with a ski pole?"

She didn't give me a chance to suggest that the sharp end could be used on bill collectors.

"But in this case, the Princeton angle is only part of it. That girl Mr. Drayton is trying to take away from Mr. Lydecker, that Emily Adams, she's a very nice girl. I've known her father and mother since 1918 when they moved into that house up the street. Besides, I hate to see Mr. Lydecker lose out with her, because his cousin, Mr. George Lydecker, was one of the finest Yale men who ever lived in this house. Skull and Bones man. I'll never forget the wonderful mint julep party he gave after the

MORE BEAUTIFUL THAN MURDER

Exhaustion was creeping up on me. The girl in my arms was soft a relaxing—and now I could forget the sensational publicity, the d

BY OCTAVUS ROY COHE

CONCLUDING A NOVEL OF TENDER LOVE AND DESPERATE CRI

The Story:

In spite of the fact that STEVE BLAKE, young engineer, has been acquitted of the murder of JEFF NULTY, ex-convict manager of the Casa Linda Night Club, Detective MARTY WALSH still thinks Steve is guilty. He also thinks Steve is guilty of the murders of CONCHITA MONTERO, a dancer, and PETE CONNOLLY, famous jockey.

Steve himself thinks all these murders are related, but his only lead is MRS. PATRICIA KINGSLEY. She perjured herself to save his life, and Steve is sure she is covering for someone, possibly her husband, REX KINGSLEY, an egotistic, crippled dancer who blames his wife for his lameness. Kingsley, formerly Jeff Nulty's assistant, is now manager of the Casa Linda Night Club, which is owned, along with the Casa Linda Apartments, by WADE RAMSAY. Ramsay's blond secretary, RUSTY MASON, turns out to be a former accomplice of Nulty's, and circumstances seem to indicate that she killed Nulty.

Rex Kingsley suddenly disappears, and secretly calls Steve from Victorville, a town about three hours away. Rex tells Steve he has documentary proof that will solve the murders, and asks Steve to come at once.

Steve and Pat drive out, but when they arrive at the appointed place, they find Rex Kingsley dead. They quickly send for Marty Walsh. Pat, free to talk now that Rex is dead, tells Steve and Walsh that her husband had confessed to killing Nulty.

Then Steve Blake cuts in with the astonishing statement that he doesn't think Rex Kingsley was the murderer, in spite of his confession.

WELL, I'll be a son of a gun!" Marty Walsh exclaimed, as the car slowed down to a meager twenty. "Stevie boy, I didn't know you had it in you."

"What?"

"To think so clear and talk so straight."

"I talked straight on the witness stand."

"What you said then didn't sound smart. This sounds even dumber."

"Why?"

"Because if Kingsley didn't kill Nulty, somebody else did. And Conchita and Connolly have been murdered since then. You haven't been tried for those killings. And nobody has even started asking you a lot of questions about whether you knocked Kingsley off."

Pat said sharply, "But he didn was with him . . ."

"Sure. I know. The one thing two got between you is alibis. mind you. I ain't accusing S Maybe I don't even think he did of these murders. But I agree him that Kingsley didn't kill N and I'll go one step further. I'l whoever killed that guy also k Conchita and Pete Connolly."

I said, "You haven't gone enough, Marty. Who killed Kin —and why?"

"Meaning if you didn't?"

"Yes."

"I'll be damned if I know. Yo any ideas, Steve?"

I said I hadn't. Marty said, not jumping at any conclusion time. The only thing I know fo

HEAVY-DUTY CHAMPION

STANDARD OF THE HIGHWAY

FOR 16 YEARS more heavy-duty International Trucks have been bought by American commerce and industry than any other make.

International Model KB-8-1—Standard of the Highway—is but one example of the *complete* International heavy-duty line.

The International KB-8-1 was put in operation by first buyers early this year. Over-the-road truck operators and drivers everywhere acclaim it—

For its extra power to climb hills faster and maintain rigid schedules.

For its ability to carry more net payload, without exceeding its gross weight rating, than trucks with the same power but more chassis weight.

For every truck job there is an International of the right type, size and power, beginning with half-ton pickups and extending to giant off-highway trucks with GVW ratings of 90,000 pounds for logging, mining, oil field service, and construction work.

The International Dealer or Branch nearby will be pleased to show you how Internationals can serve you profitably.

is that our prime suspect is out of the picture. Looks like I got to start all over, right from the beginning. Some of the trial will be pretty cold by now. And the most thing I can't figure is motive."

"If a person commits one murder—" I began.

"You're right, Steve. Kill one, and it's easy to go on from there. Somebody knows too much, somebody finds out something. You gotta protect yourself—that's the way the killer figures. He dopes it out that they can't execute him but once."

THE lieutenant had got himself all wound up. He kept right on going: "Take you, for instance, Stevie. I could think of plenty of motive if I wanted to. Like for instance, you could have killed Nulty. You maybe hid the gun in Rusty Mason's office. It might never be found, but if it was, it could point to the girl. Conchita found that gun. She knew it checked with yours. You couldn't tell whether she'd spill or whether she'd keep the info to herself. It all depended on what she wanted. Connolly had a quarrel with you. Maybe on account of him being in love with Rusty and the gun being in her office, he might have done some sharp thinking and hit on something. So you shoot him. By that time you've fallen for Mrs. Kingsley. You learn where Rex is hiding, drive up there and kill him—taking your alibi along. Like it?"

"Not much. How about Rusty?"

"Now you got something. Criminal tie-up with Nulty. She keeps the gun because it's yours. She could figure that it would point the finger straighter at you. Conchita I didn't get, but maybe I could toss up a good motive even there if I put my mind to it. Connolly and she had quarreled. He had received the clippings, and could have told her off. Not so bad, huh?"

"How did she know where to find Kingsley?"

"You ask the damnedest questions. So I'll ask a few, myself. Questions I got to find the answer to, sooner or later." He was talking impersonally, but his police brain was clicking merrily. "I think Kingsley hired the two hoods who beat you up. If so, why? If not, who did? If neither you nor Mrs. Kingsley killed Rex—how did whoever killed him know where to find him? If Rusty Mason killed Nulty, why did she keep the gun? I know I've given a couple of reasons, but they don't make a lot of sense, even to me. How much did Mario like Conchita and how much did he hate Nulty? Who would have any motive for killing Nulty except you and Rusty and Kingsley? And I don't think Kingsley's motive, the job business, is strong enough. Who is this guy Floyd Andrews? What's his real interest? Where does he fit into Nulty's life or Connolly's or Conchita's or Kingsley's? And one more thing, Steve . . . maybe you haven't thought of it . . . your pal Brian Garland has always been around when things were happening."

I said. "That's the first really ridiculous idea you've had."

"I guess so." He touched the accelerator and the car speeded up. "We're all three tuckered out. Tough night. But what I'm thinking is this: I'm gonna appreciate all the help I can get from here in. If you two are clean, you'd ought to be willing to help."

Pat and I said we'd be glad to.

"That's swell," Marty said. "Simply swell. Except that if I'm being kidded, by two mighty nice people—both of whom are right here in this car with me—those two nice people *could* wind up in San Quentin." . . .

It was seven o'clock when we reached the Casa Linda. Marty said, "Goodby for now," and rolled off.

Pat invited me in. Perhaps she was thinking of Rex, back there in San Bernardino. Perhaps she was thinking of me. Even at this hour of the morning, the apartment was lovely: It was everything an expensive apartment should be. I sat on the couch and beckoned to her. She understood what I meant. When she sat down, I put my arm around her.

I said, "I know this isn't the time or the place to make love to you, but I'm doing it, anyway."

I kissed her. Her arms went around my neck, and she clung tight. There didn't seem to be anything wrong with the picture, and there was a great deal that was right with it.

She hadn't been in love with Rex. Not for a long time. Loyal, yes; but not in love. She had experienced an emotion which was more shock than grief. She had been pushed around. She needed comforting. I did what I could. The fact that there was lots of daylight outside seemed to make it quite respectable.

"We ran out of olives, but fortunately there was some olive oil"

COLLIER'S CLAUDE

It was good to be together this way. I'd wanted it so much and had fought against it so hard. I had begun by being suspicious of her. Even yet I couldn't have sworn that she was in the clear. But that didn't matter any more. Not too much, anyway.

We didn't talk much, but what we did say had nothing to do with what we'd just been through. We probably sounded like a couple of high-school kids caught in the rip tide of a first love. Each affectionate cliché assumed the magnitude of a profound utterance. I was learning a lot of things about being in love, and I liked them all.

IT HAD to end. And it did—at eight o'clock. We were both exhausted. I kissed her, once for good night and once for good morning. We agreed to phone each other as soon as we'd grabbed some sleep or had discovered that we couldn't. I closed her door and stepped out.

A man was leaning against the wall, near the elevator. He didn't seem surprised to see me walk out of Pat Kingsley's room at that hour. He didn't look shocked.

It was Floyd Andrews. I hoped he wouldn't crack wise. I needn't have worried. He stopped in front of my door and waited for me to get there. He said cheerfully, "Good morning, Blake."

I said good morning. I wondered what he was doing there, and how long he'd been playing watchdog in the hall. He said, "I'd like to talk. May I go in with you?"

I shook my head. "Sorry, Andrews. Not this morning, please."

"It's about Rex Kingsley's murder," he said quietly.

This lad could say the most surprising things. "What do you know about that?"

"Not much. Just what's in the papers under a San Bernardino date line."

"Whatever you've got to say, it'll keep." I didn't want to talk to him. I didn't want to discuss murder any more. I was sick and tired of it. All I wanted was to be let alone, so I could concentrate on adding up how much I was in love. I said, "You been up all night, Andrews?"

"Nope. Had a good sleep. But I can't prove it."

No use wasting time on this guy. He was primed for it. I wasn't. He'd probably figured out every answer. It would take a lad who was much smarter than I—and much more wide awake—to learn anything worth knowing. I said, "If you want to talk about Rex Kingsley, call Lieutenant Walsh."

He said, "Look, Steve—there are things I've got to know . . ."

"I'll tell you only two," I said. "Pat Kingsley had nothing to do with his death. Neither did I."

I unlocked my door. The last thing I saw before I closed it was Floyd Andrews looking at me reproachfully. Well, I felt reproachful, too. He had gummed up some of my new exaltation. I got my clothes off, opened a window and shoved myself under the blankets. The next thing I knew it was two o'clock. I peeked outside my door, but the hallway was empty. Nobody there. Not even Floyd Andrews; he was slipping.

The next several days combined happiness, discomfort and downright misery. The happiness came from Pat. She didn't pretend a grief which she did not feel. ting into your apartment, stealing your gun and setting you up as the patsy?

It was tough going. I tried to maintain a clinical attitude. With Pat Kingsley in the background—and a lot closer than that very frequently—it wasn't easy. I wondered whether the X factor might center in her, whether the fact that I was in love with her might not be blinding me to the obvious. And then, after six days and nights of work, almost a week during which I didn't go near the plant, didn't think about aerodynamics, an idea hit. Just the faintest, most elusive, most intangible of thoughts. A sentence casually spoken, not really an idea, merely a hunch.

I felt myself quivering inside. I had felt it before when weeks and months of ceaseless concentration had brought a hunch that promised results. I sat up most of the night thinking about it.

I went downtown to see Brian Garland. He was busy, but I dragged him away from his work. I didn't tell him what I wanted, gave no hint of where I hoped I was headed. He kidded me about being so mysterious. He wanted to know why I wasn't content to let the police do police work.

He went with me to the Hall of Records, where he knew his way around and I didn't. I asked him about a lawyer named George Lamar Grandin, and Brian laughed that off. Grandin had been dead since the summer of 1944. We stuck around the Hall of Records for a long time. We spent the afternoon together. Brian Garland was beginning to look worried. He was also more than slightly fed up with me. He accused me of having become a monomaniac. He asked why the hell I wasn't content to leave well enough alone.

BRIAN went with me to the home of a friend of his. This friend lived out in Sherman Oaks. He was a hobbyist and a rich one. His hobby was scale-model electric trains. He was a nut about them. I got him talking about his hobby, and about electrical gadgets in general. I stuck around a long time while this man talked and ran his little trains for us and explained remote control and automatic coupling. When we left there, Garland was supremely disgusted. "It's got you," he said. "Escape mechanism. You've been flirting with tragedy so long, you've suddenly got to play with toys yet."

I took my theories home with me. Pat called up and wanted to know where I'd been keeping myself. I told her I was busy. I told her I loved her, but that I needed to be by myself for a while longer. I got into a lounging robe and sat at my desk. Papers spread all over it, all the notes I'd been making for a week. All the hopes, all the disappointments.

My idea was there. Now I was merely giving it the test. Was the theory sound? Was it certain? By two in the morning I decided that I wasn't sure, that perhaps I'd never be sure. Certainly not unless Lieutenant Marty Walsh would play ball.

At nine o'clock I was at City Hall. Homicide Division. Marty was there. I said I wanted to talk to him alone. He took me into Room 42, which was a bare space containing a table, a few chairs and some blank walls.

Marty was a wonderful listener. That's the basic tenet of a good cop's credo: As long as the sucker will talk, let him do it. When I finished, he said, "Steve, you're as nutty as a fruitcake. But maybe you got something."

"Will you play along, Marty?"

"Sure. What can I lose? On just what you've told me, we couldn't make it stick. This way, the quarry might be flushed."

"When?" I asked.

"Saturday night? That ought to be good. I'll get Bert Lane to help out." His eyes held an eager, hopeful gleam. "This may not work," he said, "but we'll have a lot of fun trying it."

"It'll work, Marty. It's got to."

He walked down the corridor with me. Just before we said goodby, he asked one question; asked it with an earnestness which bothered me. "You won't even tell Mrs. Kingsley about this?"

"I won't tell even her," I promised. And as I walked away from him, I began to worry about his insistence.

I'VE never acted in a play. I've never produced one. But I've read about opening-night jitters, and that was what I was feeling now. This little scheme of mine was either going to work or it wasn't. If it did, we'd know before morning just who killed Jeff Nulty and the others. We'd know why. But if the scheme didn't work, I'd be up the creek without a paddle. I might even be in jail.

Marty was playing it my way, but he wasn't sold 100 per cent. He figured my idea was solid enough to try. He probably figured also that I might simply be playing cute. It was complimentary in a way, but not calculated to fill me with good cheer and optimism.

His friendly attitude driving back from San Bernardino hadn't fooled me for little green apples. Marty Walsh was a smart cop He had started this thing by building a good case against me and then having it blow up on the strength of what he now knew was perjured testimony. If things went wrong, I'd be behind the eight ball and still visible to the naked eye.

I kept in touch with Marty Saturday afternoon and during the early part of the evening. You'd have thought we were fraternity brothers, we were that cordial. But neither of us was fooled for one little instant. We knew this was the pay-off or else.

We wanted certain folks to be at the Casa Linda that night. I assured Marty we could rely on Floyd Andrews. That lad had stuck to me closer than a lonely flea to a long-haired dog. If I spent Saturday night at the club, so would Floyd Andrews. You could bet that one straight across the board.

Mario would be there. It was his job, he'd have to be there. Marty had suggested checking on Vince Mabry, the dapper, temperamental little orchestra leader. That didn't make much sense to me, but Marty argued that nothing else made sense either, so I checked on Vince.

I had a little trouble with Pat. She said she wanted to be with me, but why couldn't we make it somewhere else? The atmosphere of the Club Casa Linda wasn't calculated to fill her with joy. I told her I had reasons, but didn't tell her what the reasons were. I promised that if she'd spend the evening down there with me, I'd never invite her to the Casa Linda again.

Even then she showed no enthusiasm. Sitting through a show there, a show which wasn't conducted by Rex Kingsley and in which Conchita wouldn't dance or sing—that wasn't going to be easy. But she finally gave in. She was so reluctant that I experienced a few moments of fright. I had made valiant promises to run this thing down if I could. I had my own ideas, but that didn't mean they were right. Things could conceivably work out badly for Pat.

I invited Brian Garland to be my guest. I told him we'd be a party of three: Pat, himself and me. I said I'd furnish him with all the Scotch he wanted, and he assured me that that was an impossibility, but that if I'd promise him all he could consume, he'd be there. Any time after ten o'clock.

Rusty Mason presented a problem that I couldn't solve. I was no longer on her eligible list. I didn't dare approach her. But she had to be among those present. I called Marty, and he gave it some thought. Finally he said, "I got an idea. Get Wade Ramsay to bring her."

"How'll I do that?"

"You're a friend of his. Tell him something's cooking and we want he stairs. He's her boss. He can wo

I said I'd try. I rode up to t house, and told Ramsay what Lie Walsh wanted. That was late aft He said he didn't see much sen but if Walsh thought he could c case, he'd string along. He sai why is he so anxious to get Rus there? Does he think she's the o

I said, "I don't know what h And I certainly don't put too mu in what he says."

Ramsay called Rusty Mason was still there. He talked in a sc fatherly manner. He said she'd ing herself lots of no good re which meant since the nig Connolly was killed. He said he scribing a remedy and intended t vise the first dose. He insisted let him pick her up, take her t somewhere and then move bac Club Casa Linda for the last sho his end of the conversation, I fig said no, but after a while she ga

DON TOBIN

SPORTING ODDS

One of the famous umpires of the past was Joe Cantillion, and one of the players who rode umpires to the limit was Dick Cooley. Their arguments went on for years until one day, against Chicago, Cooley slashed a long drive deep into center field. The ball looked like a cinch to clear Bill Lange, Chicago center fielder, and Cooley rounded first with his head down, intent upon scoring an inside-the-park homer.

Cantillion raced with him on the infield side. "Touch second!" he yelled. "Touch second, or I'll call you out!" Cooley rounded second and headed for third. "Touch third!" shouted Cantillion. "Be sure to touch third!" Cooley touched third and headed for home. Cantillion was still right with him, screaming: "Touch home when you slide! Touch home and don't spike the catcher!"

Cooley went across home plate with a beautiful head-first dive. He got up, brushed himself off and waited for the applause of the fans. But Cantillion walked up to him and said: "Sit down, you big stiff—you're out on a fly ball to center field."

—Douglas Moore, South Gate, California

An American Original

Golden Discovery

1848-1948

An epic in history... "the gold rush" in California one hundred years ago. This American Original discovery opened the West to population and trade.

Panning gold in California of the '40's. Painted by Dean Cornwell for The House of Seagram.

Seagram's Ancient Bottle Gin is a modern American Original... the first gin of its kind ever distilled in this country. *Naturally* golden, *naturally* smoother, because nothing but patience is added in the exclusive process by which it is made. Millions are making *this* golden discovery—just ask anyone who's tasted it!

DISTILLED FROM AMERICAN GRAIN. 90 PROOF. SEAGRAM-DISTILLERS CORP., NEW YORK

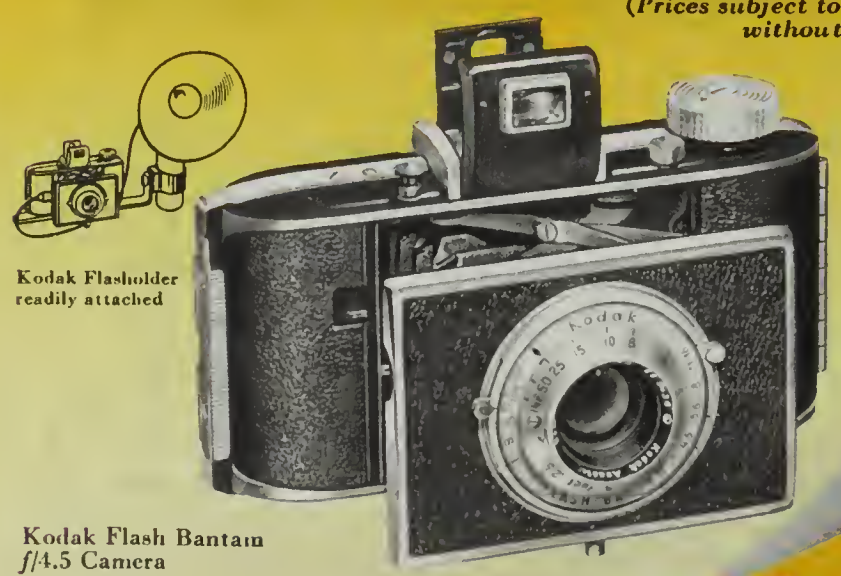
Color Pictures

anyone could want...



. . . and they're by no means among the top-price cameras

Both of these fine, modern, medium-priced "miniatures" make splendid full-color Kodachrome transparencies. You project them on a home screen . . . and have big, beautiful Kodachrome Prints made from them. You can get black-and-white pictures, too, of course—from crisp, clear little negatives made on black-and-white Kodak Films.

(above) **Kodak 35 *f*/3.5 Camera with Range Finder** The split-field range finder helps you focus instantly, accurately. Kodak Anastar *f*/3.5 *Lumenized* Lens; 1/200-second Flash Kodamatic Shutter. Double-exposure prevention. Automatic exposure counter, automatic film stop, automatic shutter cocking. $75 plus tax. Kodak Flasholder, $9.50 plus tax.

(below) **Kodak Flash Bantam *f*/4.5 Camera** Hardly a handful. It's the smallest of the Kodak miniatures. Weighs only 13 ounces; only 4⅝ inches wide. Kodak Anastar *f*/4.5 *Lumenized* Lens; 1/200-second shutter, synchronized for "flash" up to 1/100. Body shutter release, film-stop mechanism. $50 plus tax. Kodak Flasholder, $9.50 plus tax. At your Kodak dealer's. EASTMAN KODAK CO., ROCHESTER 4, N. Y.

"Just a minute! Aren't you the people whose horn got stuck last week?"

COLLIER'S

thing. Mario looked startled. Lane nodded emphatically, Mario gave an expressive Spanish shrug. They talked some more. Then Lane slapped him on the back again and moved off. Mario stood watching him, a worried, speculative light in his eyes.

Now the elongated, red-faced detective lieutenant from Hollywood was at our table. He said, "Don't get up, folks—don't think of it. I'll just siddown in passing."

He lowered himself into a chair which he snitched from the next table. He did it with the meticulous care of a person who isn't quite certain whether he can stand a few more, but is willing to try.
